Semi-Annual Report

This report provides management's discussion of fund performance for AllianceBernstein Income Fund (the "Fund") for the semi-annual reporting period ended June 30, 2014. The Fund is a closed-end fund that trades on the New York Stock Exchange.

Investment Objective and Policies

The investment objective of the Fund is high current income consistent with preservation of capital.

The Fund normally invests at least 80% of its net assets in income-producing securities. The Fund's Board previously approved, and submitted for shareholder approval at the Fund's Annual Meeting of Stockholders on March 27, 2014 (the "March 27 Meeting"), a proposal to eliminate the Fund's fundamental policy to invest at least 65% of its assets in U.S. government securities and repurchase agreements relating to such securities (the "Proposal"). The Board also approved changes to certain non-fundamental policies of the Fund, including eliminating a policy limiting investments in foreign government securities to 35% of the Fund's assets, whose effectiveness were contingent upon stockholder approval of the Proposal. Details including the rationale for the changes in investment policies are set forth in the Fund's Proxy Statement dated February 20, 2014. At the March 27 Meeting, the stockholders did not approve the Proposal and accordingly the investment policies remain unchanged.

The Fund normally invests at least 65% of its total assets in securities issued or

guaranteed by the U.S. government, its agencies or instrumentalities, and repurchase agreements pertaining to U.S. government securities. The Fund may also invest up to 35% of its assets in other fixed-income securities, including those issued by nongovernmental issuers in the U.S. and those issued by foreign governments. The Fund may invest up to 35% of its net assets in below investment-grade securities. Additionally, the Fund may utilize other investment instruments, including options, swaps, forwards and futures, and may employ leverage. For more information regarding the Fund's risks, please see "A Word About Risk" on pages 4-5 and "Note E Risks Involved in Investing in the Fund" of the Notes to Financial Statements on pages 65-67.

Share Repurchase Program

On June 25, 2014, the Fund announced that its Board of Directors had authorized the Fund's discretionary repurchase of up to 15% of its then outstanding shares of common stock (valued at up to approximately \$306 million as of June 24, 2014 based on Fund total net assets of approximately \$2.04 billion) in open market transactions over a one-year period. This share repurchase program is intended to benefit long-term Fund stockholders by the repurchase of Fund shares at a discount to their net asset value. Such repurchases may moderate the discount at which the Fund's shares currently trade. Repurchases will be made from time to time when they are believed to be in the best interests of the Fund.

The Board of Directors authorized the share repurchase program upon the

recommendation of the Fund's investment adviser, AllianceBernstein L.P., after concluding that repurchases of Fund shares at a discount to their net asset value may at times represent attractive investment opportunities for the Fund.

There is no assurance that the Fund will repurchase its shares at any specific discount level or in any specific amounts, or that the market price of the Fund's shares, either absolutely or relative to their net asset value, will increase as a result of any share repurchases.

Through August 15, 2014, the Fund had repurchased 2,881,000 of its shares of common stock in open market transactions (approximately 1.19% of its outstanding shares as of June 25, 2014).

Investment Results

The table on page 6 provides performance data for the Fund and its benchmark, the Barclays U.S. Aggregate Bond Index, for the six- and 12-month periods ended June 30, 2014.

The Fund outperformed its benchmark for both periods; sector and security selection contributed positively for both periods, while currency exposure detracted. Within sector allocation, exposure to high-yield, emerging-market corporates and non-agency mortgages contributed positively for both periods. Exposure to bank loans also contributed for the 12-month period. Offsetting some of those gains for both periods was an underweight allocation to investment-grade corporates and overweight to U.S. Treasuries. Security selection

within the Fund's investment-grade corporate holdings contributed for both periods, along with selection within the Fund's commercial mortgage-backed securities (CMBS) holdings.

For both periods, interest rate swaps and Treasury futures were utilized to manage overall interest rate risk and yield curve positioning. For the six-month period, yield curve positioning was a substantive positive contributor due to the Fund's overweight in the 10-year area of the yield curve, where interest rates declined. For the 12-month period, overall yield curve positioning was a modest positive as an overweight in the 10-year area of the curve was partially offset by underweights in shorter and longer maturities.

The Fund also utilized currency forwards during both periods for hedging and investment purposes to manage the Fund's currency exposure; overall currency positioning detracted for both periods. The Fund utilized leverage through reverse repurchase agreements at favorable rates, and was able to reinvest the proceeds into higher-yielding securities; leverage contributed positively for both periods, as fixed-income markets provided solid returns. Credit default swaps were used as both a hedge against cash and to gain high-yield exposure, which had an immaterial impact for the six-month period and contributed to returns for the 12-month period. Purchased options for hedging purposes detracted for both periods, while written options for hedging purposes had an immaterial impact during the six-month period and added to returns for the 12-month period.

Market Review and Investment Strategy

Early in 2014, volatility increased as the U.S. Federal Reserve (the Fed) began to taper its asset purchase program and investors worried about higher interest rates. Fixed-income markets stabilized however, and bond fund flows turned positive once again as U.S. economic data cooled in the first quarter, blamed mostly on weather events. Geopolitical concerns, specifically the conflict between Ukraine and Russia, as well as sectarian violence in Iraq, contributed to a safe haven rally in U.S. Treasuries. Interest rates actually declined, which was contrary to expectations at the beginning of the six-month period ended June 30, 2014. Further easing by the European Central Bank (the ECB), as inflation fell below target levels, also helped anchor U.S. yields.

Markets remained heavily focused on central bank actions, with hints of divergence among developed markets appearing late in the period. In response to low inflation, the ECB exceeded market expectations by implementing a negative deposit rate, announcing targeted long-term refinancing operations and discussing targeted quantitative easing through asset-backed securities. Despite stronger labor market data and a modest uptick in inflation, Fed Chair Janet Yellen reiterated that U.S. interest rates would stay relatively low. Conversely, the Bank of England surprised markets when Governor Mark Carney

made comments suggesting that as markets recover, a rate hike could come sooner than expected, causing the front end of the UK curve to sell off dramatically.

Fixed-income sectors benefited from the general decline in yields as all major U.S. fixed-income sectors posted positive returns with non-government sectors outperforming. Corporate sectors, both investment-grade and high-yield, posted the strongest returns as corporate spreads continued to compress, and corporate fundamentals, as well as earnings, remained favorable.

