NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts are in thousands, except per share data, number of units, or as otherwise noted)

1. ORGANIZATION AND BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements of Comstock Holding Companies, Inc. and subsidiaries (Comstock or the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and in accordance with the instructions to Form 10-Q and Article 8 of Regulation S-X. Such financial statements do not include all of the disclosures required by GAAP for complete financial statements. In our opinion, all adjustments, consisting only of normal recurring adjustments, considered necessary for a fair presentation have been included in the accompanying consolidated financial statements. For further information and a discussion of our significant accounting policies, other than discussed below, refer to our audited consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016.

Comstock Holding Companies, Inc., incorporated in 2004 as a Delaware corporation, is a multi-faceted real estate development and construction services company focused in the Washington, D.C. metropolitan area (Washington, D.C., Northern Virginia and Maryland suburbs of Washington, D.C.). We have substantial experience with building a diverse range of products, including multi-family homes, single-family homes, townhouses, mid-rise condominiums, high-rise multi-family condominiums and mixed-use (residential and commercial) developments. References in these consolidated financial statements to Comstock, Company, we, our and us refer to Comstock Holding Companies together in each case with our subsidiaries and any predecessor entities unless the context suggests otherwise.

The Company's Class A common stock is traded on the NASDAQ Capital Market under the symbol CHCI and has no public trading history prior to December 17, 2004.

Throughout these consolidated financial statements, amounts are in thousands, except per share data, number of units, or as otherwise noted.

For the three and nine months ended September 30, 2017 and 2016, comprehensive income (loss) equaled net income (loss); therefore, a separate statement of comprehensive income (loss) is not included in the accompanying consolidated financial statements.

Liquidity and Capital Resources

We require capital to operate, to post deposits on new potential acquisitions, to purchase and develop land, to construct homes, to fund related carrying costs and overhead and to fund various advertising and marketing programs to generate sales. These expenditures include payroll, community engineering, entitlement, architecture, advertising, utilities and interest as well as the construction costs of our homes. Our sources of capital include, and we believe will continue to include, private equity and debt placements (which has included significant participation from Company insiders), funds derived from various secured and unsecured borrowings to finance acquisition, development and construction on acquired land, cash flow from operations, which includes the sale and delivery of constructed homes, finished and raw building lots and the potential sale of public debt and equity securities. The Company is involved in ongoing discussions with lenders and equity sources in an effort to provide additional growth capital to fund various new business opportunities. See Note 13 in the accompanying consolidated financial statements for more details on

our credit facilities and Note 11 in the accompanying consolidated financial statements for details on private placement offerings.

We have outstanding borrowings with various financial institutions and other lenders that have been used to finance the acquisition, development and construction of real estate projects. The Company has generally financed its development and construction activities on a single or multiple project basis so it is not uncommon for each of our projects or collection of our projects to have a separate credit facility. Accordingly, the Company typically has had numerous credit facilities and lenders.

Table of Contents

As of September 30, 2017, \$22.7 million of the Company's outstanding credit facilities and project related loans mature at various periods through the end of 2017. We are in active discussions with our lenders seeking long term extensions and modifications to these loans. These debt instruments impose certain restrictions on our operations, including speculative unit construction limitations, curtailment obligations, and financial covenant compliance. If we fail to comply with any of these restrictions, an event of default could occur. Additionally, events of default could occur if we fail to make required debt service payments or if we fail to come to agreement on an extension on a certain facility prior to a given loan's maturity date. Any event of default would likely render the obligations under these instruments due and payable as of that event. Any such event of default would allow certain of our lenders to exercise cross default provisions in our loan agreements with them, such that all debt with that institution could be called into default. We are anticipating that with the successful resolution of the debt extension discussions with our lenders, capital raises from our private placements, current available cash on hand, and additional cash from settlement proceeds at existing and under development communities, the Company will have sufficient financial resources to sustain its operations through the next 12 months, though no assurances can be made that the Company will be successful in its efforts. The Company will also continue to focus on its cost structure in an effort to conserve cash and manage expenses. Such actions may include cost reductions and/or deferral arrangements with respect to current operating expenses.

