FORWARD-LOOKING AND CAUTIONARY STATEMENTS

This quarterly report of MBIA Inc. (MBIA , the Company , we , us or our) includes statements that are not historical or current facts and are forward-looking statements made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The words believe , anticipate , project , plan , expect , estimate , intend , will likely result , looking forward , or will continue and similar expressions are used in the forward-looking statements. These statements are subject to certain risks and uncertainties that could cause actual results to differ materially from historical earnings and those presently anticipated or projected. MBIA cautions readers not to place undue reliance on any such forward-looking statements, which speak only to their respective dates. We undertake no obligation to publicly correct or update any forward-looking statement if the Company later becomes aware that such result is not likely to be achieved.

The following are some of the factors that could affect financial performance or could cause actual results to differ materially from estimates contained in or underlying the Company s forward-looking statements:

increased credit losses or impairments on public finance obligations we insure issued by state, local and territorial governments and finance authorities that are experiencing fiscal stress;

the possibility that MBIA Corp. will have inadequate liquidity or resources to pay claims as a result of higher than expected losses on certain structured finance transactions, or as a result of or a delay or failure in collecting expected recoveries;

the possibility that loss reserve estimates are not adequate to cover potential claims;

a disruption in the cash flow from our subsidiaries or an inability to access capital and our exposure to significant fluctuations in liquidity and asset values within the global credit markets as a result of collateral posting requirements;

our ability to fully implement our strategic plan, including our ability to maintain high stable ratings for National Public Finance Guarantee Corporation and generate investor demand for our financial guarantees;

deterioration in the economic environment and financial markets in the United States or abroad, and adverse developments in European sovereign credit performance, real estate market performance, credit spreads, interest rates and foreign currency levels;

the effects of governmental regulation, including insurance laws, securities laws, tax laws, legal precedents and accounting rules; and

uncertainties that have not been identified at this time.

The above factors provide a summary of and are qualified in their entirety by the risk factors discussed under Risk Factors in Part I, Item 1A of MBIA Inc. s Annual Report on Form 10-K for the year ended December 31, 2014. In addition, refer to Risk Factors in Part II, Item 1A and Note 1: Business Developments and Risks and Uncertainties in the Notes to Consolidated Financial Statements included in this Quarterly Report on Form 10-Q for a discussion of certain risks and uncertainties related to our financial statements.

This quarterly report of MBIA Inc. also includes statements of the opinion and belief of MBIA management which may be forward-looking statements subject to the preceding cautionary disclosure. Unless otherwise indicated herein, the basis for each statement of opinion or belief of MBIA management in this report is the relevant industry or subject matter experience and views of certain members of MBIA s management. Accordingly, MBIA cautions readers not to place undue reliance on any such statements, because like all statements of opinion or belief they are not statements of fact and may prove to be incorrect. We undertake no obligation to publicly correct or update any statement of opinion or belief if the Company later becomes aware that such statement of opinion or belief was not or is not then accurate. In addition, readers are cautioned that each statement of opinion or belief may be further qualified by disclosures set forth elsewhere in this report or in other disclosures by

MBIA.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 1: Business Developments and Risks and Uncertainties

Summary

MBIA Inc., together with its consolidated subsidiaries, (collectively, MBIA or the Company) operates one of the largest financial guarantee insurance businesses in the industry and was a provider of asset management and advisory services. MBIA manages three operating segments: 1) United States (U.S.) public finance insurance; 2) international and structured finance insurance; and 3) corporate. The Company's U.S. public finance insurance business is primarily operated through National Public Finance Guarantee Corporation and its subsidiaries (National) and its international and structured finance insurance business is primarily operated through MBIA Insurance Corporation and its subsidiaries (MBIA Corp.). Unless otherwise indicated or the context otherwise requires, references to MBIA Corp. are to MBIA Insurance Corporation, together with its subsidiaries, MBIA UK Insurance Limited (MBIA UK) and MBIA Mexico S.A. de C.V (MBIA Mexico).

Prior to 2015, MBIA managed two other operating segments, advisory services and conduit. The advisory services segment was primarily operated through Cutwater Holdings, LLC and its subsidiaries (Cutwater). Effective on January 1, 2015, the Company exited its advisory services business through the sale of Cutwater. During the second quarter of 2014, the Company dissolved its conduit segment through the liquidation of Meridian Funding Company, LLC (Meridian). Refer to Note 10: Business Segments for further information about the Company's operating segments.

Business Developments

National Ratings and New Business Opportunities

National's ability to write new business and compete with other financial guarantors is largely dependent on the financial strength ratings assigned to National by major rating agencies. As of September 30, 2015, the major rating agencies affirmed the following ratings of National: AA+ with a stable outlook by Kroll Bond Rating Agency; AA- with a stable outlook by Standard & Poor's Financial Services LLC (S&P); and A3 with a negative outlook by Moody's Investors Service, Inc. (Moody's).

National seeks to generate shareholder value through appropriate risk adjusted pricing; however, current market conditions and the competitive landscape may limit National's new business opportunities and its abilities to price and underwrite risk with attractive returns. Refer to Risks and Uncertainties below for a discussion of business risks related to National's insured portfolio.

Sale of MBIA Inc. Common Stock

During the nine months ended September 30, 2015, investment funds affiliated with Warburg Pincus LLC (Warburg), the largest holder of MBIA Inc. common stock, sold all of its 45.7 million shares of the Company's common stock. Warburg received all of the net proceeds from this offering. In connection with this sale, National and the Company repurchased 8 million shares and 7.6 million shares, respectively.

Held For Sale Classifications

Armonk, New York Facility

During the nine months ended September 30, 2015, the Company sold its Armonk, New York facility and recorded an impairment charge of \$4 million to adjust the carrying amount to the sale price less costs to sell. The impairment charge was reflected in the results of the Company's U.S. public finance insurance segment and included in Other net realized gains (losses) on the Company's consolidated statements of operations.

Sale of Cutwater Business

As a result of the agreement to sell Cutwater, the assets and liabilities of Cutwater were classified as held for sale as of December 31, 2014 and presented within Assets held for sale and Liabilities held for sale on the Company's consolidated balance sheet and measured at the lower of its carrying value or fair value less costs to sell. The Company completed this sale effective January 1, 2015, and recorded a gain of approximately \$24 million. This gain was reflected in the results of the Company's corporate segment and included in Other net realized gains (losses) on the

Company's consolidated statements of operations.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 1: Business Developments and Risks and Uncertainties (continued)****Assets and Liabilities Held for Sale by Major Category**

The following table summarizes the components of assets and liabilities held for sale as of December 31, 2014:

In millions	December 31, 2014
Assets	
Investments carried at fair value	\$ 6
Cash and cash equivalents	15
Facility	26
Other assets	4
Assets of consolidated variable interest entities:	
Cash	40
Loans receivable at fair value	711
Total assets held for sale	\$ 802
Liabilities	
Other liabilities	\$ 18
Liabilities of consolidated variable interest entities:	
Variable interest entity notes	431
Payable for loans purchased	323
Total liabilities held for sale	\$ 772

Risks and Uncertainties

The Company's financial statements include estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. The outcome of certain significant risks and uncertainties could cause the Company to revise its estimates and assumptions or could cause actual results to differ from the Company's estimates. The discussion below highlights the significant risks and uncertainties that could have a material effect on the Company's financial statements and business objectives in future periods.

U.S. Public Finance Market Conditions

National's insured portfolio continued to perform satisfactorily against a backdrop of strengthening domestic economic activity. While this trend will generally benefit tax revenues and fees charged for essential municipal services which secure National's insured bond portfolio, some state and local governments and territory obligors National insures remain under financial and budgetary stress. This could lead to an increase in defaults by such entities on the payment of their obligations and losses or impairments on a greater number of the Company's insured transactions. The Company monitors and analyzes these situations and other stressed credits closely, and the overall extent and duration of this stress is uncertain.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 1: Business Developments and Risks and Uncertainties (continued)***MBIA Corp. Recoveries and Insured Portfolio*

MBIA Corp.'s primary focus is the collection of excess spread and put-back recoveries and the mitigation of MBIA Corp.'s insurance exposures, primarily through commutations of insurance policies. MBIA Corp. may make negotiated settlement payments to counterparties and/or forego its right to all or some termination premiums when it commutes insurance exposures.

The amount and timing of projected collections from excess spread from second-lien residential mortgage-backed securities (RMBS) and the put-back recoverable from Credit Suisse Securities (USA) LLC, DLJ Mortgage Capital, Inc., and Select Portfolio Servicing Inc. (collectively, Credit Suisse) are uncertain. Further, the remaining insured portfolio, aside from these exposures, could deteriorate and result in additional significant loss reserves and claim payments. Management's expected liquidity and capital forecasts for MBIA Corp., which include expected put-back recoveries from Credit Suisse and excess spread recoveries, reflect adequate resources to pay claims when due. However, if MBIA Corp. experiences higher than expected claim payments or is unable to terminate the remaining exposures that represent substantial risk to the Company, MBIA Corp. may ultimately have insufficient resources to continue to pay claims, which could cause the New York State Department of Financial Services (NYSDFS) to put MBIA Insurance Corporation, exclusive of MBIA UK and MBIA Mexico, into a rehabilitation or liquidation proceeding. Given the separation of MBIA Inc. and MBIA Corp. as distinct legal entities, the absence of any material intercompany lending agreements or cross defaults between the entities, and the lack of reliance by MBIA Inc. on MBIA Corp. for the receipt of dividends, the Company does not believe that a rehabilitation or liquidation proceeding of MBIA Insurance Corporation by NYSDFS would have any significant long-term liquidity impact on MBIA Inc. or result in a liquidation or similar proceeding of MBIA UK or MBIA Mexico. Such a proceeding could have material adverse consequences for MBIA Corp., including the termination of insured credit default swaps (CDS) contracts for which counterparties may assert market-based claims, the acceleration of debt obligations issued by affiliates and insured by MBIA Corp., the loss of control of MBIA Insurance Corporation to a rehabilitator or liquidator, and unplanned costs.

Refer to Note 5: Loss and Loss Adjustment Expense Reserves for information about MBIA Corp.'s loss reserves and recoveries.

Corporate Liquidity

As of September 30, 2015 and December 31, 2014, the liquidity position of MBIA Inc. was \$306 million and \$498 million, respectively. The term liquidity position refers to cash and liquid assets available for general liquidity purposes. During the nine months ended September 30, 2015, \$228 million was released to MBIA Inc. under the MBIA group's tax sharing agreement (the Tax Escrow Account). Subsequent to September 30, 2015, National declared and paid a dividend of \$114 million to its ultimate parent, MBIA Inc. Based on the Company's projections of National's dividends, payments into the Tax Escrow Account, and other cash inflows, the Company expects that MBIA Inc. will have sufficient cash to satisfy its debt service and general corporate needs. However, MBIA Inc. continues to have liquidity risk which could be triggered by deterioration in the performance of invested assets, interruption of or reduction in dividends received from operating subsidiaries, impaired access to the capital markets, as well as other factors which cannot be anticipated at this time. Furthermore, failure by MBIA Inc. to settle liabilities that are also insured by MBIA Corp. could result in claims on MBIA Corp.

Note 2: Significant Accounting Policies

The Company has disclosed its significant accounting policies in Note 2: Significant Accounting Policies in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. The following significant accounting policies provide an update to those included in the Company's Annual Report on Form 10-K.

Basis of Presentation

Edgar Filing: MBIA INC - Form 10-Q

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X and, accordingly, do not include all of the information and disclosures required by accounting principles generally accepted in the United States of America (GAAP) for annual periods. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the year ended December 31, 2014. The accompanying consolidated financial statements have not been audited by an independent registered public accounting firm in accordance with the standards of the Public Company Accounting Oversight Board (U.S.), but in the opinion of management such financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for the fair statement of the Company s consolidated financial position and results of operations. All material intercompany balances and transactions have been eliminated.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. As additional information becomes available or actual amounts become determinable, the recorded estimates are revised and reflected in operating results.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 2. Significant Accounting Policies (continued)**

The results of operations for the three and nine months ended September 30, 2015 may not be indicative of the results that may be expected for the year ending December 31, 2015. The December 31, 2014 consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by GAAP for annual periods. Certain amounts have been reclassified in the prior year's financial statements to conform to the current presentation. Such reclassifications had no impact on total revenues, expenses, assets, liabilities, shareholders' equity, operating cash flows, investing cash flows, or financing cash flows for all periods presented.

Note 3: Recent Accounting Pronouncements***Recently Adopted Accounting Standards***

Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity (ASU 2014-08)

In April of 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity. ASU 2014-08 changes the criteria for determining whether a disposal of a component or group of components of an entity qualifies for discontinued operations presentation and requires new disclosures. ASU 2014-08 amends the definition of discontinued operation to a disposal of components of an entity that represent strategic shifts that have, or will have, a major effect on an entity's operations and financial results. ASU 2014-08 was effective for interim and annual periods beginning January 1, 2015. The adoption of ASU 2014-08 did not affect the Company's consolidated financial statements.

Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures (ASU 2014-11)

In June of 2014, the FASB issued ASU 2014-11, Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The repurchase agreements and similar transactions guidance is amended by ASU 2014-11 to change the accounting for i.) repurchase-to-maturity transactions to secured borrowing accounting and ii.) linked repurchase financing transactions to secured borrowing accounting. ASU 2014-11 amends disclosure requirements for transfers accounted for as sales, and for repurchase transactions accounted for as secured borrowings. ASU 2014-11 was effective for interim and annual periods beginning January 1, 2015. The adoption of ASU 2014-11 did not affect the Company's consolidated financial statements.

Consolidation (Topic 810): Amendments to the Consolidation Analysis (ASU 2015-02)

In February of 2015, the FASB issued ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis. ASU 2015-02 amends the accounting guidance for consolidation of legal entities including consolidated variable interest entities (VIEs). ASU 2015-02 eliminates the specialized consolidation model and guidance for limited partnerships, amends the conditions for evaluating whether a fee paid to a decision maker or a service provider represents a variable interest in a VIE, amends the related party guidance for the determination of the primary beneficiary of a VIE, and requires certain investment funds designed as VIEs, except money market funds, to apply the amended consolidation guidance. ASU 2015-02 is effective for interim and annual periods beginning January 1, 2016 with early adoption permitted, and is applied on a retrospective or modified retrospective basis. The Company adopted ASU 2015-02 in the second quarter of 2015, and deconsolidated a VIE upon adoption. The adoption of ASU 2015-02 did not materially impact the Company's consolidated financial statements.

The Company has not adopted any other new accounting pronouncements that had a material impact on its consolidated financial statements.

Recent Accounting Developments

Edgar Filing: MBIA INC - Form 10-Q

Revenue from Contracts with Customers (Topic 606) (ASU 2014-09) and Deferral of the Effective Date (ASU 2015-14)

In May of 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). ASU 2014-09 amends the accounting guidance for recognizing revenue for the transfer of goods or services from contracts with customers unless those contracts are within the scope of other accounting standards. In August of 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers (Topic 606) Deferral of the Effective Date. ASU 2015-14 defers the effective date of ASU 2014-09 to interim and annual periods beginning January 1, 2018, and is applied on a retrospective or modified retrospective basis. The Company is evaluating the impact of adopting ASU 2014-09.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 3: Recent Accounting Pronouncements (continued)

Compensation-Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period (A Consensus of the FASB Emerging Issues Task Force) (ASU 2014-12)

In June of 2014, the FASB issued ASU 2014-12, Compensation-Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period. ASU 2014-12 requires that a performance target that affects vesting of share-based payment awards and that could be achieved after an employee's requisite service period be accounted for as a performance condition. ASU 2014-12 is effective for interim and annual periods beginning January 1, 2016 with early adoption permitted, and is applied on a prospective basis or retrospective basis. The adoption of ASU 2014-12 is not expected to materially impact the Company's consolidated financial statements.

Consolidation (Topic 810): Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity (ASU 2014-13)

In August of 2014, the FASB issued ASU 2014-13, Consolidation (Topic 810): Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity. ASU 2014-13 applies to a consolidated collateralized financing entity defined as a consolidated VIE that holds financial assets and issues beneficial interests in those financial assets that are classified as financial liabilities. The Company may elect to measure the financial assets and the financial liabilities of a consolidated collateralized financing entity using a measurement alternative provided in ASU 2014-13. The measurement alternative requires both the financial assets and the financial liabilities of the consolidated collateralized financing entity to be measured using the more observable of the fair value of the financial assets and the fair value of the financial liabilities with the changes in fair value recognized to earnings. Upon adoption, a reporting entity may apply the measurement alternative to existing consolidated collateralized financing entities. ASU 2014-13 is effective for interim and annual periods beginning January 1, 2016 with early adoption permitted. The adoption of ASU 2014-13 is not expected to materially impact the Company's consolidated financial statements.

Presentation of Financial Statements - Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern (ASU 2014-15)

In August of 2014, the FASB issued ASU 2014-15, Presentation of Financial Statements-Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern. ASU 2014-15 requires management to evaluate whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern, and to provide certain disclosures when it is probable that the entity will be unable to meet its obligations as they become due within one year after the date that the financial statements are issued. ASU 2014-15 is effective for the annual period ending December 31, 2016 and for annual periods and interim periods thereafter with early adoption permitted. The adoption of ASU 2014-15 is not expected to materially impact the Company's consolidated financial statements.

Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs (ASU 2015-03)

In April of 2015, the FASB issued ASU 2015-03, Interest-Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs. ASU 2015-03 requires debt issuance costs related to a debt liability measured at amortized cost to be reported in the balance sheet as a direct deduction from the face amount of the debt liability. ASU 2015-03 is effective for interim and annual periods beginning January 1, 2016 with early adoption permitted, and is applied on a retrospective basis. The adoption of ASU 2015-03 is not expected to materially impact the Company's consolidated financial statements.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 4: Variable Interest Entities

Through MBIA's international and structured finance insurance segment, the Company provides credit protection to issuers of obligations that may involve issuer-sponsored special purpose entities (SPEs). An SPE may be considered a VIE to the extent the SPE's total equity at risk is not sufficient to permit the SPE to finance its activities without additional subordinated financial support or its equity investors lack any one of the following characteristics: (i) the power to direct the activities of the SPE that most significantly impact the entity's economic performance or (ii) the obligation to absorb the expected losses of the entity or the right to receive the expected residual returns of the entity. A holder of a variable interest or interests in a VIE is required to assess whether it has a controlling financial interest, and thus is required to consolidate the entity as primary beneficiary. An assessment of a controlling financial interest identifies the primary beneficiary as the variable interest holder that has both of the following characteristics: (i) the power to direct the activities of the VIE that most significantly impact the entity's economic performance and (ii) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE. The primary beneficiary is required to consolidate the VIE. An ongoing reassessment of controlling financial interest is required to be performed based on any substantive changes in facts and circumstances involving the VIE and its variable interests.

The Company evaluates issuer-sponsored SPEs initially to determine if an entity is a VIE, and is required to reconsider its initial determination if certain events occur. For all entities determined to be VIEs, MBIA performs an ongoing reassessment to determine whether its guarantee to provide credit protection on obligations issued by VIEs provides the Company with a controlling financial interest. Based on its ongoing reassessment of controlling financial interest, the Company determines whether a VIE is required to be consolidated or deconsolidated.

The Company makes its determination for consolidation based on a qualitative assessment of the purpose and design of a VIE, the terms and characteristics of variable interests of an entity, and the risks a VIE is designed to create and pass through to holders of variable interests. The Company generally provides credit protection on obligations issued by VIEs, and holds certain contractual rights according to the purpose and design of a VIE. The Company may have the ability to direct certain activities of a VIE depending on facts and circumstances, including the occurrence of certain contingent events, and these activities may be considered the activities of a VIE that most significantly impact the entity's economic performance. The Company generally considers its guarantee of principal and interest payments of insured obligations, given nonperformance by a VIE, to be an obligation to absorb losses of the entity that could potentially be significant to the VIE. At the time the Company determines it has the ability to direct the activities of a VIE that most significantly impact the economic performance of the entity based on facts and circumstances, MBIA is deemed to have a controlling financial interest in the VIE and is required to consolidate the entity as primary beneficiary. The Company performs an ongoing reassessment of controlling financial interest that may result in consolidation or deconsolidation of any VIE.

The Company's advisory services segment provided asset management and advisory services to VIEs. During 2014, the Company consolidated three VIEs as the primary beneficiary, pursuant to this segment's activities. As of December 31, 2014, the Company held approximately \$4 million of the subordinated notes issued by one of the VIEs. The Company had no obligation or commitment to provide additional financial support or liquidity to these VIEs. Effective January 1, 2015, the Company completed the sale of its Cutwater business and deconsolidated these VIEs. Refer to Note 1: Business Developments and Risks and Uncertainties for additional information about the sale of Cutwater.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 4: Variable Interest Entities (continued)***Nonconsolidated VIEs**Insurance*

The following tables present the total assets of nonconsolidated VIEs in which the Company holds a variable interest as of September 30, 2015 and December 31, 2014, through its insurance operations. The following tables also present the Company's maximum exposure to loss for nonconsolidated VIEs and carrying values of the assets and liabilities for its interests in these VIEs as of September 30, 2015 and December 31, 2014. The Company has aggregated nonconsolidated VIEs based on the underlying credit exposure of the insured obligation. The nature of the Company's variable interests in nonconsolidated VIEs is related to financial guarantees, insured CDS contracts and any investments in obligations issued by nonconsolidated VIEs.

The maximum exposure to loss as a result of MBIA's variable interests in VIEs is represented by insurance in force. Insurance in force is the maximum future payments of principal and interest which may be required under commitments to make payments on insured obligations issued by nonconsolidated VIEs.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 4: Variable Interest Entities (continued)***Consolidated VIEs*

The carrying amounts of assets and liabilities of consolidated VIEs were \$5.5 billion and \$5.2 billion, respectively, as of September 30, 2015, and \$5.0 billion and \$4.8 billion, respectively, as of December 31, 2014. The carrying amounts of assets and liabilities are presented separately in *Assets of consolidated variable interest entities* and *Liabilities of consolidated variable interest entities* on the Company's consolidated balance sheets. The carrying amounts of assets and liabilities of consolidated VIEs in the Company's advisory services segment were \$751 million and \$754 million, respectively, as of December 31, 2014, and are presented separately in *Assets held for sale* and *Liabilities held for sale* on the Company's consolidated balance sheets. VIEs are consolidated or deconsolidated based on an ongoing reassessment of controlling financial interest, when events occur or circumstances arise, and whether the ability to exercise rights that constitute power to direct activities of any VIEs are present according to the design and characteristics of these entities. One additional VIE was consolidated during the nine months ended September 30, 2015 and one additional VIE was consolidated during the nine months ended September 30, 2014.

Holders of insured obligations of issuer-sponsored VIEs related to the Company's international and structured finance insurance segment do not have recourse to the general assets of MBIA. In the event of nonpayment of an insured obligation issued by a consolidated VIE, the Company is obligated to pay principal and interest, when due, on the respective insured obligation only. The Company's exposure to consolidated VIEs is limited to the credit protection provided on insured obligations and any additional variable interests held by MBIA.

Note 5: Loss and Loss Adjustment Expense Reserves*Loss and Loss Adjustment Expense Process***U.S. Public Finance Insurance**

U.S. public finance insured transactions consist of municipal bonds, including tax-exempt and taxable indebtedness of U.S. political subdivisions, as well as utility districts, airports, health care institutions, higher educational facilities, student loan issuers, housing authorities and other similar agencies and obligations issued by private entities that finance projects that serve a substantial public purpose. The Company estimates future losses by using probability-weighted scenarios that are customized to each insured transaction. Future loss estimates consider debt service due for each insured transaction, which includes par outstanding and interest due.

As of September 30, 2015 and December 31, 2014, the Company established loss and loss adjustment expense (LAE) reserves totaling \$31 million and \$45 million, respectively, related to U.S. public finance issues. As of December 31, 2014, the Company established insurance loss recoverable of \$4 million related to U.S. public finance issues.

Certain local governments remain under financial and budgetary stress and a few have filed for protection under the United States Bankruptcy Code, or have entered into state statutory proceedings established to assist municipalities in managing through periods of severe fiscal stress. This could lead to an increase in defaults by such entities on the payment of their obligations and losses or impairments on a greater number of the Company's insured transactions. The Company monitors and analyzes these situations closely, however, the overall extent and duration of such events are uncertain and the filing for protection under the United States Bankruptcy Code or entering state statutory proceedings does not necessarily result in a default or indicate that an ultimate loss will occur. As of September 30, 2015 and December 31, 2014, the Company had \$76.6 billion and \$98.9 billion, respectively, of gross par outstanding on general obligations, of which \$79 million and \$152 million, respectively, were reflected on the Company's Classified List. Capital appreciation bonds are reported at the par amount at the time of issuance of the insurance policy. Refer to *Note 6: Loss and Loss Adjustment Expense Reserves* in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for additional information on the Company's surveillance categories.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 5: Loss and Loss Adjustment Expense Reserves (continued)****International and Structured Finance Insurance**

The international and structured finance insurance segment's case basis reserves and insurance loss recoveries recorded in accordance with GAAP do not include estimates for policies insuring credit derivatives or losses and recoveries on financial guarantee VIEs that are eliminated in consolidation. Policies insuring credit derivative contracts are accounted for as derivatives and are carried at fair value in the Company's consolidated financial statements under GAAP. The fair values of insured derivative contracts are influenced by a variety of market and transaction-specific factors that may be unrelated to potential future claim payments under the Company's insurance policies. In the absence of credit impairments on insured derivative contracts or the early termination of such contracts at a loss, the cumulative unrealized losses recorded from these contracts should reverse before or at the maturity of the contracts. Since the Company's insured credit derivatives have similar terms, conditions, risks, and economic profiles to its financial guarantee insurance policies, the Company evaluates them for impairment in the same way that it estimates loss and LAE for its financial guarantee policies. Refer to Note 8: Derivative Instruments for a further discussion of the Company's use of derivatives and their impact on the Company's consolidated financial statements.

RMBS Case Basis Reserves and Recoveries (Financial Guarantees)

The Company's RMBS reserves and recoveries relate to financial guarantee insurance policies. The Company calculated RMBS case basis reserves as of September 30, 2015 for both second and first-lien RMBS transactions using a process called the Roll Rate Methodology. The Roll Rate Methodology is a multi-step process using a database of loan level information, a proprietary internal cash flow model, and a commercially available model to estimate potential losses and recoveries on insured bonds. Roll Rate is defined as the probability that current loans become delinquent and that loans in the delinquent pipeline are charged-off or liquidated. Generally, Roll Rates are calculated for the previous three months and averaged. The loss reserve estimates are based on a probability-weighted average of three scenarios of loan losses (base case, stress case, and an additional stress case).

In calculating ultimate cumulative losses for RMBS, the Company estimates the amount of second-lien loans that are expected to be charged-off (deemed uncollectible by servicers of the transactions) or first-lien loans liquidated in the future. Refer to Note 6: Loss and Loss Adjustment Expense Reserves in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for additional information on the Company's second and first-lien Roll Rate Methodology.

Second-lien RMBS Reserves

The Company's second-lien RMBS case basis reserves as of September 30, 2015 relate to RMBS backed by home equity lines of credit (HELOC) and closed-end second mortgages (CES). As of September 30, 2015 and December 31, 2014, the Company established loss and LAE reserves totaling \$47 million and \$70 million, respectively, related to second-lien RMBS issues after the elimination of \$22 million and \$21 million, respectively, as a result of consolidating VIEs.

The Company monitors portfolio performance on a monthly basis against projected performance, reviewing delinquencies, Roll Rates, and prepayment rates (including voluntary and involuntary). However, loan performance remains difficult to predict and losses may exceed expectations. In the event of a material deviation in actual performance from projected performance, the Company would increase or decrease the case basis reserves accordingly. If actual performance were to remain at the current levels for six additional months compared to the probability-weighted outcome currently used by the Company, the addition to the case basis reserves would be approximately \$32 million.

Second-lien RMBS Recoveries

The Company primarily records two types of recoveries related to insured second-lien RMBS exposures: excess spread that is generated from performing loans in the insured transactions; and put-back claims related to those mortgage loans whose inclusion in insured securitizations failed to comply with representations and warranties (ineligible loans).

Excess Spread

As of September 30, 2015 and December 31, 2014, the Company recorded estimated recoveries of \$411 million and \$523 million, respectively, for the reimbursement of past and future expected claims through excess spread in insured second-lien RMBS transactions after the elimination of \$99 million and \$137 million, respectively, as a result of consolidating VIEs. As of September 30, 2015, \$398 million and \$13 million were included in Insurance loss recoverable and Loss and loss adjustment expense reserves on the Company's consolidated balance sheets, respectively, after the elimination of \$96 million and \$3 million, respectively, as a result of consolidating VIEs. As of December 31, 2014, \$496 million and \$27 million were included in Insurance loss recoverable and Loss and loss adjustment expense reserves on the Company's consolidated balance sheets, respectively, after the elimination of \$132 million and \$5 million, respectively, as a result of consolidating VIEs.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 5: Loss and Loss Adjustment Expense Reserves (continued)**

Excess spread is generated by performing loans within insured second-lien RMBS securitizations and is the difference between interest inflows on mortgage loan collateral and interest outflows on insured beneficial interests. The amount of excess spread depends on the future loss trends (which include future delinquency trends, average time to charge-off delinquent loans, and the availability of pool mortgage insurance), the future spread between Prime and London Interbank Offered Rate interest rates, and borrower refinancing behavior which results in voluntary prepayments. Minor deviations in loss trends and voluntary prepayments may substantially impact the amounts collected from excess spread.

Ineligible Mortgage Loans

To date, MBIA has settled the majority of the Company's put-back claims. Only its claims against Credit Suisse remain outstanding. Settlement amounts have been consistent with the put-back recoveries previously included in the Company's financial statements.

