PART I. FINANCIAL INFORMATION

When we refer to we, our, and us in this report, we mean Huntington Bancshares Incorporated and our consolidated subsidiaries, unless the context indicates that we refer only to the parent company, Huntington Bancshares Incorporated. When we refer to the Bank in this report, we mean our only bank subsidiary, The Huntington National Bank, and its subsidiaries.

Item 2: Management s Discussion and Analysis of Financial Condition and Results of Operations INTRODUCTION

We are a multi-state diversified regional bank holding company organized under Maryland law in 1966 and headquartered in Columbus, Ohio. Through the Bank, we have 148 years of servicing the financial needs of our customers. Through our subsidiaries, we provide full-service commercial and consumer banking services, mortgage banking services, automobile financing, equipment leasing, investment management, trust services, brokerage services, insurance service programs, and other financial products and services. Our 753 branches are located in Ohio, Michigan, Pennsylvania, Indiana, West Virginia, and Kentucky. Selected financial services and other activities are also conducted in various other states. International banking services are available through the headquarters office in Columbus, Ohio and a limited purpose office located in the Cayman Islands and another limited purpose office located in Hong Kong. Our foreign banking activities, in total or with any individual country, are not significant.

This MD&A provides information we believe necessary for understanding our financial condition, changes in financial condition, results of operations, and cash flows. The MD&A included in our Form 8-K filed on May 28, 2014 should be read in conjunction with this MD&A as this discussion provides only material updates to the Form 8-K. This MD&A should also be read in conjunction with the financial statements, notes and other information contained in this report.

Our discussion is divided into key segments:

Executive Overview Provides a summary of our current financial performance and business overview, including our thoughts on the impact of the economy, legislative and regulatory initiatives, and recent industry developments. This section also provides our outlook regarding our expectations for the next several quarters.

Discussion of Results of Operations Reviews financial performance from a consolidated Company perspective. It also includes a Significant Items section that summarizes key issues helpful for understanding performance trends. Key consolidated average balance sheet and income statement trends are also discussed in this section.

Risk Management and Capital Discusses credit, market, liquidity, operational, and compliance risks, including how these are managed, as well as performance trends. It also includes a discussion of liquidity policies, how we obtain funding, and related performance. In addition, there is a discussion of guarantees and / or commitments made for items such as standby letters of credit and commitments to sell loans, and a discussion that reviews the adequacy of capital, including regulatory capital requirements.

Business Segment Discussion Provides an overview of financial performance for each of our major business segments and provides additional discussion of trends underlying consolidated financial performance.

Additional Disclosures Provides comments on important matters including forward-looking statements, critical accounting policies and use of significant estimates, and recent accounting pronouncements and developments.

A reading of each section is important to understand fully the nature of our financial performance and prospects.

6

EXECUTIVE OVERVIEW

Summary of 2014 Third Quarter Results

For the quarter, we reported net income of \$155.0 million, or \$0.18 per common share, compared with \$178.8 million, or \$0.20 per common share, in the year-ago quarter (see Table 1).

Fully-taxable equivalent net interest income was \$473.8 million for the quarter, up \$42.4 million, or 10%, from the year-ago quarter. The results reflected a \$7.5 billion, or 15%, increase in average earning assets, including a \$4.1 billion, or 10%, increase in average loans and leases, as well as a \$3.3 billion, or 38%, increase in average securities. The impact of these balance increases was partially offset by a 14 basis point decrease in net interest margin. The primary items affecting the net interest margin were a 20 basis point negative impact from the mix and yield of earning assets and a 3 basis point reduction in the benefit from the impact of noninterest-bearing funds, partially offset by a 9 basis point reduction in funding costs.

The provision for credit losses was \$5.5 million less than total NCOs for the same period, reflecting continued credit quality improvement. Provision expense increased \$13.1 million, or 115%, from the year-ago quarter. This reflected the implementation of enhancements to our ALLL model in the year-ago quarter. Consistent with our expectations, NCOs decreased \$25.7 million, or 46%, to \$30.0 million. The consumer loan portfolios drove the majority of the decline, continuing the positive trend exhibited over the past three quarters. NCOs were an annualized 0.26% of average loans and leases in the current quarter, compared to 0.53% in the year-ago quarter.

Noninterest income decreased \$6.4 million, or 3%, from the year-ago quarter. The results included a \$6.4 million, or 17%, decrease in other income, primarily related to commercial loan fees and a decline in income from early lease terminations. In addition, service charges on deposit accounts decreased \$3.8 million, or 5%, reflecting the late July 2014 implementation of changes in consumer products that were partially offset by an 11% increase in consumer households and changing customer usage patterns. Capital markets fees decreased \$2.6 million, or 20%, due to lower interest rate derivative sales. These declines were partially offset by a \$3.1 million, or 62%, increase in gain on sale of loans related to strong SBA production and relatively higher premiums and \$3.0 million, or 12%, increase in electronic banking due to higher card related income and underlying customer growth.

Noninterest expense in the current and year-ago quarter included several Significant Items, which are further described in the Discussion of Results of Operations section. Reported noninterest expense increased \$57.0 million, or 13%, from the year-ago quarter. The results included a \$46.1 million, or 20%, increase in personnel costs (excluding the impact of Significant Items, personnel costs increased \$3.4 million, or 1%), a \$4.8 million, or 14%, increase in other expense (excluding the impact of Significant Items, other expenses increased \$3.7 million, or 11%, primarily reflecting higher OREO and loss expense), and a \$3.8 million, or 8%, increase in outside data processing and other services as we continue to invest in technology supporting our products, services, and our Continuous Improvement initiatives.

The tangible common equity to tangible assets ratio was 8.35%, down 65 basis points from a year ago. Our Tier 1 common risk-based capital ratio was 10.31%, down 54 basis points from a year ago. The regulatory Tier 1 risk-based capital ratio was 11.61%, down 75 basis points from a year ago. All capital ratios were impacted by balance sheet growth and share repurchases that were partially offset by increased retained earnings and the stock issued in the Camco acquisition. The decrease in the regulatory Tier 1 risk-based capital ratio also reflected the redemption of \$50 million of qualifying preferred securities on December 31, 2013.

Business Overview

General

Our general business objectives are: (1) grow net interest income and fee income, (2) increase cross-sell and share-of-wallet across all business segments, (3) improve efficiency ratio, (4) continue to strengthen risk management, including sustained improvement in credit metrics, and (5) maintain strong capital and liquidity positions.

We continued to deliver solid year-over-year revenue growth through the third quarter, while maintaining a disciplined balance sheet. Performance highlights include ongoing strength in commercial and auto lending. We are also pleased with deposit growth, which is in part supported by our improved distribution network, as evidenced by 50 in-store locations attaining break-even or better status during the 2014 third quarter, and also the successful conversion of 24 acquired Michigan branches, furthering our presence in markets in our service area. Furthermore, our decision during the 2014 third quarter to consolidate 26 branches by year-end demonstrates the ongoing optimization of our distribution channels.

7

Table of Contents

Among other key highlights, we also are pleased with our number one ranking in the country for total number of Small Business Administration 7(a) loans for the fiscal year that concluded in September 2014. We continue to prioritize SBA lending as an integral component of our overall business lending strategy and are gratified to attain a top national ranking, particularly since we only make SBA loans within our core six-state footprint.

Economy

Michigan, Ohio, and Indiana, which had the strongest manufacturing growth of our footprint states, also tended to have the strongest overall economic growth as exemplified by the Philadelphia FRB Economic Activity indexes. Housing activity and prices will likely continue on a moderate upward trend in line with long-term historical growth. Home purchase prices have been rising overall in our footprint states. Price gains were especially strong in the first half of 2014 in Michigan, Ohio, and Kentucky. In addition, industrial vacancy rates in our largest footprint Metropolitan Statistical Areas have been at or below the national average reflecting generally healthy industrial real estate markets.

Expectations Fourth Quarter 2014

We continue to be pleased with our healthy lending pipeline and the strength of the economies within our footprint. We are looking forward to a solid finish for 2014, as we remain on track to deliver another year with positive operating leverage. We are not expecting a near-term improvement in the interest rate environment. However, we are committing to delivering positive operating leverage again in 2015 as we will continue to prudently manage expenses in alignment with our revenue growth outlook.

Net interest income is expected to increase slightly in the 2014 fourth quarter. We anticipate an increase in earning assets, as total loans moderately grow and investment securities increase modestly. However, those benefits to net interest income are expected to be partially offset by continued downward pressure on NIM.

Noninterest income, excluding the impact of any net MSR activity, is expected to remain near the current quarter s level.

Noninterest expense, excluding Significant Items, is expected to remain near the 2014 third quarter adjusted level. The 2014 fourth quarter is expected to include approximately \$10 million of Significant Items related to the already announced franchise repositioning activities. We will continue to look for ways to reduce expenses, while not impacting our previously announced growth strategies and our high level of customer service.

Overall, asset quality metrics are expected to remain near current levels, although moderate quarterly volatility also is expected, given the absolute low level of problem assets and credit costs. We anticipate NCOs will remain within or below our long-term normalized range of 35 to 55 basis points.

The effective tax rate for the remainder of 2014 is expected to be in the range of 25% to 28%, primarily reflecting the impacts of tax-exempt income, tax-advantaged investments, general business credits, and the change in accounting for investments in qualified affordable housing projects.

8

DISCUSSION OF RESULTS OF OPERATIONS

This section provides a review of financial performance from a consolidated perspective. It also includes a Significant Items section that summarizes key issues important for a complete understanding of performance trends. Key Unaudited Condensed Consolidated Balance Sheet and Unaudited Condensed Statement of Income trends are discussed. All earnings per share data are reported on a diluted basis. For additional insight on financial performance, please read this section in conjunction with the Business Segment Discussion.

Table of Contents

- (1) Comparisons for presented periods are impacted by a number of factors. Refer to the Significant Items for additional discussion regarding these key factors.
- (2) Net income excluding expense for amortization of intangibles for the period divided by average tangible common shareholders equity. Average tangible common shareholders equity equals average total common shareholders equity less average intangible assets and goodwill. Expense for amortization of intangibles and average intangible assets are net of deferred tax liability, and calculated assuming a 35% tax rate.
- On a fully-taxable equivalent (FTE) basis assuming a 35% tax rate.
- (4) Noninterest expense less amortization of intangibles and goodwill impairment divided by the sum of FTE net interest income and noninterest income excluding securities gains.

N.R. Not relevant, as denominator of calculation is a loss in prior period compared with income in current period.

⁽¹⁾ Comparisons for presented periods are impacted by a number of factors. Refer to the Significant Items for additional discussion regarding these key factors.

On a fully taxable equivalent (FTE) basis assuming a 35% tax rate.

Significant Items

Definition of Significant Items

From time-to-time, revenue, expenses, or taxes are impacted by items judged by us to be outside of ordinary banking activities and / or by items that, while they may be associated with ordinary banking activities, are so unusually large that their outsized impact is believed by us at that time to be infrequent or short-term in nature. We refer to such items as Significant Items. Most often, these Significant Items result from factors originating outside the company; e.g., regulatory actions / assessments, windfall gains, changes in accounting principles, one-time tax assessments / refunds, litigation actions, etc. In other cases, they may result from our decisions associated with significant corporate actions outside of the ordinary course of business; e.g., merger / restructuring charges, recapitalization actions, goodwill impairment, etc.

Even though certain revenue and expense items are naturally subject to more volatility than others due to changes in market and economic environment conditions, as a general rule volatility alone does not define a Significant Item. For example, changes in the provision for credit losses, gains / losses from investment activities, asset valuation writedowns, etc., reflect ordinary banking activities and are, therefore, typically excluded from consideration as a Significant Item.

We believe the disclosure of Significant Items provides a better understanding of our performance and trends to ascertain which of such items, if any, to include or exclude from an analysis of our performance; i.e., within the context of determining how that performance differed from expectations, as well as how, if at all, to adjust estimates of future performance accordingly. To this end, we adopted a practice of listing Significant Items in our external disclosure documents; e.g., earnings press releases, investor presentations, Forms 10-Q and 10-K.

Significant Items for any particular period are not intended to be a complete list of items that may materially impact current or future period performance.

Significant Items Influencing Financial Performance Comparisons

Earnings comparisons were impacted by the Significant Items summarized below:

1. **Franchise Repositioning Related Expense.** Significant events relating to franchise repositioning related expense, and the impacts of those events on our reported results, were as follows:

During the 2014 third quarter, \$19.3 million of franchise repositioning related expense was recorded for the consolidation of 26 branches and organizational actions. This resulted in a negative impact of \$0.02 per common share.

During the 2013 third quarter, \$16.6 million of franchise repositioning related expense was recorded. This resulted in a negative impact of \$0.01 per common share.

2. **Merger and Acquisition.** Significant events relating to mergers and acquisitions, and the impacts of those events on our reported results, were as follows:

During the 2014 third quarter, \$3.5 million of net noninterest expense was recorded related to the acquisition of 24 Bank of America branches and Camco Financial.

During the 2014 second quarter, \$0.8 million of merger related costs were recorded related to the acquisition of Bank of America branches.

During the 2014 first quarter, \$11.8 million of net noninterest expense was recorded related to the acquisition of Camco Financial. This resulted in a negative impact of \$0.01 per common share.

- 3. **Litigation Reserve.** During the 2014 first quarter, \$9.0 million of additions to litigation reserves were recorded as other noninterest expense. This resulted in a negative impact of \$0.01 per common share.
- 4. **Pension Curtailment Gain.** During the 2013 third quarter, a \$33.9 million pension curtailment gain was recorded in personnel costs. This resulted in a positive impact of \$0.03 per common share.

12

The following table reflects the earnings impact of the above-mentioned Significant Items for periods affected by this Results of Operations discussion:

⁽¹⁾ FTE yields are calculated assuming a 35% tax rate.

⁽²⁾ Loan and lease and deposit average rates include impact of applicable derivatives, non-deferrable fees, and amortized deferred fees.

⁽³⁾ For purposes of this analysis, NALs are reflected in the average balances of loans.

2014 Third Quarter versus 2013 Third Quarter

Fully-taxable equivalent net interest income increased \$42.4 million, or 10%, from the 2013 third quarter. This reflected the benefit from the \$4.1 billion, or 10%, of average loan growth and a \$3.3 billion, or 38%, increase in average securities. This was partially offset by the 14 basis point decrease in the FTE net interest margin to 3.20%. The NIM contraction reflected a 20 basis point decrease related to the mix and yield of earning assets and 3 basis point reduction in benefit from the impact of noninterest-bearing funds, partially offset by the 9 basis point reduction in funding costs.

Average earning assets increased \$7.5 billion, or 15%, from the year-ago quarter, driven by:

- \$3.3 billion, or 38%, increase in average securities, reflecting \$2.7 billion of Liquidity Coverage Ratio (LCR) Level 1 qualified securities and \$1.2 billion of direct purchase municipal instruments, which in the year-ago quarter were classified as C&I loans.
- \$1.9 billion, or 32%, increase in average Automobile loans, as originations remained strong and we continued to portfolio all of the production.
- \$1.5 billion, or 9%, increase in average C&I loans and leases, reflecting growth in trade finance in support of our middle market and corporate customers, business banking, and automobile dealer floorplan lending.
- \$0.5 billion, or 9%, increase in average Residential mortgage loans as a result of a decrease in the rate of payoffs due to lower levels of refinancing and the Camco acquisition.

Average total core deposits increased \$2.3 billion, or 5%, from the year-ago quarter, including a \$1.0 billion, or 8%, increase in noninterest bearing deposits. Average interest-bearing liabilities increased \$6.2 billion, or 17%, from the year-ago quarter, reflecting:

- \$4.1 billion, or 138%, increase in short- and long-term borrowings, which were used to efficiently finance balance sheet growth while continuing to manage the overall cost of funds. While no additional long-term debt was issued in the 2014 third quarter, this increase included \$2.1 billion of bank-level debt and \$0.4 billion of parent-level debt issued during the prior four quarters.
- \$2.2 billion, or 14%, increase in money market deposits, reflecting the strategic focus on customer growth and increased share-of-wallet among both consumer and commercial customers.
- \$0.7 billion, or 46%, increase in brokered deposits and negotiated CDs, which are a cost-effective method of funding incremental LCR-related securities growth.

 Partially offset by:

\$1.0 billion, or 24%, decrease in average core certificates of deposit due to the strategic focus on changing the funding sources to no-cost demand deposits and lower- cost money market deposits.

2014 Third Quarter versus 2014 Second Quarter

Compared to the 2014 second quarter, FTE net interest income increased \$7.2 million, or 6% annualized. While the NIM decreased 8 basis points, earning assets increased \$1.6 billion, or 11% annualized. During the 2014 second quarter, net interest income and the NIM benefitted by \$5.1 million and 4 basis points, respectively, from the unexpected pay-off of an acquired commercial real estate loan.

Net interest margin					3.25%	3.38%

⁽¹⁾ FTE yields are calculated assuming a 35% tax rate.

Loan, lease, and deposit average rates include the impact of applicable derivatives, non-deferrable fees, and amortized deferred fees.

⁽³⁾ For purposes of this analysis, nonaccrual loans are reflected in the average balances of loans.

2014 First Nine Months versus 2013 First Nine Months

Fully-taxable equivalent net interest income for the first nine-month period of 2014 increased \$90.8 million, or 7% reflecting the benefit of a \$5.8 billion, or 11%, increase in average total earning assets. The fully-taxable equivalent net interest margin decreased to 3.25% from 3.38%. The increase in average earning assets reflected:

\$3.5 billion, or 8%, increase in average total loans and leases.

\$2.6 billion, or 29%, increase in securities that meet the requirement for HQLA as proposed in the LCR rules issued by the regulators in October 2013.

Partially offset by:

\$0.3 billion, or 48%, decrease in loans held for sale.

The \$3.5 billion, or 8%, increase in average total loans and leases reflected:

\$2.0 billion, or 37%, increase in the average automobile portfolio as originations remained strong and we continued to portfolio all of the production. Investments in our automobile lending business throughout the Northeast and upper Midwest continue to grow as planned.

\$1.2 billion, or 7%, increase in the average C&I portfolio, primarily reflecting growth in the international and other specialty lending verticals, automobile dealer floorplan lending, and business banking.

The \$2.2 billion, or 5%, increase in average total deposits reflected:

\$2.5 billion, or 16%, increase in money market deposits, reflecting the strategic focus on customer growth and increased share-of-wallet among both consumer and commercial customers.

\$0.9 billion, or 5%, increase in total demand deposits, reflecting our focus on changing our product mix to reduce the overall cost of deposits.

Partially offset by:

\$1.4 billion, or 29%, decline in core certificates of deposit due to the strategic focus on changing the funding sources to no-cost demand deposits and lower cost money market deposits.

In addition, FHLB advances increased \$1.3 billion, or 200%, along with an increase in short- and long-term borrowings of \$1.9 billion, or 89%, which were used to efficiently finance balance sheet growth while continuing to manage the overall cost of funds. Included in the increase are \$2.1 billion of bank-level debt and \$0.4 billion of parent-level debt.

Provision for Credit Losses

(This section should be read in conjunction with the Credit Risk section.)

The provision for credit losses is the expense necessary to maintain the ALLL and the AULC at levels appropriate to absorb our estimate of credit losses in the loan and lease portfolio and the portfolio of unfunded loan commitments and letters-of-credit.

The provision for credit losses for the 2014 third quarter was \$24.5 million and was \$5.5 million less than total NCOs for the same period reflecting continued credit quality improvement. Provision expense increased \$13.1 million, or 115%, compared to the year-ago quarter, reflecting the prior year s implementation of enhancements to our allowance for loan and lease losses (ALLL) model and decreased \$4.9 million, or 17%, from the prior quarter. On a year-to-date basis, provision for credit losses for the first nine-month period of 2014 increased \$12.8 million, or 19%, compared to year-ago period. The provision for credit losses for the first nine-month period of 2014 was \$23.2 million less than total NCOs. (See Credit Quality discussion). Given the low level of the provision for credit losses and the uncertain and uneven nature of the economic recovery, some degree of volatility on a quarter-to-quarter basis is expected.

Noninterest Income

The following table reflects noninterest income for each of the past five quarters:

Table 7 Noninterest Income

		2014		20	13	3Q14 vs	3Q13	3Q14 vs	2Q14
(dollar amounts in thousands)	Third	Second	First	Fourth	Third	Amount	Percent	Amount	Percent

Total noninterest income	\$ 247,349	\$ 250,067	\$ 248,485	\$ 249,892	\$ 253,767	\$ (6,418)	(3)%	\$ (2,718)	(1)%

2014 Third Quarter versus 2013 Third Quarter

Noninterest income decreased \$6.4 million, or 3%, from the year-ago quarter, primarily reflecting:

\$6.4 million, or 17%, decrease in other income, primarily related to commercial loan fees and early lease terminations.

\$3.8 million, or 5%, decrease in service charges on deposit accounts, reflecting the late July 2014 implementation of changes in consumer products that were partially offset by an 11% increase in consumer households and changing customer usage patterns.

\$2.6 million, or 20%, decrease in capital markets fees related to lower interest rate derivative sales. Partially offset by:

\$3.1 million, or 62%, increase in gain on sale of loans related to strong SBA production and relatively higher premiums.

\$3.0 million, or 12%, increase in electronic banking due to higher card related income and underlying customer growth.

2014 Third Quarter versus 2014 Second Quarter

In the 2014 third quarter, noninterest income decreased \$2.7 million, or 1%, from the 2014 second quarter, primarily reflecting:

\$5.5 million, or 15%, decrease in other income, reflecting a mezzanine lending gain in the 2014 second quarter.

\$3.5 million, or 5%, decrease in service charges on deposit accounts, reflecting a seasonal increase during the 2014 second quarter and the late July 2014 implementation of changes in consumer products.

Partially offset by:

\$4.3 million, or 109%, increase in gain on sale of loans from SBA and other loan sales.

\$2.3 million, or 10%, increase in mortgage banking income, reflecting a \$1.3 million, or 9%, increase in origination and secondary marketing income and a positive net impact of MSR hedging.

19

2014 First Nine Months versus 2013 First Nine Months

Noninterest income for the first nine-month period of 2014 decreased \$16.4 million, or 2%, from the comparable year-ago period.

Table 8 Noninterest Income 2014 First Nine Months vs. 2013 First Nine Months

	Nine Months Ended September 30,			Change		
(dollar amounts in thousands)		2014		2013	Amount	Percent
Service charges on deposit accounts	\$	206,333	\$	201,810	\$ 4,523	2%
Mortgage banking income		70,857		102,528	(31,671)	(31)
Trust services		87,191		92,296	(5,105)	(6)
Electronic banking		77,408		68,340	9,068	13
Insurance income		49,221		53,708	(4,487)	(8)
Brokerage income		52,227		54,473	(2,246)	(4)
Bank owned life insurance income		42,060		42,603	(543)	(1)
Capital markets fees		29,940		32,888	(2,948)	(9)
Gain on sale of loans		15,683		11,027	4,656	42
Securities gains (losses)		17,658		(821)	18,479	N.R.
Other income		97,323		103,452	(6,129)	(6)
		•				ì
Total noninterest income	\$	745,901	\$	762,304	\$ (16,403)	(2)%

N.R. - Not relevant, as denominator of calculation is a loss in prior period compared with gain in current period.

