Annual Report September 30, 2013

Chairman s Letter

Dear Shareholder,

On behalf of the team at DoubleLine, I am pleased to deliver the Annual Report for the DoubleLine Opportunistic Credit Fund (NYSE: DBL, the Fund) for the 12-month period ending September 30, 2013. On the following pages, you will find specific information regarding the Fund s operations and holdings. In addition we discuss the Fund s total return investment performance and the main drivers of that performance during the reporting period.

If you have any questions regarding the DoubleLine Funds please don thesitate to call us at 877-DLine11 (877-354-6311), or visit our website www.doublelinefunds.com to hear our investment management team offer deeper insights and analysis on relevant capital market activity impacting investors today. We value the trust that you have placed with us, and we will continue to strive to offer thoughtful investment solutions to our shareholders.

Sincerely,

Ronald R. Redell, CFA

Chairman of the Board of Trustees

DoubleLine Opportunistic Credit Fund

4 DoubleLine Opportunistic Credit Fund

Financial Markets Highlights

Financial Markets Highlights:

Agency Mortgage-Backed Securities (Agency MBS)

The Agency MBS sector, as measured by the Barclays U.S. MBS Index, had a return of -1.2% for the twelve-month period ending September 30, 2013. U.S. Treasury rates rose, 10-year U.S. Treasuries were up 99 basis points (bps), and the yield curve steepened during the year. Mortgage rate changes were consistent with these moves as the Freddie Mac (FHLMC) Commitment Rate also went up by approximately 100 bps, moving from 3.37% to 4.32% during the period. The Agency MBS sector outperformed both the Corporate and U.S. Treasury sectors of the Barclays U.S. Aggregate Bond Index during this period. Prices of Agency MBS securities, however, were down for this twelve-month period. Lower coupon and longer maturity Agency MBS were down more in price than higher coupon and shorter maturity MBS. 30-year Fannie Mae (FNMA) securities with 3% coupons were down over 8% for the year. 15-year MBS pass-throughs were down 1% to 3% for the year. The average price of securities in the Barclays U.S. MBS Index declined from \$108.62 on September 30, 2012 to \$104.20 on September 30, 2013. Pay-ups for specialized pools that have expectations of slower prepayments also fell over the past twelve months. This is due to the fact that when prices on mortgages are lower, the advantage of slower prepayments is reduced.

While the price action of securities in the Agency MBS sector was dominated by the change in rates, it was also affected by thoughts about the Federal Reserve (Fed), quantitative easing (QE) and potential tapering of QE. Throughout the past twelve months, prevailing market sentiment about the future of QE influenced the valuation of mortgage securities. The Fed has been buying \$45 billion per month in Agency MBS and their purchases have been focused on current coupon mortgages. The current market expectation is that the Fed will be tapering sometime in the near future. We believe a reduction of mortgage purchases by the Fed would be bad for the sector by itself, but it must be mentioned that the market has been experiencing a reduction in the amount of mortgages issued. This reduction in supply is much larger than the expected tapering. Total gross issuance of Government/Agency MBS has decreased over the period to approximately \$130 billion per month as of September 30, 2013.

The reason gross issuance has decreased is mainly due to higher rates leading to slower prepayments. Over the year, the market has experienced a reduction in prepayment speeds, with current speeds only around 50% of where they were one year ago. Prepayment speeds are at levels that were last seen in the middle of 2011. This environment has led to better performance for higher coupon mortgages which have benefitted to a higher degree from reductions in prepayments.

As rates have risen and prepayment speeds have slowed down, the duration of the MBS sector has extended. It has gone from 2.3 years in September 2012 to 5.4 years in September 2013. The duration of the Agency MBS market during the past two months is at a historic high. On a month-end reporting basis, the longest duration for the Agency MBS market previously reported by the Barclays U.S. MBS Index was in May 1994 at 4.8 years. So while any additional interest rate rises from the present could extend the duration for the Agency MBS market further, it has already experienced a significant extension.

Housing prices are up 10-15% nationally over the past year. With housing doing better, it is less likely that there will be new and different programs from Washington to help the housing market. Currently, HARP (Home Affordable Refinance Program) 2.0 and HAMP (Home Affordable Modification Program) are the programs in place. HARP facilitates refinancing for financially constrained borrowers. It continues to have an effect on higher coupon mortgages, allowing them to prepay faster than they otherwise would. A continuation of discussions regarding the future of the Government-Sponsored Enterprises (GSEs) occurred during the period. Most notably was the

Corker-Warner Bill which would create a

Annual Report September 30, 2013 **5**

Financial Markets Highlights (Cont.)

new GSE intended to help facilitate the home buying process by making the mortgage process more efficient without putting the taxpayer on the hook for the whole risk. The ultimate resolution of GSE restructuring, if any, will not be known for a while, nor do we know if any such change will come through this bill or another route. It seems that thoughts to potential solutions to the issue lie along political lines.

Non-Agency Mortgage-Backed Securities (Non-Agency MBS)

The rebound of the U.S. housing market has been favorable for the performance of the Non-Agency MBS sector during the 12 months ended September 30, 2013. Housing inventory has tightened steadily due to record low mortgage rates causing buyers to re-enter the housing market. Additionally, the emergences of institutional buy-to-rent programs have absorbed much of the inventory overhang in many fringe markets. Average home price appreciation (HPA) in U.S. markets was 12.4% over this time period, according to the Standard & Poor s (S&P)/Case-Shiller 20-City Composite Home Price Index. The Housing Affordability Index increased modestly during the first six months of 2013 when the average conventional 30-year fixed mortgage rate hovered around 3.50%; however, affordability dropped sharply as mortgage rate rose to a high of 4.67% during the third quarter of 2013. The consensus amongst Wall Street research analysts is that the pace of home price appreciation that has been observed over the 12-month period should continue to be moderate over the next several months.