The contract claim remaining with Credit Suisse is related to the inclusion of ineligible mortgage loans in the 2007-2 Home Equity Mortgage Trust securitization. Credit Suisse has challenged the Company's assessment of the ineligibility of individual mortgage loans and the dispute is the subject of litigation for which there is no assurance that the Company will prevail.

As of September 30, 2015 and December 31, 2014, the Company recorded estimated recoveries of \$394 million and \$379 million, respectively, related to its Credit Suisse put-back claims, reflected in Loan repurchase commitments presented under the heading Assets of consolidated variable interest entities on the Company's consolidated balance sheets.

Based on the Company's assessment of the strength of its contractual put-back rights against Credit Suisse, which it is pursuing through litigation claims, as well as on its prior settlements with other sellers/servicers and success of other monolines in litigation against other sellers/servicers, the Company believes it will prevail in enforcing its contractual rights and that it is entitled to collect the full amount of its incurred losses, which totaled \$424 million through September 30, 2015. The Company is also entitled to collect interest on amounts paid; it believes that in context of its put-back litigation, the appropriate rate should be the New York State statutory rate. However, the Company currently calculates its put-back recoveries using the contractual interest rate, which is lower than the New York State statutory rate.

Notwithstanding the foregoing, uncertainty remains with respect to the ultimate outcome of the litigation with Credit Suisse, which is contemplated in the scenario based-modeling the Company uses. The Credit Suisse recovery scenarios are based on the amount of incurred losses measured against certain probabilities of ultimate resolution of the dispute with Credit Suisse. Most of the probability weight is assigned to partial recovery scenarios and are discounted using the current risk-free discount rates associated with the underlying transaction's cash flows.

The Company continues to consider all relevant facts and circumstances in developing its assumptions on expected cash inflows, probability of potential recoveries (including the outcome of litigation) and recovery period. The estimated amount and likelihood of potential recoveries are expected to be revised and supplemented to the extent there are developments in the pending litigation and/or changes to the financial condition of Credit Suisse. While the Company believes it will be successful in realizing its recoveries from its contract claims against Credit Suisse, the ultimate amounts recovered may be materially different from those recorded by the Company given the inherent uncertainty of the manner of resolving the claims (e.g., litigation) and the assumptions used in the required estimation process for accounting purposes which are based, in part, on judgments and other information that are not easily corroborated by historical data or other relevant benchmarks.

First-lien RMBS Reserves

The Company's first-lien RMBS case basis reserves as of September 30, 2015, which primarily relate to RMBS backed by alternative A-paper and subprime mortgage loans, were determined using the Roll Rate Methodology. As of September 30, 2015 and December 31, 2014, the Company's loss and LAE reserves were \$246 million and \$263 million, respectively, related to first-lien RMBS issues.

CDO Reserves

The Company also has loss and LAE reserves on certain transactions within its collateralized debt obligation (CDO) portfolio, including its multi-sector CDO and high-yield corporate CDO asset classes. MBIA 's insured multi-sector CDOs are transactions that include a variety of collateral ranging from corporate bonds to structured finance assets (which includes but are not limited to RMBS-related collateral, multi-sector and corporate CDOs). These transactions were insured as either financial guarantee insurance policies or credit derivatives with the majority currently insured in the form of financial guarantees. MBIA 's high yield corporate CDO portfolio comprises middle-market/special-opportunity corporate loan transactions. These transactions were insured as financial guarantee insurance policies.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 5: Loss and Loss Adjustment Expense Reserves (continued)**

As of September 30, 2015 and December 31, 2014, the Company's loss and LAE reserves were \$149 million and \$111 million, respectively, related to the total CDO financial guarantee insurance portfolio after the elimination of \$226 million and \$225 million, respectively, as a result of consolidating VIEs. For the three and nine months ended September 30, 2015, the Company incurred \$5 million and \$39 million, respectively, of losses and LAE recorded in earnings related to the total CDO financial guarantee insurance portfolio after the elimination of \$14 million and \$1 million, respectively, of expense as a result of consolidating VIEs. In the event of further deteriorating performance of the collateral referenced or held in the total CDO portfolio, the amount of losses estimated by the Company could increase substantially.

Refer to Note 6: Loss and Loss Adjustment Expense Reserves in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for additional information on the Company's process for estimating reserves on these policies. The methods and assumptions for estimating reserves require substantial judgment of the future performance of each transaction. Actual losses will be a function of the proportion of collateral in the pools that default and the loss severities associated with those defaults.

Loss and LAE Activity**Financial Guarantee Insurance Losses (Excluding Derivative and Consolidated VIEs)**

The Company's financial guarantee insurance losses and LAE, net of reinsurance for the three and nine months ended September 30, 2015 and 2014 are presented in the following table:

In millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
U.S. Public Finance Insurance Segment	\$ (7)	\$ (8)	\$ (5)	\$ (5)
International and Structured Finance Insurance Segment:				
Second-lien RMBS	24	16	52	88
First-lien RMBS	18	12	2	39
Other ⁽¹⁾	4	-	30	(40)
Losses and LAE expense (benefit)	\$ 39	\$ 20	\$ 79	\$ 82

(1) - Includes CDOs, non-U.S. public finance and other issues.

For the three months ended September 30, 2015, losses and LAE primarily related to decreases in projected collections from excess spread within the insured second-lien RMBS securitizations and increases in expected payments on first-lien RMBS securitizations.

For the three months ended September 30, 2014, losses and LAE primarily related to decreases of expected recoveries on an international road transaction and projected collections from excess spread within insured second-lien RMBS securitizations, partially offset by decreases in expected payments on an international road transaction.

For the nine months ended September 30, 2015, losses and LAE primarily related to decreases in projected collections from excess spread within the insured second-lien RMBS securitizations and increases in expected payments on CDOs.

Edgar Filing: MBIA INC - Form 10-Q

For the nine months ended September 30, 2014, losses and LAE primarily related to decreases in projected collections from excess spread within the insured second-lien RMBS securitizations, partially offset by decreases in expected payments of an international road transaction.

Costs associated with remediating insured obligations assigned to the Company's surveillance categories are recorded as LAE and included in Losses and loss adjustment expenses on the Company's consolidated statements of operations. For the three months ended September 30, 2015 and 2014, gross LAE related to remediating insured obligations were \$5 million and \$3 million, respectively. For the nine months ended September 30, 2015 and 2014, gross LAE related to remediating insured obligations were \$10 million and \$37 million, respectively.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 5: Loss and Loss Adjustment Expense Reserves (continued)**

The following table provides information about the financial guarantees and related claim liability included in each of MBIA's surveillance categories as of September 30, 2015:

\$ in millions	Surveillance Categories				Total
	Cautious List Low	Cautious List Medium	Cautious List High	Classified List	
Number of policies	156	19	76	166	417

(1) - An issue represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

(2) - Represents contractual principal and interest payments due by the issuer of the obligations insured by MBIA.

(3) - Represents discount related to Gross Claim Liability and Gross Potential Recoveries.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 5: Loss and Loss Adjustment Expense Reserves (continued)**

The gross claim liability in the preceding tables represents the Company's estimate of undiscounted probability-weighted future claim payments. As of September 30, 2015, the gross claim liability primarily related to insured first-lien RMBS issues and CDOs. As of December 31, 2014, the gross claim liability primarily related to insured first and second-lien RMBS issues, CDOs and an international road transaction.

The gross potential recoveries represent the Company's estimate of undiscounted probability-weighted recoveries of actual claim payments and recoveries of estimated future claim payments. As of September 30, 2015, the gross potential recoveries principally related to insured second-lien RMBS. As of December 31, 2014, the gross potential recoveries principally related to insured second-lien RMBS and U.S. public finance issues. The Company's recoveries have been, and remain based on either salvage rights, the rights conferred to MBIA through the transactional documents (inclusive of the insurance agreement), or subrogation rights embedded within financial guarantee insurance policies. Expected salvage and subrogation recoveries, as well as recoveries from other remediation efforts, reduce the Company's claim liability. Once a claim payment has been made, the claim liability has been satisfied and MBIA's right to recovery is no longer considered an offset to future expected claim payments, it is recorded as a salvage asset. The amount of recoveries recorded by the Company is limited to paid claims plus the present value of projected future claim payments. As claim payments are made, the recorded amount of potential recoveries may exceed the remaining amount of the claim liability for a given policy. The gross claim liability and gross potential recoveries reflect the elimination of claim liabilities and potential recoveries related to VIEs consolidated by the Company.

The following table presents the components of the Company's loss and LAE reserves and insurance loss recoverable as reported on the Company's consolidated balance sheets as of September 30, 2015 and December 31, 2014 for insured obligations within MBIA's Classified List. The loss reserves (claim liability) and insurance claim loss recoverable included in the following table represent the present value of the probability-weighted future claim payments and recoveries reported in the preceding tables.

In millions	As of September 30, 2015	As of December 31, 2014
Loss reserves (claim liability)	\$ 447	\$ 464
LAE reserves	33	42
Loss and LAE reserves	\$ 480	\$ 506
Insurance claim loss recoverable	\$ (437)	\$ (533)
LAE insurance loss recoverable	-	-
Insurance loss recoverable	\$ (437)	\$ (533)
Reinsurance recoverable on unpaid losses	\$ 6	\$ 6
Reinsurance recoverable on unpaid LAE reserves	-	1
Reinsurance recoverable on paid and unpaid losses	\$ 6	\$ 7

As of September 30, 2015, loss and LAE reserves include \$700 million of reserves for expected future payments, partially offset by expected recoveries of such future payments of \$220 million. As of December 31, 2014, loss and LAE reserves include \$653 million of reserves for expected future payments, partially offset by expected recoveries of such future payments of \$147 million.

Edgar Filing: MBIA INC - Form 10-Q

As of September 30, 2015 and December 31, 2014, the insurance loss recoverable primarily related to expected future recoveries on second-lien RMBS transactions resulting from excess spread generated by performing loans in such transactions. The decrease in insurance loss recoverable was primarily due to actual collections from excess spread within insured second-lien RMBS securitizations.

The following table presents changes in the Company's loss and LAE reserves for the nine months ended September 30, 2015. Changes in loss and LAE reserves attributable to the accretion of the claim liability discount, changes in discount rates, changes in amount and timing of estimated payments and recoveries, changes in assumptions and changes in LAE reserves are recorded in Losses and loss adjustment expenses in the Company's consolidated statements of operations. As of September 30, 2015, the weighted average risk-free rate used to discount the Company's loss reserves (claim liability) was 1.56%. LAE reserves are generally expected to be settled within a one-year period and are not discounted.

Changes in Loss and LAE Reserves for the Nine Months Ended September 30, 2015								
In millions								
Gross Loss and LAE Reserves as of December 31, 2014	Loss Payments for Cases with Reserves	Accretion of Claim Liability Discount	Changes in Discount Rates	Changes in Assumptions	Changes in Unearned Premium Revenue	Changes in LAE Reserves	Other ⁽¹⁾	Gross Loss and LAE Reserves as of September 30, 2015
\$ 506	\$ (42)	\$ 6	\$ (28)	\$ 46	\$ 13	\$ (9)	\$ (12)	\$ 480

(1) - Primarily changes in amount and timing of payments.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 5: Loss and Loss Adjustment Expense Reserves (continued)**

The decrease in the Company's gross loss and LAE reserves reflected in the preceding table was primarily related to actual loss payments associated with first and second-lien RMBS issues and changes in discount rates on U.S. public finance issues. These were partially offset by changes in assumptions on U.S. public finance issues and changes in timing of payments on insured first and second-lien RMBS issues.

Current period changes in the Company's estimate of potential recoveries may be recorded as an insurance loss recoverable asset, netted against the gross loss and LAE reserve liability, or both. The following table presents changes in the Company's insurance loss recoverable and changes in recoveries on unpaid losses reported within the Company's claim liability for the nine months ended September 30, 2015. Changes in insurance loss recoverable attributable to the accretion of the discount on the recoverable, changes in discount rates, changes in amount and timing of estimated collections, changes in assumptions and changes in LAE recoveries are recorded in Losses and loss adjustment expenses in the Company's consolidated statements of operations.

**Changes in Insurance Loss Recoverable and Recoveries on Unpaid Losses
for the Nine Months Ended September 30, 2015**

In millions	As of December 31, 2014	Collections for Cases with Recoveries	Accretion of Recoveries	Changes in Discount Rates	Changes in Assumptions	Changes in LAE Recoveries	Other ⁽¹⁾	As of September 30, 2015
Insurance loss recoverable	\$ 533	\$ (56)	\$ 6	\$ 6	\$ (24)	\$ -	\$ (28)	\$ 437
Recoveries on unpaid losses	147	-	2	1	71	(1)	-	220
Total	\$ 680	\$ (56)	\$ 8	\$ 7	\$ 47	\$ (1)	\$ (28)	\$ 657

(1) - Primarily changes in amount and timing of collections.

The decrease in the Company's insurance loss recoverable and recoveries on unpaid losses during 2015 was primarily due to changes in assumptions on first and second-lien RMBS issues and an international road transaction, actual collections associated with first and second-lien RMBS issues and changes in the amount of expected collections on first and second-lien RMBS issues. These were partially offset by changes in assumptions on CDOs.

Note 6: Fair Value of Financial Instruments**Fair Value Measurement**

Fair value is a market-based measurement considered from the perspective of a market participant. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those which it believes market participants would use in pricing an asset or liability at the measurement date. The fair value measurement of financial instruments held or issued by the Company are determined through the use of observable market data when available. Market data is obtained from a variety of third-party sources, including dealer quotes. If dealer quotes are not available for an instrument that is infrequently traded, the Company uses alternate valuation methods, including either dealer quotes for similar instruments or modeling using market data inputs. The use of alternate valuation methods generally requires considerable judgment in the application of estimates and assumptions and changes to such estimates and assumptions may produce materially different fair values.

Edgar Filing: MBIA INC - Form 10-Q

The accounting guidance for fair value measurement establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available and reliable. Observable inputs are those the Company believes that market participants would use in pricing an asset or liability based on available market data. Unobservable inputs are those that reflect the Company's beliefs about the assumptions market participants would use in pricing an asset or liability based on available information. The fair value hierarchy is categorized into three levels based on the observability and reliability of inputs, as follows:

Level 1 Valuations based on quoted prices in active markets for identical assets or liabilities that the Company can access. Valuations are based on quoted prices that are readily and regularly available in an active market, with significant trading volumes.

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly. Level 2 assets include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, securities which are priced using observable inputs and derivative contracts whose values are determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 6: Fair Value of Financial Instruments (continued)**

Level 3 Valuations based on inputs that are unobservable and supported by little or no market activity and that are significant to the overall fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques where significant inputs are unobservable, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The availability of observable inputs can vary from financial instrument to financial instrument and period to period and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new and not yet established in the marketplace, and other characteristics particular to the product. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the Company assigns the level in the fair value hierarchy for which the fair value measurement in its entirety falls, based on the least observable input that is significant to the fair value measurement.

Financial Assets (excluding derivative assets)

Financial assets, excluding derivative assets, held by the Company primarily consist of investments in debt securities. Substantially all of the Company's investments are priced by independent third parties, including pricing services and brokers. Typically, the Company receives one pricing service value or broker quote for each instrument, which represents a non-binding indication of value. The Company reviews the assumptions, inputs and methodologies used by pricing services and brokers to obtain reasonable assurance that the prices used in its valuations reflect fair value. When the Company believes a third-party quotation differs significantly from its internally developed expectation of fair value, whether higher or lower, the Company reviews its data or assumptions with the provider. This review includes comparing significant assumptions such as prepayment speeds, default ratios, forward yield curves, credit spreads and other significant quantitative inputs to internal assumptions, and working with the price provider to reconcile the differences. The price provider may subsequently provide an updated price. In the event that the price provider does not update its price, and the Company still does not agree with the price provided, the Company will obtain a price from another third-party provider or use an internally developed price which it believes represents the fair value of the investment. The fair values of investments for which internal prices were used were not significant to the aggregate fair value of the Company's investment portfolio as of September 30, 2015 or December 31, 2014. All challenges to third-party prices are reviewed by staff of the Company with relevant expertise to ensure reasonableness of assumptions.

Financial Liabilities (excluding derivative liabilities)

Financial liabilities, excluding derivative liabilities, issued by the Company primarily consist of debt issued for general corporate purposes within its corporate segment, medium-term notes (MTNs), investment agreements, debt issued by consolidated VIEs and warrants. Investment agreements, MTNs, and corporate debt are typically recorded at face value adjusted for premiums or discounts. The majority of the financial liabilities that the Company has elected to fair value or that require fair value reporting or disclosures are valued based on the estimated value of the underlying collateral, the Company's or a third-party's estimate of discounted cash flow model estimates, or quoted market values for similar products. These valuations include adjustments for expected nonperformance risk of the Company.

Derivative Liabilities

The Company's derivative liabilities are primarily insured credit derivatives that reference structured pools of cash securities and CDS. The Company generally insured the most senior liabilities of such transactions, and at the inception of transactions its exposure generally had more subordination than needed to achieve triple-A ratings from credit rating agencies. The types of collateral underlying its insured derivatives consist of cash securities and CDS referencing primarily corporate obligations, asset-backed securities (ABS), RMBS, commercial mortgage-backed securities (CMBS), commercial real estate (CRE) loans, and CDOs.

The Company's insured credit derivative contracts are non-traded structured credit derivative transactions. Since insured derivatives are highly customized and there is generally no observable market for these derivatives, the Company estimates their fair values in a hypothetical market based on internal and third-party models simulating what a similar company would charge to assume the Company's position in the transaction at

Edgar Filing: MBIA INC - Form 10-Q

the measurement date. This pricing would be based on the expected loss of the exposure. The Company reviews its valuation model results on a quarterly basis to assess the appropriateness of the assumptions and results in light of current market activity and conditions. This review is performed by internal staff with relevant expertise. If live market spreads or securities prices are observable for similar transactions, those spreads are an integral part of the analysis. New insured transactions that resemble existing (previously insured) transactions, if any, would be considered, as well as negotiated settlements of existing transactions.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

The Company may from time to time make changes in its valuation techniques if the change results in a measurement that it believes is equally or more representative of fair value under current circumstances.

Internal Review Process

All significant financial assets and liabilities are reviewed by a committee created by the Company to ensure compliance with the Company's policies and risk procedures in the development of fair values of financial assets and liabilities. This valuation committee reviews, among other things, key assumptions used for internally developed prices, significant changes in sources and uses of inputs, including changes in model approaches, and any adjustments from third-party inputs or prices to internally developed inputs or prices. The committee also reviews any significant impairment or improvements in fair values of the financial instruments from prior periods. Occasionally, the committee will consult with the Company's valuation experts to better understand key methods and assumptions used for the determination of fair value, including understanding significant changes in fair values. The committee is comprised of senior finance team members with relevant experience in the financial instruments their committee is responsible for. For each quarter, the committee documents their agreement with the fair values developed by management of the Company as reported in the quarterly and annual financial statements.

Valuation Techniques

Valuation techniques for financial instruments measured at fair value or disclosed at fair value are described below.

Fixed-Maturity Securities (including short-term investments) Held as Available-For-Sale, Investments Carried at Fair Value, Investments Pledged as Collateral, Investments Held-to-Maturity, and Other Investments

These investments include investments in U.S. Treasury and government agencies, state and municipal bonds, foreign governments, corporate obligations, mortgage-backed securities (MBS), ABS, money market securities, and perpetual debt and equity securities.

These investments are generally valued based on recently executed transaction prices or quoted market prices. When quoted market prices are not available, fair value is generally determined using quoted prices of similar investments or a valuation model based on observable and unobservable inputs. Inputs vary depending on the type of investment. Observable inputs include contractual cash flows, interest rate yield curves, CDS spreads, prepayment and volatility scores, diversity scores, cross-currency basis index spreads, and credit spreads for structures similar to the financial instrument in terms of issuer, maturity and seniority. Unobservable inputs include cash flow projections and the value of any credit enhancement.

The fair value of the held-to-maturity (HTM) investments is determined using discounted cash flow models. Key inputs include unobservable cash flows projected over the expected term of the investment discounted using observable interest rate yield curves of similar securities.

Investments based on quoted market prices of identical investments in active markets are classified as Level 1 of the fair value hierarchy. Level 1 investments generally consist of U.S. Treasury and government agency, foreign government, money market securities and perpetual debt and equity securities. Quoted market prices of investments in less active markets, as well as investments which are valued based on other than quoted prices for which the inputs are observable, such as interest rate yield curves, are categorized in Level 2 of the fair value hierarchy. Investments that contain significant inputs that are not observable are categorized as Level 3.

Cash and Cash Equivalents, Receivable for Investments Sold, Securities Sold Not Yet Purchased, Payable for Investments Purchased, and Accrued Investment Income

Edgar Filing: MBIA INC - Form 10-Q

The carrying amounts of cash and cash equivalents, receivable for investments sold, securities sold, not yet purchased, payable for investments purchased, and accrued investment income approximate fair values due to the short-term nature and credit worthiness of these instruments. These items are categorized in Level 1 or Level 2 of the fair value hierarchy.

Loans Receivable at Fair Value

Loans receivable at fair value are comprised of loans held by consolidated VIEs consisting of corporate and residential mortgage loans. Fair values of commercial loans are obtained from a pricing service and determined using actively quoted prices obtained from multiple market participants. Fair values of residential mortgage loans are determined using quoted prices for MBS issued by the respective VIE and adjusted for the fair values of the financial guarantees provided by MBIA Corp. on the related MBS. Loans receivable at fair value are categorized in Level 2 or Level 3 of the fair value hierarchy based on the input that is significant to the fair value measurement in its entirety.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Loan Repurchase Commitments

Loan repurchase commitments are obligations owed by the sellers/servicers of mortgage loans to either MBIA as reimbursement of paid claims or to the RMBS trusts as defined in the transaction documents. Loan repurchase commitments are assets of the consolidated VIEs. This asset represents the rights of MBIA against the sellers/servicers for breaches of representations and warranties that the securitized residential mortgage loans sold to the trust to comply with stated underwriting guidelines and for the sellers/servicers to cure, replace, or repurchase mortgage loans. Fair value measurements of loan repurchase commitments represent the amounts owed by the sellers/servicers to MBIA as reimbursement of paid claims. Loan repurchase commitments are not securities and no quoted prices or comparable market transaction information are observable or available. Loan repurchase commitments at fair value are categorized in Level 3 of the fair value hierarchy. Fair values of loan repurchase commitments are determined using discounted cash flow techniques based on inputs including:

breach rates representing the rate at which the sellers/servicers failed to comply with stated representations and warranties;

recovery rates representing the estimates of future cash flows for the asset, including estimates about possible variations in the amount of cash flows expected to be collected;

expectations about possible variations in the timing of collections of the cash flows; and

time value of money, represented by the rate on risk-free monetary assets.

Long-term Debt

Long-term debt consists of notes, debentures, surplus notes and accrued interest on this debt. The fair value of long-term notes, debentures and surplus notes are estimated based on quoted prices for the identical or similar securities. The fair value of the accrued interest expense on the surplus notes due in 2033 is determined based on the scheduled interest payments discounted by the market's perception of the credit risk related to the repayment of the surplus notes. The credit risk related to the repayment of the surplus notes is based on recent trades of the surplus notes. The deferred interest payment will be due on the first business day on or after which the Company obtains approval to make such payment.

The carrying amounts of accrued interest expense on all other long-term debt approximate fair value due to the short-term nature of these instruments. Long-term debt is categorized as Level 2 of the fair value hierarchy.

Medium-Term Notes

The fair values of certain MTNs are based on quoted market prices provided by third-party sources, where available. When quoted market prices are not available, the Company applies a matrix pricing grid based on the quoted market prices received and the MTNs' stated maturity and interest rate to determine fair value. Nonperformance risk is included in the quoted market prices and the matrix pricing grid. The Company has elected to record these MTNs at fair value as they contain embedded derivatives which cannot accurately be separated from the host debt instrument and fair valued separately, therefore, these MTNs are carried at fair value with changes in fair value reflected in earnings. The remaining MTNs, which are not carried at fair value, do not contain embedded derivatives. As these MTNs are illiquid and the prices reflect

significant unobservable inputs, they are categorized as Level 3 of the fair value hierarchy.

Investment Agreements

The fair values of investment agreements are determined using discounted cash flow techniques based on contractual cash flows and observable interest rates currently being offered for similar agreements with comparable maturity dates. Investment agreements contain collateralization and termination agreements that substantially mitigate the nonperformance risk of the Company. As the terms of the notes are private, and the timing and amount of contractual cash flows are not observable, these investment agreements are categorized as Level 3 of the fair value hierarchy.

Variable Interest Entity Notes

The fair values of VIE notes are determined based on recently executed transaction prices or quoted prices where observable. When position-specific quoted prices are not observable, fair values are based on quoted prices of similar securities. Fair values based on quoted prices of similar securities may be adjusted for factors unique to the securities, including any credit enhancement. When observable quoted prices are not available, fair value is determined based on discounted cash flow techniques of the underlying collateral using observable and unobservable inputs. Observable inputs include interest rate yield curves and bond spreads of similar securities. Unobservable inputs include the value of any credit enhancement. VIE notes are categorized in Level 2 or Level 3 of the fair value hierarchy based on the lowest level input that is significant to the fair value measurement in its entirety.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 6: Fair Value of Financial Instruments (continued)***Variable Interest Entity Derivatives*

The VIEs have entered into derivative transactions consisting of cross currency swaps, interest rate derivatives and interest rate caps. Fair values of over-the-counter (OTC) derivatives are determined using valuation models based on observable and/or unobservable inputs. These observable and market-based inputs include interest rates and volatilities. These derivatives are categorized in Level 2 or Level 3 of the fair value hierarchy based on the input that is significant to the fair value measurement in its entirety.

Derivatives

The corporate segment has entered into derivative transactions primarily consisting of interest rate swaps. Fair values of OTC derivatives are determined using valuation models based on observable inputs, nonperformance risk of the Company's own credit and nonperformance risk of the counterparties. Observable and market-based inputs include interest rate yields, credit spreads and volatilities. These derivatives are categorized in Level 2 or Level 3 of the fair value hierarchy based on the lowest level input that is significant to the fair value measurement in its entirety.

The Company has policies and procedures in place regarding counterparties, including review and approval of the counterparty and the Company's exposure limit, collateral posting requirements, collateral monitoring and margin calls on collateral. The Company manages counterparty credit risk on an individual counterparty basis through master netting agreements covering derivative transactions in the corporate segment. These agreements allow the Company to contractually net amounts due from a counterparty with those amounts due to such counterparty when certain triggering events occur. The Company only executes swaps under master netting agreements, which typically contain mutual credit downgrade provisions that generally provide the ability to require assignment or termination in the event either the Company or the counterparty is downgraded below a specified credit rating. The netting agreements minimize the potential for losses related to credit exposure and thus serve to mitigate the Company's nonperformance risk under these derivatives.

In certain cases, the Company also manages credit risk through collateral agreements that give the Company the right to hold or the obligation to provide collateral when the current market value of derivative contracts exceeds an exposure threshold. Under these agreements, the Company may provide U.S. Treasury and other highly rated securities or cash to secure the derivative. The delivery of high-quality collateral can minimize credit exposure and mitigate the potential for nonperformance risk impacting the fair values of the derivatives.

Derivatives Insurance

The derivative contracts insured by the Company cannot be legally traded and generally do not have observable market prices. The Company determines the fair values of insured credit derivatives using valuation models. The valuation models are consistently applied from period to period, with refinements to the fair value estimation approach being applied as and when the information becomes available. Negotiated settlements are also considered when determining fair value to validate the fair value estimates determined by the valuation models and to determine the best available estimate of fair value from the perspective of a market participant.

Approximately 88% of the balance sheet fair value of insured credit derivatives as of September 30, 2015 was valued based on the Binomial Expansion Technique (BET) Model. Approximately 12% of the balance sheet fair value of insured credit derivatives as of September 30, 2015 was valued based on the internally developed Direct Price Model and the Dual Default model. The valuation of insured derivatives includes the impact of its credit standing. All of these derivatives are categorized as Level 3 of the fair value hierarchy as their fair value is derived using significant unobservable inputs.

The Company has also entered into a derivative contract as a result of a commutation. The fair value of the derivative is determined using a discounted cash flow model. Key inputs include unobservable cash flows projected over the expected term of the derivative, discounted using observable discount rates and CDS spreads.

Description of the BET Model

Valuation Model Overview

The Company uses the BET Model to estimate what a bond insurer would charge to guarantee a transaction at the measurement date, based on the market-implied default risk of the underlying collateral and the remaining structural protection in a deductible or subordination.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

Inputs to the process of determining fair value for structured transactions using the BET Model include estimates of collateral loss, allocation of loss to separate tranches of the capital structure, and calculation of the change in value.

BET Model Inputs

a. Credit spreads

The average spread of collateral is a key input as the Company assumes credit spreads reflect the market's assessment of default probability. Collateral assets are generally considered on an average basis rather than being modeled on an individual basis. Spreads are obtained from market data sources published by third parties (e.g., dealer spread tables for assets most closely resembling collateral within the Company's transactions) as well as collateral-specific spreads on the underlying reference obligations provided by trustees or market sources. The Company also calculates spreads based on quoted prices and on internal assumptions about expected life, when pricing information is available and spread information is not.

