NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

(in thousands, except share data)

Note 1 - Organization and Nature of Business Operations

Business

NV5 Holdings, Inc. and its subsidiaries (collectively, the “Company” or “NV5”) is a provider of professional and technical engineering and consulting solutions in the infrastructure, energy, construction, real estate and environmental markets, operating through a network of 25 locations in California, Colorado, Florida, Pennsylvania, New Jersey and Utah. The Company’s clients include the U.S. federal, U.S. state and local governments, and the private sector. NV5 conducts its operations through three primary operating subsidiaries: (i) Nolte Associates, Inc. (“Nolte”), which began operations in 1949, was incorporated as a California corporation in 1957 and was acquired by NV5 Global, Inc. in 2010, (ii) NV5 Global, Inc. (formerly known as NV5, Inc.) (“NV5 Global”), which was incorporated as a Delaware corporation in 2009, and (iii) AK Environmental, LLC, which was originally incorporated as a New Jersey limited liability company in 2002 and reincorporated in North Carolina in 2013, was acquired by the Company in 2014. In August 2010, NV5 Global acquired a majority of the outstanding shares of Nolte and succeeded to substantially all of Nolte’s business. In October 2011, NV5 Global and Nolte completed a reorganization transaction in which NV5 Holdings, Inc. was incorporated as a Delaware corporation, acquired all of the outstanding shares of NV5 Global and Nolte, and, as a result, became the holding company under which the Company conducts operations. NV5 provides a wide range of services, including, but not limited to, planning, design, consulting, permitting, inspection and field supervision, management oversight, forensic engineering, litigation support, condition assessment and compliance certification.

Significant Transactions

On January 31, 2014, the Company acquired certain assets of Air Quality Consulting, Inc. (“AQC”) located in Tampa, Florida, which specializes in occupational health, safety and environmental consulting, for a purchase price of up to $815, consisting of cash, notes and common stock (see Note 4).

On March 21, 2014, the Company acquired AK Environmental, LLC (“AK”), a natural gas pipeline inspection, construction management and environmental consulting firm, primarily servicing the Northeast, Mid-Atlantic and

Southeast United States. The purchase price was $7,000, consisting of cash, notes and common stock (see Note 4).

On June 30, 2014, the Company acquired certain assets of Owner's Representative Services, Inc. (“ORSI”), a program management firm specializing in healthcare facilities development and construction projects, for a purchase price of up to $1,300, consisting of cash, notes and common stock (see Note 4).

These acquisitions expanded the Company’s environmental and project management services and allow NV5 to offer these services on a broader scale within its existing network. In addition, the acquisitions strengthen NV5’s geographic diversification and allow the Company to continue expanding its national footprint.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation and Principles of Consolidation

The consolidated financial statements of the Company are presented in U.S. dollars in conformity with accounting principles generally accepted in the United States (“U.S. GAAP”) and have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”) for reporting of interim financial information. Pursuant to such rules and regulations, certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted. The consolidated financial statements include the accounts of NV5 Holdings, Inc. and those of its wholly owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

In the opinion of management, the accompanying unaudited interim consolidated financial statements of the Company contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position and results of operations of the Company as of the dates and for the periods presented. Accordingly, these statements should be read in conjunction with the financial statements and notes contained in the Company’s Annual Report on Form 10-K for the year ended December 31, 2013. The accompanying consolidated balance sheet as of December 31, 2013 has been derived from those financial statements. The results of operations and cash flows for interim periods presented are not necessarily indicative of the results to be expected for any future interim period or for the full 2014 fiscal year.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

(in thousands, except share data)

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Concentration of Credit Risk

Trade receivable balances carried by the Company are comprised of accounts from a diverse client base across a broad range of industries and are not collateralized. However, approximately 50% and 67% of the Company's gross revenues for the six months ended June 30, 2014 and 2013, respectively, are from California-based projects and approximately 14% and 17% of revenues for the six months ended June 30, 2014 and 2013, respectively, are from one client. Furthermore, approximately 42% and 40% of the Company's accounts receivable as of June 30, 2014 and December 31, 2013 is from government and government-related contracts. As management continually evaluates the creditworthiness of these and future clients, the risk of credit default is considered limited.

Fair Value of Financial Instruments

The Company considers cash and cash equivalents, accounts receivable, cash surrender value of officers' life insurance, accounts payable, income taxes payable, accrued liabilities and debt obligations to meet the definition of financial instruments. As of June 30, 2014 and December 31, 2013, the carrying amount of each financial instrument, with the exception of debt and contingent consideration liabilities recognized in connection with business combinations, approximated the instrument's respective fair value due to the short-term nature and maturity of these instruments.

The carrying amounts of debt obligations approximate their fair values as the terms are comparable to terms currently offered by local lending institutions for arrangements with similar terms to industry peers with comparable credit characteristics.

The Company applies the provisions of Accounting Standards Codification (“ASC”) 805, *Business Combinations*, in the accounting for its acquisitions, which requires recognition of the assets acquired and the liabilities assumed at their acquisition date fair values, separately from goodwill. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the net of the acquisition date fair values of the tangible and identifiable intangible assets acquired and liabilities assumed. The allocation of the purchase prices to identifiable intangible assets (customer relationships, customer backlog, trade name and non-compete) are based on valuations performed to determine the fair values of such assets as of the acquisition dates. The fair values of earn-out arrangements are included as part of the purchase price of the acquired companies on their respective acquisition dates. The Company estimates the fair value of contingent earn-out payments as part of the initial purchase price and records the estimated fair value of contingent consideration as a liability on the consolidated balance sheet.