As expected, Non-Agency collateral performance has directly followed suit with the overall housing market. Delinquencies, prepayment speeds and liquidation rates have all improved over the past 12 months. Option Adjustable-Rate Mortgage (ARM) collateral has seen the most marked improvement with delinquencies and liquidation rates showing the steepest declines. Subprime collateral also showed a sharp improvement with delinquencies leveling off and liquidation rates declining each month during the period. Higher quality collateral, such as prime and Alt-A Non-Agency MBS, saw modest improvements as they were coming off a better foundation and did not see as much stress during the 2008 financial crisis. Loss severities on liquidated loans in all sectors remained steady despite rising HPA. Our belief is that servicer advances on legacy delinquent loans are offsetting the HPA gains and we feel severity improvements on liquidated loans will be seen once these loans are liquidated from the pools.

Modification rates have declined from late 2012 and stabilized in 2013 amongst all collateral types other than subprime. Subprime collateral has observed rising rates of modification, namely principal write downs and payment reductions, as servicers consolidate and attempt to transition delinquent loans into re-performing loans. The pace of servicer consolidations has been brisk and we expect the ramifications of recent consolidations to be felt for many months to come. The use of eminent domain and its implications for the MBS market continued to be a significant issue and appears far from reaching a resolution. Key questions remain regarding whether loan owners would be fairly compensated and if pushing ahead with this agenda would harm municipalities rather than aid them. Doubleline is following the developments closely and monitoring any potential impacts it may have on the Non-Agency bond market.

The ABX Index is a tradable synthetic index referencing a basket of 20 subprime mortgage bonds. This index is viewed as a proxy for the performance for the subprime mortgage market. For the 12-month period ending September 30, 2013, ABX 2007-1 AAA returned 13.95%. Distressed sectors such as Option Arm and Subprime bonds have seen the largest gains as they observed the largest price declines during the 2008 financial crisis. During the same period, prime fixed-rate and Alt-A fixed-rate bonds saw price appreciation of approximately 6.25% and 7.50%, respectively.

6 DoubleLine Opportunistic Credit Fund

Bid list volume varied widely during the past 12 months. For example, the fourth quarter of 2012 saw \$38 billion trade on bid lists whereas during a very busy second quarter of 2013, \$66 billion of principal traded through bid lists. There were some notable bid lists during the second quarter where multiple lists of over \$2 billion traded in a day. This type of volume coupled with fears of banking regulations and redemptions on bond funds caused a softening in the non-Agency markets. Loss-adjusted yields on prime, Alt-A, and subprime widened out to 5.5%, 6% and 8%, respectively. Despite the rumors of the reduction of the government bond buying program, higher mortgage rates and general disagreement between party lines in the U.S. government, non-agency bonds have rallied from the June weakness. Supply technicals have been the driving force of the rally and events on the periphery, regardless of how significant of an impact they may have on the macro markets, have thus far been unable to change the course.

Annual Report September 30, 2013

Management s Discussion of Fund Performance

Management Discussion of Fund Performance:

The DoubleLine Opportunistic Credit Fund from an NAV standpoint outperformed the Barclays U.S. Aggregate Bond Index return of -1.68% over the twelve-month period ending September 30, 2013. With U.S. Treasury rates rising close to 100 bps during the 12-month period, the Agency MBS component of the portfolio experienced negative price returns with longer duration securities, such as inverse floating-rate and inverse interest-only bonds, declining the most. As of the end of the period, these securities continued to earn a high income stream as LIBOR rates remained low. The Non-Agency Residential Mortgage-Backed Security (RMBS) component of the portfolio more than offset the negative returns seen in the Agency MBS space, as bonds across the entire credit quality spectrum benefited from price gains. Higher credit quality bonds within the portfolio, such as bonds backed by prime and Alt-A collateral, continued to outperform over the period as prices rose and those securities earned high coupon returns. Improving fundamentals seen in the housing sector continued to help shield those securities from heightened volatility seen in the broader fixed income markets. At the end of September, the Fund had added leverage to its portfolio representing approximately 16% of the Fund s total assets (including assets obtained through such leverage).

Period 9-30-12 through 9-30-13

Market Price Return Net Asset Value (NAV) Return Barclays U.S. Aggregate Bond Index 1-Year (Annualized) -6.60% 2.24% -1.68%

Opinions expressed herein are as of September 30, 2013 and are subject to change at any time, are not guaranteed and should not be considered investment advice. This report is for the information of shareholders of the Fund.

The views expressed herein (including any forward-looking statement) may not be relied upon as investment advice or as an indication of the Fund s trading intent. Information included herein is not an indication of the Fund s future portfolio composition. Securities and indices discussed are not recommendations and are presented as examples of issue selection or portfolio management processes. They have been picked for comparison or illustration purposes only. No security presented within is either offered for sale or purchase. DoubleLine reserves the right to change its investment perspective and outlook without notice as market conditions dictate or as additional information becomes available.

Investment strategies may not achieve the desired results due to implementation lag, other timing factors, portfolio management decision making, economic or market conditions or other unanticipated factors. The views and forecasts expressed in this material are subject to change without notice, may not come to pass and do not represent a recommendation or offer of any particular security, strategy, or investment. DoubleLine® is a registered trademark of DoubleLine Capital LP.

