GLOSSARY OF TERMS

As commonly used in the oil and natural gas industry and as used in this Quarterly Report on Form 10-Q, the following terms have the following meanings:

Bbl. One stock tank barrel or 42 United States gallons liquid volume.

Bcf. One billion cubic feet.

Bcfe. One billion cubic feet equivalent, determined using a ratio of six Mcf of natural gas to one Bbl of oil, condensate or natural gas liquids.

Btu. One British thermal unit, which is the heat required to raise the temperature of a one-pound mass of water from 58.5 degrees to 59.5 degrees Fahrenheit.

MBbls. One thousand barrels of oil or other liquid hydrocarbons.

MBbls/d. MBbls per day.

Mcf. One thousand cubic feet.

Mcfe. One thousand cubic feet equivalent, determined using the ratio of six Mcf of natural gas to one Bbl of oil, condensate or natural gas liquids.

MMBbls. One million barrels of oil or other liquid hydrocarbons.

MMBoe. One million barrels of oil equivalent, determined using a ratio of one Bbl of oil, condensate or natural gas liquids to six Mcf.

MMBtu. One million British thermal units.

MMcf. One million cubic feet.

MMcf/d. MMcf per day.

MMcfe. One million cubic feet equivalent, determined using a ratio of six Mcf of natural gas to one Bbl of oil, condensate or natural gas liquids.

MMcfe/d. MMcfe per day.

MMMBtu. One billion British thermal units.

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1 – Basis of Presentation

Nature of Business

Linn Energy, LLC (“LINN Energy” or the “Company”) is an independent oil and natural gas company. LINN Energy’s mission is to acquire, develop and maximize cash flow from a growing portfolio of long-life oil and natural gas assets. The Company’s properties are located in the United States (“U.S.”), in the Mid-Continent, the Hugoton Basin, the Green River Basin, the Permian Basin, the Williston/Powder River Basin, Michigan, Illinois, California and east Texas.

Principles of Consolidation and Reporting

The condensed consolidated financial statements at September 30, 2013, and for the three months and nine months ended September 30, 2013, and September 30, 2012, are unaudited, but in the opinion of management include all adjustments (consisting of normal recurring adjustments) necessary for a fair presentation of the results for the interim periods. Certain information and note disclosures normally included in annual financial statements prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) have been condensed or omitted under Securities and Exchange Commission (“SEC”) rules and regulations; as such, this report should be read in conjunction with the financial statements and notes in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012. The results reported in these unaudited condensed consolidated financial statements should not necessarily be taken as indicative of results that may be expected for the entire year.

The condensed consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany transactions and balances have been eliminated upon consolidation.

Investments in noncontrolled entities over which the Company exercises significant influence are accounted for under the equity method. The Company’s other investment is accounted for at cost.

The condensed consolidated financial statements for previous periods include certain reclassifications that were made to conform to current presentation. Such reclassifications have no impact on previously reported net income (loss), unitholders’ capital or cash flows.

Use of Estimates

The preparation of the accompanying condensed consolidated financial statements in conformity with GAAP requires Company management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amount of assets and liabilities reported, disclosures about contingent assets and liabilities, and reported amounts of revenues and expenses. The estimates that are particularly significant to the financial statements include estimates of the Company’s reserves of oil, natural gas and natural gas liquids (“NGL”), future cash flows from oil and natural gas properties, depreciation, depletion and amortization, asset retirement obligations, certain revenues and operating expenses, fair values of commodity derivatives and fair values of assets acquired and liabilities assumed. As fair value is a market-based measurement, it is determined based on the assumptions that market participants would use. These estimates and assumptions are based on management’s best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ from these estimates. Any changes in estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods.

Recently Issued Accounting Standards

In December 2011, the Financial Accounting Standards Board issued an Accounting Standards Update (“ASU”) that requires an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. The ASU requires disclosure of both gross information and net information about both instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting arrangement. The ASU is to be applied retrospectively and is effective for periods beginning on or after January 1, 2013. The

Company adopted the ASU effective January 1, 2013. The adoption of the requirements of the ASU, which expanded disclosures, had no effect on the Company's financial position.

Table of Contents

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS – Continued

(Unaudited)

Note 2 – Acquisitions, Joint-Venture Funding and Divestiture

For the nine months ended September 30, 2013, the Company paid approximately \$114 million, including interest, towards the future funding commitment related to the joint-venture agreement it entered into with an affiliate of Anadarko Petroleum Corporation (“Anadarko”) in April 2012. From inception of the agreement through September 30, 2013, the Company has funded approximately \$315 million towards the total commitment of \$400 million.

During the nine months ended September 30, 2013, the Company completed small acquisitions of oil and natural gas properties located in its various operating regions. The Company, in the aggregate, paid approximately \$32 million in total consideration for these properties.

Acquisitions – Pending

On September 11, 2013, the Company entered into a definitive purchase and sale agreement to acquire certain oil and natural gas properties located in the Permian Basin for a contract price of approximately \$525 million. The Company paid a deposit of approximately \$53 million in September 2013, which is reported in “other noncurrent assets” on the condensed consolidated balance sheet at September 30, 2013. The Company anticipates the acquisition will close on or before October 31, 2013, subject to closing conditions, and will be financed with proceeds from a committed term loan to be entered into at closing and borrowings under the Company’s Credit Facility, as defined in Note 6.

On February 20, 2013, LinnCo, LLC (“LinnCo”), an affiliate of LINN Energy, and Berry Petroleum Company (“Berry”) entered into a definitive merger agreement under which LinnCo would acquire all of the outstanding common shares of Berry. Under the terms of the agreement, Berry’s shareholders will receive 1.25 LinnCo common shares for each Berry common share they own. This transaction, which is expected to be a tax-free exchange to Berry’s shareholders, represents value of \$46.2375 per common share, based on the closing price of LinnCo common shares on February 20, 2013, the last trading day before the public announcement.

In connection with the proposed transaction described above, LinnCo will contribute Berry to LINN Energy in exchange for newly issued LINN Energy units, after which Berry will be an indirect wholly owned subsidiary of LINN Energy. At February 21, 2013, the date of the public announcement, the transaction had a preliminary value of approximately \$4.4 billion, including the assumption of approximately \$1.7 billion of Berry’s debt. The transaction is subject to approvals by Berry and LinnCo shareholders, LINN Energy unitholders and regulatory agencies. Due to the pending SEC inquiry (see Note 16), the timing of closing this proposed transaction is uncertain.

Acquisitions – 2012

On July 31, 2012, the Company completed the acquisition of certain oil and natural gas properties in the Jonah Field located in the Green River Basin of southwest Wyoming from BP America Production Company (“BP”). The results of operations of these properties have been included in the condensed consolidated financial statements since the acquisition date. The Company paid approximately \$990 million in total consideration for these properties. The transaction was financed with borrowings under the Company’s Credit Facility.

On May 1, 2012, the Company completed the acquisition of certain oil and natural gas properties located in east Texas. The results of operations of these properties have been included in the condensed consolidated financial statements since the acquisition date. The Company paid approximately \$168 million in total consideration for these properties. The transaction was financed primarily with borrowings under the Company’s Credit Facility.

On April 3, 2012, the Company entered into a joint-venture agreement (“Agreement”) with Anadarko whereby the Company will participate as a partner in the CO₂ enhanced oil recovery development of the Salt Creek field, located in the Powder River Basin of Wyoming. Anadarko assigned the Company 23% of its interest in the field in exchange for future funding of \$400 million of Anadarko’s development costs. The results of operations of these properties have been included in the condensed consolidated financial statements since the Agreement date.

On March 30, 2012, the Company completed the acquisition of certain oil and natural gas properties and the Jayhawk natural gas processing plant located in the Hugoton Basin in Kansas from BP. The results of operations of these properties have been

Table of Contents

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS – Continued

(Unaudited)

included in the condensed consolidated financial statements since the acquisition date. The Company paid approximately \$1.16 billion in total consideration for these properties. The transaction was financed primarily with proceeds from the March 2012 debt offering (see Note 6).

Divestiture – 2013

On May 31, 2013, the Company, through one of its wholly owned subsidiaries, together with the Company's partners, Panther Energy, LLC and Red Willow Mid-Continent, LLC, completed the sale of its interests in certain oil and natural gas properties located in the Mid-Continent region ("Panther Properties") to Midstates Petroleum Company, Inc. At March 31, 2013, the carrying value of the Panther Properties was reduced to fair value less costs to sell resulting in an impairment charge of approximately \$57 million and the properties were classified as "assets held for sale." During the three months ended June 30, 2013, and September 30, 2013, the Company recorded adjustments of approximately \$15 million and \$4 million, respectively, to reduce the initial impairment charge recorded in March 2013 resulting in a total impairment charge of approximately \$38 million for the nine months ended September 30, 2013. Proceeds received for the Company's portion of its interests in the properties were approximately \$219 million, net of costs to sell of approximately \$2 million. The Company used the net proceeds from the sale to repay borrowings under its Credit Facility.

Note 3 – Unitholders' Capital

Public Offering of Units

In January 2012, the Company sold 19,550,000 units representing limited liability company interests at \$35.95 per unit (\$34.512 per unit, net of underwriting discount) for net proceeds of approximately \$674 million (after underwriting discount and offering expenses of approximately \$28 million). The Company used the net proceeds from the sale of these units to repay a portion of the outstanding indebtedness under its Credit Facility.

Equity Distribution Agreement

The Company has an equity distribution agreement pursuant to which it may from time to time issue and sell units representing limited liability company interests having an aggregate offering price of up to \$500 million. Sales of units, if any, will be made through a sales agent by means of ordinary brokers' transactions, in block transactions, or as otherwise agreed with the agent. The Company expects to use the net proceeds from any sale of the units for general corporate purposes, which may include, among other things, capital expenditures, acquisitions and the repayment of debt.

In January 2012, the Company, under its equity distribution agreement, issued and sold 1,539,651 units representing limited liability company interests at an average unit price of \$38.02 for proceeds of approximately \$57 million (net of approximately \$2 million in commissions and professional service expenses). The Company used the net proceeds for general corporate purposes, including the repayment of a portion of the indebtedness outstanding under its Credit Facility. At September 30, 2013, units equaling approximately \$411 million in aggregate offering price remained available to be issued and sold under the agreement.

Distributions

Under the Company's limited liability company agreement, unitholders are entitled to receive a distribution of available cash, which includes cash on hand plus borrowings less any reserves established by the Company's Board of Directors to provide for the proper conduct of the Company's business (including reserves for future capital expenditures, including drilling, acquisitions and anticipated future credit needs) or to fund distributions over the next four quarters. Distributions paid by the Company are presented on the condensed consolidated statement of unitholders' capital and the condensed consolidated statements of cash flows. In April 2013, the Company's Board of Directors approved a change in its distribution policy that provides a distribution with respect to any quarter may be made, at the discretion of the Board of Directors, (i) within 45 days following the end of each quarter or (ii) in three equal installments within 15, 45 and 75 days following the end of each quarter. On October 1, 2013, the Company's Board of Directors declared a cash distribution of \$0.725 per unit with respect to the third quarter of 2013, to be paid in three equal monthly installments of \$0.2416 per unit. The first monthly distribution with respect to the third quarter

of 2013, totaling approximately \$57 million, was paid on October 17, 2013, to unitholders of record as of the close of business on October 11, 2013.

Note 6 – Debt

The following summarizes debt outstanding:

	September 30, 2013		December 31, 2012	
	Carrying Value	Fair Value ⁽¹⁾	Carrying Value	Fair Value ⁽¹⁾
	(in millions, except percentages)			
Credit facility ⁽²⁾	\$1,705	\$1,705	\$1,180	\$1,180
11.75% senior notes due 2017	—	—	41	44
9.875% senior notes due 2018	—	—	14	15
6.50% senior notes due May 2019	750	717	750	755
6.25% senior notes due November 2019	1,800	1,692	1,800	1,802
8.625% senior notes due 2020	1,300	1,347	1,300	1,414
7.75% senior notes due 2021	1,000	1,001	1,000	1,061
Less current maturities	—	—	—	—
	6,555	\$6,462	6,085	\$6,271
Unamortized discount	(42)	(47)
Total debt, net of discount	\$6,513		\$6,038	

(1) The carrying value of the Credit Facility is estimated to be substantially the same as its fair value. Fair values of the senior notes were estimated based on prices quoted from third-party financial institutions.

(2) Variable interest rates of 1.93% and 1.97% at September 30, 2013, and December 31, 2012, respectively.

Credit Facility

In April 2013, the Company entered into a Sixth Amended and Restated Credit Agreement (“Credit Facility”), which provides for a revolving credit facility up to the lesser of: (i) the then-effective borrowing base and (ii) the maximum commitment amount of \$4.0 billion. The borrowing base remained unchanged at \$4.5 billion and does not include any assets to be acquired in the pending transaction with Berry (see Note 2). The maturity date is April 2018. The amended and restated agreement is substantially similar to the previous Credit Facility with revisions to permit the transactions related to the acquisition of Berry and to designate Berry as an unrestricted subsidiary under the agreement. At September 30, 2013, the borrowing capacity under the Credit Facility was approximately \$2.3 billion, which includes a \$5 million reduction in availability for outstanding letters of credit.

Redetermination of the borrowing base under the Credit Facility, based primarily on reserve reports that reflect commodity prices at such time, occurs semi-annually, in April and October, as well as once annually upon requested interim redetermination by the lenders at their sole discretion. The Company also has the right to request one additional borrowing base redetermination per year at its discretion, as well as the right to an additional redetermination each year in connection with certain acquisitions. Significant declines in commodity prices may result in a decrease in the borrowing base. The Company’s obligations under the Credit Facility are secured by mortgages on its and certain of its material subsidiaries’ oil and natural gas properties and other personal property as well as a pledge of all ownership interests in its direct and indirect material subsidiaries. The Company is required to maintain either: 1) mortgages on properties representing at least 80% of the total value of oil and natural gas properties included on the most recent reserve report, or 2) a Collateral Coverage Ratio of at least 2.5 to 1. Collateral Coverage Ratio is defined as the ratio of the present value of future cash flows from proved reserves from the currently mortgaged properties to the lesser of: (i) the then-effective borrowing base and (ii) the maximum commitment amount. Additionally, the obligations under the Credit Facility are guaranteed by all of the Company’s material subsidiaries and are required to be guaranteed by any future material subsidiaries.

At the Company’s election, interest on borrowings under the Credit Facility is determined by reference to either the London Interbank Offered Rate (“LIBOR”) plus an applicable margin between 1.5% and 2.5% per annum (depending on the then-current level of borrowings under the Credit Facility) or the alternate base rate (“ABR”) plus an applicable

margin between 0.5% and 1.5% per annum (depending on the then-current level of borrowings under the Credit Facility). Interest is generally

9

Table of Contents

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS – Continued

(Unaudited)

payable quarterly for loans bearing interest based on the ABR and at the end of the applicable interest period for loans bearing interest at LIBOR. The Company is required to pay a commitment fee to the lenders under the Credit Facility, which accrues at a rate per annum between 0.375% and 0.5% on the average daily unused amount of the lesser of: (i) the maximum commitment amount of the lenders and (ii) the then-effective borrowing base. The Company is in compliance with all financial and other covenants of the Credit Facility.

Senior Notes Due November 2019

On March 2, 2012, the Company issued \$1.8 billion in aggregate principal amount of 6.25% senior notes due November 2019 (“November 2019 Senior Notes”) at a price of 99.989%. The November 2019 Senior Notes were sold to a group of initial purchasers and then resold to qualified institutional buyers, each in transactions exempt from the registration requirements of the Securities Act of 1933, as amended (the “Securities Act”). The Company received net proceeds of approximately \$1.77 billion (after deducting the initial purchasers’ discount of \$198,000 and offering expenses of approximately \$29 million). The Company used the net proceeds to fund the BP acquisition (see Note 2). The remaining proceeds were used to repay indebtedness under the Company’s Credit Facility and for general corporate purposes. The financing fees and expenses of approximately \$29 million incurred in connection with the November 2019 Senior Notes will be amortized over the life of the notes. Such amortized financing fees and expenses are recorded in “interest expense, net of amounts capitalized” on the condensed consolidated statements of operations. The November 2019 Senior Notes were issued under an indenture dated March 2, 2012 (“November 2019 Indenture”), mature November 1, 2019, and bear interest at 6.25%. Interest is payable semi-annually on May 1 and November 1, beginning November 1, 2012. The November 2019 Senior Notes are general unsecured senior obligations of the Company and are effectively junior in right of payment to any secured indebtedness of the Company to the extent of the collateral securing such indebtedness. Each of the Company’s material subsidiaries has guaranteed the November 2019 Senior Notes on a senior unsecured basis. The November 2019 Indenture provides that the Company may redeem: (i) on or prior to November 1, 2015, up to 35% of the aggregate principal amount of the November 2019 Senior Notes at a redemption price of 106.25% of the principal amount redeemed, plus accrued and unpaid interest, with the net cash proceeds of one or more equity offerings; (ii) prior to November 1, 2015, all or part of the November 2019 Senior Notes at a redemption price equal to the principal amount redeemed, plus a make-whole premium (as defined in the November 2019 Indenture) and accrued and unpaid interest; and (iii) on or after November 1, 2015, all or part of the November 2019 Senior Notes at a redemption price equal to 103.125%, and decreasing percentages thereafter, of the principal amount redeemed, plus accrued and unpaid interest. The November 2019 Indenture also provides that, if a change of control (as defined in the November 2019 Indenture) occurs, the holders have a right to require the Company to repurchase all or part of the November 2019 Senior Notes at a redemption price equal to 101%, plus accrued and unpaid interest.