The \$16.4 million, or 2%, decrease in total noninterest income reflected:

\$31.7 million, or 31%, decrease in mortgage banking income. This primarily reflected a \$26.5 million, or 37%, decrease in origination and secondary marketing income as originations decreased 26%, gain-on-sale margin compressed, and the percentage of originations held on the balance sheet was higher.

\$6.1 million, or 6%, decrease in other income, primarily due to a gain on the sale of LIHTC investments in the 2013 first quarter.

\$5.1 million, or 6%, decrease in trust services, primarily related to the institutional trust business. Partially offset by:

\$18.5 million increase in securities gains, as we adjusted the mix of our securities portfolio to prepare for the LCR requirements.

\$9.1 million, or 13%, increase in electronic banking income, primarily due to continued consumer household growth.

20

Noninterest Expense

(This section should be read in conjunction with Significant Item 1, 2, 3 and 4.)

The following table reflects noninterest expense for each of the past five quarters:

2014 Third Quarter versus 2013 Third Quarter

Reported noninterest expense increased \$57.0 million, or 13%, from the year-ago quarter, reflecting:

\$46.1 million, or 20%, increase in personnel costs. Excluding the impact of Significant Items, personnel costs increased \$3.4 million, or 1%, related to annual compensation increases.

\$4.8 million, or 14%, increase in other expense. Excluding the impact of Significant Items, other expenses increased \$3.7 million, or 11%, primarily reflecting higher OREO and litigation expense.

\$3.8 million, or 8%, increase in outside data processing and other services as we continue to invest in technology supporting our products, services, and our Continuous Improvement initiatives.

2014 Third Quarter versus 2014 Second Quarter

Noninterest expense increased \$21.7 million, or 5%, from the 2014 second quarter. When adjusting for the \$22.8 million of Significant Items in the 2014 third quarter, noninterest expense decreased \$0.4 million. Personnel costs increased \$14.8 million, or 6%, reflecting the franchise repositioning actions. Other expense increased \$6.0 million, or 18%, reflecting higher OREO and litigation and settlement expense. Net occupancy expense increased \$5.7 million, or 20%, primarily related to \$5.2 million of franchise repositioning actions. Partially offsetting these increases was a \$4.1 million, or 23%, decrease in professional services primarily related to reduced consulting expense.

2014 First Nine Months versus 2013 First Nine Months

Noninterest expense for the first nine-month period of 2014 increased \$87.1 million, or 7%, from the comparable year-ago period.

Table 10 Noninterest Expense 2014 First Nine Months vs. 2013 First Nine Months

	Nine Months Ended September 3				Change		
(dollar amounts in thousands)		2014		2013	Amount	Percent

Other expense	112,446	102,406	10,040	10	
•					
Total noninterest expense adjustments	\$ 1,353,874	\$ 1,329,368	\$ 24,506	2%	

The \$87.1 million, or 7%, increase in total noninterest expense reflected:

\$33.4 million, or 4%, increase in personnel costs. Excluding the impact of significant items, personnel expense decreased \$11.6 million, or 1%, primarily related to a reduction in benefit costs, partially offset by an increase in technology salary expense.

\$21.5 million, or 21%, increase in other expense. Excluding the impact of significant items, other expense increased \$10.0 million, or 10%, primarily related to an increase in franchise taxes, protective advances, and litigation expense.

\$14.9 million, or 51%, increase in professional services, of which \$9.0 million is consulting expenses related to strategic planning.

\$10.4 million, or 7%, increase in outside data processing and other services, reflecting higher debit and credit card processing costs and other technology expenses.

\$9.7 million, or 12%, increase in equipment, primarily due to technology investments and the near-complete rollout of enhanced ATMs.

Provision for Income Taxes

The provision for income taxes in the 2014 third quarter was \$53.9 million and \$65.0 million in the 2013 third quarter. The provision for income taxes for the nine month periods ended September 30, 2014 and September 30, 2013 was \$163.4 million and \$175.4 million, respectively. Both quarters included the benefits from tax-exempt income, tax-advantaged investments, general business credits, and the change in accounting for investments in qualified affordable housing projects. At September 30, 2014, we had a net federal deferred tax asset of \$70.9 million and a net state deferred tax asset of \$48.0 million. For regulatory capital purposes, there was no disallowed net deferred tax asset at September 30, 2014.

We file income tax returns with the IRS and various state, city, and foreign jurisdictions. Federal income tax audits have been completed for tax years through 2009. In the first quarter of 2013, the IRS began an examination of our 2010 and 2011 consolidated federal income tax returns. We have appealed certain proposed adjustments resulting from the IRS examination of our 2006, 2007, 2008, 2009, and 2010 tax returns. We believe the tax positions taken related to such proposed adjustments are correct and supported by applicable statutes, regulations, and judicial authority, and intend to vigorously defend them. It is possible the ultimate resolution of the proposed adjustments, if unfavorable, may be material to the results of operations in the period it occurs. Nevertheless, although no assurances can be given, we believe the resolution of these examinations will not, individually or in the aggregate, have a material adverse impact on our consolidated financial position. Various state and other jurisdictions remain open to examination, including Ohio, Kentucky, Indiana, Michigan, Pennsylvania, West Virginia, and Illinois.

RISK MANAGEMENT AND CAPITAL

Risk awareness, identification and assessment, reporting, and active management are key elements in overall risk management. We manage risk to an aggregate moderate-to-low risk profile through a control framework and by monitoring and responding to identified potential risks. Controls include, among others, effective segregation of duties, access, authorization and reconciliation procedures, as well as staff education and a disciplined assessment process.

We identify primary risks, and the sources of those risks, within each business unit. We utilize Risk and Control Self-Assessments (RCSA) to identify exposure risks. Through this RCSA process, we continually assess the effectiveness of controls associated with the identified risks, regularly monitor risk profiles and material exposure to losses, and identify stress events and scenarios to which we may be exposed. Our chief risk officer is responsible for ensuring that appropriate systems of controls are in place for managing and monitoring risk across the Company. Potential risk concerns are shared with the Risk Management Committee, Risk Oversight Committee, and the board of directors, as appropriate. Our internal audit department performs on-going independent reviews of the risk management process and ensures the adequacy of documentation. The results of these reviews are regularly reported to the audit committee and board of directors.

We believe that our primary risk exposures are credit, market, liquidity, operational, and compliance oriented. More information on risk can be found in the Risk Factors section included in Item 1A of our 2013 Form 10-K and subsequent filings with the SEC. The MD&A included in our Form 8-K filed on May 28, 2014 should be read in conjunction with this MD&A as this discussion provides only material updates to the Form 8-K. This MD&A should also be read in conjunction with the financial statements, notes and other information contained in this report. Our definition, philosophy, and approach to risk management have not materially changed from the discussion presented in this report.

Credit Risk

Credit risk is the risk of financial loss if a counterparty is not able to meet the agreed upon terms of the financial obligation. The majority of our credit risk is associated with lending activities, as the acceptance and management of credit risk is central to profitable lending. We also have significant credit risk associated with our AFS and HTM securities portfolios (see Note 4 and Note 5 of the Notes to the Unaudited Condensed Consolidated Financial Statements). We engage with other financial counterparties for a variety of purposes including investing, asset and liability management, mortgage banking, and trading activities. While there is credit risk associated with derivative activity, we believe this exposure is minimal.

We continue to focus on the identification, monitoring, and managing of our credit risk. In addition to the traditional credit risk mitigation strategies of credit policies and processes, market risk management activities, and portfolio diversification, we use additional quantitative measurement capabilities utilizing external data sources, enhanced use of modeling technology, and internal stress testing processes. Our portfolio management resources demonstrate our commitment to maintaining an aggregate moderate-to-low risk profile. In our efforts to continue to identify risk mitigation techniques, we have focused on product design features, origination policies, and treatment strategies for delinquent or stressed borrowers.

Loan and Lease Credit Exposure Mix

At September 30, 2014, loans and leases totaled \$46.7 billion, representing a \$3.6 billion, or 8%, increase compared to \$43.1 billion at December 31, 2013, primarily reflecting growth in the automobile and C&I portfolios. The growth included \$559 million in loans from our acquisition of Camco Financial during the 2014 first quarter. The Camco Financial portfolio composition was centered in CRE, home equity, and residential mortgage.

At September 30, 2014, commercial loans and leases totaled \$23.8 billion and represented 51% of our total loans and leases. The increase compared to December 31, 2013 primarily reflects growth in the international and other specialty lending verticals, automobile dealer floorplan lending, and business banking. Our commercial portfolio is diversified along product type, customer size, and geography across our footprint, and is comprised of the following loan types (*see Commercial Credit discussion*).

24

C&I loans and leases are made to commercial customers for use in normal business operations to finance working capital needs, equipment purchases, or other projects. The majority of these borrowers are customers doing business within our geographic regions. C&I loans and leases are generally underwritten individually and secured with the assets of the company and/or the personal guarantee of the business owners. The financing of owner occupied facilities is considered a C&I loan even though there is improved real estate as collateral. This treatment is a result of the credit decision process, which focuses on cash flow from operations of the business to repay the debt. The operation, sale, rental, or refinancing of the real estate is not considered the primary repayment source for these types of loans. As we have expanded our C&I portfolio, we have developed a series of vertical specialties to ensure that new products or lending types are embedded within a structured, centralized Commercial Lending area with designated experienced credit officers. These specialties comprise of either targeted industries (for example, Healthcare, Food & Agribusiness, Energy, etc) and/or lending disciplines (Rail, Aircraft, ABL, etc), all of which requires a high degree of expertise and oversight to effectively mitigate and monitor risk. As such, we have dedicated colleagues and teams focused on bringing value added expertise to these specialty clients.

CRE CRE loans consist of loans to developers and REITs supporting income-producing or for-sale commercial real estate properties. We mitigate our risk on these loans by requiring collateral values that exceed the loan amount and underwriting the loan with projected cash flow in excess of the debt service requirement. These loans are made to finance properties such as apartment buildings, office and industrial buildings, and retail shopping centers, and are repaid through cash flows related to the operation, sale, or refinance of the property.

Construction CRE Construction CRE loans are loans to developers, companies, or individuals used for the construction of a commercial or residential property for which repayment will be generated by the sale or permanent financing of the property. Our construction CRE portfolio primarily consists of retail, multi family, office, and warehouse project types. Generally, these loans are for construction projects that have been presold or preleased, or have secured permanent financing, as well as loans to real estate companies with significant equity invested in each project. These loans are underwritten and managed by a specialized real estate lending group that actively monitors the construction phase and manages the loan disbursements according to the predetermined construction schedule.

Total consumer loans and leases were \$22.9 billion at September 30, 2014, and represented 49% of our total loan and leases. The consumer portfolio is comprised primarily of automobile, home equity loans and lines-of-credit, and residential mortgages (see Consumer Credit discussion). The increase from December 31, 2013 primarily relates to strong consumer demand for automobile originations and adjustable rate residential mortgages (ARMs). ARMs primarily consist of a fixed-rate of interest for the first 3 to 5 years, and then adjust annually.

Automobile Automobile loans are comprised primarily of loans made through automotive dealerships and include exposure in selected states outside of our primary banking markets. The exposure outside of our primary banking markets represents 20% of the total exposure, with no individual state representing more than 6%. Applications are underwritten utilizing an automated underwriting system that applies consistent policies and processes across the portfolio.

Home equity Home equity lending includes both home equity loans and lines-of-credit. This type of lending, which is secured by a first-lien or junior-lien on the borrower's residence, allows customers to borrow against the equity in their home or refinance existing mortgage debt. Products include closed-end loans which are generally fixed-rate with principal and interest payments, and variable-rate, interest-only lines-of-credit which do not require payment of principal during the 10-year revolving period. The home equity line of credit may convert to a 20-year amortizing structure at the end of the revolving period. Applications are underwritten centrally in conjunction with an automated underwriting system. The home equity underwriting criteria is based on minimum credit scores, debt-to-income ratios, and LTV ratios, with current collateral valuations.

Residential mortgage Residential mortgage loans represent loans to consumers for the purchase or refinance of a residence. These loans are generally financed over a 15-year to 30-year term, and in most cases, are extended to borrowers to finance their primary residence. Applications are underwritten centrally using consistent credit policies and processes. All residential mortgage loan decisions utilize a full appraisal for collateral valuation. Huntington has not originated or acquired residential mortgages that allow negative amortization or allow the borrower multiple payment options.

Other consumer Primarily consists of consumer loans not secured by real estate, including personal unsecured loans, overdraft balances, and credit cards. We introduced a consumer credit card product during 2013, utilizing a centralized underwriting system and focusing on existing Huntington customers.

The table below provides the composition of our total loan and lease portfolio:

Table 11 Loan and Lease Portfolio Composition

As shown in the table above, our loan portfolio is diversified by consumer and commercial credit. At the corporate level, we manage the credit exposure in part via a credit concentration policy. The policy designates specific loan types, collateral types, and loan structures to be formally tracked and assigned limits as a percentage of capital. C&I lending by NAICS categories, specific limits for CRE primary project types, loans secured by residential real estate, shared national credit exposure, and designated high risk loan definitions represent examples of specifically tracked components of our concentration management process. Currently there are no identified concentrations that exceed the established limit. Our concentration management process is approved by our board level Risk Oversight Committee and is one of the strategies utilized to ensure a high quality, well diversified portfolio that is consistent with our overall objective of maintaining an aggregate moderate-to-low risk profile.

The table below provides our total loan and lease portfolio segregated by the type of collateral securing the loan or lease: The changes in the collateral composition are consistent with the portfolio growth metrics, with increases noted in the residential and vehicle categories. The increase in the unsecured exposure is centered in high quality commercial credit customers.

Table of Contents

Commercial Credit

Refer to the Commercial Credit section of our Form 8-K filed on May 28, 2014 for our commercial credit underwriting and on-going credit management processes.

C&I PORTFOLIO

The C&I portfolio continues to have strong origination activity as evidenced by the growth over the past 12 months. The credit quality of the portfolio remains strong as we maintain a focus on high quality originations. Problem loans have trended downward, reflecting a combination of proactive risk identification and effective workout strategies implemented by the SAD. We continue to maintain a proactive approach to identifying borrowers that may be facing financial difficulty in order to maximize the potential solutions.

CRE PORTFOLIO

We manage the risks inherent in this portfolio specific to CRE lending, focusing on the quality of the developer and the specifics associated with each project. Generally, we: (1) limit our loans to 80% of the appraised value of the commercial real estate at origination, (2) require net operating cash flows to be 125% of required interest and principal payments, and (3) if the commercial real estate is nonowner occupied, require that at least 50% of the space of the project be preleased. We actively monitor both geographic and project-type concentrations and performance metrics of all CRE loan types, with a focus on loans identified as higher risk based on the risk rating methodology. Both macro-level and loan-level stress-test scenarios based on existing and forecast market conditions are part of the on-going portfolio management process for the CRE portfolio.

Dedicated real estate professionals originate and manage the majority of the portfolio, with the remainder sourced from prior bank acquisitions. The portfolio is diversified by project type and loan size, and this diversification represents a significant portion of the credit risk management strategies employed for this portfolio. Subsequent to the origination of the loan, the Credit Review group provides an independent review and assessment of the quality of the underwriting and/or risk of new loan originations.

Appraisal values are obtained in conjunction with all originations and renewals, and on an as needed basis, in compliance with regulatory requirements. Appraisals are obtained from approved vendors, and are reviewed by an internal appraisal review group comprised of certified appraisers to ensure the quality of the valuation used in the underwriting process. We continue to perform on-going portfolio level reviews within the CRE portfolio. These reviews generate action plans based on occupancy levels or sales volume associated with the projects being reviewed. Property values are updated using appraisals on a regular basis to ensure appropriate decisions regarding the on-going management of the portfolio reflect the changing market conditions. This highly individualized process requires working closely with all of our borrowers, as well as an in-depth knowledge of CRE project lending and the market environment.

Consumer Credit

Refer to the Consumer Credit section of our Form 8-K filed on May 28, 2014 for our consumer credit underwriting and on-going credit management processes.

AUTOMOBILE PORTFOLIO

Our strategy in the automobile portfolio continues to focus on high quality borrowers as measured by both FICO and internal custom scores, combined with appropriate LTVs, terms, and profitability. Our strategy and operational capabilities allow us to appropriately manage the origination quality across the entire portfolio, including our newer markets. Although increased origination volume and entering new markets can be associated with increased risk levels, we believe our disciplined strategy and operational processes significantly mitigate these risks.

We have continued to consistently execute our value proposition and take advantage of available market opportunities. Importantly, we have maintained our high credit quality standards while expanding the portfolio.

RESIDENTIAL REAL ESTATE SECURED PORTFOLIOS

The properties securing our residential mortgage and home equity portfolios are primarily located within our geographic footprint. Huntington continues to support our local markets with consistent underwriting across all residential secured products. The residential-secured portfolio originations continue to be of high quality, with the majority of the negative credit impact coming from loans originated in 2006 and earlier. Our portfolio management strategies associated with our Home Savers group allow us to focus on effectively helping our customers with appropriate solutions for their specific circumstances.

Table 13 Selected Home Equity and Residential Mortgage Portfolio Data

(dollar amounts in millions)

		Home E		Residential Mortgage		
	Secured by	first-lien	Secured by j	unior-lien

Origination weighted average LTV ratio ⁽¹⁾	74%	67%	83%	81%	84%	78%
Origination weighted average FICO score ⁽²⁾	756	775	746	755	754	758

- (1) The LTV ratios for home equity loans and home equity lines-of-credit are cumulative and reflect the balance of any senior loans. LTV ratios reflect collateral values at the time of loan origination.
- (2) Portfolio weighted average FICO scores reflect currently updated customer credit scores whereas origination weighted average FICO scores reflect the customer credit scores at the time of loan origination.
- (3) Represents only owned-portfolio originations.

Home Equity Portfolio

Within the home equity portfolio, the standard product is a 10-year interest-only draw period with a 20-year fully amortizing term at the end of the draw period. Prior to 2007, the standard product was a 10-year draw period with a balloon payment. In either case, after the 10-year draw period, the borrower must reapply to continue with the interest only revolving structure or begin repaying the debt in a term structure.

The principal and interest payment associated with the term structure will be higher than the interest-only payment, resulting in maturity risk. Our maturity risk can be segregated into two distinct segments: (1) home equity lines-of-credit underwritten with a balloon payment at maturity and (2) home equity lines-of-credit with an automatic conversion to a 20-year amortizing loan. We manage this risk based on both the actual maturity date of the line-of-credit structure and at the end of the 10-year draw period. This maturity risk is embedded in the portfolio which we address with proactive contact strategies beginning one year prior to maturity. In certain circumstances, our Home Saver group is able to provide payment and structure relief to borrowers experiencing significant financial hardship associated with the payment adjustment. Our existing HELOC maturity strategy is consistent with the recent regulatory guidance.

The table below summarizes our home equity line-of-credit portfolio by maturity date:

Table 14 Maturity Schedule of Home Equity Line-of-Credit Portfolio

	September 30, 2014									
								M	ore than	
(dollar amounts in millions)	1 year or less	1 to 2	2 years	2 to	3 years	3 to 4	years	2	4 years	Total
Secured by first-lien	\$ 44	\$	3	\$	2	\$	2	\$	2,741	\$ 2,792
Secured by junior-lien	236		118		129		25		2,487	2,995
Total home equity line-of-credit	\$ 280	\$	121	\$	131	\$	27	\$	5,228	\$ 5,787

The amounts in the above table maturing in four years or less primarily consist of balloon payment structures and represent the most significant maturity risk. The amounts maturing in more than four years primarily consist of exposure with a 20-year amortization period after the 10-year draw period.

Historically, less than 30% of our home equity lines-of-credit that are one year or less from maturity actually reach the maturity date.

Residential Mortgages Portfolio

Huntington underwrites all applications centrally, with a focus on higher quality borrowers. We do not originate residential mortgages that allow negative amortization or allow the borrower multiple payment options and have incorporated regulatory requirements and guidance into our underwriting process. All residential mortgages are originated based on a completed full appraisal during the credit underwriting process. We update values in compliance with applicable regulations to facilitate our portfolio management, as well as our workout and loss mitigation functions.

Several government programs continued to impact the residential mortgage portfolio, including various refinance programs such as HARP and HAMP, which positively affected the availability of credit for the industry. During the nine-month period ended September 30, 2014, we closed \$209 million in HARP residential mortgages and \$1.7 million in HAMP residential mortgages. The HARP and HAMP residential mortgage loans are part of our residential mortgage portfolio or serviced for others.

We are subject to repurchase risk associated with residential mortgage loans sold in the secondary market. An appropriate level of reserve for representations and warranties related to residential mortgage loans sold has been established to address this repurchase risk inherent in the portfolio (see Operational Risk discussion).

Credit Quality

(This section should be read in conjunction with Note 3 of the Notes to Unaudited Condensed Consolidated Financial Statements.)

We believe the most meaningful way to assess overall credit quality performance is through an analysis of credit quality performance ratios. This approach forms the basis of most of the discussion in the sections immediately following: NPAs and NALs, TDRs, ACL, and NCOs. In addition, we utilize delinquency rates, risk distribution and migration patterns, and product segmentation in the analysis of our credit quality performance.

Credit quality performance in the 2014 third quarter reflected continued overall improvement. Total NPA s were \$364.5 million at September 30, 2014. While the overall level was essentially flat with prior quarter, the C&I portfolio showed an increase, with offsetting declines in CRE and residential. NCOs increased by \$1.4 million or 5% from the prior quarter, as a result of increases in other consumer and residential portfolios, partially offset by recoveries in the CRE portfolio. Total criticized loans continued to decline, across both the commercial and consumer segments. The ACL to total loans ratio declined by 3 basis points to 1.47%, and our coverage ratios as demonstrated by the ACL to NAL ratio of 211% also remained strong.

NPAs, NALs, AND TDRs

(This section should be read in conjunction with Note 3 of the Notes to Unaudited Condensed Consolidated Financial Statements.)

NPAs and NALs

NPAs consist of (1) NALs, which represent loans and leases no longer accruing interest, (2) impaired loans held for sale, (3) OREO properties, and (4) other NPAs. Any loan in our portfolio may be placed on nonaccrual status prior to the policies described below when collection of principal or interest is in doubt. Also, when a borrower with discharged non-reaffirmed debt in a Chapter 7 bankruptcy is identified and the loan is determined to be collateral dependent, the loan is placed on nonaccrual status.

29

C&I and CRE loans are placed on nonaccrual status at 90-days past due, or earlier if repayment of principal and interest is in doubt.

Of the \$150.1 million of CRE and C&I-related NALs at September 30, 2014, \$84.1 million, or 56%, represented loans that were less than 30-days past due, demonstrating our continued commitment to proactive credit risk management. With the exception of residential mortgage loans guaranteed by government organizations which continue to accrue interest, first-lien loans secured by residential mortgage collateral are placed on nonaccrual status at 150-days past due. Junior-lien home equity loans are placed on nonaccrual status at the earlier of 120-days past due or when the related first-lien loan has been identified as nonaccrual. Automobile and other consumer loans are generally charged-off prior to the loan reaching 120-days past due.

