TTP and TPZ distribution policies

Tortoise Pipeline & Energy Fund, Inc. (TTP) and Tortoise Power and Energy Infrastructure Fund, Inc. (TPZ) are relying on exemptive relief permitting them to make long-term capital gain distributions throughout the year. Each of TTP and TPZ, with approval of its Board of Directors (the Board), has adopted a distribution policy (the Policy) with the purpose of distributing over the course of each year, through periodic distributions as nearly equal as practicable and any required special distributions, an amount closely approximating the total taxable income of TTP and TPZ during such year and, if so determined by the Board, all or a portion of the return of capital paid by portfolio companies to TTP and TPZ during such year. In accordance with its Policy, TTP distributes a fixed amount per common share, currently \$0.4075, each quarter to its common shareholders and TPZ distributes a fixed amount per common share, currently \$0.125, each month to its common shareholders. These amounts are subject to change from time to time at the discretion of the Board. Although the level of distributions is independent of TTP s and TPZ s performance, TTP and TPZ expect such distributions to correlate with its performance over time. Each quarterly and monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions in light of TTP s and TPZ s performance for the entire calendar year and to enable TTP and TPZ to comply with the distribution requirements imposed by the Internal Revenue Code. The Board may amend, suspend or terminate the Policy without prior notice to shareholders if it deems such action to be in the best interests of TTP, TPZ and their respective shareholders. For example, the Board might take such action if the Policy had the effect of shrinking TTP s or TPZ s assets to a level that was determined to be detrimental to TTP or TPZ shareholders. The suspension or termination of the Policy could have the effect of creating a trading discount (if TTP s or TPZ s stock is trading at or above net asset value), widening an existing trading discount, or decreasing an existing premium. You should not draw any conclusions about TTP s or TPZ s investment performance from the amount of the distribution or from the terms of TTP s or TPZ s distribution policy. Each of TTP and TPZ estimates that it has distributed more than its income and net realized capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in TTP or TPZ is paid back to you. A return of capital distribution does not necessarily reflect TTP s or TPZ s investment performance and should not be confused with yield or income. The amounts and sources of distributions reported are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon TTP s and TPZ s investment experience during the remainder of their fiscal year and may be subject to changes based on tax regulations. TTP and TPZ will send you a Form 1099-DIV for the calendar year that will tell you how to report these distributions for federal income tax purposes.

Tortoise Capital Advisors

First quarter 2018 report to closed-end fund stockholders

Dear stockholders,

The first fiscal quarter started with strong positive performance in December and January, only to give it all back in February. The broad energy sector, represented by the S&P Energy Select Sector[®] Index, returned -2.8% for the fiscal quarter ending February 28, 2018. Despite the recent negative performance in the energy sector, specifically in the midstream segment, we believe there is reason for optimism in 2018. Driving this optimism is our belief that commodity prices will remain stable and drive increased production, balance sheets are stronger and companies are better positioned to self-fund capital projects without relying on the health of capital markets.

Upstream

Crude oil prices were solid at the beginning of the fiscal quarter, with West Texas Intermediate (WTI) breaking through the \$60 per barrel threshold on the last day of the calendar year. Oil prices opened the fiscal quarter at \$57.40 per barrel, peaked at \$66.14 on January 26, 2018 and ended the fiscal quarter at \$61.64. Natural gas prices were volatile at the beginning of the calendar year, particularly as the Northeast experienced a bomb cyclone that brought exceptionally cold weather in January. The high demand for natural gas in the region drove prices sharply higher, even as liquefied natural gas (LNG) was brought in from Russia to help fill demand. Natural gas prices opened the fiscal year at \$3.06 per million British thermal units (MMBtu), peaked at \$6.24 on January 2, 2018 and ended the fiscal quarter at \$2.66. Partly driven by changes in commodity prices, performance of upstream oil and gas producers, as represented by the Tortoise North American Oil and Gas Producers IndexSM, returned -4.9% during the period.

U.S. crude oil production is expected to average 10.3 million barrels per day (MMbbl/d)¹ in 2018, a record high if achieved. With oil prices above \$50, many regions are economical for drilling activity. One basin particularly benefitting is the Bakken. Due partially to its location, predominantly in the Dakotas, drilling became less economical as crude oil prices declined during the energy downturn. With prices trending higher, well design improvements and increased pipeline takeaway capacity leading to increased drilling, the basin volume declines have reversed and returned the Bakken to growth.

Natural gas production is expected to average 79.6 billion cubic feet per day in 2018 and 84.9 bcf/d in 2019², significantly above 2017 levels. The production increases are facilitated by increased pipeline takeaway capacity in the Northeast and are led in large part by associated natural gas production from the Permian basin. We expect demand to emerge in the form of greater natural gas fired power generation, higher industrial activity and exports.

Midstream

Midstream energy companies faced structural headwinds during the last month of the first fiscal quarter and into the second fiscal quarter along with negative sentiment in the overall energy market. Pipeline companies, as measured by the Tortoise North American Pipeline IndexSM, returned -5.2% in the first fiscal quarter. MLPs, as represented by the Tortoise MLP Index[®] fared a bit better, returning -0.7% for the same period. Specifically, continued simplification transactions, a distribution cut, and modest equity issuance weighed on midstream sector sentiment.

We believe the structural headwinds are transitory and that midstream fundamentals are healthy. Our outlook for the midstream sector remains unchanged and positive as the need to build out new pipeline capacity remains. We project capital investments in MLPs, pipelines and related organic projects at approximately \$117 billion for 2018 to 2020. These projects will facilitate the acute need for more takeaway capacity to accommodate the growth in crude oil, natural gas, and natural gas liquids production and export infrastructure. Further, midstream valuations are very attractive, at levels not seen since the financial crisis in 2008-2009.

FERC update

On March 15, 2018, after the close of the first fiscal quarter, the Federal Energy Regulatory Commission (FERC) ruled against an existing policy allowing MLPs to include an income tax allowance (ITA) in cost-of-service rates. Removal of this allowance in cost-of-service calculations may result in a lower tariff rate and ultimately lower cash flow for affected pipelines. This change only affects MLPs with interstate natural gas and crude oil pipelines operating on a cost-of-service basis. Pipelines using negotiated or market-based rates are unaffected. The ruling also does not impact pipelines held by C-corporations or gathering and processing assets. Ultimately, we do not believe the FERC announcement will materially impact the midstream sector. Many MLPs issued press releases confirming this lack of materiality shortly after the announcement.