The November 2019 Indenture contains covenants substantially similar to those under the Company’s May 2019 Senior Notes, 2010 Issued Senior Notes and 2018 Senior Notes, as defined below, that, among other things, limit the Company’s ability to: (i) pay distributions on, purchase or redeem the Company’s units or redeem its subordinated debt; (ii) make investments; (iii) incur or guarantee additional indebtedness or issue certain types of equity securities; (iv) create certain liens; (v) sell assets; (vi) consolidate, merge or transfer all or substantially all of the Company’s assets; (vii) enter into agreements that restrict distributions or other payments from the Company’s restricted subsidiaries to the Company; (viii) engage in transactions with affiliates; and (ix) create unrestricted subsidiaries. The Company is in compliance with all financial and other covenants of the November 2019 Senior Notes.

In connection with the issuance and sale of the November 2019 Senior Notes, the Company entered into a Registration Rights Agreement (“November 2019 Registration Rights Agreement”) with the initial purchasers. Under the November 2019 Registration Rights Agreement, the Company agreed to use its reasonable efforts to file with the SEC and cause to become effective a registration statement relating to an offer to issue new notes having terms substantially identical to the November 2019 Senior Notes in exchange for outstanding November 2019 Senior Notes within 400 days after the notes were issued. On March 22, 2013, the Company filed a registration statement on Form S-4 to register

exchange notes that are substantially similar to the November 2019 Senior Notes. As of October 28, 2013, the registration statement has not been declared effective and due to the pending SEC inquiry (see Note 16), the timing for the registration statement to be declared effective is uncertain. Accordingly, beginning on April 8, 2013, interest accruing on the November 2019 Senior Notes increased by 0.25%, and will increase by an additional 0.25% on the 90th, 180th and 270th day after such date until such registration statement is declared effective and the Company completes an offer to exchange the November 2019 Senior Notes for registered notes. Such

Table of Contents

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS – Continued

(Unaudited)

additional interest is expected to be approximately \$7 million through December 2013 and will continue to increase until the registration statement is declared effective.

Senior Notes Due May 2019

The Company has \$750 million in aggregate principal amount of 6.50% senior notes due 2019 (the “May 2019 Senior Notes”). The indentures related to the May 2019 Senior Notes contain redemption provisions and covenants that are substantially similar to those of the November 2019 Senior Notes. In an exchange offer that expired in October 2012, the Company exchanged all of its \$750 million outstanding principal amount of May 2019 Senior Notes for an equal amount of new May 2019 Senior Notes. The terms of the new May 2019 Senior Notes are identical in all material respects to those of the outstanding May 2019 Senior Notes, except that the transfer restrictions, registration rights and additional interest provisions relating to the outstanding May 2019 Senior Notes do not apply to the new May 2019 Senior Notes.

Senior Notes Due 2020 and Senior Notes Due 2021

The Company has \$1.3 billion in aggregate principal amount of 8.625% senior notes due 2020 (the “2020 Senior Notes”) and \$1.0 billion in aggregate principal amount of 7.75% senior notes due 2021 (the “2021 Senior Notes,” and together with the 2020 Senior Notes, the “2010 Issued Senior Notes”). The indentures related to the 2010 Issued Senior Notes contain redemption provisions and covenants that are substantially similar to those of the November 2019 Senior Notes. However, the restrictive legends from each of the 2010 Issued Senior Notes have been removed making them freely tradable (other than with respect to persons that are affiliates of the Company), thereby terminating the Company’s obligations under each of the registration rights agreements entered into in connection with the issuance of the 2010 Issued Senior Notes.

Redemptions of Senior Notes Due 2017 and Senior Notes Due 2018

In accordance with the provisions of the indentures related to the Company’s 11.75% senior notes due 2017 (the “2017 Senior Notes”) and 9.875% senior notes due 2018 (the “2018 Senior Notes” and together with the 2017 Senior Notes, the “Original Senior Notes”), in June 2013 and July 2013, the Company redeemed the remaining outstanding principal amounts of approximately \$41 million and \$14 million, respectively. In connection with the redemptions of the Original Senior Notes, the Company recorded a loss on extinguishment of debt of approximately \$5 million for the nine months ended September 30, 2013.

Note 7 – Derivatives

Commodity Derivatives

The Company utilizes derivative instruments to minimize the variability in cash flow due to commodity price movements. The Company has historically entered into derivative instruments such as swap contracts, put options and collars to economically hedge its forecasted oil, natural gas and NGL sales. The Company did not designate any of these contracts as cash flow hedges; therefore, the changes in fair value of these instruments are recorded in current earnings. See Note 8 for fair value disclosures about oil and natural gas commodity derivatives.

Table of Contents

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS – Continued

(Unaudited)

Includes certain outstanding natural gas put options of approximately 2,664 MMBtu for the period October 1, 2013, through December 31, 2013, 10,570 MMBtu for each of the years ending December 31, 2014, and December 31, 2015, and 10,599 MMBtu for the year ending December 31, 2016, used to indirectly hedge revenues associated with NGL production.

Includes certain outstanding fixed price oil swaps of approximately 5,384 MBbls which may be extended annually at a price of \$100.00 per Bbl for each of the years ending December 31, 2017, and December 31, 2018, and \$90.00 per Bbl for the year ending December 31, 2019, if the counterparties determine that the strike prices are in-the-money on a designated date in each respective preceding year. The extension for each year is exercisable without respect to the other years.

Settle on the respective pricing index to hedge basis differential associated with natural gas and oil production.

The Company hedges the timing risk associated with the sales price of oil in the Mid-Continent, Hugoton Basin and Permian Basin regions. In these regions, the Company generally sells oil for the delivery month at a sales price based on the average NYMEX price of light crude oil during that month, plus an adjustment calculated as a spread between the weighted average prices of the delivery month, the next month and the following month during the period when the delivery month is prompt (the “trade month roll”).

During the nine months ended September 30, 2013, the Company entered into commodity derivative contracts consisting of oil basis swaps for April 2013 through December 2013 and natural gas basis swaps for October 2013 through 2018.

Settled derivatives on natural gas production for the three months and nine months ended September 30, 2013, included volumes of 43,729 MMBtu and 129,760 MMBtu, respectively, at an average contract price of \$5.29 per MMBtu. Settled derivatives on oil production for the three months and nine months ended September 30, 2013, included volumes of 3,775 MBbls and 11,201 MBbls, respectively, at an average contract price of \$95.57 per Bbl. Settled derivatives on natural gas production for the three months and nine months ended September 30, 2012, included volumes of 40,202 MMBtu and 98,282 MMBtu, respectively, at average contract prices of \$5.31 per MMBtu and \$5.49 per MMBtu. Settled derivatives on oil production for the three months and nine months ended September 30, 2012, included volumes of 2,951 MBbls and 8,259 MBbls, respectively, at average contract prices of \$97.44 per Bbl and \$97.80 per Bbl. The natural gas derivatives are settled based on the closing price of NYMEX natural gas on the last trading day for the delivery month, which occurs on the third business day preceding the delivery month, or the relevant index prices of natural gas published in Inside FERC’s Gas Market Report on the first business day of the delivery month. The oil derivatives are settled based on the average closing price of NYMEX light crude oil for each day of the delivery month.

Balance Sheet Presentation

The Company’s commodity derivatives are presented on a net basis in “derivative instruments” on the condensed consolidated balance sheets. The following summarizes the fair value of derivatives outstanding on a gross basis:

	September 30, 2013	December 31, 2012
	(in thousands)	
Assets:		
Commodity derivatives	\$1,073,942	\$1,282,390
Liabilities:		
Commodity derivatives	\$233,107	\$405,619

By using derivative instruments to economically hedge exposures to changes in commodity prices, the Company exposes itself to credit risk and market risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates credit risk. The Company’s counterparties are current participants or affiliates of participants in its Credit Facility or were participants or affiliates of participants in its Credit Facility at the time it originally entered into the

derivatives. The Credit Facility is secured by the Company's oil and natural gas reserves; therefore, the Company is not required to post any collateral. The Company does not receive collateral from its counterparties. The maximum amount of loss due to credit risk that the Company would incur if its counterparties failed completely to perform according to the terms of the contracts, based on the gross fair value of financial instruments, was approximately \$1.1 billion at September 30, 2013. The Company minimizes the credit risk in derivative instruments by: (i) limiting its exposure to any single counterparty; (ii) entering into derivative instruments only with counterparties that meet the Company's minimum credit quality standard, or have a guarantee from an affiliate that meets the Company's minimum credit quality standard; and (iii) monitoring the creditworthiness of the Company's counterparties on an

Table of Contents

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS – Continued

(Unaudited)

ongoing basis. In accordance with the Company's standard practice, its commodity derivatives are subject to counterparty netting under agreements governing such derivatives and therefore the risk of loss is somewhat mitigated.

Gains (Losses) on Derivatives

Gains and losses on derivatives were net losses of approximately \$64 million for the three months ended September 30, 2013, and net gains of approximately \$154 million for the nine months ended September 30, 2013. Gains and losses on derivatives were net losses of approximately \$411 million for the three months ended September 30, 2012, and net gains of approximately \$30 million for the nine months ended September 30, 2012. Gains and losses are reported on the condensed consolidated statements of operations in "gains (losses) on oil and natural gas derivatives."

Note 8 – Fair Value Measurements on a Recurring Basis

The Company accounts for its commodity derivatives at fair value (see Note 7) on a recurring basis. The Company determines the fair value of its oil and natural gas derivatives utilizing pricing models that use a variety of techniques, including market quotes and pricing analysis. Inputs to the pricing models include publicly available prices and forward price curves generated from a compilation of data gathered from third parties. Company management validates the data provided by third parties by understanding the pricing models used, obtaining market values from other pricing sources, analyzing pricing data in certain situations and confirming that those securities trade in active markets. Assumed credit risk adjustments, based on published credit ratings, public bond yield spreads and credit default swap spreads, are applied to the Company's commodity derivatives.

The following presents the fair value hierarchy for assets and liabilities measured at fair value on a recurring basis:

	September 30, 2013		
	Level 2	Netting ⁽¹⁾	Total
	(in thousands)		
Assets:			
Commodity derivatives	\$1,073,942	\$(220,643)) \$853,299
Liabilities:			
Commodity derivatives	\$233,107	\$(220,643)) \$12,464
	December 31, 2012		
	Level 2	Netting ⁽¹⁾	Total
	(in thousands)		
Assets:			
Commodity derivatives	\$1,282,390	\$(401,479)) \$880,911
Liabilities:			
Commodity derivatives	\$405,619	\$(401,479)) \$4,140

⁽¹⁾ Represents counterparty netting under agreements governing such derivatives.

Note 9 – Asset Retirement Obligations

Asset retirement obligations associated with retiring tangible long-lived assets are recognized as a liability in the period in which a legal obligation is incurred and becomes determinable and are included in "other accrued liabilities" and "other noncurrent liabilities" on the condensed consolidated balance sheets. Accretion expense is included in "depreciation, depletion and amortization" on the condensed consolidated statements of operations. The fair value of additions to the asset retirement obligations is estimated using valuation techniques that convert future cash flows to a single discounted amount. Significant inputs to the valuation include estimates of: (i) plug and abandon costs per well based on existing regulatory requirements; (ii) remaining life per well; (iii) future inflation factors (2.0% for the nine months ended September 30, 2013); and (iv) a credit-adjusted risk-free interest rate (average of 6.4% for the nine months ended September 30, 2013). These inputs require significant judgments and estimates by the Company's management at the time of the valuation and are the most sensitive and subject to change.

Revision of estimates	20,287	
Asset retirement obligations at September 30, 2013	\$ 179,316	

Note 10 – Commitments and Contingencies

The Company has been named as a defendant in a number of lawsuits, including claims from royalty owners related to disputed royalty payments and royalty valuations. The Company has established reserves that management currently believes are adequate to provide for potential liabilities based upon its evaluation of these matters. With respect to a certain statewide class action royalty payment dispute, the parties in this case are currently engaged in settlement negotiations and based on the current status of those negotiations, the Company estimates a range of possible loss of \$1 million to \$4.5 million, for which an appropriate reserve has been established. For a certain statewide class action royalty payment dispute where a reserve has not yet been established, the Company has denied that it has any liability on the claims and has raised arguments and defenses that, if accepted by the court, will result in no loss to the Company. Discovery related to class certification has concluded. Briefing and the hearing on class certification have been deferred by court order pending the Tenth Circuit Court of Appeals' resolution of interlocutory appeals of two unrelated class certification orders. As a result, the Company is unable to estimate a possible loss, or range of possible loss, if any. In addition, the Company is involved in various other disputes arising in the ordinary course of business. The Company is not currently a party to any litigation or pending claims that it believes would have a material adverse effect on its overall business, financial position, results of operations or liquidity; however, cash flow could be significantly impacted in the reporting periods in which such matters are resolved.

On March 21, 2013, a purported stockholder class action captioned Nancy P. Assad Trust v. Berry Petroleum Co., et al. was filed in the District Court for the City and County of Denver, Colorado, No. 13-CV-31365. The action names as defendants Berry, the members of its board of directors, Bacchus HoldCo, Inc., a direct wholly owned subsidiary of Berry ("HoldCo"), Bacchus Merger Sub, Inc., a direct wholly owned subsidiary of HoldCo ("Bacchus Merger Sub"), LinnCo, LINN Energy and Linn Acquisition Company, LLC, a direct wholly owned subsidiary of LinnCo ("LinnCo Merger Sub"). On April 5, 2013, an amended complaint was filed, which alleges that the individual defendants breached their fiduciary duties in connection with the transactions by engaging in an unfair sales process that resulted in an unfair price for Berry, by failing to disclose all material information regarding the transactions, and that the entity defendants aided and abetted those breaches of fiduciary duty. The amended complaint seeks a declaration that the transactions are unlawful and unenforceable, an order directing the individual defendants to comply with their fiduciary duties, an injunction against consummation of the transactions, or, in the event they are completed, rescission of the transactions, an award of fees and costs, including attorneys' and experts' fees and expenses, and other relief. On May 21, 2013, the Colorado District Court stayed and administratively closed the Nancy P. Assad Trust action in favor of the Hall action described below that is pending in the Delaware Court of Chancery.

On April 12, 2013, a purported stockholder class action captioned David Hall v. Berry Petroleum Co., et al. was filed in the Delaware Court of Chancery, C.A. No. 8476-VCG. The complaint names as defendants Berry, the members of its board of directors, HoldCo, Bacchus Merger Sub, LinnCo, LINN Energy and LinnCo Merger Sub. The complaint alleges that the individual defendants breached their fiduciary duties in connection with the transactions by engaging in an unfair sales process that resulted in an unfair price for Berry, by failing to disclose all material information regarding the transactions, and that the entity defendants aided and abetted those breaches of fiduciary duty. The

complaint seeks a declaration that the transactions are unlawful and unenforceable, an order directing the individual defendants to comply with their fiduciary duties, an injunction against consummation of the transactions, or, in the event they are completed, rescission of the transactions, an award of fees and costs, including attorneys' and experts' fees and expenses, and other relief. The Company is unable to estimate a possible loss, or range of possible loss, if any, at this time.