Over time, the data inputs change as new sources become available, existing sources are discontinued or are no longer considered to be reliable or the most appropriate. It is the Company's preference to use more observable spread inputs defined above. However, the Company may on occasion move to less observable spread inputs due to the discontinuation of data sources or due to the Company considering certain spread inputs no longer representative of market spreads.

b. Diversity Scores

Diversity scores are a means of estimating the diversification in a portfolio. The diversity score estimates the number of uncorrelated assets that are assumed to have the same loss distribution as the actual portfolio of correlated assets. While diversity score is a required input into the BET model, due to current high levels of default within the collateral of the structures, diversity score does not have a significant impact on valuation.

c. Recovery Rate

The recovery rate represents the percentage of par expected to be recovered after an asset defaults, indicating the severity of a potential loss. MBIA generally uses rating agency recovery assumptions which may be adjusted to account for differences between the collateral used by the rating agencies and the actual collateral in MBIA-insured transactions. The Company may also adjust rating agency assumptions based on the performance of the collateral manager and on empirical market data.

d. Nonperformance Risk

The Company's valuation methodology for insured credit derivative liabilities incorporates MBIA Corp.'s own nonperformance risk. The Company calculates the fair value by discounting the market value loss estimated through the BET Model at discount rates which include MBIA Corp.'s CDS spreads as of September 30, 2015. The CDS spreads assigned to each deal are based on the weighted average life of the deal. The Company limits the nonperformance impact so that the derivative liability could not be lower than MBIA Corp.'s recovery derivative price multiplied by the unadjusted derivative liability.

Overall Model Results

As of September 30, 2015 and December 31, 2014, the Company's net insured CDS derivative liability was \$121 million and \$244 million, respectively, based on the results of the aforementioned models. A significant driver of changes in fair value is MBIA Corp.'s nonperformance risk. In aggregate, the nonperformance calculation resulted in a pre-tax net insured derivative liability that was \$42 million and \$92 million

Edgar Filing: MBIA INC - Form 10-Q

lower than the net liability that would have been estimated if MBIA Corp. excluded nonperformance risk in its valuation as of September 30, 2015 and December 31, 2014, respectively. Nonperformance risk is a fair value concept and does not contradict MBIA Corp. 's internal view, based on fundamental credit analysis of MBIA Corp. 's economic condition, that MBIA Corp. will be able to pay all claims when due.

Warrants

Stock warrants issued by the Company are valued using the Black-Scholes model and are recorded at fair value. Inputs into the warrant valuation include the Company 's stock price, a volatility parameter, interest rates, and dividend data. As all significant inputs are market-based and observable, warrants are categorized as Level 2 of the fair value hierarchy.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 6: Fair Value of Financial Instruments (continued)***Facility*

In the fourth quarter of 2013, the Company approved and initiated a plan to sell its Armonk, New York facility and classified it as held for sale as of December 31, 2014. In May of 2015, the Company completed the sale of this facility. As of December 31, 2014, fair market value was estimated based on an independent third-party appraisal. This item is categorized as Level 2 of the fair value hierarchy.

Financial Guarantees

Gross Financial Guarantees The fair value of gross financial guarantees is determined using discounted cash flow techniques based on inputs that include (i) assumptions of expected losses on financial guarantee policies where loss reserves have not been recognized, (ii) amount of losses expected on financial guarantee policies where loss reserves have been established, net of expected recoveries, (iii) the cost of capital reserves required to support the financial guarantee liability, (iv) operating expenses, and (v) discount rates. The MBIA Corp. CDS spread and recovery rate are used as the discount rate for MBIA Corp., while the CDS spread and recovery rate of a similar municipal bond insurance company are used as the discount rate for National, as National does not have a published CDS spread and recovery rate.

The carrying value of the Company's gross financial guarantees consists of unearned premium revenue and loss and LAE reserves, net of the insurance loss recoverable as reported on MBIA's consolidated balance sheets.

Ceded Financial Guarantees The fair value of ceded financial guarantees is determined by applying the percentage ceded to reinsurers to the related fair value of the gross financial guarantees. The carrying value of ceded financial guarantees consists of prepaid reinsurance premiums and reinsurance recoverable on paid and unpaid losses as reported within Other assets on the Company's consolidated balance sheets.

Significant Unobservable Inputs

The following tables provide quantitative information regarding the significant unobservable inputs used by the Company for assets and liabilities measured at fair value on a recurring basis as of September 30, 2015 and December 31, 2014. These tables exclude inputs used to measure fair value that are not developed by the Company, such as broker prices and other third-party pricing service valuations.

In millions	Fair Value as of September 30, 2015	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Assets of consolidated VIEs:				
Loans receivable at fair value	\$ 1,351	Market prices adjusted for financial guarantees provided to VIE obligations	Impact of financial guarantee	0% - 6% (2%)
Loan repurchase commitments	394	Discounted cash flow	Recovery rates ⁽¹⁾ Breach rates ⁽¹⁾	
Liabilities of consolidated VIEs:				
Variable interest entity notes	1,310	Market prices of VIE assets adjusted for financial guarantees provided	Impact of financial guarantee	0% - 44% (9%)
Credit derivative liabilities, net:				
CMBS	105	BET Model	Recovery rates	25% - 90% (66%)

Edgar Filing: MBIA INC - Form 10-Q

			Nonperformance risk	19% - 29% (21%)
			Weighted average life (in years)	1.1 - 1.7 (1.4)
			CMBS spreads	0% - 67% (20%)
Multi-sector CDO	5	Direct Price Model	Nonperformance risk	48% - 48% (48%)
Other	11	BET Model and Dual Default	Recovery rates	42% - 45% (45%)
			Nonperformance risk	48% - 48% (48%)
			Weighted average life (in years)	0.8 - 7.4 (2.1)
Other derivative liabilities	22	Discounted cash flow	Cash flows	\$0 - \$83 (\$42) ⁽²⁾

(1) - Recovery rates and breach rates include estimates about potential variations in the outcome of litigation with a counterparty.

(2) - Midpoint of cash flows are used for the weighted average.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 6: Fair Value of Financial Instruments (continued)**

In millions	Fair Value as of December 31, 2014	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Assets of consolidated VIEs:				
Loans receivable at fair value	\$ 1,431	Market prices adjusted for financial guarantees provided to VIE obligations	Impact of financial guarantee	0% - 10% (2%)
Loan repurchase commitments	379	Discounted cash flow	Recovery rates ⁽¹⁾ Breach rates ⁽¹⁾	
Liabilities of consolidated VIEs:				
Variable interest entity notes	735	Market prices of VIE assets adjusted for financial guarantees provided	Impact of financial guarantee	0% - 35% (16%)
Credit derivative liabilities, net:				
CMBS	224	BET Model	Recovery rates	25% - 90% (59%)
			Nonperformance risk	12% - 29% (25%)
			Weighted average life (in years)	1.3 - 3.2 (2.3)
			CMBS spreads	0% - 41% (19%)
Multi-sector CDO	9	Direct Price Model	Nonperformance risk	53% - 53% (53%)
Other	11	BET Model and Dual Default	Recovery rates	42% - 45% (45%)
			Nonperformance risk	41% - 51% (50%)
			Weighted average life (in years)	0.2 - 7.9 (1.1)
Other derivative liabilities	24	Discounted cash flow	Cash flows	\$0 - \$83 (\$42) ⁽²⁾

(1) - Recovery rates and breach rates include estimates about potential variations in the outcome of litigation with a counterparty.

(2) - Midpoint of cash flows are used for the weighted average.

Sensitivity of Significant Unobservable Inputs

The significant unobservable input used in the fair value measurement of the Company's loans receivable at fair value of consolidated VIEs is the impact of the financial guarantee. The fair value of loans receivable is calculated by subtracting the value of the financial guarantee from the market value of VIE liabilities. The value of a financial guarantee is estimated by the Company as the present value of expected cash payments under the policy. As expected cash payments provided by the Company under the insurance policy increase, there is a lower expected cash flow on the underlying loans receivable of the VIE. This results in a lower fair value of the loans receivable in relation to the obligations of the VIE.

The significant unobservable inputs used in the fair value measurement of the Company's loan repurchase commitments of consolidated VIEs are the recovery rates and breach rates. Recovery rates reflect the estimates of future cash flows reduced for litigation delays and risks and/or potential financial distress of the sellers/servicers. The estimated recoveries of the loan repurchase commitments may differ from the actual recoveries that may be received in the future. Breach rates represent the rate at which mortgages fail to comply with stated representations and warranties of the sellers/servicers. Significant increases or decreases in the recovery rates and the breach rates would result in significantly higher or lower fair values of the loan repurchase commitments, respectively. Additionally, changes in the legal environment and the ability of the counterparties to pay would impact the recovery rate assumptions, which could significantly impact the fair value measurement. Any significant challenges by the counterparties to the Company's determination of breaches of representations and warranties could significantly adversely impact the fair value measurement. Recovery rates and breach rates are determined independently. Changes in one input will not necessarily have any impact on the other input.

Edgar Filing: MBIA INC - Form 10-Q

The significant unobservable input used in the fair value measurement of the Company's VIE notes of consolidated VIEs is the impact of the financial guarantee. The fair value of VIE notes is calculated by adding the value of the financial guarantee to the market value of VIE assets. The value of a financial guarantee is estimated by the Company as the present value of expected cash payments under the policy. As the value of the guarantee provided by the Company to the obligations issued by the VIE increases, the credit support adds value to the liabilities of the VIE. This results in an increase in the fair value of the liabilities of the VIE.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 6: Fair Value of Financial Instruments (continued)

The significant unobservable inputs used in the fair value measurement of MBIA Corp.'s CMBS credit derivatives, which are valued using the BET Model, are CMBS spreads, recovery rates, nonperformance risk and weighted average life. The CMBS spread is an indicator of credit risk of the collateral securities. The recovery rate represents the percentage of notional expected to be recovered after an asset defaults, indicating the severity of a potential loss. The nonperformance risk is an assumption of MBIA Corp.'s own ability to pay and whether MBIA Corp. will have the necessary resources to pay the obligations as they come due. Weighted average life is based on the Company's estimate of when the principal of the underlying collateral of the CMBS structure will be repaid. A significant increase or decrease in CMBS spreads would result in an increase or decrease in the fair value of the derivative liability, respectively. A significant increase in weighted average life can result in an increase or decrease in the fair value of the derivative liability, depending on the discount rate and the timing of significant losses. Any significant increase or decrease in recovery rates, or MBIA Corp.'s nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively. CMBS spreads, recovery rates, nonperformance risk and weighted average lives are determined independently. Changes in one input will not necessarily have any impact on the other inputs.

The significant unobservable input used in the fair value measurement of MBIA Corp.'s multi-sector CDO credit derivatives, which are valued using the Direct Price Model, is nonperformance risk. The nonperformance risk is an assumption of MBIA Corp.'s own ability to pay and whether MBIA Corp. will have the necessary resources to pay the obligations as they come due. Any significant increase or decrease in MBIA Corp.'s nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively.

The significant unobservable inputs used in the fair value measurement of MBIA Corp.'s other credit derivatives, which are valued using the BET Model and Dual Default, are recovery rates, nonperformance risk and weighted average life. The recovery rate represents the percentage of notional expected to be recovered after an asset defaults, indicating the severity of a potential loss. The nonperformance risk is an assumption of MBIA Corp.'s own ability to pay and whether MBIA Corp. will have the necessary resources to pay the obligations as they come due. Weighted average life is based on MBIA Corp.'s estimate of when the principal of the underlying collateral will be repaid. A significant increase in weighted average life can result in an increase or decrease in the fair value of the derivative liability, depending on the discount rate and the timing of significant losses. Any significant increase or decrease in recovery rates or MBIA Corp.'s nonperformance risk would result in a decrease or increase in the fair value of the derivative liabilities, respectively. Recovery rates, nonperformance risk and weighted average lives are determined independently. Changes in one input will not necessarily have any impact on the other inputs.

The significant unobservable input used in the fair value measurement of MBIA Corp.'s other derivatives, which are valued using a discounted cash flow model, is the estimates of future cash flows discounted using market rates and CDS spreads. Any significant increase or decrease in future cash flows would result in an increase or decrease in the fair value of the derivative liability, respectively.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 6: Fair Value of Financial Instruments (continued)**

Transfers into and out of Level 3 were \$3 million and \$77 million, respectively, for the three months ended September 30, 2015. Transfers into and out of Level 2 were \$77 million and \$3 million, respectively, for the three months ended September 30, 2015. Transfers into Level 3 were principally related to corporate obligations, where inputs, which are significant to their valuation, became unobservable during the quarter. Corporate obligations, other ABS and CDOs comprised the majority of the instruments transferred out of Level 3 where inputs, which are significant to their valuation, became observable during the quarter. These inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

Transfers into and out of Level 3 were \$55 million and \$1 million, respectively, for the three months ended September 30, 2014. Transfers into and out of Level 2 were \$1 million and \$55 million, respectively, for the three months ended September 30, 2014. Transfers into Level 3 were principally related to other ABS, corporate obligations and foreign government securities, where inputs, which are significant to their valuation, became unobservable during the quarter. Other ABS comprised the majority of the instruments transferred out of Level 3 where inputs, which are significant to their valuation, became observable during the quarter. These inputs included spreads, prepayment speeds, default speeds, default severities, yield curves observable at commonly quoted intervals, and market corroborated inputs. There were no transfers into or out of Level 1.

All Level 1, 2 and 3 designations are made at the end of each accounting period.

The following tables present information about changes in Level 3 assets (including short-term investments) and liabilities measured at fair value on a recurring basis for the nine months ended September 30, 2015 and 2014:

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 6: Fair Value of Financial Instruments (continued)****Fair Value Option**

The Company elected to record at fair value certain financial instruments that have been consolidated in connection with the adoption of the accounting guidance for consolidation of VIEs, among others.

The following table presents the changes in fair value included in the Company's consolidated statements of operations for the three and nine months ended September 30, 2015 and 2014 for financial instruments for which the fair value option was elected:

In millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Investments carried at fair value ⁽¹⁾	\$ (2)	\$ -	\$ (1)	\$ 2
Fixed-maturity securities held at fair value-VIE ⁽²⁾	(20)	(3)	(93)	(71)
Loans receivable at fair value:				
Residential mortgage loans ⁽²⁾	(74)	(45)	(187)	(118)
Other loans ⁽²⁾	-	(2)	-	(2)
Loan repurchase commitments ⁽²⁾	6	1	15	6
Medium-term notes ⁽¹⁾	(3)	15	27	1
Variable interest entity notes ⁽²⁾	122	87	283	256

(1) - Reported within Net gains (losses) on financial instruments at fair value and foreign exchange on MBIA's consolidated statements of operations.

(2) - Reported within Net gains (losses) on financial instruments at fair value and foreign exchange-VIE on MBIA's consolidated statements of operations. The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of September 30, 2015 and December 31, 2014 for loans and notes for which the fair value option was elected:

In millions	As of September 30, 2015			As of December 31, 2014		
	Contractual	Fair	Difference	Contractual	Fair	Difference
	Outstanding Principal	Value		Outstanding Principal	Value	
Loans receivable at fair value:						
Residential mortgage loans	\$ 1,331	\$ 1,233	\$ 98	\$ 1,554	\$ 1,377	\$ 177
Residential mortgage loans (90 days or more past due)	194	11	183	227	54	173
Other loans	107	107	-	721	711	10
Other loans (90 days or more past due)	73	-	73	-	-	-
Total loans receivable at fair value	\$ 1,705	\$ 1,351	\$ 354	\$ 2,502	\$ 2,142	\$ 360

Edgar Filing: MBIA INC - Form 10-Q

Variable interest entity notes	\$ 3,758	\$ 2,460	\$ 1,298	\$ 3,584	\$ 2,479	\$ 1,105
Medium-term notes	\$ 223	\$ 170	\$ 53	\$ 242	\$ 197	\$ 45

Substantially all gains and losses included in earnings during the periods ended September 30, 2015 and 2014 on loans receivable and VIE notes reported in the preceding table are attributable to credit risk. This is primarily due to the high rate of defaults on loans and the collateral supporting the VIE notes, resulting in depressed pricing of the financial instruments.

Note 7: Investments

Investments, excluding those elected under the fair value option, include debt and equity securities classified as either available-for-sale (AFS) or HTM. Other AFS investments primarily comprised money market funds.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 7: Investments (continued)**

The following tables present the amortized cost, fair value, corresponding gross unrealized gains and losses and other-than-temporary impairments (OTTI) for AFS and HTM investments in the Company's consolidated investment portfolio as of September 30, 2015 and December 31, 2014:

Deposited and Pledged Securities

The fair value of securities on deposit with various regulatory authorities as of September 30, 2015 and December 31, 2014 was \$10 million. These deposits are required to comply with state insurance laws.

Investment agreement obligations require the Company to pledge securities as collateral. Securities pledged in connection with investment agreements may not be repledged by the investment agreement counterparty. As of September 30, 2015 and December 31, 2014, the fair value of securities pledged as collateral for these investment agreements approximated \$487 million and \$532 million, respectively. The Company's collateral as of September 30, 2015 consisted principally of U.S. Treasury and government agency and state and municipal bonds, and was primarily held with major U.S. banks. Additionally, the Company pledged cash and money market securities as collateral under investment agreements in the amount of \$21 million and \$26 million as of September 30, 2015 and December 31, 2014, respectively.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 7: Investments (continued)**

Gross unrealized losses on AFS and HTM securities increased as of September 30, 2015 compared with December 31, 2014 primarily due to widening of credit spreads for corporate obligations.

With the weighting applied on the fair value of each security relative to the total fair value, the weighted average contractual maturity of securities in an unrealized loss position as of September 30, 2015 and December 31, 2014 was 19 and 13 years, respectively. As of September 30, 2015 and December 31, 2014, there were 66 and 143 securities, respectively, that were in an unrealized loss position for a continuous twelve-month period or longer, of which, fair values of 23 were below book value by more than 5%.

The following table presents the distribution of securities in an unrealized loss position for a continuous twelve-month period or longer where fair value was below book value by more than 5% as of September 30, 2015:

Percentage of Fair Value Below Book Value	AFS Securities			HTM Securities		
	Number of Securities	Book Value (in millions)	Fair Value (in millions)	Number of Securities	Book Value (in millions)	Fair Value (in millions)
> 5% to 15%	7	\$ 13	\$ 13	-	\$ -	\$ -
> 15% to 25%	8	82	65	-	-	-
> 25% to 50%	5	5	3	1	575	321
> 50%	2	122	17	-	-	-
Total	22	\$ 222	\$ 98	1	\$ 575	\$ 321

The following table presents the fair value and gross unrealized loss by credit rating category of ABS, MBS and corporate obligations included in the Company's consolidated AFS investment portfolio, as of September 30, 2015, for which fair value was less than amortized cost. The credit ratings are based on ratings from Moody's as of September 30, 2015 or an alternate ratings source, such as S&P, when a security is not rated by Moody's. For investments that are insured by various third-party guarantee insurers, the credit rating reflects the higher of the insurer's rating or the underlying bond's rating.

Edgar Filing: MBIA INC - Form 10-Q

Corporate obligations in the table above include a security in the not rated category, for which the Company recorded an additional credit loss impairment for the nine months ended September 30, 2015. Refer to Credit Loss Rollforward section within the OTTI section for further information.

The total ABS, MBS and corporate obligations reported in the preceding table include those which are guaranteed by financial guarantors. In addition, the following table presents information on ABS and MBS guaranteed by the Company and third-party financial guarantors.

Asset Type	Average Credit Rating with the Effect of Guarantee	Average Credit Rating without the Effect of Guarantee	Insured Securities Rated Below Investment Grade without the Effect of Guarantee (in millions)	
			Fair Value	Percentage
ABS	Below Investment Grade	Below Investment Grade	\$ 60	65%
MBS	Below Investment Grade	Below Investment Grade	\$ 19	100%

Refer to the table in the Determination of Credit Loss Guaranteed by the Company and Other Third-Party Guarantors section within the OTTI section of this note for information on the insured securities included in the table above.

The Company concluded that it does not have the intent to sell securities in an unrealized loss position and it is more likely than not, that it would not have to sell these securities before recovery of their cost basis. In making this conclusion, the Company examined the cash flow projections for its investment portfolios, the potential sources and uses of cash in its businesses, and the cash resources available to its business other than sales of securities. It also considered the existence of any risk management or other plans as of September 30, 2015 that would require the sale of impaired securities. Impaired securities that the Company intends to sell before the expected recovery of such securities fair values have been written down to fair value.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 7: Investments (continued)*****Other-Than-Temporary Impairments****Evaluating AFS Securities for OTTI*

The Company has an ongoing review process for all securities in its investment portfolio, including a quarterly assessment of OTTI. This evaluation includes both qualitative and quantitative considerations. In assessing whether a decline in value is related to a credit loss, the Company considers several factors, including but not limited to (i) the magnitude and duration of declines in fair value; (ii) the reasons for the declines in fair value, such as general credit spread movements in each asset-backed sector, transaction-specific changes in credit spreads, credit rating downgrades, modeled defaults, and principal and interest payment priorities within each investment structure; and (iii) any guarantees associated with a security such as those provided by financial guarantee insurance companies, including MBIA Corp. and National.

In calculating credit-related losses, the Company utilizes cash flow modeling based on the type of security. The Company's cash flow analysis considers all sources of cash, including credit enhancement, that support the payment of amounts owed by an issuer of a security. This includes the consideration of cash expected to be provided by financial guarantors, including MBIA Corp. and National, resulting from an actual or potential insurance policy claim. In general, any change in the amount and/or timing of cash flows received or expected to be received, whether or not such cash flows are contractually defined, is reflected in the Company's cash flow analysis for purposes of assessing an OTTI loss on an impaired security.

Each quarter, an internal committee, comprising staff that is independent of the Company's evaluation process for determining OTTI of securities, reviews and approves the valuation of investments. Among other responsibilities, this committee ensures that the Company's process for identifying and calculating OTTI, including the use of models and assumptions, is reasonable and complies with the Company's internal policy.

Determination of Credit Loss on ABS, MBS and Corporate Obligations

ABS investments are evaluated for OTTI using historical collateral performance, deal waterfall and structural protections, credit ratings, and forward looking projections of collateral performance based on business and economic conditions specific to each collateral type and risk. The underlying collateral is evaluated to identify any specific performance concerns, and stress scenarios are considered in forecasting ultimate returns of principal. Based on this evaluation, if a principal default is projected for a security, estimated future cash flows are discounted at the security's interest rate used to recognize interest income on the security. For CDO investments, the Company utilizes the same tools as its RMBS investments discussed below, aggregating the bond level cash flows to the CDO investment level. If the present value of cash flows is less than the Company's amortized cost for the security, the difference is recorded as an OTTI loss.

RMBS investments are evaluated for OTTI using several quantitative tools. Loan level data is obtained and analyzed in a model that produces prepayment, default, and severity vectors. The model utilizes macro inputs, including housing price assumptions and interest rates. The vector outputs are used as inputs to a third-party cash flow model, which considers deal waterfall dynamics and structural features, to generate cash flows for an RMBS investment. The expected cash flows of the security are then discounted at the interest rate used to recognize interest income of the security to arrive at a present value amount. If the present value of the cash flows is less than the Company's amortized cost for the investment, the difference is recorded as an OTTI loss.

Corporate obligation investments are evaluated for OTTI using credit analysis techniques. The Company's analysis includes a detailed review of a number of quantitative and qualitative factors impacting the value of an individual security. These factors include the interest rate of the security (fixed or floating), the security's current market spread, any collateral supporting the security, the security's position in the issuer's capital structure, and credit rating upgrades or downgrades. Additionally, these factors include an assessment of various issuer-related credit metrics including market capitalization, earnings, cash flow, capitalization, interest coverage, leverage, liquidity, management and a third-party quantitative default probability model. The Company's analysis is augmented by comparing market prices for similar securities of other issuers in

Edgar Filing: MBIA INC - Form 10-Q

the same sector, as well as any recent corporate or government actions that may impact the ultimate return of principal. If the Company determines that a principal default is projected, a recovery analysis is performed using the above data. If the Company's estimated recovery value for the security is less than its amortized cost, the difference is recorded as an OTTI loss.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 7: Investments (continued)***Determination of Credit Loss Guaranteed by the Company and Other Third-Party Guarantors*

The Company does not record OTTI related to credit concerns about issuers of securities insured by MBIA Corp. and National since investors in these securities, including MBIA, are guaranteed payment of principal and interest when due by MBIA. Securities insured by the Company, whether or not owned by the Company, are evaluated for impairment as part of its insurance surveillance process and, therefore, losses on securities insured by the Company are recorded in accordance with its loss reserving policy. Refer to Note 2: Significant Accounting Policies in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 for information about the Company's loss reserving policy and Note 5: Loss and Loss Adjustment Expense Reserves for information about loss reserves.

In considering cash expected to be provided from other third-party financial guarantors, the Company assesses the financial guarantor's ability to make claim payments under a variety of scenarios that test the guarantor's ultimate claims paying ability. The weighted average outcome of these scenarios, combined with the cash flows provided by the insured security, are used to determine the recoverability of the Company's amortized cost.

The following table provides information about securities held by the Company as of September 30, 2015 that were in an unrealized loss position and insured by a financial guarantor, along with the amount of insurance loss reserves corresponding to the par amount owned by the Company:

In millions	Fair Value	Unrealized Loss	Insurance Loss Reserve ⁽²⁾
Asset-backed:			
MBIA ⁽¹⁾	\$ 93	\$ (28)	\$ 20
Mortgage-backed:			
MBIA ⁽¹⁾	19	(1)	14
Other:			
MBIA ⁽¹⁾	79	(4)	-
Other	1	-	-
Total other	80	(4)	-
Total	\$ 192	\$ (33)	\$ 34

(1) - Includes investments insured by MBIA Corp. and National.

(2) - Insurance loss reserve estimates are based on the proportion of par value owned to the total amount of par value insured.

Credit Loss Rollforward

Edgar Filing: MBIA INC - Form 10-Q

The portion of certain OTTI losses on fixed-maturity securities that does not represent credit losses is recognized in accumulated other comprehensive income (loss) (AOCI). For these impairments, the net amount recognized in earnings represents the difference between the amortized cost of the security and the net present value of its projected future discounted cash flows prior to impairment. Any remaining difference between the fair value and amortized cost is recognized in AOCI. The following table presents the amount of credit loss impairments recognized in earnings on fixed-maturity securities held by MBIA as of the dates indicated, for which a portion of the OTTI losses was recognized in AOCI, and the corresponding changes in such amounts. The additional credit loss impairments for the three and nine months ended September 30, 2015 and 2014, primarily related to a corporate obligation that incurred liquidity concerns, ongoing credit risk and other adverse financial conditions.

In millions	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
Credit Losses Recognized in Earnings Related to Other-Than-Temporary Impairments	2015	2014	2015	2014
Beginning balance	\$ 22	\$ -	\$ 16	\$ 175
Additions for credit loss impairments recognized in the current period on securities not previously impaired	-	14	-	14
Additions for credit loss impairments recognized in the current period on securities previously impaired	3	-	9	-
Reductions for credit loss impairments previously recognized on securities sold during the period	-	-	-	(174)
Reductions for increases in cash flows expected to be collected over the remaining life of the security	-	-	-	(1)
Ending balance	\$ 25	\$ 14	\$ 25	\$ 14

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 7: Investments (continued)***Sales of Available-for-Sale Investments*

Gross realized gains and losses are recorded within Net gains (losses) on financial instruments at fair value and foreign exchange on the Company's consolidated statements of operations. The proceeds and the gross realized gains and losses from sales of fixed-maturity securities held as AFS for the three and nine months ended September 30, 2015 and 2014 are as follows:

In millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Proceeds from sales	\$ 251	\$ 131	\$ 630	\$ 594
Gross realized gains	\$ 6	\$ 4	\$ 14	\$ 61
Gross realized losses	\$ (2)	\$ -	\$ (11)	\$ (13)

Note 8: Derivative Instruments*Overview*

MBIA has entered into derivative instruments through its financial guarantee of CDS and certain other derivative contracts for purposes of managing risks associated with existing assets and liabilities. In certain instances, the Company purchased or issued securities that contain embedded derivatives that were separated from the host contract and accounted for as derivative instruments. In accordance with the accounting guidance for derivative instruments and hedging activities, the balance sheet location of the Company's embedded derivative instruments is determined by the location of the related security. Derivative instruments are recorded at fair value on the Company's consolidated balance sheets with the changes in fair value recorded on the Company's consolidated statements of operations within Unrealized gains (losses) on insured derivatives, for the insured derivatives, or Net gains (losses) on financial instruments at fair value and foreign exchange for the embedded derivatives. Refer to Note 6: Fair Value of Financial Instruments for the method of determining the fair value of derivative instruments.

U.S. Public Finance Insurance

The Company's derivative exposure within its U.S. public finance insurance operations primarily consists of insured interest rate and inflation-linked swaps related to insured U.S. public finance debt issues. These derivatives do not qualify for the financial guarantee scope exception and are accounted for as derivative instruments.

International and Structured Finance Insurance

The Company entered into derivative instruments that it viewed as an extension of its core financial guarantee business that do not qualify for the financial guarantee scope exception and, therefore, are accounted for as derivative instruments. These insured CDS contracts, primarily referencing corporate obligations, ABS, RMBS, CMBS, CRE loans and CDOs, are intended to be held for the entire term of the contract absent a negotiated settlement with the counterparty. The Company's derivative exposure within its international and structured finance insurance segment also includes insured interest rate and inflation-linked swaps related to insured debt issues.

Changes in the fair value of derivatives, excluding insured derivatives, are recorded each period in current earnings within Net gains (losses) on financial instruments at fair value and foreign exchange. Changes in the fair value of insured derivatives are recorded each period in current earnings within Net change in fair value of insured derivatives. The net change in the fair value of the Company's insured derivatives has two primary components: (i) realized gains (losses) and other settlements on insured derivatives and (ii) unrealized gains (losses) on insured

Edgar Filing: MBIA INC - Form 10-Q

derivatives. Realized gains (losses) and other settlements on insured derivatives include (i) premiums received and receivable on sold CDS contracts, (ii) premiums paid and payable to reinsurers in respect to CDS contracts, (iii) net amounts received or paid on reinsurance commutations, (iv) losses paid and payable to CDS contract counterparties due to the occurrence of a credit event or settlement agreement, (v) losses recovered and recoverable on purchased CDS contracts due to the occurrence of a credit event or settlement agreement and (vi) fees relating to CDS contracts. Unrealized gains (losses) on insured derivatives includes all other changes in fair value of the insured derivative contracts.