When loans are placed on nonaccrual, accrued interest income is reversed with current year accruals charged to earnings and prior year amounts generally charged-off as a credit loss. When, in our judgment, the borrower s ability to make required interest and principal payments has resumed and collectability is no longer in doubt, the loan or lease could be returned to accrual status.

The following table reflects period-end NALs and NPAs detail for each of the last five quarters:

Table 15 Nonaccrual Loans and Leases and Nonperforming Assets

		2014		2013			
(dollar amounts in thousands)	September 30,	June 30,	March 31,	December 31,	September 30,

			•				
Nonaccrual loans as a % of total loans and leases	0.70%	0.71%	0.74%	0.75%	0.78%		
Nonperforming assets ratio ⁽²⁾	0.78	0.79	0.82	0.82	0.88		
(NPA+90days)/(Loan+OREO) ⁽³⁾	1.08	1.08	1.17	1.20	1.29		

⁽¹⁾ Other nonperforming assets includes certain impaired investment securities.

2014 Third Quarter versus 2014 Second Quarter

The \$2.4 million, or 1%, increase in NPAs compared with June 30, 2014, represents the net impact of increases in the commercial portfolio offset by decreases across the consumer portfolios:

⁽²⁾ This ratio is calculated as nonperforming assets divided by the sum of loans and leases, other nonperforming assets, and net other real estate owned.

⁽³⁾ This ratio is calculated as the sum of nonperforming assets and total accruing loans and leases past due 90 days or more divided by the sum of loans and leases and net other real estate owned.

15.0 million, or 20%, increase in C&I NALs, primarily reflecting the impact of a specific credit relationship. Partially offset by:

\$12.5 million, or 11%, decrease in residential mortgage NALs, reflecting resolutions of foreclosures and improved delinquency results.

30

2014 Third Quarter versus 2013 Fourth Quarter

Compared with December 31, 2013, NPAs increased \$12.3 million, or 4%, primarily reflecting:

\$33.7 million, or 59%, increase in C&I NALs, primarily due to two credit relationships.

\$8.6 million, or 31%, increase in net OREO properties primarily related to consumer OREO, reflecting the impact from Camco Financial, and a single CRE property.

Partially offset by:

\$21.4 million, or 18%, decline in residential mortgage NALs, reflecting resolution of foreclosure processes and improved delinquency trends.

\$13.6 million, or 19%, decline in CRE NALs, reflecting both NCO activity and problem credit resolutions, including borrower payments and payoffs partially resulting from successful workout strategies implemented by our SAD group.

TDR Loans

(This section should be read in conjunction with Note 3 of the Notes to Unaudited Condensed Consolidated Financial Statements.)

TDRs are loans to which a financial concession is provided to a borrower experiencing financial difficulties. TDRs can be classified as either accrual or nonaccrual loans. Nonaccrual TDRs are included in NALs whereas accruing TDRs are excluded from NALs, as it is probable that all contractual principal and interest due under the restructured terms will be collected. TDRs primarily reflect our loss mitigation efforts to proactively work with borrowers in financial difficulty.

The table below presents our accruing and nonaccruing TDRs at period-end for each of the past five quarters:

Table 16 Accruing and Nonaccruing Troubled Debt Restructured Loans

31

The decline in the accruing TDRs was associated with payoffs and paydowns in both the CRE and residential portfolios. Our strategy is to structure TDRs in a manner that avoids new concessions subsequent to the initial TDR terms. However, there are times when subsequent modifications are required, such as when the modified loan matures. Often the loans are performing in accordance with the TDR terms, and a new note is originated with similar modified terms. These loans are subjected to the normal underwriting standards and processes for other similar credit extensions, both new and existing. If the loan is not performing in accordance with the existing TDR terms, typically an individualized approach to repayment is established. In accordance with ASC 310-20-35, the refinanced note is evaluated to determine if it is considered a new loan or a continuation of the prior loan. A new loan is considered for removal of the TDR designation. A continuation of the prior note requires the continuation of the TDR designation, and because the refinanced note constitutes a new or amended debt instrument, it is included in our TDR activity table (below) as a new TDR and a restructured TDR removal during the period. The types of concessions granted are consistent with those granted on new TDRs and include interest rate reductions, amortization or maturity date changes beyond what the collateral supports, and principal forgiveness based on the borrower s specific needs at a point in time. Our policy does not limit the number of times a loan may be modified. A loan may be modified multiple times if it is considered to be in the best interest of both the borrower and Huntington.

Commercial loans are not automatically considered to be accruing TDRs upon the granting of a new concession. If the loan is in accruing status and no loss is expected based on the modified terms, the modified TDR remains in accruing status. For loans that are on nonaccrual status before the modification, collection of both principal and interest must not be in doubt, and the borrower must be able to exhibit sufficient cash flows for a six-month period of time to service the debt in order to return to accruing status. This six-month period could extend before or after the restructure date.

TDRs in the home equity and residential mortgage portfolio may continue to increase in the near term as we continue to appropriately manage the portfolio and work with our borrowers. Any granted change in terms or conditions that are not readily available in the market for that borrower, requires the designation as a TDR. There are no provisions for the removal of the TDR designation based on payment activity for consumer loans.

The following table reflects TDR activity for each of the past five quarters:

Table 17 Troubled Debt Restructured Loan Activity

ACL

(This section should be read in conjunction with Note 3 of the Notes to Unaudited Condensed Consolidated Financial Statements.)

Our total credit reserve is comprised of two different components, both of which in our judgment are appropriate to absorb credit losses inherent in our loan and lease portfolio: the ALLL and the AULC. Combined, these reserves comprise the total ACL. Our Credit Administration group is responsible for developing the methodology assumptions and estimates used in the calculation, as well as determining the appropriateness of the

ACL. The ALLL represents the estimate of losses inherent in the loan portfolio at the reported date. Additions to the ALLL result from recording provision expense for loan losses or increased risk levels resulting from loan risk-rating downgrades, while reductions reflect charge-offs (net of recoveries), decreased risk levels resulting from loan risk-rating upgrades, or the sale of loans. The AULC is determined by applying the transaction reserve process to the unfunded portion of the loan exposures adjusted by an applicable funding expectation.

32

We regularly evaluate the appropriateness of the ACL by performing on-going evaluations of the loan and lease portfolio, including such factors as the differing economic risks associated with each loan category, the financial condition of specific borrowers, the level of delinquent loans, the value of any collateral and, where applicable, the existence of any guarantees or other documented support. We evaluate the impact of changes in interest rates and overall economic conditions on the ability of borrowers to meet their financial obligations when quantifying our exposure to credit losses and assessing the appropriateness of our ACL at each reporting date. In addition to general economic conditions and the other factors described above, we also consider the impact of collateral value trends and portfolio diversification. A provision for credit losses is recorded to adjust the ACL to the level we have determined to be appropriate to absorb credit losses inherent in our loan and lease portfolio.

Our ACL evaluation process includes the on-going assessment of credit quality metrics, and a comparison of certain ACL benchmarks to current performance. While the total ACL balance has declined in recent quarters, all of the relevant benchmarks remain strong.

The table below reflects the allocation of our ACL among our various loan categories during each of the past five quarters:

Table 18 Allocation of Allowance for Credit Losses (1)

33

2014 Third Quarter versus 2014 Second Quarter

The \$5.5 million, or 1%, decrease in ACL compared with June 30, 2014, primarily reflected:

\$21.9 million, or 16%, decline in CRE, reflecting continued improving portfolio asset quality metrics and performance.

\$5.6 million, or 5%, decline in home equity directly attributable to the lower delinquency rate and improved portfolio performance metrics.

Partially offset by:

\$12.9 million, or 5%, increase in C&I, reflecting an increased level of loans in the classified risk rating designation and overall portfolio growth.

\$5.5 million, or 12%, increase in residential mortgage, primarily due to increased reserves on TDRs.

\$3.6 million, or 13%, increase in automobile loans based on the portfolio growth.

2014 Third Quarter versus 2013 Fourth Quarter

The \$24.3 million, or 3%, decline in ACL compared with December 31, 2013:

\$47.1 million, or 29%, decline in CRE, reflecting continued improving portfolio asset quality metrics and performance.

\$10.8 million, or 10%, decline in home equity as a result of the lower delinquency rate and improved portfolio performance metrics.

\$7.5 million, or 12%, decline in AULC, reflecting lower risk exposures. Partially offset by:

\$25.6 million, or 10%, increase in C&I, reflecting the risk rating composition and overall growth in the portfolio.

\$13.1 million, or 33%, increase in residential mortgage, primarily due to increased reserves on TDRs.

\$2.6 million, or 7%, increase in other consumer reflecting the increasing credit card portfolio.

The ACL to total loans and leases declined to 1.47% at September 30, 2014, compared to 1.65% at December 31, 2013. Management believes the decline in the ratio is appropriate given the significant continued improvement in the risk profile of our loan portfolio. Further, the continued focus on early identification of loans with changes in credit metrics and proactive action plans for these loans, combined with originating high quality new loans will contribute to continued improvement in our key credit quality metrics.

We have significant exposure to loans secured by residential real estate and continue to be an active lender in our communities. The impact of the downturn in real estate values over the past several years has had a significant impact on some of our borrowers as evidenced by the higher delinquencies and NCOs since late 2007. Real estate values have rebounded from their 2007 levels in our primary markets.

Given the combination of these noted positive and negative factors, we believe that our ACL is appropriate and its coverage level is reflective of the quality of our portfolio and the current operating environment.

NCOs

Any loan in any portfolio may be charged-off prior to the policies described below if a loss confirming event has occurred. Loss confirming events include, but are not limited to, bankruptcy (unsecured), continued delinquency, foreclosure, or receipt of an asset valuation indicating a collateral deficiency and that asset is the sole source of repayment. Additionally, discharged, collateral dependent non-reaffirmed debt in Chapter 7 bankruptcy filings will result in a charge-off to estimated collateral value, less anticipated selling costs at the time of the modification.

C&I and CRE loans are either charged-off or written down to net realizable value at 90-days past due. Automobile loans and other consumer loans are charged-off at 120-days past due. First-lien and junior-lien home equity loans are charged-off to the estimated fair value of the collateral, less anticipated selling costs, at 150-days past due and 120-days past due, respectively. Residential mortgages are charged-off to the estimated fair value of the collateral, less anticipated selling costs, at 150-days past due.

34

The following table reflects NCO detail for each of the last five quarters:

Table 19 Quarterly Net Charge-off Analysis

In assessing NCO trends, it is helpful to understand the process of how commercial loans are treated as they deteriorate over time. The ALLL established is consistent with the level of risk associated with the original underwriting. As a part of our normal portfolio management process for commercial loans, the loan is periodically reviewed and the ALLL is increased or decreased based on the enhanced risk rating. In certain cases, the standard ALLL is determined to not be appropriate, and a specific reserve is established based on the projected cash flow or collateral value of the specific loan. Charge-offs, if necessary, are generally recognized in a period after the specific ALLL was established. If the

previously established ALLL exceeds that necessary to satisfactorily resolve the problem loan, a reduction in the overall level of the ALLL could be recognized. Consumer loans are treated in much the same manner as commercial loans, with increasing reserve factors applied based on the risk characteristics of the loan, although specific reserves are not identified for consumer loans. In summary, if loan quality deteriorates, the typical credit sequence would be periods of reserve building, followed by periods of higher NCOs as the previously established ALLL is utilized. Additionally, an increase in the ALLL either precedes or is in conjunction with increases in NALs. When a loan is classified as NAL, it is evaluated for specific ALLL or charge-off. As a result, an increase in NALs does not necessarily result in an increase in the ALLL or an expectation of higher future NCOs. Our overall NCOs are operating within our long-term target range.

All residential mortgage loans greater than 150-days past due are charged-down to the estimated value of the collateral, less anticipated selling costs. The remaining balance is in delinquent status until a modification can be completed, or the loan goes through the foreclosure process. For the home equity portfolio, virtually all of the defaults represent full charge-offs, as there is no remaining equity, creating a lower delinquency rate but a higher NCO impact.

35

2014 Third Quarter versus 2014 Second Quarter

NCOs increased \$1.4 million from the prior quarter to \$30.0 million, primarily as a result of an increase in C&I, automobile, residential mortgage and other consumer portfolios. This was partially offset by continued improvement in home equity and the impact of recovery activity in the CRE portfolio. NCOs were an annualized 0.26% of average loans and leases in the current quarter, up slightly from 0.25% in the 2014 second quarter, and still below our long-term expectation of 0.35% - 0.55%. Given the low level of C&I and CRE NCO s, there will continue to be some volatility on a quarter-to-quarter comparison basis.

The table below reflects NCO activity for the first nine-month periods ended September 30, 2014 and 2013:

Table 20 Year to Date Net Charge-off Analysis

	Nine Months Ende	
(dollar amounts in thousands)	2014	2013

Net charge-offs as a % of average loans

0.30%

0.46%

2014 First Nine Months versus 2013 First Nine Months

NCOs decreased \$40.6 million in the first nine-month period of 2014 to \$101.7 million, primarily as a result of continued credit quality improvement and the impact of recovery activity in the CRE portfolio. This improvement was partially offset by an increase in C&I primarily relating to large losses associated with a small number of credit relationships.

36

Market Risk

Market risk represents the risk of loss due to changes in market values of assets and liabilities. We incur market risk in the normal course of business through exposures to market interest rates, foreign exchange rates, equity prices, and credit spreads. We have identified two primary sources of market risk: interest rate risk and price risk.

Interest Rate Risk

OVERVIEW

Huntington actively manages interest rate risk, as changes in market interest rates can have a significant impact on reported earnings. The interest rate risk process is designed to compare income simulations in market scenarios designed to alter the direction, magnitude, and speed of interest rate changes, as well as the slope of the yield curve. These scenarios are designed to illustrate the embedded optionality in the balance sheet from, among other things, faster or slower mortgage prepayments and changes in deposit mix.

INCOME SIMULATION AND ECONOMIC VALUE ANALYSIS

Interest rate risk measurement is calculated and reported to the ALCO monthly and ROC at least quarterly. The information reported includes period-end results and identifies any policy limits exceeded, along with an assessment of the policy limit breach and the action plan and timeline for resolution, mitigation, or assumption of the risk.

Huntington uses two approaches to model interest rate risk: Net Interest Income at Risk (NII at Risk) and Economic Value of Equity (EVE). Under NII at Risk, net interest income is modeled utilizing various assumptions for assets, liabilities, and derivative positions under various interest rate scenarios over a one-year time horizon. EVE measures the period end market value of assets minus the market value of liabilities and the change in this value as rates change. EVE is a period end measurement.

Table 21 Net Interest Income at Risk

	Net Inter	est Income at Ris	sk (%)
Basis point change scenario	-25	+100	+200
Board policy limits		-2.0%	-4.0%
September 30, 2014	-0.3%	0.3%	0.1%

Through December 31, 2013, we reported ISE at Risk. We now report NII at Risk to isolate the change in income related solely to interest earning assets and interest bearing liabilities. The difference between the results for ISE at Risk and NII at Risk are not significant for this or any previous quarterly period.

The NII at Risk results included in the table above reflect the analysis used monthly by management. It models gradual -25, +100 and +200 basis point parallel shifts in market interest rates, implied by the forward yield curve over the next one-year period. Due to the current low level of short-term interest rates, the analysis reflects a declining interest rate scenario of 25 basis points, the point at which many assets and liabilities reach zero percent.

Huntington is within Board policy limits for the +100 and +200 basis point scenarios. There is no policy limit for the -25 basis point scenario. The NII at Risk reported at September 30, 2014, shows that Huntington s earnings are not particularly sensitive to changes in interest rates over the next year. In recent periods, the amount of fixed rate assets, primarily indirect auto loans and securities, increased resulting in a reduction in asset sensitivity. This reduction is somewhat accentuated by our portfolio of mortgage-related loans and securities, whose expected maturities lengthen as rates rise. The reduced asset sensitivity for the +200 basis points scenario (relative to the +100 basis points scenario) relates to the modeled migration of money market accounts balances into CDs thereby shifting deposits from a variable rate to a fixed rate.

Table 22 Economic Value of Equity at Risk

Edgar Filing: HUNTINGTON BANCSHARES INC/MD - Form 10-Q

	Economic Value of Equity at Risk (
Basis point change scenario	-25	+100	+200	
Board policy limits		-5.0%	-12.0%	
September 30, 2014	0.1%	-2.8%	-7.5%	

Table of Contents

The EVE results included in the table above reflect the analysis used monthly by management. It models immediate -25, +100 and +200 basis point parallel shifts in market interest rates. Due to the current low level of short-term interest rates, the analysis reflects a declining interest rate scenario of 25 basis points, the point at which many assets and liabilities reach zero percent.

Huntington is within Board policy limits for the +100 and +200 basis point scenarios. There is no policy limit for the -25 basis point scenario. The EVE reported at September 30, 2014 shows that as interest rates increase (decrease) immediately, the economic value of equity position will decrease (increase). When interest rates rise, fixed rate assets generally lose economic value; the longer the duration, the greater the value lost. The opposite is true when interest rates fall. Compared to recent periods, the EVE results for September 30, 2014, reflect lower market rates and less sensitivity.

MSRs

(This section should be read in conjunction with Note 6 of Notes to Unaudited Condensed Consolidated Financial Statements.)

At September 30, 2014 we had a total of \$161.9 million of capitalized MSRs representing the right to service \$15.6 billion in mortgage loans. Of this \$161.9 million, \$25.4 million was recorded using the fair value method and \$136.5 million was recorded using the amortization method.

MSR fair values are very sensitive to movements in interest rates as expected future net servicing income depends on the projected outstanding principal balances of the underlying loans, which can be greatly reduced by prepayments. Prepayments usually increase when mortgage interest rates decline and decrease when mortgage interest rates rise. We have employed strategies to reduce the risk of MSR fair value changes or impairment. However, volatile changes in interest rates can diminish the effectiveness of these hedges. We typically report MSR fair value adjustments net of hedge-related trading activity in the mortgage banking income category of noninterest income. Changes in fair value between reporting dates are recorded as an increase or a decrease in mortgage banking income.

MSRs recorded using the amortization method generally relate to loans originated with historically low interest rates, resulting in a lower probability of prepayments and, ultimately, impairment. MSR assets are included in accrued income and other assets in the Unaudited Condensed Consolidated Financial Statements.

Price Risk

Price risk represents the risk of loss arising from adverse movements in the prices of financial instruments that are carried at fair value and are subject to fair value accounting. We have price risk from trading securities, securities owned by our broker-dealer subsidiaries, foreign exchange positions, equity investments, investments in securities backed by mortgage loans, and marketable equity securities held by our insurance subsidiaries. We have established loss limits on the trading portfolio, on the amount of foreign exchange exposure that can be maintained, and on the amount of marketable equity securities that can be held by the insurance subsidiaries.

Liquidity Risk

Liquidity risk is the risk of loss due to the possibility that funds may not be available to satisfy current or future commitments resulting from external macro market issues, investor and customer perception of financial strength, and events unrelated to us, such as war, terrorism, or financial institution market specific issues. In addition, the mix and maturity structure of Huntington s balance sheet, the amount of on-hand cash and unencumbered securities, and the availability of contingent sources of funding can have an impact on Huntington s ability to satisfy current or future funding commitments. We manage liquidity risk at both the Bank and the parent company.

The overall objective of liquidity risk management is to ensure that we can obtain cost-effective funding to meet current and future obligations, and can maintain sufficient levels of on-hand liquidity, under both normal business-as-usual and unanticipated stressed circumstances. The ALCO was appointed by the ROC to oversee liquidity risk management and the establishment of liquidity risk policies and limits. Contingency funding plans are in place, which measure forecasted sources and uses of funds under various scenarios in order to prepare for unexpected liquidity shortages. Liquidity risk is reviewed monthly for the Bank and the parent company, as well as its subsidiaries. In addition, liquidity working groups meet regularly to identify and monitor liquidity positions, provide policy guidance, review funding strategies, and oversee the adherence to, and maintenance of, the contingency funding plans.

Investment Securities Portfolio

The expected weighted average maturities of our AFS and HTM portfolios are significantly shorter than their contractual maturities as reflected in Note 4 and Note 5 of the Notes to Unaudited Condensed Consolidated Financial Statements. Particularly regarding the MBS and ABS, prepayments of principal and interest that historically occur in advance of scheduled maturities will shorten the expected life of these portfolios. The expected weighted average maturities, which take into account expected prepayments of principal and interest under existing interest rate conditions, are shown in the following table:

Table 23 Expected Life of Investment Securities

		Septembe		
		-Sale & Other rities		Maturity rities
	Amortized	Fair	Amortized	Fair
(dollar amounts in thousands)	Cost	Value	Cost	Value

Bank Liquidity and Sources of Funding

Our primary sources of funding for the Bank are retail and commercial core deposits. At September 30, 2014, these core deposits funded 73% of total assets (101% of total loans). At September 30, 2014 and December 31, 2013, total core deposits represented 93% and 95% of total deposits, respectively. To the extent we are unable to obtain sufficient liquidity through core deposits, we may meet our liquidity needs through other sources, asset securitization, or sale. Other sources include non-core deposits, FHLB advances, and other wholesale debt instruments.

The following tables reflect deposit composition and short-term borrowings detail for each of the last five quarters:

The Bank maintains borrowing capacity at the FHLB and the Federal Reserve Bank Discount Window. The Bank does not consider borrowing capacity from the Federal Reserve Bank Discount Window as a primary source of liquidity. Total loans and securities pledged to the Federal Reserve Discount Window and the FHLB are \$17.4 billion and \$19.8 billion at September 30, 2014 and December 31, 2013, respectively.

In February 2014, the Bank issued \$500.0 million of senior notes at 99.842% of face value. The senior bank note issuances mature on April 1, 2019 and have a fixed coupon rate of 2.20%. The senior note issuance may be redeemed one month prior to the maturity date at 100% of principal plus accrued and unpaid interest. In April 2014, the Bank issued \$500.0 million of senior notes at 99.842% of face value. The senior note issuances mature on April 24, 2017 and have a fixed coupon rate of 1.375%. In April 2014, the Bank also issued \$250.0 million of senior notes at 100% of face value. The senior bank note issuances mature on April 24, 2017 and have a variable coupon rate equal to the three month LIBOR plus 0.425%. Both senior note issuances may be redeemed one month prior to their maturity date at 100% of principal plus accrued and unpaid interest. At September 30, 2014, total wholesale funding was \$9.7 billion, an increase from \$7.0 billion at December 31, 2013. The increase from prior year-end primarily relates to an increase in other long-term debt, short-term borrowings, and subordinated notes, partially offset by a decrease in FHLB advances.

Liquidity Coverage Ratio

On October 24, 2013, the U.S. banking regulators jointly issued a proposal that would implement a quantitative liquidity requirement consistent with the Liquidity Coverage Ratio (LCR) standard established by the Basel Committee on Banking Supervision. The LCR is designed to promote the short term resilience of the liquidity risk profile of banks to which it applies.