Shares of closed-end investment companies frequently trade at a discount to their net asset value, which may increase investors—risk of loss. There are risks associated with an investment in the Fund. Investors should consider the Fund—s investment objective, risks, charges and expenses carefully before investing. An investment in the Fund should not constitute a complete investment program.

The Fund s daily New York Stock Exchange closing prices, net asset values per share, as well as other information are available at http://www.doubleline.com/closed end funds/opportunistic credit/overview.html or by calling the Fund s shareholder servicing agent at (877) 354-6311.

This document is not an offer to sell securities or the solicitation of an offer to buy securities, nor shall there be any sale or offer of these securities, in any jurisdiction where such sale or offer is not permitted.

The Fund s shares are only offered through broker/dealers on the secondary market. Unlike an open-end mutual fund, a closed-end fund offers a fixed number of shares for sale. After the initial public offering, shares are bought and sold in the secondary marketplace, and the market price of the shares is determined by supply and demand, not by net asset value (NAV), often at a lower price than the NAV. A closed-end fund is not required to buy its shares back from investors upon request.

Fund investing involves risk. Principal loss is possible.

Investments in debt securities typically decline in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in asset-backed and mortgage-backed securities include additional risks that investors should be aware of including credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater for investments in emerging markets. Investments in lower rated and non-rated securities present a greater risk of loss to principal and interest than higher rated securities. Investment strategies may not achieve the desired results due to implementation lag, other timing factors, portfolio management decision-making, economic or market conditions or other unanticipated factors.

8 DoubleLine Opportunistic Credit Fund

The Fund is a non-diversified investment company and therefore may invest a greater percentage of its assets in the securities of a single issuer or a limited number of issuers than funds that are diversified. Accordingly, the Fund is more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund might be.

In addition, the Fund may invest in other asset classes and investments such as, among others, REITs, credit default swaps, short sales, derivatives and smaller companies which include additional risks.

The Fund's investment objectives, risks, charges and expenses must be considered carefully before investing. You can obtain the Fund's most recent periodic reports and certain other regulatory filings by calling 1 (877) 354-6311/1 (877) DLINE11, or visiting www.doublelinefunds.com. You should read these reports and other filings carefully before investing.

The performance shown assumes the reinvestment of all dividends and distributions and does not reflect any reductions for taxes. Total return does not reflect broker commissions or sales charges in connection with the purchase or sale of Fund shares. *Performance data quoted represents past performance; past performance does not guarantee future results.* The investment return and principal value of an investment will fluctuate so that an investor s shares, when sold, may be worth more or less than original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by calling (877) 354-6311 or by visiting http://www.doubleline.com/closed end funds/opportunistic credit/overview.html.

This material may include statements that constitute forward-looking statements under the U.S. securities laws. Forward-looking statements include, among other things, projections, estimates, and information about possible or future results related to the Fund, market or regulatory developments. The views expressed herein are not guarantees of future performance or economic results and involve certain risks, uncertainties and assumptions that could cause actual outcomes and results to differ materially from the views expressed herein. The views expressed herein are subject to change at any time based upon economic, market, or other conditions and DoubleLine undertakes no obligation to update the views expressed herein. While we have gathered this information from sources believed to be reliable, DoubleLine cannot guarantee the accuracy of the information provided. Any discussions of specific securities should not be considered a recommendation to buy or sell those securities. For a complete list of Fund holdings, please refer to the Schedule of Investments provided in this report.

ABX Index This Index consists of the 20 most liquid credit default swaps (CDS) on U.S. home equity asset-backed securities (ABS) and is used to hedge asset-backed exposure or to take a position in the subprime mortgage asset class. The ABX Index has four series (06-1, 06-2, 07-1 and 07-2) with five tranches per series. The ABX 07-1 AAA Index references underlying collateral of that 2007 vintage and AAA credit quality type, just as the ABX 06-2 AAA Index references underlying collateral of the 2006 vintage and AAA credit quality type.

Basis Point A basis point is a unit that is equal to 1/100th of 1%.

Barclays U.S. Aggregate Bond Index This Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the US investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis.

Barclays U.S. MBS Index This Index covers agency mortgage-backed pass-through securities (both fixed-rate and hybrid ARM) issued by Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC).

Duration A measure of the sensitivity of a price of a fixed income investment to a change in interest rates, expressed as a number of years. Securities with longer duration generally have more volatile prices than securities of comparable

quality with a shorter duration.

Freddie Mac (FHLMC) Commitment Rate The commitment rate is the interest rate a lender would charge to lend mortgage money to a qualified borrower exclusive of the fees and points required by the lender. This commitment rate applies only to conventional financing on conforming mortgages with loan-to-value (LTV) rates of 80% or less, according to Freddie Mac.

Home Price Appreciation (HPA) HPA is an increase in the value of a property s price over time, which can occur for various reasons including increased demand, weakening supply or changes in inflation or interest rates.

Housing Affordability Index This Index is produced by the National Association of Realtors (NAR) and measures whether or not a typical family could qualify for a mortgage loan on a typical home. A typical home for the purposes of this methodology is defined as the national median-priced, existing single-family home as calculated by the NAR. A typical family for the purposes of this methodology is defined as one earning the median family income as reported by the U.S. Bureau of the Census.

LIBOR The London Interbank Offered Rate (LIBOR) is the average interest rate estimated by leading banks in London that would be charged if borrowing from other banks. It is often considered the primary benchmark for short-term interest rates globally.

S&P/Case-Shiller 20-City Composite Home Price Index This index measures the value of residential real estate in 20 metropolitan areas of the U.S. It is included in the S&P/Case-Shiller Home Price Index Series which seeks to measure changes in the total value of all existing single-family housing stock.