The Company has also entered into a derivative contract as a result of a commutation occurring in 2014. Changes in the fair value of the Company's non-insured derivative are included in Net gains (losses) on financial instruments at fair value and foreign exchange on the Company's consolidated statements of operations.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 8: Derivative Instruments (continued)***Variable Interest Entities*

VIEs consolidated by the Company have entered into derivative instruments consisting of interest rate swaps, interest rate caps and cross currency swaps. Interest rate swaps and interest rate caps are entered into to mitigate the risks associated with fluctuations in interest rates or fair values of certain contracts. Cross currency swaps are entered into to manage the variability in cash flows resulting from fluctuations in foreign currency rates.

Corporate

The Company has entered into derivative instruments primarily consisting of interest rate swaps. Interest rate swaps are entered into to manage the risks associated with fluctuations in interest rates or fair values of certain contracts.

Changes in the fair value of these derivatives are recorded on the Company's consolidated statements of operations within Net gains (losses) on financial instruments at fair value and foreign exchange.

Credit Derivatives Sold

The following tables present information about credit derivatives sold by the Company's insurance operations that were outstanding as of September 30, 2015 and December 31, 2014. Credit ratings represent the lower of underlying ratings assigned to the collateral by Moody's, S&P or MBIA.

Total fair value		\$ (2)	\$ -	\$ (2)	\$ (2)	\$ (240)		\$ (246)	

Internal credit ratings assigned by MBIA on the underlying collateral are derived by the Company's surveillance group. In assigning an internal rating, current status reports from issuers and trustees, as well as publicly available transaction-specific information, are reviewed. Also, where appropriate, cash flow analyses and collateral valuations are considered. The maximum potential amount of future payments (undiscounted) on CDS contracts are estimated as the notional value plus any additional debt service costs, such as interest or other amounts owing on CDS contracts. The maximum amount of future debt service payments that MBIA may be required to make under these guarantees as of September 30, 2015 is \$3.5 billion. The maximum potential amount of future payments (undiscounted) on insured swaps are estimated as the notional value of such contracts.

MBIA may hold recourse provisions with third parties in derivative instruments through both reinsurance and subrogation rights. MBIA's reinsurance arrangements provide that in the event MBIA pays a claim under a guarantee of a derivative contract, MBIA has the right to collect amounts from any reinsurers that have reinsured the guarantee on either a proportional or non-proportional basis, depending upon the underlying reinsurance agreement. MBIA may also have recourse through subrogation rights whereby if MBIA makes a claim payment, it may be entitled to any rights of the insured counterparty, including the right to any assets held as collateral.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 8: Derivative Instruments (continued)*****Counterparty Credit Risk***

The Company manages counterparty credit risk on an individual counterparty basis through master netting agreements covering derivative instruments in the corporate segment. These agreements allow the Company to contractually net amounts due from a counterparty with those amounts due to such counterparty when certain triggering events occur. The Company only executes swaps under master netting agreements, which typically contain mutual credit downgrade provisions that generally provide the ability to require assignment or termination in the event either MBIA or the counterparty is downgraded below a specified credit rating.

Under these agreements, the Company may receive or provide U.S. Treasury and other highly rated securities or cash to secure counterparties exposure to the Company or its exposure to counterparties, respectively. Such collateral is available to the holder to pay for replacing the counterparty in the event that the counterparty defaults. As of September 30, 2015, the Company did not hold cash collateral to derivative counterparties but posted cash collateral to derivative counterparties of \$80 million. Of this amount, \$61 million is netted within *Derivative liabilities* and \$19 million is included within *Other liabilities* as cash collateral netted against accrued interest on derivative liabilities. As of December 31, 2014, the Company did not hold cash collateral to derivative counterparties but posted cash collateral to derivative counterparties of \$12 million. All of the \$12 million is included within *Other liabilities* as cash collateral netted against accrued interest on derivative liabilities. As of September 30, 2015, the Company had securities with a fair value of \$245 million posted to derivative counterparties and this amount is included within *Fixed-maturity securities held as available-for-sale, at fair value* on the Company's consolidated balance sheet. As of December 31, 2014, the Company had securities with a fair value of \$198 million posted to derivative counterparties and this amount is included within *Fixed-maturity securities held as available-for-sale, at fair value* on the Company's consolidated balance sheet.

As of September 30, 2015 and December 31, 2014, the fair value on one Credit Support Annex (CSA) was \$3 million and \$2 million, respectively. This CSA governs collateral posting requirements between MBIA and its derivative counterparties. The Company did not receive collateral due to the Company's credit rating, which was below the CSA minimum credit ratings level for holding counterparty collateral. As of September 30, 2015 and December 31, 2014, the counterparty was rated A2 by Moody's and A by S&P.

Financial Statement Presentation

The fair value of amounts recognized for eligible derivative contracts executed with the same counterparty under a master netting agreement, including any cash collateral that may have been received or posted by the Company, is presented on a net basis in accordance with accounting guidance for the offsetting of fair value amounts related to derivative instruments. Insured CDS and insured swaps are not subject to master netting agreements. VIE derivative assets and liabilities are not presented net of any master netting agreements. Counterparty netting of derivative assets and liabilities offsets balances in *Interest rate swaps* as of September 30, 2015 and December 31, 2014.

As of September 30, 2015, the total fair value of the Company's derivative assets, after counterparty netting of \$1 million, was \$15 million, of which \$9 million was reported within *Other assets* and *Derivative assets* presented under *Assets of consolidated variable interest entities* on the Company's consolidated balance sheets. Embedded derivatives of \$6 million were reported within *Medium-term notes* on the Company's consolidated balance sheets.

As of September 30, 2015, the total fair value of the Company's derivative liabilities, after counterparty netting of \$1 million and cash collateral posted by the company of \$61 million, was \$411 million, of which \$396 million was reported within *Derivative liabilities* and *Derivative liabilities* presented under *Liabilities of consolidated variable interest entities* on the Company's consolidated balance sheets. Embedded derivatives of \$15 million were reported within *Medium-term notes* on the Company's consolidated balance sheets.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 8: Derivative Instruments (continued)**

The following table presents the total fair value of the Company's derivative assets and liabilities by instrument and balance sheet location, before counterparty netting and posting of cash collateral, as of September 30, 2015:

In millions	Notional Amount Outstanding	Derivative Assets ⁽¹⁾		Derivative Liabilities ⁽¹⁾	
		Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivative Instruments					
Not designated as hedging instruments:					
Insured credit default swaps	\$ 3,318	Other assets	\$ -	Derivative liabilities	\$ (121)
Insured swaps	3,828	Other assets	-	Derivative liabilities	(3)
Interest rate swaps	1,155	Other assets	4	Derivative liabilities	(255)

All other	83	Other assets	-	Derivative liabilities	(22)
All other-VIE	241	Derivative assets-VIE	-	Derivative liabilities-VIE	-
All other-embedded	12	Other investments	-	Other investments	-
Total non-designated derivatives	\$ 10,027		\$ 16		\$ (473)

(1) - In accordance with the accounting guidance for derivative instruments and hedging activities, the balance sheet location of the Company's embedded derivative instruments is determined by the location of the related host contract.

As of December 31, 2014, the total fair value of the Company's derivative assets, after counterparty netting of \$81 million, was \$10 million, of which \$2 million was reported within Other assets on the Company's consolidated balance sheets. Embedded derivatives of \$8 million were reported within Medium-term notes on the Company's consolidated balance sheets.

As of December 31, 2014, the total fair value of the Company's derivative liabilities, after counterparty netting of \$81 million was \$456 million, of which \$437 million was reported within Derivative liabilities and Derivative liabilities presented under Liabilities of consolidated variable interest entities on the Company's consolidated balance sheets. Embedded derivatives of \$19 million were reported within Medium-term notes and Other investments on the Company's consolidated balance sheets.

The following table presents the total fair value of the Company's derivative assets and liabilities by instrument and balance sheet location, before counterparty netting and posting of cash collateral, as of December 31, 2014:

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 9: Income Taxes**

The Company's income taxes and the related effective tax rates for the three and nine months ended September 30, 2015 and 2014 are as follows:

In millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Income (loss) before income taxes	\$ (55)	\$ 148	\$ 150	\$ 607
Provision (benefit) for income taxes	\$ (20)	\$ (25)	\$ 52	\$ 58
Effective tax rate	36.4%	-16.9%	34.7%	9.6%

For the nine months ended September 30, 2015, the Company's effective tax rate applied to its income before income taxes approximates the U.S. statutory tax rate. For the nine months ended September 30, 2014, the Company's effective tax rate applied to its income before income taxes was lower than the U.S. statutory tax rate primarily as a result of the decrease in the valuation allowance against its deferred tax asset.

The Company's 2014 and 2015 provision for income taxes for interim financial periods is not based on an estimated annual effective rate due to the variability in fair value of its derivative liabilities, which prevents the Company from projecting a reliable estimated annual effective tax rate and income before taxes for either year. A discrete calculation of the provision is performed for each interim period.

Deferred Tax Asset, Net of Valuation Allowance

The Company establishes a valuation allowance against its deferred tax asset when it is more likely than not that all or a portion of the deferred tax asset will not be realized. All evidence, both positive and negative, needs to be identified and considered in making the determination. Future realization of the existing deferred tax asset ultimately depends, in part, on the generation of sufficient taxable income of appropriate character (for example, ordinary income versus capital gains) within the carryforward period available under the tax law.

As of September 30, 2015 and December 31, 2014, the Company's net deferred tax asset was approximately \$1.0 billion, with no valuation allowance as a result of a tax planning strategy to use unrealized gains that are included in Accumulated other comprehensive income (loss) on the Company's consolidated balance sheets against the deferred tax asset related to any remaining asset impairments.

In accordance with accounting guidance for income taxes, the netting of deferred taxes between different taxpaying jurisdictions is not permitted. As of September 30, 2015, there was also a non U.S. deferred tax liability of \$29 million included in Other liabilities on the Company's consolidated balance sheet.

Tax Sharing Agreement

The Company has a tax sharing agreement among its members effective January 1, 1987. The agreement was amended and restated effective September 8, 2011 to change the method of calculating each domestic insurer's tax liability to the method permitted by paragraph 3(a) of Department Circular Letter #33 (1979). The agreement was submitted to the NYSDFS for review and non-disapproval pursuant to Section 1505 of the New York Insurance Law. The Company's tax sharing agreement is filed as an exhibit to the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for informational purposes only. Refer to Note 2: Significant Accounting Policies in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, for further discussion on the Company's tax sharing agreement.

Accounting for Uncertainty in Income Taxes

The Company's policy is to record and disclose any change in unrecognized tax benefit (UTB) and related interest and/or penalties to income tax in the consolidated statements of operations. The Company includes interest as a component of income tax expense. As of September 30, 2015

Edgar Filing: MBIA INC - Form 10-Q

and December 31, 2014, the Company had no UTB outstanding.

MBIA and its U.S. subsidiaries file a U.S. consolidated federal income tax return. Federal income tax returns through 2011 have been examined or surveyed.

The tax authorities in the United Kingdom have been auditing MBIA UK for tax years 2005 through 2012. In April of 2015, MBIA UK received correspondence from the HM Revenue & Customs closing the audit for the years under examination with no change in taxable income.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 9: Income Taxes (continued)

As of September 30, 2015, the Company's net operating loss (NOL) is approximately \$3.0 billion. The NOL will expire between tax years 2029 through 2034. As of September 30, 2015, the Company has an alternative minimum tax credit carryforward of \$22 million, which does not expire.

Note 10: Business Segments

As defined by segment reporting, an operating segment is a component of a company (i) that engages in business activities from which it earns revenue and incurs expenses, (ii) whose operating results are regularly reviewed by the Chief Operating Decision Maker to assess the performance of the segment and to make decisions about the allocation of resources to the segment and, (iii) for which discrete financial information is available.

The Company manages its businesses across three operating segments: 1) U.S. public finance insurance; 2) international and structured finance insurance; and 3) corporate. The Company's U.S. public finance insurance business is operated through National and its international and structured finance insurance business is operated through MBIA Corp. Prior to 2015, the Company managed two other operating segments, advisory services and conduit. During 2014, the Company dissolved its conduit segment by extinguishing the remaining liabilities of the segment and liquidating the Company's remaining conduit, Meridian, and effective January 1, 2015, the Company exited its advisory services business with the completed sale of Cutwater to a subsidiary of The Bank of New York Mellon Corporation.

The following sections provide a description of each of the Company's reportable operating segments.

U.S. Public Finance Insurance

The Company's U.S. public finance insurance segment is principally conducted through National. The financial guarantees issued by National provide unconditional and irrevocable guarantees of the payment of the principal of, and interest or other amounts owing on, U.S. public finance insured obligations when due. The obligations are not subject to acceleration, except that National may have the right, at its discretion, to accelerate insured obligations upon default or otherwise. National issues financial guarantees for municipal bonds, including tax-exempt and taxable indebtedness of U.S. political subdivisions, as well as utility districts, airports, health care institutions, higher educational facilities, student loan issuers, housing authorities and other similar agencies and obligations issued by private entities that finance projects that serve a substantial public purpose. Municipal bonds and privately issued bonds used for the financing of public purpose projects are generally supported by taxes, assessments, fees or tariffs related to the use of these projects, lease payments or other similar types of revenue streams.

International and Structured Finance Insurance

The Company's international and structured finance insurance segment is principally conducted through MBIA Corp. The financial guarantees issued by MBIA Corp. generally provide unconditional and irrevocable guarantees of the payment of principal of, and interest or other amounts owing on, non-U.S. public finance and global structured finance insured obligations when due, or in the event MBIA Corp. has the right, at its discretion, to accelerate insured obligations upon default or otherwise, upon MBIA Corp.'s acceleration. Certain guaranteed investment contracts written by MBIA Inc. are insured by MBIA Corp., and if MBIA Inc. were to have insufficient assets to pay amounts due upon maturity or termination, MBIA Corp. would make such payments. MBIA Corp. also insures debt obligations of the following affiliates:

MBIA Inc.;

Edgar Filing: MBIA INC - Form 10-Q

MBIA Global Funding, LLC (GFL);

MBIA Investment Management Corp. (IMC); and

LaCrosse Financial Products, LLC, a wholly-owned affiliate, in which MBIA Corp. has written insurance policies guaranteeing the obligations under CDS, including termination payments that may become due upon certain events including the insolvency or payment default of the financial guarantor or the CDS issuer.

Table of Contents

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 10: Business Segments (continued)

MBIA Corp. insures non-U.S. public finance and global structured finance insured obligations, including asset-backed obligations. MBIA Corp. has insured sovereign-related and sub-sovereign bonds, utilities, privately issued bonds used for the financing of projects that include toll roads, bridges, airports, public transportation facilities, and other types of infrastructure projects serving a substantial public purpose. Global structured finance and asset-backed obligations typically are securities repayable from expected cash flows generated by a specified pool of assets, such as residential and commercial mortgages, insurance policies, consumer loans, corporate loans and bonds, trade and export receivables, and leases for equipment, aircraft and real estate property. MBIA Corp. has also written policies guaranteeing obligations under certain other derivative contracts, including termination payments that may become due upon certain insolvency or payment defaults of the financial guarantor or the issuer. The Company is no longer insuring new credit derivative contracts except for transactions related to the restructuring or reduction of existing derivative exposure. MBIA Corp. has not written any meaningful amount of business since 2008.

Corporate

The Company's corporate segment consists of general corporate activities, including providing general support services to MBIA's other operating businesses and asset and capital management. General support services are provided by the Company's service company, MBIA Services Corporation (MBIA Services). MBIA Services provides various support services including, among others, management, legal, accounting, treasury, information technology, and insurance portfolio surveillance, on a fee-for-service basis. Capital management includes activities related to servicing obligations issued by MBIA Inc. and its subsidiaries, GFL and IMC. MBIA Inc. issued debt to finance the operations of the MBIA group. It also provided customized products for funds that are invested as part of asset-backed or structured product transactions. GFL raised funds through the issuance of MTNs with varying maturities, which were in turn guaranteed by MBIA Corp. GFL lent the proceeds of these MTN issuances to MBIA Inc. IMC, along with MBIA Inc., provided customized investment agreements, guaranteed by MBIA Corp., for bond proceeds and other public funds for such purposes as construction, loan origination, escrow and debt service or other reserve fund requirements. The company ceased issuing these MTNs and investment agreements and the outstanding liability balances and corresponding asset balances have declined over time as liabilities mature, terminate or are retired. All of the debt within the corporate segment is managed collectively and is serviced by the financial resources available to MBIA Inc. Asset management activities provide for opportunities in investments and provide general liquidity support to MBIA Inc.

Advisory Services

The advisory services segment primarily consisted of the operations of Cutwater Investor Services Corp. and Cutwater Asset Management Corp. and was a fee-for-service investment management business focused on fixed-income markets. Effective with the January 1, 2015 sale of Cutwater, MBIA has no business activities within its advisory services segment.

Conduit

The Company's conduit segment was operated through Meridian and administered through MBIA Asset Finance, LLC. Assets financed by Meridian were funded by MTNs. In 2014, the Company extinguished the remaining liabilities of this segment and liquidated Meridian.

Total	\$ 90	\$ 122	\$ 288	\$ 308

Note 11: Earnings Per Share

Earnings per share is calculated using the two-class method in which earnings are allocated to common stock and participating securities based on their rights to receive nonforfeitable dividends or dividend equivalents. The Company grants restricted stock and restricted stock units to certain employees and non-employee directors in accordance with the Company's long-term incentive programs, which entitle the participants to receive nonforfeitable dividends or dividend equivalents during the vesting period on the same basis as those dividends are paid to common shareholders. These unvested stock awards represent participating securities. During periods of net income, the calculation of earnings per share exclude the income attributable to participating securities in the numerator and the dilutive impact of these securities from the denominator. During periods of net loss, no effect is given to participating securities in the numerator and the denominator excludes the dilutive impact of these securities since they do not share in the losses of the Company.

Table of Contents**MBIA Inc. and Subsidiaries****Notes to Consolidated Financial Statements (Unaudited)****Note 11: Earnings Per Share (continued)**

Basic earnings per share excludes dilution and is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the dilutive effect of all stock options, warrants and unvested restricted stock outstanding during the period that could potentially result in the issuance of common stock. The dilution from stock options, warrants and unvested restricted stock are calculated by applying the two-class method and using the treasury stock method. The treasury stock method assumes the proceeds from the exercise of stock options and warrants or the unrecognized compensation expense from unvested restricted stock will be used to purchase shares of the Company's common stock at the average market price during the period. For the three months ended September 30, 2015 and 2014, there were 18,807,517 and 32,450,109, respectively, of stock options, warrants and unvested restricted stock outstanding that were antidilutive. For the nine months ended September 30, 2015 and 2014, there were 17,975,504 and 31,817,467, respectively of stock options, warrants and unvested restricted stock outstanding that were antidilutive.

The following table presents the computation of basic and diluted earnings per share for the three and nine months ended September 30, 2015 and 2014:

In millions except share and per share amounts	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Basic earnings per share:				
Net income (loss)	\$ (35)	\$ 173	\$ 98	\$ 549
Less: undistributed earnings allocated to participating securities	-	5	3	15
Net income (loss) available to common shareholders	(35)	168	95	534
Basic weighted average shares ⁽¹⁾	155,239,723	187,104,785	169,610,370	188,428,870
Net income (loss) per basic common share:	\$ (0.23)	\$ 0.90	\$ 0.56	\$ 2.83
Diluted earnings per share:				
Net income (loss)	(35)	173	98	549
Less: undistributed earnings allocated to participating securities	-	5	3	14
Less: mark-to-market gain (loss) on warrants	-	18	-	32
Net income (loss) available to common shareholders	(35)	150	95	503
Basic weighted average shares ⁽¹⁾	155,239,723	187,104,785	169,610,370	188,428,870
Effect of common stock equivalents:				
Stock options	-	1,029,777	956,016	1,126,134
Warrants	-	289,756	-	2,061,719

Note 13: Commitments and Contingencies

Edgar Filing: MBIA INC - Form 10-Q

The following commitments and contingencies provide an update of those discussed in Note 21: Commitments and Contingencies in the Notes to Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014, and should be read in conjunction with the complete descriptions provided in the aforementioned Form 10-K.

Litigation

MBIA Insurance Corp. v. Credit Suisse Securities (USA) LLC, et al.; Index No. 603751/2009 (N.Y. Sup. Ct., N.Y. County)

On March 2, 2015, the court issued an order scheduling expert discovery to conclude by February of 2016.

MBIA Insurance Corp. v. J.P. Morgan Securities LLC (f/k/a Bear, Stearns & Co. Inc.); Index No. 64676/2012 (N.Y. Sup. Ct., County of Westchester)

On September 9, 2014, the court granted in part MBIA Corp.'s motion to file an amended complaint. MBIA filed its amended complaint on September 29, 2014. J.P. Morgan filed its answer to the amended complaint on October 10, 2014. The parties each cross-appealed the September 9, 2014 decision and those appeals were fully submitted as of June 8, 2015. J.P. Morgan's motion for summary judgment was fully briefed as of October 15, 2015.

Lynn Tilton and Patriarch Partners XV, LLC v. MBIA Inc. and MBIA Insurance Corp.; Index No. 68880/2015 (N.Y. Sup. Ct., County of Westchester)

On November 2, 2015, Lynn Tilton and Patriarch Partners XV, LLC filed a complaint in New York State Supreme Court, Westchester County, against MBIA Inc. and MBIA Corp., alleging fraudulent inducement and related claims arising from purported promises made by MBIA in connection with insurance policies issued by MBIA Corp. on certain collateralized loan obligations managed by Ms. Tilton and her affiliated Patriarch entities, and seeking damages.

Ambac Bond Insurance Coverage Cases, Coordinated Proceeding Case No. JCCP 4555 (Super. Ct. of Cal., County of San Francisco)

An appeal of the dismissal of the plaintiff's anti-trust claim under California's Cartwright Act is pending. An appeal is also pending of the March 26, 2014 decision granting in part the Bond Insurer defendants' motions for reimbursement of legal fees incurred in connection with the motion to strike pursuant to California's Anti-SLAPP statute.

MBIA Inc. and Subsidiaries

Notes to Consolidated Financial Statements (Unaudited)

Note 13: Commitments and Contingencies (continued)

The Company is defending against the aforementioned actions in which it is a defendant and expects ultimately to prevail on the merits. There is no assurance, however, that the Company will prevail in these actions. Adverse rulings in these actions could have a material adverse effect on the Company's ability to implement its strategy and on its business, results of operations, cash flows and financial condition. At this stage of the litigation, there has not been a determination as to the amount, if any, of damages. Accordingly, the Company is not able to estimate any amount of loss or range of loss.

There are no other material lawsuits pending or, to the knowledge of the Company, threatened, to which the Company or any of its subsidiaries is a party.

Lease Commitments

The Company has a lease agreement for its headquarters in Purchase, New York. The initial lease term expires in 2030 with the option to terminate the lease in 2025 upon the payment of a termination amount. This lease agreement included an incentive amount to fund certain leasehold improvements, renewal options, escalation clauses and a free rent period. The lease agreement has been classified as an operating lease, and operating rent expense has been recognized on a straight-line basis since the second quarter of 2014.

Note 14: Subsequent Events

Refer to Note 13: Commitments and Contingencies for information about legal proceedings that occurred after September 30, 2015.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

MBIA Inc. (MBIA , the Company , we , us , or our) operates one of the largest financial guarantee insurance businesses in the industry. MBIA manages three operating segments: 1) United States (U.S.) public finance insurance; 2) corporate; and 3) international and structured finance insurance. Our U.S. public finance insurance business is primarily operated through National Public Finance Guarantee Corporation (National), our corporate segment is operated through MBIA Inc. and several of its subsidiaries, including our service company, MBIA Services Corporation (MBIA Services) and is generally referred to as (MBIA Inc.), and our international and structured finance insurance business is primarily operated through MBIA Insurance Corporation and its subsidiaries (MBIA Corp.). Unless otherwise indicated or the context otherwise requires, references to MBIA Corp. are to MBIA Insurance Corporation, together with its subsidiaries, MBIA UK Insurance Limited (MBIA UK) and MBIA Mexico S.A. de C.V (MBIA Mexico).

The primary strategies of our U.S. public finance insurance segment are to generate new insurance business in National, consistent with our portfolio management and return requirements, and to maximize the economics of our existing insured portfolio through effective surveillance and remediation. The primary strategies of our international and structured finance insurance segment are to preserve value, maintain adequate liquidity, reduce exposure risk and mitigate insurance loss. We do not expect to write new business in our international and structured finance insurance segment in the foreseeable future. Our corporate segment consists of general corporate activities, including providing general support services to MBIA's other operating businesses and asset and capital management.

Prior to 2015, MBIA managed two other operating segments, advisory services and conduit. Our advisory services segment was operated primarily through Cutwater Holdings, LLC and its subsidiaries (Cutwater). Effective on January 1, 2015, we exited our advisory business through the sale of Cutwater. In the second quarter of 2014, we exited our conduit business through the liquidation of Meridian Funding Company, LLC (Meridian).

EXECUTIVE OVERVIEW

National

National is the largest U.S. public finance-only bond insurer in the financial guarantee industry as measured by total insured gross par outstanding of \$177.4 billion as of September 30, 2015. Our primary strategy is to insure new issue and secondary market municipal bonds while providing ongoing surveillance of National's existing insured portfolio. Since achieving double-A ratings in 2014, National has insured \$782 million of gross par exposure. National's ability to write new business and to compete with other financial guarantors is largely dependent on the financial strength ratings assigned to National by major rating agencies. As of September 30, 2015, the major rating agencies have assigned the following ratings to National: AA+ with a stable outlook by Kroll Bond Rating Agency; AA- with a stable outlook by Standard & Poor's Financial Services LLC (S&P); and A3 with a negative outlook by Moody's Investors Service, Inc. (Moody's).

National pursues opportunities for new business across the spectrum of municipal sectors where it maintains underwriting criteria. Based on our underwriting and pricing criteria, the majority of our new business is in the general obligation, tax-backed and revenue bond sectors. In addition to the new issue market, we are pursuing opportunities in the secondary market with respect to bonds issued in recent years that were not insured and that meet our underwriting criteria.

National seeks to generate shareholder value through appropriate risk-adjusted pricing; however, current market conditions and the competitive landscape limit National's new business opportunities and its ability to price and underwrite risk with attractive returns.

Prevailing interest rate levels and credit spreads have affected demand for financial guarantee insurance. Currently the market features both lower interest rates and narrower spreads between insured and uninsured obligations. The purchase of insurance during such periods will generally provide lower cost savings to the issuer compared to periods of higher rates and wider spreads. Financial guarantee insurance competes in nearly all instances with the issuer's alternative of foregoing insurance. If the interest savings from insurance are not greater than the cost of the insurance, the issuer will generally choose to issue bonds without insurance. As a result, some issuers choose to issue on an uninsured basis. At the same time, investors may choose to forego the purchase of insured bonds to increase the yield on their investments. As interest rates rise, we expect more favorable new business opportunities in the U.S. public finance market.

Given that National's insurance policies protect policyholders from potential defaults and guarantee payments of scheduled principal and interest, we believe current stress in the municipal sector will increase the demand for National's insurance product. Refer to the U.S. Public Finance Insurance section for additional information on National's new business.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****EXECUTIVE OVERVIEW (continued)**

Overall our U.S. public finance insured portfolio continues to perform satisfactorily against a backdrop of relatively stable domestic economic activity. While this trend will generally benefit the tax revenues and fees charged for essential municipal services which secure our insured bond portfolio, some state, local governments and territory obligors we insure, remain under financial and budgetary stress. This could lead to an increase in defaults by such entities on the payment of their obligations and losses or impairments on a greater number of our insured transactions. We continue to monitor and analyze these situations and other stressed credits closely, and the overall extent and duration of this stress is uncertain.

Exposure to Puerto Rico

As of September 30, 2015, National had \$4.3 billion of gross par outstanding (\$4.7 billion of gross par outstanding when including accreted interest on capital appreciation bonds (CABs)) related to the Commonwealth of Puerto Rico and certain of its instrumentalities (Puerto Rico). Puerto Rico is experiencing fiscal stress due to, among other things, Puerto Rico's structural budget imbalance, a stagnating local economy, net migration of people and a high debt burden. However, it has attempted to address its significant economic challenges by passing a balanced general fund budget for the fiscal year ending June 30, 2016 and approving a proposed tax reform bill. Refer to the U.S. Public Finance Insurance Puerto Rico Exposures section for additional information on our Puerto Rico exposures.

MBIA Inc.