Downstream

Edgar Filing: TORTOISE ENERGY INFRASTRUCTURE CORP - Form N-30B-2

The U.S. exports story continues to build, especially with LNG exports. Dominion Energy's Cove Point export terminal in Maryland became the second facility to ship LNG cargo from the U.S. following Cheniere Energy's Sabine Pass facility. The Cove Point facility is particularly important to the northeast given the region's robust natural gas production. Other export facilities are currently under construction and several more are proposed. With low cost natural gas prices in the U.S. and high international prices, along with increasing global demand, U.S. LNG potential is great. According to the International Energy Agency, the U.S. could lead the world in LNG exports by 2022.

At Tortoise, we actively research the entire energy value chain, including renewable energy. Wind and solar have played an increasing role in electricity generation. Wind is projected to generate 778,000 megawatt-hours per day (MWh/d) in 2019¹, an increase of 12% from 2017. Barring any changes in forecasted factors such as precipitation and snowpack, 2019 is expected to be the first year that wind generation exceeds hydropower electricity generation. Solar electricity generation is also expected to increase to 294,000 MWh/d in 2019¹ from 211,000 in 2017, an increase of nearly 40%. We expect this growth to present further investment opportunities.

2

Tortoise Capital Advisors

Capital markets

MLPs and other pipeline companies raised more than \$42 billion in total capital during the first fiscal quarter, with more than half of the issuance in equity. There were no initial public offerings (IPOs) during the period. We believe the need for alternative forms of capital, like private investment in public equity (PIPEs) and preferred equity will continue into the foreseeable future and expect companies to retain more discretionary cash to fund growth projects.

Merger and acquisition activity among MLPs and other pipeline companies was strong during the first fiscal quarter with more than \$21 billion in activity announced. MPLX LP announced the largest transaction of the fiscal quarter with a buyout of the parent company's incentive distribution rights (IDRs) for more than \$10 billion.

Concluding thoughts

Despite the battering the energy sector, particularly the midstream segment, took this quarter, we see the tide turning for the broad energy sector in 2018. Energy production growth is strong, commodity prices are constructive to facilitate new drilling and the U.S. holds an advantageous position globally. Midstream companies remain a critical component for the energy value chain in maintaining a vibrant pipeline network to support the anticipated growth.

If you'd like to hear from Tortoise CEO Kevin Birzer about our views on the midstream energy sector, please watch the featured video on our website at www.totoiseadvisors.com.

Sincerely,

The Tortoise Energy Team

The S&P Energy Select Sector[®] Index is a capitalization-weighted index of S&P 500[®] Index companies in the energy sector involved in the development or production of energy products. The Tortoise North American Oil and Gas Producers IndexSM is a float-adjusted, capitalization-weighted index of North American energy companies engaged primarily in the production of crude oil, condensate, natural gas or natural gas liquids (NGLs). The Tortoise North American Pipeline IndexSM is a float adjusted, capitalization-weighted index of energy pipeline companies domiciled in the United States and Canada. The Tortoise MLP Index[®] is a float-adjusted, capitalization-weighted index of energy master limited partnerships.

The Tortoise indices are the exclusive property of Tortoise Index Solutions, LLC, which has contracted with S&P Opco, LLC (a subsidiary of S&P Dow Jones Indices LLC) to calculate and maintain the Tortoise MLP Index[®], Tortoise North American Pipeline IndexSM and Tortoise North American Oil and Gas Producers IndexSM (the Indices). The Indices are not sponsored by S&P Dow Jones Indices or its affiliates or its third party licensors (collectively, S&P Dow Jones Indices LLC). Tortoise

Energy Infrastructure Corp. (TYG)

Fund description

TYG seeks a high level of total return with an emphasis on current distributions paid to stockholders. TYG invests primarily in equity securities of master limited partnerships (MLPs) and their affiliates that transport, gather, process or store natural gas, natural gas liquids (NGLs), crude oil and refined petroleum products.

Fund performance review

The fund's market-based and NAV-based returns for the fiscal quarter ending February 28, 2018 were 9.8% and 9.6%, respectively (including the reinvestment of distributions). Comparatively, the Tortoise MLP Index[®] returned -0.7% for the same period. Midstream energy companies started the fiscal quarter strong, but faced structural headwinds during the last month of the fiscal quarter and into the second fiscal quarter along with negative sentiment in the overall energy market. We believe the structural headwinds are transitory and that midstream fundamentals are healthy.

First fiscal quarter highlights

Distributions paid per share	\$0.6550
Distribution rate (as of 2/28/2018)	9.5%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	0.0%
Cumulative distributions paid per share to stockholders since inception in February 2004	\$31.1175
Market-based total return	9.8%
NAV-based total return	9.6%
Premium (discount) to NAV (as of 2/28/2018)	8.2%

Key asset performance drivers

Energy Transfer Partners, L.P.	Midstream natural gas/natural gas liquids pipeline MLP	Positive fourth quarter operating results received well by the market
Plains All American Pipeline, L.P.	Midstream crude oil pipeline MLP	Expected crude oil production growth from Permian Basin
Enterprise Products Partners, L.P.	Midstream natural gas/natural gas liquids pipeline MLP	Delivered steady cash flow and healthy project backlog
Western Gas Partners, LP	Midstream gathering and processing MLP	Positive outlook from parent company's Permian Basin footprint
Andeavor Logistics LP	Midstream crude oil pipeline MLP	Analyst day highlighted asset footprint
Enbridge Energy Partners, L.P.	Midstream crude oil pipeline MLP	Strategic review with lower distribution viewed unfavorably by market
Magellan Midstream Partners, L.P.	Midstream refined product pipeline MLP	Concerns about long-term growth tied to project backlog
NuStar Energy L.P.	Midstream crude oil pipeline MLP	Announced distribution cut and roll up of general partner
EQT Midstream Partners, LP	Midstream natural gas/natural gas liquids pipeline MLP	Uncertainty around simplification transaction
Tallgrass Energy Partners, LP	Midstream natural gas/natural gas liquids pipeline MLP	Uncertainty around simplification transaction

Unlike the fund return, index return is pre-expenses and taxes.