A direct investment cannot be made in an index. The performance of any index mentioned in this commentary has not been adjusted for ongoing management, distribution and operating expenses applicable to mutual fund investments.

[#] Variable rate security. Rate disclosed as of September 30, 2013.

I/O Interest only security

I/F Inverse floating rate security whose interest rate moves in the opposite direction of reference interest rates

- " Seven-day yield as of September 30, 2013
- (a) Institutional class shares

[^] Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional buyers. These securities are determined to be liquid by the Adviser, unless otherwise noted, under procedures established by the Fund s Board of Trustees. At September 30, 2013, the value of these securities amounted to \$44,541,724 or 13.2% of net assets.

@ Security pays interest at rates that represent residual cashflows available after more senior tranches have been paid. The interest rate disclosed reflects the estimated rate in effect as of September 30, 2013.

All or partial amount transferred for the benefit of the counterparty as collateral for reverse repurchase agreements.

² Annualized.

³ Calculated based on average shares outstanding during the period.

⁴ Total investment return is computed based upon the New York Stock Exchange market price of the Fund s shares and excludes the effect of brokerage commissions. Dividends and distributions are assumed to be reinvested at the prices obtained under the Fund s dividend reinvestment plan.

⁵ Not Annualized.

⁶ Net Asset Value, beginning of period, reflects a deduction of \$1.17 per share of sales load and offering expenses from the initial public offering price of \$25.00 per share.

Notes to Financial Statements

September 30, 2013

1. Organization

DoubleLine Opportunistic Credit Fund (the Fund) is a non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund was organized as a Massachusetts business trust on July 22, 2011 and commenced operations on January 27, 2012. The Fund is listed on the New York Stock Exchange (NYSE) under the symbol DBL. The Fund is investment objective is to seek high total investment return by providing a high level of current income and the potential for capital appreciation.

2. Significant Accounting Policies

The following is a summary of the significant accounting policies of the Fund. These policies are in conformity with accounting principles generally accepted in the United States of America (US GAAP).

A. Security Valuation. The Fund has adopted US GAAP fair value accounting standards which establish a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

Level 1 Unadjusted quoted market prices in active markets for identical securities

Level 2 Quoted prices for identical or similar assets in markets that are not active, or inputs derived from observable market data

Level 3 Significant unobservable inputs (including the reporting entity s estimates and assumptions) Assets and liabilities may be transferred between levels. The Fund uses end of period timing recognition to account for any transfers.

Market values for domestic and foreign fixed income securities are normally determined on the basis of valuations provided by independent pricing services. Vendors typically value such securities based on one or more inputs described in the following table. The table provides examples of inputs that are commonly relevant for valuing particular classes of fixed income securities, in which the Fund is authorized to invest. However, these classifications are not exclusive, and any of the inputs may be used to value any other class of fixed-income securities. Securities that use similar valuation techniques and inputs as described in the following table are categorized as Level 2 of the fair value hierarchy. To the extent the significant inputs are unobservable, the values would be categorized as Level 3.

Fixed-income class

All

Examples of Standard Inputs

Benchmark yields, transactions, bids, offers, quotations from dealers and trading systems, new issues, spreads and other relationships observed in the markets among comparable securities; and proprietary pricing models such as yield measures calculated using factors such as cash flows, financial or collateral performance and

	other reference data (collectively referred to as standard inputs)
Corporate bonds and notes;	Standard inputs and underlying equity of the issuer
convertible securities	
Bonds and notes of government	Standard inputs and interest rate volatilities
and government agencies	
Mortgage-backed; asset-backed	Standard inputs and cash flows, prepayment information, default rates, delinquency
obligations (including	and loss assumptions, collateral characteristics, credit enhancements and specific
collateralized loan obligations)	deal information, trustee reports

Investments in registered open-end management investment companies will be valued based upon the net asset value (NAV) of such investments and are categorized as Level 1 of the fair value hierarchy. Investments in private investment funds typically will be valued based upon the NAVs of such investments and are categorized as Level 2 of the fair value hierarchy. As of September 30, 2013, the Fund did not hold any investments in private investment funds.

Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy.

The Fund may enter into reverse repurchase agreements. In a reverse repurchase agreement, the Fund sells to a financial institution a security that it holds with an agreement to repurchase the same security at an agreed-upon price and date. A reverse repurchase agreement involves the risk that the market value of the security may decline below the repurchase price of the security. The Fund will segregate assets determined to be liquid by the Investment Adviser or otherwise cover its obligations under reverse repurchase agreements. Due to the short term nature of the reverse repurchase agreements, face value approximates fair value at September 30, 2013.

18 DoubleLine Opportunistic Credit Fund

September 30, 2013

Certain securities may be fair valued in accordance with the fair valuation procedures approved by the Board of Trustees (the Board). The Valuation Committee is generally responsible for overseeing the day to day valuation processes and reports periodically to the Board. The Valuation Committee is authorized to make all necessary determinations of the fair values of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are deemed to be unreliable indicators of market value. As of September 30, 2013, the Fund did not hold securities fair valued by the Valuation Committee.

