Letter to Stockholders

GLOBAL MARKET OVERVIEW

Despite improvements in stock market valuations and liquidity, the downward path of earnings expectations has kept most markets under pressure so far this year. Macroeconomic imbalances, ongoing geopolitical issues, high oil and commodity prices, the upcoming U.S. presidential elections, and multi-year lows in volatility are contributing to investor caution. In addition, companies around the world are running substantial cash surpluses that have not been seen on a sustained basis for at least the past three decades.

. IN THE U.S., economic growth is weakening mainly due to high oil prices.

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30B-2

Corporate margins seem close to a peak and, as inflation creeps up, short-term interest rates will have to continue their upward path. This backdrop has contributed to a compression of stock valuations.

Foreign investors have continued to increase their already large holdings of U.S. Treasuries. At some point favorable economic developments will lead to more demand and more structured and liquid markets in these investors' own countries and they will find ample fixed income investment opportunities at home. This would create an increase in the supply of U.S. dollars in the international markets and put pressure on U.S. Treasury prices.

- . IN CHINA, the economy has not experienced much of a slow down, partly because an increase in consumer spending has provided an offset to the reduction in capital expenditure growth seen at the beginning of the year. An increase in interest rates by the Chinese central bank is in the cards.
- . IN EUROPE, companies are operating on high margins and return on assets, and have balance sheets that are as strong as they have been since the 1960's. High cash flow generation allows them to buy back shares or increase dividends at a higher than historical rate. While such actions may also signal a lack of opportunities to expand businesses, they provide good support for stock prices.

SWISS ECONOMIC NOTES

On September 16, the Swiss National Bank (SNB) increased the three-month LIBOR interest rate target range by 0.25 percentage points, from 0.00%-1.00% to 0.25%-1.25%. In so doing, the SNB indicated it intends to keep the rate in the middle of the target range (at 0.75%) for the time being.

Real gross domestic product (GDP) grew at 2%, year over year, in the second quarter, slightly better than the 1.6% rate of the first quarter.

2

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

The unemployment rate, after decreasing from 3.7% to 3.6% in July, rose again to 3.7% in August and remained at that level in September.

Forecasts are showing that the recovery is losing momentum. According to the latest study made by KOF (the Zurich-based economic research institute), the GDP growth rate is expected to be 1.6% for this year and 1.8% for next year. KOF forecasts a peak at the end of this year and the beginning of next year and another slowdown in 2006 with a growth rate of 1.5%. The main reason given is that the international recovery is expected to stay comparably weak and short-lived, a development that would have an immediate impact on Swiss exports. KOF believes that the growth of exports, which accounts for almost half of Swiss GDP, will probably weaken to 4.4% in 2005, after averaging 5.9% this year.

The ten-year spot interest rate on Confederation bonds decreased substantially during the third quarter. After reaching a peak of 2.9% in the middle of June, it finished at 2.6% at the end of September. Meanwhile, short-term interest rates (3-6 months) increased, resulting in a flattening of the yield curve similar to the situation in the U.S. and the United Kingdom.

SWISS MARKET REVIEW AND FUND PERFORMANCE

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30B-2

Overall this year the performance of the Swiss market has been subdued, with the Swiss Performance Index (SPI) showing a year-to-date return of 2.42%. After being among the best-performing European markets in the first half of this year, the Swiss market performed poorly in the third quarter. This was mainly due to the poor performance of large-capitalization stocks. Swiss mid-capitalization stocks, on the other hand, performed better with a 5.9% year-to-date return.

A substantial position in mid-capitalization stocks resulted in good performance for the Fund. The Fund's year-to-date return, as measured in Swiss francs, has been 4.81%, outperforming the SPI by 2.39%. In U.S. dollar terms the Fund's performance was 3.80%, reflecting the U.S. dollar's 0.97% appreciation against the Swiss franc.

Main themes of the Fund's strategy were investments in energy, commodity related stocks, emerging market players and high yield dividend stocks. The best performing sectors on the Swiss market year-to-date were Utility Suppliers (+26.2%, led by BKW FMB Energie AG's 34.0% increase), Construction (+25.7% led by Geberit AG's 62.9% increase and Holcim Ltd's. 19.2% increase), and Basic Resources (+25.1% led by Swiss Steel's 67.66% increase, benefiting from high commodity prices).

THE SWISS HELVETIA FUND, INC.

Letter to Stockholders (continued)

The Fund's cumulative performance continues to be superior to its Swiss peers and its benchmark. As of September 30, 2004, the Fund maintained an overall rating of four stars from Morningstar*. Past performance is no guarantee of future results.

*Morningstar is an independent fund performance monitor. Its ratings reflect historic risk-adjusted performance and may change monthly. Its ratings of one (low) and five (high) stars are based on a fund's three- and five-year average annual total returns with fee adjustments, and a risk factor that reflects fund performance relative to three-month Treasury Bill monthly returns. Only 33% of the funds in an investment category are awarded four or five stars. As of September 30, 2004, there were 10 funds in the Fund's asset category rated by Morningstar.