Performance data quoted represent past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost. Portfolio composition is subject to change due to ongoing management of the fund. References to specific securities or sectors should not be construed as a recommendation by the fund or its adviser. See Schedule of Investments for portfolio weighting at the end of the fiscal quarter.

Tortoise Capital Advisors

2018 1st Quarter Report | February 28, 2018

Fund structure and distribution policy

The fund is structured as a corporation and is subject to federal and state income tax on its taxable income. The fund has adopted a distribution policy in which the Board of Directors considers many factors in determining distributions to stockholders. Particular emphasis is given to Distributable cash flow ("DCF") and distribution coverage. Distribution coverage is DCF divided by distributions paid to stockholders. Over the long term, the fund expects to distribute substantially all of its DCF to holders of common stock. The fund's Board of Directors reviews the distribution rate quarterly, and may adjust the quarterly distribution throughout the year. Although the level of distributions is independent of the funds' performance in the short term, the fund expects such distributions to correlate with its performance over time.

Distributable cash flow and distributions

DCF is distributions received from investments less expenses. The total distributions received from investments include the amount received as cash distributions from investments, paid-in-kind distributions, and dividend and interest payments. Income also includes the premiums received from sales of covered call options, net of amounts paid to buy back out-of-the-money options. The total expenses include current or anticipated operating expenses, leverage costs and current income taxes. Current income taxes include taxes paid on net investment income, in addition to foreign taxes, if any. Taxes incurred from realized gains on the sale of investments, expected tax benefits and deferred taxes are not included in DCF.

Distributions received from investments decreased approximately 0.7% as compared to 4th quarter 2017 as the impact of increased distribution rates on the fund's investments was offset by the impact of trading activity within the fund's portfolio. Operating expenses, consisting primarily of fund advisory fees, decreased approximately 1.0% during the quarter due to lower asset-based fees. Overall leverage costs increased slightly as compared to 4th quarter 2017. As a result of the changes in income and expenses, DCF decreased approximately 0.9% as compared to 4th quarter 2017. During the quarter, the fund issued 1,861,884 shares in a private placement transaction. This transaction had a one time negative impact to distribution coverage of 3.6%. The fund paid a quarterly distribution of \$0.655 per share, which was equal to the distribution paid in the prior quarter and 1st quarter 2017. The fund has paid cumulative distributions to stockholders of \$31.1175 per share since its inception in Feb. 2004.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between distributions received from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: the Statement of Operations, in conformity with U.S. generally accepted accounting principles ("GAAP"), recognizes distribution income from MLPs and other investments on their ex-dates, whereas the DCF calculation may reflect distribution income on their pay dates; GAAP recognizes that a significant portion of the cash distributions received from MLPs and other investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; and distributions received from investments in the DCF calculation include the value of dividends paid-in-kind (additional stock or MLP units), whereas such amounts are not included as income for GAAP purposes, and includes distributions related to direct investments when the purchase price is reduced in lieu of receiving cash distributions. Net premiums on options written (premiums received less amounts paid to buy back out-of-the-money options) with expiration dates during the fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses). Income for DCF purposes is reduced by amortizing the cost of certain investments that may not have a residual value after a known time period. The treatment of expenses in the DCF calculation also differs from what is reported in the Statement of Operations. In addition to the total operating expenses, including fee waiver, as disclosed in the Statement of Operations, the DCF calculation reflects interest expense, realized and unrealized gains (losses) on interest rate swap settlements, distributions to preferred stockholders, other recurring leverage expenses, as well as taxes paid on net investment income.

"Net Investment Income (Loss), before Income Taxes" on the Statement of Operations is adjusted as follows to reconcile to DCF for 1st quarter 2018 (in thousands):

	1st Qtr 2018
Net Investment Loss, before Income Taxes	\$ (6,982)
Adjustments to reconcile to DCF:	
Distributions characterized as return of capital	38,007
Dividends paid in stock	910
Net premiums on options written	11
Amortization of debt issuance costs	107
Amortization on certain investments	(164)
Interest rate swap expenses	(167)

DCF

\$ 31,722

Leverage

The fund's leverage utilization decreased \$22.9 million during 1st quarter 2018 and represented 30.2% of total assets at February 28, 2018. The fund has maintained compliance with its applicable coverage ratios. At quarter-end, including the impact of interest rate swaps, approximately 81% of the leverage cost was fixed, the weighted-average maturity was 4.6 years and the weighted-average annual rate on leverage was 3.66%. These rates will vary in the future as a result of changing floating rates, utilization of the fund's credit facilities and as leverage and swaps mature or are redeemed.

Income taxes

During 1st quarter 2018, the fund's deferred tax liability decreased by \$130.2 million to \$211.9 million, primarily as a result of the reduction of the corporate tax rate. The fund had net realized gains of \$7.4 million during the quarter. To the extent that the fund has taxable income, it will owe federal and state income taxes. Tax payments can be funded from investment earnings, fund assets, or borrowings.

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding critical accounting policies, results of operations, leverage, taxes and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on distributions and results and recent tax reform, please visit www.tortoiseadvisors.com.

Q1 is the period from December through February. Q2 is the period from March through May. Q3 is the period from June through August. Q4 is

(1) the period from September through November.

Leverage costs include interest expense, distributions to preferred stockholders, interest rate swap expenses and other recurring leverage expenses.

Includes taxes paid on net investment income and foreign taxes, if any. Taxes related to realized gains are excluded from the calculation of

(3) Distributable Cash Flow ("DCF").

(4) "Net investment income (loss), before income taxes" on the Statement of Operations is adjusted as follows to reconcile to DCF: increased by the return of capital on distributions, the dividends paid in stock, the net premiums on options written, the premium on redemptions of senior notes and MRP stock and amortization of debt issuance costs; and decreased by realized and unrealized gains (losses) on interest rate swap

settlements, amortization on certain investments and current taxes paid on net investment income.

- (5) Annualized.
- (6) Distributable Cash Flow divided by distributions paid.
- (7) Includes deferred issuance and offering costs on senior notes and preferred stock.
- (8) Computed by averaging month-end values within each period.
- (9) Leverage consists of senior notes, preferred stock and outstanding borrowings under credit facilities.
- (10) Computed by averaging daily net assets within each period.

