**NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

**1. ACCOUNTING POLICIES**

***Basis of Presentation***

Pegasystems Inc. (together with its subsidiaries, the Company) has prepared the accompanying unaudited condensed consolidated financial statements pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC) regarding interim financial reporting. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America (U.S.) for complete financial statements and should be read in conjunction with the Company's audited financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2014.

In the opinion of management, the Company has prepared the accompanying unaudited condensed consolidated financial statements on the same basis as its audited financial statements, and these financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results of the interim periods presented. The operating results for the interim periods presented are not necessarily indicative of the results expected for the full year 2015.

**2. NEW ACCOUNTING PRONOUNCEMENTS**

***Revenue from Contracts with Customers:*** In May 2014, the Financial Accounting Standard Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606). This ASU amends the guidance for revenue recognition to replace numerous, industry-specific requirements, and converges areas under this topic with those of the International Financial Reporting Standards. This ASU implements a five-step process for customer contract revenue recognition that focuses on transfer of control, as opposed to transfer of risk and rewards. This ASU also requires enhanced disclosures regarding the nature, amount, timing, and uncertainty of revenues and cash flows from contracts with customers. Other major provisions include ensuring the time value of money is considered in the transaction price, and allowing estimates of variable consideration to be recognized before contingencies are resolved in certain circumstances. The amendments in this ASU are effective for reporting periods beginning after December 15, 2016, and early adoption is not permitted. Entities can transition to the standard either retrospectively or as a cumulative-effect adjustment as of the date of adoption. On April 1, 2015, the FASB voted to propose a delay in the effective date of this ASU for reporting periods beginning after December 15, 2017, with early adoption permitted as of the original effective date. As a result, the proposed new effective date for the Company will be January 1, 2018. Management is currently assessing the impact the adoption of this ASU will have on the Company's consolidated financial statements.

The Company considers debt securities with maturities of three months or less from the purchase date to be cash equivalents. Interest is recorded when earned. All of the Company's investments are classified as available-for-sale and are carried at fair value with unrealized gains and losses recorded as a component of accumulated other comprehensive income, net of related income taxes.

As of March 31, 2015, remaining maturities of marketable debt securities ranged from April 2015 to May 2017, with a weighted-average remaining maturity of approximately 14 months.

**4. DERIVATIVE INSTRUMENTS**

The Company has historically used foreign currency forward contracts (forward contracts) to manage its exposure to changes in foreign currency exchange rates associated with its foreign currency denominated accounts receivable, cash and intercompany payables. The U.S. operating company invoices most of its foreign clients in foreign currencies, which results in cash and receivables held at the end of the reporting period denominated in those foreign currencies. Since the U.S. operating company's functional currency is the U.S. dollar, the Company recognizes a foreign currency transaction gain or (loss) on the foreign currency denominated cash, intercompany payables, and accounts receivable held by the U.S. operating company in its consolidated statements of operations when there are changes in the foreign currency exchange rates versus the U.S. dollar. The Company has been primarily exposed to the fluctuation in the British pound, Euro, Australian dollar, and Indian rupee relative to the U.S. dollar.

The forward contracts utilized by the Company are not designated as hedging instruments and as a result, the Company records the fair value of these contracts at the end of each reporting period in its consolidated balance sheet as other current assets for unrealized gains and accrued expenses for unrealized losses, with any fluctuations in the value of these contracts recognized in other expense, net, in its consolidated statement of operations. However, the

fluctuations in the value of these foreign currency forward contracts partially offset the gains and losses from the remeasurement or settlement of the foreign currency denominated accounts receivable, intercompany payables, and cash held by the U.S. operating company, thus partly mitigating the volatility. Generally, the Company enters into foreign currency forward contracts with terms not greater than 90 days.

Effective in the second quarter of 2015, the Company intends to restructure its transactions with its non-North American clients who will begin transacting with Pegasystems Limited, a U.K. subsidiary of the Company, which has the British pound as its functional currency. This reorganization could result in foreign currency transaction gains or (losses) on cash, intercompany payables, and accounts receivable held by the U.K. subsidiary in currencies other than the British pound. As a result, the Company expects its exposure to fluctuations in primarily the Euro and Australian dollar relative to the U.S. dollar to decrease, and its exposure from these currencies relative to the British pound to increase.

The Company is in the process of reassessing its hedging strategy and has not entered into any forward contracts since February 2014. The Company intends to fully or partially hedge its exposures relative to both the U.S. dollar and the British pound under its revised strategy, once implemented. As of March 31, 2015 and December 31, 2014, the Company did not have any forward contracts outstanding.