The Fund continues to be positioned for yield although its earning power is impacted by the current low level of market interest rates. The Fund remains overweight high-yield corporates to help achieve income. The Fund's yield curve positioning remains concentrated in 10-year maturities, where the U.S. yield curve is steepest. Within the Fund, notable underweight positions in agency mortgages were held, where the Fund's investment management team views valuations to be stretched, and the Fed poised to taper purchases. The Fund remains overweight asset-backed securities and CMBS, where fundamentals remain favorable. Within the Fund's investment-grade corporate allocation, financials are still favored over industrials due to their better fundamentals. Within financials, subordinated debt (banks and insurance in Europe and the U.S.) is favored over senior debt.

DISCLOSURES AND RISKS

AllianceBernstein Income Fund Shareholder Information

Weekly comparative net asset value (NAV) and market price information about the Fund is published each Saturday in *Barron's* and in other newspapers in a table called *Closed End Funds* . Daily NAV and market price information, and additional information regarding the Fund, is available at www.alliancebernstein.com and www.nyse.com. For additional shareholder information regarding this Fund, please see pages 71-72.

Benchmark Disclosure

The unmanaged Barclays U.S. Aggregate Bond Index does not reflect fees and expenses associated with the active management of a mutual fund portfolio. The Barclays U.S. Aggregate Bond Index represents the performance of securities within the U.S. investment grade fixed-rate bond market, with index components for government and corporate securities, mortgage pass-through securities, asset-backed securities, and commercial mortgage backed securities. The Index is not leveraged, whereas the Fund utilizes leverage. An investor cannot invest directly in an index, and its results are not indicative of the performance for any specific investment, including the Fund.

A Word About Risk

Until May 22, 2009, the Fund participated in a credit facility for the purpose of utilizing investment leverage. The Fund continues to utilize leverage through engaging in reverse repurchase agreements and may also utilize other techniques such as dollar rolls. In addition, the Fund may borrow money in the future through participation in credit facilities, direct bank borrowings, or otherwise. Reverse repurchase agreements involve sales by the Fund of portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price. Generally, the effect of such a transaction is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while it will be able to keep the interest income associated with those portfolio securities. Such transactions are only advantageous if the interest cost to the Fund of the reverse repurchase agreement transaction is less than the return on the leveraged portion of the Fund's investment portfolio. The Fund may enter into dollar rolls in which the Fund sells securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (same type and coupon) securities on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the *drop*) as well as the interest earned on the cash proceeds of the initial sale. Reverse repurchase agreements and dollar rolls are speculative techniques and are considered borrowings by the Fund.

Leverage may result in higher returns to the Fund than if the Fund were not leveraged, but may also adversely affect returns, particularly if the market is declining. The risks of leverage also include potentially a higher volatility of the NAV of the Fund's shares, potentially more volatility in the market value of the Fund's shares, and the relatively greater effect on the NAV of the Fund's shares caused by favorable or adverse changes in portfolio security values or currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate payable by the Fund on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of

(Disclosures, Risks and Note about Historical Performance continued on next page)

DISCLOSURES AND RISKS

(continued from previous page)

leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of the Fund than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so.

Part of the Fund's assets will be invested in foreign securities. A significant portion of the Fund's investments in foreign securities is in emerging markets. Since the Fund invests in foreign currency denominated securities, fluctuations in NAV may be magnified by changes in foreign exchange rates. The Fund also may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps and options. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market or economic developments. The Fund may invest in high yield bonds or below investment-grade securities (junk bonds). High yield bonds involve a greater risk of default and price volatility than other bonds. While the Fund invests principally in fixed-income securities, in order to achieve its investment objectives, the Fund may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments. These risks include the risk that the value of a derivative instrument may not correlate perfectly, or at all, with the value of the assets, reference rates or indices that they are designed to track. Other risks include: the possible absence of a liquid secondary market for a particular instrument and possible exchange-imposed price fluctuation limits, either of which may make it difficult or impossible to close out a position when desired, and the risk that the counterparty will not perform its obligation. Certain derivatives may have a leverage component and involve leverage risk. Adverse price movements in an instrument can result in a loss substantially greater than the Fund's initial investment in that instrument (in some cases, the potential loss is unlimited).

The Fund may invest in mortgage-backed and/or other asset-backed securities, including securities backed by mortgages and assets with an international or emerging markets origination and securities backed by non-performing loans at the time of investment. Investments in mortgage-backed and other asset-backed securities are subject to certain additional risks. The value of these securities may be particularly sensitive to changes in interest rates. These risks include extension risk, which is the risk that, in periods of rising interest rates, issuers may delay the payment of principal, and prepayment risk, which is the risk that, in periods of falling interest rates, issuers may pay principal sooner than expected, exposing the Fund to a lower rate of return upon reinvestment of principal. Mortgage-backed securities offered by nongovernmental issuers and other asset-backed securities may be subject to other risks, such as higher rates of default in the mortgages or assets backing the securities or risks associated with the nature and servicing of mortgages or assets backing the securities.

An Important Note About Historical Performance

The performance on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

NOTES TO FINANCIAL STATEMENTS

June 30, 2014 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein Income Fund, Inc. (the Fund) is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP) which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors (the Board).

In general, the market values of securities which are readily available and deemed reliable are determined as follows: securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the last traded price from the previous day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed or over the counter (OTC) market put or call options are valued at the mid level between the current bid and ask prices. If either a current bid or current ask price is unavailable, AllianceBernstein L.P. (the Adviser) will have discretion to determine the best valuation (e.g. last trade price in the case of listed options); open futures are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less. If the original term to maturity exceeded 60 days, the securities are valued by a pricing service, if a market price is available. If a market price is not available, the securities are valued by using amortized cost as of the 61st day prior to maturity. Fixed-income securities, including mortgage-backed and asset-backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker-dealers. In cases where broker-dealer quotes are obtained, the Adviser may establish procedures whereby changes in market yields or spreads are used to

adjust, on a daily basis, a recently obtained quoted price on a security. Swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties. Investment companies are valued at their net asset value each day.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

2. Fair Value Measurements

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability (including those valued based on their market values as described in Note A.1 above). Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The fair value of debt instruments, such as bonds, and over-the-counter derivatives is generally based on market price quotations, recently executed market transactions (where observable) or industry recognized modeling techniques and are generally classified as Level 2. Pricing vendor inputs to Level 2 valuations may include quoted prices for similar investments in active markets,

interest rate curves, coupon rates, currency rates, yield curves, option adjusted spreads, default rates, credit spreads and other unique security features in order to estimate the relevant cash flows which are then discounted to calculate fair values. If these inputs are unobservable and significant to the fair value, these investments will be classified as Level 3. In addition, non-agency rated investments are classified as Level 3.

