<sup>(2)</sup> The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

<sup>(3)</sup> The Starting Level.

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive on the Stated Maturity Date and the resulting pre-tax rates of return will depend on the actual Ending Level.

How the Redemption Amount is calculated

The Redemption Amount will be determined as follows:

If the Ending Level is greater than the Starting Level, the Redemption Amount will be equal to the lesser of:

(i) \$1,000 *plus*

$$\$1,000 \times \frac{\text{Ending Level} - \text{Starting Level}}{\text{Starting Level}} \times \text{Participation Rate} \quad ; \text{ and}$$

(ii) the Capped Value

If the Ending Level is less than or equal to the Starting Level, but greater than or equal to the Threshold Level, the Redemption Amount will be equal to \$1,000

If the Ending Level is less than the Threshold Level, the Redemption Amount will be equal to \$1,000 *minus*

$$\$1,000 \times \frac{\text{Threshold Level} - \text{Ending Level}}{\text{Starting Level}}$$

**In such a case, you will lose up to 92.5% of your Principal Amount.**