**Table of Contents**

The Company entered into forward contracts with notional values as follows:

**5. FAIR VALUE MEASUREMENTS****Assets Measured at Fair Value on a Recurring Basis**

Fair value is an exit price, representing the amount that would be received from the sale of an asset or paid to transfer a liability in an orderly transaction between market participants based on assumptions that market participants would use in pricing an asset or liability. As a basis for classifying the fair value measurements, a three-tier fair value hierarchy, which classifies the fair value measurements based on the inputs used in measuring fair value, was established as follows: (Level 1) observable inputs such as quoted prices in active markets for identical assets or liabilities; (Level 2) significant other inputs that are observable either directly or indirectly; and (Level 3) significant unobservable inputs on which there is little or no market data, which require the Company to develop its own assumptions. This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value. On a recurring basis, the Company records its marketable securities at fair value.

The Company's investments are all classified within Level 1 and Level 2 of the fair value hierarchy. The Company's money market funds are classified within Level 1 of the fair value hierarchy and are valued using quoted market prices in active markets for identical assets. The Company's investments classified within Level 2 of the fair value hierarchy are valued based on a market approach using quoted prices, when available, or matrix pricing compiled by third party pricing vendors, using observable market inputs such as interest rates, yield curves, and credit risk. If applicable, the Company will recognize transfers into and out of levels within the fair value hierarchy at the end of the reporting period in which the actual event or change in circumstance occurs. There were no transfers of investments between Level 1 and Level 2 during the quarter ended March 31, 2015.

**Table of Contents**

The fair value hierarchy of the Company's cash equivalents and marketable securities at fair value is as follows:

**Assets Measured at Fair Value on a Nonrecurring Basis**

Assets recorded at fair value on a nonrecurring basis, such as property and equipment, and intangible assets, are recognized at fair value when they are impaired. During the first three months of 2015 and 2014, the Company did not recognize any impairments on its assets measured at fair value on a nonrecurring basis.

**11. STOCK-BASED COMPENSATION**

Stock-based compensation expense was reflected in the Company's unaudited condensed consolidated statements of operations as follows:

<b>(in thousands)</b>	<b>Three Months Ended March 31,</b>	
	<b>2015</b>	<b>2014</b>
Cost of revenues	\$ 1,953	\$ 1,011
Operating expenses	4,316	2,284
Total stock-based compensation before tax	\$ 6,269	\$ 3,295
Income tax benefit	(1,783)	(991)

During the first three months of 2015, the Company issued approximately 313,000 shares of common stock to its employees under the Company's share-based compensation plans.

During the first three months of 2015, the Company granted approximately 1,566,000 restricted stock units ( RSUs ) and 1,995,000 non-qualified stock options to its employees with total fair values of approximately \$30.6 million and \$14.8 million, respectively. Approximately 250,000 RSUs were granted in connection with the election by employees to receive 50% of their 2015 target incentive compensation under the Company s Corporate Incentive Compensation Plan (the CICP ) in the form of RSUs instead of cash. Stock-based compensation of approximately \$4.3 million associated with this RSU grant will be recognized over a one-year period beginning on the grant date.

The Company recognizes stock based compensation on the accelerated recognition method, while treating each vesting tranche as if it were an individual grant. As of March 31, 2015, the Company had approximately \$49.4 million of unrecognized stock-based compensation expense, net of estimated forfeitures, related to all unvested RSUs and unvested stock options that is expected to be recognized over a weighted-average period of 2.3 years.

**Table of Contents****12. EARNINGS PER SHARE**

Basic earnings per share is computed using the weighted-average number of common shares outstanding during the applicable period. Diluted earnings per share is computed using the weighted-average number of common shares outstanding during the applicable period, plus the dilutive effect of outstanding options, RSUs, and warrants, using the treasury stock method and the average market price of the Company's common stock during the applicable period. Certain shares related to some of the Company's outstanding stock options and RSUs were excluded from the computation of diluted earnings per share because they were anti-dilutive in the periods presented, but could be dilutive in the future.

**Table of Contents****13. GEOGRAPHIC INFORMATION AND MAJOR CLIENTS**

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker ( CODM ) in deciding how to allocate resources and in assessing performance.

The Company develops and licenses its strategic software applications and Pega 7 platform and provides consulting services, maintenance, and training related to its offerings. The Company derives substantially all of its revenue from the sale and support of one group of similar products and services software that provides business process solutions in the enterprise applications market. To assess performance, the Company s CODM reviews financial information on a consolidated basis. Therefore, the Company determined it has one reportable segment Digital Enterprise Business Solutions, and one reporting unit.