Several factors are considered when determining contingent earn-out liabilities as part of the purchase price, including (i) the valuation of the acquisitions is not supported solely by the initial consideration paid, and the contingent earn-out formula is a critical and material component of the valuation approach to determining the purchase price; and (ii) the former owners of the acquired companies that remain as key employees receive compensation other than contingent earn-out payments at a reasonable level compared with the compensation of other key employees. The contingent earn-out payments are not affected by employment termination.

The Company measures contingent consideration liabilities recognized in connection with business combinations at fair value on a recurring basis using significant unobservable inputs classified within Level 3, as defined in the accounting guidance. The Company uses a probability-weighted approach as a valuation technique to determine the fair value of the contingent consideration on the acquisition date and at each reporting period. The significant unobservable inputs used in the fair value measurements are projections over the earn-out period (generally one year), and the probability outcome percentages that are assigned to each scenario. Significant increases or decreases to either of these inputs in isolation could result in a significantly higher or lower liability with a higher liability capped by the contractual maximum of the contingent earn-out obligation. Ultimately, the liability will be equivalent to the amount paid, and the difference between the fair value estimate on the acquisition date and amount paid will be recorded in earnings.

Goodwill and Intangible Assets

Goodwill is the excess of consideration paid for an acquired entity over the amounts assigned to assets acquired, including other identifiable intangible assets, and liabilities assumed in a business combination. To determine the amount of goodwill resulting from a business combination, the Company performs an assessment to determine the acquisition date fair value of the acquired company's tangible and identifiable intangible assets and liabilities.

Goodwill is required to be evaluated for impairment on an annual basis or whenever events or changes in circumstances indicate the asset may be impaired. An entity has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. These qualitative factors include: macroeconomic and industry conditions, cost factors, overall financial performance and other relevant entity-specific events. If the entity determines that this threshold is met, then performing the two-step quantitative impairment test is unnecessary. The two-step impairment test requires a comparison of the carrying value of the assets and liabilities associated with a reporting unit, including goodwill, with the fair value of the reporting unit. The Company determines fair value through multiple valuation techniques, and weights the results accordingly. NV5 is required to make certain subjective and complex judgments in assessing whether an event of impairment of goodwill has occurred, including assumptions and estimates used to determine the fair value of its reporting units. If the carrying value of a reporting unit exceeds the fair value of the reporting unit, the Company would calculate the implied fair value of its reporting unit goodwill as compared to the carrying value of its reporting unit goodwill to determine the appropriate impairment charge, if any. We have elected to perform our annual goodwill impairment review on August 1 of each year. NV5 has historically conducted its annual impairment tests using the quantitative method of evaluating goodwill.

Identifiable intangible assets primarily include customer backlog, customer relationships, trade names and non-compete agreements. Amortizable intangible assets are amortized over their estimated useful lives and reviewed for impairment whenever events or changes in circumstances indicate that the assets may be impaired. If an indicator of impairment exists, the Company compares the estimated future cash flows of the asset, on an undiscounted basis, to the carrying value of the asset. If the undiscounted cash flows exceed the carrying value, no impairment is indicated. If the undiscounted cash flows do not exceed the carrying value, then impairment, if any, is measured as the difference between fair value and carrying value, with fair value typically based on a discounted cash flow model.

See Note 7 for further information on goodwill and identified intangibles.

Earnings per Share

Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company. In accordance with the Financial Accounting Standards Board ("FASB") ASC 260, *Earnings per Share*, the effect of potentially dilutive securities is not considered during periods of loss or if the effect is anti-dilutive. The weighted average number of shares outstanding in calculating basic earnings per share for the three and six months ended June 30, 2014 and 2013 exclude 603,499 and 429,622 non-vested restricted shares, respectively, issued since 2010. These non-vested restricted shares are not included in basic earnings per share until the vesting requirement is met. The weighted average number of shares outstanding in calculating diluted earnings per share for the three and six months ended June 30, 2014 and 2013 includes, if outstanding, non-vested restricted shares and units, issuable shares related to acquisitions, and the warrants associated with the Company's initial public offering. In calculating diluted earnings per share for the three and six months ended June 30, 2014 and 2013, there were no potentially dilutive securities that were not considered, except for the warrants associated with the Company's initial public offering for the three and six months ended June 30, 2013, as the effect was anti-dilutive.

Note 3 – Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers.* This ASU is a comprehensive new revenue recognition model that requires a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. This ASU is effective for annual reporting periods beginning after December 15, 2016 and early adoption is not permitted. Accordingly, the Company will adopt this ASU on January 1, 2017. Companies may use either a full retrospective or a modified retrospective approach to adopt this ASU and the Company has not yet determined which method it will apply. The Company is currently evaluating the impact of adopting ASU 2014-09 on the Company's consolidated net income, financial position or cash flows.

