Item 2.05. Costs Associated with Exit or Disposal Activities.

On November 15, 2018, Green Plains Inc. (the “Company”) announced that it is permanently closing its Hopewell, Va. ethanol facility due to the declining margin environment in the industry which did not support the continued operation of this destination location. A significant portion of the 60 million gallon a year capacity plant will be dismantled during the decommissioning process, with a significant portion of the equipment being transferred to other Green Plains facilities. The Company is currently determining the best uses for any remaining equipment and the land.

The closure results in a workforce reduction of approximately 31 employees who will be provided severance and healthcare support. The decommissioning of the plant is expected to take 12 to 18 months.

Subject to finalization of certain estimates, the Company does not expect to record material charges associated with the Hopewell closure for one-time employee separation benefits, other costs related to the closing or potential impairment of plant-related assets. Future cash expenditures related to the closing are not expected to be material and relate to equipment dismantling and transfer costs and employee separation benefits.

The closure of the Hopewell plant does not change the quarterly minimum volume commitment associated with the ethanol storage and throughput agreement between Green Plains Inc. and Green Plains Partners LP.

Item 7.01. Regulation FD Disclosure.

On November 15, 2018, the Company issued a press release announcing the closure. The press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits. The following exhibit is filed as part of this report.