Recent Developments

On July 17, 2017, JK Environmental Services, LLC, (JK) a newly formed, wholly owned entity by CDS Capital Management, L.C., a subsidiary of Comstock, purchased all of the business assets of Monridge Environmental, LLC for \$2.3 million. JK has its principal office located in Conshohocken, Pennsylvania, and operates in Maryland, Pennsylvania, New Jersey, and Delaware. JK operates as an environmental services company, providing consulting, remediation, and other environmental services. Refer to Note 16 for further information regarding this transaction.

Use of Estimates

Our consolidated financial statements have been prepared in accordance with GAAP. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts for the reporting periods. We base these estimates and judgments on historical experience and on various other factors that we believe to be reasonable under the circumstances. We evaluate these estimates and judgments on an ongoing basis. Actual results may differ from those estimates under different assumptions or conditions.

Recently Issued Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (ASU 2014-09). ASU 2014-09 provides a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. ASU No. 2014-09 will require an entity to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In August 2015, the FASB issued ASU 2015-14, which deferred the effective date of ASU 2014-09 for one year, which would make the guidance effective for the Company's first fiscal year beginning after December 15, 2017. Additionally, the FASB has also decided to permit entities to early adopt the standard, which allows for either full retrospective or modified retrospective methods of adoption, for reporting periods beginning after December 15, 2016. The Company has completed its preliminary evaluation of the impact of the adoption of ASU 2014-09 for its homebuilding revenue, and believe that there will likely be no material impact to its consolidated financial statements, except enhanced disclosure regarding revenue recognition, including disclosures of revenue streams, performance obligations, variable

consideration and the related judgments and estimates necessary to apply the new standard. The Company is still in the process of evaluating the impact of the adoption of the standard as it pertains to the revenues from the newly formed entity, JK. The Company continues to evaluate the new standard against its existing accounting policies, including the timing of revenue recognition, and its contracts with customers to determine the effect the guidance will have on its consolidated financial statements and what changes to systems and controls may be warranted. The Company expects to adopt the modified retrospective method.

In February 2016, the FASB issued ASU 2016-02, *Leases*. The core principle of the standard is that a lessee should recognize the assets and liabilities that arise from leases. A lessee should recognize in its statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. ASU 2016-02 is effective for public companies for annual reporting periods beginning after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact this new standard will have on our consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, *Business Combinations (Topic 805), Clarifying the Definition of a Business*, which provides a more robust framework to use in determining when a set of assets and activities (collectively referred to as a *set*) is a business. The standard requires that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. This standard reduces the number of transactions that need to be further evaluated. ASU 2017-01 is effective for public business entities for annual periods beginning after December 15, 2017, including interim periods within those periods. The amendments in ASU 2017-01 should be applied prospectively on or after the effective date. We do not expect the adoption of ASU 2017-01 to have a material effect on our consolidated financial statements.

In May 2017, the FASB issued ASU 2017-09, *Compensation - Stock Compensation (Topic 718) - Scope of Modification Accounting*. ASU 2017-09 reduces both diversity in practice and cost and complexity when changing the terms or conditions of a share-based payment award. The amendments in this update provide guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. ASU 2017-09 is effective for fiscal years, including interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted, including adoption in any interim period for which financial statements have not yet been issued. The amendments in this update should be applied prospectively to an award modified on or after the adoption date. We do not expect the adoption of ASU 2017-09 to have a material effect on our consolidated financial statements.

Table of Contents

We assessed other accounting pronouncements issued or effective during the three and nine months ended September 30, 2017 and deemed they were not applicable to us and are not anticipated to have a material effect on our consolidated financial statements.

2. REAL ESTATE INVENTORIES

After impairments and write-offs, real estate held for development and sale consists of the following:

	September 30,	
	2017	2016
Land and land development costs	\$ 27,810	\$ 33,355
Cost of construction (including capitalized interest and real estate taxes)	20,691	16,487
	\$ 48,501	\$ 49,842

3. WARRANTY RESERVE

Warranty reserves for units settled are established to cover potential costs for materials and labor with regard to warranty-type claims expected to arise during the typical one-year warranty period provided by the Company or within the two-year statutorily mandated structural warranty period for condominiums. Because the Company typically subcontracts its homebuilding work, subcontractors are required to provide the Company with an indemnity and a certificate of insurance prior to receiving payments for their work. Claims relating to workmanship and materials are generally the primary responsibility of the subcontractors and product manufacturers. The warranty reserve is established at the time of closing, and is calculated based upon historical warranty cost experience and current business factors. This reserve is an estimate and actual warranty costs could vary from these estimates. Variables used in the calculation of the reserve, as well as the adequacy of the reserve based on the number of homes still under warranty, are reviewed on a periodic basis. Warranty claims are directly charged to this reserve as they arise.

