XLCA - XL Capital Assurance, Inc.

The Trust did not have any open derivative instruments at June 30, 2018.

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At June 30, 2018, the hierarchy of inputs used in valuing the Trust's investments, which are carried at value, were as follows:

| <b>Asset Description</b>        | <b>Level 1</b> | <b>Level 2</b>        | <b>Level 3</b> | <b>Total</b>          |
|---------------------------------|----------------|-----------------------|----------------|-----------------------|
| Tax-Exempt Municipal Securities | \$             | \$ 335,649,987        | \$             | \$ 335,649,987        |
| Taxable Municipal Securities    |                | 9,015,626             |                | 9,015,626             |
| <b>Total Investments</b>        | <b>\$</b>      | <b>\$ 344,665,613</b> | <b>\$</b>      | <b>\$ 344,665,613</b> |

At June 30, 2018, there were no investments transferred between Level 1 and Level 2 during the fiscal year to date then ended.