Where readily available market prices or relevant bid prices are not available for certain equity investments, such investments may be valued based on similar publicly traded investments, movements in relevant indices since last available prices or based upon underlying company fundamentals and comparable company data (such as multiples to earnings or other multiples to equity). Where an investment is valued using an observable input, such as another publicly traded security, the investment will be classified as Level 2. If management determines that an adjustment is appropriate based on restrictions on resale, illiquidity or uncertainty, and such adjustment is a significant component of the valuation, the investment will be classified as Level 3. An investment will also be classified as Level 3 where management uses company fundamentals and other significant inputs to determine the valuation.

Options and warrants are valued using market-based inputs to models, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency, where such inputs and models are available. Alternatively the values may be obtained through unobservable management determined inputs and/or management's proprietary models. Where models are used, the selection of a particular model to value an option or a warrant depends upon the contractual terms of, and specific risks inherent in, the option or warrant as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, measures of volatility and correlations of such inputs. Exchange traded options generally will be classified as Level 2. For options or warrants that do not trade on exchange but trade in liquid markets, inputs can generally be verified and model selection does not involve significant management judgment. Options and warrants are classified within Level 2 on the fair value hierarchy when all of the significant inputs can be corroborated to market evidence. Otherwise such instruments are classified as Level 3.

Valuations of mortgage-backed or other asset-backed securities, by pricing vendors, are based on both proprietary and industry recognized models and discounted cash flow techniques. Significant inputs to the valuation of these instruments are value of the collateral, the rates and timing of delinquencies, the rates and timing of prepayments, and default and loss expectations, which are driven in part by housing prices for residential mortgages. Significant inputs are determined based on relative value analyses, which incorporate comparisons to instruments with similar collateral and risk profiles, including relevant indices.

Mortgage and asset-backed securities for which management has collected current observable data through pricing services are generally categorized within Level 2. Those investments for which current observable data has not been provided are classified as Level 3.

Bank loan prices are provided by third party pricing services and consist of a composite of the quotes received by the vendor into a consensus price. Bank loans are classified as Level 3, as significant input used in the fair value measurement of these instruments is the market quotes that are received by the vendor and these inputs are not observable.

Other fixed income investments, including non-U.S. government and corporate debt, are generally valued using quoted market prices, if available, which are typically impacted by current interest rates, maturity dates and any perceived credit risk of the issuer. Additionally, in the absence of quoted market prices, these inputs are used by pricing vendors to derive a valuation based upon industry or proprietary models which incorporate issuer specific data with relevant yield/spread comparisons with more widely quoted bonds with similar key characteristics. Those investments for which there are observable inputs are classified as Level 2. Where the inputs are not observable, the investments are classified as Level 3.

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of June 30, 2014:

Investments in Securities:	Level 1	Level 2	Level 3	Total
Assets:				
Governments Treasuries	\$ 0	\$ 1,842,553,248	\$ 0	\$ 1,842,553,248

* Other financial instruments are derivative instruments, such as futures, forwards and swaps, which are valued at the unrealized appreciation/depreciation on the instrument. Other financial instruments may also include options written which are valued at market value.

Only variation margin receivable/payable at period end is reported within the statement of assets and liabilities. This amount reflects cumulative appreciation/(depreciation) of exchange-traded derivatives as reported in the portfolio of investments.

+ There were no transfers between any levels during the reporting period.

The Fund recognizes all transfers between levels of the fair value hierarchy assuming the financial instruments were transferred at the beginning of the reporting period.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value.

	Corporates - Non-Investment Grades	Collateralized Mortgage Obligations	Commercial Mortgage - Backed Securities

* *Earnings before Interest, Taxes, Depreciation and Amortization.*

The Adviser has established a Valuation Committee (the Committee) which is responsible for overseeing the pricing and valuation of all securities held in the Fund. The Committee operates under pricing and valuation policies and procedures established by the Adviser and approved by the Board, including pricing policies which set forth the mechanisms and processes to be employed on a daily basis to implement these policies and procedures. In particular, the pricing policies describe how to determine market quotations for securities and other instruments. The Committee's responsibilities include: 1) fair value and liquidity determinations (and oversight of any third parties to whom any responsibility for fair value and liquidity determinations is delegated), and 2) regular monitoring of the Adviser's pricing and valuation policies and procedures and modification or enhancement of these policies and procedures (or recommendation of the modification of these policies and procedures) as the Committee believes appropriate.

The Committee is also responsible for monitoring the implementation of the pricing policies by the Adviser's Pricing Group (the Pricing Group) and a third party which performs certain pricing functions in accordance with the pricing policies. The Pricing Group is responsible for the oversight of the third party on a day-to-day basis. The Committee and the Pricing Group perform a series of activities to provide reasonable assurance of the accuracy of prices including: 1) periodic vendor due diligence meetings, review of methodologies, new developments and processes at vendors, 2) daily comparison of security valuation versus prior day for all securities that exceeded established thresholds, and 3) daily review of unpriced, stale, and variance reports with exceptions reviewed by senior management and the Committee.

In addition, several processes outside of the pricing process are used to monitor valuation issues including: 1) performance and performance attribution reports are monitored for anomalous impacts based upon benchmark performance, and 2) portfolio managers review all portfolios for performance and analytics (which are generated using the Adviser's prices).

3. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and ask prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation or depreciation of foreign currency denominated assets and liabilities.

4. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Fund's tax positions taken or expected to be taken on federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Fund's financial statements.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Fund is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date the securities are purchased or sold. Investment gains or losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

6. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. GAAP. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

7. Repurchase Agreements

It is the Fund's policy that its custodian or designated subcustodian take control of securities as collateral under repurchase agreements and to determine on a daily basis that the value of such securities are sufficient to cover the value of the repurchase agreements. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of collateral by the Fund may be delayed or limited.

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement (the "Advisory Agreement"), the Fund pays the Adviser a monthly advisory fee in an amount equal to the sum of 1/12th of .30 of 1% of the Fund's average weekly net assets up to \$250 million, 1/12th of .25 of 1% of the Fund's average weekly net assets in excess of \$250 million, and 4.75% of the Fund's daily gross income (i.e., income other than gains from the sale of securities and foreign currency transactions or gains realized from options, futures and swaps, less interest on money borrowed by the Fund) accrued by the Fund during the month. However, such monthly advisory fee shall not exceed in the aggregate 1/12th of .80% of the Fund's average weekly net assets during the month (approximately .80% on an annual basis).

Under the terms of the Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. ("ABIS"), a wholly-owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended June 30, 2014, there was no reimbursement paid to ABIS.

Pursuant to the investment advisory agreement, the Fund may reimburse the Adviser for certain legal and accounting services provided to the Fund by the Adviser. For the six months ended June 30, 2014, the reimbursement for such services amounted to \$34,514.