On September 3, 2014, the U.S. banking regulators adopted a final LCR for internationally active banking organizations, generally those with \$250 billion or more in total assets, and a Modified LCR rule for banking organizations, similar to Huntington, with \$50 billion or more in total assets that are not internationally active banking organizations. The Modified LCR requires Huntington to maintain High Quality Liquid Assets (HQLA) to meet its net cash outflows over a prospective 30 calendar-day period, which takes into account the potential impact of idiosyncratic and market-wide shocks. The Modified LCR transition period begins on January 1, 2016, with Huntington required to maintain HQLA equal to 90 percent of the stated requirement. The ratio increases to 100 percent on January 1, 2017. Huntington expects to be compliant with the Modified LCR requirement within the transition periods established in the Modified LCR.

At September 30, 2014, we believe the Bank had sufficient liquidity to meet its cash flow obligations for the foreseeable future.

Parent Company Liquidity

The parent company s funding requirements consist primarily of dividends to shareholders, debt service, income taxes, operating expenses, funding of nonbank subsidiaries, repurchases of our stock, and acquisitions. The parent company obtains funding to meet obligations from dividends and interest received from the Bank, interest and dividends received from direct subsidiaries, net taxes collected from subsidiaries included in the federal consolidated tax return, fees for services provided to subsidiaries, and the issuance of debt securities.

At September 30, 2014 and December 31, 2013, the parent company had \$0.7 billion and \$1.0 billion, respectively, in cash and cash equivalents.

On October 15, 2014, the board of directors declared a quarterly common stock cash dividend of \$0.06 per common share. The dividend is payable on January 2, 2015, to shareholders of record on December 19, 2014. Based on the current quarterly dividend of \$0.06 per common share, cash demands required for common stock dividends are estimated to be approximately \$48.9 million per quarter. On October 15, 2014, the board of directors declared a quarterly Series A and Series B Preferred Stock dividend payable on January 15, 2015 to shareholders of record on January 1, 2015. Based on the current dividend, cash demands required for Series A Preferred Stock are estimated to be approximately \$7.7 million per quarter. Cash demands required for Series B Preferred Stock are expected to be approximately \$0.3 million per quarter.

During the quarter the Bank paid dividends of \$169.0 million to the holding company. We anticipate that the Bank will declare additional dividends to the holding company in the fourth quarter of 2014. To help meet any additional liquidity needs, we have an open-ended, automatic shelf registration statement filed and effective with the SEC, which permits us to issue an unspecified amount of debt or equity securities.

With the exception of the items discussed above, the parent company does not have any significant cash demands. It is our policy to keep operating cash on hand at the parent company to satisfy cash demands for at least the next 18 months. Considering the factors discussed above, and other analyses that we have performed, we believe the parent company has sufficient liquidity to meet its cash flow obligations for the foreseeable future.

Off-Balance Sheet Arrangements

In the normal course of business, we enter into various off-balance sheet arrangements. These arrangements include interest rate swaps, financial guarantees contained in standby letters-of-credit issued by the Bank and commitments by the Bank to sell mortgage loans.

INTEREST RATE SWAPS

Balance sheet hedging activity is arranged to receive hedge accounting treatment and is classified as either fair value or cash flow hedges. Fair value hedges are purchased to convert deposits and subordinated and other long-term debt from fixed-rate obligations to floating rate. Cash flow hedges are also used to convert floating rate loans made to customers into fixed rate loans. See Note 15 for more information.

STANDBY LETTERS-OF-CREDIT

Standby letters-of-credit are conditional commitments issued to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. Most of these arrangements mature within two years and are expected to expire without being drawn upon. Standby letters-of-credit are included in the determination of the amount of risk-based capital that the parent company and the Bank are required to hold. Through our credit process, we monitor the credit risks of outstanding standby letters-of-credit. When it is probable that a standby letter-of-credit will be drawn and not repaid in full, a loss is recognized in the provision for credit losses. See Note 17 for more information.

COMMITMENTS TO SELL LOANS

Activity related to our mortgage origination activity supports the hedging of the mortgage pricing commitments to customers and the secondary sale to third parties. At September 30, 2014 and December 31, 2013, we had commitments to sell residential real estate loans of \$556.0 million and \$452.6 million, respectively. These contracts mature in less than one year.

We do not believe that off-balance sheet arrangements will have a material impact on our liquidity or capital resources.

Operational Risk

As with all companies, we are subject to operational risk. Operational risk is the risk of loss due to human error; inadequate or failed internal systems and controls; violations of, or noncompliance with, laws, rules, regulations, prescribed practices, or ethical standards; and external influences such as market conditions, fraudulent activities, disasters, and security risks. We continuously strive to strengthen our system of internal controls to ensure compliance with laws, rules, and regulations, and to improve the oversight of our operational risk. For example, we actively and continuously monitor cyber-attacks such as attempts related to eFraud and loss of sensitive customer data. We evaluate internal systems, processes and controls to mitigate loss from cyber-attacks and, to date, have not experienced any material losses.

To mitigate operational risks, we have a senior management Operational Risk Committee and a senior management Legal, Regulatory, and Compliance Committee. The responsibilities of these committees, among other duties, include establishing and maintaining management information systems to monitor material risks and to identify potential concerns, risks, or trends that may have a significant impact and ensuring that recommendations are developed to address the identified issues. Both of these committees report any significant findings and recommendations to the Risk Management Committee. Additionally, potential concerns may be escalated to our ROC, as appropriate.

The goal of this framework is to implement effective operational risk techniques and strategies, minimize operational and fraud losses, and enhance our overall performance.

Representation and Warranty Reserve

We primarily conduct our mortgage loan sale and securitization activity with FNMA and FHLMC. In connection with these and other securitization transactions, we make certain representations and warranties that the loans meet certain criteria, such as collateral type and underwriting standards. We may be required to repurchase individual loans and / or indemnify these organizations against losses due to a loan not meeting the established criteria. We have a reserve for such losses and exposure, which is included in accrued expenses and other liabilities. The reserves are estimated based on historical and expected repurchase activity, average loss rates, and current economic trends. The level of mortgage loan repurchase losses depends upon economic factors, investor demand strategies and other external conditions containing a level of uncertainty and risk that may change over the life of the underlying loans. We currently do not have sufficient information to estimate the range of reasonably possible loss related to representation and warranty exposure.

The tables below reflect activity in the representations and warranties reserve:

Table 26 Summary of Reserve for Representations and Warranties on Mortgage Loans Serviced for Others

		2014		20	13
(dollar amounts in thousands)	Third	Second	First	Fourth	Third

Amount of loans repurchased (UPB)(1)	\$	2,224	\$	3,766	\$	10,557	\$	5,204	\$	4,055	
Number of claims received		38		43		35		341		222	
Successful dispute rate(2)		25%		40%		34%		40%		36%	
Number of make whole payments(3)		4		20		91		91		28	
Amount of make whole payments(3)	\$	119	\$	844	\$	5,693	\$	5,742	\$	2,125	

- (1) Loans repurchased are loans that fail to meet the purchaser s terms.
- (2) Successful disputes are a percent of close out requests.
- (3) Make whole payments are payments to reimburse for losses on foreclosed properties.

Foreclosure Documentation

Compared to the high volume servicers, we service a relatively low volume of residential mortgage foreclosures. We have reviewed our residential foreclosure process. We have not found evidence of financial injury to any borrowers from any foreclosure by the Bank that should not have proceeded. We continuously review our processes and controls to ensure that our foreclosure processes are appropriate.

Compliance Risk

Financial institutions are subject to many laws, rules, and regulations at both the federal and state levels. In September, for example, the Office of the Comptroller of the Currency issued its final rule formalizing its heightened expectations supervisory regime for the largest federally chartered depository institutions, including Huntington, to improve risk management and ensure boards can challenge decisions made by management. These broad-based laws, rules and regulations include, but are not limited to, expectations relating to anti-money laundering, lending limits, client privacy, fair lending, prohibitions against unfair, deceptive or abusive acts or practices, protections for military members as they enter active duty, and community reinvestment. Additionally, the volume and complexity of recent regulatory changes have increased our overall compliance risk. As such, we utilize various resources to help ensure expectations are met, including a team of compliance experts dedicated to ensuring our conformance with all applicable laws, rules, and regulations. Our colleagues receive training for several broad-based laws and regulations including, but not limited to, anti-money laundering and customer privacy. Additionally, colleagues engaged in lending activities receive training for laws and regulations related to flood disaster protection, equal credit opportunity, fair lending, and / or other courses related to the extension of credit. We set a high standard of expectation for adherence to compliance management and seek to continuously enhance our performance.

Capital

Both regulatory capital and shareholders equity are managed at the Bank and on a consolidated basis. We have an active program for managing capital and maintain a comprehensive process for assessing the Company s overall capital adequacy. We believe our current levels of both regulatory capital and shareholders equity are adequate.

Regulatory Capital

The following table presents risk-weighted assets and other financial data necessary to calculate certain financial ratios, including the Tier 1 common equity ratio, which we use to measure capital adequacy. We estimate the negative impact to Tier I common risk-based capital from the 2015 first quarter implementation of the Federal Reserve s final Basel III capital rules will be approximately 40 bps on a fully phased-in basis.

⁽¹⁾ Other intangible assets are net of deferred tax liability, and calculated assuming a 35% tax rate.

Tangible equity, Tier 1 common equity, tangible common equity, and tangible assets are non-GAAP financial measures. Additionally, any ratios utilizing these financial measures are also non-GAAP. These financial measures have been included as they are considered to be critical metrics with which to analyze and evaluate financial condition and capital strength. Other companies may calculate these financial measures differently.

44

The following table presents certain regulatory capital data at both the consolidated and Bank levels for each of the past five quarters:

Table 29 Regulatory Capital Data

Tier 1 leverage ratio	Consolidated	9.83%	10.01%	10.32%	10.67%	10.859	
	Bank	9.49	9.78	9.96	9.97	10.01	
Tier 1 risk-based capital ratio	Consolidated	11.61	11.56	11.95	12.28	12.36	
•	Bank	11.22	11.29	11.51	11.45	11.41	
Total risk-based capital ratio	Consolidated	13.72	13.67	14.13	14.57	14.67	
	Bank	12.77	12.83	13.11	13.14	13.11	

The decreases in the capital ratios were due to balance sheet growth and share repurchases that were partially offset by retained earnings and the 8.7 million common shares issued in the Camco acquisition. Specifically, all capital ratios were impacted by the repurchase of 32.1 million common shares over the last three quarters, 5.4 million of which were repurchased during the 2014 third quarter. The decrease in the regulatory Tier 1 risk-based capital ratio also reflected the redemption of \$50 million of qualifying preferred securities on December 31, 2013.

Shareholders Equity

We generate shareholders equity primarily through the retention of earnings, net of dividends. Other potential sources of shareholders equity include issuances of common and preferred stock. Our objective is to maintain capital at an amount commensurate with our risk profile and risk tolerance objectives, to meet both regulatory and market expectations, and to provide the flexibility needed for future growth and business opportunities. Shareholders equity totaled \$6.3 billion at September 30, 2014, an increase of \$0.2 billion when compared with December 31, 2013.

Dividends

We consider disciplined capital management as a key objective, with dividends representing one component. Our strong capital ratios and expectations for continued earnings growth positions us to continue to actively explore additional capital management opportunities.

On October 15, 2014, our board of directors declared a quarterly cash dividend of \$0.06 per common share, payable on January 2, 2015. Also, cash dividends of \$0.05 per share were declared on July 16, 2014, April 16, 2014 and January 16, 2014.

On October 15, 2014, our board of directors also declared a quarterly cash dividend on our 8.50% Series A Non-Cumulative Perpetual Convertible Preferred Stock of \$21.25 per share. The dividend is payable on January 15, 2015. Also, cash dividends of \$21.25 per share were declared on July 16, 2014, April 16, 2014 and January 16, 2014.

On October 15, 2014, our board of directors also declared a quarterly cash dividend on our Floating Rate Series B Non-Cumulative Perpetual Preferred Stock of \$7.33 per share. The dividend is payable on January 15, 2015. Also, cash dividends of \$7.33 per share, \$7.32 per share \$7.35 per share were declared on July 16, 2014, April 16, 2014 and January 16, 2014, respectively.

Share Repurchases

From time to time the board of directors authorizes the Company to repurchase shares of our common stock. Although we announce when the board of directors authorizes share repurchases, we typically do not give any public notice before we repurchase our shares. Future stock repurchases may be private or open-market repurchases, including block transactions, accelerated or delayed block transactions, forward transactions, and similar transactions. Various factors determine the amount and timing of our share repurchases, including our capital requirements, the number of shares we expect to issue for employee benefit plans and acquisitions, market conditions (including the trading price of our stock), and regulatory and legal considerations, including the FRB s response to our capital plan.

On March 26, 2014, Huntington announced that the Federal Reserve did not object to Huntington's proposed capital actions included in Huntington's capital plan submitted to the Federal Reserve in January 2014. These actions included a potential repurchase of up to \$250 million of common stock through the first quarter of 2015. Huntington's board of directors authorized a share repurchase program consistent with Huntington's capital plan. The new repurchase authorization represents a \$23 million, or 10%, increase from the recently completed common stock repurchase authorization. During the 2014 third quarter, we repurchased 5.4 million shares, with a weighted average price of \$9.70, under this program. Purchases of common stock may include open market purchases, privately negotiated transactions, and accelerated repurchase programs. We have approximately \$86 million remaining under the current authorization.

Fair Value

Fair Value Measurements

The fair value of a financial instrument is defined as the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Assets and liabilities carried at fair value inherently result in a higher degree of financial statement volatility. We estimate the fair value of a financial instrument using a variety of valuation methods. Where financial instruments are actively traded and have quoted market prices, quoted market prices are used for fair value. We characterize active markets as those where transaction volumes are sufficient to provide objective pricing information, with reasonably narrow bid/ask spreads, and where received quoted prices do not vary widely. When the financial instruments are not actively traded, other observable market inputs, such as quoted prices of securities with similar characteristics, may be used, if available, to determine fair value. Inactive markets are characterized by low transaction volumes, price quotations that vary substantially among market participants, or in which minimal information is released publicly. When observable market prices do not exist, we estimate fair value primarily by using cash flow and other financial modeling methods. Our valuation methods consider factors such as liquidity and concentration concerns and, for the derivatives portfolio, counterparty credit risk. Other factors such as model assumptions, market dislocations, and unexpected correlations can affect estimates of fair value. Changes in these underlying factors, assumptions, or estimates in any of these areas could materially impact the amount of revenue or loss recorded.

The FASB ASC Topic 820, Fair Value Measurements, establishes a framework for measuring the fair value of financial instruments that considers the attributes specific to particular assets or liabilities and establishes a three-level hierarchy for determining fair value based on the transparency of inputs to each valuation as of the fair value measurement date. The three levels are defined as follows:

Level 1 quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 inputs include quoted prices for similar assets and liabilities in active markets, quoted prices of identical or similar assets or liabilities in markets that are not active, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs that are unobservable and significant to the fair value measurement. Financial instruments are considered Level 3 when values are determined using pricing models, discounted cash flow methodologies, or similar techniques, and at least one significant model assumption or input is unobservable.

At the end of each quarter, we assess the valuation hierarchy for each asset or liability measured. As necessary, assets or liabilities may be transferred within hierarchy levels due to changes in availability of observable market inputs at the measurement date. The fair values measured at each level of the fair value hierarchy, additional discussion regarding fair value measurements, and a brief description of how fair value is determined for categories that have unobservable inputs, can be found in Note 14 of the Notes to Unaudited Condensed Consolidated Financial Statements.

BUSINESS SEGMENT DISCUSSION

Overview

Our business segments are based on our internally-aligned segment leadership structure, which is how we monitor results and assess performance. During the 2014 first quarter, we reorganized our business segments to drive our ongoing growth and leverage the knowledge of our highly experienced team. We now have five major business segments: Retail and Business Banking, Commercial Banking, Automobile Finance and Commercial Real Estate (AFCRE), Regional Banking and The Huntington Private Client Group (RBHPCG), and Home Lending. A Treasury / Other function includes technology and operations, other unallocated assets, liabilities, revenue, and expense. All periods presented have been reclassified to conform to the current period classification.

Business segment results are determined based upon our management reporting system, which assigns balance sheet and income statement items to each of the business segments. The process is designed around our organizational and management structure and, accordingly, the results derived are not necessarily comparable with similar information published by other financial institutions.

Revenue Sharing

Revenue is recorded in the business segment responsible for the related product or service. Fee sharing is recorded to allocate portions of such revenue to other business segments involved in selling to, or providing service to, customers. Results of operations for the business segments reflect these fee sharing allocations.

Expense Allocation

The management accounting process that develops the business segment reporting utilizes various estimates and allocation methodologies to measure the performance of the business segments. Expenses are allocated to business segments using a two-phase approach. The first phase consists of measuring and assigning unit costs (activity-based costs) to activities related to product origination and servicing. These activity-based costs are then extended, based on volumes, with the resulting amount allocated to business segments that own the related products. The second phase consists of the allocation of overhead costs to all five business segments from Treasury / Other. We utilize a full-allocation methodology, where all Treasury / Other expenses, except those related to reported Significant Items (except for the goodwill impairment), and a small amount of other residual unallocated expenses, are allocated to the five business segments.

Funds Transfer Pricing (FTP)

We use an active and centralized FTP methodology to attribute appropriate income to the business segments. The intent of the FTP methodology is to transfer interest rate risk from the business segments by providing matched duration funding of assets and liabilities. The result is to centralize the financial impact, management, and reporting of interest rate risk in the Treasury / Other function where it can be centrally monitored and managed. The Treasury / Other function charges (credits) an internal cost of funds for assets held in (or pays for funding provided by) each business segment. The FTP rate is based on prevailing market interest rates for comparable duration assets (or liabilities).

Net Income by Business Segment

The segregation of net income by business segment for the first nine-month period of September 30, 2014 and September 30, 2013 is presented in the following table:

Table 30 Net Income (Loss) by Business Segment

	Nine Months Ende	Nine Months Ended September 30,					
(dollar amounts in thousands)	2014	2013					
Retail and Business Banking	\$ 122,383	\$ 97,320					
Commercial Banking	99,484	83,022					
AFCRE	155,157	180,916					
RBHPCG	17,245	28,949					
Home Lending	(12,906)	3,219					

Treasury/Other	87,415	89,684
Total net income	\$ 468,778	\$ 483,110

Treasury / Other

The Treasury / Other function includes revenue and expense related to assets, liabilities, and equity not directly assigned or allocated to one of the five business segments. Other assets include investment securities and bank owned life insurance. The financial impact associated with our FTP methodology, as described above, is also included.

Net interest income includes the impact of administering our investment securities portfolios and the net impact of derivatives used to hedge interest rate sensitivity. Noninterest income includes miscellaneous fee income not allocated to other business segments, such as bank owned life insurance income and any investment security and trading asset gains or losses. Noninterest expense includes certain corporate administrative, merger, and other miscellaneous expenses not allocated to other business segments. The provision for income taxes for the business segments is calculated at a statutory 35% tax rate, though our overall effective tax rate is lower. As a result, Treasury / Other reflects a credit for income taxes representing the difference between the lower actual effective tax rate and the statutory tax rate used to allocate income taxes to the business segments.

Optimal Customer Relationship (OCR)

Our OCR strategy is focused on building and deepening relationships with our customers through superior interactions, product penetration, and quality of service. We will deliver high-quality customer and prospect interactions through a fully integrated sales culture which will include all partners necessary to deliver a total Huntington solution. The quality of our relationships will lead to our ability to be the primary bank for our customers, yielding quality, annuitized revenue and profitable share of customers overall financial services revenue. We believe our relationship oriented approach will drive a competitive advantage through our local market delivery channels.

CONSUMER OCR PERFORMANCE

For both consumer and commercial OCR performance there are three key performance metrics: (1) the number of checking account households, (2) the number of product penetration per consumer checking household, and (3) the revenue generated from the consumer households of all business segments.

The growth in consumer checking account number of households is a result of both new sales of checking accounts and improved retention of existing checking account households. The overall objective is to grow the number of households, along with an increase in product penetration.

We use the checking account since it typically represents the primary banking relationship product. We count additional services by type, not number of services. For example, a household that has one checking account and one mortgage, we count as having two services. A household with four checking accounts, we count as having one service. The household relationship utilizing four or more services is viewed to be more profitable and loyal. The overall objective, therefore, is to decrease the percentage of 1-3 services per consumer checking account household, while increasing the percentage of those with 4 or more services. Since we have made significant strides toward having the vast majority of our customers with 4+ services, during the 2013 second quarter, we changed our measurement to 6+ services. We are holding ourselves to a higher performance standard.

48

The following table presents consumer checking account household OCR metrics:

Table 31 Consumer Checking Household OCR Cross-sell Report

	2014						2013			
		Third	Second		First	F	ourth	,	Third	
Number of households (2) (3)	1	,453,584	1,391,406	1	,359,158	1,	324,971	1,	314,587	
Product Penetration by Number of Services (1)										
1 Service		3.3%	3.0%		3.0%		3.0%		3.2%	
2-3 Services		18.4	18.4		18.8		19.2		19.5	
4-5 Services		29.6	29.9		30.2		30.2		30.0	
6+ Services		48.7	48.7		48.0		47.6		47.3	
Total revenue (in millions)	\$	260.0\$	256.6	\$	239.9	\$	232.5	\$	237.1	

- (1) The definitions and measurements used in our OCR process are periodically reviewed and updated prospectively.
- (2) On March 1, 2014, Huntington acquired 9,904 Camco households.
- (3) On September 12, 2014, Huntington acquired 37,939 Bank of America households.

Our emphasis on cross-sell, coupled with customers being attracted by the benefits offered through our Fair Play banking philosophy with programs such as 24-Hour Grace® on overdrafts and Asterisk-Free Checking , are having a positive effect. The percent of consumer households with 6 or more products at the end of the 2014 third quarter was 48.7%, up from 47.3% at the end of the 2013 third quarter due to increased product sales and services provided.

COMMERCIAL OCR PERFORMANCE

For commercial OCR performance, there are three key performance metrics: (1) the number of commercial relationships, (2) the number of services penetration per commercial relationship, and (3) the revenue generated. Commercial relationships include relationships from all business segments.

The growth in the number of commercial relationships is a result of both new sales of checking accounts and improved retention of existing commercial accounts. The overall objective is to grow the number of relationships, along with an increase in product service distribution.

The commercial relationship is defined as a business banking or commercial banking customer with a checking account relationship. We use this metric because we believe that the checking account anchors a business relationship and creates the opportunity to increase our cross-sell. Multiple sales of the same type of service are counted as one service, the same as consumer.

The following table presents commercial relationship OCR metrics:

Table 32 Commercial Relationship OCR Cross-sell Report

		2014		2013			
	Third	Second	First	Fourth	Third		
Commercial Relationships (1)	164,079	159,290	159,973	159,716	159,878		
Product Penetration by Number of Services (2)							
1 Service	16.6%	16.9%	19.4%	21.1%	22.1%		
2-3 Services	42.2	41.8	41.1	41.4	41.1		
4+ Services	41.2	41.3	39.5	37.5	36.8		
Total revenue (in millions)	\$ 213.1\$	211.8	\$ 213.3	\$ 190.9	\$ 193.9		

- (1) Checking account required.
- (2) The definitions and measurements used in our OCR process are periodically reviewed and updated prospectively.