The following table is a summary of warranty reserve activity which is included in Accounts payable and accrued liabilities within the consolidated balance sheets:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Balance at beginning of period	\$ 282	\$ 294	\$ 288	\$ 312
Additions	48	111	144	197
Releases and/or charges incurred	(58)	(46)	(160)	(150)
Balance at end of period	\$ 272	\$ 359	\$ 272	\$ 359

4. CAPITALIZED INTEREST AND REAL ESTATE TAXES

Interest and real estate taxes incurred relating to the development of lots and parcels are capitalized to real estate inventories during the active development period, which generally commences when borrowings are used to acquire real estate assets and ends when the properties are substantially complete or the property becomes inactive. A project becomes inactive when development and construction activities have been suspended indefinitely. Interest is capitalized based on the interest rate applicable to specific borrowings or the weighted average of the rates applicable to other borrowings during the period. Interest and real estate taxes capitalized to real estate inventories are expensed as a component of cost of sales as related units are sold.

Table of Contents

The following table is a summary of interest and real estate taxes incurred and capitalized and interest and real estate taxes expensed for units settled:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Interest incurred and capitalized	\$ 1,063	\$ 811	\$ 3,338	\$ 2,404
Real estate taxes incurred and capitalized	64	53	243	170
Total interest and real estate taxes incurred and capitalized	\$ 1,127	\$ 864	\$ 3,581	\$ 2,574
Interest expensed as a component of cost of sales	\$ 829	\$ 579	\$ 1,838	\$ 1,285
Real estate taxes expensed as a component of cost of sales	66	64	183	165
Interest and real estate taxes expensed as a component of cost of sales	\$ 895	\$ 643	\$ 2,021	\$ 1,450

The amount of interest from entity level borrowings that we are able to capitalize in accordance with Accounting Standards Codification (ASC) 835 is dependent upon the average accumulated expenditures that exceed project specific borrowings. For the three and nine months ended September 30, 2017, the Company expensed \$0 of interest from entity level borrowings. For the three and nine months ended September 30, 2016, the Company expensed \$133 and \$645, respectively, of interest from entity level borrowings.

Additionally, when a project becomes inactive or is not a qualifying entity, its interest, real estate taxes and indirect production overhead costs are no longer capitalized but rather expensed in the period they are incurred. For the three and nine months ended September 30, 2017, the Company expensed \$16 of interest and real estate taxes. For the three and nine months ended September 30, 2016, the Company expensed \$0 and \$10 of interest and real estate taxes.

5. LOSS PER SHARE

The weighted average shares and share equivalents used to calculate basic and diluted earnings (loss) per share for the three and nine months ended September 30, 2017 and 2016 are presented in the accompanying consolidated statements of operations. Restricted stock awards, stock options and warrants are included in the diluted earnings (loss) per share calculation using the treasury stock method and average market prices during the periods, unless their inclusion would be anti-dilutive.

As a result of the net loss attributable to common stockholders for the three months ended September 30, 2017, approximately 23 restricted stock awards and 15 warrants were included in the computation of dilutive loss per share. As a result of the net loss attributable to common stockholders for the nine months ended September 30, 2017, approximately 29 restricted stock awards and 18 warrants were included in the computation of dilutive loss per share. For the three and nine months ended September 30, 2016, there were no anti-dilutive shares, therefore, no shares were excluded from the computation of dilutive loss per share.

6. SEGMENT DISCLOSURES

We operate our business through three segments: Homebuilding, Multi-family, and Real Estate Services. We are currently focused on the Washington, D.C. area market.

In our Homebuilding segment, we develop properties with the intent to sell as fee-simple properties or condominiums to individual buyers or to private or institutional investors. Our for-sale products are designed to attract first-time, early move-up, and secondary move-up buyers. We focus on products that we are able to offer for sale in the middle price points within the markets where we operate, avoiding the very low-end and high-end products.