2018 1st Quarter Report | February 28, 2018

Tortoise

MLP Fund, Inc. (NTG)

Fund description

NTG seeks to provide stockholders with a high level of total return with an emphasis on current distributions. NTG invests primarily in master limited partnerships (MLPs) and their affiliates that own and operate a network of pipeline and energy-related logistical infrastructure assets with an emphasis on those that transport, gather, process and store natural gas and natural gas liquids (NGLs). NTG targets midstream MLPs benefiting from U.S. natural gas production and consumption expansion with minimal direct commodity exposure.

Fund performance review

The fund's market-based and NAV-based returns for the fiscal quarter ending February 28, 2018 were 13.1% and 5.4%, respectively (including the reinvestment of distributions). Comparatively, the Tortoise MLP Index[®] returned -0.7% for the same period. Midstream energy companies started the fiscal quarter strong, but faced structural headwinds during the last month of the fiscal quarter and into the second fiscal quarter along with negative sentiment in the overall energy market. We believe the structural headwinds are transitory and that midstream fundamentals are healthy.

First fiscal quarter highlights

Distributions paid per share	\$0.4225
Distribution rate (as of 2/28/2018)	9.6%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	0.0%
Cumulative distributions paid per share to stockholders since inception in July 2010	\$12.5025
Market-based total return	13.1%
NAV-based total return	5.4%
Premium (discount) to NAV (as of 2/28/2018)	7.0%

MLP Fund, Inc. (NTG) (continued)

Fund structure and distribution policy

The fund is structured as a corporation and is subject to federal and state income tax on its taxable income. The fund has adopted a distribution policy in which the Board of Directors considers many factors in determining distributions to stockholders. Particular emphasis is given to Distributable cash flow ("DCF") and distribution coverage. Distribution coverage is DCF divided by distributions paid to stockholders. Over the long term, the fund expects to distribute substantially all of its DCF to holders of common stock. The fund's Board of Directors reviews the distribution rate quarterly, and may adjust the quarterly distribution throughout the year. Although the level of distributions is independent of the funds' performance in the short term, the fund expects such distributions to correlate with its performance over time.

Distributable cash flow and distributions

DCF is distributions received from investments less expenses. The total distributions received from investments include the amount received as cash distributions from MLPs, paid-in-kind distributions, and dividend and interest payments. Income also includes the premiums received from sales of covered call options, net of amounts paid to buy back out-of-the-money options. The total expenses include current or anticipated operating expenses, leverage costs and current income taxes. Current income taxes include taxes paid on net investment income in addition to foreign taxes, if any. Taxes incurred from realized gains on the sale of investments, expected tax benefits and deferred taxes are not included in DCF.

Distributions received from investments increased approximately 1.8% as compared to 4th quarter 2017 due primarily to the impact of increased distribution rates on the fund's investments. Operating expenses, consisting primarily of fund advisory fees, increased approximately 0.5% during the quarter due to higher asset-based fees. Leverage costs decreased slightly as compared to 4th quarter 2017. As a result of the changes in income and expenses, DCF increased approximately 2.3% as compared to 4th quarter 2017. The fund paid a quarterly distribution of \$0.4225 per share, which was equal to the distribution paid in the prior quarter and 1st quarter 2017. The fund has paid cumulative distributions to stockholders of \$12.5025 per share since its inception in July 2010.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between distributions received from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: the Statement of Operations, in conformity with U.S. generally accepted accounting principles ("GAAP"), recognizes distribution income from MLPs, common stock and other investments on their ex-dates, whereas the DCF calculation may reflect distribution income on their pay dates; GAAP recognizes that a significant portion of the cash distributions received from MLPs, common stock and other investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; and distributions received from investments in the DCF calculation include the value of dividends paid-in-kind (additional stock or MLP units), whereas such amounts are not included as income for GAAP purposes, and includes distributions related to direct investments when the purchase price is reduced in lieu of receiving cash distributions. Net premiums on options written (premiums received less amounts paid to buy back out-of-the-money options) with expiration dates during the fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses). The treatment of expenses in the DCF calculation also differs from what is reported in the Statement of Operations. In addition to the total operating expenses, including fee waiver, as disclosed in the Statement of Operations, the DCF calculation reflects interest expense, distributions to preferred stockholders, other recurring leverage expenses, as well as taxes paid on net investment income.

"Net Investment Income (Loss), before Income Taxes" on the Statement of Operations is adjusted as follows to reconcile to DCF for 1st quarter 2018 (in thousands):

	1st Qtr 2018
Net Investment Loss, before Income Taxes	\$ (5,523)
Adjustments to reconcile to DCF:	
Distributions characterized as return of capital	24,154
Dividends paid in stock	546
Amortization of debt issuance costs	61
DCF	\$ 19,238

Leverage

The fund's leverage utilization decreased by \$3.4 million during 1st quarter 2018 and represented 33.9% of total assets at February 28, 2018. The fund has maintained compliance with its applicable coverage ratios. At quarter-end, approximately 77% of the leverage cost was fixed, the

weighted-average maturity was 4.1 years and the weighted-average annual rate on leverage was 3.70%. These rates will vary in the future as a result of changing floating rates, utilization of the fund's credit facility and as leverage matures or is redeemed. During the quarter, the fund issued \$57 million Senior Notes with a weighted-average fixed interest rate of approximately 3.31% and \$65 million Mandatory Redeemable Preferred ("MRP") Shares with a weighted-average fixed interest rate of approximately 3.89%. The notes and preferred shares were issued to replace \$57 million of maturing Senior Notes with a fixed interest rate of 3.73% and \$65 million of redeemed MRP Shares with a fixed interest rate of 4.33%.

Income taxes

During 1st quarter 2018, the fund's deferred tax liability decreased by \$47.5 million to \$74.9 million, primarily as a result of the reduction of the corporate tax rate. The fund had net realized losses of \$0.6 million during the quarter. As of February 28, 2018, the fund had net operating losses of \$55 million for federal income tax purposes. To the extent that the fund has taxable income in the future that is not offset by net operating losses, it will owe federal and state income taxes. Tax payments can be funded from investment earnings, fund assets, or borrowings.

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding critical accounting policies, results of operations, leverage, taxes and other important fund information.