The Fund may invest in the AllianceBernstein Fixed-Income Shares, Inc. Government STIF Portfolio ("Government STIF Portfolio"), an open-end management investment company managed by the Adviser. The Government STIF Portfolio is offered as a cash management option to mutual funds and other institutional accounts of the Adviser, and is not available for direct purchase by

members of the public. The Government STIF Portfolio pays no investment management fees but does bear its own expenses. A summary of the Fund's transactions in shares of the Government STIF Portfolio for the six months ended June 30, 2014 is as follows:

Market Value

December 31, 2013	Purchases	Sales	Market Value	Dividend
(000)	at Cost	Proceeds	June 30, 2014	Income
(000)	(000)	(000)	(000)	(000)
\$ 47,067	\$ 408,002	\$ 437,381	\$ 17,688	\$ 13

Brokerage commissions paid on investment transactions for the six months ended June 30, 2014 amounted to \$61,811, of which \$0 and \$0, respectively, was paid to Sanford C. Bernstein & Co. LLC and Sanford C. Bernstein Limited, affiliates of the Adviser.

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the six months ended June 30, 2014 were as follows:

	Purchases	Sales
Investment securities (excluding U.S. government securities)	\$ 240,053,117	\$ 244,798,352
U.S. government securities	250,424,197	225,563,262

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding futures, foreign currency, written options and swap transactions) are as follows:

Gross unrealized appreciation	\$ 126,663,171
Gross unrealized depreciation	(6,450,142)
Net unrealized appreciation	\$ 120,213,029

1. Derivative Financial Instruments

The Fund may use derivatives in an effort to earn income and enhance returns, to replace more traditional direct investments, to obtain exposure to otherwise inaccessible markets (collectively, investment purposes), or to hedge or adjust the risk profile of its portfolio.

The principal types of derivatives utilized by the Fund, as well as the methods in which they may be used are:

Futures

The Fund may buy or sell futures for investment purposes or for the purpose of hedging its portfolio against adverse effects of potential movements in the market. The Fund bears the market risk that arises from

changes in the value of these instruments and the imperfect correlation between movements in the price of the futures and movements in the price of the assets, reference rates or indices which they are designed to track. Among other things, the Fund may purchase or sell futures for foreign currencies or options thereon for non-hedging purposes as a means of making direct investment in foreign currencies, as described below under **Currency Transactions** .

At the time the Fund enters into futures, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the exchange on which the transaction is effected. Such amount is shown as due from broker on the statement of assets and liabilities. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. The credit/counterparty risk for exchange-traded futures is generally less than privately negotiated futures, since the clearinghouse, which is the issuer or counterparty to each exchange-traded future, has robust risk mitigation standards, including the requirement to provide initial and variation margin. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

Use of long futures subjects the Fund to risk of loss in excess of the amounts shown on the statement of assets and liabilities, up to the notional value of the futures. Use of short futures subjects the Fund to unlimited risk of loss. Under some circumstances, futures exchanges may establish daily limits on the amount that the price of futures can vary from the previous day's settlement price, which could effectively prevent liquidation of unfavorable positions.

During the six months ended June 30, 2014, the Fund held futures for hedging purposes.

Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sale commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions** .

A forward currency exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on

foreign currency transactions. Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and/or depreciation by the Fund. Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

During the six months ended June 30, 2014, the Fund held forward currency exchange contracts for hedging and non-hedging purposes.

Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign securities, including government securities, and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. Among other things, the Fund may use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions** and may use options strategies involving the purchase and/or writing of various combinations of call and/or put options, for hedging and investment purposes.

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

During the six months ended June 30, 2014, the Fund held purchased options for hedging purposes. During the six months ended June 30, 2014, the Fund held written options for hedging purposes.

For the six months ended June 30, 2014, the Fund had the following transactions in written options:

	Number of Contracts	Premiums Received
Options written outstanding as of 12/31/13	0	\$ 0
Options written	40,600,000	313,679
Options expired	(400,000)	(80,000)
Options bought back	(39,900,000)	(98,679)
Options exercised	0	0
Options written outstanding as of 6/30/14	300,000	\$ 135,000

At June 30, 2014, the maximum loss for the written call options was unknown with a fair value of \$12,146 expiring July 2014, as reflected in the Portfolio of Investments. In certain circumstances maximum loss amounts may be partially offset by upfront premium received upon entering into the contract.

Swaps

The Fund may enter into swaps to hedge its exposure to interest rates, credit risk, or currencies. The Fund may also enter into swaps for non-hedging purposes as a means of gaining market exposures, including by making direct investments in foreign currencies, as described below under *Currency Transactions*. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other. In addition, collateral may be pledged or received by the Fund in accordance with the terms of the respective swaps to provide value and recourse to the Fund or its counterparties in the event of default, bankruptcy or insolvency by one of the parties to the swap.

Risks may arise as a result of the failure of the counterparty to the swap to comply with the terms of the swap. The loss incurred by the failure of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap in evaluating potential counterparty risk. This risk is mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities. The Fund accrues for the interim payments on swaps on a daily

basis, with the net amount recorded within unrealized appreciation/depreciation of swaps on the statement of assets and liabilities, where applicable. Once the interim payments are settled in cash, the net amount is recorded as realized gain/(loss) on swaps on the statement of operations, in addition to any realized gain/(loss) recorded upon the termination of swaps. Upfront premiums paid or received are recognized as cost or proceeds on the statement of assets and liabilities and are amortized on a straight line basis over the life of the contract. Amortized upfront premiums are included in net realized gain/(loss) from swaps on the statement of operations. Fluctuations in the value of swaps are recorded as a component of net change in unrealized appreciation/depreciation of swaps on the statement of operations.

Certain standardized swaps, including certain interest rate swaps and credit default swaps, are (or soon will be) subject to mandatory central clearing. Cleared swaps are transacted through futures commission merchants (FCMs) that are members of central clearinghouses, with the clearinghouse serving as central counterparty, similar to transactions in futures contracts. Centralized clearing will be required for additional categories of swaps on a phased-in basis based on requirements published by the Securities and Exchange Commission and Commodity Futures Trading Commission.

At the time the Fund enters into a centrally cleared swap, the Fund deposits and maintains as collateral an initial margin with the broker, as required by the exchange on which the transaction is effected. Such amount is shown as due from broker on the statement of assets and liabilities. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. The credit/counterparty risk for exchange-traded swaps is generally less than privately negotiated swaps, since the clearinghouse, which is the issuer or counterparty to each exchange-traded swap, has robust risk mitigation standards, including the requirement to provide initial and variation margin. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed.