LINN ENERGY, LLC

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS – Continued

(Unaudited)

On July 9, 2013, Anthony Booth, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of Texas, against LINN Energy, Mark E. Ellis, Kolja Rockov, and David B. Rottino (the “Booth Action”). On July 18, 2013, the Catherine A. Fisher Trust, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of Texas, against the same defendants (the “Fisher Action”). On July 17, 2013, Don Gentry, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of Texas, against LINN Energy, LinnCo, Mark E. Ellis, Kolja Rockov, David B. Rottino, George A. Alcorn, David D. Dunlap, Terrence S. Jacobs, Michael C. Linn, Joseph P. McCoy, Jeffrey C. Swoveland, and the various underwriters for LinnCo’s initial public offering (the “Gentry Action”) (the Booth Action, Fisher Action, and Gentry Action together, the “Texas Federal Actions”). The Texas Federal Actions each assert claims under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 (the “Exchange Act”) based on allegations that LINN Energy made false or misleading statements relating to its hedging strategy, the cash flow available for distribution to unitholders, and LINN Energy’s energy production. The Gentry Action asserts additional claims under Sections 11 and 15 of the Securities Act of 1933 based on alleged misstatements relating to these issues in the prospectus and registration statement for LinnCo’s initial public offering. On September 23, 2013, the Southern District of Texas entered an order transferring the Texas Federal Actions to the Southern District of New York so that they could be consolidated with the New York Federal Actions, which are described below.

On July 10, 2013, David Adrian Luciano, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of New York, against LINN Energy, LinnCo, Mark E. Ellis, Kolja Rockov, David B. Rottino, George A. Alcorn, David D. Dunlap, Terrence S. Jacobs, Michael C. Linn, Joseph P. McCoy, Jeffrey C. Swoveland, and the various underwriters for LinnCo’s initial public offering (the “Luciano Action”). The Luciano Action asserts claims under Sections 11 and 15 of the Securities Act of 1933 based on alleged misstatements relating to LINN Energy’s hedging strategy, the cash flow available for distribution to unitholders, and LINN Energy’s energy production in the prospectus and registration statement for LinnCo’s initial public offering. On July 12, 2013, Frank Donio, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of New York, against LINN Energy, Mark E. Ellis, Kolja Rockov, and David B. Rottino (the “Donio Action”). The Donio Action asserts claims under Sections 10(b) and 20(a) of the Exchange Act based on allegations that LINN Energy made false or misleading statements relating to its hedging strategy, the cash flow available for distribution to unitholders, and LINN Energy’s energy production. Several additional class action cases substantially similar to the Luciano Action and the Donio Action were subsequently filed in the Southern District of New York and assigned to the same judge (the Luciano Action, Donio Action, and all similar subsequently filed New York federal class actions together, the “New York Federal Actions”). The Texas Federal Actions and the New York Federal Actions have now been consolidated in the United States District Court for the Southern District of New York. The cases are in their preliminary stages and it is possible that additional similar actions could be filed. As a result, the Company is unable to estimate a possible loss, or range of possible loss, if any.

On July 10, 2013, Judy Mesirov, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against Mark E. Ellis, Kolja Rockov, David B. Rottino, Arden L. Walker, Jr., Charlene A. Ripley, Michael C. Linn, Joseph P. McCoy, George A. Alcorn, Terrence S. Jacobs, David D. Dunlap, Jeffrey C. Swoveland, and Linda M. Stephens in the District Court of Harris County, Texas (the “Mesirov Action”). On July 12, 2013, John Peters, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants in the District Court of Harris County, Texas (the “Peters Action”). On August 26, 2013, Joseph Abdalla, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants in the District Court of Harris County, Texas (the “Abdalla Action”) (the Mesirov Action, Peters Action, and Abdalla Actions together, the “Texas State Court Derivative Actions”). On August 19, 2013, the Charlotte J. Lombardo Trust of 2004, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder

derivative petition against many of the same defendants in the United States District Court for the Southern District of Texas (the “Lombardo Action”). On September 30, 2013, the Thelma Feldman Rev. Trust, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants (the “Feldman Rev. Trust Action”). On October 21, 2013, the Parker Family Trust of 2012, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants (the “Parker Family Trust Action”) (the Lombardo Action, Feldman Rev. Trust Action, and Parker Family Trust Action together, the “Texas Federal Court Derivative Actions”) (the Texas State Court Derivative Action and Texas Federal Court Derivative Actions together, the “Texas Derivative Actions”). The Texas Derivative Actions assert derivative claims on behalf of LINN Energy against the individual defendants for alleged breaches of fiduciary duty, waste of corporate assets, mismanagement, abuse of control, and unjust enrichment based on factual allegations similar to those in the Texas Federal Actions and the New York Federal Actions. The cases are in their preliminary stages and it is possible that additional similar actions could be filed in

the District Court of Harris County, Texas, or in other jurisdictions. As a result, the Company is unable to estimate a possible loss, or range of possible loss, if any.

In 2008, Lehman Brothers Holdings Inc. and Lehman Brothers Commodity Services Inc. (together “Lehman”), filed voluntary petitions for reorganization under Chapter 11 of the U.S. Bankruptcy Code with the U.S. Bankruptcy Court for the Southern District of New York. In March 2011, the Company and Lehman entered into Termination Agreements under which the Company was granted general unsecured claims against Lehman in the amount of \$51 million (the “Company Claim”). In December 2011, a Chapter 11 Plan (“Lehman Plan”) was approved by the Bankruptcy Court. Based on the recovery estimates described in the approved disclosure statement relating to the Lehman Plan, the Company expects to ultimately receive a substantial portion of the Company Claim. In April 2012, an initial distribution under the Lehman Plan of approximately \$25 million was received by the Company resulting in a gain of approximately \$18 million, and in April 2013, the Company received approximately \$5 million of the Company Claim, both of which are included in “gains (losses) on oil and natural gas derivatives” on the condensed consolidated statements of operations. In the aggregate, the Company has received approximately \$33 million, including approximately \$3 million received in October 2012, of the Company Claim and additional distributions are expected to occur in the future.

Note 11 – Earnings Per Unit

Basic earnings per unit is computed by dividing net earnings attributable to unitholders by the weighted average number of units outstanding during each period. Diluted earnings per unit is computed by adjusting the average number of units outstanding for the dilutive effect, if any, of unit equivalents. The Company uses the treasury stock method to determine the dilutive effect.

Note 12 – Income Taxes

The Company is a limited liability company treated as a partnership for federal and state income tax purposes, with the exception of the state of Texas, in which income tax liabilities and/or benefits of the Company are passed through to its unitholders. Limited liability companies are subject to Texas margin tax. In addition, certain of the Company's subsidiaries are Subchapter C-corporations subject to federal and state income taxes. As such, with the exception of the state of Texas and certain subsidiaries, the Company is not a taxable entity, it does not directly pay federal and state income taxes and recognition has not been given to federal and state income taxes for the operations of the Company. Amounts recognized for income taxes are reported in "income tax expense (benefit)" on the condensed consolidated statements of operations.

Note 13 – Supplemental Disclosures to the Condensed Consolidated Balance Sheets and Condensed Consolidated Statements of Cash Flows

"Other accrued liabilities" reported on the condensed consolidated balance sheets include the following:

	September 30, 2013	December 31, 2012
	(in thousands)	
Accrued compensation	\$24,931	\$35,431
Accrued interest	124,029	72,668
Other	7,178	7,146
	\$156,138	\$115,245

Supplemental disclosures to the condensed consolidated statements of cash flows are presented below:

	Nine Months Ended September 30,	
	2013	2012
	(in thousands)	
Cash payments for interest, net of amounts capitalized	\$240,261	\$178,194
Cash payments for income taxes	\$14	\$306

Noncash investing activities:

In connection with the acquisition of oil and natural gas properties and joint-venture funding, assets were acquired and liabilities were assumed as follows:

Fair value of assets acquired	\$47,901	\$2,854,410
Cash paid	(28,524) (2,487,767)
Receivables from sellers	3,654	772
Payables to sellers	(6,854) (422)
Liabilities assumed	\$16,177	\$366,993

Included in "acquisition of oil and natural gas properties and joint-venture funding" on the condensed consolidated statements of cash flows for the nine months ended September 30, 2013, is approximately \$112 million paid by the Company towards the future funding commitment related to the joint-venture agreement entered into with Anadarko and a deposit of approximately \$53 million paid by the Company for the acquisition in the Permian Basin region that is pending at September 30, 2013 (see Note 2).

For purposes of the condensed consolidated statements of cash flows, the Company considers all highly liquid short-term investments with original maturities of three months or less to be cash equivalents. Restricted cash of approximately \$5 million is included in "other noncurrent assets" on the condensed consolidated balance sheets at September 30, 2013, and

December 31, 2012, and represents cash deposited by the Company into a separate account and designated for asset retirement obligations in accordance with contractual agreements.

The Company manages its working capital and cash requirements to borrow only as needed from its Credit Facility. At December 31, 2012, net outstanding checks of approximately \$35 million were reclassified and included in “accounts payable and accrued expenses” on the condensed consolidated balance sheet. There was no such balance at September 30, 2013. The Company presents net outstanding checks as cash flows from financing activities on the condensed consolidated statements of cash flows.

Note 14 – Related Party Transactions

LinnCo

LinnCo, an affiliate of LINN Energy, was formed on April 30, 2012, for the sole purpose of owning units in LINN Energy. In October 2012, LinnCo completed its IPO and used the net proceeds of approximately \$1.2 billion from the offering to acquire 34,787,500 of LINN Energy’s units which represent approximately 15% of LINN Energy’s outstanding units at September 30, 2013. All of LinnCo’s common shares are held by the public. As of September 30, 2013, LinnCo had no significant assets or operations other than those related to its interest in LINN Energy. In connection with the pending acquisition of Berry (see Note 2), LinnCo intends to amend its limited liability company agreement to permit the acquisition and subsequent contribution of assets to LINN Energy.

LINN Energy has agreed to provide to LinnCo, or to pay on LinnCo’s behalf, any legal, accounting, tax advisory, financial advisory and engineering fees, printing costs or other administrative and out-of-pocket expenses incurred by LinnCo, along with any other expenses incurred in connection with any public offering of shares in LinnCo or incurred as a result of being a publicly traded entity. These expenses include costs associated with annual, quarterly and other reports to holders of LinnCo shares, tax return and Form 1099 preparation and distribution, NASDAQ listing fees, printing costs, independent auditor fees and expenses, legal counsel fees and expenses, limited liability company governance and compliance expenses and registrar and transfer agent fees. In addition, the Company has agreed to indemnify LinnCo and its officers and directors for damages suffered or costs incurred (other than income taxes payable by LinnCo) in connection with carrying out LinnCo’s activities.

For the three months and nine months ended September 30, 2013, LinnCo incurred total general and administrative expenses and certain offering costs of approximately \$1 million and \$15 million, respectively, of which approximately \$9 million had been paid by LINN Energy on LinnCo’s behalf as of September 30, 2013. The expenses for the three months and nine months ended September 30, 2013, include approximately \$125,000 and \$13 million, respectively, of transaction costs related to professional services rendered by third parties in connection with the pending acquisition of Berry (see Note 2). The expenses for the three months and nine months ended September 30, 2013, also include approximately \$403,000 and \$1 million, respectively, related to services provided by LINN Energy necessary for the conduct of LinnCo’s business, such as accounting, legal, tax, information technology and other expenses. The offering costs of approximately \$361,000 were incurred in connection with LinnCo’s registration statement on Form S-4 also related to the pending acquisition of Berry. All expenses and costs paid by LINN Energy on LinnCo’s behalf are accounted for as investment at cost.

During the nine months ended September 30, 2013, the Company paid approximately \$76 million in distributions to LinnCo attributable to LinnCo’s interest in LINN Energy.

Other

One of the Company’s directors is the President and Chief Executive Officer of Superior Energy Services, Inc. (“Superior”), which provides oilfield services to the Company. For the three months and nine months ended September 30, 2013, the Company paid approximately \$7 million and \$20 million, respectively, to Superior and its subsidiaries for services rendered to the Company. The transactions associated with these payments were consummated on terms equivalent to those that prevail in arm’s-length transactions.

Note 15 – Subsidiary Guarantors

The November 2019 Senior Notes, the May 2019 Senior Notes and the 2010 Issued Notes are guaranteed by all of the Company’s material subsidiaries. The Company is a holding company and has no independent assets or operations of its own, the guarantees under each series of notes are full and unconditional and joint and several, and any subsidiaries of the Company other than the subsidiary guarantors are minor. There are no restrictions on the Company’s ability to obtain cash dividends or other distributions of funds from the guarantor subsidiaries.

Note 16 – SEC Inquiry

As disclosed on July 1, 2013, the Company and its affiliate, LinnCo, have been notified by the staff of the SEC that its Fort Worth Regional Office has commenced an inquiry regarding LINN Energy and LinnCo (the “SEC inquiry”). The SEC staff is investigating whether any violations of federal securities laws have occurred. The SEC staff has requested the production of documents and communications that are potentially relevant to, among other things, LINN Energy and LinnCo’s use of non-GAAP financial measures and disclosures related to LINN Energy’s hedging strategy. The SEC staff has stated that the fact of the inquiry should not be construed as an indication that the SEC or its staff has a negative view of any entity, individual or security. Both LINN Energy and LinnCo are cooperating fully with the SEC in this matter. Due to the pending SEC inquiry, the timing of closing of the merger with Berry is uncertain. LINN Energy and LinnCo are unable to predict the timing or outcome of the SEC inquiry or estimate the nature or amount of any possible sanction the SEC could seek to impose, which could include a fine, penalty, or court or administrative order prohibiting specific conduct, or a potential restatement of LINN Energy’s or LinnCo’s financial statements, any of which could be material. No provision for losses has been recorded for this exposure.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion contains forward-looking statements that reflect the Company’s future plans, estimates, beliefs and expected performance. The forward-looking statements are dependent upon events, risks and uncertainties that may be outside the Company’s control. The Company’s actual results could differ materially from those discussed in these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, market prices for oil, natural gas and NGL, production volumes, estimates of proved reserves, capital expenditures, economic and competitive conditions, credit and capital market conditions, regulatory changes and other uncertainties, as well as those factors set forth in “Cautionary Statement” below and in Item 1A. “Risk Factors” in this Quarterly Report on Form 10-Q and in the Annual Report on Form 10-K for the year ended December 31, 2012, and elsewhere in the Annual Report. In light of these risks, uncertainties and assumptions, the forward-looking events discussed may not occur.

The following discussion and analysis should be read in conjunction with the financial statements and related notes included in this Quarterly Report on Form 10-Q and in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012. A reference to a “Note” herein refers to the accompanying Notes to Condensed Consolidated Financial Statements contained in Item 1. “Financial Statements.”

Executive Overview

LINN Energy’s mission is to acquire, develop and maximize cash flow from a growing portfolio of long-life oil and natural gas assets. LINN Energy is an independent oil and natural gas company that began operations in March 2003 and completed its initial public offering in January 2006. The Company’s properties are located in eight operating regions in the United States (“U.S.”):

- Mid-Continent, which includes properties in Oklahoma, Louisiana and the eastern portion of the Texas Panhandle (including the Granite Wash and Cleveland horizontal plays);

- Hugoton Basin, which includes properties located primarily in Kansas and the Shallow Texas Panhandle;

- Green River Basin, which includes properties located in southwest Wyoming;

- Permian Basin, which includes areas in west Texas and southeast New Mexico;

- Williston/Powder River Basin, which includes the Bakken and Three Forks formations in North Dakota and the Powder River Basin in Wyoming;

- Michigan/Illinois, which includes the Antrim Shale formation in the northern part of Michigan and oil properties in southern Illinois;

- California, which includes the Brea Olinda Field of the Los Angeles Basin; and

- East Texas, which includes properties located in east Texas.

Results for the three months ended September 30, 2013, included the following:

- oil, natural gas and NGL sales of approximately \$538 million compared to \$444 million for the third quarter of 2012;

- average daily production of 823 MMcfe/d compared to 782 MMcfe/d for the third quarter of 2012;

- net loss of approximately \$30 million compared to \$430 million for the third quarter of 2012;

- capital expenditures, excluding acquisitions, of approximately \$306 million compared to \$258 million for the third quarter of 2012; and

- 18 wells drilled (all successful) compared to 95 wells drilled (94 successful) for the third quarter of 2012.

Results for the nine months ended September 30, 2013, included the following:

- oil, natural gas and NGL sales of approximately \$1.5 billion compared to \$1.1 billion for the nine months ended September 30, 2012;

- average daily production of 800 MMcfe/d compared to 628 MMcfe/d for the nine months ended September 30, 2012;

- net income of approximately \$93 million compared to a net loss of \$199 million for the nine months ended September 30, 2012;

- net cash provided by operating activities of approximately \$941 million compared to \$144 million for the nine months ended September 30, 2012;

- capital expenditures, excluding acquisitions, of approximately \$912 million compared to \$815 million for the nine months ended September 30, 2012; and

376 wells drilled (all successful) compared to 276 wells drilled (272 successful) for the nine months ended September 30, 2012.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Acquisitions – Pending

On September 11, 2013, the Company entered into a definitive purchase and sale agreement to acquire certain oil and natural gas properties located in the Permian Basin for a contract price of approximately \$525 million. The Company paid a deposit of approximately \$53 million in September 2013, which is reported in “other noncurrent assets” on the condensed consolidated balance sheet at September 30, 2013. The Company anticipates the acquisition will close on or before October 31, 2013, subject to closing conditions, and will be financed with proceeds from a committed term loan to be entered into at closing and borrowings under the Company's Credit Facility, as defined in Note 6.