Note 4 – Business Acquisitions

On January 31, 2014, the Company acquired certain assets of Air Quality Consulting, Inc. (“AQC”) located in Tampa, Florida, which specializes in occupational health, safety and environmental consulting. The purchase price of up to $815 consisted of $250 in cash, a $300 non-interest bearing promissory note and $150 of the Company’s common stock (18,739 shares) as of the closing date. The purchase price also included a non-interest bearing earn-out of $115 payable in cash, subject to the achievement of a certain agreed upon metric for calendar year 2014, and is payable on April 1, 2015. The earn-out payment was recorded at estimated fair value based on a probability-weighted approach valuation technique used to determine the fair value of the contingent consideration on the acquisition date. As of June 30, 2014, the estimated fair value of this contingent consideration is approximately $69. The purchase price included a $300 uncollateralized non-interest bearing promissory note, with an imputed interest rate of 3.75%. The note is payable in two equal payments of $150 due on the first and second anniversaries of January 31, 2014, the effective date of the acquisition (see Note 9). The carrying value of this note was approximately $288 as of June 30, 2014.

On March 21, 2014, the Company acquired AK Environmental, LLC (“AK”), a natural gas pipeline inspection, construction management and environmental consulting firm, primarily servicing the Northeast, Mid-Atlantic and Southeast United States. The purchase price of $7,000 included $3,500 in cash, a $3,000 promissory note (bearing interest at 3.0%), payable in three installments of $1,000 due on the first, second and third anniversaries of March 21, 2014, the effective date of the acquisition (see Note 9), and $500 of the Company’s common stock (64,137 shares) as of the closing date of the acquisition.

On June 30, 2014, the Company acquired certain assets of Owner's Representative Services, Inc. (“ORSI”), a program management firm specializing in healthcare facilities development and construction projects. The purchase price of up to $1,300 consisted of $400 in cash, a $450 non-interest bearing promissory note, and $150 of the Company’s common stock (14,918 shares) as of the closing date, which were issued in July 2014. The purchase price also included a non-interest bearing earn-out of $300 payable in cash and the Company’s common stock, subject to the achievement of a certain agreed upon metric for calendar year 2014, and is payable on March 31, 2015. The earn-out payment was preliminarily recorded at its estimated fair value based on a probability-weighted approach valuation technique used to determine the fair value of the contingent consideration on the acquisition date. As of June 30, 2014, the preliminary estimated fair value of this contingent consideration is approximately $231. The purchase price also included a $450 uncollateralized non-interest bearing promissory note, with an imputed interest rate of 3.75%. This note is payable in two equal payments of $225 due on the first and second anniversaries of June 30, 2014, the effective date of the acquisition (see Note 9). The carrying value of this note was approximately $426 as of June 30, 2014.

In order to ultimately determine the fair values of tangible and intangible assets acquired and liabilities assumed for the 2014 acquisitions, the Company engaged a third-party independent valuation specialist. The independent valuation specialist completed the independent valuations for acquisitions completed as of June 30, 2014, including the AK and AQC acquisitions, which were preliminary as of March 31, 2014. During the three months ended June 30, 2014, the Company made some, but not material adjustments to the preliminary purchase price allocations for the AQC and AK acquisitions closed as of March 31, 2014. The third-party independent valuation specialist has completed a preliminary purchase price allocation for the ORSI acquisition based on historical inputs and data as of June 30, 2014. The Company expects the purchase price allocations for the ORSI acquisition to be completed by the end of the third quarter of 2014.

On April 30, 2013, the Company acquired certain assets and assumed certain liabilities of Consilium Partners, a 20-person owner's representation and program management firm that serves both public and private clients, such as municipalities, major hospitality firms and institutional real estate owners. Consilium Partners possesses specialized expertise in managing technically demanding projects, while having an affinity for leading teams and cultivating teamwork with the people who ultimately determine a project's success. The purchase price was $1,083, consisting of cash, notes (see Note 9) and the Company's common stock plus an earn-out of up to $1,000 in cash and/or common stock in the Company's sole discretion. Payment of the maximum $1,000 earn-out was subject to the achievement of a certain agreed upon metric for calendar year 2013, and payable in three annual installments beginning in January 31, 2014 in cash and/or common stock. The maximum earn-out payment of $1,000 is non-interest bearing. Therefore, the Company has discounted the $1,000 payment obligation for imputed interest. During 2013, the agreed upon metric was met and the earn-out was achieved. On January 31, 2014, the Company paid the first annual installment of $333, of which $233 was paid in cash and the remaining $100 was paid by issuing 12,987 shares of the Company's common stock. As of June 30, 2014 and December 31, 2013, the Company had contingent consideration obligations of $647 and $971, respectively.

The Company reviews and re-assesses the estimated fair value of its contingent consideration on a quarterly basis, and the updated fair value could differ materially from the initial estimates. Adjustments to the estimated fair value related to changes in all other unobservable inputs are reported in operating income. During the three and six months ended June 30, 2014, the Company recorded a change in fair value of $18 and $24, respectively, related to contingent consideration obligations due to the increased probability of achieving the earn-out metric defined at the time of acquisition.

The following table summarizes the preliminary fair values of the assets acquired and liabilities assumed as of the acquisition dates for acquisitions closed during 2014:

Accounts receivable	$2,292
Property and equipment	107
Prepaid expenses	41
Other assets	7
Intangible assets:	
Customer relationships	2,290
Trade name	341
Customer backlog	284
Non-compete	431
Total Assets	5,793
Liabilities	(576)
Net assets acquired	5,217
Consideration paid (Cash, Notes and stock)	8,580
Contingent earn-out liability (Cash and stock)	286
Total Consideration	8,866
Excess consideration over the amounts assigned to the net assets acquired (Goodwill)	$3,649

For income tax purposes, goodwill from these acquisitions is deductible over a fifteen-year period.