Interest Rate Swaps:

The Fund is subject to interest rate risk exposure in the normal course of pursuing its investment objectives. Because the Fund holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk and to maintain its ability to generate income at prevailing market rates, the Fund may enter into interest rate swaps. Interest rate swaps are agreements between two parties to exchange cash

flows based on a notional amount. The Fund may elect to pay a fixed rate and receive a floating rate, or, receive a fixed rate and pay a floating rate on a notional amount.

In addition, the Fund may also enter into interest rate swap transactions to preserve a return or spread on a particular investment or portion of its portfolio, or protecting against an increase in the price of securities the Fund anticipates purchasing at a later date. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to pay or receive interest (*e.g.*, an exchange of floating rate payments for fixed rate payments) computed based on a contractually-based principal (or notional) amount. Interest rate swaps are entered into on a net basis (*i.e.*, the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments).

During the six months ended June 30, 2014, the Fund held interest rate swaps for hedging purposes.

Credit Default Swaps:

The Fund may enter into credit default swaps, including to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults by corporate and sovereign issuers held by the Fund, or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. The Fund may purchase credit protection (Buy Contract) or provide credit protection (Sale Contract) on the referenced obligation of the credit default swap. During the term of the swap, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon rate applied to the notional amount. If the Fund is a buyer/(seller) of protection and a credit event occurs, as defined under the terms of the swap, the Fund will either (i) receive from the seller/(pay to the buyer) of protection an amount equal to the notional amount of the swap (the Maximum Payout Amount) and deliver/(take delivery of) the referenced obligation or (ii) receive/(pay) a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation.

Credit default swaps may involve greater risks than if a Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer of protection and no credit event occurs, it will lose the payments it made to its counterparty. If the Fund is a seller of protection and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received, may be less than the Maximum Payout Amount it pays to the buyer, resulting in a net loss to the Fund.

During the six months ended June 30, 2014, the Fund held credit default swaps for hedging and non-hedging purposes.

Implied credit spreads utilized in determining the market value of credit default swaps on issuers as of period end are disclosed in the portfolio of investments. The implied spreads serve as an indicator of the current status of the payment/performance risk and typically reflect the likelihood of default by the issuer of the referenced obligation. The implied credit spread of a particular reference obligation also reflects the cost of buying/selling protection and may reflect upfront payments required to be made to enter into the agreement. Widening credit spreads typically represent a deterioration of the referenced obligation's credit soundness and greater likelihood of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as "Defaulted" indicates a credit event has occurred for the referenced obligation.

At June 30, 2014, the Fund had Sale Contracts outstanding with Maximum Payout Amounts aggregating \$78,527,820, with net unrealized appreciation of \$2,071,580, and terms of less than 33 years, as reflected in the portfolio of investments.

In certain circumstances Maximum Payout Amounts may be partially offset by recovery values of the respective referenced obligations, upfront premium received upon entering into the agreement, or net amounts received from settlement of buy protection credit default swaps entered into by the Fund for the same reference obligation with the same counterparty. As of June 30, 2014, the Fund did not have Buy Contracts outstanding with respect to the same referenced obligation and same counterparty for its Sale Contracts outstanding.

The Fund typically enters into International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreement") or similar master agreements (collectively, "Master Agreements") with its OTC derivative contract counterparties in order to, among other things, reduce its credit risk to counterparties. ISDA Master Agreements include provisions for general obligations, representations, collateral and events of default or termination. Under an ISDA Master Agreement, the Fund typically may offset with the counterparty certain derivative financial instrument's payables and/or receivables with collateral held and/or posted and create one single net payment (close-out netting) in the event of default or termination.

Various Master Agreements govern the terms of certain transactions with counterparties, including transactions such as exchange-traded derivative transactions, repurchase and reverse repurchase agreements. These Master Agreements typically attempt to reduce the counterparty risk associated with such transactions by specifying credit protection mechanisms and providing standardization that improves legal certainty. Cross-termination provisions under Master Agreements

typically provide that a default in connection with one transaction between the Fund and a counterparty gives the non-defaulting party the right to terminate any other transactions in place with the defaulting party to create one single net payment due to/due from the defaulting party. In the event of a default by a Master Agreements counterparty, the return of collateral with market value in excess of the Fund's net liability, held by the defaulting party, may be delayed or denied.

The Fund's Master Agreements may contain provisions for early termination of OTC derivative transactions in the event the net assets of the Fund decline below specific levels (net asset contingent features). If these levels are triggered, the Fund's counterparty has the right to terminate such transaction and require the Fund to pay or receive a settlement amount in connection with the terminated transaction. As of June 30, 2014, the Fund had OTC derivatives with contingent features in net liability positions in the amount of \$3,949,568. The fair value of assets pledged as collateral by the Fund for such derivatives was \$1,129,241. If a trigger event had occurred at June 30, 2014, for those derivatives in a net liability position, an amount of \$2,820,327 would be required to be posted by the Fund.

At June 30, 2014, the Fund had entered into the following derivatives:

Derivative Type	Asset Derivatives Statement of		Liability Derivatives	
	Location	Fair Value	Statement of	
			Assets and Liabilities	Assets and Liabilities
			Location	Fair Value
Interest rate contracts			Receivable/Payable for variation margin on futures	\$ 3,202,558*
Foreign exchange contracts	Unrealized appreciation on forward currency exchange contracts	\$ 1,355,373	Unrealized depreciation on forward currency exchange contracts	4,523,495
Equity contracts	Investments in securities, at value	55,410		
Equity contracts			Options written, at value	12,146
Interest rate contracts	Receivable/Payable for variation margin on centrally cleared interest rate swaps	1,066,672*	Receivable/Payable for variation margin on centrally cleared interest rate swaps	8,324,788*
Credit contracts	Unrealized appreciation on credit default swaps	1,163,381	Unrealized depreciation on credit default swaps	717,875

Derivative Type	Asset Derivatives Statement of		Liability Derivatives	
	Assets and Liabilities	Fair Value	Statement of Assets and Liabilities	Fair Value
Derivative Type	Location	Fair Value	Location	Fair Value
Credit contracts	Receivable/Payable for variation margin on centrally cleared credit default swaps	\$ 908,199*		
Total		\$ 4,549,035		\$ 16,780,862

* Only variation margin receivable/payable at period end is reported within the statement of assets and liabilities. This amount reflects cumulative appreciation/(depreciation) of exchange-traded derivatives as reported in the portfolio of investments.