The Company s international revenue is from sales to clients based outside of the U.S. The Company derived its revenue from the following geographic areas:

(Dollars in thousands)	Three Months Ended March 31,

**14. SUBSEQUENT EVENT**

On April 28, 2015, the Company and the former shareholders of Antenna Software, Inc. ( Antenna ) reached a settlement with respect to certain indemnification claims made by the Company against the former shareholders of Antenna, arising under the merger agreement pursuant to which the Company acquired Antenna in October 2013. Pursuant to the settlement agreement, \$2.75 million of the approximately \$4.16 million held in escrow as security for indemnification obligations was released to the Company in settlement of the outstanding indemnification claims, with the remainder of the escrow released to the former shareholders and certain former employees of Antenna. The

receivable for the \$2.75 million has been recorded in other current assets in the Company's unaudited condensed consolidated financial statements as of March 31, 2015, with an offsetting benefit to income from operations in the Company's unaudited condensed consolidated statement of operations for the quarterly period ending March 31, 2015.

Forward-Looking Statements**

This Quarterly Report on Form 10-Q contains or incorporates forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements include, but are not limited to, statements about our future financial performance and business plans, the adequacy of our liquidity and capital resources, the continued payment of quarterly dividends by the Company, and the timing of recognizing revenue under existing term license agreements. These forward-looking statements are based on current expectations, estimates, forecasts, and projections about the industry and markets in which we operate and management's beliefs and assumptions. In addition, other written or oral statements that constitute forward-looking statements may be made by us or on our behalf. Words such as expect, anticipate, intend, plan, believe, could, estimate, may, target, strategy, is intended to, variations of such words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties, and assumptions that are difficult to predict. Important factors that could cause actual future activities and results to differ include, among others, variation in demand for our products and services and the difficulty in predicting the completion of product acceptance and other factors affecting the timing of license revenue recognition, the ongoing consolidation in the financial services, insurance, healthcare, and communications markets, reliance on third party relationships, the potential loss of vendor specific objective evidence for our consulting services, the inherent risks associated with international operations and the continued weakness in international economies, foreign currency exchange rates, the financial impact of the Company's past acquisitions and any future acquisitions, and management of the Company's growth. These risks are described more completely in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2014. We do not intend to update any forward-looking statements publicly, whether as a result of new information, future events, or otherwise.

**Business overview**

We develop, market, license, and support strategic software applications for marketing, sales and onboarding, customer service, and operations, in addition to licensing our Pega 7 platform for clients that wish to build and extend their own applications. Pega 7 assists our clients in building, deploying, and evolving enterprise applications, creating an environment in which business and IT can collaborate to manage back office operations, front office sales, marketing, and/or customer service needs. We also provide consulting services, maintenance, and training for our software, as well as a variety of applications. Our applications and Pega 7 can be deployed in the Cloud or on-premises.

Pega 7 and our related applications are used by our clients in the financial services, healthcare, insurance, communications and media, public sector, manufacturing, life sciences, and other markets. We sell our software directly, and also through a network of business and technology alliances. Our partners include major systems integrators, management consulting firms, technology providers, and application developers.

Our clients include Global 500 companies and government agencies that seek to manage complex enterprise systems and customer service issues more nimbly and cost-effectively. Our strategy is to sell a client a series of licenses, each focused on a specific purpose or area of operations. As we have found meaningful interest from smaller companies, we are expanding our sales force to extend coverage beyond our traditional Global 500 focus. We license our products and render consulting and training services to clients domestically and internationally, including in Canada, Europe, the Middle East, Latin America, Asia, and Australia. In the first quarter of 2015 and 2014, sales to clients based outside of the United States of America ( U.S. ) represented 41% and 42% of our total revenue, respectively.

Our license revenue is primarily derived from sales of our applications in the areas of marketing, sales and onboarding, customer service and support, and operations, as well as our Pega 7 platform. Our consulting services revenue is primarily related to new license implementations. Our consulting services revenue may be lower in future periods as more of our clients become enabled and our partners lead more projects. We offer training for our staff, clients, and partners at our regional training facilities and at third-party facilities, including client sites. Our online training through Pega Academy provides an alternative way to learn our software in a virtual environment. We believe that this online training will continue to expand the number of trained experts at a faster pace.

We continue to invest heavily in research and development to improve our software. Our research and development operations are primarily located in the U.S. and India. We also regularly evaluate acquisitions or investment opportunities in complementary businesses, services and technologies, and intellectual property rights in an effort to expand and enhance our product offerings.