OUTLOOK / STRATEGY

We continue to emphasize the potential impact of downside earnings revisions as a major risk for the markets. In that regard, we continue to adopt a cautious approach towards growth stocks in light of the slowing down of the global economy and the already very low interest rates. Management is looking for a healthy supply and demand structure as a driver of a sustainable return on assets and equity. In our view, a strong market position and sparse capacity are determining factors of stable margins and growing cash flow with the potential for dividend increases.

STOCK REPURCHASE PROGRAM

Pursuant to authorization by the Board, the Fund began open market purchases of its common stock on the New York Stock Exchange in 1999 and has continued purchases in each subsequent year. The principal purpose of the stock repurchase program is to enhance stockholder value by increasing the Fund's net asset value per share without creating a meaningful adverse effect upon the Fund's expense ratio and without realizing capital gains in order to fund the repurchases. The Board has authorized the purchase of up to 500,000 shares in 2004. For the nine months ended September 30, 2004, the Fund repurchased and retired 135,000 shares at an average price of \$12.87 per share (including brokerage commissions) and a weighted average discount of 17.52%. These repurchases, which had a total cost of \$1,738,016, resulted in an increase of \$375,388 to the Fund's net asset value.

THE SWISS HELVETIA FUND, INC.

Dividend Reinvestment Plan (Unaudited)

The Plan

The Fund's Dividend Reinvestment Plan (the "Plan") offers a convenient way for you to reinvest your capital gains distributions and ordinary income dividends

Edgar Filing: SWISS HELVETIA FUND INC - Form N-30B-2

in additional shares of the Fund.

Some of the Plan features are:

- . Once you enroll in the Plan, all of your future distributions and dividends payable in whole or in part in cash will be automatically reinvested in Fund shares.
- . You will receive shares valued at the lower of the Fund's net asset value or the Fund's market price as described below. The entire amount of your distribution or dividend will be reinvested automatically in additional Fund shares. For any balance that is insufficient to purchase full shares of the Fund, your account will be credited with fractional shares.
- . Your shares will be held in an account with the Plan agent. You will be sent regular statements for your records.
- . You may terminate participation in the Plan at any time.

The following are answers to frequently asked questions about the Plan.

How do I enroll in the Plan?

If you are holding certificates for your shares, contact American Stock Transfer & Trust Company (AST) at the address shown below. If your shares are held in a brokerage account, contact your broker. Not all brokerage firms permit their clients to participate in dividend reinvestment plans such as the Plan and, even if your brokerage firm does permit participation, you may not be able to transfer your Plan shares to another broker who does not permit participation. Your brokerage firm will be able to advise you about its policies.

How does the Plan work?

Any dividends or distributions you receive will be reinvested in shares of the Fund. The number of shares credited to your Plan account as a result of the reinvestment will depend upon the relationship between the Fund's market price and its net asset value per share on the record date of the distribution or dividend, as described below:

- . If the net asset value is greater than the market price (the Fund is trading at a discount), AST, as Plan Agent, will buy Fund shares for your account on the open market on the New York Stock Exchange or elsewhere. Your dividends or distributions will be reinvested at the average price AST pays for those purchases.
- . If the net asset value is equal to the market price (the Fund is trading at parity), the Fund will issue for your account new shares at net asset value.
- . If the net asset value is less than but within 95% of the market price (the Fund is trading at a premium of less than 5%), the Fund will issue for your account new shares at net asset value.
- . If the net asset value is less than 95% of the market price (the Fund is trading at a premium of 5% or more), the Fund will issue for your account new shares at 95% of the market price.

If AST begins to buy Fund shares for your account at a discount to net asset value but, during the course of the purchases, the Fund's market

purchases, even though the result may be that the average price paid for the purchases exceeds net asset value.

Will the entire amount of my distribution or dividend be reinvested?
The entire amount of your distribution or dividend will be reinvested in additional Fund shares. If a balance remains after the purchase of whole shares, your account will be credited with any fractional shares (rounded to three decimal places) necessary to complete the reinvestment.

How can I sell my shares?
You can sell any or all of the shares in your Plan account by contacting AST. AST charges \$15 for the transaction plus \$.10 per share for this service. You can also withdraw your shares from your Plan account and sell them through your broker.

Does participation in the Plan change the tax status of my distributions or dividends?
No. The distributions and dividends are paid in cash and their taxability is the same as if you received the cash. It is only after the payment of distributions and dividends that AST reinvests the cash for your account.

Can I get certificates for the shares in the Plan?
AST will issue certificates for whole shares upon your request. Certificates for fractional shares will not be issued.

Is there any charge to participate in the Plan?
There is no charge to participate in the Plan. You will, however, pay a pro rata share of brokerage commissions incurred with respect to AST's open market purchases of shares for your Plan account.

How can I discontinue my participation in the Plan?
Contact your broker or AST in writing. If your shares are in a Plan account, AST will send you a certificate for your whole shares and a check for any fractional shares.

Where can I direct my questions and correspondence?
Contact your broker, or contact AST as follows:

By mail:
American Stock Transfer & Trust Company
PO Box 922
Wall Street Station
New York, NY 10269-0560

Through the Internet:
www.amstock.com