The consolidated financial statements of the Company for the three and six months ended June 30, 2014 include the results of operations from the businesses acquired during 2014 from their respective dates of acquisition to June 30, 2014. For the three and six months ended June 30, 2014, the results include gross revenues and pre-tax income of approximately $8.52 million and $471 and $9.22 million and $524, respectively. Included in general and administrative expense for the three and six months ended June 30, 2014 is $197 and $230, respectively, of acquisition-related costs pertaining to the Company’s acquisition activities.

The following table presents the unaudited, pro forma consolidated results of operations (in thousands, except per share amounts) for the three and six months ended June 30, 2014 and 2013 as if the AK acquisition had occurred as of January 1, 2013. The pro forma information provided below is compiled from the financial statements of the combined companies and includes pro forma adjustments for amortization expense, reduction in certain agreed on expenses, interest expense and the income tax impact of these adjustments. The pro forma results are not necessarily indicative of (i) the results of operations that would have occurred had the AK operations actually been acquired on January 1, 2013; or (ii) future results of operations:

	For the three months ended		**For the six months ended**	
	June 30, 2014	**June 30, 2013**	**June 30, 2014**	**June 30, 2013**

Note 7 – Goodwill and Intangible Assets

Goodwill

On August 1, 2013, the Company conducted its annual impairment tests using the quantitative method of evaluating goodwill. Based on the quantitative analyses the Company determined the fair value of each of the reporting units exceeded its carrying value. Therefore, the goodwill was not impaired and the Company did not recognize an impairment charge relating to goodwill as of August 1, 2013. There were no indicators, events or changes in circumstances that would indicate goodwill was impaired during the period from August 2, 2013 through June 30, 2014.

The table set forth below shows the change in goodwill during the six months ended June 30, 2014:

	June 30, 2014

Credit Facility

On January 31, 2014, the Company entered into a Business Loan Agreement with Western Alliance Bank, an Arizona corporation ("Western Alliance"), as lender, which provides for a two-year, $8,000 revolving credit facility with a maturity date of January 31, 2016 (the "Credit Facility"). The interest rate is prime rate plus 0.50%, with a minimum of 3.75%, which was the interest rate at June 30, 2014. The Credit Facility contains a cross default and cross collateralization provision with the Term Loan described below. The Credit Facility contains certain financial covenants, including an annual maximum debt to tangible net worth ratio of 4.0:1.0 as of December 31, 2013 and 8.5:1.0 for each annual period ending on the last day of each fiscal year thereafter. In addition, the Credit Facility contains an annual minimum debt service coverage ratio equal to 1.5:1.0 for each annual period ending on the last day of the fiscal year beginning December 31, 2013. The Credit Facility also contains financial reporting covenant provisions and other covenants, representations, warranties, indemnities, and events of default that are customary for facilities of this type. The Credit Facility is guaranteed by (i) NV5, (ii) Nolte, and (iii) Mr. Dickerson Wright. The Credit Facility is secured by a first priority lien on substantially all of the assets of the Company, NV5, and Nolte. In connection with entering into the Credit Facility, on January 31, 2014, the Company terminated two credit facilities totaling $4,000. In conjunction with closing the Credit Facility, the Company paid approximately $27 in debt issuance costs, which are included in Prepaid Expenses on the consolidated balance sheet and are being amortized into interest expense over the two-year term of the Credit Facility.

Term Loan

The Company has a note payable to Western Alliance with a maturity date of February 1, 2015 (the "Term Loan"). The interest rate on the Term Loan is prime with a minimum of 4.50%. As of June 30, 2014 and December 31, 2013, the actual interest rate was 4.50% and 5.0%, respectively. The Term Loan is payable in monthly principal installments of $46 with a lump sum of the remaining principal balance outstanding due at maturity. The Term Loan is collateralized by substantially all of the Company's assets and is guaranteed by certain of the Company's stockholders, NV5 Holdings, Inc., and Nolte, which guarantee in the case of Mr. Wright, remains in effect for the term of the Term Loan regardless of Mr. Wright's continuing employment. As of June 30, 2014 and December 31, 2013, the outstanding balance on the Term Loan was approximately $800 and $1,100, respectively.

Note Payable

The note held by the seller of the Nolte business (the “Nolte Note”) is currently outstanding with a maturity date of July 29, 2017. The Nolte Note bears interest at the prime rate plus 1%, subject to a maximum rate of 7.0%. As of June 30, 2014 and December 31, 2013, the actual interest rate was 4.25%. Under the terms of the Nolte Note, as amended, the Company pays quarterly principal installments of approximately $100 plus interest. The Nolte Note is unsecured and is subordinated to the Term Loan, although the Company is permitted to make periodic principal and interest payments. As of June 30, 2014 and December 31, 2013, the outstanding balance on the Nolte Note was approximately $1,500 and $1,700, respectively.