During the nine months ended September 30, 2015, the Company repurchased 38.9 million common shares of MBIA Inc. and \$50 million par value outstanding of our debt obligations. MBIA Inc. has issued debt to finance the operations of its subsidiaries. This debt, which includes MBIA Inc. senior notes, medium-term notes (MTNs) issued by MBIA Global Funding, LLC (GFL), and investment agreements issued by MBIA Investment Management Corp. (IMC) and MBIA Inc., are collectively managed and serviced with the financial resources available to MBIA Inc. We pledge high-quality securities as collateral for our investment agreements. Our MBIA Inc. senior notes, MTNs and investment agreements are serviced by available liquidity. Our debt will decrease over time primarily through payments of scheduled maturities and opportunistic calls and buybacks. Our strategy is to further reduce our leverage using cash primarily generated from operations to repurchase or retire debt while balancing this with share repurchases when management deems appropriate. Refer to the Capital Resources section for further information on our buybacks. Based on MBIA Inc.'s debt service requirements and expected operating expenses, we expect that MBIA Inc. will have sufficient cash to satisfy its debt obligations and its general corporate needs over time from expected subsidiary dividends, additional anticipated releases under the MBIA group's tax sharing agreement (the Tax Escrow Account), investment income and potential securities issuance; however, there can be no assurance that such sources will be adequate or that we will have access to the capital markets when needed. For further information, see Strategic Plan Related and Other Risk Factors in Part I, Item 1A, Risk Factors included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. MBIA Inc. also manages assets, which generates income to provide general liquidity support to MBIA Inc. Refer to the Liquidity MBIA Inc. Liquidity section for information on MBIA Inc.'s liquidity.

MBIA Corp.

MBIA Corp.'s primary objective is to maximize the margin of safety for its policyholders and the future recoveries of subordinate claimants. We intend to accomplish this by reducing exposure risk and mitigating potential losses on MBIA Corp.'s insurance exposures, maximizing the collection of excess spread and put-back recoveries and value preservation. MBIA Corp. has significant negative statutory earned surplus and has no current capacity to pay dividends. In addition, since July 15, 2012, the New York State Department of Financial Services (NYDFS) has not approved any payments on MBIA Corp.'s outstanding surplus notes. MBIA Corp. has contributed to the Company's net operating loss carryforward (NOL), which is used in the calculation of our consolidated income taxes and maintains a substantial NOL. As a result of its NOL, when MBIA Corp. is profitable, it is not expected to make any tax payments to the Tax Escrow Account. Based on MBIA Corp.'s current projected earnings and our expectation that it will not write new business for the foreseeable future, we believe it is unlikely that MBIA Corp. will generate sufficient income to fully use its NOL. Refer to the Capital Resources MBIA Corp. section for additional information on MBIA Corp.'s surplus notes and statutory capital.

Edgar Filing: MBIA INC - Form 10-Q

MBIA Corp. continues to successfully manage its liquidity risks and satisfy all payment obligations when due. For the nine months ended September 30, 2015, recoveries from excess spread on second-lien residential mortgage-backed securities (RMBS) continued to exceed paid claims and loss adjustment expense (LAE). There can be no assurance this trend will continue. Our liquidity forecasts project adequate resources to pay expected claims, but if MBIA Corp. experiences materially-elevated claims payments or does not substantially collect our projected amounts of excess spread or the put-back recoverable from Credit Suisse for ineligible mortgages, it could experience liquidity shortfalls.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****EXECUTIVE OVERVIEW (continued)**

If MBIA Corp. were to experience liquidity shortfalls in the future, it may have insufficient resources to continue to pay claims, which may cause the NYSDFS to put MBIA Insurance Corporation into a rehabilitation or liquidation proceeding. Given the separation of MBIA Inc. and MBIA Corp. as distinct legal entities, the absence of any material intercompany lending agreements or cross defaults between the entities, and the lack of reliance by MBIA Inc. on MBIA Corp. for the receipt of dividends, we do not believe that a rehabilitation or liquidation proceeding of MBIA Insurance Corporation by the NYSDFS would have any significant long-term liquidity impact on MBIA Inc. or result in a liquidation or similar proceeding of MBIA UK. Refer to the Liquidity MBIA Corp. Liquidity section for additional information on MBIA Corp.'s liquidity position.

Other

During the nine months ended September 30, 2015, investment funds affiliated with Warburg Pincus LLC (Warburg), the largest holder of MBIA Inc. common stock, sold all of its 45.7 million shares of the Company's common stock. In connection with this sale, National and the Company repurchased 8 million shares and 7.6 million shares, respectively.

Economic and Financial Market Trends

The U.S. economy showed signs of sustained growth during the third quarter of 2015 with continued improvements in housing and consumer spending. The unemployment rate remained at a seven-year low despite a slowdown of job creation. While overall employment improved, wage growth was flat and was accompanied by a low labor force participation rate. Based on economic trends, including the Federal Reserve's concerns about global developments, we expect that any increase in the federal funds rate will likely be modest and delayed until the end of this year or, more likely, early 2016.

During the third quarter of 2015, the European Central Bank's Quantitative Easing program continued to have a generally positive impact throughout much of Europe as deflationary concerns showed signs of receding and economic growth, employment and bank lending improved. These positive signs, however, are somewhat offset by concerns about the slowing growth in China and other emerging markets, the migrant crisis and Greece's ability to enact the economic and structural reforms required by the third bailout program. In the aggregate, conditions in Europe, China and other key markets remain uncertain and any material adverse impact on these economies may have implications for continued U.S. growth and further delay any increase in the federal funds rate by the Federal Reserve. We do not insure any sovereign or sub-sovereign debt from Greece and do not have any direct or indirect Greece sovereign debt holdings included in our investment portfolios. Information concerning our interest and foreign exchange rate sensitivity appears in Part I, Item 3, Quantitative and Qualitative Disclosures about Market Risk.

Economic and financial market trends could impact MBIA's business outlook and its financial results. Many states and municipalities have experienced growing tax collections and appreciation in local level assessed valuations which drive property taxes. The consistent gradual improvement of economic indicators at the state and local levels that strengthen the credit quality of the issuers of our insured municipal bonds is expected to improve the performance of our insured U.S. public finance portfolio and could reduce the amount of National's incurred losses. A decrease in oil prices which benefits consumers could have a positive impact on certain sales taxes to the extent consumer spending increases as a result. However, some states and municipalities will experience a decrease in revenues where their economies are reliant on the oil and gas industries.

An ongoing low interest rate environment will adversely impact the demand for municipal bond insurance since there is a lower economic benefit for issuers from the use of bond insurance as well as National's ability to price risk at levels that meet its underwriting objectives and returns since the spread between an uninsured bond and an insured bond is narrower, resulting in less spread for the payment of premium for bond insurance.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****EXECUTIVE OVERVIEW (continued)****Financial Highlights**

The following table presents our financial highlights. A detailed discussion of our financial results is presented within the Results of Operations section included herein. Refer to the Capital Resources Insurance Statutory Capital section for a discussion of National's and MBIA Corp.'s capital positions under statutory accounting principles (U.S. STAT).

In millions except for per share amounts	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net income (loss)	\$ (35)	\$ 173	\$ 98	\$ 549
Net income (loss) per diluted share	(0.23)	0.80	0.55	2.62

(1) - Adjusted book value per share is a non-GAAP measure. Refer to the following Results of Operations section for a discussion of adjusted book value and a reconciliation of GAAP book value per share to adjusted book value per share.

CRITICAL ACCOUNTING ESTIMATES

We prepare our consolidated financial statements in accordance with accounting principles generally accepted in the United States of America (GAAP), which requires the use of estimates and assumptions. Management has discussed and reviewed the development, selection, and disclosure of critical accounting estimates with the Company's Audit Committee. Our most critical accounting estimates include loss and LAE reserves, valuation of financial instruments, and deferred income taxes, since these estimates require significant judgment. Any modifications in these estimates could materially impact our financial results.

For a discussion of the Company's critical accounting estimates, see Critical Accounting Estimates in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. In addition, refer to Note 5: Loss and Loss Adjustment Expense Reserves and Note 6: Fair Value of Financial Instruments in the Notes to Consolidated Financial Statements for a current description of estimates used in our insurance loss reserving process and information about our financial assets and liabilities that are accounted for at fair value, including valuation techniques and significant inputs.

RECENT ACCOUNTING PRONOUNCEMENTS

Refer to Note 3: Recent Accounting Pronouncements in the Notes to Consolidated Financial Statements for a discussion of accounting guidance recently adopted by the Company.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS***Summary of Consolidated Results*

The following table presents a summary of our consolidated financial results for the three and nine months ended September 30, 2015 and 2014:

In millions except for share and per share amounts	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Total revenues	\$ 92	\$ 291	\$ 556	\$ 1,055

Income (loss) before income taxes	(55)	148	150	607
Provision (benefit) for income taxes	(20)	(25)	52	58
Net income (loss)	\$ (35)	\$ 173	\$ 98	\$ 549
Net income (loss) per common share:				
Basic	\$ (0.23)	\$ 0.90	\$ 0.56	\$ 2.83
Diluted	\$ (0.23)	\$ 0.80	\$ 0.55	\$ 2.62
Weighted average number of common shares outstanding:				
Basic	155,239,723	187,104,785	169,610,370	188,428,870
Diluted	155,239,723	188,424,318	170,566,386	191,616,723

Consolidated total revenues for the three months ended September 30, 2015 included \$55 million of net losses on financial instruments at fair value and foreign exchange compared with \$57 million of net gains for the same period of 2014. The net losses on financial instruments at fair value and foreign exchange in 2015 were principally due to mark-to-market changes of our interest rate swaps. The net gains on financial instruments at fair value and foreign exchange in 2014 were principally due to foreign currency exchange gains on Euro denominated liabilities. Consolidated total expenses for the three months ended September 30, 2015 included \$39 million of net insurance loss and LAE compared with \$20 million for the same period of 2014. The increase in net insurance loss and LAE was principally due to increases in losses in our insured first-lien RMBS and collateralized debt obligations (CDOs) exposures.

Consolidated total revenues for the nine months ended September 30, 2015 included \$91 million of net gains on insured derivatives compared with \$446 million of net gains for the same period of 2014. The net gains on insured derivatives in 2015 were principally the result of refining the credit rating of underlying collateral, partially offset by claim payments. The net gains on insured derivatives in 2014 were principally the result of commuting derivative liabilities at prices below their fair values, partially offset by settlement and claim payments. Consolidated total expenses for the nine months ended September 30, 2015 included \$79 million of net insurance loss and LAE compared with \$82 million for the same period of 2014. The decrease in net insurance loss and LAE in 2015 when compared with 2014 was principally related to decreases in certain RMBS exposures, partially offset by an increase in losses in our CDO exposures.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

RESULTS OF OPERATIONS (continued)

Operating Income (Loss)

In addition to our results prepared in accordance with GAAP, we also analyze the operating performance of the Company using operating income (loss) and operating income (loss) per diluted common share, both non-GAAP measures. Since operating income (loss) is used by management to assess performance and make business decisions, we consider operating income (loss) and operating income (loss) per diluted common share fundamental measures of periodic financial performance which are useful in understanding our results. Operating income (loss) and operating income (loss) per diluted common share are not substitutes for net income (loss) and net income (loss) per diluted common share determined in accordance with GAAP, and our definitions of operating income (loss) and operating income (loss) per diluted common share may differ from those used by other companies.

Operating income (loss) and operating income (loss) per diluted common share include the combined after-tax results of our U.S. public finance insurance and corporate segments and remove the after-tax results of activities that are not part of our ongoing business strategy. This includes the activities of our international and structured finance insurance, advisory services and conduit segments (collectively, Non-Core Segments). We do not expect to write new business in our international and structured finance insurance segment in the foreseeable future due to its current ratings, accumulated losses and non-policy claims. We exited our advisory services segment through the sale of Cutwater effective January 1, 2015, and in the second quarter of 2014, we liquidated our conduit segment.

In addition to removing our Non-Core Segments, operating income (loss) is adjusted for the following:

Elimination of the after-tax impact of mark-to-market gains (losses) on financial instruments that primarily include interest rate swaps and hybrid financial instruments. Also eliminated are the mark-to market gains (losses) on warrants issued by the Company. All of these amounts fluctuate based on market interest rates, credit spreads, MBIA Inc.'s common stock price and other market factors.

Elimination of the after-tax impact of foreign exchange gains (losses) on the remeasurement of certain assets and liabilities and transactions in non-functional currencies. Given the possibility of volatility in foreign exchange markets, we exclude the impact of foreign exchange gains (losses) to provide a measurement of comparability of operating income (loss).

Elimination of the after-tax impact of gains (losses) on the sale of investments, net investment losses related to other-than-temporary impairments (OTTI) and net gains (losses) on extinguishment of debt since the timing of these transactions are subject to management's assessment of market opportunities and capital liquidity positions.

Elimination of the after-tax impact of the gain on the sale of Cutwater.

Elimination of deferred income tax valuation allowance on these adjustments.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

The following table presents our combined operating income (loss) and operating income (loss) per diluted common share (both non-GAAP measures) and provides reconciliations of GAAP net income (loss) to operating income (loss) and GAAP net income (loss) per diluted common share to operating income (loss) per diluted common share for the three and nine months ended September 30, 2015 and 2014:

In millions, except per share amounts	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net income (loss)	\$ (35)	\$ 173	\$ 98	\$ 549
Less: net income of Non-Core Segments, including eliminations	(38)	10	(36)	244
Less: after-tax adjustments:				
Mark-to-market gains (losses) on financial instruments ⁽¹⁾	(19)	18	19	4
Foreign exchange gains (losses) ⁽¹⁾	1	39	29	38
Net gains (losses) on sales of investments ⁽¹⁾	-	1	4	26
Net investment losses related to OTTI	(2)	(10)	(7)	(10)
Net gains (losses) on extinguishment of debt	-	-	-	2
Other net realized gains (losses) ⁽²⁾	(1)	-	12	-
Tax valuation allowance on adjustments ⁽³⁾	-	(5)	-	82
Operating income (loss)	\$ 24	\$ 120	\$ 77	\$ 163
Operating income (loss) per diluted common share ⁽⁴⁾	\$ 0.15	\$ 0.63	\$ 0.45	\$ 0.85
Weighted average diluted shares used in calculation	155	188	171	192

(1) - Gross amounts are reported within Net gains (losses) on financial instruments at fair value and foreign exchange and the corresponding tax effects are reported within Provision (benefit) for income taxes on the Company's consolidated statements of operations.

(2) - Primarily relates to the after-tax gain on the sale of Cutwater.

(3) - Reported within Provision (benefit) for income taxes on the Company's consolidated statements of operations.

(4) - Operating income (loss) per diluted common share is calculated by taking operating income (loss) divided by GAAP weighted average number of diluted common shares outstanding.

Adjusted Book Value

In addition to book value per share, we also analyze adjusted book value (ABV) per share, a non-GAAP measure. We consider ABV a measure of fundamental value of the Company and the change in ABV an important measure of financial performance. ABV adjusts GAAP book value to remove the after-tax results of activities in our Non-Core Segments. In addition, ABV adjusts for certain items which the Company believes will reverse from GAAP book value through GAAP earnings and other comprehensive income, as well as to add in the impact of certain items which the Company believes will be realized in GAAP book value in future periods. The Company has limited such adjustments to those items

that it deems to be important to fundamental value and performance and which the likelihood and amount can be reasonably estimated. We have presented ABV to allow investors and analysts to evaluate the Company using the same measure that MBIA's management regularly uses to measure financial performance and value. ABV is not a substitute for and should not be viewed in isolation of GAAP book value, and our definition of ABV may differ from that used by other companies.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

As of September 30, 2015, ABV per share was \$29.55, an increase from \$24.87 as of December 31, 2014. The increase in ABV per share was primarily driven by a decrease in common shares outstanding from the share repurchases made by the Company during 2015. The following table provides a reconciliation of consolidated book value per share to consolidated ABV per share:

In millions except share and per share amounts	As of September 30, 2015	As of December 31, 2014
Total shareholders' equity of MBIA Inc.	\$ 3,702	\$ 3,929
Common shares outstanding	152,946,359	191,942,895
Book value per share	\$ 24.20	\$ 20.47
Reverse book value of Non-Core Segments (after-tax) ⁽¹⁾	1.89	1.16
Reverse net unrealized (gains) losses included in other comprehensive income (after-tax)	(0.04)	(0.15)
Add net unearned premium revenue (after-tax) ⁽²⁾	3.50	3.39
Total adjustments per share	5.35	4.40
Adjusted book value per share	\$ 29.55	\$ 24.87

(1) - The book value for Non-Core Segments, primarily the international and structured finance insurance segment, does not provide significant economic or shareholder value to MBIA Inc. Amounts are net of any deferred taxes available to MBIA Inc.

(2) - Consists of financial guarantee premiums, net of deferred acquisition costs. The discount rate on financial guarantee installment premiums was the risk-free rate as defined by the accounting principles for financial guarantee insurance contracts.

U.S. Public Finance Insurance

Our U.S. public finance insurance business is primarily conducted through National. The financial guarantees issued by National provide unconditional and irrevocable guarantees of the payment of the principal of, and interest or other amounts owing on, insured obligations when due or, in the event National has exercised, at its discretion, the right to accelerate the payment under its policies upon the acceleration of the underlying insured obligations due to default or otherwise. National's guarantees insure municipal bonds, including tax-exempt and taxable indebtedness of U.S. political subdivisions, as well as utility districts, airports, healthcare institutions, higher educational facilities, student loan issuers, housing authorities and other similar agencies and obligations issued by private entities that finance projects that serve a substantial public purpose. Municipal bonds and privately issued bonds used for the financing of public purpose projects are generally supported by taxes, assessments, user fees or tariffs related to the use of these projects, lease payments or other similar types of revenue streams.

The following table presents our U.S. public finance insurance segment results for the three and nine months ended September 30, 2015 and 2014:

Three Months Ended September 30,	Percent Change	Nine Months Ended September 30,	Percent Change

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

During the nine months ended September 30, 2015, National insured \$439 million of gross par exposure in the primary and secondary markets and had \$3 million in net premiums written. Low interest rates, narrow spreads and competitive pricing levels continue to severely limit new business opportunities. National supports the credit enhancement needs of municipal debt issuers across the U.S. National maintains underwriting criteria for most municipal risk types and pursues opportunities for new business across the spectrum of municipal sectors. The majority of its new business is in the general obligation, tax-backed and revenue bond sectors.

OPERATING INCOME (LOSS) In addition to the above results, we also analyze the operating performance of our U.S. public finance insurance segment using operating income (loss), a non-GAAP measure. We believe operating income (loss), as used by management, is useful for an understanding of the results of operations of the Company. Operating income (loss) is not a substitute for net income (loss) determined in accordance with GAAP, and our definition of operating income (loss) may differ from that used by other companies.

The following table presents a reconciliation of GAAP net income (loss) to operating income (loss) for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Net income (loss)	\$ 46	\$ 56	\$ 140	\$ 158
Less: after-tax adjustments:				
Net gains (losses) on sales of investments ⁽¹⁾	-	1	2	9
Net investment losses related to OTTI	(2)	(10)	(6)	(10)
Tax valuation allowance on adjustments ⁽²⁾	-	(5)	-	(5)
Operating income (loss)	\$ 48	\$ 70	\$ 144	\$ 164

(1) - Gross amounts are reported within Net gains (losses) on financial instruments at fair value and foreign exchange and the corresponding tax effects are reported within Provision (benefit) for income taxes on the Company's consolidated statements of operations.

(2) - Reported within Provision (benefit) for income taxes on the Company's consolidated statements of operations.

NET PREMIUMS EARNED Net premiums earned on financial guarantees represent gross premiums earned net of premiums ceded to reinsurers, and include scheduled premium earnings and premium earnings from refunded issues. The decrease in net premiums earned for the three months ended September 30, 2015 compared with the same period of 2014 resulted from a decrease in scheduled premiums earned of \$10 million, partially offset by an increase in refunded premiums earned of \$4 million. The increase in net premiums earned for the nine months ended September 30, 2015 compared with the same period of 2014 resulted from an increase in refunded premiums earned of \$44 million, partially offset by a decrease in scheduled premiums earned of \$24 million. Scheduled premium earnings declined due to the refunding and maturity of insured issues within our U.S. public finance portfolio. Refunding activity over the past several years has accelerated premium earnings in prior periods and reduced the amount of scheduled premiums that would have been earned in the current period.

NET GAINS (LOSSES) ON FINANCIAL INSTRUMENTS AT FAIR VALUE AND FOREIGN EXCHANGE The decrease in net gains (losses) on financial instruments at fair value and foreign exchange for the nine months ended September 30, 2015 when compared with the same period of 2014 was primarily due to a decrease in net realized gains from the sales of securities from the ongoing management of our U.S. public finance insurance investment portfolio and unfavorable mark-to-market fluctuations on financial instruments.

Edgar Filing: MBIA INC - Form 10-Q

NET INVESTMENT LOSSES RELATED TO OTHER-THAN-TEMPORARY IMPAIRMENTS Net investment losses related to OTTI for the three and nine months ended September 30, 2015 and 2014 were primarily related to one impaired security for which a loss was recognized as the difference between its amortized cost and the net present value of its projected cash flows. This OTTI resulted from liquidity concerns and other adverse financial conditions of the issuer. Refer to the Liquidity section included herein for additional information about impaired investments.

OTHER NET REALIZED GAINS (LOSSES) For the nine months ended September 30, 2015, other net realized gains (losses) related to an impairment charge on our Armonk, New York facility to adjust the carrying amount to its sales price less costs to sell. For the three and nine months ended September 30, 2014, other realized gains (losses) related to an insurance recovery on an errors and omissions liability policy.

LOSS AND LOSS ADJUSTMENT EXPENSES National's portfolio surveillance group is responsible for monitoring our U.S. public finance segment's insured obligations. The level and frequency of monitoring of any insured obligation depends on the type, size, rating and performance of the insured issue.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

Refer to Note 5: Loss and Loss Adjustment Expense Reserves in the Notes to Consolidated Financial Statements for a description of the Company's loss reserving policy and additional information related to its loss reserves.

The following table presents information about our U.S. public finance insurance loss and LAE expenses for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended			Nine Months Ended		
	September 30, 2015	September 30, 2014	Percent Change	September 30, 2015	September 30, 2014	Percent Change
Loss and LAE related to actual and expected payments	\$ (5)	\$ (24)	-79%	\$ (6)	\$ (26)	-77%
Recoveries of actual and expected payments	(2)	16	-113%	1	21	-95%
Gross losses incurred	(7)	(8)	-13%	(5)	(5)	-%
Reinsurance	-	-	-%	-	-	-%
Losses and loss adjustment expenses	\$ (7)	\$ (8)	-13%	\$ (5)	\$ (5)	-%

The benefit in losses and LAE for the three and nine months ended September 30, 2015 primarily related to decreases in reserves for certain municipal utilities driven by decreases in interest rates used to discount reserves and recoveries. The benefit in losses and LAE for the three months ended September 30, 2014 primarily related to decreases in reserves for certain general obligation bonds. The benefit in losses and LAE for the nine months ended September 30, 2014 primarily related to decreases in reserves for certain general obligation bonds, partially offset by losses related to certain Puerto Rico exposures.

The following table presents information about our U.S. public finance insurance loss and LAE reserves and recoverables as of September 30, 2015 and December 31, 2014:

In millions	September 30, 2015	December 31, 2014	Percent Change
Assets:			
Insurance loss recoverable	\$ -	\$ 4	-100%
Reinsurance recoverable on paid and unpaid losses ⁽¹⁾	-	1	-100%
Liabilities:			
Gross loss and LAE reserves	54	70	-23%
Expected recoveries on unpaid losses	(23)	(25)	-8%
Loss and LAE reserves	\$ 31	\$ 45	-31%

(1) - Reported within Other assets on our consolidated balance sheets.

Edgar Filing: MBIA INC - Form 10-Q

Loss and LAE reserves as of September 30, 2015 decreased compared with December 31, 2014 primarily as a result of decreases in expected payments on certain municipal utilities and certain general obligation bonds.

Included in our U.S. public finance loss and LAE reserves are both reserves for insured obligations for which a payment default has occurred and National has already paid a claim and also for which a payment default has not yet occurred, but a claim is expected in the future. The following table includes LAE reserves, but excludes par outstanding, as of December 31, 2014 for one issue that had no expected future claim payments, but for which National was obligated to pay LAE incurred in prior periods. As of September 30, 2015 and December 31, 2014, loss and LAE reserves comprised the following:

\$ in millions	Number of Issues ⁽¹⁾		Loss and LAE Reserve		Par Outstanding	
	September 30, 2015	December 31, 2014	September 30, 2015	December 31, 2014	September 30, 2015	December 31, 2014
Gross of reinsurance:						
Issues with defaults	3	4	\$ 13	\$ 19	\$ 52	\$ 123
Issues without defaults	5	7	18	26	1,430	1,501
Total gross of reinsurance	8	11	\$ 31	\$ 45	\$ 1,482	\$ 1,624

(1) - An issue represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

POLICY ACQUISITION COSTS AND OPERATING EXPENSES U.S. public finance insurance segment expenses for the three and nine months ended September 30, 2015 and 2014 are presented in the following table:

In millions	Three Months Ended September 30,			Nine Months Ended September 30,		
	2015	2014	Percent Change	2015	2014	Percent Change
Gross expenses	\$ 17	\$ 13	31%	\$ 47	\$ 42	12%
Amortization of deferred acquisition costs	\$ 15	\$ 14	7%	\$ 49	\$ 43	14%
Operating	17	13	31%	47	42	12%
Total insurance operating expenses	\$ 32	\$ 27	19%	\$ 96	\$ 85	13%

Gross expenses represent total insurance expenses before the deferral of any policy acquisition costs. Gross expenses increased for the three and nine months ended September 30, 2015 compared with the same periods of 2014 primarily due to an increase in compensation expense, partially offset by a decrease in legal and litigation related costs.

Amortization of deferred acquisition costs increased for the three and nine months ended September 30, 2015 compared with the same periods of 2014 due to higher refunding activity in 2015. We did not defer a material amount of policy acquisition costs during the nine months ended September 30, 2015 or 2014.

INSURED PORTFOLIO EXPOSURE Financial guarantee insurance companies use a variety of approaches to assess the underlying credit risk profile of their insured portfolios. MBIA uses both an internally developed credit rating system as well as third-party rating sources in the analysis of credit quality measures of its insured portfolio. In evaluating credit risk, we obtain, when available, the underlying rating of the insured obligation before the benefit of its insurance policy from nationally recognized rating agencies, Moody's and S&P. Other companies within the financial guarantee industry may report credit quality information based upon internal ratings that would not be comparable to our presentation. We maintain internal ratings on our entire portfolio, and our ratings may be higher or lower than the ratings assigned by Moody's or S&P.

The following table presents the credit quality distribution of MBIA's U.S. public finance outstanding gross par insured as of September 30, 2015 and December 31, 2014. CABs are reported at the par amount at the time of issuance of the insurance policy. All ratings are as of the period presented and represent S&P ratings. If transactions are not rated by S&P, a Moody's equivalent rating is used. If transactions are not rated by either S&P or Moody's, an internal equivalent rating is used.

In millions Rating	Gross Par Outstanding			
	September 30, 2015		December 31, 2014	
	Amount	%	Amount	%
AAA	\$ 7,711	4.3%	\$ 11,364	5.1%

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)*****U.S. Public Finance Insurance Puerto Rico Exposures***

The following is a summary of exposures within the insured portfolio of our U.S. public finance insurance segment related to Puerto Rico as of September 30, 2015.

In millions	Gross Par Outstanding	Gross Par Outstanding Plus CAB Accreted Interest	Debt Service Outstanding	National Internal Rating
Puerto Rico Electric Power Authority (PREPA) ⁽¹⁾	\$ 1,354	\$ 1,372	\$ 1,994	d
Puerto Rico Commonwealth GO ⁽¹⁾	985	1,023	1,402	bb1
Puerto Rico Highway and Transportation Authority Transportation Revenue (PRHTA) ⁽¹⁾	783	784	1,471	b3
Puerto Rico Sales Tax Financing Corporation (COFINA) ⁽¹⁾	684	1,025	4,170	a3
Puerto Rico Government Development Bank GO (GDB) ⁽²⁾	267	267	273	bb1
Puerto Rico Highway and Transportation Authority Highway Revenue (PRHTA) ⁽¹⁾	87	88	127	bb2
University of Puerto Rico System Revenue	89	89	134	bbb3
Inter American University of Puerto Rico Inc.	28	28	38	a3
Puerto Rico Industrial Development Company	13	13	13	bbb2
Total	\$ 4,290	\$ 4,689	\$ 9,622	

(1) - Includes CABs that reflect the gross par amount at the time of issuance of the insurance policy.

(2) - Additionally secured by the guarantee of the Commonwealth of Puerto Rico.

For many years Puerto Rico's economy has suffered from stagnation that has led to recurring budget deficits and increased borrowing to finance such deficits. As a result of mounting debt and, more recently, concerns about the sustainability of its debt level, deteriorating credit ratings and lack of market confidence, have constrained access to the capital markets straining liquidity for Puerto Rico and its municipalities. Although Puerto Rico has tried to address its significant financial challenges through various fiscal policies and by the passage of a balanced general fund budget, it continues to experience fiscal stress that could lead to defaults on its debt obligations.

The Public Corporations Debt Enforcement and Recovery Act (the Recovery Act) that sought to establish a bankruptcy framework for certain public corporations of Puerto Rico was determined to be unconstitutional by the U.S. District Court in Puerto Rico, and this ruling was upheld by the First Circuit Court of Appeals. Puerto Rico has sought review of the Recovery Act by filing a petition for certiorari to the Supreme Court of the United States.

In the second quarter of 2015, Puerto Rico increased its sales and use tax from 7% to 11.5% and mandated the conversion to a value added tax system in April of 2016 in an effort to raise additional general fund revenues. The Governor of Puerto Rico formed a working group to address significant, projected general fund deficits over the next several years. The working group delivered its Puerto Rico Fiscal and Economic Growth Plan (the Plan) in September of 2015. The Plan indicates that, absent any meaningful fiscal and structural reforms, the government will

incur a \$27.8 billion cumulative deficit between fiscal year 2016 and fiscal year 2020. The Plan proposes to reduce the Commonwealth's sizable deficits through a combination of revenue increases and spending cuts, as well as by realizing benefits from economic growth from spending initiatives. However, even with the implementation of these measures, the Plan projects a \$14.0 billion cumulative deficit. The report further projects that the Commonwealth will exhaust its liquidity in November of 2015, and that the GDB will exhaust its liquidity before December of 2015.