The following is a summary of the fair valuations according to the inputs used to value the Fund s investments as of September 30, 2013¹:

Category	
Investments in Securities	
Level 1	
Money Market Funds	\$ 4,634,819
Total Level 1	4,634,819
Level 2	
US Government / Agency Mortgage Backed Obligations	194,549,191
Non-Agency Residential Collateralized Mortgage	
Obligations	167,476,927
Collateralized Loan Obligations	7,046,364
Non-Agency Commercial Mortgage Backed Obligations	4,455,111
Total Level 2	373,527,593
Level 3	
Non-Agency Residential Collateralized Mortgage	
Obligations	26,404,851
Total Level 3	26,404,851
Total	\$ 404,567,263
Other Financial Instruments	
Level 1	
Level 2	
Reverse Repurchase Agreements	(65,143,732)
Total Level 2	(65,143,732)
Level 3	
Total	(65,143,732)

See the Schedule of Investments for further disaggregation of investment categories.

¹ There were no transfers between Level 1 and 2 during the period ended September 30, 2013. The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

			Chang	ge					
			in				T	0	2 4
			Net				Transfers Out		
				zed Net			of		
	Balance Aseof	Realized	L pariec ia	ti lon cret	ion		Transfers Into	Level	Balance as of

Investments in									
Securities									
Non-Agency									
Residential									
Collateralized									
Mortgage									
Obligations	\$	\$	\$	\$	\$	\$	\$ 26,404,851	\$	\$ 26,404,851
2 2 8 3 11 3	Ψ	T	T	7	Ψ	Τ'	+ ==, :0 :,001	T	+ = =, · 3 · , 00 1
Total	\$	\$	\$	\$	\$	\$	\$ 26 404 851	\$	\$ 26 404 851

² Transfers between Level 2 and Level 3 were due to a change in observable and/or unobservable inputs. The following is a summary of quantitative information about Level 3 Fair Value measurements:

	Fair Value as of 9/30/2013*	Valuation Techniques	Unobservable Input	Input Values	Impact to valuation f an increase to inpu
					Significant changes in market quotes would
Non-Agency					result in direct and
Residential					proportional changes i
Collateralized Mortgage		Market Comparables,			the fair value of the
Obligations	\$ 26,404,851	Discounted Cash Flow	Market Quotes	\$75.42-\$93.96	security

^{*} Level 3 securities are typically valued by pricing vendors. The appropriateness of fair values for these securities is monitored on an ongoing basis, by the Adviser, which may include back testing, results of vendor due diligence, unchanged price review and consideration of market and/or sector events.

Annual Report September 30, 2013 **19**

¹ Sales include all sales of securities, maturities, and paydowns.

Notes to Financial Statements (Cont.)

September 30, 2013

B. Federal Income Taxes. The Fund has elected to be taxed as a regulated investment company and intends to distribute substantially all of its taxable income to its shareholders and otherwise comply with the provisions of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no provision for federal income taxes has been made.

The Fund may be subject to a nondeductible 4% excise tax calculated as a percentage of certain undistributed amounts of net investment income and net capital gains.

The Fund has followed the authoritative guidance on accounting for and disclosure of uncertainty in tax positions, which requires the Fund to determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The Fund has determined that there was no effect on the financial statements from following this authoritative guidance. In the normal course of business, the Fund is subject to examination by federal, state and local jurisdictions, where applicable, for tax years for which applicable statutes of limitations have not expired. The Fund identifies its major tax jurisdictions as U.S. Federal and the State of California.

C. Security Transactions, Investment Income. Investment securities transactions are accounted for on trade date. Gains and losses realized on sales of securities are determined on a specific identification basis. Interest income is recorded on an accrual basis. Discounts/premiums on debt securities purchased are accreted/amortized over the life of the respective securities using the effective interest method except for certain deep discount bonds where management does not expect the par value above the bond s cost to be fully realized. Dividend income is recorded on the ex-dividend date. Paydown gains and losses on mortgage-related and other asset-backed securities are recorded as components of interest income on the statements of operations.

D. Dividends and Distributions to Shareholders. Dividends from net investment income will be declared and paid monthly. The Fund will distribute any net realized long or short-term capital gains at least annually. Distributions are recorded on the ex-dividend date.

Income and capital gain distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications between paid-in capital, undistributed net investment income (loss), and/or undistributed (accumulated) realized gain (loss). Undistributed net investment income or loss may include temporary book and tax basis differences which will reverse in a subsequent period. Any taxable income or capital gain remaining at fiscal year end is distributed in the following year.

- **E.** Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.
- **F. Share Valuation.** The NAV per share of the Fund is calculated by dividing the sum of the value of the securities held by the Fund, plus cash and other assets, minus all liabilities (including estimated accrued expenses) by the total number of shares outstanding, rounded to the nearest cent. The Fund s net asset value will not be calculated on the days on which the NYSE is closed for trading or on holidays when the principal U.S. bond markets are closed, such as Columbus Day and Veteran s Day.

G. Guarantees and Indemnifications. Under the Fund s organizational documents, each Trustee and officer of the Fund is indemnified, to the extent permitted by the 1940 Act, against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts that contain a variety of indemnification clauses. The Fund s maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. However, the Fund has not had prior claims or losses pursuant to these contracts.

3. Related Party Transactions

DoubleLine Capital LP (the Adviser) provides the Fund with investment management services under an Investment Management Agreement (the Agreement). Under the Agreement, the Adviser manages the investment of the assets of the Fund, places orders for the purchase and sale of its portfolio securities and is responsible for providing certain resources to assist with the day-to-day management of the Fund s business affairs. As compensation for its services, the Adviser is entitled to a monthly fee at the annual rate 1.00% of the average daily total managed assets of the Fund. Total managed assets means the total assets of the Fund (including assets attributable to any reverse repurchase agreements, dollar roll transactions or similar transactions, borrowings, and/or preferred shares that may be outstanding) minus accrued liabilities (other than liabilities in respect of reverse repurchase agreements, dollar roll transactions or similar transactions, and borrowings). An affiliate of the Adviser owns 4,849 shares of the Fund. The Adviser has arrangements with DoubleLine Group LP to provide personnel and other resources.