Uncollateralized Promissory Notes

On June 30, 2014, the Company acquired certain assets of ORSI. The purchase price included an uncollateralized non-interest bearing promissory note in the aggregate principal amount of $450 (the “ORSI Note”) for which the Company has imputed interest at a rate of 3.75%. This note is payable in two equal payments of $225 due on the first and second anniversaries of June 30, 2014, the effective date of the acquisition. The carrying value of the ORSI Note was approximately $426 as of June 30, 2014.

On March 21, 2014, the Company acquired AK. The purchase price included a $3,000 promissory note bearing interest at 3.0% (the “AK Note”) that is payable in three equal payments of $1,000 each due on the first, second and third anniversaries of March 21, 2014, the effective date of the acquisition. The outstanding balance of the AK Note was $3,000 as of June 30, 2014.

On January 31, 2014, the Company acquired certain assets of AQC. The purchase price included an uncollateralized non-interest bearing promissory note in the aggregate principal amount of $300 (the “AQC Note”) for which the Company has imputed interest at a rate of 3.75%. This note is payable in two equal payments of $150 each, due on the first and second anniversaries of January 31, 2014, the effective date of the acquisition. As of June 30, 2014, the carrying value of the AQC Note was approximately $288.

On August 12, 2013, the Company acquired certain assets and assumed certain liabilities of Dunn Environmental, Inc. The purchase price consisted of an uncollateralized promissory note in the aggregate principal amount of approximately $92, bearing interest at 4.0%, payable in two equal payments of approximately $46 each due on the first and second anniversaries of August 12, 2013, the effective date of the acquisition. The outstanding balance of this note was $92 as of June 30, 2014 and December 31, 2013.

Note 11 – Commitments and Contingencies

Litigation, Claims and Assessments

From time to time the Company may become subject to threatened and/or asserted claims arising in the ordinary course of business. Management is not aware of any matters, either individually or in the aggregate, that are reasonably possible to have a material adverse effect on the Company's consolidated financial condition, results of operations or liquidity.

Note 12 – Stock-Based Compensation

In October 2011, the Company's stockholders approved the 2011 Equity Incentive Plan, which was subsequently amended and restated in March 2013 (as amended, the "2011 Equity Plan"). The 2011 Equity Plan provides directors, executive officers, and other employees of the Company with additional incentives by allowing them to acquire ownership interest in the business and, as a result, encouraging them to contribute to the Company's success. The Company may provide these incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and units, and other cash-based or stock-based awards. As of June 30, 2014, 542,317 shares of common stock are authorized and reserved for issuance under the 2011 Equity Plan. This reserve automatically increases on each January 1 from 2014 through 2023, by an amount equal to the smaller of (i) 3.5% of the number of shares issued and outstanding on the immediately preceding December 31, or (ii) an amount determined by the Company's Board of Directors.

In the three and six months ended June 30, 2014, the Company granted from the 2011 Equity Plan 21,748 and 104,800 restricted shares and units of common stock, respectively, to management, employees, and non-employee directors with an aggregate deferred compensation amount of approximately $216 and $953, respectively. The fair value of these shares is based on the quoted market values of the Company's common stock as of the grant dates, which is a weighted-average of $9.93 and $9.09, respectively, per share. The restricted shares of common stock granted

generally provide for service-based vesting after three years following the grant date.

Share-based compensation expense relating to restricted stock awards during the three months ended June 30, 2014 and 2013 was $216 and $55, respectively, and for the six months ended June 30, 2014 and 2013 was $347 and $116, respectively. As of June 30, 2014, 8,508 shares have vested since the 2011 Equity Plan inception. Approximately $1,620 of deferred compensation, which is expected to be recognized over the remaining weighted average vesting period of 1.6 years, is unrecognized at June 30, 2014.

Note 13 – Income Taxes

As of June 30, 2014, the Company had net current and net non-current deferred income tax assets of $1,004 and $724, respectively. As of December 31, 2013, the Company had current and net non-current deferred income tax assets of $1,004 and $724, respectively. No valuation allowance against the Company's net deferred income tax assets is needed as of June 30, 2014 or December 31, 2013. Deferred income tax liabilities primarily relate to intangible assets and accounting basis adjustments where the Company has a future obligation for tax purposes.

The Company's consolidated effective income tax rate was 36.6% for the three and six months ended June 30, 2014. The difference between the effective income tax rate and the combined statutory federal and state income tax rate of approximately 39.0% is principally due to the federal domestic production activities deduction. The effective income tax rate for the three and six months ended June 30, 2013 was 30.7% and 28.2%, respectively, which also includes the discrete income tax benefit of 3.9% for the six months ended June 30, 2013, related to the retroactive legislative reinstatement on January 2, 2013 of the federal research and development tax credit for the year ended December 31, 2012, which is required to be included in the period the reinstatement was enacted into law.

In 2011, the California Franchise Tax Board ("CFTB") initiated an examination of Nolte's state of California tax filings and raised various questions about approximately $700 of research and development tax credits generated and included on Nolte's tax returns for the years 2005 to 2010. The Company responded to these inquiries, but in the fourth quarter of 2012, the CFTB denied these credits in full. In early 2013, the CFTB assigned a new examiner. The CFTB examiner requested and received additional documentation supporting the Company's qualified research activities. In addition, the CFTB examiner conducted a field visit in order to understand the Company's design activities associated with these qualified research activities.