On July 1, 2015, PREPA made its debt service payments in full, and as scheduled from the combination of funds held by the Trustee and operating cash. As a result, there were no claims on any of National's insurance policies. To ensure that PREPA maintains sufficient operating liquidity, the then-forbearing bond insurers, including National, agreed to provide \$128 million of short-term financing through the purchase of interest-bearing securities on July 31, 2015 with repayment in full of outstanding principal and accrued interest by a mandatory redemption upon the consummation of a restructuring with the forbearing bond insurers prior to December 15, 2015 or a mandatory defeasance on December 15, 2015. The scheduled maturity date of these securities is January 1, 2016 and National's share of the total \$128 million of short-term financing is \$45 million. These securities were issued under PREPA's existing Power Revenue Bond Trust Agreement as parity indebtedness with the same terms and rights to repayment as PREPA's existing revenue debt.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

National's forbearance with PREPA expired in September of 2015 without a further extension, though discussions with PREPA continue. In August of 2015, ad hoc bondholders (representing approximately \$3.0 billion, or 37.0% of the power revenue bonds) and PREPA agreed to a non-binding term sheet detailing economic terms of a restructuring. The deal calls for the exchange of existing revenue bonds into a securitization at 85.0% of par. Additionally, PREPA reached a tentative agreement with its bank lenders that would reduce the interest rate on \$700 million of debt and extend its repayment for at least six years. Both the ad hoc bondholders and fuel line lenders continue to operate under the forbearance agreement.

In September of 2015, National filed a petition with the Puerto Rico Energy Commission (the PREC) requesting (i) conclusion of a PREPA rate review within four months and (ii) an immediate 4.2 cent per kWh temporary increase in PREPA's base electricity rate. The PREC denied National's request, citing insufficient information regarding PREPA's operations and financial performance necessary to conduct a rate review. In October of 2015, National filed an appeal of this decision with the Puerto Rico Court of Appeals. Also in October of 2015, National and Assured Guaranty filed a petition to intervene into the ongoing proceeding in which PREC is evaluating the Integrated Resource Plan that PREPA submitted in final form in September of 2015.

With regard to PRHTA, legislation was passed in the first quarter of 2015 that provides for (i) an increase in the aggregate petroleum products tax from \$9.25 per barrel to \$15.50 per barrel, and (ii) the reallocation of a portion of the petroleum products tax from PRHTA to another entity upon the occurrence of certain events including the transfer of certain PRHTA debt obligations to another entity for repayment. While the tax increase has become effective, the transfer of certain debt obligations has not occurred.

Other than Inter American University of Puerto Rico Inc., S&P, Fitch Ratings and/or Moody's have downgraded the ratings of all Puerto Rico issuers to below investment grade with a negative outlook due to narrowing liquidity, sluggish economic growth and persistent structural deficits. Although we have downgraded our internal rating for certain Puerto Rico insured debt, including that of the Commonwealth, the GDB, PREPA and PRHTA, to below investment grade, all of the insured obligations included in the preceding table are presently current on debt service payments (with PREPA using debt service reserve funds to pay its July 1, 2014, January 1, 2015, and a portion of its July 1, 2015 debt service payments).

Scheduled gross debt service due on our Puerto Rico exposures for the three months ending December 31, 2015 and each of the subsequent four years ending December 31 and thereafter are presented in the following table:

In millions	As of September 30, 2015							Total

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)***Corporate*

Our corporate segment consists of general corporate activities, including providing general support services to MBIA Inc.'s subsidiaries, asset and capital management and other business development activities. General support services are provided by our service company, MBIA Services, which provides various support services including, among others, management, legal, accounting, treasury, information technology, and insurance portfolio surveillance, on a fee-for-service basis. Asset, liability and capital management includes activities related to servicing obligations issued by MBIA Inc. and its subsidiaries, GFL and IMC. MBIA Inc. issued debt to finance the operations of the MBIA group. It also provided customized products for funds that were invested as part of asset-backed or structured product transactions. GFL raised funds through the issuance of MTNs with varying maturities, which were in turn guaranteed by MBIA Corp. GFL lent the proceeds of these MTN issuances to MBIA Inc. IMC, along with MBIA Inc., provided customized investment agreements, guaranteed by MBIA Corp., for bond proceeds and other public funds for such purposes as construction, loan origination, escrow and debt service or other reserve fund requirements. The Company ceased issuing these MTNs and investment agreements and the outstanding liability balances and corresponding asset balances have declined over time as liabilities mature, terminate or are retired. All of the debt within the corporate segment is managed collectively and is serviced by the financial resources available to MBIA Inc. Asset management activities provide for opportunities in investments and provide general liquidity support to MBIA Inc.

The following table summarizes the consolidated results of our corporate segment for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended			Nine Months Ended		
	September 30, 2015	September 30, 2014	Percent Change	September 30, 2015	September 30, 2014	Percent Change

n/m - Percent change not meaningful.

FEES The decrease in fees for the nine months ended September 30, 2015 compared with the same period of 2014 was primarily due to a decrease in fees paid by our conduit segment for administrative and other services. During the second quarter of 2014, we completed the winding down of our conduit segment.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

NET GAINS (LOSSES) ON FINANCIAL INSTRUMENTS AT FAIR VALUE AND FOREIGN EXCHANGE The unfavorable changes in net gains (losses) on financial instruments at fair value and foreign exchange for the three months ended September 30, 2015 compared with the same period of 2014 were primarily due to a decrease in foreign exchange gains on Euro denominated liabilities, an increase in losses from mark-to-market changes of our interest rate swaps and other hybrid financial instruments and a decrease in gains from the changes in the fair value of the outstanding warrants issued on MBIA Inc. common stock. The changes in the fair value of outstanding warrants were primarily attributable to volatility and MBIA Inc.'s common stock price, which are used in the valuation of the warrants. The unfavorable changes in net gains (losses) on financial instruments at fair value and foreign exchange for the nine months ended September 30, 2015 compared with the same period of 2014 were primarily due to an increase in losses from mark-to-market changes of our interest rate swaps and other hybrid financial instruments, a decrease in gains from the changes in the fair value of the outstanding warrants issued on MBIA Inc. common stock and a decrease in net realized gains from asset sales, partially offset by gains from the termination of derivatives.

OTHER NET REALIZED GAINS (LOSSES) The increase in other net realized gains for the nine months ended September 30, 2015 compared with the same period of 2014 was primarily due to the gain from the sale of Cutwater.

REVENUES OF CONSOLIDATED VIEs For the nine months ended September 30, 2014, total revenues of consolidated variable interest entities (VIEs) related to net losses as a result of the deconsolidation of a VIE.

INTEREST EXPENSE Interest expense decreased for the three and nine months ended September 30, 2015 compared with the same periods of 2014 primarily due to the continued maturity and repurchases of liabilities by the Company.

PROVISION (BENEFIT) FOR INCOME TAXES The benefit for income taxes for the nine months ended September 30, 2014 was higher than the statutory rate of 35% principally due to the decrease in our valuation allowance against our deferred tax asset from asset sales of previously impaired assets and a decrease in our reserve for uncertain tax positions.

OPERATING INCOME (LOSS) In addition to the above results, we also analyze the operating performance of our corporate segment using operating income (loss), a non-GAAP measure. We believe operating income (loss), as used by management, is useful for an understanding of the results of operations of the Company. Operating income (loss) is not a substitute for net income (loss) determined in accordance with GAAP, and our definition of operating income (loss) may differ from that used by other companies.

The following table presents a reconciliation of GAAP net income (loss) to operating income (loss) for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014

- (2) - Relates to the after-tax gain on the sale of Cutwater.
- (3) - Reported within Provision (benefit) for income taxes on the Company's consolidated statements of operations.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)***International and Structured Finance Insurance*

Our international and structured finance insurance business is principally operated through MBIA Corp. The financial guarantees issued by MBIA Corp. generally provide unconditional and irrevocable guarantees of the payment of the principal of, and interest or other amounts owing on, non-U.S. public finance and global structured finance insured obligations when due or, in the event MBIA Corp. has the right, at its discretion, to accelerate insured obligations upon default or otherwise, upon MBIA Corp.'s acceleration. Certain guaranteed investment contracts written by MBIA Inc. are insured by MBIA Corp., and if MBIA Inc. or such subsidiaries were to have insufficient assets to pay amounts due upon maturity or termination, MBIA Corp. would make such payments under its insurance policies. MBIA Corp. also insured debt obligations of other affiliates, including GFL and IMC. MBIA Corp. has also written insurance policies guaranteeing the obligations under credit default swaps (CDS) contracts of an affiliate, LaCrosse Financial Products, LLC (LaCrosse), and certain other derivative contracts, which may include termination payments that may become due in certain events, including the insolvency or payment defaults of MBIA Corp. or LaCrosse. MBIA Insurance Corporation also provides reinsurance to its insurance subsidiaries.

MBIA Corp. insures non-U.S. public finance and global structured finance, including asset-backed obligations. MBIA Corp. has insured sovereign-related and sub-sovereign bonds, utilities, privately issued bonds used for the financing of projects that include toll roads, bridges, airports, public transportation facilities, and other types of infrastructure projects serving a substantial public purpose. Global structured finance and asset-backed obligations typically are securities repayable from cash flows generated by a specified pool of assets, such as residential and commercial mortgages, insurance policies, consumer loans, corporate loans and bonds, trade and export receivables, and leases for equipment, aircraft and real estate property. We no longer insure new credit derivative contracts except for transactions related to the restructuring or reduction of existing derivative exposure.

The following table presents our international and structured finance insurance segment results for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended			Nine Months Ended		
	September 30, 2015	September 30, 2014	Percent Change	September 30, 2015	September 30, 2014	Percent Change

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

For the three and nine months ended September 30, 2015 and 2014, we did not have any new international and structured finance insurance writings. We do not expect to write new business in our international and structured finance insurance segment in the foreseeable future due to its current ratings, accumulated losses and non-policy claims. Our primary objectives are risk reduction, loss mitigation and value preservation. As of September 30, 2015, MBIA Corp.'s total insured gross par outstanding was \$44.3 billion. Since December 31, 2007, our total insured gross par outstanding has decreased approximately 87% from \$331.2 billion. Furthermore, MBIA UK is no longer permitted to write new business and any new financial guarantee insurance would require regulatory approval.

NET PREMIUMS EARNED Our international and structured finance insurance segment generates net premiums from insurance policies accounted for as financial guarantee contracts. Certain premiums may be eliminated in our consolidated financial statements as a result of the Company consolidating VIEs. In addition, we generate net premiums from insured credit derivatives that are included in Realized gains (losses) and other settlements on insured derivatives on our consolidated statements of operations. The following table provides net premiums earned from our financial guarantee contracts for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended			Nine Months Ended		
	September 30, 2015	September 30, 2014	Percent Change	September 30, 2015	September 30, 2014	Percent Change
Net premiums earned:						
U.S.	\$ 7	\$ 8	-13%	\$ 21	\$ 26	-19%
Non-U.S.	18	41	-56%	54	87	-38%
Total net premiums earned	\$ 25	\$ 49	-49%	\$ 75	\$ 113	-34%
VIEs (eliminated in consolidation)	\$ 3	\$ 4	-25%	\$ 9	\$ 11	-18%

Net premiums earned represent gross premiums earned net of premiums ceded to reinsurers, and include scheduled premium earnings and premium earnings from refunded issues. Net premiums earned decreased for the three and nine months ended September 30, 2015 compared with the same periods of 2014 primarily due to a decrease in refunded premiums earned from the termination of a policy in 2014 and a decrease in scheduled premiums earned from the maturity and early settlement of insured transactions with no writings of new insurance policies.

FEES AND REIMBURSEMENTS The decreases in fees and reimbursements for the three and nine months ended September 30, 2015 compared with the same periods of 2014 were primarily due to decreases in termination and waiver and consent fees related to ongoing management of our international and structured finance insurance business, partially offset by an increase in ceding commission income from National. Due to the transaction-specific nature inherent in fees and reimbursements, these revenues can vary significantly from period to period.

NET CHANGE IN FAIR VALUE OF INSURED DERIVATIVES The following table presents the net premiums and fees earned related to derivatives and the components of the net change in fair value of insured derivatives for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended			Nine Months Ended		
	September 30, 2015	September 30, 2014	Percent Change	September 30, 2015	September 30, 2014	Percent Change
Net premiums and fees earned on insured derivatives	\$ 5	\$ 6	-17%	\$ 12	\$ 14	-14%
Realized gains (losses) on insured derivatives	(23)	(30)	-23%	(42)	(432)	-90%

Edgar Filing: MBIA INC - Form 10-Q

Realized gains (losses) and other settlements on insured derivatives	(18)	(24)	-25%	(30)	(418)	-93%
Unrealized gains (losses) on insured derivatives	21	48	-56%	121	863	-86%
Net change in fair value of insured derivatives	\$ 3	\$ 24	-88%	\$ 91	\$ 445	-80%

The Company no longer insures new credit derivative contracts except in transactions related to the restructuring or reduction of existing derivative exposure. Premiums earned related to insured credit derivatives will decrease over time as a result of settlements prior to maturity and scheduled amortizations. For the three and nine months ended September 30, 2015, realized losses on insured derivatives resulted from claim payments on commercial mortgage-backed securities (CMBS) transactions.

Unrealized gains on insured derivatives for the three months ended September 30, 2015 were primarily the result of refining the credit rating of underlying collateral, shorter transaction life and the effects of principal amortization. For the three months ended September 30, 2014, unrealized gains on insured derivatives were principally associated with the reversal of unrealized losses from commutations and the effects of MBIA's nonperformance risk on its derivative liabilities. For the nine months ended September 30, 2015, unrealized gains on insured derivatives were principally the result of refining the credit rating of underlying collateral. For the nine months ended September 30, 2014, unrealized gains on insured derivatives were principally associated with the reversal of unrealized losses from commutations.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

As of September 30, 2015, the cost of five year CDS referencing MBIA Corp. was 29.58% upfront plus 5% per annum compared with 13.88% upfront plus 5% per annum as of September 30, 2014. As of September 30, 2015 and December 31, 2014, the fair value of MBIA Corp.'s insured CDS liability was \$121 million and \$244 million, respectively. Our mark-to-market on insured credit derivatives uses the most appropriate of the one to ten year CDS cost for each transaction, and those costs ranged from 12.24% upfront plus 5% per annum to 30.7% upfront plus 5% per annum as of September 30, 2015. As of September 30, 2014, those costs ranged from 3.25% upfront plus 5% per annum to 16.75% upfront plus 5% per annum.

As of September 30, 2015, MBIA Corp. had \$3.3 billion of gross par outstanding on insured credit derivatives compared with \$9.5 billion as of December 31, 2014. During the nine months ended September 30, 2015, eight insured issues matured or terminated that totaled \$5.9 billion in gross par outstanding. As of September 30, 2015, 11 insured issues remained, of which 3 insured issues with total gross par outstanding of \$2.2 billion are scheduled to mature by the end of 2016.

NET GAINS (LOSSES) ON FINANCIAL INSTRUMENTS AT FAIR VALUE AND FOREIGN EXCHANGE The net losses on financial instruments at fair value and foreign exchange for the three months ended September 30, 2015 were primarily due to foreign currency exchange losses on the sale of Euro denominated long-term debt. The net losses on financial instruments at fair value and foreign exchange for the nine months ended September 30, 2015 were primarily due to realized losses from foreign currency revaluation of Chilean Unidad de Fomento denominated unearned premium revenue and foreign currency exchange losses on the sale of Euro denominated long-term debt.

OTHER NET REALIZED GAINS (LOSSES) Other net realized gains (losses) for the three and nine months ended September 30, 2014 primarily related to an insurance recovery received on an errors and omissions liability policy.

REVENUES OF CONSOLIDATED VIEs For the three months ended September 30, 2015, total revenues of VIEs were \$25 million compared with total revenues of \$20 million for the same period of 2014. This increase was primarily due to an increase in net gains from second-lien RMBS put-back claims on ineligible mortgage loans. For the nine months ended September 30, 2015, total revenues of consolidated VIEs were \$46 million compared with total revenues of \$69 million for the same period of 2014. This decrease was primarily due to lower mark-to-market gains on assets of consolidated VIEs due to lower expected payments. We elected to record at fair value certain instruments that are consolidated under accounting guidance for consolidation of VIEs, and as such, changes in fair value are reflected in earnings.

LOSS AND LOSS ADJUSTMENT EXPENSES MBIA's insured portfolio management group within our international and structured finance insurance business is responsible for monitoring international and structured finance insured obligations. The level and frequency of monitoring of any insured obligation depends on the type, size, rating and performance of the insured issue.

Refer to Note 5: Loss and Loss Adjustment Expense Reserves in the Notes to Consolidated Financial Statements for a description of the Company's loss reserving policy and additional information related to its loss reserves.

Summary of Financial Guarantee Insurance Losses and LAE

The following table presents information about our financial guarantee insurance losses and LAE recorded in accordance with GAAP for the three and nine months ended September 30, 2015 and 2014:

In millions	Three Months Ended		Percent Change	Nine Months Ended		Percent Change
	September 30, 2015	September 30, 2014		September 30, 2015	September 30, 2014	
Losses and LAE related to expected payments	\$ 18	\$ (34)	n/m	\$ 123	\$ (30)	n/m

Edgar Filing: MBIA INC - Form 10-Q

Recoveries of expected payments	28	62	-55%	(39)	117	-133%
Gross losses incurred	46	28	64%	84	87	-3%
Reinsurance	-	-	-%	-	-	-%
Losses and loss adjustment expenses	\$ 46	\$ 28	64%	\$ 84	\$ 87	-3%

n/m - Percent change not meaningful.

For the three months ended September 30, 2015, losses and LAE primarily related to decreases in projected collections from excess spread within the insured second-lien RMBS securitizations and increases in expected payments on first-lien RMBS securitizations.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

For the three months ended September 30, 2014, losses and LAE primarily related to decreases of expected recoveries on an international road transaction and projected collections from excess spread within insured second-lien RMBS securitizations, partially offset by decreases in expected payments on an international road transaction.

For the nine months ended September 30, 2015, losses and LAE primarily related to decreases in projected collections from excess spread within the insured second-lien RMBS securitizations and increases in expected payments on CDOs.

For the nine months ended September 30, 2014, losses and LAE primarily related to decreases in projected collections from excess spread within the insured second-lien RMBS securitizations, partially offset by decreases in expected payments of an international road transaction.

Excess spread is generated by performing loans within insured second-lien RMBS securitizations and is the difference between interest inflows on mortgage loan collateral and interest outflows on insured beneficial interests. The amount of excess spread depends on future loss trends (which include future delinquency trends, average time to charge-off delinquent loans and the availability of pool mortgage insurance), the future spread between prime and London Interbank Offered Rate interest rates, and borrower refinancing behavior which results in voluntary prepayments. Minor deviations in loss trends and voluntary prepayments may substantially impact the amounts we collect from excess spread.

For the three and nine months ended September 30, 2015, losses and LAE incurred included the elimination of \$18 million and \$38 million of expenses, respectively, as a result of the consolidation of VIEs. The \$18 million expense elimination included gross losses related to expected payments of \$23 million, partially offset by gross recoveries of expected payments of \$5 million. The \$38 million expense elimination included gross losses related to expected payments of \$33 million and gross recoveries of expected payments of \$5 million.

For the three and nine months ended September 30, 2014, losses and LAE incurred included the elimination of \$34 million and \$41 million of expenses, respectively, as a result of the consolidation of VIEs. The \$34 million expense elimination included gross losses related to expected payments of \$15 million and gross recoveries of expected payments of \$19 million. The \$41 million expense elimination included gross losses related to expected payments of \$23 million and gross recoveries of expected payments of \$18 million.

The Company's insurance loss recoverable represents expected potential recoveries of paid claims based on probability-weighted net cash inflows discounted at applicable risk-free rates as of the measurement date. The loss and LAE reserves represent the present value of the difference between cash payments we expect to make on the insured transactions and the excess spread we expect from the performing mortgage loans in the securitizations. As payments are made, a portion of those expected future receipts is recorded within Insurance loss recoverable on our consolidated balance sheets. The payments that we make virtually all go to reduce the principal balances of the securitizations. The following table presents information about our insurance loss recoverable and reserves as of September 30, 2015 and December 31, 2014.

In millions	September 30, 2015	December 31, 2014	Percent Change

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

As of September 30, 2015, loss and LAE reserves included \$293 million, after eliminating \$22 million related to our consolidated VIEs, of our remaining insured first and second-lien RMBS exposure.

Included in MBIA Corp.'s loss and LAE reserves are both reserves for insured obligations for which a payment default has occurred and MBIA Corp. has already paid a claim and also for which a payment default has not yet occurred but a claim is expected in the future. The following table includes LAE reserves, but excludes par outstanding, as of September 30, 2015 and December 31, 2014 for one and two issues, respectively, that had no expected future claim payments or par outstanding, but for which MBIA Corp. was obligated to pay LAE incurred in prior periods. As of September 30, 2015 and December 31, 2014, loss and LAE reserves comprised the following:

\$ in millions	Number of Issues ⁽¹⁾		Loss and LAE Reserve		Par Outstanding	
	September 30, 2015	December 31, 2014	September 30, 2015	December 31, 2014	September 30, 2015	December 31, 2014
Gross of reinsurance:						
Issues with defaults	103	104	\$ 303	\$ 344	\$ 4,087	\$ 4,885
Issues without defaults	6	7	146	117	1,143	1,492
Total gross of reinsurance	109	111	\$ 449	\$ 461	\$ 5,230	\$ 6,377

(1) - An issue represents the aggregate of financial guarantee policies that share the same revenue source for purposes of making debt service payments. POLICY ACQUISITION COSTS AND OPERATING EXPENSES International and structured finance insurance segment expenses for the three and nine months ended September 30, 2015 and 2014 are presented in the following table:

In millions	Three Months Ended		Percent Change	Nine Months Ended		Percent Change
	September 30, 2015	September 30, 2014		September 30, 2015	September 30, 2014	
Gross expenses	\$ 13	\$ 13	-%	\$ 39	\$ 44	-11%
Amortization of deferred acquisition costs	\$ 18	\$ 19	-5%	\$ 59	\$ 54	9%
Operating	13	12	8%	38	42	-10%
Total insurance operating expenses	\$ 31	\$ 31	-%	\$ 97	\$ 96	1%

Gross expenses represent total insurance expenses before the deferral of any policy acquisition costs. Gross expenses decreased for the nine months ended September 30, 2015 compared with the same period of 2014 primarily due to decreases in compensation expense, legal and litigation related costs and consulting fees. The increase in the amortization of deferred acquisition costs for the nine months ended September 30, 2015 compared with the same period of 2014 is due to higher refunding activity in 2015. Operating expenses decreased for the nine months ended September 30, 2015 compared with the same period of 2014 due to decreases in gross expenses. We did not defer a material amount of policy acquisition costs during the first nine months of 2015 or 2014. Policy acquisition costs in these periods were primarily related to commissions and premium taxes on installment policies written in prior periods.

Edgar Filing: MBIA INC - Form 10-Q

INSURED PORTFOLIO EXPOSURE The credit quality of our international and structured finance insured portfolio is assessed in the same manner as our U.S. public finance insured portfolio. As of September 30, 2015 and December 31, 2014, 21% of our international and structured finance insured portfolio, was rated below investment grade, before giving effect to MBIA's guarantees, based on MBIA's internal ratings, which are generally more current than the underlying ratings provided by S&P and Moody's for this subset of our insured portfolio.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)***European Sovereign Debt Exposure*

Uncertainties regarding European sovereign debt have affected the global economy. Outside the U.S. financial guarantee insurance has been used by issuers of sovereign-related and sub-sovereign bonds, structured finance securities, utility debt and financing for public purpose projects, among others. MBIA does not insure any direct European sovereign debt. However, we do insure both structured finance and public finance obligations in select international markets. MBIA's indirect European sovereign insured debt exposure totaled \$6.5 billion as of September 30, 2015 and included obligations of sovereign-related and sub-sovereign issuers, such as regions, departments, and sovereign-owned entities that are supported by a sovereign state, region or department. Of the \$6.5 billion of insured gross par outstanding, \$509 million and \$205 million were related to Spain and Ireland, respectively. The remaining \$5.8 billion was related to the United Kingdom (UK). We do not insure any sovereign or sub-sovereign debt from Greece and our remaining exposure in Portugal matured in the third quarter of 2015. We closely monitor our existing insured European portfolios on an ongoing basis. We consider country risk, including economic and political factors, the type and quality of local regulatory oversight, the strength of the legal framework in each country and the stability of the local institutional framework. We also monitor local accounting, regulatory and legal requirements, local financial market developments, the impact of exchange rates and local demand dynamics. A default by one or more sovereign issuers could have an adverse effect on our insured debt exposures. The Company has an immaterial amount of direct and indirect European sovereign debt holdings, with no direct or indirect Greece sovereign debt holdings, included in its investment portfolios.

International and Structured Finance Insurance Selected Portfolio Exposures

The following is a summary of selected significant exposures within the insured portfolio of our international and structured finance insurance segment. Many of these sectors are and have been considered volatile over the past several years. We may experience considerable incurred losses and future expected payments in certain of these sectors. There can be no assurance that the loss reserves described below will be sufficient or that we will not experience losses on transactions on which we currently have no loss reserves, in particular if the economy deteriorates.

Residential Mortgage Exposure

MBIA Corp. insures mortgage-backed securities (MBS) backed by residential mortgage loans, including second-lien RMBS transactions (revolving home equity lines of credit (HELOC) loans and closed-end second mortgages (CES)). MBIA Corp. also insures MBS backed by first-lien alternative A-paper (Alt-A) and subprime mortgage loans directly through RMBS securitizations. There was considerable stress and deterioration in the mortgage market since 2008 reflected by heightened delinquencies and losses, particularly related to Alt-A and subprime mortgage loans originated during 2005, 2006 and 2007.

The following table presents the gross par outstanding of MBIA Corp.'s total direct RMBS insured exposure as of September 30, 2015 and December 31, 2014. Amounts include the gross par outstanding related to transactions that the Company consolidates under accounting guidance for VIEs.

In millions	Gross Par Outstanding as of		
	September 30, 2015	December 31, 2014	Percent Change
Collateral Type			
HELOC Second-lien	\$ 1,970	\$ 2,296	-14%
CES Second-lien	1,869	2,180	-14%
Alt-A First-lien ⁽¹⁾	1,633	1,807	-10%
Subprime First-lien ⁽²⁾	749	838	-11%
Prime First-lien	105	144	-27%

Edgar Filing: MBIA INC - Form 10-Q

Total	\$ 6,326	\$ 7,265	-13%
-------	----------	----------	------

(1) -Includes international exposure of \$459 million and \$511 million as of September 30, 2015 and December 31, 2014, respectively.

(2) -Includes international exposure of \$4 million as of December 31, 2014.

Collateralized Debt Obligations and Related Instruments

As part of our international and structured finance insurance activities, MBIA Corp. typically provided guarantees on senior and, in a limited number of cases, mezzanine tranches of CDOs, as well as protection on structured CMBS pools and corporate securities, and CDS referencing such securities. The following discussion, including reported amounts and percentages, includes insured CDO transactions consolidated by the Company as VIEs.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

As of September 30, 2015, MBIA Corp.'s \$6.7 billion CDO portfolio represented 15% of its total insured gross par outstanding of \$44.3 billion. As of December 31, 2014, MBIA Corp.'s \$13.8 billion CDO portfolio represented 25% of its total insured gross par outstanding of \$55.2 billion. In addition to the below table, MBIA Corp. insures approximately \$475 million in commercial real estate (CRE) loan pools, comprising both European and domestic assets. The distribution of our insured CDO and related instruments portfolio by collateral type is presented in the following table:

In millions Collateral Type	Gross Par Outstanding as of		Percent Change
	September 30, 2015	December 31, 2014	
Multi-sector CDOs	\$ 726	\$ 960	-24%
Investment grade corporate CDOs	1,200	6,824	-82%
High yield corporate CDOs	2,956	3,740	-21%
Structured CMBS pools	1,114	1,498	-26%
CRE CDOs	733	825	-11%
Total	\$ 6,729	\$ 13,847	-51%

Loss Remediation Transactions

We may seek to purchase, directly or indirectly, obligations guaranteed by MBIA or seek to commute policies. The amount of insurance exposure reduced, if any, and the nature of any such actions will depend on market conditions, pricing levels from time to time, and other considerations. In some cases, these activities may result in a reduction of loss reserves, but in all cases they are intended to limit our ultimate losses and reduce the future volatility in loss development on the related policies. Our ability to purchase guaranteed obligations and to commute policies will depend on management's assessment of available liquidity.

U.S. Public Finance and International and Structured Finance Reinsurance

Reinsurance enables the Company to cede exposure for purposes of syndicating risk and increasing its capacity to write new business while complying with its single risk and credit guidelines. When a reinsurer is downgraded by one or more of the rating agencies, less capital credit is given to MBIA under rating agency models and the overall value of the reinsurance to MBIA is reduced. The Company generally retains the right to reassume the business ceded to reinsurers under certain circumstances, including a reinsurer's rating downgrade below specified thresholds. The following table presents information about our reinsurance agreements as of September 30, 2015 for our U.S. public finance and international and structured finance insurance operations:

In millions Reinsurers	Standard & Poor's Rating (Status)	Moody's Rating (Status)	Ceded Par Outstanding	Letters of Credit/Trust Accounts	Reinsurance Recoverable ⁽¹⁾
Assured Guaranty Re Ltd.	AA (Stable Outlook)	WR ⁽²⁾	\$ 3,267	\$ 30	\$ -

Edgar Filing: MBIA INC - Form 10-Q

Assured Guaranty Corp.	AA (Stable Outlook)	A3 (Negative Outlook)	1,761	-	6
Overseas Private Investment Corporation	AA+ (Stable Outlook)	Aaa (Stable Outlook)	253	-	-
Others	A- or above	A2 or above	125	3	-
Total			\$ 5,406	\$ 33	\$ 6

(1) - Total reinsurance recoverable is primarily recoverables on unpaid losses.