4. Purchases and Sales of Securities

For the period ended September 30, 2013, purchases and sales of investments, excluding short-term securities, were \$142,776,457 and \$62,851,732 respectively. There were no transactions in U.S. Government securities (defined as U.S. Treasury bills, notes and bonds) during the period.

20 DoubleLine Opportunistic Credit Fund

September 30, 2013

5. Income Tax Information and Distributions to Shareholders

The tax character of distributions for the Fund were as follows:

	Year Ended		Pe	eriod Ended
	Septer	mber 30, 2013	Septe	ember 30, 2012
Distributions Paid From:				
Ordinary Income	\$	36,589,482	\$	17,197,795
Total Distributions Paid	\$	36,589,482	\$	17,197,795

The Fund designated as long-term capital gain dividend, pursuant to Internal Revenue Code section 852(b)(3), the amount necessary to reduce the earnings and profits of the Fund related to net capital gain to zero for the tax year ended September 30, 2013.

The cost basis of investments for federal income tax purposes as of September 30, 2013 was as follows:

Tax Cost of Investments	\$ 404,503,711
Gross Tax Unrealized Appreciation	24,592,360
Gross Tax Unrealized Depreciation	(24,528,808)
Net Tax Unrealized Appreciation	\$ 63.552

As of September 30, 2013, the components of accumulated earnings (losses) for income tax purposes were as follows:

Net Tax Unrealized Appreciation	\$ 63,552
Undistributed Ordinary Income	1,982,743
Total Distributable Earnings	1,982,743
Other Accumulated Losses	(14,755,619)
Total Accumulated Losses	\$ (12,709,324)

As of September 30, 2013, the following capital loss carryforward was available for the Fund:

Capital Loss	
Carryforward	Expires
\$ 5,922,970	Indefinite

The Fund may elect to defer to the first day of the next taxable year all or part of any late-year ordinary loss or post-October capital loss. As of September 30, 2013, the Fund deferred, on a tax basis, post-October losses of \$8,832,649.

Additionally, U.S. generally accepted accounting principles require that certain components of net assets relating to permanent differences be reclassified between financial and tax reporting. These reclassifications have no effect on net

assets or net asset value per share. The permanent differences primarily relate to paydown losses. For the period ended September 30, 2013, the following table shows the reclassifications made to the Fund:

Un	distributed		
Net		Accumulated	
Investment		Net Realized	Paid-In
Income (Loss)		Gain (Loss)	Capital
\$	9,405,008	\$ (9,405,008)	\$

6. Share Transactions

Transactions in the Fund s shares were as follows:

Reinvested Dividends	Shares 28,060	Amount \$ 693,128
Beginning Shares	14,718,164	
Ending Shares	14,746,224	

Annual Report September 30, 2013 21

Notes to Financial Statements (Cont.)

September 30, 2013

7. Trustees Fees

Trustees who are not affiliated with the Adviser received, as a group, fees and expenses of \$85,214 from the Fund during the period ended September 30, 2013. Certain trustees and officers of the Fund are also officers of the Adviser; such trustees and officers are not compensated by the Fund.

8. Principal Risks

Below are summaries of some, but not all, of the principal risks of investing in the Fund, each of which could adversely affect the Fund s net asset value, market price, yield, and total return. The Fund s prospectus provided additional information regarding these and other risks of investing in the Fund at the time of the initial public offering of the Fund s shares.

market discount risk: The price of the Fund s common shares of beneficial interest will fluctuate with market conditions and other factors. Shares of closed-end management investment companies frequently trade at a discount from their net asset value.

issuer risk: The value of securities may decline for a number of reasons that directly relate to the issuer, such as its financial strength, management performance, financial leverage and reduced demand for the issuer s goods and services, as well as the historical and prospective earnings of the issuer and the value of its assets.

investment and market risk: An investment in the Fund is subject to the risk of loss. The value of the Fund s securities and financial assets may move up or down, sometimes rapidly and unpredictably. Further, the value of securities held by the Fund may decline in value due to factors affecting securities markets generally or particular industries.

issuer non-diversification risk: The Fund is a non-diversified investment company and therefore may invest a greater percentage of its assets in the securities of a single issuer or a limited number of issuers than funds that are diversified. Accordingly, the Fund is more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund might be.

credit risk: Credit risk is the risk that one or more of the Fund s investments in debt securities or other instruments will decline in price, or fail to pay interest, liquidation value or principal when due, because the issuer of the obligation or the issuer of a reference security experiences an actual or perceived decline in its financial status.

mortgage-backed securities risk: The risk that borrowers may default on their mortgage obligations or the guarantees underlying the mortgage-backed securities will default and that, during periods of falling interest rates, mortgage-backed securities will be called or prepaid, which may result in the Fund having to reinvest proceeds in other investments at a lower interest rate. During periods of rising interest rates, the average life

of a mortgage-backed security may extend, which may lock in a below-market interest rate, increase the security s duration, and reduce the value of the security.

inverse floaters and related securities risk: Investments in inverse floaters, residual interest tender option bonds and similar instruments expose the Fund to the same risks as investments in debt securities and derivatives, as well as other risks, including those associated with leverage and increased volatility. An investment in these securities typically will involve greater risk than an investment in a fixed rate security. Distributions on inverse floaters, residual interest tender option bonds and similar instruments will typically bear an inverse relationship to short term interest rates and typically will be reduced or, potentially, eliminated as interest rates rise.

