ON Semiconductor Letter to Suppliers

July 17, 2008

Dear Supplier,

I'd like to share some exciting news with you. Today, ON Semiconductor announced a definitive merger agreement for the acquisition of Catalyst Semiconductor Inc. This transaction is subject to the approval of Catalyst's shareholders, customary closing conditions and regulatory approvals and is an all stock transaction. This means that current Catalyst legal entities will remain immediately following this transaction. The deal has been formally approved by each company's board of directors. We expect the acquisition to close during the fourth quarter.

We do not intend to begin altering any of Catalyst's day-to-day business operations. Catalyst's customers, distributors, sales reps, vendors and suppliers can expect business to continue virtually unchanged for the foreseeable future.

With the acquisition of Catalyst, ON Semiconductor will, however, be able to immediately provide all our customers with a broader offering of analog and mixed-signal products for the digital consumer and wireless end-markets. Catalyst's EEPROM technology will strengthen our custom application-specific circuits (ASIC) and power products capabilities expanding our ability to more comprehensively address our customers needs. By combining with ON Semiconductor's global footprint, effective channels of distribution, top-tier customer and supplier relationships, we expect to be able to support a broader and deeper penetration of Catalyst's overall product portfolio.

We will communicate future updates at the earliest possible time. For now, we ask that you continue to conduct business as usual.

If you have any questions or concerns, please contact your local procurement contact. You may e-mail questions to transitions@onsemi.com.

Best Regards,

/s/ Walt Guy