(2) - Represents a withdrawal of ratings.

MBIA requires certain unauthorized reinsurers to maintain bank letters of credit or establish trust accounts to cover liabilities ceded to such reinsurers under reinsurance contracts. The Company remains liable on a primary basis for all reinsured risk. Based on MBIA's assessment of the credit risk of its reinsurers and expected claims under the reinsurance agreements, MBIA believes that its reinsurers remain capable of meeting their obligations, although there can be no assurance of such in the future.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)**

As of September 30, 2015, the aggregate amount of insured par outstanding ceded by MBIA to reinsurers under reinsurance agreements was \$5.4 billion compared with \$6.1 billion as of December 31, 2014. As of September 30, 2015, \$4.4 billion of the ceded par outstanding was ceded from our U.S. public finance insurance segment and \$1.0 billion was ceded from our international and structured finance insurance segment. Under National's reinsurance agreement with MBIA Corp., if a reinsurer of MBIA Corp. is unable to pay claims ceded by MBIA Corp. on U.S. public finance exposure, National will assume liability for such ceded claim payments.

Advisory Services

Until January of 2015, we conducted our asset management and advisory business primarily through Cutwater. Cutwater had provided advisory services, including cash management, discretionary asset management and structured products on a fee-for-service basis. Effective January 1, 2015, we completed the sale of Cutwater to a subsidiary of the Bank of New York Mellon Corporation and exited our advisory services business.

The following table summarizes the results and assets under management of our advisory services segment for the three and nine months ended September 30, 2014. These results include revenues and expenses from transactions with the Company's other segments.

In millions	Three Months Ended September 30, 2014	Nine Months Ended September 30, 2014
Fees	\$ 8	\$ 27
Net gains (losses) of financial instruments at fair value and foreign exchange	-	(3)
Revenues of consolidated VIEs	(4)	(4)
Total revenues	4	20
Operating expenses	10	35
Income (loss) before income taxes	(6)	(15)
Provision (benefit) for income taxes	(2)	(3)
Net income (loss)	\$ (4)	\$ (12)
Ending assets under management:		
Third-party	\$ 11,623	\$ 11,623
Insurance	5,963	5,963
Corporate	4,297	4,297
Total ending assets under management	\$ 21,883	\$ 21,883
Average third-party assets under management	\$ 11,899	\$ 12,306
Conduit		

In 2014, the Company's conduit segment was operated through Meridian and administered through MBIA Asset Finance, LLC. Assets held by Meridian were funded by MTNs. In the second quarter of 2014, we retired the remaining \$129 million of outstanding MTNs issued by Meridian and dissolved the conduit segment. Certain of MBIA's consolidated subsidiaries had received fees for services provided to Meridian. The

Edgar Filing: MBIA INC - Form 10-Q

following table presents the results of our conduit segment for the nine months ended September 30, 2014. These results include revenues and expenses from transactions with the Company's other segments.

In millions	Nine Months Ended September 30, 2014
Revenues of consolidated VIEs:	
Net investment income	\$ (1)
Net gains (losses) on extinguishment of debt	4
Total revenues	3
Expenses of consolidated VIEs:	
Operating	9
Income (loss) before income taxes	(6)
Provision (benefit) for income taxes	(2)
Net income (loss)	\$ (4)

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****RESULTS OF OPERATIONS (continued)***Taxes**Provision for Income Taxes*

The Company's income taxes and the related effective tax rates for the three and nine months ended September 30, 2015 and 2014 are presented in the following table:

In millions	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Income (loss) before income taxes	\$ (55)	\$ 148	\$ 150	\$ 607
Provision (benefit) for income taxes	\$ (20)	\$ (25)	\$ 52	\$ 58
Effective tax rate	36.4%	-16.9%	34.7%	9.6%

For the nine months ended September 30, 2014, our effective tax rate applied to our income (loss) before income taxes was lower than the U.S. statutory tax rate of 35% primarily due to the decrease in our valuation allowance against our deferred tax asset from asset sales of previously impaired assets and a decrease in our reserve for uncertain tax positions.

The Company is party to a tax allocation agreement with members of its holding company system effective January 1, 1987. The agreement was amended and restated effective September 8, 2011 to change the method of calculating each domestic insurer's tax liability to the method permitted by paragraph 3(a) of Department Circular Letter #33 (1979). The agreement was submitted to the NYSDFS for review and non-disapproval pursuant to Section 1505 of the New York Insurance Law (NYIL).

Refer to Note 9: Income Taxes in the Notes to Consolidated Financial Statements for a further discussion of income taxes, including the Company's valuation allowance against deferred tax assets and its accounting for tax uncertainties.

CAPITAL RESOURCES

The Company manages its capital resources to minimize its cost of capital while maintaining appropriate claims-paying resources (CPR) for National and MBIA Corp. The Company's capital resources consist of total shareholders' equity, total debt issued by MBIA Inc. for general corporate purposes, and surplus notes issued by MBIA Corp. Total capital resources were \$5.2 billion and \$5.4 billion as of September 30, 2015 and December 31, 2014, respectively. MBIA Inc. uses its capital resources to support the business activities of its subsidiaries. As of September 30, 2015, MBIA Inc.'s investments in subsidiaries totaled \$4.1 billion.

In addition, MBIA Inc. also supports the MTN and investment agreement obligations issued by the Company. We seek to maintain sufficient liquidity and capital resources to meet the Company's general corporate needs and debt service. As of September 30, 2015 and December 31, 2014, net debt of MBIA Inc., which primarily comprised long-term debt, MTNs, investment agreements and derivative liabilities net of cash and investments at amortized cost and a tax receivable from subsidiaries, totaled \$963 million and \$740 million, respectively. Based on MBIA Inc.'s debt service requirements and expected operating expenses, we expect that MBIA Inc. will have sufficient cash to satisfy its net debt and its general corporate needs over time from distributions from its operating subsidiaries; however, there can be no assurance that MBIA Inc. will have sufficient cash in the event of unanticipated operating expenses. In addition, the Company may also consider raising third-party capital. For further information, see Strategic Plan Related and Other Risk Factors in Part I, Item 1A, Risk Factors included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 and Liquidity MBIA Inc. Liquidity section for additional information about MBIA Inc.'s liquidity.

Securities Repurchases

Edgar Filing: MBIA INC - Form 10-Q

Repurchases of debt and common stock may be made from time to time in the open market or in private transactions as permitted by securities laws and other legal requirements. We may also choose to redeem debt obligations where permitted by the relevant agreements. MBIA Inc. or its subsidiaries may repurchase or redeem outstanding common shares of MBIA Inc. and outstanding debt obligations at prices that we deem to be economically advantageous.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****CAPITAL RESOURCES (continued)****Equity securities**

The Company's share repurchases for the nine months ended September 30, 2015 are presented in the following table:

In millions, except per share amounts	Total Number of Shares Purchased	Average Price Paid Per Share
Period		
First Quarter of 2015	8.6	\$ 8.83
Second Quarter of 2015	11.6	8.76
Third Quarter of 2015	18.7	6.39
Total	38.9	\$ 7.63

On July 29, 2015, the Company's Board of Directors authorized the repurchase by the Company or its subsidiaries of up to \$100 million of its outstanding shares under a new share repurchase authorization, which superseded and terminated the prior authorization. The prior authorization had \$61 million available for future repurchases at the time it was terminated. As of September 30, 2015, there was no remaining authorized capacity under the July 29, 2015 repurchase program.

On October 28, 2015, the Company's Board of Directors authorized the repurchase by the Company or its subsidiaries of up to \$100 million of its outstanding shares under a new share repurchase authorization.

Debt securities

During the nine months ended September 30, 2015, we repurchased \$40 million par value outstanding of GFL MTNs issued by our corporate segment at a weighted average cost of approximately 100% of par value. Also, we repurchased \$10 million par value outstanding of the 7.00% Debentures due 2025 issued by our corporate segment at a weighted average cost of approximately 105% of par value.

Insurance Statutory Capital

National and MBIA Insurance Corporation are incorporated and licensed in, and are subject to primary insurance regulation and supervision by, the State of New York. MBIA UK is authorized by the Prudential Regulation Authority (PRA) and regulated by the Financial Conduct Authority and the PRA in the UK. MBIA Mexico is regulated by the Comisión Nacional de Seguros y Fianzas in Mexico. National and MBIA Insurance Corporation each are required to file detailed annual financial statements, as well as interim financial statements, with the NYSDFS and similar supervisory agencies in each of the other jurisdictions in which it is licensed. These financial statements are prepared in accordance with New York State and the National Association of Insurance Commissioners' statements of U.S. STAT and assist our regulators in evaluating minimum standards of solvency, including minimum capital requirements, and business conduct. MBIA UK is required to file annual regulatory returns with the PRA.

National**Capital and Surplus**

Edgar Filing: MBIA INC - Form 10-Q

National reported total statutory capital of \$3.4 billion as of September 30, 2015 compared with \$3.3 billion as of December 31, 2014. As of September 30, 2015, statutory capital comprised \$1.0 billion of contingency reserves and \$2.4 billion of policyholders' surplus. National had statutory net income of \$203 million for the nine months ended September 30, 2015. As of September 30, 2015, National's unassigned surplus was \$1.9 billion.

Under statutory accounting and NYIL, National's purchase of 8 million shares of MBIA Inc. common stock in the second quarter of 2015 is recorded as an investment and measured at fair value. However, the value of the investment that can be admitted is subject to limitation. As of September 30, 2015, the fair value and admitted value of the MBIA Inc. common shares owned by National were \$44 million and \$17 million, respectively.

In order to maintain its New York State financial guarantee insurance license, National is required to maintain a minimum of \$65 million of policyholders' surplus. National is also required to maintain contingency reserves to provide protection to policyholders in the event of extreme losses in adverse economic events. Refer to the following [MBIA Corp. Capital and Surplus](#) section for additional information about contingency reserves under the NYIL. As of September 30, 2015 and December 31, 2014, National was not in compliance with certain of its single risk limits but was in compliance with its aggregate risk limits.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****CAPITAL RESOURCES (continued)**

NYIL regulates the payment of dividends by financial guarantee insurance companies and provides that such companies may not declare or distribute dividends except out of statutory earned surplus. Under NYIL, the sum of (i) the amount of dividends declared or distributed during the preceding 12-month period and (ii) the dividend to be declared may not exceed the lesser of (a) 10% of policyholders' surplus, as reported in the latest statutory financial statements or (b) 100% of adjusted net investment income for such 12-month period (the net investment income for such 12-month period plus the excess, if any, of net investment income over dividends declared or distributed during the two-year period preceding such 12-month period), unless the Superintendent of the NYSDFS approves a greater dividend distribution based upon a finding that the insurer will retain sufficient surplus to support its obligations.

National had positive earned surplus as of September 30, 2015, which provides National with dividend capacity. As a condition to the NYSDFS approval of the simultaneous repurchase and reverse repurchase agreements (Asset Swap) between MBIA Inc. and National, the NYSDFS requested that, until the notional amount of the Asset Swap has been reduced to 5% or less of National's admitted assets, each of MBIA Inc., MBIA Corp. and National provide the NYSDFS with three months prior notice, or such shorter period as the NYSDFS may permit, of its intent to initiate cash dividends on shares of its common stock. As of September 30, 2015, the notional amount of the Asset Swap was below the 5% of National's admitted assets. Subsequent to September 30, 2015, National declared and paid a dividend of \$114 million to its ultimate parent, MBIA Inc. For the foreseeable future, we expect the as of right declared and paid dividend amounts from National to be limited by the adjusted net investment income calculation.

Claims-Paying Resources (Statutory Basis)

CPR is a key measure of the resources available to National to pay claims under its insurance policies. CPR consists of total financial resources and reserves calculated on a statutory basis. CPR has been a common measure used by financial guarantee insurance companies to report and compare resources and continues to be used by MBIA's management to evaluate changes in such resources. We have provided CPR to allow investors and analysts to evaluate National using the same measure that MBIA's management uses to evaluate National's resources to pay claims under its insurance policies. There is no directly comparable GAAP measure. Our calculation of CPR may differ from the calculation of CPR reported by other companies.

National's CPR and components thereto, as of September 30, 2015 and December 31, 2014 are presented in the following table:

In millions	As of September 30, 2015	As of December 31, 2014
Policyholders' surplus	\$ 2,445	\$ 2,190
Contingency reserves	960	1,076
Statutory capital	3,405	3,266
Unearned premium reserve	1,134	1,375
Present value of installment premiums ⁽¹⁾	203	216
Premium resources ⁽²⁾	1,337	1,591
Net loss and LAE reserves ⁽¹⁾	(20)	(13)
Salvage reserves	100	106
Gross loss and LAE reserve	80	93
Total claims-paying resources	\$ 4,822	\$ 4,950

(1) - Calculated using a discount rate of 2.90% as of September 30, 2015 and December 31, 2014.

(2) - Includes financial guarantee and insured credit derivative related premiums.

MBIA Corp.

Capital and Surplus

MBIA Corp. reported total statutory capital of \$813 million as of September 30, 2015 compared with \$859 million as of December 31, 2014. As of September 30, 2015, statutory capital comprised \$270 million of contingency reserves and \$543 million of policyholders' surplus. For the nine months ended September 30, 2015, MBIA Corp. had a statutory net loss of \$55 million. MBIA Corp.'s policyholders' surplus as of September 30, 2015 included a negative unassigned surplus of \$1.5 billion. As of September 30, 2015, MBIA Corp.'s policyholders' surplus was negatively impacted by \$126 million because under NYIL it was not permitted to treat as an admitted asset the portion of its investment in subsidiaries in excess of 60% of net admitted assets less the par value of common and preferred stock and liabilities. This overage was primarily caused by a decrease in MBIA Corp.'s policyholders' surplus due to insured losses in the past. MBIA Corp.'s policyholders' surplus may be further negatively impacted if future additional insured losses are incurred and the percentage of its assets invested in subsidiaries continues to increase.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****CAPITAL RESOURCES (continued)**

As of September 30, 2015, MBIA Corp. recognized estimated recoveries of \$387 million, net of reinsurance on a statutory basis related to put-backs of ineligible mortgage loans in its insured transactions and \$442 million related to excess spread recoveries on second-lien RMBS, net of reinsurance. These excess spread recoveries represented 54% of MBIA Corp.'s statutory capital as of September 30, 2015. There can be no assurance that we will be successful or that we will not be delayed in realizing these recoveries. Refer to Note 5: Loss and Loss Adjustment Expense Reserves in the Notes to Consolidated Financial Statements for additional information about these recoveries.

Under NYIL, MBIA Corp. is also required to establish a contingency reserve to provide protection to policyholders in the event of extreme losses in adverse economic events. The amount of the reserve is based on the percentage of principal insured or premiums earned, depending on the type of obligation (net of collateral, reinsurance, refunding, refinancings and certain insured securities). Reductions in the contingency reserve may be recognized based on excessive reserves and under certain stipulated conditions, subject to the approval of the Superintendent of the NYSDFS. As a result of regulatory approved reductions, MBIA Corp.'s contingency reserves of \$270 million as of September 30, 2015 represented reserves on 45 of the 355 outstanding credits insured by MBIA Corp.

In order to maintain its New York State financial guarantee insurance license, MBIA Corp. is required to maintain a minimum of \$65 million of policyholders' surplus. Under NYIL, MBIA Corp. is required to invest its minimum surplus and contingency reserves and 50% of its loss reserves and unearned premium reserves in certain qualifying assets. As of September 30, 2015, MBIA Corp. maintained its minimum requirement of policyholders' surplus and had enough qualifying assets to support its contingency reserves. As of September 30, 2015, MBIA Corp. was in compliance with its aggregate risk limits under the NYIL. If MBIA Corp. is not in compliance with its aggregate risk limits, the NYSDFS may prevent MBIA Corp. from transacting any new financial guarantee insurance business until it no longer exceeds the limitations. If new overages occur with respect to its single risk limits in 2015, MBIA Corp. will report them to the NYSDFS. In 2014, MBIA Corp. reported additional overages to the NYSDFS with respect to its single risk limits due to changes in its statutory capital.

In connection with MBIA Corp. obtaining approval from the NYSDFS to release excessive contingency reserves in previous periods, MBIA Corp. agreed that it would not pay any dividends without prior approval from the NYSDFS. Due to its significant negative earned surplus, MBIA Corp. has not had the statutory capacity to pay dividends since December 31, 2009. Based on estimated future income, MBIA Corp. is not expected to have any statutory capacity to pay any dividends for the foreseeable future.

As of September 30, 2015, the par amount outstanding of MBIA Corp.'s 14% Fixed-to-Floating Rate Surplus Notes due January 15, 2033 (the Surplus Notes) was \$953 million. Section 1307 of the Insurance Law and the Fiscal Agency Agreement governing the surplus notes (the Fiscal Agency Agreement), which was approved as it relates to Section 1307 by the NYSDFS in connection with the issuance of the Surplus Notes, each impose restrictions on the payments of principal and interest (or the redemption price or any make-whole premium) on the Surplus Notes (Surplus Note Payments). Section 1307 of the Insurance Law provides that any payments on surplus notes issued by an insurer shall be repaid only out of free and divisible surplus of such insurer with the approval of the superintendent whenever, in his judgment, the financial condition of such insurer warrants. The Superintendent has broad discretion in determining whether to allow us to make Surplus Note Payments. We are not aware of any guidelines or interpretations that govern the exercise of the Superintendent's discretion under Section 1307 in determining whether the financial condition of an insurer warrants the making of such payments. The Fiscal Agency Agreement provides that (a) Surplus Note Payments may be made only with the prior approval of the Superintendent, whenever, in his judgment, the financial condition of MBIA Corp. warrants, and (b) any such Surplus Note Payments may only be made to the extent MBIA Corp. has sufficient Eligible Surplus to make such payment. The Fiscal Agency Agreement defines Eligible Surplus as MBIA Corp.'s surplus as regards policyholders, less the sum of its common capital stock and preferred capital stock, as shown on its annual and quarterly statements filed with state insurance regulatory authorities. While the insurance law does not explicitly set forth the calculation of free and divisible surplus, MBIA believes that the calculation of Eligible Surplus, as set forth in the Fiscal Agency Agreement and as accepted by the NYSDFS, is the appropriate calculation of free and divisible surplus. MBIA Corp.'s free and divisible surplus, determined as set forth above, was \$252 million as of September 30, 2015 representing an increase of \$1 million from December 31, 2014. MBIA Corp. is required to seek the Superintendent's approval to make payments of interest and principal when scheduled on the Surplus Notes. There is no assurance the Superintendent will approve Surplus Note Payments. Notwithstanding the sufficiency of MBIA Corp.'s Eligible Surplus available for the payment of Surplus Note Payments, the NYSDFS may deny approval of any Surplus Note Payments if the Superintendent concludes that MBIA Corp.'s financial condition does not warrant such approval.

Edgar Filing: MBIA INC - Form 10-Q

The NYSDFS has not approved MBIA Corp.'s requests to make interest payments on the Surplus Notes since, and including, the January 15, 2013 interest payment. The NYSDFS has cited both MBIA Corp.'s liquidity and financial condition as well as the availability of free and divisible surplus as the basis for such non-approvals. As of October 15, 2015, the scheduled interest payment date, there was \$369 million of unpaid interest on the Surplus Notes. The unpaid interest on the Surplus Notes will become due on the first business day on or after which MBIA Corp. obtains approval to pay some or all of such accrued and unpaid interest. No interest has been accrued or will accrue on the deferred interest.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****CAPITAL RESOURCES (continued)****Claims-Paying Resources (Statutory Basis)**

CPR is a key measure of the resources available to MBIA Corp. to pay claims under its insurance policies. CPR consists of total financial resources and reserves calculated on a statutory basis. CPR has been a common measure used by financial guarantee insurance companies to report and compare resources, and continues to be used by MBIA's management to evaluate changes in such resources. We have provided CPR to allow investors and analysts to evaluate MBIA Corp., using the same measure that MBIA's management uses to evaluate MBIA Corp.'s resources to pay claims under its insurance policies. There is no directly comparable GAAP measure. Our calculation of CPR may differ from the calculation of CPR reported by other companies.

MBIA Corp.'s CPR and components thereto, as of September 30, 2015 and December 31, 2014 are presented in the following table:

In millions	As of September 30, 2015	As of December 31, 2014
Policyholders' surplus	\$ 543	\$ 542
Contingency reserves	270	317
Statutory capital	813	859
Unearned premium reserve	382	434
Present value of installment premiums ⁽¹⁾	575	662
Premium resources ⁽²⁾	957	1,096
Net loss and LAE reserves ⁽¹⁾	(181)	(237)
Salvage reserves ⁽³⁾	848	938
Gross loss and LAE reserve	667	701
Total claims-paying resources	\$ 2,437	\$ 2,656

(1) - Calculated using a discount rate of 5.17% as of September 30, 2015 and December 31, 2014.

(2) - Includes financial guarantee and insured credit derivative related premiums.

(3) - This amount primarily consists of expected recoveries related to the Company's excess spread and put-backs.

LIQUIDITY

We use a liquidity risk management framework, the primary objective of which is to match liquidity resources to needs. We monitor our cash and liquid asset resources using daily cash forecasting and stress-scenario testing. Members of MBIA's senior management meet regularly to review liquidity metrics, discuss contingency plans and establish target liquidity levels. We evaluate and manage liquidity on a legal-entity basis to take into account the legal, regulatory and other limitations on available liquidity resources within the enterprise. The following is a discussion of our liquidity resources and requirements for our holding company and our insurance subsidiaries.

National Liquidity

The primary sources of cash within National include:

principal and interest receipts on assets held in its investment portfolio; and

the collection of premiums.

The primary uses of cash within National include:

payments of operating expenses and taxes; and

loss payments on insured transactions.

The insurance policies issued or reinsured by National provide unconditional and irrevocable guarantees of payments of the principal of, and interest or other amounts owing on, insured obligations when due. In the event of a default in payment of principal, interest or other insured amounts by an issuer, National generally promises to make funds available in the insured amount within one to three business days following notification. In some cases, the amount due can be substantial, particularly if the default occurs on a transaction to which National has a large notional exposure or on a transaction structured with large, bullet-type principal maturities. The fact that the U.S. public finance insurance segment's financial guarantee contracts generally cannot be accelerated by a party other than the insurer helps to mitigate liquidity risk in this segment.

National maintains an Asset Swap facility with MBIA Inc. which provides MBIA Inc. with eligible assets to pledge under investment agreements and derivative contracts. As of September 30, 2015, the notional amount used under each of these agreements was \$219 million and the fair value of collateral pledged by National and MBIA Inc. under these agreements was \$228 million and \$234 million, respectively. The net average interest rate on these transactions was 0.26% and 0.24% for the nine months ended September 30, 2015 and 2014, respectively.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

LIQUIDITY (continued)

As of September 30, 2015, National held cash and short-term investments of \$428 million, of which \$387 million was highly liquid and comprised highly rated commercial paper, money market funds and municipal, U.S. agency and corporate bonds. As of December 31, 2014, National held cash and short-term investments of \$595 million, of which \$528 million was highly liquid and comprised commercial paper, money market funds, and highly rated municipal, U.S. agency and corporate bonds.

Corporate Liquidity

Corporate's liquidity resources support our MBIA Inc. entity. The primary sources of cash available to MBIA Inc. to meet its liquidity needs include:

available cash and liquid assets not subject to collateral posting requirements;

dividends from subsidiaries;

payments under tax sharing agreements from subsidiaries;

principal and interest receipts on assets held in its investment portfolio; and

access to capital markets.

The primary uses of cash within MBIA Inc. include:

servicing outstanding corporate debt instruments, the intercompany loans that support MTNs issued by GFL and investment agreements;

managing collateral requirements under hedging arrangements, investment agreements and the Asset Swap;

making payments related to interest rate swaps;

managing investments including investments in subsidiaries; and

payments of operating expenses.

Edgar Filing: MBIA INC - Form 10-Q

Based on our projections of National's and MBIA Corp.'s future earnings and losses, we expect that for the foreseeable future National will be the primary source of dividends and tax sharing agreement payments to MBIA Inc. There can be no assurance as to the amount and timing of any such dividends or payments under the tax sharing agreements. Subsequent to September 30, 2015, National declared and paid a dividend of \$114 million to its ultimate parent, MBIA Inc. For the foreseeable future, we expect the as of right declared and paid dividend amounts from National to be limited based on net investment income and to be substantially lower than previous dividends. Refer to the Capital Resources Insurance Statutory Capital section for additional information on payments of dividends. In addition, we do not expect MBIA Inc. to receive distributions from MBIA Corp. for the foreseeable future.

During the nine months ended September 30, 2015, \$228 million was released to MBIA Inc. under the MBIA group tax sharing agreement and related escrow agreement. This amount represented National's liability under the tax sharing agreement for the 2012 tax year, which was released from escrow pursuant to the terms under the tax sharing agreement following the expiration of National's two-year net operating loss carry-back period under U.S. tax rules. As of September 30, 2015, \$283 million was held in escrow for the 2013 through the 2015 tax years. Based on our projections of National's taxable income and the market performance of the Tax Escrow Account, we expect to release \$105 million from the Tax Escrow Account related to the 2013 tax year in January of 2016. There can be no assurance that payments under the Tax Escrow Account from subsidiaries will be released to MBIA Inc.

Currently, the majority of the cash and securities of MBIA Inc. is pledged against investment agreement liabilities, derivatives and the Asset Swap, which limits its ability to raise liquidity through asset sales. If the market value or rating eligibility of the assets which are pledged against MBIA Inc.'s obligations were to decline, we would be required to pledge additional eligible assets in order to meet minimum required collateral amounts against these liabilities. To mitigate these risks, we seek to maintain cash and liquidity resources that we believe will be sufficient to make all payments due on our obligations and to meet other financial requirements, such as posting collateral. Contingent liquidity resources include: (1) accessing the capital markets; (2) sales of invested assets exposed to credit spread stress risk, which may occur at losses and increase MBIA Inc.'s net debt; and (3) termination and settlement of interest rate swap agreements. These actions, if taken, are expected to result in either additional liquidity or reduced exposure to adverse credit spread movements. There can be no assurance that these actions will be sufficient to fully mitigate this risk. Information concerning our credit spread sensitivity appears in Part I, Item 3, Quantitative and Qualitative Disclosures about Market Risk.

As of September 30, 2015 and December 31, 2014, the liquidity positions of MBIA Inc. comprising cash and liquid assets for general corporate purposes, excluding the amounts held in escrow under its tax sharing agreement, were \$306 million and \$498 million, respectively.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)

LIQUIDITY (continued)

MBIA Corp. Liquidity

The primary sources of cash within MBIA Corp. include:

the collection of installment premiums;

our ability to collect on recoveries associated with loss payments; and

principal and interest receipts on assets held in its investment portfolio.

The primary uses of cash within MBIA Corp. include:

loss payments on insured transactions;

payments made to commute insured exposures;

payments of principal and interest related to its surplus notes, to the extent approved by the NYSDFS. Refer to *Capital Resources Insurance Statutory Capital* for a discussion on the non-approval of requests to the NYSDFS to pay interest on its surplus notes; and

payments of operating expenses.

Insured transactions that require payment in full of the principal insured at maturity could present liquidity risk for MBIA Corp. as any salvage recoveries from such payments could be recovered over time but after the payment of the principal amount. MBIA Corp. has insured transactions with substantial principal amounts due at maturity that are scheduled to mature in the near term. MBIA Corp. is generally required to satisfy claims within one to three business days, and as a result seeks to identify potential claims in advance through our monitoring process. While our financial guarantee policies generally cannot be accelerated, thereby helping to mitigate liquidity risk, insurance of CDS and certain other derivative contracts may, in certain circumstances, including the occurrence of certain insolvency or payment defaults, be subject to termination by the counterparty, triggering a claim for the fair value of the contract. In order to monitor liquidity risk and maintain appropriate liquidity resources, we use the same methodology as we use to monitor credit quality and losses within our insured portfolio, including stress scenarios. Refer to *Note 5: Loss and Loss Adjustment Expense Reserves* in the Notes to Consolidated Financial Statements for a discussion of our loss process.

MBIA Corp. has recorded expected excess spread recoveries of \$510 million as of September 30, 2015 associated with insured second-lien RMBS issues, including recoveries related to consolidated VIEs. MBIA Corp. has also recorded expected recoveries related to its claims against Credit Suisse related to ineligible loans included in an MBIA Corp. insured RMBS transaction. There can be no assurance that we will be successful or that we will not be delayed in realizing these recoveries. During the nine months ended September 30, 2015, MBIA Corp. collected \$69 million of excess spread recoveries related to insured second-lien RMBS issues. During the nine months ended September 30, 2015, recoveries on second-lien RMBS issues exceeded paid claims and LAE by \$12 million.

Edgar Filing: MBIA INC - Form 10-Q

The liquidity position of MBIA Corp. has been stressed due to ongoing payments on second-lien RMBS exposures, payments on its remaining CMBS exposures and payments to counterparties in consideration for the commutation of insured transactions, which have resulted in a substantial reduction of exposure and potential loss volatility. Depending on the amount of actual future claims, including claims on insured exposures that in some cases may require large bullet payments, and the amount of future cash inflows, in particular in excess spread and put-back recoverables, MBIA Corp. may not have sufficient liquid assets to pay its claims. While future commutation opportunities will be limited due to the portfolio reduction that has already taken place, management's assessment of available liquidity will be factored in any commutation decision. Also, future commutation payments on insured transactions to counterparties will depend on management's assessment of available liquidity or ability to secure other sources of financing. In the event that we experience other unexpected liquidity requirements, we may have insufficient resources to meet our obligations or insufficient qualifying assets to support our surplus and reserves, and may seek to increase liquidity through financing transactions. There can be no assurance that we will be successful in generating sufficient cash to meet our obligations.