49

By focusing on targeted relationships we are able to achieve higher product service penetration among our commercial relationships, and leverage these relationships to generate a deeper share of wallet.

First Nine Months vs. 2013 First Nine Months					

Retail and Business Banking reported net income of \$122.4 million in the first nine-month period of 2014. This was an increase of \$25.1 million, or 26%, when compared to the year-ago period. The increase in net income reflected a combination of factors described below.

The increase in net interest income from the year-ago period reflected:

\$0.6 billion, or 2%, increase in total average deposits.

\$0.4 billion, or 3%, increase in average total loans combined with 10 basis points increase in loan spreads as a result of a reduction in the funds transfer price rates assigned to loans.

Partially offset by:

11 basis point decrease in deposit spreads that resulted from a reduction in the funds transfer price rates assigned to deposits. The decrease in the provision for credit losses from the year-ago period reflected:

A \$28.8 million, or 30%, decrease in NCOs, combined with improved credit metrics on business banking and consumer loans. The increase in total average loans and leases from the year-ago period reflected:

\$240 million, or 3%, increase in consumer loans, primarily due to growth in home equity lines of credit and residential mortgages, as well as the impact of the Camco acquisition.

\$125 million, or 3%, increase in commercial loans, primarily due to C&I loan growth and the impact of the Camco acquisition.

51

The	increase	ın	total	average	a e	nneite	trom	the	Vear-agn	neriod	reflected.
1110	mer case	111	wai	average	uc	DOSILO	11 0111	uic	y car -ago	periou	reflected:

\$259 million deposit growth from our In-store branch network.

A continued focus on product mix in reducing the overall cost of deposits as evidenced by an increase in money market and noninterest bearing deposits, partially offset by a decrease in core certificates of deposit. In addition, the Camco acquisition contributed to the deposit increase.

While not having a meaningful impact on the 2014 third quarter average balance, the mid-September completion of the acquisition of the 24 Bank of America branches added approximately \$0.7 billion to period-end deposits.

The increase in noninterest income from the year-ago period reflected:

- \$9.1 million, or 13%, increase in electronic banking income, primarily due to higher transaction volumes and an increase in the number of households.
- \$5.1 million, or 31%, increase in other noninterest income, primarily due to an increase in SBA loan servicing fees and an increase in revenue from credit card fees. We introduced the credit card product in the 2013 third quarter.
- \$4.4 million, or 3%, increase in service charges on deposit accounts, primarily due to the growth in the number of households and changing customer usage patterns. Partially offset by:
 - \$8.0 million, or 44% decline in mortgage banking income, primarily driven by lower refinancing activity referred to the Home Lending segment.

The increase in noninterest expense from the year-ago period reflected:

- \$23.6 million, or 8%, increase in allocated overhead expenses.
- \$3.3 million, or 13%, increase in equipment expense, primarily due to technology investments.
- \$3.4 million, or 12%, increase in outside data processing and other services expense, mainly the result of transaction costs associated with debit and credit card activity.

Partially offset by:

\$11.2 million, or 5%, decrease in personnel costs, primarily due to the pension plan curtailment in 2013. Previous branch consolidations and various efficiency improvement initiatives also contributed to the decrease in personnel costs.

\$5.3 million, or 46%, reduction in deposit and other insurance.

\$1.7 million, or 8%, reduction in amortization of intangibles.

2014 First Nine Months vs. 2013 First Nine Months

Commercial Banking reported net income of \$99.5 million in the first nine-month period of 2014. This was an increase of \$16.5 million, or 20%, compared to the year-ago period. The increase in net income reflected a combination of factors described below.

The increase in net interest income from the year-ago period reflected:

\$0.6 billion, or 6%, increase in average loans/leases.

\$0.9 billion, or 803%, increase in average available-for-sale securities, primarily related to direct purchase municipal securities.

\$0.7 billion, or 8%, increase in average total deposits. Partially offset by:

18 basis point decrease in the net interest margin, primarily due to a 9 basis point compression in commercial loan spreads, as well as a 4 basis point compression from the international portfolio with products such as bankers acceptances and foreign insured receivables.

The decrease in the provision for credit losses from the year-ago period reflected:

Provision expense in the year-ago period reflected the results of our enhanced commercial risk rating system, as well as an overall net increase in the exposure at default assumptions included in the AULC component of our allowance calculation. Partially offset by:

Increase in NCOs, primarily relating to large losses associated with a small number of credit relationships.

53

The	increase	ın	total	average	accete	from	the v	ear-agn	neriod	reflected:
1110	mici casc		will	uveruge	abbets	11 0111	tile y	cui ugo	periou	i ciiccicu.

\$0.9 billion increase in available-for-sale securities driven from the addition of direct purchase municipal instruments. These instruments had been classified as C&I loans in the year-ago period.

\$0.6 billion, or 565%, increase in the international loan portfolio, primarily bankers acceptances and foreign insured receivables.

\$0.1 billion, or 1%, increase in the middle market loan portfolio, primarily due to our focus in specialty businesses. Partially offset by:

\$0.1 billion, or 54%, decrease in commercial loans managed by SAD, which reflected improved credit quality in the portfolio. The increase in total average deposits from the year-ago period reflected:

\$1.0 billion, or 12%, increase in core deposits, which primarily reflected a \$0.5 billion increase in noninterest-bearing demand deposits. Middle market accounts, such as not-for-profit universities and healthcare, contributed \$0.8 billion of the balance growth, while large corporate accounts contributed \$0.3 billion.

The decrease in noninterest income from the year-ago period reflected:

- \$3.5 million, or 13%, decrease in commitment and other loan related fees, primarily reflecting a significant syndication fee in 2013.
- \$1.8 million, or 28%, decrease in equipment finance related fee income, primarily reflecting a significant lease syndication fee in 2013.
- \$1.1 million, or 2%, lower income in insurance, with most of the decline being in the title business, which has a direct correlation with our mortgage origination business.

 Partially offset by:
 - \$2.1 million, or 6%, increase in service charges on deposit accounts and other treasury management related revenue, primarily due to a new commercial card product implemented in 2013, as well as strong core cash management growth.
 - \$1.8 million, or 29%, increase in fee income from international trade products, primarily due to bankers acceptances and letters of credit

The decrease in noninterest expense from the year-ago period reflected:

\$4.0 million, or 43%, decrease in deposit and other insurance expense.

\$4.0 million, or 12%, decrease in allocated overhead expense.

\$2.5 million, or 2%, decrease in personnel expense, primarily reflecting reduction in number of employees.

54

Return on average common equity	32.0	41.2	(9.2)	(22)
First Nine Months vs. 2013 First Nine Months				

AFCRE reported net income of \$155.2 million in the first nine-month period of 2014. This was a decrease of \$25.8 million, or 14%, compared to the year-ago period. The decrease in net income reflected a combination of factors described below.

The increase in net interest income from the year-ago period reflected:

\$2.0 billion, or 37%, increase in automobile loans and leases, primarily due to continued strong origination volume which totaled \$4.0 billion for the first nine months of 2014 compared to \$3.2 billion for the first nine months of 2013.

Partially offset by:

21 basis point decrease in the net interest margin, primarily due to an 18 basis point reduction in loan spreads. This decline primarily reflects the impact of competitive pricing pressures in all of our portfolios, partially offset by a \$5.1 million, or 5 basis points, recovery in the 2014 second quarter from the unexpected pay-off of an acquired commercial real estate loan.

The decrease in the provision (reduction in allowance) for credit losses from the year-ago period reflected:

Less improvement in credit quality than what was experienced in the year-ago period, reflecting a 15 basis point decline in NPA/loans in the current period compared to a 41 basis point decline in the year-ago period, offset by lower net charge offs. The decrease in noninterest income from the year-ago period reflected:

\$5.0 million, or 17%, decrease in other noninterest income, primarily due to decreases in market related gains associated with certain loans carried at fair value, operating lease related income and servicing income on securitized automobile loans.

The increase in noninterest expense from the year-ago period reflected:

\$7.5 million, or 10%, increase in other noninterest expense, primarily due to a \$8.8 million increase in allocated expenses, generally reflecting higher levels of business activity.

Partially offset by:

\$3.0 million, or 32%, decrease in deposit and other insurance expense.

2014 First Nine Months vs. 2013 First Nine Months

RBHPCG reported net income of \$17.2 million in the first nine-month period of 2014. This was a decrease of \$11.7 million, or 40%, when compared to the year-ago period. The decrease in net income reflected a combination of factors described below.

The decrease in net interest income from the year-ago period reflected:

14 basis point decrease in the net interest margin, primarily due to lower spreads on deposits. Partially offset by:

\$0.2 billion, or 3%, increase in average total deposits, primarily due to increased focus on deposit growth resulting from the alignment of private banking with the regional presidents.

The increase in provision for credit losses reflected:

Less improvement in the underlying credit quality of the loan portfolio compared to year-ago period, offset by reduced level of NCOs.

The decrease in noninterest income from the year-ago period reflected:

\$6.2 million, or 7%, decrease in trust services, primarily due to reduced proprietary mutual fund revenue related to a reduction in asset values and due to the sale of the fixed income funds.

\$3.0 million, or 26%, decrease in other noninterest income, primarily due to a gain realized from LIHTC investment sales in the 2013 first quarter.

\$1.4 million, or 29%, decrease in service charges on deposit accounts.

56

The increase in noninterest expense from the year-ago period reflected:

\$2.9 million, or 116%, increase in professional services expense, primarily due to increased consulting fees. Partially offset by:

- \$1.3 million, or 1%, decrease in personnel costs, primarily due to the pension plan curtailment gain in 2013.
- \$1.1 million, or 40%, decrease in deposit and other insurance expense.

57

Home Lending

N.R. Not relevant.

2014 First Nine Months vs. 2013 First Nine Months

Home Lending reported a net loss of \$12.9 million in the first nine-month period of 2014 compared to net income of \$3.2 million in the year-ago period. Home Lending supports the origination and servicing of mortgage loans across all segments. The decrease in net income reflected a combination of factors described below.

The increase in net interest income from the year-ago period reflected:

9 basis point increase in the net interest margin, primarily due to a 16 basis point increase in loan spreads. This increase is primarily driven by lower funding costs on the loan portfolio.

\$0.2 billion, or 7%, increase in average total loans. Partially offset by:

\$0.1 billion, or 25%, decrease in average total deposits, driven by lower escrow balances.

The increase in provision for credit losses reflected:

The transfer of the student loan portfolio to loans held-for-sale during the 2014 first quarter and a \$1.4 million, or 11%, increase in NCOs

The decrease in noninterest income from the year-ago period reflected:

\$22.8 million, or 28%, decrease in mortgage banking income, primarily due to a reduction in volume and gain on sale related to lower refinancing levels.

\$2.4 million, or 54%, decrease in insurance income, primarily due to lower refinance volume related to title insurance referrals.

58

The decrease in noninterest expense from the year-ago period reflected:

- \$8.1 million, or 11%, decrease in personnel costs, primarily due to lower mortgage production volume and a reduction in staff.
- \$1.2 million, or 43%, decrease in deposit and other insurance expense.

\$0.9 million, or 5%, decrease in other noninterest expense, primarily due to lower mortgage repurchase expense. Partially offset by:

\$3.1 million, or 28%, increase in outside data processing and other services, spending on loan promotions.

ADDITIONAL DISCLOSURES

Forward-Looking Statements

This report, including MD&A, contains certain forward-looking statements, including certain plans, expectations, goals, projections, and statements, which are subject to numerous assumptions, risks, and uncertainties. Statements that do not describe historical or current facts, including statements about beliefs and expectations, are forward-looking statements. Forward-looking statements may be identified by words such as expect, anticipate, believe, intend, estimate, plan, target, goal, or similar expressions, or future or conditional verbs such as will, may, might, should, would, could, or similar variations. The forward-looking statements are intended to be subject to the safe harbor provided by Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and the Private Securities Litigation Reform Act of 1995.

While there is no assurance that any list of risks and uncertainties or risk factors is complete, below are certain factors which could cause actual results to differ materially from those contained or implied in the forward-looking statements: (1) worsening of credit quality performance due to a number of factors such as the underlying value of collateral that could prove less valuable than otherwise assumed and assumed cash flows may be worse than expected, (2) changes in general economic, political, or industry conditions, uncertainty in U.S. fiscal and monetary policy, including the interest rate policies of the Federal Reserve Board, volatility and disruptions in global capital and credit markets, (3) movements in interest rates, (4) competitive pressures on product pricing and services, (5) success, impact, and timing of our business strategies, including market acceptance of any new products or services implementing our Fair Play banking philosophy, (6) changes in accounting policies and principles and the accuracy of our assumptions and estimates used to prepare our financial statements, (7) extended disruption of vital infrastructure, (8) the final outcome of significant litigation, (9) the nature, extent, timing, and results of governmental actions, examinations, reviews, reforms, regulations, and interpretations, including those related to the Dodd-Frank Wall Street Reform and Consumer Protection Act and the Basel III regulatory capital reforms, as well as those involving the OCC, Federal Reserve, FDIC, and CFPB, and (10) the outcome of judicial and regulatory decisions regarding practices in the residential mortgage industry, including among other things the processes followed for foreclosing residential mortgages. Additional factors that could cause results to differ materially from those described above can be found in our 2013 Annual Report on Form 10-K and documents subsequently filed by us with the Securities and Exchange Commission.

All forward-looking statements speak only as of the date they are made and are based on information available at that time. We assume no obligation to update forward-looking statements to reflect circumstances or events that occur after the date the forward-looking statements were made or to reflect the occurrence of unanticipated events except as required by federal securities laws. As forward-looking statements involve significant risks and uncertainties, caution should be exercised against placing undue reliance on such statements.

Non-Regulatory Capital Ratios

In addition to capital ratios defined by banking regulators, the Company considers various other measures when evaluating capital utilization and adequacy, including:

Tangible common equity to tangible assets,

Tier 1 common equity to risk-weighted assets using Basel I and Basel III definitions, and

Tangible common equity to risk-weighted assets using Basel I definition.

These non-regulatory capital ratios are viewed by management as useful additional methods of reflecting the level of capital available to withstand unexpected market conditions. Additionally, presentation of these ratios allows readers to compare the Company's capitalization to other financial services companies. These ratios differ from capital ratios defined by banking regulators principally in that the numerator excludes preferred securities, the nature and extent of which varies among different financial services companies. These ratios are not defined in Generally Accepted Accounting Principles (GAAP) or federal banking regulations. As a result, these non-regulatory capital ratios disclosed by the Company are considered non-GAAP financial measures.

Because there are no standardized definitions for these non-regulatory capital ratios, the Company s calculation methods may differ from those used by other financial services companies. Also, there may be limits in the usefulness of these measures to investors. As a result, the Company encourages readers to consider the consolidated financial statements and other financial information contained in this Form 10-Q in their entirety, and not to rely on any single financial measure.

Risk Factors

Information on risk is discussed in the Risk Factors section included in Item 1A of our 2013 Form 10-K. Additional information regarding risk factors can also be found in the Risk Management and Capital discussion of this report.

Critical Accounting Policies and Use of Significant Estimates

Our financial statements are prepared in accordance with GAAP. The preparation of financial statements in conformity with GAAP requires us to establish critical accounting policies and make accounting estimates, assumptions, and judgments that affect amounts recorded and reported in our financial statements. Note 1 of Notes to Consolidated Financial Statements included in our 2013 Form 10-K, as supplemented by this report, lists significant accounting policies we use in the development and presentation of our financial statements. This MD&A, the significant accounting policies, and other financial statement disclosures identify and address key variables and other qualitative and quantitative factors necessary for an understanding and evaluation of our company, financial position, results of operations, and cash flows.

An accounting estimate requires assumptions about uncertain matters that could have a material effect on the financial statements if a different amount within a range of estimates were used or if estimates changed from period to period. Estimates are made under facts and circumstances at a point in time, and changes in those facts and circumstances could produce results that significantly differ from when those estimates were made.

Our most significant accounting estimates relate to our ACL, income taxes and deferred tax assets, and fair value measurements of investment securities, goodwill, pension, and other real estate owned. These significant accounting estimates and their related application are discussed in our 2013 Form 10-K.

Recent Accounting Pronouncements and Developments

Note 2 of the Notes to Unaudited Condensed Consolidated Financial Statements discusses new accounting pronouncements adopted during 2014 and the expected impact of accounting pronouncements recently issued but not yet required to be adopted. To the extent the adoption of new accounting standards materially affect financial condition, results of operations, or liquidity, the impacts are discussed in the applicable section of this MD&A and the Notes to Unaudited Condensed Consolidated Financial Statements.

Huntington Bancshares Incorporated

Notes to Unaudited Condensed Consolidated Financial Statements

1. BASIS OF PRESENTATION

The accompanying Unaudited Condensed Consolidated Financial Statements of Huntington reflect all adjustments consisting of normal recurring accruals which are, in the opinion of Management, necessary for a fair presentation of the consolidated financial position, the results of operations, and cash flows for the periods presented. These Unaudited Condensed Consolidated Financial Statements have been prepared according to the rules and regulations of the SEC and, therefore, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with GAAP have been omitted. The Notes to Consolidated Financial Statements appearing in Huntington s Form 8-K filed on May 28, 2014, which include descriptions of significant accounting policies, as updated by the information contained in this report, should be read in conjunction with these interim financial statements.

For statement of cash flows purposes, cash and cash equivalents are defined as the sum of Cash and due from banks which includes amounts on deposit with the Federal Reserve and Federal funds sold and securities purchased under resale agreements.

In conjunction with applicable accounting standards, all material subsequent events have been either recognized in the Unaudited Condensed Consolidated Financial Statements or disclosed in the Notes to Unaudited Condensed Consolidated Financial Statements.

2. ACCOUNTING STANDARDS UPDATE

ASU 2013-11 Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. The ASU requires that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. However, unrecognized tax benefits should be presented in the financial statements as a liability and should not be combined with deferred tax assets in circumstances where availability or legal requirement and intent to settle additional incomes taxes is not met. The amendments were applied prospectively and were effective for interim and annual reporting periods beginning January 1, 2014. The amendments did not have a material impact to Huntington s Unaudited Condensed Consolidated Financial Statements.

ASU 2014-01 Investments (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects.

The amendments in ASU 2014-01 permit entities to make an accounting policy election to account for investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity recognizes the net investment performance in the income statement as a component of income tax expense (benefit). Huntington elected to early adopt the amended guidance during the first quarter of 2014. The guidance was applied retrospectively to all prior periods presented. The adoption resulted in an immaterial adjustment reducing retained earnings at the beginning of 2010. The impact to current period net income was not material. See discussion on Low Income Housing Tax Credit Partnerships in Note 16 for further information on this topic.

ASU 2014-04 Receivables (Topic 310): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. The ASU clarifies that an in substance repossession or foreclosure occurs upon either the creditor obtaining legal title to the residential real estate property or the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. The amendments are effective for annual periods, and interim reporting periods within those annual periods, beginning after December 15, 2014. The amendments may be adopted using either a modified retrospective transition method or a prospective transition method. Management does not believe the amendments will have a material impact to Huntington s Unaudited Condensed Consolidated Financial Statements.

ASU 2014-09 Revenue from Contracts with Customers (Topic 606): The amendments in ASU 2014-09 supersede the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific guidance. The general principle of the amendments require an entity to recognize revenue upon the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance sets forth a five step approach to be utilized for revenue recognition. The amendments are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Management is currently assessing the impact to Huntington s Unaudited Condensed Consolidated Financial Statements.

66

ASU 2014-11 Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The amendments in the ASU require repurchase-to-maturity transactions to be recorded and accounted for as secured borrowings. Amendments to Topic 860 also require separate accounting for a transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty (i.e., a repurchase financing), which will result in secured borrowing accounting for the repurchase agreement, as well as additional required disclosures. The accounting amendments and disclosures are effective for interim and annual periods beginning after December 15, 2014. The disclosures for repurchase agreements, securities lending transactions, and repurchase-to-maturity transactions accounted for as secured borrowings are required to be presented for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. Management is currently assessing the impact to Huntington s Unaudited Condensed Consolidated Financial Statements.

ASU 2014-12 Compensation Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. The amendments require that a performance target that affects vesting, and that could be achieved after the requisite service period, be treated as a performance condition. Specifically, if the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The amendments are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Management is currently assessing the impact to Huntington s Unaudited Condensed Consolidated Financial Statements.

ASU 2014-13 Consolidation (Topic 810): Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity The amendments allow a reporting entity that consolidates a collateralized financing entity within the scope of the guidance to elect to measure the financial assets and the financial liabilities of that collateralized financing entity using the measurement alternative. Under the measurement alternative, the reporting entity should measure both the financial assets and the financial liabilities of that collateralized financing entity in its consolidated financial statements using the more observable of the fair value of the financial assets and the fair value of the financial liabilities. The amendments are effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015. Management does not believe the amendments will have a material impact to Huntington s Unaudited Condensed Consolidated Financial Statements.

ASU 2014-14 Receivables Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure. The amendments require a mortgage loan to be derecognized and a separate receivable to be recognized upon foreclosure if the loan has a government guarantee that is non-separable from the loan before foreclosure, the creditor has the ability and intent to convey the real estate property to the guarantor, and any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Additionally, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor upon foreclosure. The amendments are effective for annual periods and interim periods within those annual periods beginning after December 15, 2014. Management does not believe the amendments will have a material impact to Huntington's Unaudited Condensed Consolidated Financial Statements.

3. LOANS / LEASES AND ALLOWANCE FOR CREDIT LOSSES

Loans and leases for which Huntington has the intent and ability to hold for the foreseeable future, or until maturity or payoff, are classified in the Unaudited Condensed Consolidated Balance Sheets as loans and leases. Except for loans which are accounted for at fair value, loans and leases are carried at the principal amount outstanding, net of unamortized deferred loan origination fees and costs and net of unearned income. At September 30, 2014, and December 31, 2013, the aggregate amount of these net unamortized deferred loan origination fees and costs, net of premiums or discounts, and net unearned income was \$171.1 million and \$192.9 million, respectively.

67

Loan and Lease Portfolio Composition

The following table provides a detailed listing of Huntington s loan and lease portfolio at September 30, 2014 and December 31, 2013:

(dollar amounts in thousands)	September 30, 2014	December 31, 2013
Loans and leases:		
Commercial and industrial	\$ 18,790,592	\$ 17,594,276
Commercial real estate	4,990,424	4,850,094
Automobile	8,321,630	6,638,713
Home equity	8,436,278	8,336,318
Residential mortgage	5,787,567	5,321,088
Other consumer	396,883	380,011
Loans and leases	46,723,374	43,120,500
Allowance for loan and lease losses	(631,036)	(647,870)
Net loans and leases	\$ 46,092,338	\$ 42,472,630

As shown in the table above, the primary loan and lease portfolios are: C&I, CRE, automobile, home equity, residential mortgage, and other consumer. For ACL purposes, these portfolios are further disaggregated into classes. The classes within each portfolio are as follows:

Portfolio	Class
Commercial and industrial	Owner occupied
	Purchased credit-impaired
	Other commercial and industrial
Commercial real estate	Retail properties
	Multi family
	Office
	Industrial and warehouse
	Purchased credit-impaired
	Other commercial real estate
Automobile	NA (1)
Home equity	Secured by first-lien
	Secured by junior-lien
Residential mortgage	Residential mortgage
	Purchased credit-impaired
Other consumer	Other consumer
	Purchased credit-impaired

(1) Not applicable. The automobile loan portfolio is not further segregated into classes.