high yield risk (junk bonds): Securities of below investment grade quality are regarded as having predominantly speculative characteristics with respect to the issuer s capacity to pay interest and to repay principal when due, and are commonly referred to as high yield securities or junk bonds. High yield securities involve a greater risk of default and their prices are generally more volatile and sensitive to actual or perceived negative developments than are the prices of higher grade securities.

interest rate risk: Interest rate risk is the risk that debt obligations and other instruments in the Fund s portfolio will decline in value because of increases in market interest rates.

foreign (non-U.S.) investment risk: The Fund s investments in and exposure to foreign securities involve special risks. For example, the value of these investments may decline in response to unfavorable political and legal developments, unreliable or untimely information or economic and financial instability. Foreign securities may experience more rapid and extreme changes in value than investments in securities of U.S. issuers. Investing in securities of issuers based or doing business in emerging markets entails all of the risks of investing in securities of foreign issuers, but to a heightened degree.

foreign currency risk: The Fund s investments in or exposure to foreign currencies or in securities or instruments that trade, or receive revenues, in foreign currencies are subject to the risk that those currencies will decline in value relative to the U.S. dollar or, in the case of hedging positions (if used), that the U.S. dollar will decline in value relative to the currency being hedged.

credit default swaps risk: Credit default swaps involve greater risks than investing in the reference obligation directly as well as liquidity risk, counterparty risk and credit risk. A buyer will lose its investment and recover nothing should no event of default occur. When the Fund acts as a seller of a credit default swap, it is exposed to many of the same risks of leverage described herein since if an event of default occurs the seller must pay the buyer the full notional value of the reference obligation.

leverage risk: Leverage is a speculative technique that may expose the Fund to greater risk and increased costs. When leverage is used, the net asset value and market price of the Fund s shares and the Fund s investment return will likely be more volatile.

September 30, 2013

derivatives risk: Derivatives are subject to a number of risks applicable to other investments, such as liquidity risk, issuer risk, credit risk, interest rate risk, leverage risk, counterparty risk, management risk and, if applicable, smaller company risk. They also involve the risk of mispricing or improper valuation, the risk of unfavorable or ambiguous documentation, and the risk that changes in the value of a derivative may not correlate perfectly with an underlying asset, currency, interest rate or index.

counterparty risk: The Fund will be subject to credit risk with respect to the counterparties to the derivative contracts (whether a clearing corporation in the case of exchange-traded instruments or another third party in the case of over-the-counter instruments) and other instruments entered into directly by the Fund.

9. Recently Issued Accounting Pronouncements

Financial Accounting Standards Board (FASB) Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities

In December 2011, the FASB issued Accounting Standards Update (ASU) No. 2011-11 (ASU No. 2011-11) to enhance disclosures about financial instruments and derivative instruments that are subject to offsetting (netting) on the Statement of Assets and Liabilities. This information will enable users of the entity s financial statements to evaluate the effect or potential effect of netting arrangements on the entity s financial position. ASU No. 2011-11 is effective prospectively during interim or annual periods beginning on or after January 1, 2013. At this time, management is evaluating the implications of this guidance and the impact it will have to the financial statements amounts and footnote disclosures, if any.

10. Subsequent Events

In preparing these financial statements, the Fund has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued. The Fund has determined there are no subsequent events that would need to be disclosed in the Fund s financial statements.

Annual Report September 30, 2013 23

Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of DoubleLine Opportunistic Credit Fund

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations, of changes in net assets, and of cash flows and the financial highlights present fairly, in all material respects, the financial position of DoubleLine Opportunistic Credit Fund (the Fund) at September 30, 2013, the results of its operations and its cash flows for the year then ended, and the changes in its net assets and the financial highlights for the year then ended and for the period January 27, 2012 (commencement of operations) through September 30, 2012, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as financial statements) are the responsibility of the Fund s management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at September 30, 2013, by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

Los Angeles, CA

November 22, 2013

24 DoubleLine Opportunistic Credit Fund

Evaluation of Advisory Agreement by the Board of Trustees

(Unaudited)

At the August 21, 2013 meeting (the Meeting) of the Board of Trustees of DoubleLine Opportunistic Credit Fund (the Fund), the Board of Trustees, including the Trustees who are not interested persons (as defined in the Investment Company Act of 1940, as amended) of the Fund (Independent Trustees) voting separately, approved the renewal of the Investment Management Agreement (the Agreement) between DoubleLine Capital LP (DoubleLine or the Adviser) and the Fund for an additional one-year period through November 9, 2014.

The Trustees meet over the course of the year with investment advisory personnel from DoubleLine and regularly review detailed information, presented both orally and in writing, regarding the investment program and performance of the Fund. The Trustees determination to approve the continuance of the Agreement was made on the basis of each Trustee s business judgment after an evaluation of all of the information provided to the Trustees, both at the August 21, 2013 meeting and at prior meetings. This summary describes a number, but not necessarily all, of the most important factors considered by the Board and the Independent Trustees. Individual Trustees may have given different weights to certain factors and assigned various degrees of materiality to information received in connection with the approval process. No single factor was determined to be decisive. In all of their deliberations, the Board of Trustees and the Independent Trustees were advised by counsel to the Fund and the Independent Trustees.

The Trustees considered the nature, extent, and quality of the services provided and expected to be provided by DoubleLine, including the expertise and experience of its investment personnel. In this regard, the Trustees considered that DoubleLine provides a full investment program for the Fund, and noted DoubleLine s representation that it seeks to provide attractive returns with a strong emphasis on risk management. The Board considered the difficulty of managing debt-related funds, noting that managing such funds requires a portfolio management team to balance a number of factors, which may include, among others, varying maturities, prepayments, collateral management, counter-party management, pay-downs, credit events, workouts and net new issuances.