On February 20, 2013, LinnCo, LLC (“LinnCo”), an affiliate of LINN Energy, and Berry Petroleum Company (“Berry”) entered into a definitive merger agreement under which LinnCo would acquire all of the outstanding common shares of Berry. Under the terms of the agreement, Berry's shareholders will receive 1.25 LinnCo common shares for each Berry common share they own. This transaction, which is expected to be a tax-free exchange to Berry's shareholders, represents value of \$46.2375 per common share, based on the closing price of LinnCo common shares on February 20, 2013, the last trading day before the public announcement.

In connection with the proposed transaction described above, LinnCo will contribute Berry to LINN Energy in exchange for newly issued LINN Energy units, after which Berry will be an indirect wholly owned subsidiary of LINN Energy. At February 21, 2013, the date of the public announcement, the transaction had a preliminary value of approximately \$4.4 billion, including the assumption of approximately \$1.7 billion of Berry's debt. The transaction is subject to approvals by Berry and LinnCo shareholders, LINN Energy unitholders and regulatory agencies. Due to the pending SEC inquiry (see Note 16), the timing of closing this proposed transaction is uncertain.

Divestiture – 2013

On May 31, 2013, the Company, through one of its wholly owned subsidiaries, together with the Company's partners, Panther Energy, LLC and Red Willow Mid-Continent, LLC, completed the sale of its interests in certain oil and natural gas properties located in the Mid-Continent region (“Panther Properties”) to Midstates Petroleum Company, Inc. Proceeds received for the Company's portion of its interests in the properties were approximately \$219 million, net of costs to sell of approximately \$2 million. The Company used the net proceeds from the sale to repay borrowings under its Credit Facility.

Financing and Liquidity

In April 2013, the Company entered into a Sixth Amended and Restated Credit Agreement (“Credit Facility”), which provides for a revolving credit facility up to the lesser of: (i) the then-effective borrowing base and (ii) the maximum commitment amount of \$4.0 billion. The borrowing base remained unchanged at \$4.5 billion and does not include any assets to be acquired in the pending transaction with Berry. The maturity date is April 2018. The amended and restated agreement is substantially similar to the previous Credit Facility with revisions to permit the transactions related to the acquisition of Berry and to designate Berry as an unrestricted subsidiary under the agreement.

In accordance with the provisions of the indenture related to the 2017 Senior Notes, in June 2013, the Company redeemed the remaining outstanding principal amount of approximately \$41 million. In accordance with the provisions of the indenture related to the 2018 Senior Notes, in July 2013, the Company redeemed the remaining outstanding principal amount of approximately \$14 million.

⁽¹⁾ Does not include the effect of gains (losses) on derivatives.

⁽²⁾ General and administrative expenses for the three months ended September 30, 2013, and September 30, 2012, include approximately \$8 million and \$7 million, respectively, of noncash unit-based compensation expenses.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Revenues and Other

Oil, Natural Gas and NGL Sales

Oil, natural gas and NGL sales increased approximately \$94 million or 21% to approximately \$538 million for the three months ended September 30, 2013, from approximately \$444 million for the three months ended September 30, 2012, due to higher production volumes and higher oil and natural gas prices partially offset by lower NGL prices. Higher oil and natural gas prices resulted in an increase in revenues of approximately \$48 million and \$34 million, respectively. Lower NGL prices resulted in a decrease in revenues of approximately \$4 million.

Average daily production volumes increased to 823 MMcfe/d during the three months ended September 30, 2013, from 782 MMcfe/d during the three months ended September 30, 2012. Higher oil and natural gas production volumes resulted in an increase in revenues of approximately \$13 million and \$12 million, respectively. Lower NGL production volumes resulted in a decrease in revenues of approximately \$9 million.

The following sets forth average daily production by region:

	Three Months Ended		Variance		
	2013	2012			
Average daily production (MMcfe/d):					
Mid-Continent	344	351	(7)	(2)%
Hugoton Basin	146	150	(4)	(3)%
Green River Basin	136	98	38	38	%
Permian Basin	78	82	(4)	(5)%
Williston/Powder River Basin	50	28	22	79	%
Michigan/Illinois	34	35	(1)	(4)%
East Texas	22	25	(3)	(9)%
California	13	13	—	1	%
	823	782	41	5	%

The decrease in average daily production volumes in the Mid-Continent region primarily reflects a reduction of approximately 23 MMcfe/d of production volumes related to production of the Panther Properties sold on May 31, 2013, partially offset by the Company's 2012 and 2013 capital drilling programs in the Granite Wash formation. The decrease in average daily production volumes in the Hugoton Basin region reflects downtime related to weather and plant maintenance, and the effects of natural declines, partially offset by the results of the Company's development capital spending. Average daily production volumes in the Green River Basin region reflect the impact of the acquisition from BP America Production Company ("BP") on July 31, 2012, partially offset by a reduction caused by ethane rejection in the region. The decrease in average daily production volumes in the Permian Basin region primarily reflects downtime from third parties' infrastructure, partially offset by development capital spending. The increase in average daily production volumes in the Williston/Powder River Basin region reflects development capital spending in the Williston and Powder River Basins. The Michigan/Illinois and California regions consist of low-decline asset bases and continue to produce at consistent levels. The decrease in average daily production volumes in the East Texas region primarily reflects the effects of natural declines.

Gains (Losses) on Oil and Natural Gas Derivatives

Losses on oil and natural gas derivatives decreased by approximately \$347 million to approximately \$64 million for the three months ended September 30, 2013, from approximately \$411 million for the three months ended September 30, 2012. Losses on oil and natural gas derivatives decreased primarily due to changes in fair value on unsettled derivatives contracts, partially offset by decreased cash settlements during the period. The fair value on unsettled derivatives contracts changes as future commodity price expectations change compared to the contract prices on the derivatives. If the expected future commodity prices increase compared to the contract prices on the derivatives, losses are recognized; and if the expected future commodity prices decrease compared to the contract prices on the derivatives, gains are recognized.

During the three months ended September 30, 2013, the Company had commodity derivative contracts for approximately 104% of its natural gas production, including natural gas put options used to indirectly hedge NGL revenues, and 127% of its oil production. During the three months ended September 30, 2012, the Company had commodity derivative contracts for approximately 107% of its natural gas production, including natural gas put options used to indirectly hedge NGL revenues, and 104% of its oil production.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

The Company determines the fair value of its oil and natural gas derivatives utilizing pricing models that use a variety of techniques, including market quotes and pricing analysis. See Item 3. "Quantitative and Qualitative Disclosures About Market Risk" and Note 7 and Note 8 for additional information about the Company's commodity derivatives. For information about the Company's credit risk related to derivative contracts, see "Counterparty Credit Risk" in "Liquidity and Capital Resources" below.

Marketing and Other Revenues

Marketing revenues represent third-party activities associated with company-owned gathering systems and plants. Marketing and other revenues increased by approximately \$5 million or 33% to approximately \$21 million for the three months ended September 30, 2013, from approximately \$16 million for the three months ended September 30, 2012, primarily due to higher revenues generated from the Jayhawk natural gas processing plant.

Expenses**Lease Operating Expenses**

Lease operating expenses include expenses such as labor, field office, vehicle, supervision, maintenance, tools and supplies and workover expenses. Lease operating expenses decreased by approximately \$5 million or 5% to approximately \$87 million for the three months ended September 30, 2013, from approximately \$92 million for the three months ended September 30, 2012. Lease operating expenses per Mcfe also decreased to \$1.15 per Mcfe for the three months ended September 30, 2013, from \$1.28 per Mcfe for the three months ended September 30, 2012. Lease operating expenses decreased primarily due to lower rates on newly acquired properties and cost saving initiatives.

Transportation Expenses

Transportation expenses increased by approximately \$18 million or 95% to approximately \$36 million for the three months ended September 30, 2013, from approximately \$18 million for the three months ended September 30, 2012, primarily due to the BP acquisitions in 2012.

Marketing Expenses

Marketing expenses represent third-party activities associated with company-owned gathering systems and plants. Marketing expenses decreased by approximately \$5 million or 33% to approximately \$10 million for the three months ended September 30, 2013, from approximately \$15 million for the three months ended September 30, 2012, primarily due to lower expenses associated with the Jayhawk natural gas processing plant.

General and Administrative Expenses

General and administrative expenses are costs not directly associated with field operations and reflect the costs of employees including executive officers, related benefits, office leases and professional fees. General and administrative expenses were approximately \$45 million for both the three months ended September 30, 2013, and September 30, 2012. Higher salaries and benefits related expenses of approximately \$2 million, driven primarily by increased employee headcount, higher professional services expenses of approximately \$1 million and higher various other expenses of approximately \$3 million were offset by lower acquisition related expenses of approximately \$6 million. General and administrative expenses per Mcfe decreased to \$0.60 per Mcfe for the three months ended September 30, 2013, from \$0.63 per Mcfe for the three months ended September 30, 2012, as a result of efficiencies gained from being a larger, more scalable organization.

Depreciation, Depletion and Amortization

Depreciation, depletion and amortization increased by approximately \$41 million or 25% to approximately \$209 million for the three months ended September 30, 2013, from approximately \$168 million for the three months ended September 30, 2012. Higher depletion rates and higher total production volumes were the primary reasons for the increased expense. Depreciation, depletion and amortization per Mcfe also increased to \$2.76 per Mcfe for the three months ended September 30, 2013, from \$2.33 per Mcfe for the three months ended September 30, 2012, primarily due to negative reserve revisions from the prior year, partially offset by lower rates on properties acquired in 2012.

Impairment of Long-Lived Assets

During the three months ended September 30, 2013, the Company recorded an adjustment of approximately \$4 million to reflect the fair value less costs to sell the Panther Properties sold in May 2013 (see Note 2). An initial adjustment of approximately \$15 million was recorded during the second quarter of 2013. The Company recorded no

impairment charge for the three months ended September 30, 2012.

27

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Taxes, Other Than Income Taxes

Taxes, other than income taxes, which consist primarily of severance and ad valorem taxes, decreased by approximately \$2 million or 4% to approximately \$36 million for the three months ended September 30, 2013, from approximately \$38 million for the three months ended September 30, 2012. Severance taxes, which are a function of revenues generated from production, increased by approximately \$3 million compared to the three months ended September 30, 2012, primarily due to higher production volumes and higher oil and natural gas prices partially offset by lower NGL prices. Ad valorem taxes, which are based on the value of reserves and production equipment and vary by location, decreased by approximately \$5 million compared to the three months ended September 30, 2012, primarily due to lower assessed values on the Company's base properties.

Other Income and (Expenses)

	Three Months Ended September 30,		
	2013	2012	Variance
	(in thousands)		
Interest expense, net of amounts capitalized	\$(103,806)	\$(105,697)	\$1,891
Loss on extinguishment of debt	(1,117)	—	(1,117)
Other, net	(2,475)	(1,247)	(1,228)
	\$(107,398)	\$(106,944)	\$(454)

Other income and (expenses) increased by approximately \$454,000 for the three months ended September 30, 2013, compared to the three months ended September 30, 2012. Interest expense decreased primarily due to the Company's redemptions of its highest interest rate debt, the Original Senior Notes (see Note 6). In addition, for the three months ended September 30, 2013, the Company recorded a loss on extinguishment of debt as a result of the redemption of the remaining outstanding 2018 Senior Notes. See "Debt" in "Liquidity and Capital Resources" below for additional details.

Income Tax Expense (Benefit)

The Company is a limited liability company treated as a partnership for federal and state income tax purposes, with the exception of the state of Texas, in which income tax liabilities and/or benefits of the Company are passed through to its unitholders. Limited liability companies are subject to Texas margin tax. In addition, certain of the Company's subsidiaries are Subchapter C-corporations subject to federal and state income taxes. The Company recognized an income tax benefit of approximately \$4 million for the three months ended September 30, 2013, compared to an income tax benefit of approximately \$5 million for the three months ended September 30, 2012. Income tax benefit decreased primarily due to higher income subject to Texas margin tax during the three months ended September 30, 2013, compared to the same period in 2012.

Net Income (Loss)

Net loss decreased by approximately \$400 million to approximately \$30 million for the three months ended September 30, 2013, from approximately \$430 million for the three months ended September 30, 2012. The decrease was primarily due to higher production revenues and lower losses on oil and natural gas derivatives, partially offset by higher expenses. See discussions above for explanations of variances.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Revenues and Other

Oil, Natural Gas and NGL Sales

Oil, natural gas and NGL sales increased approximately \$348 million or 31% to approximately \$1.5 billion for the nine months ended September 30, 2013, from approximately \$1.1 billion for the nine months ended September 30, 2012, due to higher production volumes and higher natural gas and oil prices partially offset by lower NGL prices. Higher natural gas and oil prices resulted in an increase in revenues of approximately \$129 million and \$37 million, respectively. Lower NGL prices resulted in a decrease in revenues of approximately \$19 million.

Average daily production volumes increased to 800 MMcfe/d during the nine months ended September 30, 2013, from 628 MMcfe/d during the nine months ended September 30, 2012. Higher natural gas, oil and NGL production volumes resulted in an increase in revenues of approximately \$88 million, \$71 million and \$42 million, respectively.

The following sets forth average daily production by region:

	Nine Months Ended September 30,		Variance		
	2013	2012			
Average daily production (MMcfe/d):					
Mid-Continent	327	309	18	6	%
Hugoton Basin	143	114	29	26	%
Green River Basin	139	33	106	322	%
Permian Basin	81	84	(3)	(4))%
Williston/Powder River Basin	41	26	15	59	%
Michigan/Illinois	34	35	(1)	(4))%
East Texas	22	14	8	60	%
California	13	13	—	(3))%
	800	628	172	27	%

The increase in average daily production volumes in the Mid-Continent region primarily reflects the Company's 2012 and 2013 capital drilling programs in the Granite Wash formation, partially offset by a decrease of approximately 9 MMcfe/d of production volumes related to the production of the Panther Properties sold on May 31, 2013. The increase in average daily production volumes in the Hugoton Basin region primarily reflects the impact of the acquisition from BP on March 30, 2012. Average daily production volumes in the Green River Basin region reflect the impact of the acquisition from BP on July 31, 2012, partially offset by a reduction caused by ethane rejection in the region. The decrease in average daily production volumes in the Permian Basin region primarily reflects downtime from third parties' infrastructure, partially offset by development capital spending. The increase in average daily production volumes in the Williston/Powder River Basin region reflects the impact of the joint-venture agreement entered into with Anadarko Petroleum Corporation in April 2012 and development capital spending in the Williston Basin. The Michigan/Illinois and California regions consist of low-decline asset bases and continue to produce at consistent levels. Average daily production volumes in the East Texas region reflect the impact of the acquisition on May 1, 2012.

Gains (Losses) on Oil and Natural Gas Derivatives

Gains on oil and natural gas derivatives increased by approximately \$124 million to approximately \$154 million for the nine months ended September 30, 2013, from approximately \$30 million for the nine months ended September 30, 2012. Gains on oil and natural gas derivatives increased primarily due to changes in fair value on unsettled derivatives contracts, partially offset by decreased cash settlements during the period. The results for 2013 and 2012 also include gains of approximately \$5 million and \$18 million, respectively, related to the recoveries of a bankruptcy claim (see Note 10). The fair value on unsettled derivatives contracts changes as future commodity price expectations change compared to the contract prices on the derivatives. If the expected future commodity prices increase compared to the contract prices on the derivatives, losses are recognized; and if the expected future commodity prices decrease compared to the contract prices on the derivatives, gains are recognized.

During the nine months ended September 30, 2013, the Company had commodity derivative contracts for approximately 107% of its natural gas production, including natural gas put options used to indirectly hedge NGL revenues, and 131% of its oil production. During the nine months ended September 30, 2012, the Company had commodity derivative contracts for approximately 113% of its natural gas production, including natural gas put options used to indirectly hedge NGL revenues, and 106% of its oil production.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

The Company determines the fair value of its oil and natural gas derivatives utilizing pricing models that use a variety of techniques, including market quotes and pricing analysis. See Item 3. "Quantitative and Qualitative Disclosures About Market Risk" and Note 7 and Note 8 for additional information about the Company's commodity derivatives. For information about the Company's credit risk related to derivative contracts, see "Counterparty Credit Risk" in "Liquidity and Capital Resources" below.