The Pega Mobile capabilities in our Pega 7 platform are designed to help clients efficiently build, manage, and deploy mobile applications as part of a unified omni-channel experience. By using Pega Mobile, enterprises can deploy Pega applications as packaged, branded mobile applications and manage the complex elements of the mobile application lifecycle including security, integration, testing, and management of mobile applications and devices. Our mobile application development solutions help businesses to reduce the development time, deployment cost, and complexity associated with run-the-business mobile applications.

For the first quarter of 2015, we recorded total revenue of \$153.9 million, an increase of 10% over the first quarter of 2014. License revenue was \$58 million, an increase of 10% over the first quarter of 2014. Diluted earnings per share was \$0.08 as compared to \$0.12 for the first quarter of 2014, a decrease of 33%, primarily due to the 19% decrease in income from operations and the \$3.3 million increase in foreign currency transaction loss. Our results of operations for the first quarter of 2015 were favorably impacted by the settlement of the outstanding indemnification claims against the former shareholders of Antenna Software Inc. ( Antenna ) in April 2015 (See Note 14 Subsequent Event in the notes to the accompanying unaudited condensed consolidated financial statements) and the settlement of indirect tax liabilities. We generated cash flow from operations of \$27.5 million during the first quarter of 2015, a decrease of 62% over the first quarter of 2014. The decrease in cash flow from operations was primarily driven by the decrease in accounts receivable collections during the first quarter of 2015 compared to the first quarter of 2014.

In addition to the above key financial metrics, Management also focuses on license and Cloud backlog. License and Cloud backlog is computed by adding billed deferred license and Cloud revenue as recorded on the balance sheet and license and Cloud commitments, which are not billed and not recorded on our balance sheet. License and Cloud backlog may vary in any given period depending on the amount and timing of when arrangements are executed, as well as the mix between perpetual and term license arrangements.

<i>(Dollars in thousands)</i>	<b>As of March 31,</b>		<b>% Change</b>
	<b>2015</b>	<b>2014</b>	
Total billed deferred license and Cloud revenue	\$ 79,639	\$ 62,741	27%

<b>Total license and Cloud Backlog</b>	<b>\$ 374,051</b>	<b>\$ 332,984</b>	<b>12%</b>

**Critical accounting policies**

Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon our unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ) and the rules and regulations of the SEC for interim financial reporting. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates and judgments on historical experience, knowledge of current conditions, and beliefs of what could occur in the future given available information.

There have been no changes in our critical accounting policies as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014. For more information regarding our critical accounting policies, we encourage you to read the discussion contained in Item 7 under the heading Critical Accounting Estimates and Significant Judgments and Note 2 Significant Accounting Policies included in the notes to the Consolidated Financial Statements

contained in our Annual Report on Form 10-K for the year ended December 31, 2014.

**Revenue**

(Dollars in thousands)	Three Months Ended		Increase (Decrease)			
	March 31,					
	2015	2014				
<b>License revenue</b>						
Perpetual licenses	\$ 27,926	48%	\$ 23,385	44%	\$ 4,541	19%
Term licenses	27,799	48%	26,826	51%	973	4%
Subscription	2,250	4%	2,403	5%	(153)	(6)%
Total license revenue	\$ 57,975	100%	\$ 52,614	100%	\$ 5,361	10%

The aggregate value of new license arrangements executed during the first three months of 2015 significantly increased compared to the first three months of 2014. The increase in the aggregate value of license arrangements executed was primarily due to one perpetual license arrangement greater than \$10 million executed in the first quarter of 2015. The aggregate value of new license arrangements executed fluctuates quarter to quarter. During the first three months of 2015 and 2014, approximately 46% and 74%, respectively, of the value of new license arrangements were executed with existing clients.

The mix between perpetual and term license arrangements executed in a particular period varies based on client needs. A change in the mix between perpetual and term license arrangements executed may cause our revenues to vary materially from period to period. A higher proportion of term license arrangements executed would result in more license revenue being recognized over longer periods as payments become due or earlier if prepaid. Additionally, some of our perpetual license arrangements include extended payment terms or additional rights of use, which also result in the recognition of revenue over longer periods.

The increase in perpetual license revenue was primarily due to ratable recognition of a large perpetual arrangement executed in the second quarter of 2014 that is being recognized ratably over one year from its effective date and the higher value of perpetual arrangements executed in the fourth quarter of 2014 for which the revenue recognition criteria were satisfied during the first quarter of 2015 compared to the same periods in 2013 and 2014. The aggregate value of payments due under noncancellable perpetual licenses was \$33.1 million as of March 31, 2015 compared to \$36.1 million as of March 31, 2014. We expect to recognize \$14.5 million of the \$33.1 million as revenue during the remainder of 2015.