In our Multi-family segment, we focus on projects ranging from approximately 75 to 200 units in locations that are supply constrained with demonstrated demand for stabilized assets. We seek opportunities in the multi-family rental market where our experience and core capabilities can be leveraged. We will either position the assets for sale when completed or operate the asset within our own portfolio as rental property. Operating the asset for our own account affords us the flexibility of converting the units to condominiums in the future.

In our Real Estate Services segment, we pursue projects in all aspects of real estate management, including strategic planning, land development, entitlement, property management, sales and marketing, workout and turnaround strategies, financing and general construction. We are able to provide a wide range of construction management and general contracting services to other property owners. Our newly formed entity, JK, also provides real estate related environmental services.

Table of Contents

The following table includes the Company's three reportable segments of Homebuilding, Multi-family, and Real Estate Services. The Company has not recorded any accruals related to uncertain tax positions as of September 30, 2017 and 2016. We file U.S. and state income tax returns in jurisdictions with varying statutes of limitations. The 2014 through 2016 tax years remain subject to examination by federal and most state tax authorities.

At September 30, 2017 and December 31, 2016, due to the uncertainties surrounding the realization of the deferred tax assets, the Company recorded a full valuation allowance.

Table of Contents

The Company currently has approximately \$139 million in federal and state Net Operating Losses (NOLs), which based on current statutory tax rates, have potential fair value of approximately \$54 million in tax savings. If unused, these NOLs will begin expiring in 2027. Under Code Section 382 (Section 382) rules, if a change of ownership is triggered, the Company s NOL assets and possibly certain other deferred tax assets may be impaired. We estimate that as of September 30, 2017, the cumulative shift in ownership of the Company s stock would not cause an impairment of our NOL asset. However, if an ownership change were to occur, the Section 382 limitation would not be expected to materially impact the Company s financial position or results of operations as of September 30, 2017, because of the Company s full valuation allowance on its net deferred tax assets.

8. COMMITMENTS AND CONTINGENCIES

Litigation

Currently, we are not subject to any material legal proceedings. From time to time, however, we are named as a defendant in legal actions arising from our normal business activities. Although we cannot accurately predict the amount of our liability, if any, that could arise with respect to legal actions pending against us; we do not expect that any such liability will have a material adverse effect on our financial position, operating results and cash flows. We believe that we have obtained adequate insurance coverage, rights to indemnification, or where appropriate, have established appropriate reserves in connection with any such legal proceedings.

Letters of credit, performance bonds and compensating balances

The Company has commitments as a result of contracts with certain third parties, primarily local governmental authorities, to meet certain performance criteria outlined in such contracts. The Company is required to issue letters of credit and performance bonds to these third parties as a way of ensuring that the commitments entered into are met. These letters of credit and performance bonds issued in favor of the Company and/or its subsidiaries mature on a revolving basis, and if called into default, would be deemed material if assessed against the Company and/or its subsidiaries for the full amounts claimed. In some circumstances, we have negotiated with our lenders in connection with foreclosure agreements for the lender to assume certain liabilities with respect to the letters of credit and performance bonds. We cannot accurately predict the amount of any liability that could be imposed upon the Company with respect to maturing or defaulted letters of credit or performance bonds. At September 30, 2017 and 2016, the Company had \$1.1 million and \$1.4 million in outstanding letters of credit, respectively. At September 30, 2017 and 2016, the Company had \$4.0 million and \$4.3 million in outstanding performance bonds, respectively. No amounts have been drawn against the outstanding letters of credit or performance bonds.

We are required to maintain compensating balances in escrow accounts as collateral for certain letters of credit, which are funded upon settlement and release of units. The cash contained within these escrow accounts is subject to withdrawal and usage restrictions. As of September 30, 2017 and December 31, 2016, we had approximately \$0.9 million and \$0.8 million, respectively, in these escrow accounts, which are included in Restricted cash in the accompanying consolidated balance sheets.

11. VARIABLE INTEREST ENTITY

Included within the Company's real estate inventories at September 30, 2017 and December 31, 2016 are several projects that are determined to be variable interest entities (VIEs). These entities have been established to own and operate real estate property and were deemed VIEs primarily based on the fact that the equity investment at risk is not sufficient to permit the entities to finance their activities without additional financial support. The Company determined that it was the primary beneficiary of these VIEs as a result of its majority voting and complete operational control of the entities.