Marketing and Other Revenues

Marketing revenues represent third-party activities associated with company-owned gathering systems and plants. Marketing and other revenues increased by approximately \$26 million or 83% to approximately \$59 million for the nine months ended September 30, 2013, from approximately \$33 million for the nine months ended September 30, 2012, primarily due to higher revenues generated from the Jayhawk natural gas processing plant.

Expenses

Lease Operating Expenses

Lease operating expenses include expenses such as labor, field office, vehicle, supervision, maintenance, tools and supplies and workover expenses. Lease operating expenses increased by approximately \$25 million or 11% to approximately \$259 million for the nine months ended September 30, 2013, from approximately \$234 million for the nine months ended September 30, 2012. Lease operating expenses increased primarily due to costs associated with properties acquired during 2012 (see Note 2). Lease operating expenses per Mcfe decreased to \$1.19 per Mcfe for the nine months ended September 30, 2013, from \$1.36 per Mcfe for the nine months ended September 30, 2012, primarily due to lower rates on newly acquired properties and cost saving initiatives.

Transportation Expenses

Transportation expenses increased by approximately \$41 million or 82% to approximately \$92 million for the nine months ended September 30, 2013, from approximately \$51 million for the nine months ended September 30, 2012, primarily due to the BP acquisitions in 2012.

Marketing Expenses

Marketing expenses represent third-party activities associated with company-owned gathering systems and plants. Marketing expenses increased by approximately \$5 million or 21% to approximately \$27 million for the nine months ended September 30, 2013, from approximately \$22 million for the nine months ended September 30, 2012, primarily due to higher expenses associated with the Jayhawk natural gas processing plant.

General and Administrative Expenses

General and administrative expenses are costs not directly associated with field operations and reflect the costs of employees including executive officers, related benefits, office leases and professional fees. General and administrative expenses increased by approximately \$20 million or 16% to approximately \$150 million for the nine months ended September 30, 2013, from approximately \$130 million for the nine months ended September 30, 2012. The increase was primarily due to an increase in salaries and benefits related expenses of approximately \$16 million, driven primarily by increased employee headcount, an increase in professional services expenses of approximately \$4 million and an increase in various other expenses of approximately \$5 million, partially offset by a decrease in acquisition related expenses of approximately \$5 million. Although general and administrative expenses increased, the unit rate decreased to \$0.69 per Mcfe for the nine months ended September 30, 2013, from \$0.75 per Mcfe for the nine months ended September 30, 2012, as a result of efficiencies gained from being a larger, more scalable organization.

Depreciation, Depletion and Amortization

Depreciation, depletion and amortization increased by approximately \$177 million or 41% to approximately \$605 million for the nine months ended September 30, 2013, from approximately \$428 million for the nine months ended September 30, 2012. Higher depletion rates and higher total production volumes were the primary reasons for the increased expense. Depreciation, depletion and amortization per Mcfe also increased to \$2.77 per Mcfe for the nine months ended September 30, 2013, from \$2.49 per Mcfe for the nine months ended September 30, 2012, primarily due to negative reserve revisions from the prior year, partially offset by lower rates on properties acquired in 2012.

Impairment of Long-Lived Assets

During the nine months ended September 30, 2013, the Company recorded a noncash impairment charge, before and after tax, of approximately \$38 million associated with the write-down of the carrying value of the Panther Properties sold in May 2013 (see Note 2). During the nine months ended September 30, 2012, the Company recorded a noncash impairment charge, before

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

and after tax, of approximately \$146 million associated with proved oil and natural gas properties related to a decline in commodity prices.

Taxes, Other Than Income Taxes

Taxes, other than income taxes, which consist primarily of severance and ad valorem taxes, increased by approximately \$15 million or 16% to approximately \$109 million for the nine months ended September 30, 2013, from approximately \$94 million for the nine months ended September 30, 2012. Severance taxes, which are a function of revenues generated from production, increased by approximately \$10 million compared to the nine months ended September 30, 2012, primarily due to higher production volumes and higher natural gas and oil prices partially offset by lower NGL prices. Ad valorem taxes, which are based on the value of reserves and production equipment and vary by location, increased by approximately \$5 million compared to the nine months ended September 30, 2012, primarily due to property acquisitions in 2012.

Other Income and (Expenses)

	Nine Months Ended September 30,		Variance
	2013	2012	
	(in thousands)		
Interest expense, net of amounts capitalized	\$ (308,012)	\$ (277,606)	\$ (30,406)
Loss on extinguishment of debt	(5,304)	—	(5,304)
Other, net	(6,300)	(12,472)	6,172
	\$ (319,616)	\$ (290,078)	\$ (29,538)

Other income and (expenses) increased by approximately \$30 million for the nine months ended September 30, 2013, compared to the nine months ended September 30, 2012. Interest expense increased primarily due to higher outstanding debt during the period and higher amortization of financing fees and expenses associated with the November 2019 Senior Notes, as defined in Note 6, and amendments made to the Company's Credit Facility during 2012 and 2013. In addition, for the nine months ended September 30, 2013, the Company recorded a loss on extinguishment of debt of approximately \$5 million as a result of the redemption of the remaining outstanding Original Senior Notes (see Note 6). See "Debt" in "Liquidity and Capital Resources" below for additional details. Other expenses decreased primarily due to no write-offs of deferred financing fees related to the amendment of the Credit Facility for the nine months ended September 30, 2013, compared to approximately \$8 million for the nine months ended September 30, 2012.

Income Tax Expense (Benefit)

The Company is a limited liability company treated as a partnership for federal and state income tax purposes, with the exception of the state of Texas, in which income tax liabilities and/or benefits of the Company are passed through to its unitholders. Limited liability companies are subject to Texas margin tax. In addition, certain of the Company's subsidiaries are Subchapter C-corporations subject to federal and state income taxes. The Company recognized income tax expense of approximately \$2 million for the nine months ended September 30, 2013, compared to income tax expense of approximately \$4 million for the nine months ended September 30, 2012. Income tax expense decreased primarily due to lower income from the Company's taxable subsidiaries during the nine months ended September 30, 2013, compared to the same period in 2012.

Net Income (Loss)

Net income increased by approximately \$292 million to net income of approximately \$93 million for the nine months ended September 30, 2013, from a net loss of approximately \$199 million for the nine months ended September 30, 2012. The increase was primarily due to higher production revenues and higher gains on oil and natural gas derivatives, partially offset by higher expenses, including interest. See discussions above for explanations of variances.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Liquidity and Capital Resources

The Company utilizes funds from debt and equity offerings, borrowings under its Credit Facility and net cash provided by operating activities for capital resources and liquidity. To date, the primary use of capital has been for acquisitions and the development of oil and natural gas properties. For the nine months ended September 30, 2013, the Company's capital expenditures, excluding acquisitions, were approximately \$912 million. For 2013, the Company estimates its total capital expenditures, excluding acquisitions, will be approximately \$1.15 billion, including approximately \$1 billion related to the Company's oil and natural gas capital program and approximately \$67 million related to its plant and pipeline capital. This estimate reflects amounts for the development of properties associated with acquisitions (see Note 2), is under continuous review and subject to ongoing adjustment. The Company expects to fund these capital expenditures primarily with net cash provided by operating activities and borrowings under its Credit Facility.

As the Company pursues growth, it continually monitors the capital resources available to meet future financial obligations and planned capital expenditures. The Company's future success in growing reserves and production volumes will be highly dependent on the capital resources available and its success in drilling for or acquiring additional reserves. The Company actively reviews acquisition opportunities on an ongoing basis. If the Company were to make significant additional acquisitions for cash, it would need to borrow additional amounts under its Credit Facility, if available, or obtain additional debt or equity financing. The Company's Credit Facility and indentures governing its November 2019 Senior Notes, May 2019 Senior Notes and 2010 Issued Senior Notes impose certain restrictions on the Company's ability to obtain additional debt financing. Based upon current expectations, the Company believes liquidity and capital resources will be sufficient to conduct its business and operations. For additional information about the risk that the Company may not have sufficient net cash provided by operating activities to maintain its distribution and other risk factors that could affect the Company, see Item 1A. "Risk Factors."

Statements of Cash Flows

The following is a comparative cash flow summary:

	Nine Months Ended		
	September 30,		
	2013	2012	Variance
	(in thousands)		
Net cash:			
Provided by operating activities ⁽¹⁾	\$940,511	\$144,431	\$796,080
Used in investing activities	(827,165) (3,234,779) 2,407,614
Provided by (used in) financing activities	(87,109) 3,090,388	(3,177,497
Net increase in cash and cash equivalents	\$26,237	\$40	\$26,197

⁽¹⁾ The nine months ended September 30, 2012, are net of payments made for commodity derivative premiums of approximately \$583 million.

Operating Activities

Cash provided by operating activities for the nine months ended September 30, 2013, was approximately \$941 million, compared to approximately \$144 million for the nine months ended September 30, 2012. The increase was primarily due to no premiums paid for derivatives during the nine months ended September 30, 2013, compared to approximately \$583 million in premiums paid during the same period in 2012. Premiums paid for commodity derivatives decreased primarily due to reduced acquisition activity during the nine months ended September 30, 2013, as compared to the nine months ended September 30, 2012. Lower premiums and higher revenues primarily due to increased production volumes were partially offset by higher expenses.

Premiums paid during the nine months ended September 30, 2012, were for commodity derivative contracts that hedge future production. The Company hedges a substantial portion of its production to reduce exposure to fluctuations in the prices of oil and natural gas and provide long-term cash flow predictability to manage its business, service debt and pay distributions. The majority of the Company's hedges are in the form of fixed price swaps, which

are entered into on market terms and without cost. The Company's ability to enter into swaps is governed by covenants under its Credit Facility which limit the maximum percentage of forecasted future production that may be hedged using swaps to 80% for the current calendar year and the following four calendar years and 70% thereafter. In prior years, the Company has chosen to purchase put options, primarily in

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

connection with acquisitions, to hedge certain volumes in excess of volumes already hedged with swaps to achieve greater downside commodity price protection. Put options require the payment of a premium, which the Company pays in cash at the time of execution and no additional amounts are payable in the future under the contracts. When the Company evaluates new hedging plans, it considers a variety of factors, including general characteristics of the asset to be hedged, such as commodity type and expectations for production growth, general availability of a liquid market to enter into new hedges, volumes, prices and duration of swaps that comply with the Credit Facility covenants, and attributes associated with put options, such as time value, volatility and premiums for various strike prices relative to swap reference prices. Specifically, for acquisitions which it chose to hedge in part with put options, the Company typically set a budget of approximately 10% of the acquisition contract price to purchase put options covering associated production volumes for multiple years into the future.

The appropriate level of production to be hedged is an ongoing consideration and is based on a variety of factors, including current and future expected commodity market prices, cost and availability of put option contracts, the level of acquisition activity and the Company's overall risk profile, including leverage and size and scale considerations. As a result, the appropriate percentage of production volumes to be hedged may change over time. See Note 7 and Note 8 for additional details about the Company's commodity derivatives.

Investing Activities

The following provides a comparative summary of cash flow from investing activities:

	Nine Months Ended	
	September 30,	
	2013	2012
	(in thousands)	
Cash flow from investing activities:		
Acquisition of oil and natural gas properties and joint-venture funding	\$(192,871)	\$(2,487,767)
Capital expenditures	(844,591)	(748,450)
Proceeds from sale of properties and equipment and other	210,297	1,438
	\$(827,165)	\$(3,234,779)

The primary use of cash in investing activities is for capital spending, including acquisitions and the development of the Company's oil and natural gas properties. The decrease was primarily due to no significant acquisitions consummated during the nine months ended September 30, 2013, compared to a total of four acquisitions of properties in the Hugoton Basin, Williston/Powder River Basin, East Texas and Green River Basin regions during the same period in 2012. See Note 2 for additional details of acquisitions. Capital expenditures increased primarily due to capital additions for pipelines and supporting facilities in the Granite Wash formation, as well as development activities of properties acquired in 2012 in the Hugoton Basin, Williston/Powder River Basin and Green River Basin regions. Proceeds from sale of properties and equipment and other for the nine months ended September 30, 2013, include approximately \$219 million in net proceeds received for the sale of the Panther Properties in May 2013 (see Note 2).

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Financing Activities

Cash used in financing activities for the nine months ended September 30, 2013, was approximately \$87 million, compared to cash provided by financing activities of approximately \$3.1 billion for the nine months ended September 30, 2012. The decrease in financing cash flow needs was primarily attributable to reduced acquisition activity during the nine months ended September 30, 2013. The following provides a comparative summary of proceeds from borrowings and repayments of debt:

	Nine Months Ended September 30,	
	2013	2012
	(in thousands)	
Proceeds from borrowings:		
Credit facility	\$ 1,260,000	\$ 3,130,000
Senior notes	—	1,799,802
	\$ 1,260,000	\$ 4,929,802
Repayments of debt:		
Credit facility	\$(735,000)	\$(2,085,000)
Senior notes	(54,898)	—
	\$(789,898)	\$(2,085,000)

Debt

In April 2013, the Company entered into a Sixth Amended and Restated Credit Agreement (“Credit Facility”), which provides for a revolving credit facility up to the lesser of: (i) the then-effective borrowing base and (ii) the maximum commitment amount of \$4.0 billion. The borrowing base remained unchanged at \$4.5 billion and does not include any assets to be acquired in the pending transaction with Berry (see Note 2). The maturity date is April 2018. The amended and restated agreement is substantially similar to the previous Credit Facility with revisions to permit the transactions related to the acquisition of Berry and to designate Berry as an unrestricted subsidiary under the agreement. At September 30, 2013, the borrowing capacity under the Credit Facility was approximately \$2.3 billion, which includes a \$5 million reduction in availability for outstanding letters of credit.

As of September 30, 2013, the Company was in compliance with all financial and other covenants of the Credit Facility. If an event of default would occur and were continuing, the Company would be unable to make borrowings and its financial condition and liquidity would be adversely affected. For information related to the Credit Facility, see Note 6.

The Company depends, in part, on its Credit Facility for future capital needs. In addition, the Company has drawn on the Credit Facility to fund or partially fund cash distribution payments. Absent such borrowings, the Company would have at times experienced a shortfall in cash available to pay the declared cash distribution. For additional information, see “Distribution Practices” below. If an event of default occurs and is continuing under the Credit Facility, the Company would be unable to make borrowings to fund distributions. For additional information about this matter and other risk factors that could affect the Company, see Item 1A. “Risk Factors.”

In accordance with the provisions of the indenture related to the 2017 Senior Notes, in June 2013, the Company redeemed the remaining outstanding principal amount of approximately \$41 million. In accordance with the provisions of the indenture related to the 2018 Senior Notes, in July 2013, the Company redeemed the remaining outstanding principal amount of approximately \$14 million.

Counterparty Credit Risk

The Company accounts for its commodity derivatives at fair value. The Company's counterparties are current participants or affiliates of participants in its Credit Facility or were participants or affiliates of participants in its Credit Facility at the time it originally entered into the derivatives. The Credit Facility is secured by the Company's oil, natural gas and NGL reserves; therefore, the Company is not required to post any collateral. The Company does not receive collateral from its counterparties. The Company minimizes the credit risk in derivative instruments by:

(i) limiting its exposure to any single counterparty; (ii) entering into derivative instruments only with counterparties

that meet the Company's minimum credit quality standard, or have a guarantee from an affiliate that meets the Company's minimum credit quality standard; and (iii) monitoring the creditworthiness of the Company's counterparties on an ongoing basis. In accordance with the Company's standard practice, its

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

commodity derivatives are subject to counterparty netting under agreements governing such derivatives and therefore the risk of loss due to counterparty nonperformance is somewhat mitigated.

Distributions

Under the Company's limited liability company agreement, unitholders are entitled to receive a distribution of available cash, which includes cash on hand plus borrowings less any reserves established by the Company's Board of Directors to provide for the proper conduct of the Company's business (including reserves for future capital expenditures, including drilling, acquisitions and anticipated future credit needs) or to fund distributions over the next four quarters. The following provides a summary of distributions paid by the Company during the nine months ended September 30, 2013:

Date Paid	Distribution Per Unit	Total Distributions (in millions)
September 2013	\$0.2416	\$57
August 2013	\$0.2416	\$57
July 2013	\$0.2416	\$57
May 2013	\$0.725	\$170
February 2013	\$0.725	\$171

In April 2013, the Company's Board of Directors approved a change in its distribution policy that provides a distribution with respect to any quarter may be made, at the discretion of the Board of Directors, (i) within 45 days following the end of each quarter or (ii) in three equal installments within 15, 45 and 75 days following the end of each quarter. On October 1, 2013, the Company's Board of Directors declared a cash distribution of \$0.725 per unit with respect to the third quarter of 2013, to be paid in three equal monthly installments of \$0.2416 per unit. The first monthly distribution with respect to the third quarter of 2013, totaling approximately \$57 million, was paid on October 17, 2013, to unitholders of record as of the close of business on October 11, 2013.