The increase in term license revenue was primarily due to revenue recognized from arrangements executed in the first quarter of 2015. The aggregate value of payments due under noncancellable term licenses and our Pega Cloud arrangements grew to \$261.4 million as of March 31, 2015 compared to \$234.1 million as of March 31, 2014. We expect to recognize \$53 million of the \$261.4 million as revenue during the remainder of 2015 in addition to new term license and Pega Cloud arrangements we may complete or prepayments we may receive from existing term license agreements. See the table of future cash receipts in Liquidity and Capital Resources - Cash Provided by Operating Activities.

Subscription revenue primarily consists of the ratable recognition of license, maintenance, and bundled services revenue on license arrangements that include a right to successor products or unspecified future products. Subscription revenue does not include revenue from our Pega Cloud arrangements, which is included in Services revenue. The timing of scheduled payments under client arrangements may limit the amount of revenue recognized in a reporting period. Consequently, our subscription revenue may vary materially quarter to quarter.

	2015	March 31, 2014	
<b>Maintenance revenue</b>			
Maintenance	\$ 48,752	\$ 44,881	\$ 3,871 9%

The increase was primarily due to the growth in the aggregate value of the installed base of our software and continued strong renewal rates.

(Dollars in thousands)	Three Months Ended				Increase
	2015	March 31, 2014			
<b>Services revenue</b>					
Consulting services	\$ 39,511	84%	\$ 38,076	89%	\$ 1,435 4%

Total services	\$ 47,191	100%	\$ 42,969	100%	\$ 4,222 10%

Consulting services represents revenue primarily from new license implementations. Our consulting services revenue may fluctuate in future periods depending on the mix of new implementation projects we perform as compared to those performed by our enabled clients or led by our partners.

Cloud represents revenue from our Pega Cloud offerings. The increase in Cloud revenue was primarily due to continued growth of our Cloud client base.

The increase in training revenue was due to an increase in the number of clients taking courses through Pega Academy during the first quarter of 2015 compared to the first quarter of 2014.

**Gross profit**

(Dollars in thousands)	Three Months Ended		Increase
	2015	March 31, 2014	
<b>Gross Profit</b>			
Software license	\$ 56,899	\$ 51,035	\$ 5,864 11%

Software license gross profit %	98%	97%	
Maintenance gross profit %	89%	90%	

Services gross profit %	7%	8%
-------------------------	----	----

The increase in total gross profit was primarily due to the increase in software license and maintenance revenue.

The decrease in services gross profit percent was primarily due to increased employee-related expenses associated with higher headcount, a 12% decline in European professional services utilization rates during the first quarter of 2015 compared to the first quarter of 2014, primarily attributable to the weak overall economic conditions in Europe, and expense overruns primarily related to one fixed price project.

Selling and marketing expenses include compensation, benefits, and other headcount-related expenses associated with our selling and marketing personnel as well as advertising, promotions, trade shows, seminars, and other programs. Selling and marketing expenses also include the amortization of customer related intangibles.

The increase was primarily due to a \$4.1 million increase in compensation and benefits associated with higher headcount, a \$3.1 million increase in sales commissions associated with the higher value of new license arrangements executed during the first quarter of 2015 compared to the first quarter of 2014, and a \$3.1 million increase in marketing and sales program expenses.

As a percent of total revenue	19%	18%		

Research and development headcount at March 31, 1,095 924 171 19%  
Research and development expenses include compensation, benefits, contracted services, and other headcount-related expenses associated with the creation and development of our products as well as enhancements and engineering changes to existing products.

The increase in headcount reflects the growth in our India research facility. The increase in offshore headcount lowered our average compensation expense per employee.

The increase in expenses was primarily due to a \$3.9 million increase in compensation and benefit expenses associated with higher headcount, a \$0.5 million increase in contracted professional services, a \$0.3 million increase in cloud hosting costs, and a \$0.3 million increase in computer and computer-related costs, partially offset by a \$0.4 million benefit which was the portion from the settlement of the Antenna indemnification claims recorded in research and development expenses (See Note 14 Subsequent Event in the notes to the accompanying unaudited condensed consolidated financial statements).

