RESERVE AND RESOURCE ESTIMATES

PotashCorp's mineral reserves have been estimated in accordance with National Instrument 43-101 - *Standards of Disclosure for Mineral Projects* (NI 43-101), as required by Canadian securities regulatory authorities. For United States reporting purposes, Industry Guide 7 under the Securities Act of 1933, as amended, as interpreted by the Staff of the SEC, applies different standards in order to classify mineralization as a reserve. In addition, while the terms measured, indicated and inferred mineral resource are required pursuant to NI 43-101, the SEC does not recognize such terms. Canadian standards differ significantly from the requirements of the SEC, and mineral resource information contained in the documents incorporated into this Annual Report by reference is not comparable to similar information regarding mineral reserves disclosed in accordance with the requirements of the SEC. Investors should understand that inferred mineral resources have a great amount of uncertainty as to their existence and great uncertainty as to their economic and legal feasibility. In addition, investors are cautioned not to assume that any part or all of our mineral resources constitute or will be converted into reserves.