Nolte believes it has appropriate qualified research activities, qualified research expenses and documentation to support the credits and believes this position meets the recognition criteria under ASC 740-10. Accordingly, the Company has not recorded a liability for uncertain tax benefits related to these state or federal research and development credits, however, an adverse outcome in the case could have an adverse impact on the Company's financial position, results of operations and cash flows.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis of the financial condition and results of operations of NV5 Holdings, Inc. and its subsidiaries (collectively, the "Company," "we," "our" or "NV5") should be read in conjunction with the financial statements included elsewhere in this Quarterly Report and the audited financial statements for the year ended December 31, 2013, included in our Annual Report on Form 10-K (File No. 001-35849). This Quarterly Report contains, in addition to unaudited historical information, forward-looking statements, which involve risk and uncertainties. The words "believe," "expect," "estimate," "may," "will," "could," "plan," or "continue" and similar expressions are intended to identify forward-looking statements. Our actual results could differ significantly from the results discussed in such forward-looking statements. Factors that could cause or contribute to such differences in results and outcomes include, without limitation, those discussed under the headings "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2013 and this Quarterly Report on Form 10-Q, if any. Readers are urged not to place undue reliance on these forward-looking statements, which speak only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to (and we expressly disclaim any obligation to) revise or update any forward-looking statement, whether as a result of new information, subsequent events, or otherwise (except as may be required by law), in order to reflect any event or circumstance which may arise after the date of this Quarterly Report on Form 10-Q.

Overview

We are a provider of professional and technical engineering and consulting solutions to public and private sector clients. We focus on the infrastructure, energy, construction, real estate, and environmental markets. We primarily focus on five business verticals - Construction quality assurance, infrastructure, energy, program management, and environmental solutions. Our primary clients include U.S. federal, state, municipal, and local governments; military and defense clients; and public agencies. We also serve quasi-public and private sector clients from the education, healthcare, energy, and utilities fields, including schools, universities, hospitals, health care providers, insurance providers, large utility service providers, and large and small energy producers.

We conduct our operations through three primary operating subsidiaries: (i) Nolte Associates, Inc., which began operations in 1949, was incorporated as a California corporation in 1957 and acquired by us in 2010, (ii) NV5 Global Inc. (formerly known an NV5, Inc.) ("NV5 Global"), which was incorporated as a Delaware corporation in 2009, and (iii) AK Environmental, LLC, which was originally incorporated as a New Jersey limited liability company in 2002 and reincorporated in North Carolina in 2013, was acquired by us in 2014. In March 2010, NV5 Global acquired the construction quality assurance operations of Bureau Veritas North America, Inc. In August 2010, NV5 Global acquired a majority of the outstanding shares of Nolte and succeeded to substantially all of Nolte's business. In October 2011, NV5 Global and Nolte completed a reorganization transaction in which NV5 Holdings, Inc. was incorporated as a Delaware corporation, acquired all of the outstanding shares of NV5 Global and Nolte, and, as a result, became the holding company under which the Company conducts operations.

Recent Acquisitions

The aggregate value of all consideration for our acquisitions consummated during the three and six months ended June 30, 2014 was approximately $1.3 million and $9.1 million, respectively.

On June 30, 2014, we acquired certain assets of Owner's Representative Services, Inc. (“ORSI”), a program management firm specializing in healthcare facilities development and construction projects. The purchase price of up to $1.3 million consisted of $400,000 in cash, a $450,000 non-interest bearing promissory note, and $150,000 of our common stock (14,918 shares) as of the closing date, which shares were issued in July 2014. The purchase price also included a non-interest bearing earn-out of $300,000 payable in cash and our common stock, subject to the achievement of a certain agreed upon metric for calendar year 2014, and is payable on March 31, 2015. The earn-out payment was preliminarily recorded at estimated fair value based on a probability-weighted approach valuation technique used to determine the fair value of the contingent consideration on the acquisition date. As of June 30, 2014, the preliminary estimated fair value of this contingent consideration was approximately $231,000. The purchase price also included a $450,000 uncollateralized non-interest bearing promissory note, with an imputed interest rate of 3.75%. This note is payable in two equal payments of $225,000 due on the first and second anniversaries of June 30, 2014, the effective date of the acquisition. The carrying value of this note was approximately $426,000 as of June 30, 2014.

On March 21, 2014, we acquired AK Environmental, LLC (“AK”), a natural gas pipeline inspection, construction management and environmental consulting firm, primarily servicing the Northeast, Mid-Atlantic and Southeast United States. The purchase price of $7.0 million consisted of $3.5 million in cash, a $3.0 million promissory note, bearing interest at 3.0%, that is payable in three equal payments of $1.0 million each due on the first, second and third anniversaries of March 21, 2014, the effective date of the acquisition, and $500,000 of our common stock (64,137 shares) as of the closing date of the acquisition.