On August 23, 2012, the Company formed New Hampshire Ave. Ventures, LLC, a joint venture of its subsidiary, Comstock Ventures XVI, L.C., and 6000 New Hampshire Avenue, LLC, for the purpose of acquiring, developing and constructing a 111-unit project (the NHA Project) in Washington, D.C. The Company evaluated the joint venture and determined that the equity investment at risk is not sufficient to permit the entity to finance its activities without additional financial support. The Company determined that it was the primary beneficiary of the VIE as a result of its complete operational control of the activities that most significantly impact the economic performance and obligation to absorb losses, or receive benefits. The Company contributed its ownership interest in Comstock Ventures XVI, L.C.

to Comstock Investors VII, L.C. (Comstock VII) on March 13, 2013. During the nine months ended September 30, 2016, New Hampshire Ave. Ventures, LLC distributed \$1.9 million to its non-controlling interest member, 6000 New Hampshire Avenue, LLC. The Comstock VIII Class B Members are entitled to a cumulative, preferred return of 20% per annum, compounded annually on their capital account balances. The Company has the right to repurchase the interests of the Comstock VIII Class B Members at any time, provided that (i) all of the Comstock VIII Class B Members interests are acquired, (ii) the purchase is made in cash and (iii) the purchase price equals the Comstock VIII Class B Members capital accounts plus an amount necessary to cause the preferred return to equal a cumulative cash on cash return equal to 20% per annum. The proceeds from the Comstock VIII Private Placement have been used for the construction of the following projects: The Townes at HallCrest in Sterling, Virginia consisting of 42 townhome units, and Townes at Maxwell Square Condominium in Frederick, Maryland consisting of 45 townhome condominium units (collectively, the Investor VIII Projects). Proceeds of the Comstock VIII Private Placement were utilized to provide capital needed to complete the Investor VIII Projects in conjunction with project financing for the Investor VIII Projects, to reimburse the Company for prior expenditures incurred on behalf of the Investor VIII Projects, and for general corporate purposes of the Company. The Company evaluated Comstock VIII and determined that the equity investment at risk is not sufficient to permit the entity to finance its activities without additional financial support and the Company was the primary beneficiary as a result of its complete operational control of the activities that most significantly impact the economic performance and its obligation to absorb losses, or receive benefits accordingly, the Company consolidates this entity. In January 2017, the Company fully redeemed the remaining equity interest of Class B Members in Comstock VIII after paying \$1.9 million in distributions. During the nine months ended September 30, 2016, the Company paid distributions in the amount of \$2.5 million to its non-controlling interest member.

The Comstock IX Class B Members are entitled to a cumulative, preferred return of 20% per annum, compounded annually on their capital account balances. The Company has the right to repurchase the interests of the Comstock IX Class B Members at any time, provided that (i) all of the Comstock IX Class B Members interests are acquired, (ii) the purchase is made in cash and (iii) the purchase price equals the Comstock IX Class B Members capital accounts plus any amount necessary to cause the preferred return to equal a cumulative cash on cash return equal to 20% per annum. The Comstock X Class B Member is Comstock Development Services, LC (CDS), an entity wholly owned by Christopher Clemente, our Chief Executive Officer. In connection with the Comstock X Private Placement, the Company issued a total of 150 warrants for the purchase of shares of the Company s Class A common stock, having an aggregate fair value of \$258. The Comstock X Member is entitled to a cumulative, preferred return of 6% per annum, compounded annually on the capital account balance. The Company evaluated Comstock X and determined that the equity investment at risk is not sufficient to permit the entity to finance its activities without additional financial support and the Company was the primary beneficiary of the VIE as a result of its complete operational control of the activities that most significantly impact the economic performance and its obligation to absorb losses, or receive benefits. Accordingly, the Company consolidates this entity. On June 14, 2017, the Comstock X Private Placement was amended to provide for the first \$1.0 million of profit earned to be allocated first to the Company. This line of credit is secured by the first priority security interest in the Company's wholly owned subsidiaries in the Washington, D.C. metropolitan area and guaranteed by our Chief Executive Officer. The Company uses this line of credit to finance the predevelopment related expenses and deposits for current and future projects and bears a variable interest rate tied to a one-month LIBOR plus 3.25% per annum, with an interest rate floor of 5.0%. This line of credit calls for the Company to adhere to financial covenants, as defined in the loan agreement such as, minimum net worth and minimum liquidity, measured quarterly and minimum EBITDA measured on an