Camco Financial acquisition

On March 1, 2014, Huntington completed its acquisition of Camco Financial in a stock and cash transaction valued at \$109.5 million. Loans with a fair value of \$559.4 million were transferred to Huntington. These loans were recorded at fair value in accordance with applicable accounting guidance, ASC 805. The fair values for the loans were estimated using discounted cash flow analyses using interest rates currently being offered for loans with similar terms (Level 3), and reflected an estimate of probable losses and the credit risk associated with the loans.

68

Purchased Credit-Impaired Loans

Purchased loans with evidence of deterioration in credit quality since origination for which it is probable at acquisition that we will be unable to collect all contractually required payments are considered to be credit impaired. Purchased credit-impaired loans are initially recorded at fair value, which is estimated by discounting the cash flows expected to be collected at the acquisition date. Because the estimate of expected cash flows reflects an estimate of future credit losses expected to be incurred over the life of the loans, an allowance for credit losses is not recorded at the acquisition date. The excess of cash flows expected at acquisition over the estimated fair value, referred to as the accretable yield, is recognized in interest income over the remaining life of the loan, or pool of loans, on a level-yield basis. The difference between the contractually required payments at acquisition and the cash flows expected to be collected at acquisition is referred to as the nonaccretable difference. A subsequent decrease in the estimate of cash flows expected to be received on purchased credit-impaired loans generally results in the recognition of an allowance for credit losses. Subsequent increases in cash flows result in reversal of any nonaccretable difference (or allowance for loan and lease losses to the extent any has been recorded) with a positive impact on interest income subsequently recognized. The measurement of cash flows involves assumptions and judgments for interest rates, prepayments, default rates, loss severity, and collateral values. All of these factors are inherently subjective and significant changes in the cash flow estimates over the life of the loan can result.

The following table reflects the contractually required payments receivable, cash flows expected to be collected, and fair value of the credit impaired Camco Financial loans at acquisition date:

(dollar amounts in thousands)	March 1, 2014
Contractually required payments including interest	\$ 14,363
Less: nonaccretable difference	(11,234)
Cash flows expected to be collected	3,129
Less: accretable yield	(143)
Fair value of credit impaired loans acquired	\$ 2,986

The following table presents a rollforward of the accretable yield for purchased credit impaired loans by acquisition for the three-month and nine-month periods ended September 30, 2014 and 2013:

(dellar amounts in the areas de)	Three Mon September 2014		Nine Mont September 2014		
(dollar amounts in thousands) Fidelity Bank	2014	2015	2014	2013	
Balance, beginning of period Additions	\$ 24,596	\$ 32,705	\$ 27,995	\$ 23,251	
Accretion	(3,070)	(4,605)	(10,722)	(11,705)	
Reclassification from (to) nonaccretable difference	(6)	1,152	4,247	17,706	
Balance, end of period	\$ 21,520	\$ 29,252	\$ 21,520	\$ 29,252	
Camco Financial					
Balance, beginning of period	\$ 154	\$	\$	\$	
Impact of acquisition/purchase on March 1, 2014			143

Accretion	(153)		(5,335)		
Reclassification from nonaccretable difference	816		6,009		
Balance, end of period	\$ 817	\$	\$ 817	\$	

69

The allowance for loan losses recorded on the purchased credit-impaired loan portfolio at September 30, 2014 and December 31, 2013 was \$3.2 million and \$2.4 million, respectively. The following table reflects the ending and unpaid balances of all contractually required payments and carrying amounts of the acquired loans by acquisition at September 30, 2014 and December 31, 2013:

NALs and Past Due Loans												

Loans are considered past due when the contractual amounts due with respect to principal and interest are not received within 30 days of the contractual due date.

Any loan in any portfolio may be placed on nonaccrual status prior to the policies described below when collection of principal or interest is in doubt. When a borrower with debt is discharged in a Chapter 7 bankruptcy and not reaffirmed by the borrower, the loan is determined to be collateral dependent and placed on nonaccrual status.

All classes within the C&I and CRE portfolios (except for purchased credit-impaired loans) are placed on nonaccrual status at 90-days past due. Residential mortgage loans are placed on nonaccrual status at 150-days past due, with the exception of residential mortgages guaranteed by government organizations which continue to accrue interest at the rate guaranteed by the government agency. First-lien home equity loans are placed on nonaccrual status at 150-days past due. Junior-lien home equity loans are placed on nonaccrual status at the earlier of 120-days past due or when the related first-lien loan has been identified as nonaccrual. Automobile and other consumer loans are generally charged-off when the loan is 120-days past due.

For all classes within all loan portfolios, when a loan is placed on nonaccrual status, any accrued interest income is reversed with current year accruals charged to interest income, and prior year amounts charged-off as a credit loss.

For all classes within all loan portfolios, cash receipts received on NALs are applied entirely against principal until the loan or lease has been collected in full, after which time any additional cash receipts are recognized as interest income. However, for secured non-reaffirmed debt in a Chapter 7 bankruptcy, payments are applied to principal and interest when the borrower has demonstrated a capacity to continue payment of the debt and collection of the debt is reasonably assured. For unsecured non-reaffirmed debt in a Chapter 7 bankruptcy where the carrying value has been fully charged-off, payments are recorded as loan recoveries.

Regarding all classes within the C&I and CRE portfolios, the determination of a borrower s ability to make the required principal and interest payments is based on an examination of the borrower s current financial statements, industry, management capabilities, and other qualitative measures. For all classes within the consumer loan portfolio, the determination of a borrower s ability to make the required principal and interest payments is based on multiple factors, including number of days past due and, in some instances, an evaluation of the borrower s financial condition. When, in Management s judgment, the borrower s ability to make required principal and interest payments resumes and collectability is no longer in doubt, the loan or lease is returned to accrual status. For these loans that have been returned to accrual status, cash receipts are applied according to the contractual terms of the loan.

The following table presents NALs by loan class at September 30, 2014 and December 31, 2013:

- (1) NALs are included in this aging analysis based on the loan s past due status.
- (2) All amounts represent accruing purchased impaired loans related to acquisitions. Under the applicable accounting guidance (ASC 310-30), the loans were recorded at fair value upon acquisition and remain in accruing status.
- (3) Includes \$54,778 thousand guaranteed by the U.S. government.
- (4) Includes \$87,985 thousand guaranteed by the U.S. government.

Allowance for Credit Losses

Huntington maintains two reserves, both of which reflect Management s judgment regarding the appropriate level necessary to absorb credit losses inherent in our loan and lease portfolio: the ALLL and the AULC. Combined, these reserves comprise the total ACL. The determination of the ACL requires significant estimates, including the timing and amounts of expected future cash flows on impaired loans and leases, consideration of current economic conditions, and historical loss experience pertaining to pools of homogeneous loans and leases, all of which may be susceptible to change.

The appropriateness of the ACL is based on Management s current judgments about the credit quality of the loan portfolio. These judgments consider on-going evaluations of the loan and lease portfolio, including such factors as the differing economic risks associated with each loan category, the financial condition of specific borrowers, the level of delinquent loans, the value of any collateral and, where applicable, the existence of any guarantees or other documented support. Further, Management evaluates the impact of changes in interest rates and overall economic conditions on the ability of borrowers to meet their financial obligations when quantifying our exposure to credit losses and assessing the appropriateness of our ACL at each reporting date. In addition to general economic conditions and the other factors described above, additional factors also considered include: the impact of increasing or decreasing residential real estate values; the diversification of CRE loans; the development of new or expanded Commercial business segments such as healthcare, ABL, and energy, and the overall condition of the manufacturing industry. Also, the ACL determination includes the on-going assessment of credit quality metrics, and a comparison of certain ACL benchmarks to current performance. Management s determinations regarding the appropriateness of the ACL are reviewed and approved by the Company s board of directors.

The ALLL consists of two components: (1) the transaction reserve, which includes a loan level allocation, specific reserves related to loans considered to be impaired, and loans involved in troubled debt restructurings, and (2) the general reserve. The transaction reserve component includes both (1) an estimate of loss based on pools of commercial and consumer loans and leases with similar characteristics and (2) an estimate of loss based on an impairment review of each impaired C&I and CRE loan greater than \$1.0 million. For the C&I and CRE portfolios, the estimate of loss based on pools of loans and leases with similar characteristics is made by applying a PD factor and a LGD factor to each individual loan based on a regularly updated loan grade, using a standardized loan grading system. The PD factor and an LGD factor are determined for each loan grade using statistical models based on historical performance data. The PD factor considers on-going reviews of the financial performance of the specific borrower, including cash flow, debt-service coverage ratio, earnings power, debt level, and equity position, in conjunction with an assessment of the borrower s industry and future prospects. The LGD factor considers analysis of the type of collateral and the relative LTV ratio. These reserve factors are developed based on credit migration models that track historical movements of loans between loan ratings over time and a combination of long-term average loss experience of our own portfolio and external industry data using a 24-month emergence period.

In the case of more homogeneous portfolios, such as automobile loans, home equity loans, and residential mortgage loans, the determination of the transaction reserve also incorporates PD and LGD factors. The estimate of loss is based on pools of loans and leases with similar characteristics. The PD factor considers current credit scores unless the account is delinquent, in which case a higher PD factor is used. The credit score provides a basis for understanding the borrower s past and current payment performance, and this information is used to estimate expected losses over the 12-month emergence period. The performance of first-lien loans ahead of our junior-lien loans is available to use as part of our updated score process. The LGD factor considers analysis of the type of collateral and the relative LTV ratio. Credit scores, models, analyses, and other factors used to determine both the PD and LGD factors are updated frequently to capture the recent behavioral characteristics of the subject portfolios, as well as any changes in loss mitigation or credit origination strategies, and adjustments to the reserve factors are made as required. Models utilized in the ALLL estimation process are subject to the Company s model validation policies.

The general reserve consists of the economic reserve and risk-profile reserve components. The economic reserve component considers the potential impact of changing market and economic conditions on portfolio performance. The risk-profile component considers items unique to our structure, policies, processes, and portfolio composition, as well as qualitative measurements and assessments of the loan portfolios including, but not limited to, management quality, concentrations, portfolio composition, industry comparisons, and internal review functions.

The estimate for the AULC is determined using the same procedures and methodologies as used for the ALLL. The loss factors used in the AULC are the same as the loss factors used in the ALLL while also considering a historical utilization of unused commitments. The AULC is reflected in accrued expenses and other liabilities in the Unaudited Condensed Consolidated Balance Sheet.

The ACL is increased through a provision for credit losses that is charged to earnings, based on Management s quarterly evaluation of the factors previously mentioned, and is reduced by charge-offs, net of recoveries, and the ACL associated with securitized or sold loans. There were no material changes in assumptions or estimation techniques compared with prior periods that impacted the determination of the current period s ALLL and AULC.

Any loan in any portfolio may be charged-off prior to the policies described below if a loss confirming event has occurred. Loss confirming events include, but are not limited to, bankruptcy (unsecured), continued delinquency, foreclosure, or receipt of an asset valuation indicating a collateral deficiency and that asset is the sole source of repayment. Additionally, discharged, collateral dependent non-reaffirmed debt in Chapter 7 bankruptcy filings will result in a charge-off to estimated collateral value, less anticipated selling costs.

C&I and CRE loans are either charged-off or written down to net realizable value at 90-days past due. Automobile loans and other consumer loans are charged-off at 120-days past due. First-lien and junior-lien home equity loans are charged-off to the estimated fair value of the collateral, less anticipated selling costs, at 150-days past due and 120-days past due, respectively. Residential mortgages are charged-off to the estimated fair value of the collateral, less anticipated selling costs, at 150-days past due.

Credit Quality Indicators

To facilitate the monitoring of credit quality for C&I and CRE loans, and for purposes of determining an appropriate ACL level for these loans, Huntington utilizes the following categories of credit grades:

Pass - Higher quality loans that do not fit any of the other categories described below.

OLEM - The credit risk may be relatively minor yet represent a risk given certain specific circumstances. If the potential weaknesses are not monitored or mitigated, the loan may weaken or the collateral may be inadequate to protect Huntington s position in the future. For these reasons, Huntington considers the loans to be potential problem loans.

Substandard - Inadequately protected loans by the borrower's ability to repay, equity, and/or the collateral pledged to secure the loan. These loans have identified weaknesses that could hinder normal repayment or collection of the debt. It is likely Huntington will sustain some loss if any identified weaknesses are not mitigated.

Doubtful - Loans that have all of the weaknesses inherent in those loans classified as Substandard, with the added elements of the full collection of the loan is improbable and that the possibility of loss is high.

The categories above, which are derived from standard regulatory rating definitions, are assigned upon initial approval of the loan or lease and subsequently updated as appropriate.

Commercial loans categorized as OLEM, Substandard, or Doubtful are considered Criticized loans. Commercial loans categorized as Substandard or Doubtful are also considered Classified loans.

For all classes within all consumer loan portfolios, each loan is assigned a specific PD factor that is partially based on the borrower s most recent credit bureau score, which we update quarterly. A credit bureau score is a credit score developed by Fair Isaac Corporation based on data provided by the credit bureaus. The credit bureau score is widely accepted as the standard measure of consumer credit risk used by lenders, regulators, rating agencies, and consumers. The higher the credit bureau score, the higher likelihood of repayment and therefore, an indicator of higher credit quality.

Huntington assesses the risk in the loan portfolio by utilizing numerous risk characteristics. The classifications described above, and also presented in the table below, represent one of those characteristics that are closely monitored in the overall credit risk management processes.

The following table presents each loan and lease class by credit quality indicator at September 30, 2014 and December 31, 2013:

Impaired Loans

For all classes within the C&I and CRE portfolios, all loans with an outstanding balance of \$1.0 million or greater are considered for individual evaluation on a quarterly basis for impairment. Generally, consumer loans within any class are not individually evaluated on a regular basis for impairment. All TDRs, regardless of the outstanding balance amount, are also considered to be impaired. Loans acquired with evidence of deterioration of credit quality since origination for which it is probable at acquisition that all contractually required payments will not be collected are also considered to be impaired.

Once a loan has been identified for an assessment of impairment, the loan is considered impaired when, based on current information and events, it is probable that all amounts due according to the contractual terms of the loan agreement will not be collected. This determination requires significant judgment and use of estimates, and the eventual outcome may differ significantly from those estimates.

When a loan in any class has been determined to be impaired, the amount of the impairment is measured using the present value of expected future cash flows discounted at the loan s effective interest rate or, as a practical expedient, the observable market price of the loan, or the fair value of the collateral, less anticipated selling costs, if the loan is collateral dependent. When the present value of expected future cash flows is used, the effective interest rate is the original contractual interest rate of the loan adjusted for any premium or discount. A specific reserve is established as a component of the ALLL when a commercial loan has been determined to be impaired. Subsequent to the initial measurement of impairment, if there is a significant change to the impaired loan s expected future cash flows, or if actual cash flows are significantly different from the cash flows previously estimated, Huntington recalculates the impairment and appropriately adjusts the specific reserve. Similarly, if Huntington measures impairment based on the observable market price of an impaired loan or the fair value of the collateral of an impaired collateral dependent loan, Huntington will adjust the specific reserve. The consumer portfolios are assessed on a pooled basis using a discounted cash flow basis.

When a loan within any class is impaired, the accrual of interest income is discontinued unless the receipt of principal and interest is no longer in doubt. Interest income on TDRs is accrued when all principal and interest is expected to be collected under the post-modification terms. Cash receipts received on nonaccruing impaired loans within any class are generally applied entirely against principal until the loan has been collected in full, after which time any additional cash receipts are recognized as interest income. Cash receipts received on accruing impaired loans within any class are applied in the same manner as accruing loans that are not considered impaired.

79

⁽¹⁾ These tables do not include loans fully charged-off.

⁽²⁾ All automobile, home equity, residential mortgage, and other consumer impaired loans included in these tables are considered impaired due to their status as a TDR.

⁽³⁾ At September 30, 2014, \$59,078 thousand of the \$188,719 thousand commercial and industrial loans with an allowance recorded were considered impaired due to their status as a TDR. At December 31, 2013, \$43,805 thousand of the \$126,626 thousand commercial and industrial loans with an allowance recorded were considered impaired due to their status as a TDR.

⁽⁴⁾ At September 30, 2014, \$30,519 thousand of the \$224,550 thousand commercial real estate loans with an allowance recorded were considered impaired due to their status as a TDR. At December 31, 2013, \$24,805 thousand of the \$187,836 thousand commercial real estate loans with an allowance recorded were considered impaired due to their status as a TDR.

⁽⁵⁾ The differences between the ending balance and unpaid principal balance amounts represent partial charge-offs.

83

(6) At September 30, 2014, \$27,388 thousand of the \$379,553 thousand residential mortgages loans with an allowance recorded were guaranteed by the U.S. government. At December 31, 2013, \$49,225 thousand of the \$390,435 thousand residential mortgage loans with an allowance recorded were guaranteed by the U.S. government.

TDR Loans

TDRs are modified loans where a concession was provided to a borrower experiencing financial difficulties. Loan modifications are considered TDRs when the concessions provided are not available to the borrower through either normal channels or other sources. However, not all loan modifications are TDRs.

TDR Concession Types

The Company s standards relating to loan modifications consider, among other factors, minimum verified income requirements, cash flow analysis, and collateral valuations. Each potential loan modification is reviewed individually and the terms of the loan are modified to meet a borrower s specific circumstances at a point in time. All commercial TDRs are reviewed and approved by our SAD. The types of concessions provided to borrowers include:

Interest rate reduction: A reduction of the stated interest rate to a nonmarket rate for the remaining original life of the debt.

Amortization or maturity date change beyond what the collateral supports, including any of the following:

- (1) Lengthens the amortization period of the amortized principal beyond market terms. This concession reduces the minimum monthly payment and increases the amount of the balloon payment at the end of the term of the loan. Principal is generally not forgiven.
- (2) Reduces the amount of loan principal to be amortized and increases the amount of the balloon payment at the end of the term of the loan. This concession also reduces the minimum monthly payment. Principal is generally not forgiven.
- (3) Extends the maturity date or dates of the debt beyond what the collateral supports. This concession generally applies to loans without a balloon payment at the end of the term of the loan.

Chapter 7 bankruptcy: A bankruptcy court s discharge of a borrower s debt is considered a concession when the borrower does not reaffirm the discharged debt.

Other: A concession that is not categorized as one of the concessions described above. These concessions include, but are not limited to: principal forgiveness, collateral concessions, covenant concessions, and reduction of accrued interest.

Principal forgiveness may result from any TDR modification of any concession type. However, the aggregate amount of principal forgiven as a result of loans modified as TDRs during the three-month and nine-month periods ended September 30, 2014 and 2013, was not significant.

Following is a description of TDRs by the different loan types:

<u>Commercial loan TDRs</u> Commercial accruing TDRs often result from loans receiving a concession with terms that are not considered a market transaction to Huntington. The TDR remains in accruing status as long as the customer is less than 90-days past due on payments per the restructured loan terms and no loss is expected.

Commercial nonaccrual TDRs result from either: (1) an accruing commercial TDR being placed on nonaccrual status, or (2) a workout where an existing commercial NAL is restructured and a concession was given. At times, these workouts restructure the NAL so that two or more new notes are created. The primary note is underwritten based upon our normal underwriting standards and is sized so projected cash flows are sufficient to repay contractual principal and interest. The terms on the secondary note(s) vary by situation, and may include notes that defer principal and interest payments until after the primary note is repaid. Creating two or more notes often allows the borrower to continue a project or weather a temporary economic downturn and allows Huntington to right-size a loan based upon the current expectations for a borrower s or project s performance.

Our strategy involving TDR borrowers includes working with these borrowers to allow them to refinance elsewhere, as well as allow them time to improve their financial position and remain our customer through refinancing their notes according to market terms and conditions in the future. A subsequent refinancing or modification of a loan may occur when either the loan matures according to the terms of the TDR-modified agreement or the borrower requests a change to the loan agreements. At that time, the loan is evaluated to determine if it is creditworthy. It is subjected to the normal underwriting standards and processes for other similar credit extensions, both new and existing. The refinanced note is evaluated to determine if it is considered a new loan or a continuation of the prior loan. A new loan is considered for removal of the TDR designation, whereas a continuation of the prior note requires a continuation of the TDR designation. In order for a TDR designation to be removed, the borrower must no longer be experiencing financial difficulties and the terms of the refinanced loan must not represent a concession.

Residential Mortgage loan TDRs Residential mortgage TDRs represent loan modifications associated with traditional first-lien mortgage loans in which a concession has been provided to the borrower. The primary concessions given to residential mortgage borrowers are amortization or maturity date changes and interest rate reductions. Residential mortgages identified as TDRs involve borrowers unable to refinance their mortgages through the Company s normal mortgage origination channels or through other independent sources. Some, but not all, of the loans may be delinquent.

<u>Automobile, Home Equity, and Other Consumer loan TDRs</u> The Company may make similar interest rate, term, and principal concessions as with residential mortgage loan TDRs.

TDR Impact on Credit Quality

Huntington s ALLL is largely determined by updated risk ratings assigned to commercial loans, updated borrower credit scores on consumer loans, and borrower delinquency history in both the commercial and consumer portfolios. These updated risk ratings and credit scores consider the default history of the borrower, including payment redefaults. As such, the provision for credit losses is impacted primarily by changes in borrower payment performance rather than the TDR classification. TDRs can be classified as either accrual or nonaccrual loans. Nonaccrual TDRs are included in NALs whereas accruing TDRs are excluded from NALs as it is probable that all contractual principal and interest due under the restructured terms will be collected.

Our TDRs may include multiple concessions and the disclosure classifications are presented based on the primary concession provided to the borrower. The majority of our concessions for the C&I and CRE portfolios are the extension of the maturity date coupled with an increase in the interest rate. In these instances, the primary concession is the maturity date extension.

TDR concessions may also result in the reduction of the ALLL within the C&I and CRE portfolios. This reduction is derived from payments and the resulting application of the reserve calculation within the ALLL. The transaction reserve for non-TDR C&I and CRE loans is calculated based upon several estimated probability factors, such as PD and LGD, both of which were previously discussed. Upon the occurrence of a TDR in our C&I and CRE portfolios, the reserve is measured based on discounted expected cash flows or collateral value, less anticipated selling costs, of the modified loan in accordance with ASC 310-10. The resulting TDR ALLL calculation often results in a lower ALLL amount because (1) the discounted expected cash flows or collateral value, less anticipated selling costs, indicate a lower estimated loss, (2) if the modification includes a rate increase, the discounting of the cash flows on the modified loan, using the pre-modification interest rate, exceeds the carrying value of the loan, or (3) payments may occur as part of the modification. The ALLL for C&I and CRE loans may increase as a result of the modification, as the discounted cash flow analysis may indicate additional reserves are required.