General and administrative expenses include compensation, benefits, and other headcount-related expenses associated with finance, legal, corporate governance, and other administrative headcount. It also includes accounting, legal, and other administrative fees. The general and administrative headcount includes employees in human resources, information technology and corporate services departments whose costs are allocated to our other functional departments.

The decrease was primarily due to a \$3.4 million benefit comprised of \$1.8 million which was the portion from the settlement of the Antenna indemnification claims recorded in general and administrative expenses (See Note 14

Subsequent Event in the notes to the accompanying unaudited condensed consolidated financial statements) and \$1.6 million from the settlement of indirect tax liabilities.

**Stock-based compensation**

The following table summarizes stock-based compensation expense included in our unaudited condensed consolidated statements of operations:

(Dollars in thousands)	Three Months Ended		Increase

Total stock-based compensation before tax	6,269	3,295	2,974	90%
Income tax benefit	(1,783)	(991)		

The increase was primarily due to the higher value of the 2014 annual periodic equity grant compared to the 2013 grant, which occurred in March 2015 and 2014, respectively.

**Non-operating income and expenses, net**

(Dollars in thousands)	Three Months Ended		Increase (Decrease)

Non-operating loss	\$ (2,649)	\$ (86)	\$ (2,563) 2,980%

We have historically used foreign currency forward contracts ( forward contracts ) to manage our exposure to changes in foreign currency denominated accounts receivable, intercompany payables, and cash primarily held by our U.S. operating company. We have not designated these forward contracts as hedging instruments and as a result, we record the fair value of the outstanding contracts at the end of the reporting period in our consolidated balance sheet, with any fluctuations in the value of these contracts recognized in other expense, net. The fluctuations in the value of these forward contracts recorded in other expense, net, partially offset in net income, the gains and losses from the remeasurement or settlement of the foreign currency denominated accounts receivable, intercompany payables, and cash held by the U.S. operating company recorded in foreign currency transaction (loss) gain.

**Table of Contents**

We are primarily exposed to the fluctuation in the British pound, Euro, Australian dollar and Indian rupee relative to the U.S. dollar. Beginning in the second quarter of 2015, we expect our exposure to fluctuations in primarily the Euro and Australian dollar relative to the U.S. dollar to decrease, and our exposure from these currencies relative to the British pound to increase.

We are in the process of reassessing our hedging strategy and have not entered into any forward contracts since February 2014. We intend to fully or partially hedge our exposures relative to both the U.S. dollar and the British pound under our revised strategy, once implemented. See Note 4 *Derivative Instruments* in the notes to the accompanying unaudited condensed consolidated financial statements for discussion of our use of forward contracts and our anticipated change in exposures.

***Provision for income taxes***

We account for income taxes at each interim period using our estimated annual effective tax rate and adjust for discrete tax items recorded in the same period. The provision for income taxes represents current and future amounts owed for federal, state, and foreign taxes. During the first quarter of 2015 and 2014, we recorded tax provisions of \$3.3 million and \$4.8 million, respectively, which resulted in an effective tax rate of 35.9% and 32.8%, respectively. Our effective tax rate for first quarter of 2015 was higher than in the same period in 2014 primarily because of a decrease in our anticipated domestic production activities deduction.

Total cash, cash equivalents, and marketable securities	\$ 225,357	\$ 211,216

The increase in cash and cash equivalents during the first three months of 2015 was primarily due to cash provided by operating activities during the period. We believe that our current cash, cash equivalents, marketable securities, and cash flow from operations will be sufficient to fund our operations, our dividend payments, and our share repurchase program for at least the next 12 months.

We evaluate acquisition opportunities from time to time, which if pursued, could require use of our funds. During the first quarter of 2014, we paid \$0.8 million of the remaining merger consideration related to the final working capital adjustment for our October 2013 acquisition of Antenna. During the first quarter of 2015, we paid \$0.5 million in additional cash consideration to the selling shareholders of one of the three companies acquired in 2014 based on the achievement of certain performance milestones. We may be required to pay an additional \$1.2 million in cash to the same selling shareholders based on the achievement of certain performance milestones through the end of 2016. In addition, we will pay \$1.1 million of additional cash consideration in 2015 to the selling shareholders of another of the three companies acquired in 2014.

As of March 31, 2015, approximately \$48.4 million of our cash and cash equivalents was held in our foreign subsidiaries. If it becomes necessary to repatriate these funds, we may be required to pay U.S. tax, net of any applicable foreign tax credits, upon repatriation. We consider the earnings of our foreign subsidiaries to be permanently reinvested and, as a result, U.S. taxes on such earnings are not provided. It is impractical to estimate the amount of U.S. tax we could have to pay upon repatriation due to the complexity of the foreign tax credit calculations and because we consider our earnings permanently reinvested. There can be no assurance that changes in our plans or other events affecting our operations will not result in materially accelerated or unexpected expenditures.