Tortoise Capital Advisors

Tortoise

Pipeline & Energy Fund, Inc. (TTP)

Fund description

TTP seeks a high level of total return with an emphasis on current distributions paid to stockholders. TTP invests primarily in equity securities of North American pipeline companies that transport natural gas, natural gas liquids (NGLs), crude oil and refined products and, to a lesser extent, in other energy infrastructure companies.

Fund performance review

The fund's market-based and NAV-based returns for the fiscal quarter ending February 28, 2018 were 1.9% and -5.7%, respectively (including the reinvestment of distributions). Comparatively, the Tortoise North American Pipeline IndexSM returned -5.2% for the same period. Midstream energy companies started the fiscal quarter strong, but faced structural headwinds during the last month of the fiscal quarter and into the second fiscal quarter along with negative sentiment in the overall energy market. We believe the structural headwinds are transitory and that midstream fundamentals are healthy.

First fiscal quarter highlights

Distributions paid per share	\$0.4075
Distribution rate (as of 2/28/2018)	9.6%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	0.0%
Cumulative distributions paid per share to stockholders since inception in October 2011	\$10.5050
Market-based total return	1.9%
NAV-based total return	(5.7)%
Premium (discount) to NAV (as of 2/28/2018)	(2.4)%

Please refer to the inside front cover of the report for important information about the fund's distribution policy.

The fund's covered call strategy, which focuses on independent energy companies that are key pipeline transporters, enabled the fund to generate current income. The notional amount of the fund's covered calls averaged approximately 9.4% of total assets, and their out-of-the-money percentage at the time written averaged approximately 5.6% during the fiscal quarter.

Key asset performance drivers

ONEOK, Inc.	Midstream natural gas/natural gas liquids pipeline company	Announced increased growth projects at expected high returns and fully funded equity needs
Energy Transfer Partners, L.P.	Midstream natural gas/natural gas liquids pipeline MLP	Positive fourth quarter operating results received well by the market
Targa Resources Corp	Midstream gathering and processing company	Announced increased growth projects at expected high returns and fully funded equity needs
Plains GP Holdings, L.P.	Midstream crude oil pipeline company	Expected crude oil production growth from Permian Basin
Concho Resources Inc.	Upstream oil and gas producer	Benefitted from rising oil prices due to the extension of the OPEC production cut agreement through the end of 2018

Tortoise Capital Advisors

Fund structure and distribution policy

The fund is structured to qualify as a Regulated Investment Company ("RIC") allowing the fund to pass-through to shareholders the income and capital gains earned by the fund, thus avoiding double-taxation. To qualify as a RIC, the fund must meet specific income, diversification and distribution requirements. Regarding income, at least 90 percent of the fund's gross income must be from dividends, interest and capital gains. The fund must meet quarterly diversification requirements including the requirement that at least 50 percent of the assets be in cash, cash equivalents or other securities with each single issuer of other securities not greater than 5 percent of total assets. No more than 25 percent of total assets can be invested in any one issuer other than government securities or other RIC's. The fund must also distribute at least 90 percent of its investment company income. RIC's are also subject to excise tax rules which require RIC's to distribute approximately 98 percent of net income and net capital gains to avoid a 4 percent excise tax.

The fund has adopted a distribution policy which is included on the inside front cover of this report. To summarize, the fund intends to distribute an amount closely approximating the total taxable income for the year and, if so determined by the Board, distribute all or a portion of the return of capital paid by portfolio companies during the year. The fund may designate a portion of its distributions as capital gains and may also distribute additional capital gains in the last calendar quarter of the year to meet annual excise distribution requirements. The fund distributes a fixed amount per common share, currently \$0.4075, each quarter to its common shareholders. This amount is subject to change from time to time at the discretion of the Board. Although the level of distributions is independent of the funds' performance in the short term, the fund expects such distributions to correlate with its performance over time.

Distributable cash flow and distributions

Distributable cash flow ("DCF") is income from investments less expenses. Income from investments includes the amount received as cash or paid-in-kind distributions from common stock, master limited partnerships ("MLPs"), affiliates of MLPs, and pipeline and other energy companies in which the fund invests, and dividend payments on short-term investments. Income also includes the premiums received from sales of covered call options, net of amounts paid to buy back out-of-the-money options. The total expenses include current or anticipated operating expenses and leverage costs.

Distributions received from investments increased approximately 3.4% as compared to 4th quarter 2017, primarily due to higher income on premiums from sales of covered call options. Operating expenses, consisting primarily of fund advisory fees, increased approximately 2.3% during the quarter primarily due to higher asset based fees and other operating expenses. Leverage costs increased 7.1% as compared to 4th quarter 2017 primarily as a result of increased interest rates during the quarter. As a result of the changes in income and expenses, DCF increased approximately 3.0% as compared to 4th quarter 2017. In addition, the fund had net realized gains on investments of \$0.5 million during 1st quarter 2018. The fund paid a quarterly distribution of \$0.4075 per share, which was unchanged over the prior quarter and 1st quarter 2017. The fund has paid cumulative distributions to stockholders of \$10.505 per share since its inception in October 2011.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: (1) the Statement of Operations, in conformity with U.S. generally accepted accounting principles ("GAAP"), recognizes distributions and dividend income from MLPs, common stock and other investments on their ex-dates, whereas the DCF calculation may reflect distributions and dividend income on their pay dates; (2) GAAP recognizes that a significant portion of the cash distributions received from MLPs, common stock and other investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (3) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (4) net premiums on options written (premiums received less amounts paid to buy back out-of-the-money options) with expiration dates during the fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses).

"Net Investment Income (Loss)" on the Statement of Operations is adjusted as follows to reconcile to DCF for 1st quarter 2018 (in thousands):

	1st Qtr 2018
Net Investment Loss	\$(122)
Adjustments to reconcile to DCF:	
Net premiums on options written	1,125
Distributions characterized as return of capital	2,105

Dividends paid in stock	397
Amortization of debt issuance costs	14
DCF	\$ 3,519

Leverage

The fund's leverage utilization increased by \$0.5 million during 1st quarter 2018 and represented 28.5% of total assets at February 28, 2018. The fund has maintained compliance with its applicable coverage ratios. At quarter-end, approximately 63% of the leverage cost was fixed, the weighted-average maturity was 2.1 years and the weighted-average annual rate on leverage was 3.53%. These rates will vary in the future as a result of changing floating rates, utilization of the fund's credit facility and as leverage matures or is redeemed.

