Non-GAAP Financial Measures -
Definitions

A-1

Annex A

Adjusted Operating Income (Loss) is defined as Operating Income (Loss) excluding the impact of noncash impairments of goodwill, intangible and fixed assets; gains and losses on operating assets (other than deferred gains on sale-leasebacks); gains and losses recognized in connection with pension and other postretirement benefit plan curtailments or settlements; external costs related to mergers, acquisitions or dispositions, as well as contingent consideration related to such transactions, to the extent such costs are expensed; and amounts related to securities litigation and government investigations.

Adjusted Divisional Pre-Tax Income is defined as Adjusted Operating Income plus Income (loss) from equity method investments.

Adjusted EPS is defined as Diluted Income per Common Share from Continuing Operations attributable to Time Warner Inc. common shareholders excluding noncash impairments of goodwill, intangible and fixed assets and investments; gains and losses

operating assets (other than deferred gains on sale-leasebacks), liabilities and investments; gains and losses recognized in connection with pension and other postretirement benefit plan curtailments or settlements; external costs related to mergers, acquisitions, investments or dispositions, as well as contingent consideration related to such transactions, to the extent such costs are expensed; amounts related to securities litigation and government investigations; and amounts attributable to businesses classified as discontinued operations, as well as the impact of taxes and noncontrolling interests on the above items.

For periods ending on or after July 1, 2012, **Free Cash Flow** is defined as Cash Provided by Operations from Continuing Operations plus payments related to securities litigation and government investigations (net of any insurance recoveries), external costs related to mergers, acquisitions, investments or dispositions, to the extent such costs are expensed, contingent consideration payments made in connection with acquisitions, and excess tax benefits from equity instruments, less capital expenditures, principal payments on capital leases and partnership distributions, if any. For periods ending prior to that date, **Free Cash Flow** is defined as Cash Provided by Operations from Continuing Operations plus payments related to securities litigation and government investigations (net of any insurance recoveries), external costs related to mergers, acquisitions, investments or dispositions, to the extent such costs are expensed, and excess tax benefits from equity instruments, less capital expenditures, principal payments on capital leases and partnership distributions, if any. A change to the definition of Free Cash Flow for periods prior to July 1, 2012, to adjust for contingent consideration payments made in connection with acquisitions would have had no impact on the reported Free Cash Flow for such periods.