TDR concessions on consumer loans may increase the ALLL. The concessions made to these borrowers often include interest rate reductions, and therefore, the TDR ALLL calculation results in a greater ALLL compared with the non-TDR calculation as the reserve is measured based on the estimation of the discounted expected cash flows or collateral value, less anticipated selling costs, on the modified loan in accordance with ASC 310-10. The resulting TDR ALLL calculation often results in a higher ALLL amount because (1) the discounted expected cash flows or collateral value, less anticipated selling costs, indicate a higher estimated loss or, (2) due to the rate decrease, the discounting of the cash flows on the modified loan, using the pre-modification interest rate, indicates a reduction in the expected cash flows or collateral value, less anticipated selling costs. In certain instances, the ALLL may decrease as a result of payments made in connection with the modification.

<u>Commercial loan TDRs</u> In instances where the bank substantiates that it will collect its outstanding balance in full, the note is considered for return to accrual status upon the borrower sustaining sufficient cash flows for a six-month period of time. This six-month period could extend before or after the restructure date. If a charge-off was taken as part of the restructuring, any interest or principal payments received on that note are applied to first reduce the bank soutstanding book balance and then to recoveries of charged-off principal, unpaid interest, and/or fee expenses while the TDR is in nonaccrual status.

<u>Residential Mortgage, Automobile, Home Equity, and Other Consumer loan TDRs</u> Modified loans identified as TDRs are aggregated into pools for analysis. Cash flows and weighted average interest rates are used to calculate impairment at the pooled-loan level. Once the loans are aggregated into the pool, they continue to be classified as TDRs until contractually repaid or charged-off.

Residential mortgage loans not guaranteed by a U.S. government agency such as the FHA, VA, and the USDA, including TDR loans, are reported as accrual or nonaccrual based upon delinquency status. Nonaccrual TDRs are those that are greater than 150-days contractually past due. Loans guaranteed by U.S. government organizations continue to accrue interest upon delinquency.

The following tables present by class and by the reason for the modification, the number of contracts, post-modification outstanding balance, and the financial effects of the modification for the three-month and nine-month periods ended September 30, 2014 and 2013:

\$ 7,308,753

- (1) On May 20, 2014 approximately \$208.2 million of municipal equipment finance instruments were acquired.
- (2) Effective December 31, 2013 approximately \$600.4 million of direct purchase municipal instruments were reclassified from C&I loans to available-for-sale securities.

95

At September 30, 2014, the carrying value of investment securities pledged to secure public and trust deposits, trading account liabilities, U.S. Treasury demand notes, and security repurchase agreements totaled \$3.6 billion. There were no securities of a single issuer, which are not governmental or government-sponsored, that exceeded 10% of shareholders equity at September 30, 2014.

The following tables provide detail on investment securities with unrealized losses aggregated by investment category and the length of time the individual securities have been in a continuous loss position, at September 30, 2014 and December 31, 2013:

Collateralized Debt Obligations and Private-Label CMO Securities

Our highest risk segments of our investment portfolio are the CDO and 2003-2006 vintage private-label CMO portfolios. Of the \$43.7 million of the private-label CMO securities reported at fair value at September 30, 2014, approximately \$20.4 million are rated below investment grade. The CDOs are in the asset-backed securities portfolio. These segments are in run off, and we have not purchased these types of securities since 2008. The performance of the underlying securities in each of these segments reflects the deterioration of CDO issuers and 2003-2006 non-agency mortgages. Each of these securities in these two segments is subjected to a rigorous review of its projected cash flows. These reviews are supported with analysis from independent third parties.

The fair values of the private label CMO and CDO assets have been impacted by various market conditions. The unrealized losses were primarily the result of wider liquidity spreads on asset-backed securities and increased market volatility on non-agency mortgage and asset-backed securities that are collateralized by certain mortgage loans. In addition, the expected average lives of the asset-backed securities backed by trust-preferred securities have been extended, due to changes in the expectations of when the underlying securities would be repaid. The contractual terms and / or cash flows of the investments do not permit the issuer to settle the securities at a price less than the amortized cost. Huntington does not intend to sell, nor does it believe it will be required to sell these securities until the fair value is recovered, which may be maturity and; therefore, does not consider them to be other-than-temporarily impaired at September 30, 2014.

The following table summarizes the relevant characteristics of our CDO securities portfolio, which are included in asset-backed securities, at September 30, 2014. Each security is part of a pool of issuers and supports a more senior tranche of securities except for the I-Pre TSL II, and MM Comm III securities which are the most senior class.

- (1) Security was determined to have OTTI. As such, the book value is net of recorded credit impairment.
- (2) The majority of securities have been in a continuous loss position for 12 months or longer.
- (3) For purposes of comparability, the lowest credit rating expressed is equivalent to Fitch ratings even where the lowest rating is based on another nationally recognized credit rating agency.
- (4) Includes both banks and/or insurance companies.
- (5) Excess subordination percentage represents the additional defaults in excess of both current and projected defaults that the CDO can absorb before the bond experiences credit impairment. Excess subordinated percentage is calculated by (a) determining what percentage of defaults a deal can experience before the bond has credit impairment, and (b) subtracting from this default breakage percentage both total current and expected future default percentages.

97

Security Impairment

Huntington evaluated OTTI on the debt security types listed below.

Alt-A mortgage backed and private-label CMO securities are collateralized by first-lien residential mortgage loans. The securities are valued by a third party pricing specialist using a discounted cash flow approach and proprietary pricing model. The model uses inputs such as estimated prepayment speeds, losses, recoveries, default rates that are implied by the underlying performance of collateral in the structure or similar structures, discount rates that are implied by market prices for similar securities, collateral structure types, and house price depreciation / appreciation rates that are based upon macroeconomic forecasts. The remaining Alt-A mortgage backed securities were sold during the third quarter of 2014.

Collateralized Debt Obligations are backed by a pool of debt securities issued by financial institutions. The collateral generally consists of trust-preferred securities and subordinated debt securities issued by banks, bank holding companies, and insurance companies. A full cash flow analysis is used to estimate fair values and assess impairment for each security within this portfolio. A third party pricing specialist with direct industry experience in pooled-trust-preferred security evaluations is engaged to provide assistance estimating the fair value and expected cash flows on this portfolio. The full cash flow analysis is completed by evaluating the relevant credit and structural aspects of each pooled-trust-preferred security in the portfolio, including collateral performance projections for each piece of collateral in the security and terms of the security structure. The credit review includes an analysis of profitability, credit quality, operating efficiency, leverage, and liquidity using available financial and regulatory information for each underlying collateral issuer. The analysis also includes a review of historical industry default data, current/near term operating conditions, and the impact of macroeconomic and regulatory changes. Using the results of our analysis, we estimate appropriate default and recovery probabilities for each piece of collateral then estimate the expected cash flows for each security. The cumulative probability of default ranges from a low of 2.3% to 100%.

Many collateral issuers have the option of deferring interest payments on their debt for up to five years. For issuers who are deferring interest, assumptions are made regarding the issuers ability to resume interest payments and make the required principal payment at maturity; the cumulative probability of default for these issuers currently ranges from 31% to 100%, and a 10% recovery assumption. The fair value of each security is obtained by discounting the expected cash flows at a market discount rate, ranging from LIBOR plus 3.0% to LIBOR plus 13.0% as of September 30, 2014. The market discount rate is determined by reference to yields observed in the market for similarly rated collateralized debt obligations, specifically high-yield collateralized loan obligations. The relatively high market discount rate is reflective of the uncertainty of the cash flows and illiquid nature of these securities. The large differential between the fair value and amortized cost of some of the securities reflects the high market discount rate and the expectation that the majority of the cash flows will not be received until near the final maturity of the security (the final maturities range from 2032 to 2035).

On December 10, 2013, the Federal Reserve, the OCC, the FDIC, the CFTC and the SEC issued final rules to implement the Volcker Rule contained in section 619 of the Dodd-Frank Act, generally to become effective on July 21, 2015. The Volcker Rule prohibits an insured depository institution and its affiliates (referred to as banking entities) from: (i) engaging in proprietary trading and (ii) investing in or sponsoring certain types of funds (covered funds) subject to certain limited exceptions. These prohibitions impact the ability of U.S. banking entities to provide investment management products and services that are competitive with nonbanking firms generally and with non-U.S. banking organizations in overseas markets. The rule also effectively prohibits short-term trading strategies by any U.S. banking entity if those strategies involve instruments other than those specifically permitted for trading.

On January 14, 2014, the five federal agencies approved an interim final rule to permit banking entities to retain interests in certain collateralized debt obligations backed primarily by trust preferred securities from the investment prohibitions of section 619 of the Volcker Rule. Under the interim final rule, the agencies permit the retention of an interest in or sponsorship of covered funds by banking entities if certain qualifications are met. In addition, the agencies released a non-exclusive list of issuers that meet the requirements of the interim final rule. At September 30, 2014, we had investments in ten different pools of trust preferred securities. Eight of our pools are included in the list of non-exclusive issuers. We have analyzed the ICONS and I-Pre TSL II pools that were not included on the list and believe that it is more likely than not that we would not be required to sell and will be able to hold these securities to recovery under the final Volcker Rule regulations.

98

For the three-month and nine-month periods ended September 30, 2014 and 2013, the following table summarizes by security type the total OTTI losses recognized in the Unaudited Condensed Consolidated Statements of Income for securities evaluated for impairment as described above.

		onths Ended mber 30,]	e Months Ended ember 30,
(dollar amounts in thousands)	2014	2013	2014	2013
Available-for-sale and other securities:				
Pooled-trust-preferred		(86)		(1,466)
Private label CMO				(336)
Total debt securities		(86)		(1,802)
Equity securities				
Total available-for-sale and other securities	\$	\$ (86)	\$	\$ (1,802)

The following table rolls forward the OTTI recognized in earnings on debt securities held by Huntington for the three-month and nine-month periods ended September 30, 2014 and 2013 as follows:

	Three Mon September 30,	Nine Months Ended September 30,		
(dollar amounts in thousands)	2014	2013	2014	2013
Balance, beginning of period	\$ 30,869	\$ 49,851	\$ 30,869	\$ 49,433
Reductions from sales/maturities		(11,886)		(13,184)
Credit losses not previously recognized				
Additional credit losses		86		1,802
Balance, end of period	\$ 30,869	\$ 38,051	\$ 30,869	\$ 38,051

As of September 30, 2014, Management has evaluated all other investment securities with unrealized losses and all non-marketable securities for impairment and concluded no additional OTTI is required.

5. HELD-TO-MATURITY SECURITIES

These are debt securities that Huntington has the intent and ability to hold until maturity. The debt securities are carried at amortized cost and adjusted for amortization of premiums and accretion of discounts using the interest method.

Listed below are the contractual maturities (under 1 year, 1-5 years, 6-10 years, and over 10 years) of held-to-maturity securities at September 30, 2014 and December 31, 2013:

	Septembe	er 30, 2014	Decembe	r 31, 2013

Security Impairment

Huntington evaluates the held-to-maturity securities portfolio on a quarterly basis for impairment. Impairment would exist when the present value of the expected cash flows is not sufficient to recover the entire amortized cost basis at the balance sheet date. Under these circumstances, any impairment would be recognized in earnings. As of September 30, 2014, Management has evaluated held-to-maturity securities with unrealized losses for impairment and concluded no OTTI is required.

6. LOAN SALES AND SECURITIZATIONS

Residential Mortgage Loans

The following table summarizes activity relating to residential mortgage loans sold with servicing retained for the three-month and nine-month periods ended September 30, 2014 and 2013:

	Three Mor	nths Ended aber 30,	Nine Mon Septem	ths Ended aber 30,
(dollar amounts in thousands)	2014	2013	2014	2013
Residential mortgage loans sold with servicing retained	\$ 654,747	\$ 853,287	\$ 1,703,056	\$ 2,603,414
Pretax gains resulting from above loan sales (1)	16,781	23,224	43,853	91,519

(1) Recorded in mortgage banking income.

A MSR is established only when the servicing is contractually separated from the underlying mortgage loans by sale or securitization of the loans with servicing rights retained. At initial recognition, the MSR asset is established at its fair value using assumptions consistent with assumptions used to estimate the fair value of existing MSRs. At the time of initial capitalization, MSRs may be recorded using either the fair value method or the amortization method. The election of the fair value method or amortization method is made at the time each servicing class is established. Subsequently, servicing rights are accounted for based on the methodology chosen for each respective servicing class. Any increase or decrease in the fair value of MSRs carried under the fair value method, as well as amortization or impairment of MSRs recorded using the amortization method, during the period is recorded as an increase or decrease in mortgage banking income, which is reflected in noninterest income in the Unaudited Condensed Consolidated Statements of Income.

The following tables summarize the changes in MSRs recorded using either the fair value method or the amortization method for the three-month and nine-month periods ended September 30, 2014 and 2013:

Fair Value Method:	Three Months Ended September 30,		Nine Months Ended September 30,	
(dollar amounts in thousands)	2014	2013	2014	2013
Fair value, beginning of period	\$ 26,747	\$ 37,544	\$ 34,236	\$ 35,202
Change in fair value during the period due to:				
Time decay (1)	(467)	(727)	(1,848)	(1,961)
Payoffs (2)	(1,343)	(3,015)	(4,869)	(9,774)
Changes in valuation inputs or assumptions (3)	501	304	(2,081)	10,639
Fair value, end of period:	\$ 25,438	\$ 34,106	\$ 25,438	\$ 34,106
Weighted-average life (years)	5.2	4.1	5.2	4.1

Represents decrease in value due to passage of time, including the impact from both regularly scheduled loan principal payments and partial loan paydowns.

- (2) Represents decrease in value associated with loans that paid off during the period.
- (3) Represents change in value resulting primarily from market-driven changes in interest rates and prepayment speeds.

101

•	,	,	,	,	
Weighted-average life (years)	6.7	6.3	6.7	6.3	

MSRs do not trade in an active, open market with readily observable prices. While sales of MSRs occur, the precise terms and conditions are typically not readily available. Therefore, the fair value of MSRs is estimated using a discounted future cash flow model. The model considers portfolio characteristics, contractually specified servicing fees and assumptions related to prepayments, delinquency rates, late charges, other ancillary revenues, costs to service, and other economic factors. Changes in the assumptions used may have a significant impact on the valuation of MSRs.

MSR values are very sensitive to movements in interest rates as expected future net servicing income depends on the projected outstanding principal balances of the underlying loans, which can be greatly impacted by the level of prepayments. Huntington hedges the value of certain MSRs against changes in value attributable to changes in interest rates using a combination of derivative instruments and trading securities.

For MSRs under the fair value method, a summary of key assumptions and the sensitivity of the MSR value at September 30, 2014 and December 31, 2013, to changes in these assumptions follows:

	Sep	September 30, 2014			December 31, 2013		
		Decline in fair value due to			Decline in fair va		
		10%	20%		10%	20%	
		adverse	adverse		adverse	adverse	
(dollar amounts in thousands)	Actual	change	change	Actual	change	change	
Constant prepayment rate (annualized)	13.50 %	\$ (1,127)	\$ (2,164)	11.90 %	\$ (1,935)	\$ (3,816)	
Spread over forward interest rate swap rates	676 bps	(777)	(1,508)	1,069 bps	(1,376)	(2,753)	

For MSRs under the amortization method, a summary of key assumptions and the sensitivity of the MSR value at September 30, 2014 and December 31, 2013, to changes in these assumptions follows:

	September 30, 2014			De	cember 31, 20	13
		Decline in fair value due to			Decline in fai	r value due to
		10%	20%		10%	20%
		adverse	adverse		adverse	adverse
(dollar amounts in thousands)	Actual	change	change	Actual	change	change
Constant prepayment rate (annualized)	9.40 %	\$ (4,485)	\$ (8,671)	6.70 %	\$ (6,813)	\$ (12,977)
Spread over forward interest rate swap rates	955 bps	(4,682)	(9,064)	940 bps	(6,027)	(12,054)

Total servicing fees included in mortgage banking income amounted to \$10.8 million and \$10.9 million for the three-month periods ended September 30, 2014 and 2013, respectively. For the nine-month periods ended September 30, 2014 and 2013, total servicing fees included in mortgage banking income were \$32.6 million and \$33.0 million, respectively. The unpaid principal balance of residential mortgage loans serviced for third parties was \$15.6 billion and \$15.2 billion at September 30, 2014 and December 31, 2013, respectively.

Automobile Loans and Leases

Huntington has retained servicing responsibilities on sold automobile loans and receives annual servicing fees and other ancillary fees on the outstanding loan balances. Automobile loan servicing rights are accounted for using the amortization method. A servicing asset is established at fair value at the time of the sale. The servicing asset is then amortized against servicing income. Impairment, if any, is recognized when carrying value exceeds the fair value as determined by calculating the present value of expected net future cash flows. The primary risk characteristic for measuring servicing assets is payoff rates of the underlying loan pools. Valuation calculations rely on the predicted payoff assumption and, if actual payoff is quicker than expected, then future value would be impaired.

Changes in the carrying value of automobile loan servicing rights for the three-month and nine-month periods ended September 30, 2014 and 2013, and the fair value at the end of each period were as follows:

	Three Mon Septem		Nine Months Ended September 30,		
(dollar amounts in thousands)	2014	2013	2014	2013	
Carrying value, beginning of period	\$ 11,515	\$ 25,688	\$ 17,672	\$ 35,606	
New servicing assets created					
Amortization and other	(2,476)	(4,334)	(8,633)	(14,252)	
Carrying value, end of period	\$ 9,039	\$ 21,354	\$ 9,039	\$ 21,354	
Fair value, end of period	\$ 9,130	\$ 21,446	\$ 9,130	\$ 21,446	
Weighted-average life (years)	2.8	3.6	2.8	3.6	

A summary of key assumptions and the sensitivity of the automobile loan servicing rights value to changes in these assumptions at September 30, 2014 and December 31, 2013 follows:

September 30, 2014			December 31, 2013

Servicing income, net of amortization of capitalized servicing assets and impairment, amounted to \$1.9 million and \$2.5 million for the three-month periods ending September 30, 2014, and 2013, respectively. For the nine-month periods ended September 30, 2014 and 2013, total servicing income, net of amortization of capitalized servicing assets and impairment, was \$6.0 million and \$7.8 million, respectively. The unpaid principal balance of automobile loans serviced for third parties was \$1.0 billion and \$1.6 billion at September 30, 2014 and December 31, 2013, respectively.

Small Business Association (SBA) Portfolio

The following table summarizes activity relating to SBA loans sold with servicing retained for the three-month and nine-month periods ended September 30, 2014 and 2013:

	Three Mor	Three Months Ended		ths Ended
	Septem	September 30,		iber 30,
(dollar amounts in thousands)	2014	2013	2014	2013

Weighted-average life (years)	3.5	3.5	3.5	3.5

A summary of key assumptions and the sensitivity of the SBA loan servicing rights value to changes in these assumptions at September 30, 2014 and December 31, 2013 follows:

	Septe	ember 30, 201	4	Dec	ember 31, 2013	
		Decline in fa	ir value due to		Decline in fair	r value due to
		10%	20%		10%	20%
		adverse	adverse		adverse	adverse
(dollar amounts in thousands)	Actual	change	change	Actual	change	change
Constant prepayment rate (annualized)	5.70 %	\$ (206)	\$ (410)	5.90 %	\$ (221)	\$ (438)
Discount rate	1,500 bps	(937)	(1,442)	1,500 bps	(446)	(873)

Servicing income, net of amortization of capitalized servicing assets, amounted to \$1.9 million and \$1.6 million for the three-month periods ending September 30, 2014, and 2013, respectively. For the nine-month periods ended September 30, 2014 and 2013, total servicing income, net of amortization of capitalized servicing assets, was \$5.4 million and \$4.7 million, respectively. The unpaid principal balance of SBA loans serviced for third parties was \$1.1 billion and \$0.9 billion at September 30, 2014 and December 31, 2013, respectively.

7. GOODWILL AND OTHER INTANGIBLE ASSETS

Business segments are based on segment leadership structure, which reflects how segment performance is monitored and assessed. During the 2014 first quarter, we realigned our business segments to drive our ongoing growth and leverage the knowledge of our highly experienced team. We now have five major business segments: Retail and Business Banking, Commercial Banking, Automobile Finance and Commercial Real Estate (AFCRE), Regional Banking and The Huntington Private Client Group (RBHPCG), and Home Lending. A Treasury / Other function includes, along with technology and operations, other unallocated assets, liabilities, revenue, and expense. All periods presented have been reclassified to conform to the current period classification. During the 2014 third quarter, we moved our insurance brokerage business from Treasury / Other to Commercial Banking to align with a change in management responsibilities. Amounts relating to the realignment are disclosed in the table below.

A rollforward of goodwill by business segment for the first nine-month period of 2014 is presented in the table below:

Edgar Filing: HUNTINGTON BANCSHARES INC/MD - Form 10-Q

(dollar amounts in thousands)	Retail & Business Banking	Commercial Banking	AFCRE	RBHPCG	Home Lending	Treasury/ Other	Huntington Consolidated

Adjustments		43,425		(8,939)	3,000	(37,486)	
Impairment					(3,000)		(3,000)
Balance, end of period	\$ 368,097	\$ 59,594	\$	\$ 90,012	\$	\$ 4,838	\$ 522,541

During the 2014 third quarter, Huntington completed the acquisition of 24 Bank of America branches in Michigan and recorded \$17.1 million of goodwill. The remaining \$64.2 million of goodwill acquired during the period was the result of the Camco Financial acquisition, which was completed on March 1, 2014. For additional information on the acquisitions, see Business Combinations footnote.

Goodwill is not amortized but is evaluated for impairment on an annual basis at October 1 of each year or whenever events or changes in circumstances indicate the carrying value may not be recoverable. As a result of the 2014 first quarter reorganization in our reported business segments, goodwill was reallocated among the business segments. Immediately following the reallocation, impairment of \$3.0 million was recorded in the Home Lending reporting segment.

At September 30, 2014 and December 31, 2013, Huntington s other intangible assets consisted of the following:

(dollar amounts in thousands)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
September 30, 2014			
Core deposit intangible	\$ 400,058	\$ (358,492)	\$ 41,566
Customer relationship	107,920	(64,310)	43,610
Other	25,164	(25,016)	148
Total other intangible assets	\$ 533,142	\$ (447,818)	\$ 85,324
December 31, 2013			
Core deposit intangible	\$ 380,249	\$ (335,552)	\$ 44,697
Customer relationship	106,974	(58,675)	48,299
Other	25,164	(24,967)	197
Total other intangible assets	\$ 512,387	\$ (419,194)	\$ 93,193

The estimated amortization expense of other intangible assets for the remainder of 2014 and the next five years is as follows:

	Amortization
(dollar amounts in thousands)	Expense
2014	\$ 10,390
2015	25,092
2016	11,205
2017	10,050
2018	8,528
2019	7.471

8. OTHER LONG-TERM DEBT

In February 2014, the Bank issued \$500.0 million of senior notes at 99.842% of face value. The senior bank note issuances mature on April 1, 2019 and have a fixed coupon rate of 2.20%. The senior note issuance may be redeemed one month prior to the maturity date at 100% of principal plus accrued and unpaid interest.