The effect of derivative instruments on the statement of operations for the six months ended June 30, 2014:

Derivative Type	Location of Gain or (Loss) on Derivatives		Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
	Interest rate contracts	Net realized gain (loss) on futures; Net change in unrealized appreciation/depreciation of futures		\$ (28,634,490)
Foreign exchange contracts	Net realized gain (loss) on foreign currency transactions; Net change in unrealized appreciation/depreciation of foreign currency denominated assets and liabilities		(1,675,126)	(3,350,712)
Foreign exchange contracts	Net realized gain (loss) on investment transactions; Net change in unrealized appreciation/depreciation of investments		(73,159)	0
Equity contracts	Net realized gain (loss) on investment transactions; Net change in unrealized appreciation/depreciation of investments		(260,000)	(238,590)

ALLIANCEBERNSTEIN INCOME FUND 59

Notes to Financial Statements

Derivative Type	Location of Gain or (Loss) on Derivatives	Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
Foreign exchange contracts	Net realized gain (loss) on options written; Net change in unrealized appreciation/depreciation of options written	\$ 86,391	\$ 0
Equity contracts	Net realized gain (loss) on options written; Net change in unrealized appreciation/depreciation of options written	80,000	122,854
Interest rate contracts	Net realized gain (loss) on swaps; Net change in unrealized appreciation/depreciation of swaps	(133,734)	(7,258,116)
Credit contracts	Net realized gain (loss) on swaps; Net change in unrealized appreciation/depreciation of swaps	1,142,036	(801,301)
Total		\$ (29,468,082)	\$ (30,382,737)

The following table represents the volume of the Fund's derivative transactions during the six months ended June 30, 2014:

Futures:	
Average original value of sale contracts	\$ 978,456,487
Forward Currency Exchange Contracts:	
Average principal amount of buy contracts	\$ 83,795,834
Average principal amount of sale contracts	\$ 179,763,009
Purchased Options:	
Average monthly cost	\$ 246,045 ^(a)
Centrally Cleared Interest Rate Swaps:	
Average notional amount	\$ 300,178,228
Credit Default Swaps:	
Average notional amount of buy contracts	\$ 12,230,000 ^(a)
Average notional amount of sale contracts	\$ 24,768,636
Centrally Cleared Credit Default Swaps:	
Average notional amount of buy contracts	\$ 31,644,000 ^(b)
Average notional amount of sale contracts	\$ 49,179,377

(a) Positions were open for five months during the period.

(b) Positions were open for one month during the period.

For financial reporting purposes, the Fund does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the statement of assets and liabilities.

All derivatives held at period end were subject to netting arrangements. The following table presents the Fund's derivative assets and liabilities by counterparty net of amounts available for offset under Master Agreements (MA) and net of the related collateral received/ pledged by the Fund as of June 30, 2014:

Counterparty	Derivative Assets Subject to MA	Derivative Available for Offset	Cash Collateral Received	Securities Collateral Received	Net Amount of Derivatives Assets
Bank of America, NA	\$ 199,229	\$ 0	\$ 0	\$ (129,229)	\$ 70,000

* The actual collateral received/pledged may be more than the amount reported due to overcollateralization.

** Cash and securities have been posted for initial margin requirements for exchange-traded derivatives outstanding at June 30, 2014.

2. Currency Transactions

The Fund may invest in non-U.S. dollar securities on a currency hedged or unhedged basis. The Fund may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and other options. The Fund may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Fund may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

3. Dollar Rolls

The Fund may enter into dollar rolls. Dollar rolls involve sales by the Fund of securities for delivery in the current month and the Fund simultaneously

contracting to repurchase substantially similar (same type and coupon) securities on a specified future date. During the roll period, the Fund forgoes principal and interest paid on the securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the "drop") as well as by the interest earned on the cash proceeds of the initial sale. Dollar rolls involve the risk that the market value of the securities the Fund is obligated to repurchase under the agreement may decline below the repurchase price. Dollar rolls are speculative techniques and may be considered to be borrowings by the Fund. For the six months ended June 30, 2014, the Fund had no transactions in dollar rolls.

4. Reverse Repurchase Agreements

The Fund may enter into reverse repurchase transactions ("RVP") in accordance with the terms of a Master Repurchase Agreement ("MRA"), under which the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value comparable to the repurchase price. Under the MRA and other Master Agreements, the Fund is permitted to offset payables and/or receivables with collateral held and/or posted to the counterparty and create one single net payment due to or from the Fund in the event of a default. In the event of a default by a MRA counterparty, the Fund may be considered an unsecured creditor with respect to any excess collateral (collateral with a market value in excess of the repurchase price) held by and/or posted to the counterparty, and as such the return of such excess collateral may be delayed or denied. For the six months ended June 30, 2014, the average amount of reverse repurchase agreements outstanding was \$1,065,099,700 and the daily weighted average interest rate was 0.08%. At June 30, 2014, The Fund had reverse repurchase agreements outstanding in the amount of \$975,709,297 as reported on the statement of assets and liabilities.

The following table presents the Fund's RVP liabilities by counterparty net of the related collateral pledged by the Fund as of June 30, 2014:

Counterparty	RVP Liabilities Subject to MA	Assets Available for Offset	Securities Collateral Pledged*	Net Amount of RVP Liabilities
Barclays Capital, Inc.	\$ 14,698,866	\$ 0	\$ (14,698,866)	\$ 0
BNP Paribas	10,448,338	0	(10,421,026)	27,312
Credit Suisse Securities (USA) LLC	13,783,923	0	(13,752,045)	31,878
HSBC Bank USA	390,990,119	0	(390,990,119)	0
ING Bank NV	1,113,997	0	(1,111,976)	2,021
JPMorgan Chase Bank, NA	544,674,054	0	(544,674,054)	0
Total	\$ 975,709,297	\$ 0	\$ (975,648,086)	\$ 61,211

Including accrued interest.

* The actual collateral pledged may be more than the amount reported due to overcollateralization.

5. Loan Participations and Assignments

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated (Participations) or by buying an interest in the loan in the secondary market from a financial institution or institutional investor (Assignments). A loan is often administered by a bank or other financial institution (the Lender) that acts as agent for all holders. The agent administers the term of the loan as specified in the loan agreement. When investing in Participations, the Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. In addition, when investing in Participations, the Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender and only upon receipt of payments by the Lender from the borrower. As a result, the Fund may be subject to the credit risk of both the borrower and the Lender. When the Fund purchases Assignments from Lenders, it will typically acquire direct rights against the borrower on the loan. These loans may include participations in bridge loans , which are loans taken out by borrowers for a short period (typically less than six months) pending arrangement of more permanent financing through, for example, the issuance of bonds, frequently high-yield bonds issued for the purpose of acquisitions. The Fund may also participate in unfunded loan commitments, which are contractual obligations for investing in future Participations, and receive a commitment fee based on the amount of the commitment. Under these arrangements, the Fund will receive a fixed rate commitment fee and, if and to the extent the borrower borrows under the facility, the Fund may receive an additional funding fee.

