Level 3 securities as presented in the table above are being fair valued using pricing methodologies approved by the Board of Directors, which contain unobservable inputs. Such methodologies include, but are not limited to, using prices provided by a single broker/dealer, the cost of the investment, and prices of any recent transactions or bids/offers for such securities or any comparable securities.

**Notes to Schedule of Investments (Unaudited)**

*Securities Valuation:* The Fund holds securities and other assets that are fair valued at the close of each day the New York Stock Exchange ( NYSE ) is open for trading. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Board of Directors (the Board ) has adopted Valuation Procedures for security valuation under which fair valuation responsibilities have been delegated to Prudential Investments LLC ( PI or Manager ). Under the current Valuation Procedures, the established Valuation Committee is responsible for supervising the valuation of portfolio securities and other assets. The Valuation Procedures permit the Fund to utilize independent pricing vendor services, quotations from market makers, and alternative valuation methods when market quotations are either not readily available or not deemed representative of fair value. A record of the Valuation Committee's actions is subject to the Board's review, approval, and ratification at its next regularly-scheduled quarterly meeting.

Various inputs determine how the Fund's investments are valued, all of which are categorized according to the three broad levels (Level 1, 2, or 3) detailed in the table following the Schedule of Investments.

Common and preferred stocks, exchange-traded funds, and derivative instruments such as futures or options that are traded on a national securities exchange are valued at the last sale price as of the close of trading on the applicable exchange where the security principally trades. Securities traded via NASDAQ are valued at the NASDAQ official closing price. To the extent these securities are valued at the last sale price or NASDAQ official closing price, they are classified as Level 1 in the fair value hierarchy.

In the event that no sale or official closing price on valuation date exists, these securities are generally valued at the mean between the last reported bid and ask prices, or at the last bid price in the absence of an ask price. These securities are classified as Level 2 in the fair value hierarchy, as the inputs are observable and considered to be significant to the valuation.

Common and preferred stocks traded on foreign securities exchanges are valued using pricing vendor services that provide model prices derived using adjustment factors based on information such as local closing price, relevant general and sector indices, currency fluctuations, depository receipts, and futures, as applicable. Securities valued using such model prices are classified as Level 2 in the fair value hierarchy, as the adjustment factors are observable and considered to be significant to the valuation. Such securities are valued using model prices to the extent that the valuation meets the established confidence level for each security. If the confidence level is not met or the vendor does not provide a model price, securities are valued in accordance with exchange-traded common and preferred stocks discussed above.

Investments in open-end, non-exchange-traded mutual funds are valued at their net asset values as of the close of the NYSE on the date of valuation. These securities are classified as Level 1 in the fair value hierarchy since they may be purchased or sold at their net asset values on the date of valuation.

Fixed income securities traded in the over-the-counter market are generally valued at prices provided by approved independent pricing vendors. The pricing vendors provide these prices after evaluating observable inputs including, but not limited to yield curves, yield spreads, credit ratings, deal terms, tranche level attributes, default rates, cash flows, prepayment speeds, broker/dealer quotations, and reported trades. Securities valued using such vendor prices are classified as Level 2 in the fair value hierarchy.

Over-the-counter derivative instruments are generally valued using pricing vendor services, which derive the valuation based on inputs such as underlying asset prices, indices, spreads, interest rates, and exchange rates. These instruments are categorized as Level 2 in the fair value hierarchy.

Centrally cleared swaps listed or traded on a multilateral or trade facility platform, such as a registered exchange, are valued at the daily settlement price determined by the respective exchange. These securities are classified as Level 2 in the fair value hierarchy, as the daily settlement price is not public.

Securities and other assets that cannot be priced according to the methods described above are valued based on pricing methodologies approved by the Board. In the event that significant unobservable inputs are used when determining such valuations, the securities will be classified as Level 3 in the fair value hierarchy.

When determining the fair value of securities, some of the factors influencing the valuation include: the nature of any restrictions on disposition of the securities; assessment of the general liquidity of the securities; the issuer's financial condition and the markets in which it does business; the cost of the investment; the size of the holding and the capitalization of the issuer; the prices of any recent transactions or bids/offers for such securities or any comparable securities; any available analyst media or other reports or information deemed reliable by the investment adviser regarding the issuer or the markets or industry in which it operates. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the price used by other mutual funds to calculate their net asset values.

The Fund may invest in illiquid securities, including repurchase agreements which have a maturity of longer than seven days, certain securities with legal or contractual restrictions on resale (restricted securities, sometimes referred to as Private Placements) and securities that are not readily marketable. Restricted securities are valued pursuant to the valuation procedures noted above.

The Fund invests in the Prudential Core Taxable Money Market Fund, a portfolio of the Prudential Investment Portfolios 2, registered under the Investment Company Act of 1940, as amended, and managed by PI.