annual basis and matures on December 31, 2017. The Company obtained a waiver from the financial institution for not meeting the minimum liquidity measure as of September 30, 2017, but it was in compliance with the minimum net worth requirement as dictated by the line of credit agreement as of September 30, 2017.

14. FAIR VALUE DISCLOSURES

The carrying amounts reported in the consolidated balance sheets for cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities are reasonable estimates of their fair values based on their short maturities. The fair value of fixed and floating rate debt is based on unobservable market rates (Level 3 inputs).

The fair value of the fixed and floating rate debt was estimated using a discounted cash flow analysis on the blended borrower rates currently available to the Company for loans with similar terms. The following table summarizes the

carrying amount and the corresponding fair value of fixed and floating rate debt:

	September 30, 2017	December 31, 2016
Carrying amount	\$ 44,046	\$ 43,704
Fair value	\$ 43,579	\$ 44,986

Fair value estimates are made at a specific point in time, based on relevant market information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The Company may also value its non-financial assets and liabilities, including items such as real estate inventories and long lived assets, at fair value on a non-recurring basis if it is determined that impairment has occurred. Such fair value measurements use significant unobservable inputs and are classified as Level 3.

Table of Contents**15. RESTRICTED STOCK, STOCK OPTIONS AND OTHER STOCK PLANS**

The Company did not issue restricted stock awards during the three months ended September 30, 2017. During the nine months ended September 30, 2017, the Company issued 192 thousand stock options and 245 thousand restricted stock awards to employees. No stock options or restricted stock awards were issued during the three and nine months ended September 30, 2016.

Stock-based compensation expense associated with restricted stock and stock options is recognized based on the grant date fair value of the award over its vesting period. The following table reflects the consolidated balance sheets and statements of operations line items for stock-based compensation for the periods presented:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Real estate inventories - Assets	\$ 17	\$ 4	\$ 41	\$ 13
General and administrative - Expenses	116	15	238	56
	\$ 133	\$ 19	\$ 279	\$ 69

Under net settlement procedures currently applicable to our outstanding restricted stock awards for employees, upon each settlement date and election by the employees, restricted stock awards are withheld to cover the required withholding tax, which is based on the value of the restricted stock award on the settlement date as determined by the closing price of our Class A common stock on the trading day immediately preceding the applicable settlement date. The remaining amounts are delivered to the recipient as shares of our Class A common stock.

As of September 30, 2017, the weighted-average remaining contractual term of unexercised stock options was 7 years. As of September 30, 2017 and December 31, 2016, there was \$0.6 million and \$0.1 million, respectively, of unrecognized compensation cost related to stock grants.

16. BUSINESS ACQUISITION

On July 17, 2017, JK Environmental Services, LLC, (JK) an entity wholly owned by CDS Capital Management, L.C., a subsidiary of Comstock, purchased all of the business assets of Monridge Environmental, LLC for \$2.3 million. The acquisition was consummated as part of the Company's efforts to expand its footprint in the real estate services market. JK has its principal office located in Conshohocken, Pennsylvania, and operates in Maryland, Pennsylvania, New Jersey, and Delaware. JK operates as an environmental services company, providing consulting, remediation, and other environmental services. JK's operations since the date of acquisition are included in the Company's consolidated statement of operations for the three and nine months ended September 30, 2017.