Unfunded loan commitments and funded loans are marked to market daily.

During the six months ended June 30, 2014, the Fund had no commitments outstanding and did not receive commitment fees.

NOTE D

Common Stock

During the six months ended June 30, 2014 and the year ended December 31, 2013, the Fund did not issue any shares in connection with the Fund's dividend reinvestment plan.

On June 25, 2014, the Fund announced a share repurchase program for the Fund's discretionary repurchase of up to 15% of its then outstanding shares of common stock (valued at up to approximately \$306 million as of June 24, 2014 based on Fund total net assets of approximately \$2.04 billion) in open market transactions over a one-year period. This share repurchase program is intended to benefit long-term Fund stockholders by the repurchase of Fund shares at a discount to their net asset value. Such repurchases may moderate the discount at which the Fund's shares currently trade. Repurchases will be made from time to

time when they are believed to be in the best interests of the Fund. During the six months ended June 30, 2014, the Fund had no share repurchases.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may be reflected in its credit rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as "junk bonds") have speculative elements or are predominantly speculative risks.

Duration Risk Duration is the measure that relates the expected price volatility of a fixed-income security to changes in interest rates. The duration of a fixed-income security may be shorter than or equal to full maturity of a fixed-income security. Fixed-income securities with longer durations have more risk and will decrease in price as interest rates rise. For example, a fixed-income security with a duration of three years will decrease in value by approximately 3% if interest rates increase by 1%.

Mortgage-Backed and/or Other Asset-Backed Securities Risk Investments in mortgage-backed and other asset-backed securities are subject to certain additional risks. The value of these securities may be particularly sensitive to changes in interest rates. These risks include "extension risk", which is the risk that, in periods of rising interest rates, issuers may delay the payment of principal, and "prepayment risk", which is the risk that in periods of falling interest rates, issuers may pay principal sooner than expected, exposing the Fund to a lower rate of return upon reinvestment of principal. Mortgage-backed securities offered by non-governmental issuers and other asset-backed securities may be subject to other risks, such as higher rates of default in the mortgages or assets backing the securities or risks associated with the nature and servicing of mortgages or assets backing the securities.

Derivatives Risk The Fund may enter into derivative transactions such as forwards, options, futures and swaps. Derivatives may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Fund, and subject to counterparty risk to a greater degree than more traditional investments. Derivatives may result in significant losses, including losses that are far greater than the value of the derivatives reflected in the statement of assets and liabilities.

Foreign Securities Risk Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies or of the U.S. government.

The Fund invests in the sovereign debt obligations of countries that are considered emerging market countries at the time of purchase. Therefore, the Fund is susceptible to governmental factors and economic and debt restructuring developments adversely affecting the economics of these emerging market countries. In addition, these debt obligations may be less liquid and subject to greater volatility than debt obligations of more developed countries.

Currency Risk This is the risk that changes in foreign currency exchange rates may negatively affect the value of the Fund's investments or reduce the returns of the Fund. For example, the value of the Fund's investments in foreign currency-denominated securities or currencies may decrease if the U.S. dollar is strong (*i.e.*, gaining value relative to other currencies) and other currencies are weak (*i.e.*, losing value relative to the U.S. dollar). Currency markets are generally not as regulated as securities markets. Independent of the Fund's investments denominated in foreign currencies, the Fund's positions in various foreign currencies may cause the Fund to experience investment losses due to the changes in exchange rates and interest rates.

Leverage Risk The Fund utilizes leverage through the investment techniques of reverse repurchase agreements and dollar rolls. In addition, the Fund may borrow money in the future, through participation in credit facilities, direct bank borrowings, or otherwise. Reverse repurchase agreements and dollar rolls are speculative techniques and are considered borrowings by the Fund. The use of derivative instruments by the Fund, such as forwards, futures, options and swaps, may also result in a form of leverage.

Leverage may result in higher returns to the Fund than if the Fund were not leveraged, but may also adversely affect returns, particularly if the market is declining. The risks of leverage also include potentially a higher volatility of the NAV of the common stock, potentially more volatility in the market value of the common stock and the relatively greater effect on the NAV of the common stock caused by favorable or adverse changes in portfolio security values or currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment

portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of common stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote. Therefore, the Fund has not accrued any liability in connection with these indemnification provisions.

NOTE F

Distributions to Shareholders

The tax character of distributions to be paid for the year ending December 31, 2014 will be determined at the end of the current fiscal year. The tax character of distributions paid during the fiscal years ended December 31, 2013 and December 31, 2012 were as follows:

	2013	2012
Distributions paid from:		
Ordinary income	\$ 103,758,100	\$ 172,030,064
Net long-term capital gains	6,608,830	72,994,965
Total taxable distributions paid	\$ 110,366,930	\$ 245,025,029

As of December 31, 2013, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Accumulated capital and other losses	\$ (15,223,070) ^(a)
Unrealized appreciation/(depreciation)	2,065,080 ^(b)
Total accumulated earnings/(deficit)	\$ (13,157,990) ^(c)

^(a) As of December 31, 2013, the Fund had a capital loss carryforward of \$15,223,070.

^(b) The differences between book-basis and tax-basis unrealized appreciation/(depreciation) are attributable primarily to the tax treatment of swaps and the realization for tax purposes of gains/losses on certain derivative instruments.

^(c) The differences between book-basis and tax-basis components of accumulated earnings/(deficit) are attributable primarily to the tax deferral of dividend income from real estate investment trust (REIT) securities.

For tax purposes, net capital losses may be carried over to offset future capital gains, if any. Funds are permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an indefinite period, and such losses will retain their character as either short-term or long-term capital losses. As of December 31, 2013, the Fund had a net capital loss carryforward of \$15,223,070 which may be carried forward for an indefinite period.

NOTE G

Subsequent Events

Management has evaluated subsequent events for possible recognition or disclosure in the financial statements through the date the financial statements are issued. Management has determined that there are no material events that would require disclosure in the Fund's financial statements through this date.

FINANCIAL HIGHLIGHTS**Selected Data For A Share Of Common Stock Outstanding Throughout Each Period**

	\$2,045	\$1,976	\$2,159	\$2,168	\$2,126	\$2,033
Ratio to average net assets of:						
Expenses ^(d)	.66 % [^]	.63 %	.64 %	.64 %	.71 %	.91 %
Net investment income	5.11 % [^]	4.74 %	4.34 %	5.00 %	5.40 %	6.84 %
Portfolio turnover rate	16 %	107 %	58 %	67 %	121 %	153 %

See footnote summary on page 70.

