| Principal Amount | \$1,000 per security (100% of par) | The Redemption Amount will reflect the following terms: |
| Redemption Amount | See How the Redemption Amount is calculated on page 3 | If the level of the Index increases: You will receive the Principal Amount plus 200% participation in the upside performance of the Index, subject to a maximum total return at maturity of 12.00% to 15.00% (to be determined on the Pricing Date) of the Principal Amount |
| Stated Maturity Date | January 4, 2018* | |

| | | |

| Ending Level | The closing level of the Index on the Calculation Date | If the level of the Index decreases by more than 7.50%: |
| Capped Value | 112% to 115% of the Principal Amount (\$1,120 to \$1,150 per security), to be determined on the Pricing Date | You will receive less than the Principal Amount and will have 1-to-1 downside exposure to the decrease in the level of the Index in excess of 7.50% |
| Threshold Level | 92.50% of the Starting Level | Investors may lose up to 92.50% of the Principal Amount |

| CUSIP | 13605WCB5 | |

*To the extent that the Issuer makes any change to the expected Pricing Date or expected Issue Date, the Calculation Date and Stated Maturity Date may also be changed in the Issuer's discretion to ensure that the term of the securities remains the same.

The Issuer's estimated value of the securities on the date of the accompanying preliminary pricing supplement, based on the Issuer's internal pricing models, is expected to be between \$972.00 and \$982.90 per security. While the estimated value of the securities on the pricing date may differ from the estimated value set forth above, the Issuer does not expect it to differ significantly absent a material change in market conditions or other relevant factors. The final pricing supplement relating to the securities will set forth the Issuer's estimated value of the securities on the pricing date, which will not be less than \$972.00 per security. The estimated value of the securities is not an indication of actual profit to the Issuer or to any of the Issuer's affiliates, nor is it an indication of the price, if any, at which Wells Fargo Securities, LLC or any other person may be willing to buy the securities from you at any time after issuance. See "The Estimated Value of the Securities" in the accompanying preliminary pricing supplement.

Investing in the securities involves significant risks. See "Selected Risk Considerations" in this term sheet and "Risk Factors" in the accompanying preliminary pricing supplement, the accompanying prospectus supplement and prospectus.

This introductory term sheet does not provide all of the information that an investor should consider prior to making an investment decision.

Investors should carefully review the preliminary pricing supplement, prospectus supplement and prospectus before making a decision to invest in the securities.

This graph has been prepared for purposes of illustration only. Your actual return will depend on the actual Ending Level, the actual Capped Value, and whether you hold your securities to maturity.

⁽¹⁾ Assumes a hypothetical Capped Value of 113.50%, or \$1,135.00 per security (the midpoint of the specified range of the Capped Value).

⁽²⁾ The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

⁽³⁾The hypothetical Starting Level. The actual Starting Level will be determined on the Pricing Date. The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive on the Stated Maturity Date and the resulting pre-tax rates of return will depend on the actual Starting Level, Ending Level and Capped Value.

How the Redemption Amount is calculated

The Redemption Amount will be determined as follows:

If the Ending Level is greater than the Starting Level, the Redemption Amount will be equal to the lesser of:

(i) \$1,000 *plus*

$$\$1,000 \times \frac{\text{Ending Level} - \text{Starting Level}}{\text{Starting Level}} \times \text{Participation Rate} \quad ; \text{ and}$$

(ii) the Capped Value

If the Ending Level is less than or equal to the Starting Level, but greater than or equal to the Threshold Level, the Redemption Amount will be equal to \$1,000

If the Ending Level is less than the Threshold Level, the Redemption Amount will be equal to \$1,000 *minus*

$$\$1,000 \times \frac{\text{Threshold Level} - \text{Ending Level}}{\text{Starting Level}}$$

In such a case, you will lose up to 92.50% of your Principal Amount.