Table of Contents

Based on an evaluation of the provisions of Accounting Standards Codification Topic 805, *Business Combinations*, (ASC 805), JK Environmental Services, LLC was determined to be the acquirer for accounting purposes. The table below summarizes the provisional purchase price allocation based on the estimated fair value of net assets acquired assumed at the date of acquisition. The purchase price allocation is provisional pending completion of the fair value analysis of the acquired assets and liabilities assumed:

ASSETS	
Net Working Capital	\$ 141
Net Fixed Assets	180
Intangible Assets ⁽¹⁾	268
Goodwill ⁽²⁾	1,702
 Total Purchase Price	 \$ 2,291

- (1) Intangible assets include a non-compete agreement and customer relationships. The amortization period for these intangible assets is one year for the noncompete agreement; and four years for the customer relationships.
- (2) Goodwill represents the excess of the purchase price over the fair value of assets acquired and liabilities assumed, and it is not deductible for income tax purposes. As of the acquisition date, goodwill consisted primarily of synergies resulting from the combination, expected expanded opportunities for growth and production, and savings in corporate overhead costs.

17. SUBSEQUENT EVENTS

Revenue other

Revenue other increased \$0.5 million to \$1.2 million for the nine months ended September 30, 2017 as compared to \$0.7 million for the nine months ended September 30, 2016. Revenue other increased \$0.5 million to \$0.7 million for the three months ended September 30, 2017 as compared to \$0.2 million for the three months ended September 30, 2016. The increase in both periods was directly attributable to the acquisition of Monridge Environmental, LLC, by the newly created entity, JK Environmental, LLC (JK) in July 2017. The revenues generated from this entity were approximately \$0.5 million for the three and nine months ended September 30, 2017. There were no similar acquisitions or revenue components during the three and nine months ended September 30, 2016.

Cost of sales homebuilding

Cost of sales homebuilding increased by \$0.5 million to \$12.5 million during the three months ended September 30, 2017, as compared to \$12.0 million during the three months ended September 30, 2016. Cost of sales homebuilding increased by \$1.0 million to \$30.8 million during the nine months ended September 30, 2017, as compared to \$29.8 million during the nine months ended September 30, 2016. Cost of sales other

Cost of sales other increased by \$0.7 million to \$0.8 million during the three months ended September 30, 2017, as compared to \$0.1 million during the three months ended September 30, 2016. Cost of sales other increased by \$1.1 million to \$1.4 million during the nine months ended September 30, 2017, as compared to \$0.3 million during the nine months ended September 30, 2016. The increase primarily relates to our new initiatives within our real estate services segment to expand our footprint in the real estate consulting and environmental study fields which includes the acquisition of Monridge Environmental, LLC by JK during the three months ended September 30, 2017.

Sales and marketing

Selling and marketing expenses for the three months ended September 30, 2017 and the three months ended September 30, 2016 was \$0.4 million. Selling and marketing expenses for the nine months ended September 30, 2017 decreased by \$0.2 million to \$1.1 million, as compared to \$1.3 million for the nine months ended September 30, 2016. For the three and nine months ended September 30, 2016, the Company recognized income tax expense of \$0 and \$57, respectively; and as of September 30, 2016 the effective tax rate was 2%.

Liquidity and Capital Resources

We require capital to operate, to post deposits on new potential acquisitions, to purchase and develop land, to construct homes, to fund related carrying costs and overhead and to fund various advertising and marketing programs to generate sales. These expenditures include payroll, community engineering, entitlement, architecture, advertising, utilities and interest as well as the construction costs of our homes. Our sources of capital include, and we believe will continue to include, private equity and debt placements (which has included significant participation from Company insiders), funds derived from various secured and unsecured borrowings to finance acquisition, development and construction on acquired land, cash flow from operations, which includes the sale and delivery of constructed homes, finished and raw building lots and the potential sale of public debt and equity securities. The Company is involved in ongoing discussions with lenders and equity sources in an effort to provide additional growth capital to fund various new business opportunities.

We have outstanding borrowings with various financial institutions and other lenders that have been used to finance the acquisition, development and construction of real estate projects. The Company has generally financed its development and construction activities on a single or multiple project basis so it is not uncommon for each of our projects or collection of our projects to have a separate credit facility. Accordingly, the Company typically has had numerous credit facilities and lenders.