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding critical accounting policies, results of operations, leverage and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on distributions, please visit www.tortoiseadvisors.com.

12

Tortoise Capital Advisors

Tortoise

Energy Independence Fund, Inc. (NDP)

Fund description

NDP seeks a high level of total return with an emphasis on current distributions paid to stockholders. NDP invests primarily in equity securities of upstream North American energy companies that engage in the exploration and production of crude oil, condensate, natural gas and natural gas liquids that generally have a significant presence in North American oil and gas fields, including shale reservoirs.

Fund performance review

The fund's market-based and NAV-based returns for the fiscal quarter ending February 28, 2018 were -1.1% and -8.3%, respectively (including the reinvestment of distributions). Comparatively, the Tortoise North American Oil and Gas Producers IndexSM returned -4.9% for the same period. Although both negative, liquids producers performed better than natural gas producers. Natural gas producers in the Marcellus retreated the most during the period due to takeaway capacity constraints. The fund's negative performance was somewhat mitigated by its exposure to midstream companies that it holds to execute its covered call strategy.

First fiscal quarter highlights

Distributions paid per share	\$0.4375
Distribution rate (as of 2/28/2018)	14.8%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	0.0%
Cumulative distributions paid per share to stockholders since inception in July 2012	\$9.6250
Market-based total return	(1.1)%
NAV-based total return	(8.3)%
Premium (discount) to NAV (as of 2/28/2018)	3.7%

The fund utilizes a covered call strategy, which seeks to generate income while reducing overall volatility. The premium income generated from this strategy helped to lower NAV volatility during the quarter. The notional amount of the fund's covered calls averaged approximately 67.8% of total assets and their out-of-the-money percentage at the time written averaged approximately 7.1% during the fiscal quarter.

Key asset performance drivers

Anadarko Petroleum Corporation	Upstream oil and natural gas producer	Announced disciplined capital spending and growth plan for 2018
Energy Transfer Partners, L.P.	Midstream natural gas/natural gas liquids pipeline MLP	Positive fourth quarter operating results received well by the market
Diamondback Energy, Inc.	Upstream liquids producer	Benefited from rising oil prices due to the extension of the OPEC production cut agreement through the end of 2018
PDC Energy, Inc.	Upstream oil and gas producer	Benefited from rising oil prices due to the extension of the OPEC production cut agreement through the end of 2018
Royal Dutch Shell plc	Upstream oil and gas producer	Analyst day highlighted diversified asset base and growth potential and increased LNG demand
Range Resources Corporation	Upstream natural gas producer	Declining natural gas prices and continuing operational challenges
Cabot Oil & Gas Corporation	Upstream liquids producer	Declining natural gas prices
Devon Energy Corporation	Upstream oil and gas producer	Weaker than expected results from SCOOP/STACK shale plays in central Oklahoma
EOG Resources, Inc.	Upstream oil and gas producer	Weaker than expected 2018 production forecast and higher capital spending
Newfield Exploration Company	Upstream oil and gas producer	Weaker than expected results from SCOOP/STACK shale plays in central Oklahoma

Unlike the fund return, index return is pre-expenses.

Performance data quoted represent past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost. Portfolio composition is subject to change due to ongoing management of the fund. References to specific securities or sectors should not be construed as a recommendation by the fund or its adviser. See Schedule of Investments for portfolio weighting at the end of the fiscal quarter.

Energy Independence Fund, Inc. (NDP) (continued)

Fund structure and distribution policy

The fund is structured to qualify as a Regulated Investment Company (“RIC”) allowing the fund to pass-through to shareholders the income and capital gains earned by the fund, thus avoiding double-taxation. To qualify as a RIC, the fund must meet specific income, diversification and distribution requirements. Regarding income, at least 90 percent of the fund’s gross income must be from dividends, interest and capital gains. The fund must meet quarterly diversification requirements including the requirement that at least 50 percent of the assets be in cash, cash equivalents or other securities with each single issuer of other securities not greater than 5 percent of total assets. No more than 25 percent of total assets can be invested in any one issuer other than government securities or other RIC’s. The fund must also distribute at least 90 percent of its investment company income. RIC’s are also subject to excise tax rules which require RIC’s to distribute approximately 98 percent of net income and net capital gains to avoid a 4 percent excise tax.

The fund has adopted a distribution policy which intends to distribute an amount closely approximating the total taxable income for the year and, if so determined by the Board, distribute all or a portion of the return of capital paid by portfolio companies during the year. The fund may designate a portion of its distributions as capital gains and may also distribute additional capital gains in the last calendar quarter of the year to meet annual excise distribution requirements. Distribution amounts are subject to change from time to time at the discretion of the Board. Although the level of distributions is independent of the funds’ performance in the short term, the fund expects such distributions to correlate with its performance over time.

Distributable cash flow and distributions

Distributable cash flow (“DCF”) is income from investments less expenses. Income from investments includes the amount received as cash or paid-in-kind distributions from investments and dividend payments on short-term investments. Income also includes the premiums received from sales of covered call options, net of amounts paid to buy back out-of-the-money options. The total expenses include current or anticipated operating expenses and leverage costs.

Distributions received from investments decreased approximately 0.3% as compared to 4th quarter 2017, primarily due to lower income on premiums from sales of covered call options. Operating expenses, consisting primarily of fund advisory fees, increased approximately 3.5% during the quarter due to higher asset-based fees and other operating expenses. Total leverage costs increased approximately 15.7% as compared to 4th quarter 2017, primarily due to an increase in interest rates during the quarter. As a result of the changes in income and expenses, DCF decreased by approximately 1.6% as compared to 4th quarter 2017. In addition, the fund had net realized gains on investments of \$5.9 million during 1st quarter 2018.