In April 2014, the Bank issued \$500.0 million of senior notes at 99.842% of face value. The senior note issuances mature on April 24, 2017 and have a fixed coupon rate of 1.375%. In April 2014, the Bank also issued \$250.0 million of senior notes at 100% of face value. The senior bank note issuances mature on April 24, 2017 and have a variable coupon rate equal to the three-month LIBOR plus 0.425%. Both senior note issuances may be redeemed one month prior to their maturity date at 100% of principal plus accrued and unpaid interest.

9. OTHER COMPREHENSIVE INCOME

The components of other comprehensive income for the three-month and nine-month periods ended September 30, 2014 and 2013, were as follows:

	Sej	ree Months End ptember 30, 201 Tax (Expense)

10. SHAREHOLDERS EQUITY

2014 Share Repurchase Program

On March 26, 2014, Huntington announced that the Federal Reserve did not object to Huntington s proposed capital actions included in Huntington s capital plan submitted to the Federal Reserve in January 2014. These actions included a potential repurchase of up to \$250 million of common stock through the first quarter of 2015. The new repurchase authorization represents a \$23 million, or 10%, increase from the recently completed common stock repurchase authorization. Purchases of common stock may include open market purchases, privately negotiated transactions, and accelerated repurchase programs. Huntington s board of directors authorized a share repurchase program consistent with Huntington s capital plan.

On April 29, 2014, Huntington repurchased approximately 2.2 million shares of common stock from a third party under an accelerated share repurchase program. The accelerated share repurchase program enabled Huntington to purchase 1.9 million shares immediately, while the third party could have purchased shares in the market up through June 24, 2014 (the Repurchase Term). In connection with the repurchase of these shares, Huntington entered into a variable share forward sale agreement, which provides for a settlement, reflecting a price differential based on the adjusted volume-weighted average price as defined in the agreement with the third party. The variable share forward agreement was settled in shares, resulting in approximately 0.3 million shares being delivered to Huntington on June 27, 2014. Based on the adjusted volume-weighted average prices through June 24, 2014, the settlement of the variable share forward agreement did not have a material impact to Huntington.

During the three-month period ended September 30, 2014, Huntington repurchased a total of 5.4 million shares at a weighted average share price of \$9.70. Huntington repurchased a total of 32.1 million shares of common stock during the nine-month period ended September 30, 2014, at a weighted average share price of \$9.34.

2013 Share Repurchase Program

On March 14, 2013, Huntington announced that the Federal Reserve did not object to Huntington s proposed capital actions included in Huntington s capital plan submitted to the Federal Reserve in January of this year. These actions included an increase in the quarterly dividend per common share to \$0.05, starting in the second quarter of 2013 and potential repurchase of up to \$227 million of common stock through the first quarter of 2014. Huntington s board of directors authorized a share repurchase program consistent with Huntington s capital plan. This program replaced the previously authorized share repurchase program authorized by Huntington s board of directors in 2012.

During the three-month period ended September 30, 2013, Huntington repurchased a total of 2.0 million shares at a weighted average share price of \$8.18. Huntington repurchased a total of 16.7 million shares of common stock during the nine-month period ended September 30, 2013, at a weighted average share price of \$7.46.

110

11. EARNINGS PER SHARE

Basic earnings per share is the amount of earnings (adjusted for dividends declared on preferred stock) available to each share of common stock outstanding during the reporting period. Diluted earnings per share is the amount of earnings available to each share of common stock outstanding during the reporting period adjusted to include the effect of potentially dilutive common shares. Potentially dilutive common shares include incremental shares issued for stock options, restricted stock units and awards, distributions from deferred compensation plans, and the conversion of the Company s convertible preferred. Potentially dilutive common shares are excluded from the computation of diluted earnings per share in periods in which the effect would be antidilutive. For diluted earnings per share, net income available to common shares can be affected by the conversion of the Company s convertible preferred stock. Where the effect of this conversion would be dilutive, net income available to common shareholders is adjusted by the associated preferred dividends and deemed dividend. The calculation of basic and diluted earnings per share for each of the three-month and nine-month periods ended September 30, 2014 and 2013, was as follows:

	Three Mon Septem		Nine Mon Septem	
(dollar amounts in thousands, except per share amounts)	2014	2013	2014	2013
Basic earnings per common share:				
Net income	\$ 155,016	\$ 178,836	\$ 468,778	\$ 483,110
Preferred stock dividends	(7,964)	(7,967)	(23,891)	(23,904)
Net income available to common shareholders	\$ 147,052	\$ 170,869	\$ 444,887	\$ 459,206
Average common shares issued and outstanding	816,497	830,398	820,884	835,410
Basic earnings per common share	\$ 0.18	\$ 0.21	\$ 0.54	\$ 0.55
Diluted earnings per common share:				
Net income available to common shareholders	\$ 147,052	\$ 170,869	\$ 444,887	\$ 459,206
Effect of assumed preferred stock conversion				
Net income applicable to diluted earnings per share	\$ 147,052	\$ 170,869	\$ 444,887	\$ 459,206
Average common shares issued and outstanding	816,497	830,398	820,884	835,410
Dilutive potential common shares:				
Stock options and restricted stock units and awards	11,367	9,254	11,397	7,764
Shares held in deferred compensation plans	1,506	1,373	1,443	1,350
Other	253		203	
Dilutive potential common shares:	13,126	10,627	13,043	9,114
1	-,	,-	,	,
Total diluted average common shares issued and outstanding	829,623	841,025	833,927	844,524
Diluted earnings per common share	\$ 0.18	\$ 0.20	\$ 0.53	\$ 0.54

For the three-month periods ended September 30, 2014 and 2013, approximately 2.6 million and 5.6 million, respectively, of options to purchase shares of common stock were not included in the computation of diluted earnings per share because the effect would be antidilutive. For the nine-month periods ended September 30, 2014 and 2013, amounts not included in the computation of diluted earnings per share were 2.7 million and 9.7 million shares, respectively.

12. SHARE-BASED COMPENSATION

Huntington sponsors nonqualified and incentive share based compensation plans. These plans provide for the granting of stock options and other awards to officers, directors, and other employees. Compensation costs are included in personnel costs on the Unaudited Condensed Consolidated Statements of Income. Stock options are granted at the closing market price on the date of the grant. Options granted typically vest ratably over four years or when other conditions are met. Stock options, which represented a portion of our grant values, have no intrinsic value until the stock price increases. Options granted prior to May 2004 have a term of ten years. All options granted after May 2004 have a term of seven years.

In 2012, shareholders approved the Huntington Bancshares Incorporated 2012 Long-Term Incentive Plan (the Plan) which authorized 51.0 million shares for future grants. The Plan is the only active plan under which Huntington is currently granting share based options and awards. At September 30, 2014, 14.9 million shares from the Plan were available for future grants. Huntington issues shares to fulfill stock

option exercises and restricted stock unit and award vesting from available authorized common shares. At September 30, 2014, the Company believes there are adequate authorized common shares to satisfy anticipated stock option exercises and restricted stock unit and award vesting in 2014.

111

Huntington uses the Black-Scholes option pricing model to value options in determining our share-based compensation expense. Forfeitures are estimated at the date of grant based on historical rates, and updated as necessary, and reduce the compensation expense recognized. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the date of grant. The expected dividend yield is based on the dividend rate and stock price at the date of the grant. Expected volatility is based on the estimated volatility of Huntington s stock over the expected term of the option.

The following table illustrates total share-based compensation expense and related tax benefit for the three-month and nine-month periods ended September 30, 2014 and 2013:

	Three Mon	Three Months Ended September 30,		ths Ended
	Septeml			iber 30,
(dollar amounts in thousands)	2014	2013	2014	2013
Share-based compensation expense	\$ 10,864	\$ 9,746	\$ 33,656	\$ 27,643
Tax benefit	3,670	3,278	11,354	9,311

Huntington s stock option activity and related information for the nine-month period ended September 30, 2014, was as follows:

		Weighted- Average Exercise	Weighted- Average Remaining Contractual	Aggregate Intrinsic
(amounts in thousands, except years and per share amounts)	Options	Price	Life (Years)	Value
Outstanding at January 1, 2014	23,300	\$ 7.61		
Granted	1,807	9.22		
Assumed	214			
Exercised	(2,799)	5.97		
Forfeited/expired	(2,074)	17.45		
Outstanding at September 30, 2014	20,448	\$ 6.99	4.1	\$ 63,550
Expected to vest at September 30, 2014 (1)	5,102	\$ 7.56	5.6	\$ 11,098
Exercisable at September 30, 2014	14,744	\$ 6.75	3.5	\$ 51,340

(1) The number of options expected to vest includes an estimate of 602 thousand shares expected to be forfeited.

The aggregate intrinsic value represents the amount by which the fair value of underlying stock exceeds the in-the-money option exercise price. For the nine-month periods ended September 30, 2014 and 2013, cash received for the exercises of stock options was \$16.7 million and \$11.0 million, respectively. The tax benefit realized from stock option exercises was \$2.4 million and \$1.3 million for each respective period.

Huntington also grants restricted stock, restricted stock units, performance share awards and other stock-based awards. Restricted stock units and awards are issued at no cost to the recipient, and can be settled only in shares at the end of the vesting period. Restricted stock awards provide the holder with full voting rights and cash dividends during the vesting period. Restricted stock units do not provide the holder with voting rights or cash dividends during the vesting period, but do accrue a dividend equivalent that is paid upon vesting, and are subject to certain service restrictions. Performance share awards are payable contingent upon Huntington achieving certain predefined performance objectives over the three-year measurement period. The fair value of these awards is the closing market price of Huntington s common stock on the date of award.

The weighted-average grant date fair value of nonvested shares granted for the nine-month periods ended September 30, 2014 and 2013, were \$9.14 and \$7.12, respectively. The total fair value of awards vested was \$25.1 million and \$14.8 million during the nine-month periods ended September 30, 2014, and 2013, respectively. As of September 30, 2014, the total unrecognized compensation cost related to nonvested awards was \$71.3 million with a weighted-average expense recognition period of 2.6 years.

The following table summarizes the status of Huntington s restricted stock units, performance share awards, and restricted stock awards as of September 30, 2014, and activity for the nine-month period ended September 30, 2014:

		Weighted- Average		Weighted- Average		Weighted- Average
	Restricted	Grant Date	Restricted	Grant Date	Performance	Grant Date
		Fair		Fair		Fair
	Stock	Value	Stock	Value	Share	Value
		Per		Per		Per
(amounts in thousands, except per share amounts)	Awards	Share	Units	Share	Awards	Share
Nonvested at January 1, 2014		\$	12,064	\$ 6.80	1,646	\$ 6.95
Granted			4,573	9.15	1,076	9.08
Assumed	27					
Vested	(14)	9.53	(3,890)	6.42		
Forfeited	(1)	9.53	(615)	7.45	(131)	7.16
Nonvested at September 30, 2014	12	\$ 9.53	12,132	\$ 7.78	2,591	\$ 7.83

13. BENEFIT PLANS

Huntington sponsors the Plan, a non-contributory defined benefit pension plan covering substantially all employees hired or rehired prior to January 1, 2010. The Plan, which was modified in 2013 and no longer accrues service benefits to participants, provides benefits based upon length of service and compensation levels. The funding policy of Huntington is to contribute an annual amount that is at least equal to the minimum funding requirements but not more than the amount deductible under the Internal Revenue Code. There is no required minimum contribution for 2014. During the 2013 third quarter, the board of directors approved, and management communicated, a curtailment of the Company s pension plan effective December 31, 2013.

In addition, Huntington has an unfunded defined benefit post-retirement plan that provides certain healthcare and life insurance benefits to retired employees who have attained the age of 55 and have at least 10 years of vesting service under this plan. For any employee retiring on or after January 1, 1993, post-retirement healthcare benefits are based upon the employee s number of months of service and are limited to the actual cost of coverage. Life insurance benefits are a percentage of the employee s base salary at the time of retirement, with a maximum of \$50,000 of coverage. The employer paid portion of the post-retirement health and life insurance plan was eliminated for employees retiring on and after March 1, 2010. Eligible employees retiring on and after March 1, 2010, who elect retiree medical coverage, will pay the full cost of this coverage. Huntington will not provide any employer paid life insurance to employees retiring on and after March 1, 2010. Eligible employees will be able to convert or port their existing life insurance at their own expense under the same terms that are available to all terminated employees.

Beginning January 1, 2015, Huntington will terminate the company sponsored retiree health care plan for Medicare eligible retirees and their dependents. Instead, Huntington will partner with a third party to assist the retirees and their dependents in selecting individual policies from a variety of carriers on a private exchange. This plan amendment resulted in a measurement of the liability at the approval date. The result of the measurement was a \$5.2 million reduction of the liability and increase in accumulated other comprehensive income. It will also result in a reduction of expense over the estimated life of plan participants.

The following table shows the components of net periodic benefit expense of the Plan and the Post-Retirement Benefit Plan:

	Three Mo	Pension Benefits Three Months Ended September 30,		
(dollar amounts in thousands)	2014	2013	Septem 2014	2013
Service cost (1)	\$ 435	\$ 5,428	\$	\$
Interest cost	8,099	7,749	258	216
Expected return on plan assets	(11,446)	(11,768)

Benefit expense	\$ 3,092	\$ (4,021)	\$ (672)	\$ (818)	

The Bank, as trustee, held all Plan assets at September 30, 2014 and December 31, 2013. The Plan assets consisted of the following investments:

	Fair Value			
(dollar amounts in thousands)	September 30, 2014 December 31, 2			1, 2013
Cash	\$ 3	%	\$	%
Cash equivalents:				
Huntington funds money market	12,622	2	803	
Fixed income:				
Huntington funds fixed income funds			74,048	11
Corporate obligations	214,356	33	180,757	28
Mutual funds fixed income	46,857	7		
U.S. government obligations	59,290	9	51,932	8
U.S. government agencies	7,047	1	6,146	1
Equities:				
Huntington funds	71,061	11	289,379	45
Mutual funds equities	120,202	19		
Exchange traded funds	28,014	4	24,705	4
Huntington common stock			20,324	3
Other common stock	89,768	14		
Limited partnerships	3,003		926	
	ŕ			
Fair value of plan assets	\$ 652,223	100%	\$ 649,020	100%

Investments of the Plan are accounted for at cost on the trade date and are reported at fair value. The Plan s investments at September 30, 2014, are classified as Level 1 within the fair value hierarchy, except for corporate obligations, U.S. government obligations, and U.S. government agencies, which are classified as Level 2, and limited partnerships, which are classified as Level 3. In general, investments of the Plan are exposed to various risks, such as interest rate risk, credit risk, and overall market volatility. Due to the level of risk associated with certain investments, it is reasonably possible changes in the values of investments will occur in the near term and such changes could materially affect the amounts reported in the Plan assets.

The investment objective of the Plan is to maximize the return on Plan assets over a long time period, while meeting the Plan obligations. At September 30, 2014, Plan assets were invested 48% in equity investments, 50% in bonds, and 2% in cash with an average duration of 11.97 years on bond investments. The estimated life of benefit obligations was 11 years. Although it may fluctuate with market conditions, Management has targeted a long-term allocation of Plan assets of 20% to 50% in equity investments and 80% to 50% in bond investments. The allocation of Plan assets between equity investments and fixed income investments will change from time to time with the allocation to fixed income investments increasing as the funding level increases.

Huntington also sponsors other nonqualified retirement plans, the most significant being the SERP and the SRIP. The SERP provides certain former officers and directors, and the SRIP provides certain current and former officers and directors of Huntington and its subsidiaries with defined pension benefits in excess of limits imposed by federal tax law. During the 2013 third quarter, the board of directors approved, and

management communicated, a curtailment of the Company s SRIP plan effective December 31, 2013.

114

Huntington has a defined contribution plan that is available to eligible employees. Huntington matches participant contributions, up to the first 4% of base pay contributed to the Plan.

The following table shows the costs of providing the SERP, SRIP, and defined contribution plans:

		Three Months Ended September 30,				
(dollar amounts in thousands)	2014	2014 2013		2013		
SERP & SRIP	\$ 504	\$ 1,570	\$ 1,467	\$ 3,949		
Defined contribution plan	8,325	4,671	23,239	13,614		
Benefit cost	\$ 8,829	\$ 6,241	\$ 24,706	\$ 17,563		

14. FAIR VALUES OF ASSETS AND LIABILITIES

Huntington follows the fair value accounting guidance under ASC 820 and ASC 825.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. A three-level valuation hierarchy was established for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument s categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Transfers in and out of Level 1, 2, or 3 are recorded at fair value at the beginning of the reporting period.

Following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Mortgage loans held for sale

Huntington elected to apply the fair value option for mortgage loans originated with the intent to sell which are included in loans held for sale. Mortgage loans held for sale are classified as Level 2 and are estimated using security prices for similar product types.

Available-for-sale securities and trading account securities

Securities accounted for at fair value include both the available-for-sale and trading portfolios. Huntington uses prices obtained from third party pricing services and recent trades to determine the fair value of securities. AFS and trading securities are classified as Level 1 using quoted market prices (unadjusted) in active markets for identical securities that Huntington has the ability to access at the measurement date. 0.3% of the positions in these portfolios are Level 1, and consist of U.S. Treasury securities and money market mutual funds. When quoted market prices are not available, fair values are classified as Level 2 using quoted prices for similar assets in active markets, quoted prices of identical or similar assets in markets that are not active, and inputs that are observable for the asset, either directly or indirectly, for substantially the full term of the financial instrument. 83.3% of the positions in these portfolios are Level 2, and consist of U.S. Government and agency debt securities, agency mortgage backed securities, asset-backed securities, municipal securities and other securities. For both Level 1 and Level 2 securities, management uses various methods and techniques to corroborate prices obtained from the pricing service, including reference to dealer or other market quotes, and by reviewing valuations of comparable instruments. If relevant market prices are limited or unavailable, valuations may require significant management judgment or estimation to determine fair value, in which case the fair values are classified as Level 3. 16.4% of

our positions are Level 3, and consist of non-agency ALT-A asset-backed securities, private-label CMO securities, CDO-preferred CDO securities and municipal securities. A significant change in the unobservable inputs for these securities may result in a significant change in the ending fair value measurement of these securities.

115

The Alt-A, private label CMO and CDO-preferred securities portfolios are classified as Level 3 and as such use significant estimates to determine the fair value of these securities which results in greater subjectivity. The Alt-A and private label CMO securities portfolios are subjected to a monthly review of the projected cash flows, while the cash flows of the CDO-preferred securities portfolio are reviewed quarterly. These reviews are supported with analysis from independent third parties, and are used as a basis for impairment analysis.

Alt-A mortgage-backed and private-label CMO securities are collateralized by first-lien residential mortgage loans. The securities valuation methodology incorporates values obtained from a third party pricing specialist using a discounted cash flow approach and a proprietary pricing model and includes assumptions management believes market participants would use to value the securities under current market conditions. The model uses inputs such as estimated prepayment speeds, losses, recoveries, default rates that are implied by the underlying performance of collateral in the structure or similar structures, house price depreciation / appreciation rates that are based upon macroeconomic forecasts and discount rates that are implied by market prices for similar securities with similar collateral structures. The remaining Alt-A mortgage-backed securities were sold during the third quarter of 2014.

CDO-preferred securities are CDOs backed by a pool of debt securities issued by financial institutions. The collateral generally consists of trust-preferred securities and subordinated debt securities issued by banks, bank holding companies, and insurance companies. A full cash flow analysis is used to estimate fair values and assess impairment for each security within this portfolio. We engage a third party pricing specialist with direct industry experience in CDO-preferred securities valuations to provide assistance in estimating the fair value and expected cash flows for each security in this portfolio. The PD of each issuer and the market discount rate are the most significant inputs in determining fair value. Management evaluates the PD assumptions provided by the third party pricing specialist by comparing the current PD to the assumptions used the previous quarter, actual defaults and deferrals in the current period, and trend data on certain financial ratios of the issuers. Huntington also evaluates the assumptions related to discount rates. Relying on cash flows is necessary because there was a lack of observable transactions in the market and many of the original sponsors or dealers for these securities are no longer able to provide a fair value that is compliant with ASC 870

Huntington utilizes the same processes to determine the fair value of investment securities classified as held-to-maturity for impairment evaluation purposes.

Automobile loans

Effective January 1, 2010, Huntington consolidated an automobile loan securitization that previously had been accounted for as an off-balance sheet transaction. As a result, Huntington elected to account for these automobile loan receivables at fair value per guidance supplied in ASC 825. The automobile loan receivables are classified as Level 3. The key assumptions used to determine the fair value of the automobile loan receivables included projections of expected losses and prepayment of the underlying loans in the portfolio and a market assumption of interest rate spreads. Certain interest rates are available from similarly traded securities while other interest rates are developed internally based on similar asset-backed security transactions in the market. During the first quarter of 2014 Huntington cancelled the 2009 and 2006 Automobile Trust. Huntington continues to report the associated automobile loan receivables at fair value due to its 2010 election.

MSRs

MSRs do not trade in an active market with readily observable prices. Accordingly, the fair value of these assets is classified as Level 3. Huntington determines the fair value of MSRs using an income approach model based upon our month-end interest rate curve and prepayment assumptions. The model utilizes assumptions to estimate future net servicing income cash flows, including estimates of time decay, payoffs, and changes in valuation inputs and assumptions. Servicing brokers and other sources of information (e.g. discussion with other mortgage servicers and industry surveys) are used to obtain information on market practice and assumptions. On at least a quarterly basis, third party marks are obtained from at least one service broker. Huntington reviews the valuation assumptions against this market data for reasonableness and adjusts the assumptions if deemed appropriate. Any recommended change in assumptions and / or inputs are presented for review to the Mortgage Price Risk Subcommittee for final approval.

Derivatives

Derivatives classified as Level 1 consist of exchange traded options and forward commitments to deliver mortgage-backed securities which are valued using quoted prices. Asset and liability conversion swaps and options, and interest rate caps are classified as Level 2. These derivative positions are valued using a discounted cash flow method that incorporates current market interest rates. Derivatives classified as Level 3 consist primarily of interest rate lock agreements related to mortgage loan commitments. The determination of fair value includes assumptions related to the likelihood that a commitment will ultimately result in a closed loan, which is a significant unobservable assumption. A significant increase or decrease in the external market price would result in a significantly higher or lower fair value measurement.

Assets and Liabilities measured at fair value on a recurring basis

Assets and liabilities measured at fair value on a recurring basis at September 30, 2014 and December 31, 2013 are summarized below:

	Fair Value M	Fair Value Measurements at Reporting Date Using			Netting	I	Balance at
(dollar amounts in thousands)	Level 1	Level 1 Level 2 Level 3		Level 3	Adjustments (1)	Septe	ember 30, 2014