**Table of Contents****Cash provided by operating activities**

The primary drivers of cash provided by operating activities during the first three months of 2015 were net income of \$5.9 million and a \$33.9 million increase in deferred revenue due to the timing of our annual billings, partially offset by a \$21.6 million decrease in accounts payable and accrued expenses primarily due to the timing of payments for compensation-related accruals.

The primary drivers of cash provided by operating activities during the first three months of 2014 were net income of \$9.8 million, a \$57.3 million decrease in trade accounts receivable due to our significant collections, and an \$18.3 million increase in deferred revenue primarily due to the timing of our annual billings, partially offset by a \$21.6 million decrease in accounts payable and accrued expenses primarily due to the timing of payments for compensation-related accruals.

***Future Cash Receipts from License and Cloud Arrangements***

Total contractual future cash receipts due from our existing license and Pega Cloud arrangements was approximately \$294.4 million as of March 31, 2015 compared to \$270.2 million as of March 31, 2014. The future cash receipts due are summarized as follows:

<b>(in thousands) as of March 31, 2015</b>	<b>Contractual payments for term licenses and Cloud arrangements not recorded on the balance sheet (1)</b>	<b>Other contractual license payments not recorded on the balance sheet (2)</b>	<b>Total</b>
Remainder of 2015	\$ 52,970	\$ 14,471	\$ 67,441
2016	88,812	15,696	104,508
2017	52,712	1,526	54,238
2018	37,474	684	38,158
2019 and thereafter	29,383	684	30,067
<b>Total</b>	<b>\$ 261,351</b>	<b>\$ 33,061</b>	<b>\$ 294,412</b>

- (1) These amounts include contractual future cash receipts related to our on-premises term licenses and hosted Pega Cloud service offerings. The amounts related to our on-premises term licenses will be recognized as term license revenue in the future over the term of the agreement as payments become due or earlier if prepaid. Future revenues associated with our Pega Cloud arrangements will be recognized ratably as Cloud revenue within services revenue over the term of the agreement. The timing of future revenue recognition and future cash receipts may not coincide.
- (2) These amounts include contractual future cash receipts related to perpetual licenses with extended payment terms and/or additional rights of use.

**Cash used in investing activities**

During the first three months of 2015, cash used in investing activities was primarily for purchases of marketable debt securities of \$18.1 million, partially offset by the proceeds received from the maturities of marketable debt securities of \$16.5 million. We also invested \$3.3 million primarily in leasehold improvements for the build-out of our new office in Hyderabad, India.

During the first three months of 2014, cash used in investing activities was primarily for purchases of marketable debt securities of \$11.6 million, partially offset by the proceeds received from the maturities of marketable debt securities of \$11 million. We also invested \$1.2 million primarily in leasehold improvements for the build-out of our Bengaluru, India office.

#### **Cash used in financing activities**

Cash used in financing activities during the first three months of 2015 and 2014 was primarily for repurchases of our common stock. Since 2004, our Board of Directors has approved annual stock repurchase programs that have authorized the repurchase in the aggregate of up to \$119 million of our common stock. Purchases under these programs have been made on the open market.

**Table of Contents**

The following table is a summary of our repurchase activity under all of our repurchase programs during the first three months of 2015 and 2014:

<b>(Dollars in thousands)</b>	<b>Three Months Ended</b>			
	<b>March 31,</b>			
	<b>2015</b>		<b>2014</b>	
	<b>Shares</b>	<b>Amount</b>	<b>Shares</b>	<b>Amount</b>
Prior year authorization as of January 1,		\$ 13,284		\$ 14,433
Repurchases paid	106,290	(2,132)	210,802	(4,476)
Repurchases unsettled	400	(9)	96	(2)
Authorization remaining as of March 31,		\$ 11,143		\$ 9,955

In addition to the share repurchases made under our repurchase programs, we net settled the majority of our employee stock option exercises and RSU vesting, which resulted in the withholding of shares to cover the option exercise price and the minimum statutory tax withholding obligations.