The fund maintained its quarterly distribution of \$0.4375 per share during 1st quarter 2018, which was equal to the distribution paid in the prior quarter and 1st quarter 2017. The fund has paid cumulative distributions to stockholders of \$9.625 per share since its inception in July 2012.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: (1) the Statement of Operations, in conformity with U.S. generally accepted accounting principles (“GAAP”), recognizes distributions and dividend income from MLPs, common stock and other investments on their ex-dates, whereas the DCF calculation may reflect distributions and dividend income on their pay dates; (2) GAAP recognizes that a significant portion of the cash distributions received from MLPs, common stock and other investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (3) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (4) net premiums on options written (premiums received less amounts paid to buy back out-of-the-money options) with expiration dates during fiscal quarter are included in the DCF calculation, whereas GAAP recognizes the net effect of options written as realized and unrealized gains (losses).

“Net Investment Income (Loss)” on the Statement of Operations is adjusted as follows to reconcile to DCF for 1st quarter 2018 (in thousands):

		1st Qtr 2018
Net Investment Loss	\$	(843)
Adjustments to reconcile to DCF:		
Net premiums on options written		5,627

Edgar Filing: TORTOISE ENERGY INFRASTRUCTURE CORP - Form N-30B-2

Distributions characterized as return of capital		1,086
Dividends paid in stock		194
DCF	\$	6,064

Leverage

The fund's leverage utilization increased \$3.5 million as compared to 4th quarter 2017. The fund utilizes all floating rate leverage that had an interest rate of 2.47% and represented 28.8% of total assets at quarter-end. The fund has maintained compliance with its applicable coverage ratios. The interest rate on the fund's leverage will vary in the future along with changing floating rates.

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding critical accounting policies, results of operations, leverage and other important fund information.

Tortoise

Power and Energy Infrastructure Fund, Inc. (TPZ)

Fund description

TPZ seeks to provide a high level of current income to stockholders, with a secondary objective of capital appreciation. TPZ seeks to invest primarily in fixed income and dividend-paying equity securities of power and energy infrastructure companies that provide stable and defensive characteristics throughout economic cycles.

Fund performance review

The fund's market-based and NAV-based returns for the fiscal quarter ending February 28, 2018 were -2.8% and -1.2%, respectively (including the reinvestment of distributions). Comparatively, the TPZ Benchmark Composite* returned -1.2% for the same period. Midstream energy companies started the fiscal quarter strong, but faced structural headwinds during the last month of the fiscal quarter and into the second fiscal quarter along with negative sentiment in the overall energy market. We believe the structural headwinds are transitory and that midstream fundamentals are healthy. The fund's focus on power and utilities did not help performance as those investments retreated due to expected higher interest rates.

First fiscal quarter highlights

Monthly distributions paid per share	\$0.1250
Distribution rate (as of 2/28/2018)	7.9%
Quarter-over-quarter distribution increase	0.0%
Year-over-year distribution increase	0.0%
Cumulative distribution to stockholders since inception in July 2009	\$14.1500
Market-based total return	(2.8)%
NAV-based total return	(1.2)%
Premium (discount) to NAV (as of 2/28/2018)	(8.1)%

The TPZ Benchmark Composite includes the BofA Merrill Lynch U.S. Energy Index (CIEN), the BofA Merrill Lynch U.S. Electricity Index (CUEL) and the Tortoise MLP Index® (TMLP). It is comprised of a blend of 70% fixed income and 30% equity securities issued by companies in the power and energy infrastructure sectors.

Please refer to the inside front cover of the report for important information about the fund's distribution policy.

Key asset performance drivers

Top five contributors

Energy Transfer Partners, L.P.	Midstream natural gas/natural gas liquids pipeline MLP
ONEOK, Inc.	Midstream natural gas/ natural gas liquids pipeline company
Kinder Morgan, Inc. (fixed income)	Midstream natural gas/natural gas liquids pipeline company
Targa Resources Corp	Midstream gathering and processing company
SemGroup Corp	Midstream crude oil pipeline company

Performance driver

Positive fourth quarter operating results received well by the market
Announced increased growth projects at expected high returns and fully funded equity needs

Reduced leverage to target levels
Announced increased growth projects at expected high returns and fully funded equity needs
Alleviated equity concerns with preferred offering

Bottom five contributors

Enbridge Energy Management, L.L.C.	Midstream crude oil pipeline company
Tallgrass Energy GP, LP	Midstream natural gas/natural gas liquids pipeline company
NuStar Energy L.P.	Midstream crude oil MLP
Plains GP Holdings, L.P.	Midstream crude oil pipeline company
Holly Energy Partners, L.P.	Midstream refined product pipeline MLP

Performance driver

Strategic review with lower distribution viewed unfavorably by market

Uncertainty around simplification transaction
Announced distribution cut and roll up of General Partner
Lower 2018 cash flow forecast

Concerns about long-term growth tied to project backlog

Unlike the fund return, index return is pre-expenses.

Performance data quoted represent past performance; past performance does not guarantee future results. Like any other stock, total return and market value will fluctuate so that an investment, when sold, may be worth more or less than its original cost. Portfolio composition is subject to change due to ongoing management of the fund. References to specific securities or sectors should not be construed as a recommendation by the fund or its adviser. See Schedule of Investments for portfolio weighting at the end of the fiscal quarter.

(unaudited)

Fund structure and distribution policy

The fund is structured to qualify as a Regulated Investment Company (“RIC”) allowing the fund to pass-through to shareholders the income and capital gains earned by the fund, thus avoiding double-taxation. To qualify as a RIC, the fund must meet specific income, diversification and distribution requirements. Regarding income, at least 90 percent of the fund gross income must be from dividends, interest and capital gains. The fund must meet quarterly diversification requirements including the requirement that at least 50 percent of the assets be in cash, cash equivalents or other securities with each single issuer of other securities not greater than 5 percent of total assets. No more than 25 percent of total assets can be invested in any one issuer other than government securities or other RIC’s. The fund must also distribute at least 90 percent of its investment company income. RIC’s are also subject to excise tax rules which require RIC’s to distribute approximately 98 percent of net income and net capital gains to avoid a 4 percent excise tax.

The fund has adopted a distribution policy which is included on the inside front cover of this report. To summarize, the fund intends to distribute an amount closely approximating the total taxable income for the year and, if so determined by the Board, distribute all or a portion of the return of capital paid by portfolio companies during the year. The fund may designate a portion of its distributions as capital gains and may also distribute additional capital gains in the last calendar quarter of the year to meet annual excise distribution requirements. The fund distributes a fixed amount per common share, currently \$0.125, each month to its common shareholders. This amount is subject to change from time to time at the discretion of the Board. Although the level of distributions is independent of the funds’ performance in the short term, the fund expects such distributions to correlate with its performance over time.