On January 31, 2014, we acquired certain assets of Air Quality Consulting, Inc. ("AQC") located in Tampa, Florida, which specializes in occupational health, safety and environmental consulting. The purchase price of up to $815,000 consisted of $250,000 in cash, a $300,000 non-interest bearing promissory note, and $150,000 of our common stock (18,739 shares) as of the closing date. The purchase price includes an earn-out of $115,000 payable in cash. Payment of the earn-out is based on the achievement of a certain agreed upon metric for calendar year 2014, and, if achieved, is payable on April 1, 2015. The earn-out payment of $115,000 is non-interest bearing and is preliminarily recorded at fair value based on a probability-weighted approach as a valuation technique to determine the fair value of the contingent consideration on the acquisition date. Therefore, we have discounted the $115,000 payment obligation for imputed interest and the probability of achieving this earn-out. As of June 30, 2014, the fair value of this contingent consideration was approximately $69,000. Furthermore, the purchase price consisted of a non-interest bearing uncollateralized promissory note in the aggregate principal amount of $300,000 for which we have imputed interest at a rate of 3.75%. This note is payable in two equal payments of $150,000 each due on the first and second anniversaries of January 31, 2014, the effective date of the acquisition. The carrying value of this note was approximately $288,000 as of June 30, 2014.

Key Trends, Developments and Challenges

Initial public offering.

On March 26, 2013, the Company priced its initial public offering of 1,400,000 units. Each unit was sold at an offering price of $6.00 per unit and consisted of one share of the Company's common stock and one warrant to purchase one share of the Company's common stock at an exercise price of $7.80 per share. The units began trading on NASDAQ on March 27, 2013 and traded solely as units through September 26, 2013. The units sold in our initial public offering were registered under the Securities Act of 1933, as amended (the "Securities Act"), on a registration statement on Form S-1 (No. 333-186229), which was declared effective by the Securities and Exchange Commission (the "SEC") on March 26, 2013. On March 28, 2013, the underwriter of the offering exercised its option to purchase up to an additional 210,000 units, solely to cover over-allotments. The closing of the offering occurred, and was recorded, on April 2, 2013, upon which we received net proceeds of approximately $8.1 million after deducting fees associated with the initial public offering and issued 1,610,000 units. In addition, upon closing, the underwriter received a warrant to acquire up to 140,000 units at an exercise price of $7.20 per unit. The underwriter can begin to exercise these warrants on March 26, 2014 and such exercise period expires on March 26, 2016. Each of these units consist of one share of the Company's common stock and one warrant to purchase one share of the Company's common stock at an exercise price of $7.80 per share. As of June 30, 2014, the underwriter's warrant has not been exercised, in part or in whole.

Separation of the Company's units and warrant exercises.

On September 27, 2013, the common stock and warrants comprising the Company's units began trading separately on NASDAQ under the symbols "NVEE" and "NVEEW", respectively. In connection with the separate trading of the common stock and warrants, the Company's units ceased trading under the symbol "NVEEU" on the close of the markets on September 26, 2013 and the units were delisted from NASDAQ.

On September 27, 2013, the warrants became exercisable at an exercise price of $7.80 per share, except as provided. The warrant exercise period expires on March 27, 2018 or earlier upon redemption.

On September 27, 2013 and continuing until October 11, 2013 (the "Temporary Reduction Expiration Time"), we temporarily reduced the exercise price of all of our outstanding public warrants from $7.80 per share to $6.00 per share. All such warrants properly exercised in accordance with their respective terms prior to the Temporary Reduction Expiration Time were accepted by the Company at the reduced $6.00 per share exercise price, and one share of the Company's registered common stock per warrant was issued to the exercising warrant holder. After the Temporary Reduction Expiration Time, the exercise price of the public warrants automatically reverted to the warrant exercise price of $7.80 per share included in the original terms of the public warrants and the reduced exercise price was no longer in effect. Except for the reduced $6.00 per share exercise price of the warrants during the Temporary Reduction Expiration Time, the terms of the public warrants remain unchanged. During the Temporary Reduction Expiration Time, 1,196,471 public warrants, or approximately 74% of the outstanding public warrants were exercised at the reduced exercise price of $6.00 per share. The temporary reduction in the warrant exercise price generated net cash proceeds to the Company of approximately $6.6 million after fees associated with the temporary reduction in the warrant exercise price and offering expenses. During the period from January 1, 2014 through June 30, 2014, 500 public warrants were exercised at the warrant exercise price of $7.80 per share.

Tax credit dispute.

In 2011, the California Franchise Tax Board ("CFTB") initiated an examination of Nolte's state of California tax filings and raised various questions about approximately $0.7 million of research and development tax credits generated and included on Nolte's tax returns for the years 2005 to 2010. We responded to these inquiries, but in the fourth quarter of 2012, the CFTB denied these credits in full. In early 2013, the CFTB assigned a new examiner. The CFTB examiner requested and received additional documentation supporting our qualified research activities. In addition, the CFTB examiner conducted a field visit in order to understand our design activities associated with these qualified research activities.

Nolte believes it has appropriate qualified research activities, qualified research expenses and documentation to support the credits and believes this position meets the recognition criteria under ASC 740-10. Accordingly, we have not recorded a liability for uncertain tax benefits related to these state or federal research and development credits, however, an adverse outcome could have an adverse impact on our financial position, results of operations and cash flows.

Backlog.

As of June 30, 2014, we had approximately $76.1million of gross revenue backlog expected to be recognized over the next 12 months compared to gross revenue backlog of approximately $60.2 million as of December 31, 2013. We cannot guarantee that the revenue projected in our backlog will be realized or, if realized, will result in profits. In addition, project cancellations or scope adjustments may occur, from time to time, with respect to contracts reflected in our backlog. For example, certain of our contracts with the U.S. federal government and other clients are terminable at the discretion of the client, with or without cause. These types of backlog reductions could adversely affect our revenue and margins. Accordingly, our backlog as of any particular date is an uncertain indicator of our future earnings.