During the first three months of 2015 and 2014, option and RSU holders net settled a total of 501,000 shares and 323,000 shares, respectively, of which only 297,000 shares and 187,000 shares, respectively, were issued to the option and RSU holders and the balance of the shares were surrendered to us to pay for the exercise price and the applicable taxes. During the first three months of 2015 and 2014, instead of receiving cash from the equity holders, we withheld shares with a value of \$2.6 million and \$1.8 million, respectively, for withholding taxes, and \$1.5 million and \$1.0 million, respectively, for the exercise price. The value of share repurchases and shares withheld for net settlement of our employee stock option exercises and vesting of RSUs offset the proceeds received under our various share-based compensation plans during the first three months of 2015 and 2014.

**Dividends**

On May 27, 2014, we announced an increase in our quarterly cash dividend from \$0.015 to \$0.03 per share. We declared a cash dividend of \$0.03 and \$0.015 in the first three months of 2015 and 2014, respectively. We paid cash dividends of \$2.3 million and \$1.1 million in the first three months of 2015 and 2014, respectively. It is our current intention to pay a quarterly cash dividend of \$0.03 per share; however, the Board of Directors may terminate or modify this dividend program at any time without notice.

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

Market risk represents the risk of loss that may affect us due to adverse changes in financial market prices and rates. Our market risk exposure is primarily related to fluctuations in foreign exchange rates.

We have historically entered into foreign currency forward contracts to partially mitigate our exposure to the fluctuations in foreign exchange rates. The fluctuations in the value of these forward contracts partially offset the gains and losses from the remeasurement or settlement of the foreign currency denominated accounts receivable, intercompany payables, and cash held by the U.S. operating company recorded in foreign currency transaction (loss) gain, thus partially mitigating the volatility. Beginning in the second quarter of 2015, we expect to have foreign currency transaction gains or (losses) on cash, intercompany payables, and accounts receivables held by our U.K.

subsidiary in currencies other than the British pound.

We are in the process of reassessing our hedging strategy, and we have not entered into any forward contracts since February 2014. We intend to fully or partially hedge our exposures relative to both the U.S. dollar and the British pound under our revised strategy, once implemented.

See Note 4 **Derivative Instruments** in the notes to the accompanying unaudited condensed consolidated financial statements for further discussion.

There were no significant changes to our quantitative and qualitative disclosures about market risk during the first three months of 2015. Please refer to Part II, Item 7A. **Quantitative and Qualitative Disclosures about Market Risk** included in our Annual Report on Form 10-K for the year ended December 31, 2014 for a more complete discussion of our market risk exposure.

**Table of Contents****Item 4. Controls and Procedures****(a) Evaluation of Disclosure Controls and Procedures.**

Our management, with the participation of our Chief Executive Officer, or CEO, and Chief Financial Officer, or CFO, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act) as of March 31, 2015. In designing and evaluating our disclosure controls and procedures, our management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and our management necessarily applied its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on this evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of March 31, 2015.

**(b) Changes in Internal Control over Financial Reporting.**

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act) during the quarter ended March 31, 2015 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**Part II Other Information:****Item 1A. Risk Factors**

We encourage you to carefully consider the risk factors identified in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2014. These risk factors could materially affect our business, financial condition, and future results and could cause our actual business and financial results to differ materially from those contained in forward-looking statements made in this Quarterly Report on Form 10-Q or elsewhere by management from time to time. There have been no material changes during the first three months of 2015 to the risk factors disclosed in our Annual Report on Form 10-K for the year ended December 31, 2014.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table sets forth information regarding our repurchases of our common stock during the first quarter of 2015:

<b>Period</b>	<b>Total Number of Shares Purchased</b>	<b>Average Price Paid per Share</b>	<b>Total Number of Shares of Publicly Announced Share Repurchase Programs (1)</b>	<b>Approximate Dollar Value of Shares That May Yet Be Purchased Under Publicly Announced Share Repurchase Programs (in thousands)</b>

- (1) Since 2004, our Board of Directors has approved stock repurchase programs that have authorized the repurchase, in the aggregate, of up to \$119 million of our common stock. On November 24, 2014, we announced that our Board of Directors extended the expiration date of the current stock repurchase program (the Current Program ) to December 31, 2015 and authorized the Company to repurchase up to \$15 million of our stock between November 18, 2014 and December 31, 2015. Under the Current Program, purchases may be made from time to time on the open market or in privately negotiated transactions. Shares may be repurchased in such amounts as market conditions warrant, subject to regulatory and other considerations. We have established a pre-arranged stock repurchase plan, intended to comply with the requirements of Rule 10b5-1 under the Securities Exchange Act of 1934, as amended (the Exchange Act ), and Rule 10b-18 under the Exchange Act (the 10b5-1 Plan ). All share repurchases under the Current Program during closed trading window periods will be made pursuant to the 10b5-1 Plan.