Distributable cash flow and distributions

Distributable cash flow (“DCF”) is income from investments less expenses. Income from investments includes the accrued interest from corporate bonds, cash distributions and paid-in-kind distributions from master limited partnerships (“MLPs”) and other equity investments and dividends earned from short-term investments. The total expenses include current or anticipated operating expenses and leverage costs.

Distributions received from investments increased approximately 0.4% as compared to 4th quarter 2017 due primarily to the impact of trading activity within the fund’s portfolio. Operating expenses, consisting primarily of fund advisory fees, increased approximately 1.5% during the quarter primarily due to an increase in allocated director’s fees. Total leverage costs increased approximately 11.5% as compared to 4th quarter 2017, primarily due to an increase in interest rates during the quarter. As a result of the changes in income and expenses, DCF decreased approximately 1.2% as compared to 4th quarter 2017. In addition, the fund had net realized gains on investments of \$1.7 million during 1st quarter 2018.

The fund paid monthly distributions of \$0.125 per share during 1st quarter 2018, which was unchanged over the prior quarter and 1st quarter 2017.

The fund’s Board of Directors has declared monthly distributions of \$0.125 per share to be paid during 2nd quarter 2018. The fund has paid cumulative distributions to stockholders of \$14.15 per share since its inception in July 2009.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: (1) U.S. generally accepted accounting principles (“GAAP”), recognizes distribution income from MLPs, common stock and other investments on their ex-dates, whereas the DCF calculation may reflect distribution income on their pay dates; (2) GAAP recognizes that a significant portion of the cash distributions received from MLPs, common stock and other investments are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (3) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (4) amortization of premium or discount for all securities is calculated using the yield to worst methodology for GAAP purposes while yield to call is used in calculating amortization for long-dated hybrid securities in the DCF calculation. The treatment of expenses in the DCF calculation also differs from what is reported in the Statement of Operations. In addition to the total operating expenses, including fee waiver, as disclosed in the Statement of Operations, the DCF calculation reflects interest expense and realized and unrealized gains (losses) on interest rate swap settlements as leverage costs.

“Net Investment Income (Loss)” on the Statement of Operations is adjusted as follows to reconcile to DCF for 1st quarter 2018 (in thousands):

		1st Qtr 2018
Net Investment Income	\$	904
Adjustments to reconcile to DCF:		

Edgar Filing: TORTOISE ENERGY INFRASTRUCTURE CORP - Form N-30B-2

Dividends paid in stock		268
Distributions characterized as return of capital		1,212
Interest rate swap expenses		(10)
DCF	\$	2,374

Leverage

The fund's leverage utilization decreased \$4.2 million as compared to 4th quarter 2017 and represented 25.0% of total assets at February 28, 2018. The fund has maintained compliance with its applicable coverage ratios. At quarter-end, including the impact of interest rate swaps, approximately 31% of the leverage cost was fixed, the weighted-average maturity was 0.8 years and the weighted-average annual rate on leverage was 2.50%. These rates will vary in the future as a result of changing floating rates and as swaps mature or are redeemed.

Please see the Financial Statements and Notes to Financial Statements for additional detail regarding critical accounting policies, results of operations, leverage and other important fund information.

For further information regarding the calculation of distributable cash flow and distributions to stockholders, as well as a discussion of the tax impact on distributions, please visit www.tortoiseadvisors.com.

Invesco Government & Agency Portfolio — Institutional Class, 1.30% ⁽⁷⁾ (Cost \$156,060)	156,060	156,060
Total Investments — 141.2% (Cost \$277,383,595)		234,802,548
Total Value of Options Written (Premiums received \$2,126,190) — (0.6)%		(1,062,928)
Other Assets and Liabilities — 0.3%		513,034
Credit Facility Borrowings — (40.9)%		(68,000,000)
Total Net Assets Applicable to Common Stockholders — 100.0%		\$ 166,252,654

(1) Calculated as a percentage of net assets applicable to common stockholders.

(2) All or a portion of the security represents cover for outstanding call option contracts written.

(3) Non-income producing security.

(4) Security distributions are paid-in-kind. Rate determined by dividing the cash value of a distribution declared by Enbridge Energy Partners, L.P. by the average closing price of Enbridge Energy Management, L.L.C. shares for the ten consecutive trading days prior to the ex-dividend date.

(5) Restricted securities have a total fair value of \$4,623,849, which represents 2.8% of net assets. See Note 6 to the financial statements for further disclosure.

(6) Securities have been valued by using significant unobservable inputs in accordance with fair value procedures, as more fully described in Note 2 to the financial statements.

(7) Rate indicated is the current yield as of February 28, 2018.

ADR = American Depository Receipts

(1) Information presented relates to a share of common stock outstanding for the entire period.

(2) The per common share data for the years ended November 30, 2017, 2016, 2015, 2014 and 2013 do not reflect the change in estimate of investment income and return of capital, for the respective year. See Note 2C to the financial statements for further disclosure.

Represents premium on shelf offerings of less than \$0.01 per share, less the underwriting and offering costs of less than \$0.01, for the period from December 1, 2017 through February 28, 2018. Represents the premium on the shelf offerings of \$0.01 per share, less the underwriting and offering costs of less than \$0.01 per share for the year ended November 30, 2017. Represents the premium on the shelf offerings of \$0.02 per

(3) share, less the underwriting and offering costs of less than \$0.01 per share for the year ended November 30, 2016. Represents underwriting and offering costs of less than \$0.01 per share for the year ended November 30, 2015. Represents the premium on the shelf offerings of \$0.02 per share, less the underwriting and offering costs of \$0.01 per share for the year ended November 30, 2014. Represents the premium on the shelf offerings of \$0.06 per share, less the underwriting and offering costs of \$0.01 per share for the year ended November 30, 2013.

(4) Not annualized for periods less than one full year.

Total investment return is calculated assuming a purchase of common stock at the beginning of the period and a sale at the closing price on the (5) last day of the period reported (excluding brokerage commissions). The calculation also assumes reinvestment of distributions at actual prices pursuant to TYG's dividend reinvestment plan.