As of September 30, 2017, \$22.7 million of the Company's outstanding credit facilities and project related loans mature at various periods through the end of 2017. We are in active discussions with our lenders seeking long term extensions and modifications to these loans. These debt instruments impose certain restrictions on our operations, including speculative unit construction limitations, curtailment obligations, and financial covenant compliance. If we fail to comply with any of these restrictions, an event of default could occur. Additionally, events of default could occur if we fail to make required debt service payments or if we fail to come to agreement on an extension on a certain facility prior to a given loan's maturity date. Any event of default would likely render the obligations under these instruments due and payable as of that event. Any such event of default would allow certain of our lenders to exercise cross default provisions in our loan agreements with them, such that all debt with that institution could be called into default. We are anticipating that with the successful resolution of the debt extension discussions with our lenders, capital raises from our recent private placement, current available cash on hand, and additional cash from settlement proceeds at existing and under development communities, the Company will have sufficient financial resources to sustain its operations through the next 12 months, though no assurances can be made that the Company will be successful in its efforts. The Company will also continue to focus on its cost structure in an effort to conserve cash and manage expenses. Such actions may include cost reductions and/or deferral arrangements with respect to current operating expenses.

Table of Contents

See Note 11 and Note 13 to the accompanying consolidated financial statements for details on private placement offerings and for more details on our credit facilities, respectively.

Cash Flow

Net cash provided by operating activities was \$3.0 million for the nine months ended September 30, 2017 compared to the net cash provided by operating activities of \$0.6 million for the nine months ended September 30, 2016. The \$3.3 million net cash provided by operations during the nine months ended September 30, 2017 was primarily attributable to increases in accounts payable of \$1.0 million, \$1.5 million of releases of inventories associated with units settled, increases in accrued interest of \$0.8 million, the amortization of loan discounts and other financing fees of \$0.9 million, the issuances of \$0.2 million of stock compensation, and the increases of \$0.8 million of other assets, mainly attributable to the acquisition of Monridge Environmental, LLC, offset by the net loss of \$2.4 million. The \$6.2 million net cash used by operations during the nine months ended September 30, 2016 was primarily attributable to \$10.0 million of inventory acquired, primarily related to the acquisition of three properties during the three months ended September 30, 2016, coupled with a net operating loss of \$3.5 million. These were offset by the amortization of loan discounts and other financing fees of \$0.8 million, increases in prepaid projects costs of \$0.5 million, increases in accrued interest of \$0.4 million, and increases in accounts payable and other accrued liabilities of \$4.6 million.

Net cash used in investing activities was \$0.8 million for the nine months ended September 30, 2017. This was primarily attributable to the cash paid for the acquisition of Monridge Environmental, LLC of \$0.6 million and the decrease in collateral for letters of credit for \$0.2 million. Net cash used in investing activities was immaterial for the nine months ended September 30, 2016.

Net cash used in financing activities was \$5.9 million for the nine months ended September 30, 2017. This was primarily attributable to the distributions of \$1.9 million to the Comstock Investor VIII Class B Members to fully redeem their equity interest and a distribution to the Comstock Investor X Class B Members of \$1.0 million, along with the pay downs on notes payable of \$22.4 million, offset by borrowings of \$19.9 million. Net cash used in financing activities was \$3.7 million for the nine months ended September 30, 2016. This was primarily attributable to the distributions of \$1.9 million to the New Hampshire Avenue non-controlling interest member, the distributions of \$2.5 million to the Comstock Investors VIII Class B Members, along with the pay downs on notes payable of \$28.4 million, offset by borrowings of \$34.2 million, and a contribution of \$5.0 million from the Comstock Investors X Class B Member.

Seasonality

The homebuilding industry usually experiences seasonal fluctuations in quarterly operating results and capital requirements. We typically experience the highest new home order activity in the Spring and Summer, although this activity is also highly dependent on the number of active selling communities, the timing of new community openings and other market factors. Because it typically takes four to six months to construct a new home, we deliver more homes in the second half of the year as Spring and Summer home orders convert to home deliveries. Because of this seasonality, home starts, construction costs and related cash outflows have historically been highest in the second and third quarters, and the majority of cash receipts from home deliveries occur during the second half of the year. We expect this seasonal pattern to continue over the long-term, although it may be affected by volatility in the homebuilding industry and the general economy.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We have evaluated, with the participation of our Chief Executive Officer and our Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of September 30, 2017. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of September 30, 2017.

Limitations on the Effectiveness of Controls

We do not expect that our disclosure controls and internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, a control may become inadequate because of changes in conditions or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

Changes in Internal Control

No changes have occurred in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) during the quarter ended September 30, 2017, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