The Trustees reviewed a report provided by Strategic Insight, an Asset International Company (Strategic Insight), that compared the Fund's management fee rate, total expense ratio based on assets attributable to the Fund's common shares (net assets), and performance records based on net asset value for the one-year and year-to-date periods ending June 30, 2013 against a group of the Fund's peer funds. The Trustees met with a representative of Strategic Insight and discussed the report with that representative. The Trustees noted that the Fund had been in operation for only a limited period of time, and that for that period it had achieved performance generally in the third quartile of its peers. They considered the view expressed by that representative and by DoubleLine that the Fund's performance relative to its peers was affected significantly by differences between the Fund's investment program and that of many of its peers. They considered the view that many of the Fund's peers were less constrained than the Fund in their allocations to lower-rated, junk bonds, and have a greater ability to employ go-anywhere investment programs, both of which have been favored in recent periods, and that the Fund has made relatively limited use of investment leverage, which has benefited many of the Fund's peers.

The Trustees noted that the Fund s contractual management fee and gross management fee (including administrative fees), each based on net assets, were in the third quartile of the Fund s expense group, and the Fund s total expense ratio based on net assets was in the second quartile when investment related expenses (including, for example, dividends on securities sold short and certain costs related to derivatives transactions) were included in the comparison and in the third quartile when such expenses were excluded.

The Trustees considered that DoubleLine provides a variety of other services in addition to investment advisory services, including, among others, a number of back-office services, valuation services, compliance services, and assistance with accounting and distribution services. The Trustees also considered the structure of the Fund s compliance program, including the policies and procedures of the Fund and its various service providers (including

the Adviser). The Trustees considered DoubleLine s reports, provided at the Board s regular meetings, that it had continued to hire additional resources, including investment personnel, to support those services, and intends to continue to do so in the coming year.

The Trustees also took into account that the Fund currently uses leverage through the use of reverse repurchase agreements and may obtain additional leverage in the coming year through the use of a line of credit. The Trustees noted that the use of such leverage increases total assets and thus the absolute amount of fees received by the Adviser under the Agreement (because the fees are calculated based on total managed assets, including assets attributable to reverse repurchase agreements and other forms of leverage outstanding). In this regard, the Trustees took into account that the Adviser has a financial incentive for the Fund to continue to use leverage, which may create a conflict of interest between the Adviser, on the one hand, and the Fund s common shareholders, on the other. The Trustees considered information provided by the Adviser as to why the Fund s use of leverage continues to be appropriate and in the best interests of the Fund s common shareholders under current market conditions.

The Trustees considered DoubleLine s representation that it has attempted to set its management fees at rates that reflect competitive market levels, and that further reflect the experience and expertise DoubleLine brings to managing the Fund.

The Trustees noted DoubleLine s representation that DoubleLine and its affiliates do not manage any accounts with similar investment strategies to those of the Fund.

The Trustees concluded that the fees paid by the Fund to DoubleLine were generally reasonable in light of the services provided, the quality of the portfolio management team, and the Fund s performance to date.

The Trustees reviewed financial information regarding DoubleLine for 2012 and projected financial information for 2013, including information as to the Adviser s operating costs and profitability with respect to the Fund. The Trustees also took into account DoubleLine s representation that it was continuing to invest in its business to maintain its ability to provide high quality services for the Fund and it does not engage in contractual soft dollar arrangements with respect to the Fund.

Annual Report September 30, 2013 **25**

Evaluation of Advisory Agreement by the Board of Trustees (Cont.)

(Unaudited)

The Trustees discussed with DoubleLine whether economies of scale would likely be realized with respect to the Fund and, if so, how such economies of scale have been and/or will be shared with the Fund. The Trustees considered DoubleLine s statements that the Fund has not increased in size significantly from its initial offering due principally to its status as a closed-end investment company, and that as a result no substantial increases in economies of scaled had been realized since inception; that, in DoubleLine s view, the level of the firm s profitability in respect of the Fund is appropriate in light of the investment the firm has made in the product, the quality of the investment management team provided by the firm, and the continued investments by the firm in its own business; and that, as a result, DoubleLine did not believe that breakpoints or other steps reflecting increased economies of scale would be appropriate at this time. After considering the information provided, the Trustees concluded that the profitability of the Fund to DoubleLine did not appear excessive or such as to preclude renewal of the Agreement and that, for the reasons noted, no specific steps to capture economies of scale appeared required to be implemented at the time.

On the basis of these considerations as well as others and in the exercise of their business judgment, the Trustees determined that they were satisfied with the nature, extent and the quality of the services provided to the Fund under the Agreement; that it appeared that the management fees paid by the Fund to DoubleLine were generally within the range of management fees paid by its peer funds, and generally reasonable in light of the quality of the portfolio management teams and the Fund s performance to date; and that it would be appropriate to approve the Agreement for an additional one-year period.

26 DoubleLine Opportunistic Credit Fund

Federal Tax Information (Unaudited)

Qualified Dividend Income/Dividends Received Deduction

For the fiscal year ended September 30, 2013, certain dividends paid by the Fund may be subject to a maximum tax rate of 15% (20% for taxpayers with taxable income greater than \$400,000 for single individuals and \$450,000 for married couples filing jointly), as provided for by the Jobs and Growth Tax Relief Reconciliation Act of 2003 and the American Taxpayer Relief Act of 2012.