Off-Balance Sheet Arrangements

The Company does not currently have any off-balance sheet arrangements.

Contingencies

The Company has been named as a defendant in a number of lawsuits, including claims from royalty owners related to disputed royalty payments and royalty valuations. The Company has established reserves that management currently believes are adequate to provide for potential liabilities based upon its evaluation of these matters. With respect to a certain statewide class action case, the parties in this case are currently engaged in settlement negotiations and based on the current status of those negotiations, the Company estimates a range of possible loss of \$1 million to \$4.5 million, for which an appropriate reserve has been established. For a certain statewide class action royalty payment dispute where a reserve has not yet been established, the Company has denied that it has any liability on the claims and has raised arguments and defenses that, if accepted by the court, will result in no loss to the Company. Discovery related to class certification has concluded. Briefing and the hearing on class certification have been deferred by court order pending the Tenth Circuit Court of Appeals' resolution of interlocutory appeals of two unrelated class certification orders. As a result, the Company is unable to estimate a possible loss, or range of possible loss, if any. In addition, the Company is involved in various other disputes arising in the ordinary course of business. The Company is not currently a party to any litigation or pending claims that it believes would have a material adverse effect on its overall business, financial position, results of operations or liquidity; however, cash flow could be significantly impacted in the reporting periods in which such matters are resolved.

On March 21, 2013, a purported stockholder class action captioned Nancy P. Assad Trust v. Berry Petroleum Co., et al. was filed in the District Court for the City and County of Denver, Colorado, No. 13-CV-31365. The action names as defendants Berry, the members of its board of directors, Bacchus HoldCo, Inc., a direct wholly owned subsidiary of Berry ("HoldCo"), Bacchus Merger Sub, Inc., a direct wholly owned subsidiary of HoldCo ("Bacchus Merger Sub"), LinnCo, LINN Energy and Linn Acquisition Company, LLC, a direct wholly owned subsidiary of LinnCo ("LinnCo

Merger Sub”). On April 5, 2013, an amended complaint was filed, which alleges that the individual defendants breached their fiduciary duties in connection with the transactions by engaging in an unfair sales process that resulted in an unfair price for Berry, by failing to disclose all material information regarding the transactions, and that the entity defendants aided and abetted those breaches of fiduciary

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

duty. The amended complaint seeks a declaration that the transactions are unlawful and unenforceable, an order directing the individual defendants to comply with their fiduciary duties, an injunction against consummation of the transactions, or, in the event they are completed, rescission of the transactions, an award of fees and costs, including attorneys' and experts' fees and expenses, and other relief. On May 21, 2013, the Colorado District Court stayed and administratively closed the Nancy P. Assad Trust action in favor of the Hall action described below that is pending in the Delaware Court of Chancery.

On April 12, 2013, a purported stockholder class action captioned David Hall v. Berry Petroleum Co., et al. was filed in the Delaware Court of Chancery, C.A. No. 8476-VCG. The complaint names as defendants Berry, the members of its board of directors, HoldCo, Bacchus Merger Sub, LinnCo, LINN Energy and LinnCo Merger Sub. The complaint alleges that the individual defendants breached their fiduciary duties in connection with the transactions by engaging in an unfair sales process that resulted in an unfair price for Berry, by failing to disclose all material information regarding the transactions, and that the entity defendants aided and abetted those breaches of fiduciary duty. The complaint seeks a declaration that the transactions are unlawful and unenforceable, an order directing the individual defendants to comply with their fiduciary duties, an injunction against consummation of the transactions, or, in the event they are completed, rescission of the transactions, an award of fees and costs, including attorneys' and experts' fees and expenses, and other relief. The Company is unable to estimate a possible loss, or range of possible loss, if any, at this time.

On July 9, 2013, Anthony Booth, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of Texas, against LINN Energy, Mark E. Ellis, Kolja Rockov, and David B. Rottino (the "Booth Action"). On July 18, 2013, the Catherine A. Fisher Trust, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of Texas, against the same defendants (the "Fisher Action"). On July 17, 2013, Don Gentry, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of Texas, against LINN Energy, LinnCo, Mark E. Ellis, Kolja Rockov, David B. Rottino, George A. Alcorn, David D. Dunlap, Terrence S. Jacobs, Michael C. Linn, Joseph P. McCoy, Jeffrey C. Swoveland, and the various underwriters for LinnCo's initial public offering (the "Gentry Action") (the Booth Action, Fisher Action, and Gentry Action together, the "Texas Federal Actions"). The Texas Federal Actions each assert claims under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 (the "Exchange Act") based on allegations that LINN Energy made false or misleading statements relating to its hedging strategy, the cash flow available for distribution to unitholders, and LINN Energy's energy production. The Gentry Action asserts additional claims under Sections 11 and 15 of the Securities Act of 1933 based on alleged misstatements relating to these issues in the prospectus and registration statement for LinnCo's initial public offering. On September 23, 2013, the Southern District of Texas entered an order transferring the Texas Federal Actions to the Southern District of New York so that they could be consolidated with the New York Federal Actions, which are described below.

On July 10, 2013, David Adrian Luciano, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of New York, against LINN Energy, LinnCo, Mark E. Ellis, Kolja Rockov, David B. Rottino, George A. Alcorn, David D. Dunlap, Terrence S. Jacobs, Michael C. Linn, Joseph P. McCoy, Jeffrey C. Swoveland, and the various underwriters for LinnCo's initial public offering (the "Luciano Action"). The Luciano Action asserts claims under Sections 11 and 15 of the Securities Act of 1933 based on alleged misstatements relating to LINN Energy's hedging strategy, the cash flow available for distribution to unitholders, and LINN Energy's energy production in the prospectus and registration statement for LinnCo's initial public offering. On July 12, 2013, Frank Donio, individually and on behalf of all other persons similarly situated, filed a class action complaint in the United States District Court, Southern District of New York, against LINN Energy, Mark E. Ellis, Kolja Rockov, and David B. Rottino (the "Donio Action"). The Donio Action asserts claims under Sections 10(b) and 20(a) of the Exchange Act based on allegations that LINN Energy made false or misleading statements relating to its hedging strategy, the cash flow available for distribution to unitholders, and LINN Energy's energy production. Several additional class action cases substantially similar to the Luciano Action and the Donio Action were subsequently filed in the Southern District of New York and assigned to the same judge (the

Luciano Action, Donio Action, and all similar subsequently filed New York federal class actions together, the “New York Federal Actions”). The Texas Federal Actions and the New York Federal Actions have now been consolidated in the United States District Court for the Southern District of New York. The cases are in their preliminary stages and it is possible that additional similar actions could be filed. As a result, the Company is unable to estimate a possible loss, or range of possible loss, if any.

On July 10, 2013, Judy Mesirov, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against Mark E. Ellis, Kolja Rockov, David B. Rottino, Arden L. Walker, Jr., Charlene A. Ripley, Michael C. Linn, Joseph P. McCoy, George A. Alcorn, Terrence S. Jacobs, David D. Dunlap, Jeffrey C. Swoveland, and Linda M. Stephens in the District Court of Harris County, Texas (the “Mesirov Action”). On July 12, 2013, John Peters, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants in the District Court of Harris County, Texas (the “Peters Action”). On August 26, 2013, Joseph Abdalla, derivatively on behalf of nominal

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants in the District Court of Harris County, Texas (the "Abdalla Action") (the Mesirov Action, Peters Action, and Abdalla Actions together, the "Texas State Court Derivative Actions"). On August 19, 2013, the Charlotte J. Lombardo Trust of 2004, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants in the United States District Court for the Southern District of Texas (the "Lombardo Action"). On September 30, 2013, the Thelma Feldman Rev. Trust, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants (the "Feldman Rev. Trust Action"). On October 21, 2013, the Parker Family Trust of 2012, derivatively on behalf of nominal defendant LINN Energy, filed a shareholder derivative petition against many of the same defendants (the "Parker Family Trust Action") (the Lombardo Action, Feldman Rev. Trust Action, and Parker Family Trust Action together, the "Texas Federal Court Derivative Actions") (the Texas State Court Derivative Action and Texas Federal Court Derivative Actions together, the "Texas Derivative Actions"). The Texas Derivative Actions assert derivative claims on behalf of LINN Energy against the individual defendants for alleged breaches of fiduciary duty, waste of corporate assets, mismanagement, abuse of control, and unjust enrichment based on factual allegations similar to those in the Texas Federal Actions and the New York Federal Actions. The cases are in their preliminary stages and it is possible that additional similar actions could be filed in the District Court of Harris County, Texas, or in other jurisdictions. As a result, the Company is unable to estimate a possible loss, or range of possible loss, if any.

During the nine months ended September 30, 2013, and September 30, 2012, the Company made no significant payments to settle any legal, environmental or tax proceedings. The Company regularly analyzes current information and accrues for probable liabilities on the disposition of certain matters as necessary. Liabilities for loss contingencies arising from claims, assessments, litigation or other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

Commitments and Contractual Obligations

The Company has contractual obligations for long-term debt, operating leases and other long-term liabilities that were summarized in the table of contractual obligations in the 2012 Annual Report on Form 10-K. With the exception of the Company's redemption of the remaining outstanding principal amount of the 2017 Senior Notes and 2018 Senior Notes, there have been no significant changes to the Company's contractual obligations from December 31, 2012. See Note 6 for additional information about the Company's debt instruments.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

Distribution Practices

The Company's Board of Directors determines the appropriate level of distributions on a periodic basis in accordance with the provisions of the Company's limited liability company agreement. Management considers the timing and size of planned capital expenditures and long-term views about expected results in determining the amount of its distributions. Capital spending and resulting production and net cash provided by operating activities do not typically occur evenly throughout the year due to a variety of factors which are difficult to predict, including rig availability, weather, well performance, the timing of completions and the commodity price environment. Consistent with practices common to publicly traded partnerships, the Company's Board of Directors historically has not varied the distribution it declares period to period based on uneven net cash provided by operating activities. The Company's Board of Directors reviews historical financial results and forecasts for future periods, including development activities, as well as considers the impact of significant acquisitions in making a determination to increase, decrease or maintain the current level of distribution. To date in 2013, the Company's Board of Directors has considered current shortfalls in net cash provided by operating activities after distributions and discretionary adjustments as well as forecasts of expected future net cash provided by operating activities and has decided to maintain the distribution at its current level. If shortfalls are sustained over time and forecasts demonstrate expectations for continued future shortfalls, the Company's Board of Directors may determine to reduce, suspend or discontinue paying distributions. Please read "Risk Factors - If we are unable to fully offset declines in production and proved developed producing reserves from discretionary reductions for a portion of our oil and natural gas development costs, our net cash provided by operating activities could be reduced, which could adversely affect our ability to pay a distribution at the current level or at all" and "we may not have sufficient net cash provided by operating activities to pay our distribution at the current distribution level, or at all, and as a result, future distributions to our unitholders may be reduced or eliminated."

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

The Company intends to fund interest expense, a portion of its oil and natural gas development costs and distributions to unitholders from net cash provided by operating activities. The Company funds premiums paid for derivatives, acquisitions and other capital expenditures primarily with proceeds from debt or equity offerings, borrowings under its Credit Facility or other external sources of funding. Although it is the Company's practice to acquire or modify derivative instruments with external sources of funding, any cash settlements on derivatives are reported as operating cash flows and may be used to fund distributions. See below for details regarding the discretionary adjustments considered by the Company's Board of Directors in assessing the appropriate distribution amount for each period, as well as the extent to which sources of funding have been sufficient for the periods presented:

	Three Months Ended September 30, 2013		September 30, 2012	
	(in thousands)		(in thousands)	
Net cash provided by operating activities	\$379,155	\$266,860	\$940,511	\$144,431
Distributions to unitholders	(170,569)	(144,752)	(511,686)	(426,918)
Excess (shortfall) of net cash provided by operating activities after distributions to unitholders	208,586	122,108	428,825	(282,487)
Discretionary adjustments considered by the Board of Directors:				
Premiums paid for derivatives ⁽¹⁾	—	—	—	583,434
Cash recoveries of bankruptcy claim ⁽²⁾	—	—	(5,073)	(18,277)
Cash received (paid) for acquisitions or divestitures revenues less operating expenses ⁽³⁾	(233)	36,520	(7,023)	81,647
Discretionary reductions for a portion of oil and natural gas development costs ⁽⁴⁾	(115,659)	(100,488)	(337,869)	(256,126)
Provision for legal matters ⁽⁵⁾	1,000	310	1,000	1,105
Changes in operating assets and liabilities and other, net ⁽⁶⁾	(91,401)	(1,198)	(116,031)	(33,553)
Excess (shortfall) of net cash provided by operating activities after distributions to unitholders and discretionary adjustments considered by the Board of Directors ⁽⁷⁾	\$2,293	\$57,252	\$(36,171)	\$75,743

- Represent premiums paid for derivatives during the period. The Company considers the cost of premiums paid for derivatives as an investment related to its underlying oil and natural gas properties. The Company's statements of cash flows, prepared in accordance with GAAP, present cash settlements on derivatives and premiums paid for derivatives as operating activities. However, for purposes of determining the amount available for distribution to unitholders, the Company considers premiums paid for derivatives as investing activities, similar to the way the initial acquisition or development costs of the Company's oil and natural gas properties are presented as investing activities while the cash flows generated from these assets are included in net cash provided by operating activities. The consideration of premiums paid for derivatives as investing activities for purposes of determining the amount available for distribution differs from the presentation of derivatives activities, including premiums paid, as operating activities in the Company's financial statements prepared in accordance with GAAP.
- (1) Represent the recoveries of a bankruptcy claim against Lehman Brothers which was not a transaction occurring in the ordinary course of the Company's business.
- (2) Represents adjustments to the purchase price of acquisitions and divestitures, based on the Company's contractual right to revenues less operating expenses for periods from the effective date of a transaction to the closing date of a transaction. When the Company is the buyer, it is legally entitled to revenues less operating expenses generated

during this period, and the Company's Board of Directors has historically made a discretionary adjustment to include this cash in the amount available for distribution. Conversely, when the Company is the seller, the Company's Board of Directors has historically made a discretionary adjustment to reduce this cash from the amount available for distribution during the period.

Represent discretionary reductions for a portion of oil and natural gas development costs, an estimated component of total development costs, which are amounts established by the Board of Directors at the end of each year for the following year, allocated across four quarters, that are intended to fully offset declines in production and proved developed producing reserves during the year as compared to the prior year. The portion of oil and natural gas development costs includes estimated drilling and development costs associated with projects to convert a portion of non-producing reserves to producing status. However, the amounts do not include the historical cost of acquired properties as those amounts have already been spent in prior periods, were financed primarily with external sources of funding

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

and do not affect the Company's ability to pay distributions in the current period. The Company's existing reserves, inventory of drilling locations and production levels will decline over time as a result of development and production activities. Consequently, if the Company were to limit its total capital expenditures to this portion of oil and natural gas development costs and not acquire new reserves, total reserves would decrease over time, resulting in an inability to maintain production at current levels, which could adversely affect the Company's ability to pay a distribution at the current level or at all. However, the Company's current total reserves do not include reserve additions that may result from converting existing probable and possible resources to additional proved reserves, potential additional discoveries or technological advancements on the Company's existing acreage position. For additional information, including the risks associated with the process for determining this amount, please also see Item 1A. "Risk Factors." See below for total development of oil and natural gas properties as presented in the statements of cash flows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
	(in thousands)			
Total development of oil and natural gas properties	\$271,705	\$229,220	\$767,604	\$710,360

⁽⁵⁾ Represents reserves and settlements related to legal matters.

Represents primarily working capital adjustments. These adjustments may or may not impact cash provided by (used in) operating activities during the respective period, but are included as discretionary adjustments considered by the Company's Board of Directors as the Board historically has not varied the distribution it declares period to

⁽⁶⁾ period based on uneven cash flows. The Company's Board of Directors, when determining the appropriate level of cash distributions, excluded the impact of the timing of cash receipts and payments; as such, this adjustment is necessary to show the historical amounts considered by the Company's Board of Directors in assessing the appropriate distribution amount for each period.

⁽⁷⁾ Represents the excess (shortfall) of net operating cash flow after distributions to unitholders and discretionary adjustments. Any excess was retained by the Company for future operations, future capital expenditures, future debt service or other future obligations. Any shortfall was funded with cash on hand and/or borrowings under the Company's Credit Facility.