As of September 30, 2015, MBIA Corp. held cash and investments of \$1.1 billion, of which \$399 million comprised cash and highly liquid assets that were immediately available to MBIA Corp. Included in the \$1.1 billion was \$670 million of cash and investments held by MBIA Insurance Corporation's subsidiaries. As of December 31, 2014, MBIA Corp. held cash and investments of \$1.2 billion, of which \$443 million comprised cash and highly liquid assets that were immediately available to MBIA Corp. Included in the \$1.2 billion was \$701 million of cash and investments held by MBIA Insurance Corporation's subsidiaries. Currently, MBIA UK can only pay dividends to MBIA Insurance Corporation with the approval of the PRA; however, there is no certainty as to when such consent would be provided. Based on MBIA Corp.'s liquidity position and our assessment of payment risks on insured exposures, we believe that MBIA Corp.'s liquidity resources, including expected cash inflows, will adequately provide for anticipated cash outflows, including expected future claim payments.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****LIQUIDITY (continued)*****Consolidated Cash Flows***

Information about our consolidated cash flows by category is presented on our consolidated statements of cash flows. The following table presents a summary of our consolidated cash flows for the nine months ended September 30, 2015 and 2014:

In millions	Nine Months Ended September 30,		Percent
	2015	2014	Change
Statement of cash flow data:			
Net cash provided (used) by:			
Operating activities	\$ 42	\$ (350)	n/m
Investing activities	543	457	19%
Financing activities	(886)	(754)	18%
Effect of exchange rate changes on cash and cash equivalents	11	(5)	n/m
Cash and cash equivalents beginning of period	782	1,258	-38%
Cash and cash equivalents end of period	\$ 492	\$ 606	-19%

n/m - Percent change not meaningful.

Operating activities

Net cash provided by operating activities increased for the nine months ended September 30, 2015 compared with the same period of 2014 primarily due to decreases in insured derivative commutations and financial guarantee losses and LAE payments of \$472 million, partially offset by decreases in investment income and proceeds from recoveries and reinsurance received of \$86 million.

Investing activities

Net cash provided by investing activities increased for the nine months ended September 30, 2015 compared with the same period of 2014 primarily due to increases in net proceeds from purchases, sales, paydowns and maturities of investments and loans receivable of \$353 million and proceeds from derivative settlements of \$56 million, partially offset by decreases in cash acquired from consolidated VIEs of \$214 million and collateral posting of \$163 million.

Financing activities

Net cash used by financing activities increased for the nine months ended September 30, 2015 compared with the same period of 2014 primarily due to an increase in the purchase of treasury stock of \$277 million partially offset by a decrease in the principal paydown of medium-term and VIE notes of \$174 million.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****LIQUIDITY (continued)****Investments**

The following discussion of investments, including references to consolidated investments, excludes investments reported under Assets of consolidated variable interest entities on our consolidated balance sheets. Investments of VIEs support the repayment of VIE obligations and are not available to settle obligations of MBIA. Our available-for-sale (AFS) investments comprise high-quality fixed-income securities and short-term investments. The following table presents our investment portfolio as of September 30, 2015 and December 31, 2014:

In millions	As of September 30, 2015	As of December 31, 2014	Percent Change

Total other investments at amortized cost	3	4	-25%
Consolidated investments at carrying value	\$ 6,514	\$ 6,830	-5%

n/m - Percent change not meaningful.

The fair value of the Company's investments is based on prices which include quoted prices in active markets and prices based on market-based inputs that are either directly or indirectly observable, as well as prices from dealers in relevant markets. Differences between fair value and amortized cost arise primarily as a result of changes in interest rates and general market credit spreads occurring after a fixed-income security is purchased, although other factors may also influence fair value, including specific credit-related changes, supply and demand forces and other market factors. When the Company holds an AFS investment to maturity, any unrealized gain or loss currently recorded in accumulated other comprehensive income (loss) in the shareholders' equity section of the balance sheet is reversed. As a result, the Company would realize a value substantially equal to amortized cost. However, when investments are sold prior to maturity, the Company will realize any difference between amortized cost and the sale price of an investment as a realized gain or loss within its consolidated statements of operations.

Edgar Filing: MBIA INC - Form 10-Q

Credit Quality

The credit quality distribution of the Company's AFS fixed-maturity investment portfolios, excluding short-term investments, based on ratings from Moody's as of September 30, 2015 is presented in the following table. Alternate ratings sources, such as S&P or the best estimate of the ratings assigned by the Company, have been used for a small percentage of securities that are not rated by Moody's.

In millions	U.S. Public Finance Insurance		International and Structured Finance Insurance		Corporate		Total

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****LIQUIDITY (continued)**

As of September 30, 2015, the weighted average credit quality of the Company's AFS investment portfolios, excluding short-term and other investments, as presented in the preceding table are as follows:

	U.S. Public Finance Insurance	International and Structured Finance Insurance	Corporate
Weighted average credit quality ratings	Aa	Aa	Aa
<i>Insured Investments</i>			

MBIA's consolidated investment portfolio includes investments that are insured by various financial guarantee insurers (Insured Investments), including investments insured by National and MBIA Corp. (Company-Insured Investments). As of September 30, 2015, Insured Investments at fair value represented \$585 million or 9% of consolidated investments, of which \$414 million or 6% of consolidated investments were Company-Insured Investments. As of September 30, 2015, based on the actual or estimated underlying ratings of our consolidated investment portfolio, without giving effect to financial guarantees, the weighted average rating of only the Insured Investments in the investment portfolio would be in the Baa range.

In purchasing Insured Investments, the Company independently assesses the underlying credit quality, structure and liquidity of each investment, in addition to the creditworthiness of the insurer. Insured Investments are diverse by sector, issuer and size of holding. The Company assigns underlying ratings to its Insured Investments without giving effect to financial guarantees based on underlying ratings assigned by Moody's, or another external agency when a rating is not published by Moody's. When an external underlying rating is not available, the underlying rating is based on the Company's best estimate of the rating of such investment. A downgrade of a financial guarantee insurer has historically had an adverse effect on the fair value of investments insured by the downgraded financial guarantee insurer. If MBIA determines that declines in the fair values of Insured Investments are other-than-temporary, the Company will record a realized loss through earnings.

The underlying ratings of the Company-Insured Investments as of September 30, 2015 are reflected in the following table. Amounts represent the fair value of such investments including the benefit of the MBIA guarantee. The ratings in the following table are based on ratings from Moody's. Alternate ratings sources, such as S&P, have been used for a small percentage of securities that are not rated by Moody's.

In millions	U.S. Public Finance Insurance	International and Structured Finance Insurance	Corporate	Total
Underlying Ratings Scale				
National:				
Aa	\$ -	\$ -	\$ 31	\$ 31
A	124	-	161	285
Total National	\$ 124	\$ -	\$ 192	\$ 316
MBIA Corp.:				
Aa	-	-	33	33
Baa	-	-	7	7

Edgar Filing: MBIA INC - Form 10-Q

Below investment grade	-	13	45	58
Total MBIA Corp.	\$ -	\$ 13	\$ 85	\$ 98
Total Company-Insured Investments	\$ 124	\$ 13	\$ 277	\$ 414

Without giving effect to the National and MBIA Corp. guarantees of the Company-Insured Investments in the consolidated investment portfolio, as of September 30, 2015, based on actual or estimated underlying ratings, the weighted average rating of the consolidated investment portfolio was in the Aa range. The weighted average rating of only the Company-Insured Investments was in the Baa range, and investments rated below investment grade in the Company-Insured Investments were 4% of the total consolidated investment portfolio.

Impaired Investments

As of September 30, 2015 and December 31, 2014, we held impaired AFS investments (investments for which fair value was less than amortized cost) with a fair value of \$2.0 billion and \$2.1 billion, respectively.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (continued)****LIQUIDITY (continued)**

We analyze impaired investments within our investment portfolio for OTTI on a quarterly basis. Key factors considered when assessing OTTI include but are not limited to: (a) structural and economic factors among security types that represent our largest exposure to credit impairment losses; (b) the duration and severity of the unrealized losses (i.e., a decline in the market value of a security by 20% or more at the time of the review, or 5% impaired at the time of review with a fair value below amortized cost for a consecutive 12-month period); and (c) the results of various cash flow modeling techniques. Our cash flow analysis considers all sources of cash, including credit enhancement, that support the payment of amounts owed by an issuer of a security. This includes the consideration of cash to be provided by financial guarantors, including MBIA Corp., resulting from an actual or potential insurance policy claim.

Refer to Note 7: Investments in the Notes to Consolidated Financial Statements for a detailed discussion about impaired investments.

Debt Obligations

Principal payments due under our debt obligations for the three months ending December 31, 2015 and each of the subsequent four years ending December 31 and thereafter are presented in the following table. The repayment of principal on our surplus notes is reflected in 2018, which is the next call date. Principal payments under investment agreements are based on scheduled withdrawal dates. All other principal payments are based on contractual maturity dates. Foreign currency denominated liabilities are presented in U.S. dollars using applicable exchange rates as of September 30, 2015, and liabilities issued at a discount reflect principal amounts due at maturity.

In millions	As of September 30, 2015						
	Three Months Ending December 31, 2015	2016	2017	2018	2019	Thereafter	Total

Investment agreements	4	37	56	17	8	427	549
Total	\$ 278	\$ 650	\$ 609	\$ 1,482	\$ 395	\$ 5,098	\$ 8,512

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

The Company's market risk exposures relate to changes in interest rates, foreign exchange rates and credit spreads that affect the fair value of its financial instruments, namely investment securities, MTNs, investment agreement liabilities and certain derivative transactions. The Company's investment portfolio holdings are primarily U.S. dollar-denominated fixed-income securities including municipal bonds, U.S. government bonds, MBS, collateralized mortgage obligations, corporate bonds and ABS. In periods of rising and/or volatile interest rates, foreign exchange rates and credit spreads, profitability could be adversely affected should the Company have to liquidate these securities.

MBIA minimizes its exposure to interest rate risk, foreign exchange risk and credit spread movement through active portfolio management to ensure a proper mix of the types of securities held and to stagger the maturities of its fixed-income securities.

Interest Rate Sensitivity

Interest rate sensitivity can be estimated by projecting a hypothetical instantaneous increase or decrease in interest rates. The following table presents the estimated pre-tax change in fair value of the Company's financial instruments as of September 30, 2015 from instantaneous shifts in interest rates:

In millions	Change in Interest Rates					
	300 Basis Point Decrease	200 Basis Point Decrease	100 Basis Point Decrease	100 Basis Point Increase	200 Basis Point Increase	300 Basis Point Increase
Estimated change in fair value	\$ 309	\$ 211	\$ 119	\$ (132)	\$ (257)	\$ (372)

Foreign Exchange Rate Sensitivity

The Company is exposed to foreign exchange rate risk in respect of assets and liabilities denominated in currencies other than U.S. dollars. In addition to our international insurance business, some of the remaining liabilities included in our corporate segment are denominated in currencies other than U.S. dollars. Also, the Company regularly makes investments denominated in foreign currencies. The majority of the Company's foreign exchange rate risks is with the pound sterling and the euro. Foreign exchange rate sensitivity can be estimated by projecting a hypothetical instantaneous increase or decrease in foreign exchange rates. The following table presents the estimated pre-tax change in fair value of the Company's financial instruments as of September 30, 2015 from instantaneous shifts in foreign exchange rates:

In millions	Change in Foreign Exchange Rates			
	Dollar Weakens		Dollar Strengthens	
	20%	10%	10%	20%
Estimated change in fair value	\$ (12)	\$ (6)	\$ 6	\$ 12

Credit Spread Sensitivity

Credit spread sensitivity can be estimated by projecting a hypothetical instantaneous increase or decrease in credit spreads. The following table presents the estimated pre-tax change in fair value of the Company's financial instruments as of September 30, 2015 from instantaneous shifts in credit spread curves. It was assumed that all credit spreads move by the same amount. It is more likely that the actual changes in credit spreads will vary by security. National's investment portfolio would generally be expected to experience lower credit spread volatility than other investment portfolios since National has higher credit quality and portfolio composition in sectors that have been less volatile historically. The changes in fair value reflect partially offsetting effects as the value of the investment portfolios generally changes in an opposite direction from the liability portfolio.

In millions	Change in Credit Spreads
-------------	--------------------------

	50 Basis Point Decrease	50 Basis Point Increase	200 Basis Point Increase
Estimated change in fair value	\$ 130	\$ (81)	\$ (362)

Credit Derivatives Sensitivity

MBIA Corp. issued insurance policies insuring payments due on structured credit derivative contracts which are marked-to-market through earnings under the accounting principles for derivatives and hedging activities. The majority of these structured CDSs related to structured finance transactions with underlying reference obligations of cash securities and CDSs referencing liabilities of corporations or of other structured finance securitizations. The asset classes of the underlying reference obligations included corporate, ABS, RMBS and CMBS. These transactions were usually underwritten at or above a triple-A credit rating level. As of September 30, 2015, approximately 61% of the tranches insured by the Company were rated triple-A.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)**

As changes in fair value can be caused by factors unrelated to the performance of MBIA Corp.'s business and credit portfolio, including general market conditions and perceptions of credit risk, as well as market use of credit derivatives for hedging purposes unrelated to the specific referenced credits in addition to events that affect particular credit derivative exposures, the application of fair value accounting will cause the Company's earnings to be more volatile than would be suggested by the underlying performance of MBIA's business operations and credit portfolio.

The following tables reflect sensitivities to changes in credit spreads, credit rating, recovery rates and MBIA Corp.'s upfront credit spreads. Each table stands on its own and should be read independently of each other. Refer to Note 6: Fair Value of Financial Instruments in the Notes to Consolidated Financial Statements for further information about the Company's financial assets and liabilities that are accounted for at fair value, including valuation techniques and disclosures required by GAAP.

Sensitivity to changes in credit spreads can be estimated by projecting a hypothetical instantaneous shift in credit spread curves. The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of MBIA Corp.'s credit derivatives portfolio of instantaneous shifts in credit spreads as of September 30, 2015. In scenarios where credit spreads decreased, a floor of zero was used.

In millions	Change in Credit Spreads (International and Structured Finance Insurance)						
	600 Basis Point Decrease	200 Basis Point Decrease	50 Basis Point Decrease	0 Basis Point Change	50 Basis Point Increase	200 Basis Point Increase	600 Basis Point Increase
	Estimated pre-tax net gains (losses)	\$ 21	\$ 8	\$ 2	\$ -	\$ (2)	\$ (8)
Estimated net fair value	\$ (100)	\$ (113)	\$ (119)	\$ (121)	\$ (123)	\$ (129)	\$ (146)

Actual shifts in credit spread curves will vary based on the credit quality of the underlying reference obligations. In general, within any asset class, higher credit rated reference obligations will exhibit less credit spread movement than lower credit rated reference obligations. Additionally, the degree of credit spread movement can vary significantly for different asset classes. The basis point change presented in the preceding table, however, represents a fixed basis point change in referenced obligation credit spreads across all credit quality rating categories and asset classes and, therefore, the actual impact of spread changes would vary from this presentation depending on the credit rating and distribution across asset classes, both of which will adjust over time depending on new business written and runoff of the existing portfolio.

The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of MBIA Corp.'s insured credit derivatives portfolio by projecting a hypothetical change in the credit ratings as of September 30, 2015. A notch represents a one-step movement up or down in the credit rating.

In millions	Change in Credit Ratings (International and Structured Finance Insurance)				
	Three Notch Increase	One Notch Increase	No Change	One Notch Decrease	Three Notch Decrease
	Estimated pre-tax net gains (losses)	\$ 36	\$ 5	\$ -	\$ (22)
Estimated net fair value	\$ (85)	\$ (116)	\$ (121)	\$ (143)	\$ (182)

Recovery rates on defaulted collateral are an input into MBIA Corp.'s valuation model. Sensitivity to changes in the recovery rate assumptions used by MBIA Corp. can be estimated by projecting a hypothetical change in these assumptions. The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of MBIA Corp.'s insured credit derivatives portfolio based on a change in the recovery rate assumptions as of September 30, 2015.

In millions	Change in Recovery Rates (International and Structured Finance Insurance)				
	20% Increase	10% Increase	No Change	10% Decrease	20% Decrease
Estimated pre-tax net gains (losses)	\$ 12	\$ 6	\$ -	\$ (7)	\$ (13)
Estimated net fair value	\$ (109)	\$ (115)	\$ (121)	\$ (128)	\$ (134)

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk (continued)**

Accounting principles for fair value measurements require MBIA Corp. to incorporate its own nonperformance risk in its valuation methodology. Sensitivity to changes in MBIA Corp.'s credit spreads can be estimated by projecting a hypothetical change in this assumption. The following table presents the estimated pre-tax change in fair value and the cumulative estimated net fair value of MBIA Corp.'s insured credit derivative portfolio. The actual upfront spread used in the valuation as of September 30, 2015 ranged from 12.24% to 30.7% based on the tenor of each transaction. The below amounts include an additional annual running credit spread of 5%.

In millions	MBIA Corp.'s Upfront Credit Spread (International and Structured Finance Insurance)			
	Increase by 15 Percentage Points	Increase by 7 Percentage Points	No Change	Decrease to 0 Percentage Points
Estimated pre-tax net gains (losses)	\$ 20	\$ 9	\$ -	\$ (24)
Estimated net fair value	\$ (101)	\$ (112)	\$ (121)	\$ (145)

MBIA Corp.'s insurance of structured credit derivatives typically remain in place until the maturity of the derivative. With respect to MBIA Corp.'s insured structured credit derivatives, in the absence of credit impairments or the termination of derivatives at losses, the cumulative unrealized losses should reverse before or at maturity of the contracts. Additionally, in the event of the termination and settlement of a contract prior to maturity, any resulting gain or loss upon settlement will be recorded in our consolidated financial statements.

Warrants Sensitivity

Warrants issued by the Company to purchase shares of MBIA Inc. common stock are recorded at fair value in the Company's balance sheet and changes in fair value are recorded through earnings. The Company values these warrants using the Black-Scholes model. Refer to Note 6: Fair Value of Financial Instruments in the Notes to Consolidated Financial Statements for further information about the valuation of warrants issued by the Company.

While several factors influence the value of the Company's warrants, including stock price, stock volatility, interest rates and dividends, changes in the value of the Company's warrants are primarily driven by changes in the Company's stock price and volatility. The following tables present the estimated pre-tax change in fair value and the estimated aggregate fair value of the Company's warrants assuming hypothetical stock price and volatility changes as of September 30, 2015. Each table stands on its own and should be read independently of each other.

In millions	Change in Stock Price				
	25% Increase	10% Increase	No Change	10% Decrease	25% Decrease
Estimated pre-tax net gains (losses)	\$ (10)	\$ (3)	\$ -	\$ 4	\$ 8
Estimated net fair value	\$ (27)	\$ (20)	\$ (17)	\$ (13)	\$ (9)

In millions	Change in Stock Volatility				
	10% Increase	5% Increase	No Change	5% Decrease	10% Decrease
Estimated pre-tax net gains (losses)	\$ (4)	\$ (2)	\$ -	\$ 3	\$ 5
Estimated net fair value	\$ (21)	\$ (19)	\$ (17)	\$ (14)	\$ (12)

Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934) was performed under the supervision and with the participation of the Company's senior management, including the Chief Executive Officer and the Chief Financial Officer. Based on that evaluation, the Company's management, including the Chief Executive Officer and the Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, there have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and

Edgar Filing: MBIA INC - Form 10-Q

15d-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter to which this report relates that have materially affected, or are likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

For a discussion of the Company's litigation and related matters, see Note 13: Commitments and Contingencies in the Notes to Consolidated Financial Statements of MBIA Inc. and Subsidiaries in Part I, Item 1. In the normal course of operating its businesses, MBIA Inc. may be involved in various legal proceedings. As a courtesy, the Company posts on its website under the section Legal Proceedings, selected information and documents in reference to selected legal proceedings in which the Company is the plaintiff or the defendant. The Company will not necessarily post all documents for each proceeding and undertakes no obligation to revise or update them to reflect changes in events or expectations. The complete official court docket can be publicly accessed by contacting the clerk's office of the respective court where each litigation is pending.

Item 1A. Risk Factors

The following should be read in conjunction with and supplements the risk factors described under Part I, Item 1A, Risk Factors of the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Insured Portfolio Loss Related Risk Factors

Some of the state, local and territorial governments and finance authorities that issue public finance obligations we insure are experiencing unprecedented fiscal stress that could result in increased credit losses or impairments on those obligations

We have historically experienced low levels of defaults in our United States (U.S.) public finance insured portfolio, including during the financial crisis that began in mid-2007. Although the financial conditions of many state, local and territorial governments and finance authorities that issue the obligations we insure have improved since the financial crisis, some issuers continue to report unprecedented fiscal stress that has required them to significantly raise taxes or cut spending in order to satisfy their obligations. In particular, certain jurisdictions have significantly underfunded pension liabilities which are placing additional stress on their finances and are particularly challenging to restructure either through negotiation or under Chapter 9 of the United States Bankruptcy Code. If the issuers of the obligations in our public finance portfolio are unable to raise taxes, cut spending, or receive state or federal assistance, we may experience losses or impairments on those obligations, which could materially and adversely affect our business, financial condition and results of operations. This severe financial stress could result in more Chapter 9 proceedings in states where municipal issuers are permitted to seek bankruptcy protection. In these proceedings, which remain rare, the resolution of bondholder claims (and by extension those of bond insurers) remains uncertain and subject to further litigation in several pending cases.

As of September 30, 2015, National had \$4.3 billion of gross insured par exposure plus \$399 million in accreted interest on its insured capital appreciation bonds related to the Commonwealth of Puerto Rico and certain of its instrumentalities (Puerto Rico). Refer to the U.S. Public Finance Insurance Puerto Rico Exposures section in Part I, Item 2 of this Form 10-Q for additional information on our Puerto Rico exposures. Puerto Rico is experiencing fiscal stress and constrained liquidity due to, among other things, Puerto Rico's structural budget imbalance, limited access to the capital markets, a stagnating local economy, net migration of people out of Puerto Rico and a high debt burden. Although Puerto Rico has tried to address its significant financial challenges through various fiscal policies and by the passage of a balanced general fund budget, it continues to experience significant fiscal stress. In recent months the Governor of Puerto Rico has stated that the island's approximately \$72 billion in debt was not payable and has actively lobbied the US Congress for bankruptcy reform and other Federal support. Furthermore, the Governor formed a working group to study and make recommendations regarding Puerto Rico's short- and long-term challenges. In September of 2015, this working group released a report that projected a sizable deficit of available cash resources to expenses and debt service over the next five years absent meaningful fiscal and structural reform, and concluded that a voluntary adjustment of the terms of the Commonwealth's debt is necessary.

Table of Contents**Item 1A. Risk Factors (continued)**

We continue to believe, based on our analysis of Puerto Rico's fiscal and structural circumstances, the details of our insured exposures, and our legal and contractual rights, that all of our insured Puerto Rico related debt will ultimately be substantially repaid. Nevertheless, the Commonwealth or its instrumentalities may be unable or unwilling to pay their obligations as and when due, in which case National would be required to pay claims of unpaid principal and interest when due under its insurance policies, which could be material. In particular, National has guaranteed the payment of \$273 million of debt service from bonds issued by the Government Development Bank of Puerto Rico (GDB) that are due on December 1, 2015. The GDB's payment obligation is guaranteed by the government of Puerto Rico. There is no assurance, however, that the GDB will be able to make such payment or that Puerto Rico will honor its guarantee, in which case National will pay under its guarantee. While National would seek to recover any claim payments it makes under its guarantees, there is no assurance that it will be able to recover such payments. To the extent that its claims payments are ultimately substantially greater than its claims recoveries, National may experience material losses on those obligations, which could materially and adversely affect our business, financial condition and results of operations. Finally, if the Commonwealth and/or certain Puerto Rico instrumentalities were granted access to Chapter 9 under the federal Bankruptcy law, as has been proposed by various Federal legislators and recommended by the Obama Administration, any such filing could result in substantial delays in payments on the National insured bonds issued by such instrumentalities and could provide a mechanism to bind National and other creditors to a plan of reorganization that results in an impairment of the National insured debt for such instrumentalities. In addition, allowing Puerto Rico access to Chapter 9 could have an adverse impact on the municipal finance market as a whole due to likely concerns by investors and other market participants about states that experience significant financial stress, which currently are not eligible for bankruptcy protection under Chapter 9, will also be given access to Chapter 9 in the future.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the nine months ended September 30, 2015, investment funds affiliated with Warburg, the largest holder of MBIA Inc. common stock, sold all of its 45.7 million shares of the Company's common stock. In connection with this sale, National and the Company repurchased 8 million shares and 7.6 million shares, respectively.

On July 29, 2015, the Company's Board of Directors authorized the repurchase by the Company or its subsidiaries of up to \$100 million of its outstanding shares under a new share repurchase authorization, which superseded and terminated the prior authorization. The prior authorization had \$61 million available for future repurchases at the time it was terminated. As of September 30, 2015, there was no remaining authorized capacity under the July 29, 2015 repurchase program.

On October 28, 2015, the Company's Board of Directors authorized the repurchase by the Company or its subsidiaries of up to \$100 million of its outstanding shares under a new share repurchase authorization. The table below presents repurchases made by the Company in each month during the third quarter of 2015:

Month	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Amount That May Be Purchased Under the Plan (in millions)
July	3,270,683	\$ 6.07	3,269,611	\$ 100
August	15,847,045	6.45	15,495,816	-
September	1,045	6.79	-	-
	19,118,773	\$ 6.39	18,765,427	\$ -

(1) - Includes 353,346 shares purchased in open market transactions as investments in the Company's non-qualified deferred compensation plan.

Table of Contents**Item 5. Other Information****Disclosure pursuant to Section 13(r) of the Securities Exchange Act of 1934**

Pursuant to Section 13(r) of the Securities Exchange Act of 1934, we may be required to disclose in our annual and quarterly reports to the Securities and Exchange Commission (the SEC), whether we or any of our affiliates knowingly engaged in certain activities, transactions or dealings relating to Iran or with certain individuals or entities targeted by US economic sanctions. Disclosure is generally required even where the activities, transactions or dealings were conducted in compliance with applicable law. Because the SEC defines the term affiliate broadly, it includes any entity under common control with us (and the term control is also construed broadly by the SEC).

The description of the activities below has been provided to the Company by Warburg Pincus LLC (WP), affiliates of which: (i) beneficially own more than 10% of our outstanding common stock and are members of our board of directors and (ii) beneficially own more than 10% of the equity interests of, and have the right to designate members of the board of directors of Santander Asset Management Investment Holdings Limited (SAMIH). SAMIH may therefore be deemed to be under common control with MBIA Inc.; however, this statement is not meant to be an admission that common control exists.

The disclosure below relates solely to activities conducted by SAMIH and its non-U.S. affiliates that may be deemed to be under common control with MBIA Inc. The disclosure does not relate to any activities conducted by the Company or by WP and does not involve our or WP's management. Neither the Company nor WP has had any involvement in or control over the disclosed activities of SAMIH, and neither the Company nor WP has independently verified or participated in the preparation of the disclosure. Neither the Company nor WP is representing as to the accuracy or completeness of the disclosure nor do we or WP undertake any obligation to correct or update it.

The Company understands that SAMIH's affiliates intend to disclose in their next annual or quarterly SEC report that:

(a) Santander UK plc (Santander UK) holds frozen savings and one current account for two customers resident in the United Kingdom (U.K.) who are currently designated by the United States (U.S.) for terrorism. The accounts held by each customer were blocked after the customer's designation and have remained blocked and dormant throughout the nine months ended September 30, 2015. Revenue generated by Santander UK on these accounts is negligible.

(b) An Iranian national, resident in the U.K., who is currently designated by the U.S. under the Iranian Financial Sanctions Regulations and the Weapons of Mass Destruction Proliferators Sanctions Regulations (NPWMD), holds a mortgage with Santander UK that was issued prior to any such designation. No further drawdown has been made (or would be permitted) under this mortgage although Santander UK continues to receive repayment installments. In the nine months ended September 30, 2015, total revenue in connection with the mortgage was approximately £2,928 while net profits were negligible relative to the overall profits of Santander UK. Santander UK does not intend to enter into any new relationships with this customer, and any disbursements will only be made in accordance with applicable sanctions. The same Iranian national also holds two investment accounts with Santander ISA Managers Limited. The accounts have remained frozen during the nine months ended September 30, 2015. The investment returns are being automatically reinvested, and no disbursements have been made to the customer. Total revenue for the Santander group in connection with the investment accounts was approximately £161 and net profits in the nine months ended September 30, 2015 were negligible relative to the overall profits of Santander.

(c) In addition, during the third quarter of 2015 two additional Santander UK customers were designated. First, a UK national designated by the U.S. under the Specially Designated Global Terrorist (SDGT) sanctions program who is on the U.S. Specially Designated National (SDN) list. This customer holds a bank account which generated revenue of approximately £183 during the third quarter of 2015. A stop was placed on the account. Net profits in the third quarter of 2015 were negligible relative to the overall profits of Santander. Second, a UK national also designated by the U.S. under the SDGT sanctions program and on the U.S. SDN list, held a bank account. No transactions were made in the third quarter of 2015 and the account is blocked and in arrears.