(a) *Based on average shares outstanding.*

(b) *Amount is less than \$0.005.*

(c) *Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.*

(d) *The expense ratios, excluding interest expense and TALF administration fee, if applicable are .61%, .57%, .55%, .58%, .60%, and .68%, respectively. These expense ratios exclude net interest expense on borrowings of .05%, .06%, .09%, .06%, .11%, and .22%, respectively.*

* *Includes the impact of proceeds received and credited to the Fund resulting from class action settlements, which enhanced the Fund's performance for the year ended December 31, 2010 by 0.15%.*

^ *Annualized.*

See notes to financial statements.

ADDITIONAL INFORMATION

(unaudited)

Dividend Reinvestment and Cash Purchase Plan

Shareholders whose shares are registered in their own names may elect to be participants in the Dividend Reinvestment and Cash Purchase Plan (the Plan), pursuant to which dividends and capital gain distributions to shareholders will be paid in or reinvested in additional shares of the Fund (the Dividend Shares). Computershare Trust Company, N.A. (the Agent) will act as agent for participants under the Plan. The Plan also allows you to make optional cash investments in Fund shares through the Agent. Shareholders whose shares are held in the name of a broker or nominee should contact such broker or nominee to determine whether or how they may participate in the Plan.

If the Board declares an income distribution or determines to make a capital gain distribution payable either in shares or in cash, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in shares of common stock of the Fund valued as follows:

- (i) If the shares of common stock are trading at net asset value or at a premium above net asset value at the time of valuation, the Fund will issue new shares at the greater of net asset value or 95% of the then current market price.
- (ii) If the shares of common stock are trading at a discount from net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and apply it to the purchase of the Fund's shares of common stock in the open market on the New York Stock Exchange or elsewhere, for the participants' accounts. Such purchases will be made on or shortly after the payment date for such dividend or distribution and in no event more than 30 days after such date except where temporary curtailment or suspension of purchase is necessary to comply with Federal securities laws. If, before the Plan Agent has completed its purchases, the market price exceeds the net asset value of a share of common stock, the average purchase price per share paid by the Plan Agent may exceed the net asset value of the Fund's shares of common stock, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund.

The Plan Agent will maintain all shareholders' accounts in the Plan and furnish written confirmation of all transactions in the account, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Plan Agent in non-certificate form in the name of the participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan.

There will be no charges with respect to shares issued directly by the Fund to satisfy the dividend reinvestment requirements. However, each participant will

pay a pro-rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases of shares.

The automatic reinvestment of dividends and distributions will not relieve participants of any income taxes that may be payable (or required to be withheld) on dividends and distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payments made and any dividend or distribution paid subsequent to written notice of the change sent to participants in the Plan at least 90 days before the record date for such dividend or distribution. The Plan may also be amended or terminated by the Plan Agent on at least 90 days written notice to participants in the Plan. All correspondence concerning the Plan should be directed to the Plan Agent at Computershare Trust Company, N.A., P.O. Box 30170, College Station, TX 77842-3170.

Proof of Share Ownership Required in Connection with Requests for Submission of Open-Ending Proposals to Annual Meetings of Stockholders Pursuant to Charter

The Fund's charter provides that the Fund is required to submit to its stockholders a proposal to open-end the Fund if (i) the Fund's shares trade on the NYSE at an average discount of more than 10%, determined on the basis of the discount as of the end of the last trading day in each week, during the last 12 calendar weeks of any calendar year, and (ii) during such year the Fund receives written requests from the holders of at least 10% of the Fund's outstanding shares that such open-ending proposal be submitted to the Fund's stockholders. Under Maryland law, requests pursuant to this charter provision must be made by persons that are stockholders of record of the Fund on the date the proposal is submitted. However, if a stockholder submits a request pursuant to the charter provision and is not a record stockholder, the Fund will accept the request provided the stockholder submits, together with its request, proof that the stockholder is the beneficial owner of shares on the date of the request. The Fund may accept as proof a written statement verifying a stockholder's beneficial ownership from the record holder of the Fund's shares, such as, for shares held through The Depository Trust Company (DTC), a DTC participant that appears as the owner of such shares on DTC's records. To the extent beneficially owned shares are held through a brokerage firm or other intermediary that is not a DTC participant or a direct record holder of the Fund's shares, additional documentation demonstrating the chain of ownership to a DTC participant (or to a direct record holder) will be required to establish proof of beneficial ownership. This will normally require provision of two proof of ownership statements one from the beneficial owner's intermediary confirming ownership, and another from the DTC participant confirming such intermediary's ownership. A list of DTC participants can be found at <http://www.dtcc.com/client-center/dtc-directories.aspx>.

RESULTS OF STOCKHOLDERS MEETING

(unaudited)

The Annual Meeting of Stockholders of AllianceBernstein Income Fund, Inc. (the Fund) was held on March 27, 2014. A description of the proposals and number of shares voted at the Meeting are as follows:

1. To elect three Directors for a term of three years and until his successor is duly elected and qualifies.
Class Two (term expires 2017)

	Voted For	Authority Withheld
Class Two (term expires 2017)		
Common Shares:		
William H. Foulk, Jr.	137,067,487	37,203,355
D. James Guzy	137,160,752	37,110,090
Robert M. Keith	137,476,737	36,794,106

2. To eliminate the Fund's fundamental investment policy to invest, under normal circumstances, at least 65% of its total assets in U.S. government securities and repurchase agreements relating to U.S. government securities:

	Voted		
	For	Against	Abstain
	83,628,347	66,665,025	2,915,966

3. To convert the Fund to an open-end investment company:

	Voted		
	For	Against	Abstain
	72,276,802	77,494,632	3,437,904

Board of Directors

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The daily net asset value of the Fund's shares is available from the Fund's Transfer Agent by calling (800) 426-5523. The Fund also distributes its daily net asset value to various financial publications or independent organizations such as Lipper Inc., Morningstar, Inc. and Bloomberg.

Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Saturday in *Barron's* and other newspapers in a table called "Closed-End Funds." Daily net asset value and market price information and additional information regarding the Fund is available at www.alliancebernstein.com and at www.nyse.com.

Dividend Reinvestment Plan

A Dividend Reinvestment Plan provides automatic reinvestment of dividends and capital gains distributions in additional Fund shares. The Plan also allows you to make optional cash investments in Fund Shares through the Plan Agent. If you wish to participate in the Plan and your shares are held in your name, simply complete and mail the enrollment form in the brochure. If your shares are held in the name of your brokerage firm, bank or other nominee, you should ask them whether or how you can participate in the Plan.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company, N.A. at (800) 219-4218.