A summary of the significant sources and uses of funding for the respective periods is presented below:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2013	2012	2013	2012
	(in thousands)			
Net cash provided by operating activities	\$379,155	\$266,860	\$940,511	\$144,431
Distributions to unitholders	(170,569)	(144,752)	(511,686)	(426,918)
Excess (shortfall) of net operating cash flow after distributions to unitholders	208,586	122,108	428,825	(282,487)
Plus (less):				
Net cash provided by financing activities (excluding distributions to unitholders)	240,379	846,011	424,577	3,517,306
Acquisition of oil and natural gas properties and joint-venture funding	(128,490)	(724,834)	(192,871)	(2,487,767)
Development of oil and natural gas properties	(271,705)	(229,220)	(767,604)	(710,360)
Purchases of other property and equipment	(21,840)	(15,657)	(76,987)	(38,090)
Proceeds from sale of properties and equipment and other	(602)	863	210,297	1,438

Net increase (decrease) in cash and cash equivalents \$26,328 \$(729) \$26,237 \$40

Regulatory Matters

On August 15, 2012, the Environmental Protection Agency (“EPA”) issued final rules that subject oil and natural gas production, processing, transmission and storage operations to regulation under the New Source Performance Standards (“NSPS”) and National Emission Standards for Hazardous Air Pollutants (“NESHAP”) programs. The EPA rules include NSPS standards for completions of hydraulically fractured natural gas wells. These standards require that prior to January 1, 2015, owners/operators reduce volatile organic compounds emissions from natural gas not sent to the gathering line during well

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

completion either by flaring or by capturing the gas using green completions with a completion combustion device. Beginning January 1, 2015, operators must capture the gas and make it available for use or sale, which can be done through the use of green completions. The standards are applicable to newly fractured wells as well as existing wells that are refractured. Further, the finalized regulations also establish specific new requirements, effective in 2012, for emissions from compressors, controllers, dehydrators, storage tanks, gas processing plants and certain other equipment. These rules may require changes to the Company's operations, including the installation of new equipment to control emissions.

The Company cannot predict how future environmental laws and regulations may impact its properties or operations. For the nine months ended September 30, 2013, the Company did not incur any material capital expenditures for installation of remediation or pollution control equipment at any of its facilities. The Company is not aware of any environmental issues or claims that will require material capital expenditures during 2013 or that will otherwise have a material impact on its financial position, results of operations or cash flows.

Critical Accounting Policies and Estimates

The discussion and analysis of the Company's financial condition and results of operations is based upon the condensed consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements requires management of the Company to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. These estimates and assumptions are based on management's best estimates and judgment. Certain accounting policies involve judgments and uncertainties to such an extent that there is reasonable likelihood that materially different amounts could have been reported under different conditions, or if different assumptions had been used. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors that are believed to be reasonable under the circumstances. Such estimates and assumptions are adjusted when facts and circumstances dictate. Actual results may differ from these estimates and assumptions used in the preparation of the financial statements.

Recently Issued Accounting Standards

For a discussion of recently issued accounting standards, see Note 1 of Notes to Condensed Consolidated Financial Statements.

Cautionary Statement

This Quarterly Report on Form 10-Q contains forward-looking statements that are subject to a number of risks and uncertainties, many of which are beyond the Company's control. These statements may include content about the Company's:

- business strategy;
- acquisition strategy;
 - ability to consummate the pending merger with Berry;
- effects of the pending SEC inquiry and other legal proceedings;
- financial strategy;
- ability to maintain or grow distributions;
- drilling locations;
- oil, natural gas and NGL reserves;
- realized oil, natural gas and NGL prices;
- production volumes;
 - lease operating expenses, general and administrative expenses and development costs;
- future operating results; and
- plans, objectives, expectations and intentions.

All of these types of statements, other than statements of historical fact included in this Quarterly Report on Form 10-Q, are forward-looking statements. These forward-looking statements may be found in Item 2. In some

cases, forward-looking statements can be identified by terminology such as “may,” “will,” “could,” “should,” “expect,” “plan,” “project,” “intend,” “anticipate,” “believe,” “estimate,” “predict,” “potential,” “pursue,” “target,” “continue,” the negative of such other comparable terminology.

The forward-looking statements contained in this Quarterly Report on Form 10-Q are largely based on Company expectations, which reflect estimates and assumptions made by Company management. These estimates and assumptions reflect management’s best judgment based on currently known market conditions and other factors. Although the Company believes such estimates and assumptions to be reasonable, they are inherently uncertain and involve a number of risks and uncertainties beyond its control. In addition, management’s assumptions may prove to be inaccurate. The Company cautions that the forward-looking statements contained in this Quarterly Report on Form 10-Q are not guarantees of future performance, and it

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Continued

cannot assure any reader that such statements will be realized or the forward-looking statements or events will occur. Actual results may differ materially from those anticipated or implied in forward-looking statements due to factors set forth in Item 1A. "Risk Factors" in this Quarterly Report on Form 10-Q and in the Annual Report on Form 10-K for the year ended December 31, 2012, and elsewhere in the Annual Report. The forward-looking statements speak only as of the date made and, other than as required by law, the Company undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about potential exposure to market risks. The term “market risk” refers to the risk of loss arising from adverse changes in commodity prices and interest rates. The disclosures are not meant to be precise indicators of expected future losses, but rather indicators of reasonably possible losses. This forward-looking information provides indicators of how the Company views and manages its ongoing market risk exposures. All of the Company’s market risk sensitive instruments were entered into for purposes other than trading.

The following should be read in conjunction with the financial statements and related notes included elsewhere in this Quarterly Report on Form 10-Q and in the Company’s 2012 Annual Report on Form 10-K. A reference to a “Note” herein refers to the accompanying Notes to Condensed Consolidated Financial Statements contained in Item 1. “Financial Statements.”

Commodity Price Risk

An important part of the Company’s business strategy includes hedging a significant portion of its forecasted production to reduce exposure to fluctuations in the prices of oil and natural gas and provide long-term cash flow predictability to manage its business, service debt and pay distributions. The current direct NGL hedging market is constrained in terms of price, volume, duration and number of counterparties, which limits the Company’s ability to effectively hedge its NGL production. As a result, currently, the Company directly hedges only its oil and natural gas production. By removing a significant portion of the price volatility associated with future production, the Company expects to mitigate, but not eliminate, the potential effects of variability in net cash provided by operating activities due to fluctuations in commodity prices.

The Company enters into commodity hedging transactions primarily in the form of swap contracts that are designed to provide a fixed price and, from time to time, put options that are designed to provide a fixed price floor with the opportunity for upside. The Company enters into these transactions with respect to a portion of its projected production to provide an economic hedge of the risk related to the future commodity prices received. The Company does not enter into derivative contracts for trading purposes. There have been no significant changes to the Company’s objectives, general strategies or instruments used to manage the Company’s commodity price risk exposures from the year ended December 31, 2012.

The Company maintains a substantial portion of its hedges in the form of swap contracts. From time to time, the Company has chosen to purchase put option contracts primarily in connection with acquisition activity to hedge volumes in excess of those already hedged with swap contracts. The appropriate level of production to be hedged is an ongoing consideration and is based on a variety of factors, including current and future expected commodity market prices, cost and availability of put option contracts, the level of acquisition activity and the Company’s overall risk profile, including leverage and size and scale considerations. As a result, the appropriate percentage of production volumes to be hedged may change over time. To date in 2013, the Company has not purchased any put options. In certain historical periods, the Company paid an incremental premium to increase the fixed price floors on existing put options because the Company typically hedges multiple years in advance and in some cases commodity prices had increased significantly beyond the initial hedge prices. As a result, the Company determined that the existing put option strike prices did not provide reasonable downside protection in the context of the current market.

At September 30, 2013, the fair value of fixed price swaps and put contracts was a net asset of approximately \$805 million. A 10% increase in the index oil and natural gas prices above the September 30, 2013, prices would result in a net asset of approximately \$75 million, which represents a decrease in the fair value of approximately \$730 million; conversely, a 10% decrease in the index oil and natural gas prices below September 30, 2013, prices would result in a net asset of approximately \$1.6 billion, which represents an increase in the fair value of approximately \$777 million. At December 31, 2012, the fair value of fixed price swaps and put option contracts was a net asset of approximately \$899 million. A 10% increase in the index oil and natural gas prices above December 31, 2012, prices would result in a net liability of approximately \$29 million, which represents a decrease in the fair value of approximately \$928 million; conversely, a 10% decrease in the index oil and natural gas prices below December 31, 2012, prices would result in a net asset of approximately \$1.8 billion, which represents an increase in the fair value of approximately \$946 million.

The Company determines the fair value of its oil and natural gas derivatives utilizing pricing models that use a variety of techniques, including market quotes and pricing analysis. Inputs to the pricing models include publicly available prices and forward price curves generated from a compilation of data gathered from third parties. Company management validates the data provided by third parties by understanding the pricing models used, obtaining market values from other pricing sources, analyzing pricing data in certain situations and confirming that those securities trade in active markets.

45

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk - Continued

The prices of oil, natural gas and NGL have been extremely volatile, and the Company expects this volatility to continue. Prices for these commodities may fluctuate widely in response to relatively minor changes in the supply of and demand for such commodities, market uncertainty and a variety of additional factors that are beyond its control. Actual gains or losses recognized related to the Company's derivative contracts will likely differ from those estimated at September 30, 2013, and December 31, 2012, and will depend exclusively on the price of the commodities on the specified settlement dates provided by the derivative contracts.

The Company cannot be assured that its counterparties will be able to perform under its derivative contracts. If a counterparty fails to perform and the derivative arrangement is terminated, the Company's cash flow and ability to pay distributions could be impacted.

Interest Rate Risk

At September 30, 2013, the Company had long-term debt outstanding under its Credit Facility of approximately \$1.7 billion, which incurred interest at floating rates (see Note 6). A 1% increase in the London Interbank Offered Rate ("LIBOR") would result in an estimated \$17 million increase in annual interest expense.

At December 31, 2012, the Company had long-term debt outstanding under its Credit Facility of approximately \$1.2 billion, which incurred interest at floating rates. A 1% increase in the LIBOR would result in an estimated \$12 million increase in annual interest expense.

Counterparty Credit Risk

The Company accounts for its commodity derivatives and, when applicable, its interest rate derivatives at fair value on a recurring basis (see Note 8). The fair value of these derivative financial instruments includes the impact of assumed credit risk adjustments, which are based on the Company's and counterparties' published credit ratings, public bond yield spreads and credit default swap spreads, as applicable.

At September 30, 2013, the average public bond yield spread utilized to estimate the impact of the Company's credit risk on derivative liabilities was approximately 1.36%. A 1% increase in the average public bond yield spread would result in no significant increase or decrease in net income for the nine months ended September 30, 2013. At September 30, 2013, the credit default swap spreads utilized to estimate the impact of counterparties' credit risk on derivative assets ranged between 0% and 3.22%. A 1% increase in each of the counterparties' credit default swap spreads would result in an estimated \$14 million decrease in net income for the nine months ended September 30, 2013.

At December 31, 2012, the average public bond yield spread utilized to estimate the impact of the Company's credit risk on derivative liabilities was approximately 2.47%. A 1% increase in the average public bond yield spread would result in an estimated \$131,000 increase in net income for the year ended December 31, 2012. At December 31, 2012, the credit default swap spreads utilized to estimate the impact of counterparties' credit risk on derivative assets ranged between 0% and 3.22%. A 1% increase in each of the counterparties' credit default swap spreads would result in an estimated \$9 million decrease in net income for the year ended December 31, 2012.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, and the Company's Audit Committee of the Board of Directors, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

The Company carried out an evaluation under the supervision and with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of September 30, 2013.

Changes in the Company's Internal Control Over Financial Reporting

The Company's management is also responsible for establishing and maintaining adequate internal controls over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. The Company's internal controls were designed to provide reasonable assurance as to the reliability of its financial reporting and the preparation and presentation of the condensed consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States.

Because of its inherent limitations, internal control over financial reporting may not detect or prevent misstatements. Projections of any evaluation of the effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

There were no changes in the Company's internal controls over financial reporting during the third quarter of 2013 that materially affected, or were reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

Part II - Other Information

Item 1. Legal Proceedings

For a discussion of legal proceedings, see Note 10 of Notes to Condensed Consolidated Financial Statements.

Item 1A. Risk Factors

Our business has many risks. Factors that could materially adversely affect our business, financial position, results of operations, liquidity or the trading price of our units are described in Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2012. Except as set forth below, as of the date of this report, these risk factors have not changed materially. This information should be considered carefully, together with other information in this report and other reports and materials we file with the United States Securities and Exchange Commission ("SEC").

Risks Relating to Our Business

We may not have sufficient net cash provided by operating activities to pay our distribution at the current distribution level, or at all, and as a result, future distributions to our unitholders may be reduced or eliminated.

Our net cash provided by operating activities is frequently less than cash distributions to our unitholders. While our Board of Directors makes discretionary adjustments to net cash provided by operating activities when declaring a distribution for the current period, if we generate insufficient net cash provided by operating activities for a sustained period of time, our Board of Directors may determine to reduce or eliminate our distribution to unitholders. Any such reduction in distributions may cause the trading price of our units to decline. Factors that may cause us to generate net cash provided by operating activities that is insufficient to pay our current distribution to unitholders include, among other things, the following:

- Production from existing assets: Our revenues are dependent on how much oil, natural gas and NGLs we produce. If our existing assets under-perform for a prolonged period of time with respect to expected production volumes, our revenues may be lower than expected, and net cash provided by operating activities could be insufficient to pay our current distribution to unitholders.

NGL commodity prices: We have been and continue to be limited in our ability to effectively hedge our NGL production. As a result, we are subject to the current depressed price environment for NGLs, and in particular, ethane prices. If current price levels for NGLs continue into the future, our revenues and results of operations will be affected, and net cash provided by operating activities could be insufficient to pay our current distribution to unitholders.

Access to and cost of capital: Accretive acquisitions are an integral component of our business strategy. When revenues are expected to be lower as a result of under-performance of assets, weakening commodity prices on unhedged volumes or declining contract prices on hedged volumes, we seek to make accretive acquisitions of oil and natural gas properties to cover potential shortfalls in net cash provided by operating activities in order to maintain our distribution level. As a result of the pending SEC inquiry, we may be limited in our ability to access the capital markets at an acceptable cost or at all; thus our ability to make accretive acquisitions may be limited.

As a result of these and other factors, the amount of cash we may distribute to our unitholders in the future may be significantly less than the current distribution level or the distribution may be suspended or eliminated.

If we are unable to fully offset declines in production and proved developed producing reserves from discretionary reductions for a portion of our oil and natural gas development costs, our net cash provided by operating activities could be reduced, which could adversely affect our ability to pay a distribution at the current level or at all.

In determining the amount of cash that we distribute to unitholders, our Board of Directors establishes at the end of each year the estimated amounts (which we refer to as discretionary reductions for a portion of oil and natural gas development costs) that we believe will be necessary during the following year to fully offset declines in production and proved developed producing reserves through drilling and development activities. In determining this portion of oil and natural gas development costs (which includes estimated drilling and development costs associated with projects to convert a portion of non-producing reserves to producing status but does not include the historical cost of acquired properties as those amounts have already been spent in prior periods and were financed primarily with external sources of funding), management evaluates historical results of

Table of Contents

Item 1A. Risk Factors - Continued

our drilling and development activities based on periodically revised and updated information from past years to assess the costs, adequacy and effectiveness of such activities and future assumptions regarding cost trends, production and decline rates and reserve recoveries. However, our management does not conduct an analysis to evaluate historical amounts of capital actually spent on such drilling and development activities. Our ability to pursue projects with the intent to fully offset declines in production and proved developed producing reserves through drilling and development activities is limited to our inventory of development opportunities on our existing acreage position. Management's estimate of this discretionary portion of our oil and natural gas development costs does not include the historical acquisition cost of projects pursued during the year or the acquisition of new oil and natural gas reserves. Moreover, our assumptions regarding costs, production and decline rates and reserve recoveries may prove incorrect. If we are unable to fully offset declines in production and proved developed producing reserves from this discretionary portion of our oil and natural gas development costs, our net cash provided by operating activities could be reduced, which could adversely affect our ability to pay a distribution at the current level or at all. Furthermore, our existing reserves, inventory of drilling locations and production levels will decline over time as a result of development and production activities. Consequently, if we were to limit our total capital expenditures to this discretionary portion of our oil and natural gas development costs and not complete acquisitions of new reserves, total reserves would decrease over time, resulting in an inability to sustain production at current levels, which could adversely affect our ability to pay a distribution at the current level or at all.

Risks Relating to the SEC Inquiry and Shareholder Litigation

We will incur significant costs associated with the pending SEC inquiry and other legal proceedings, and the ultimate outcome of these matters is uncertain.

We, LinnCo and our and LinnCo's current and former directors and officers are the subjects of a number of purported class action lawsuits and derivative lawsuits, and there is an ongoing private SEC inquiry regarding us and LinnCo. We cannot predict the duration, outcome or impact of these pending matters, but the lawsuits could result in judgments against us and LinnCo and directors and officers named as defendants. Furthermore, we are unable to predict the timing or outcome of the SEC inquiry or estimate the nature or amount of any possible sanction or enforcement action the SEC could seek to impose, which could include fines, penalties, damages, sanctions, administrative remedies and modifications to our disclosure, accounting and business practices, including a prohibition on specific conduct or a potential restatement of our financial statements, any of which could be material. Our legal expenses incurred in defending the lawsuits and responding to the SEC inquiry have been significant and we expect them to continue to be significant in the future. In addition, members of our senior management have been required to divert significant attention and resources to these matters, reducing the time, attention and resources they have available to devote to managing our business. These additional expenses and diversion of attention and resources, along with any reputational issues raised by these lawsuits and inquiry, may materially affect our business and results of operations and consequently our cash flow.

Our ability to grow and increase cash flow is limited by reduced access to capital markets.

Our business model depends on access to capital markets at an acceptable cost to fund acquisitions and our capital expenditures. Due to uncertainty regarding the timing, duration and subject matter of the SEC's inquiry and negative press related to such inquiry, we are limited in our ability to access the capital markets. If this situation persists, we may not be able to access the capital markets on acceptable terms, or at all, to make acquisitions or fund our capital expenditures necessary to sustain or increase current production, which may reduce our ability to generate higher revenues and consequently our ability to increase cash flow and sustain or increase distributions.

Failure to complete or delays in completing LinnCo's pending merger with Berry could have an adverse impact on our unit price and our business.

Due to the pending SEC inquiry, the timing of LinnCo's pending merger with Berry is uncertain. If the merger is not completed, or there are delays in completing the merger, our unit price and our business could be adversely affected and we would be subject to a number of risks, including the following:

- the current trading price of our units may reflect a market assumption that the merger will be completed and a failure to complete or delays in completing the merger could result in a further decline in the price of our units;

we may not realize the benefits expected from the merger, including cost savings, increased production, enhanced financial and competitive position and diversification of operating locations and assets;

Table of Contents

Item 1A. Risk Factors - Continued

we will be required to pay certain costs relating to the merger, including certain investment banking, financing, legal and accounting fees and expenses, whether or not the merger is completed; and we may be responsible, under certain circumstances, for the net losses resulting from the termination of the derivatives transactions entered into by Berry at our request on or after the date of the merger agreement, which net losses could be significant.

There can be no assurance that these risks will not materialize, and if any of them do, they may have an adverse effect on our financial position, results of operations and net cash provided by operating activities.

The SEC inquiry, shareholder litigation and other factors may make the market price of our units highly volatile. The market price of our units could fluctuate substantially in the future due to the factors discussed in this “Risk Factors” section, including the risks relating to the SEC inquiry and shareholder litigation, and other factors including rumors or dissemination of false information; changes in coverage or earnings estimates by analysts; our ability to meet analysts’ or market expectations; and sales of our units by existing unitholders. For example, after the announcement of the SEC inquiry, the price of our units dropped significantly. Currently a number of purported class action lawsuits have been filed against us as well as derivative demands on behalf of certain purchasers of our units. Litigation of this kind could result in additional substantial litigation costs, a damages award against us, further diversion of management’s attention and additional volatility in the market price of our units.

Negative press from the SEC inquiry and shareholder litigation or otherwise could have a material adverse effect on our business, financial condition and results of operations.

The negative press resulting from the SEC inquiry and shareholder litigation matters have harmed our reputation and could otherwise result in a loss of future business with our counterparties and business partners. It could also adversely affect the public’s perception of us and lead to reluctance by new parties to do business with us. If our business partners and customers curtail their relationships with us, we could experience higher costs of doing business due to less favorable terms and/or the need to find alternative partners. There can be no assurance that our business partners and customers will not attempt to end or curtail their relationships with us.

Risks Relating to the Merger

The merger will not be completed on or prior to October 31, 2013 (the “End Date”). After the End Date, any of us, LinnCo or Berry may unilaterally terminate the merger agreement at any time prior to completion of the merger. The merger will not be completed on or prior to the End Date, and although the merger agreement does not automatically terminate as of such date, any of us, LinnCo or Berry may unilaterally terminate the merger agreement at any time following such date prior to completion of the merger. There can be no assurances as to whether the parties will agree to extend the End Date or that the parties will refrain from exercising their rights to terminate the merger agreement.

The exchange ratio is fixed and will not be adjusted in the event of any change in either LinnCo’s share price or Berry’s stock price.

Upon the consummation of the merger, each share of Berry common stock will be converted into the right to receive 1.25 LinnCo common shares, with cash paid in lieu of fractional shares. This exchange ratio was fixed in the merger agreement and will not be adjusted for changes in the market price of either LinnCo common shares or Berry common stock. Changes in the price of LinnCo common shares prior to the merger will affect the market value of the merger consideration that Berry stockholders will receive on the date of the merger. Stock price changes may result from a variety of factors (many of which are beyond our control and the control of Berry and LinnCo), including the following factors:

- market reaction to the announcement of the merger and the prospects of the combined company;
 - changes in our, Berry’s and LinnCo’s respective businesses, operations, assets, liabilities and prospects;
- changes in market assessments of our, Berry’s or LinnCo’s business, operations, financial position and prospects;
- market assessments of the likelihood that the merger will be completed;

Table of Contents

Item 1A. Risk Factors - Continued

interest rates, general market and economic conditions and other factors generally affecting the price of LinnCo common shares and Berry common stock;
federal, state and local legislation, governmental regulation and legal developments in the businesses in which we, Berry and LinnCo operate; and
other factors beyond our, Berry's and LinnCo's control, including those described or referred to elsewhere in this "Risk Factors" section.

The price of LinnCo common shares at the closing of the merger may vary from its price on the date the merger agreement was executed, on the date of this quarterly report and on the date of the Berry special meeting and the LinnCo annual meeting. As a result, the market value of the merger consideration represented by the exchange ratio will also vary.

Because the merger will be completed after the dates of our annual meeting, the Berry special meeting and the LinnCo annual meeting, the exact market value of the LinnCo common shares that Berry stockholders will receive upon completion of the merger will be unknown on such date. Our unitholders should consider the following two risks:

If the price of LinnCo common shares increases between the date the merger agreement was signed or the date of the LinnCo annual meeting and the effective time of the merger, Berry stockholders will receive LinnCo common shares that have a market value upon completion of the merger that is greater than the market value of such shares calculated pursuant to the exchange ratio when the merger agreement was signed or the date of the LinnCo annual meeting, respectively. Therefore, while the number of LinnCo common shares to be issued per share of Berry common stock is fixed, the LinnCo common shareholders cannot be sure of the market value of the consideration that will be paid to Berry stockholders upon completion of the merger.

If the price of LinnCo common shares declines between the date the merger agreement was signed or the date of the Berry special meeting and the effective time of the merger, including for any of the reasons described above, Berry stockholders will receive LinnCo common shares that have a market value upon completion of the merger that is less than the market value of such shares calculated pursuant to the exchange ratio on the date the merger agreement was signed or on the date of the Berry special meeting, respectively. Therefore, while the number of LinnCo common shares to be issued per share of Berry common stock is fixed, Berry stockholders cannot be sure of the market value of the LinnCo common shares they will receive upon completion of the merger or the market value of LinnCo common shares at any time after the completion of the merger.

The merger and related transactions are subject to approval by our unitholders, Berry stockholders and LinnCo shareholders.

In order for the merger to be completed, Berry stockholders must adopt the merger agreement and approve the merger and the other transactions contemplated by the merger agreement, which requires approval by a majority of the votes entitled to be cast by all outstanding shares of Berry common stock as of the record date for the Berry special meeting. While a vote of the LinnCo common shareholders is not required to approve the merger, the approval of the LinnCo common shareholders is required under NASDAQ Marketplace Rule 5635(a) in order for LinnCo to be authorized to issue LinnCo common shares to Berry stockholders in connection with the merger. Approval of the issuance of LinnCo common shares to Berry stockholders under NASDAQ rules requires the affirmative vote of a majority of votes cast by holders of LinnCo common shares at the LinnCo annual meeting. Additionally, the LinnCo common shareholders must approve certain amendments to the limited liability company agreement of LinnCo, which requires the affirmative vote of a majority of outstanding LinnCo voting shares and a majority of outstanding LinnCo common shares, voting as separate classes. In addition, in order for the merger to be completed, our unitholders must approve the issuance of our units to LinnCo in connection with the contribution of Berry to us, which requires the affirmative vote of a majority of the votes cast by holders of our units at our annual meeting under NASDAQ Marketplace Rule 5635(a).

We may experience difficulties in integrating the Berry business, which could cause the combined company to fail to realize many of the anticipated potential benefits of the merger.

We entered into the merger agreement because we believe that the transaction will be beneficial to Berry and its stockholders, LinnCo and its shareholders and us and our unitholders. Achieving the anticipated benefits of the

transaction will depend in part upon whether we are able to integrate the business of Berry in an efficient and effective manner. We may not be able to accomplish this integration process smoothly or successfully. The difficulties of integrating Berry's business with our business

Table of Contents

Item 1A. Risk Factors - Continued

potentially will include, among other things, the necessity of coordinating geographically separated organizations and addressing possible differences incorporating cultures and management philosophies, and the integration of certain operations following the transaction, which will require the dedication of significant management resources and which may temporarily distract management's attention from the day-to-day business of the combined company.

An inability to realize the full extent of the anticipated benefits of the transaction, as well as any delays encountered in the transition process, could have an adverse effect upon our revenues, level of expenses and operating results after the acquisition of Berry, which may affect the value of our units after the closing of the merger.

The terms of Berry's indebtedness may restrict Berry's ability to make distributions to us.

Berry's credit facility and the indentures governing its outstanding notes contain, and any future indebtedness may also contain, a number of restrictive covenants that impose operating restrictions on Berry, including restrictions on Berry's ability to make distributions to us. Any such restrictions on Berry's ability to make distributions to us would adversely affect our ability to make distributions to our unitholders.

The market price of our units and LinnCo common shares after the merger may be affected by factors different from those affecting our units or the shares of LinnCo or Berry currently.

Our, Berry's and LinnCo's businesses differ and, accordingly, our results of operations after the acquisition of Berry and the market price of our units and LinnCo common shares after the merger may be affected by factors that differ from those currently affecting our, Berry's or LinnCo's independent results of operations.

The pendency of the merger could adversely affect our, Berry's and LinnCo's business and operations.

In connection with the pending merger, some of our and Berry's customers or vendors may delay or defer decisions, which could negatively impact our, Berry's and LinnCo's revenues, earnings, cash flows and expenses, regardless of whether the merger is completed. In addition, due to operating covenants in the merger agreement, each of us, Berry and LinnCo may be unable, during the pendency of the merger, to pursue certain strategic transactions, undertake certain significant capital projects, undertake certain significant financing transactions and otherwise pursue other actions that are not in the ordinary course of business.

The merger is subject to the receipt of consents and approvals from governmental entities that may impose conditions that could have an adverse effect on us or LinnCo.

Before the merger may be completed, various waivers, approvals, clearances or consents must be obtained from the FTC, FERC and the Antitrust Division of the Department of Justice (the "Antitrust Division") and other authorities in the United States. These governmental entities may impose conditions on the completion of the merger or require changes to the terms of the merger. Although Berry and LinnCo do not currently expect that any such conditions or changes will be imposed, there can be no assurance that they will not be, and such conditions or changes could have the effect of delaying completion of the merger or imposing additional costs on us and LinnCo or limiting our and LinnCo's revenues following the merger, any of which might have an adverse effect on us or LinnCo following the merger.

Failure to complete the merger could negatively affect our unit price and Berry's and LinnCo's stock price, respectively, and their respective future businesses and financial results.

If the merger is not completed, our, Berry's and LinnCo's ongoing businesses may be adversely affected and we, Berry and LinnCo will be subject to several risks and consequences, including the following:

• under the merger agreement, Berry may be required, under certain circumstances, to pay LinnCo a termination fee of \$83.7 million or \$25.7 million in respect of LinnCo's expenses;

• under the merger agreement, LinnCo may be required, under certain circumstances, to pay Berry a termination fee of \$83.7 million or \$25.7 million in respect of Berry's expenses;

• We, Berry and LinnCo will be required to pay certain costs relating to the merger, whether or not the merger is completed, such as legal, accounting, financial advisor and printing fees;

Table of Contents

Item 1A. Risk Factors - Continued

• We, Berry and LinnCo would not realize the expected benefits of the merger; under the merger agreement, we and each of Berry and LinnCo are subject to certain restrictions on the conduct of its business prior to completing the merger which may adversely affect its ability to execute certain of its business strategies;

• matters relating to the merger may require substantial commitments of time and resources by Berry, LinnCo and our management, which could otherwise have been devoted to other opportunities that may have been beneficial to Berry, LinnCo and us as independent companies; and

• We, Berry or LinnCo may be responsible for the net losses resulting from the termination of the derivative transactions entered into by Berry on or after the date of the merger agreement, which net losses could be significant. In addition, if the merger is not completed, we, Berry and LinnCo may experience negative reactions from the financial markets and from our respective customers and employees. We, Berry and/or LinnCo also could be subject to litigation related to any failure to complete the merger or to enforcement proceedings commenced against us, Berry or LinnCo to attempt to force them to perform their respective obligations under the merger agreement.

We and LinnCo expect to incur substantial expenses related to the merger.

We and LinnCo expect to incur substantial expenses in connection with completing the merger and integrating the business, operations, networks, systems, technologies, policies and procedures of Berry with our own. There are a large number of systems that must be integrated, including billing, management information, purchasing, accounting and finance, sales, payroll and benefits, fixed assets, lease administration and regulatory compliance. Although we and LinnCo have assumed that a certain level of transaction and integration expenses would be incurred, there are a number of factors beyond our control that could affect the total amount or the timing of integration expenses. Many of the expenses that will be incurred, by their nature, are difficult to estimate accurately at the present time. Due to these factors, the transaction and integration expenses associated with the merger could, particularly in the near term, exceed the savings that the combined company expects to achieve from the elimination of duplicative expenses and the realization of economies of scale and cost savings related to the integration of the Berry business following the completion of the merger. As a result of these expenses, we and LinnCo expect to take charges against our respective earnings before and after the completion of the merger. The charges taken in connection with the merger are expected to be significant, although the aggregate amount and timing of such charges are uncertain at present.

Following the merger, we and Berry may be unable to retain key employees.

Our success and the success of LinnCo after the merger will depend in part upon our ability to retain key Berry and our employees. Key employees may depart either before or after the merger because of issues relating to the uncertainty and difficulty of integration or a desire not to remain following the merger. Accordingly, no assurance can be given that we will be able to retain key Berry employees or our employees to the same extent as in the past.

Pending litigation against us, Berry and LinnCo could result in an injunction preventing completion of the merger, the payment of damages in the event that the merger is completed and/or may adversely affect the combined company's business, financial condition or results of operations following the merger.

Purported stockholder class actions have been filed against, among others, us, Berry, LinnCo and the members of the Berry board of directors. Multiple actions seek an injunction barring or rescinding the merger and damages in connection with the proposed transactions. If a final settlement is not reached, or if dismissals of these actions are not obtained, these lawsuits could prevent or delay the completion of the merger, and result in substantial costs to us Berry and LinnCo, including costs associated with the indemnification of directors. Additional lawsuits related to the merger may be filed against us, Berry, LinnCo and each of our respective directors. The defense or settlement of any lawsuit or claim that remains unresolved at the time the merger is completed may adversely affect the combined company's business, financial condition or results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Table of Contents

In October 2008, the Board of Directors of the Company authorized the repurchase of up to \$100 million of the Company's outstanding units from time to time on the open market or in negotiated purchases. The repurchase plan does not obligate the Company to acquire any specific number of units and may be discontinued at any time. The Company did not repurchase any units during the nine months ended September 30, 2013. At September 30, 2013, approximately \$56 million was available for unit repurchase under the program.

Item 3. Defaults Upon Senior Securities

None

Item 4. Mine Safety Disclosures

Not applicable

Item 5. Other Information

The Company is a limited liability company and its units representing limited liability company interests ("units") are listed on the NASDAQ Global Select Market. The SEC's taxonomy for interactive data reporting does not contain tags that include the term "units" for all existing equity accounts; therefore, in certain instances, the Company has used tags that refer to "shares" or "stock" rather than "units" in its interactive data exhibit. These tags were selected to enhance comparability between the Company and its peers and it should not be inferred from the usage of these tags that an investment in the Company is in any form other than "units" as described above. The Company's interactive data files are included as Exhibit 101 to this Quarterly Report on Form 10-Q.