Components of Income and Expense

Revenues

We enter into contracts with our clients that contain two principal types of pricing provisions: cost-reimbursable and fixed-price. The majority of our contracts are cost-reimbursable contracts that fall under the relatively low-risk subcategory of time and materials contracts.

Cost-reimbursable contracts.

Cost-reimbursable contracts consist of two similar contract types: time and materials contracts and cost-plus contracts.

- Time and materials contracts are common for smaller scale professional and technical consulting and certification services projects. Under these types of contracts, there is no predetermined fee. Instead, we negotiate hourly billing rates and charge our clients based upon actual hours expended on a project. In addition, any direct project expenditures are passed through to the client and are typically reimbursed. These contracts may have a fixed-price element in the form of an initial not-to-exceed or guaranteed maximum price provision.
- Cost-plus contracts are the predominant contracting method used by U.S. federal, state, and local governments. These contracts provide for reimbursement of the actual costs and overhead (predetermined rates) we incur, plus a predetermined fee. Under some cost-plus contracts, our fee may be based on quality, schedule, and other performance factors.

For the six months ended June 30, 2014 and 2013, cost-reimbursable contracts represented approximately 88% and 90%, respectively, of our total revenues.

Fixed-price contracts.

Fixed-price contracts also consist of two contract types: lump-sum contracts and fixed-unit price contracts.

- Lump-sum contracts typically require the performance of all of the work under the contract for a specified lump-sum fee, subject to price adjustments if the scope of the project changes or unforeseen conditions arise. Many of our lump-sum contracts are negotiated and arise in the design of projects with a specified scope and project deliverables.
- Fixed-unit price contracts typically require the performance of an estimated number of units of work at an agreed price per unit, with the total payment under the contract determined by the actual number of units performed.

For the six months ended June 30, 2014 and 2013, fixed-price contracts represented approximately 12% and 10%, respectively, of our total revenues.

Revenues from engineering services are recognized in accordance with the accrual basis of accounting. Revenues under cost-reimbursable contracts are recognized when services are performed and revenues from fixed-price contracts are recognized on the percentage-of-completion method, generally measured by the direct costs incurred to date as compared to the estimated total direct costs for each contract.

Direct Costs of Revenues (excluding depreciation and amortization)

Direct costs of revenues consist primarily of that portion of technical and non-technical salaries and wages incurred in connection with fee generating projects. Direct costs of revenues also include production expenses, subconsultant services, and other expenses that are incurred in connection with our fee generating projects. Direct costs of revenues exclude that portion of technical and non-technical salaries and wages related to marketing efforts, vacations, holidays, and other time not spent directly generating fees under existing contracts. Such costs are included in operating expenses. Additionally, payroll taxes, bonuses, and employee benefit costs for all of our personnel, facilities costs, and depreciation and amortization are included in operating expenses since no allocation of these costs is made to direct costs of revenues. We expense direct costs of revenues when incurred.

Operating Expenses

Operating expenses include the costs of the marketing and support staffs, other marketing expenses, management and administrative personnel costs, payroll taxes, bonuses and employee benefits for all of our employees and the portion

of salaries and wages not allocated to direct costs of revenues for those employees who provide our services. Operating expenses also include facility costs, depreciation and amortization, professional services, legal and accounting fees, and administrative operating costs. We expense operating costs when incurred.

Factors Affecting Comparability

We have set forth below selected factors that we believe have had, or can be expected to have, a significant effect on the comparability of recent or future results of operations:

Acquisitions

On April 30, 2013, we acquired certain assets and assumed certain liabilities of Consilium Partners, a 20-person owner's representation and program management firm that serves both public and private clients, such as municipalities, major hospitality firms and institutional real estate owners. As a result of this acquisition in 2013, we commenced recognizing the acquired company's results of operations during the second quarter of 2013, primarily affecting the comparability of the three and six months ended June 30, 2014, compared to the same periods in 2013.

On July 8, 2013, we acquired certain assets and assumed certain liabilities of the Tampa, Florida division of Pitman-Hartenstein & Associates (the "PH&A"), which specializes in transportation infrastructure engineering. As a result of this acquisition in 2013, we commenced recognizing the acquired company's results of operations during the third quarter of 2013, primarily affecting the comparability of the three and six months ended June 30, 2014, compared to the same periods in 2013.

On January 31, 2014 and March 21, 2014, we acquired certain assets and assumed certain liabilities of AQC and AK, respectively. As a result of these acquisitions, we commenced recognizing the acquired companies' results of operations during the first quarter of 2014, primarily affecting the comparability of the three and six months ended June 30, 2014 compared to the same periods in 2013.

Public Company Expenses

As a result of our initial public offering, we became a public company and our securities are listed on NASDAQ. As such, we are required to comply with laws, regulations, and requirements that we did not need to comply with as a private company, including certain provisions of the Sarbanes-Oxley Act and related SEC regulations, as well as the requirements of NASDAQ. Compliance with the requirements of being a public company have required us to increase our operating expenses in order to pay our employees, legal counsel, and accountants to assist us in, among other things, external reporting, instituting and monitoring a more comprehensive compliance and board governance function, establishing and maintaining internal control over financial reporting in accordance with Section 404 of the Sarbanes-Oxley Act, and preparing and distributing periodic public reports in compliance with our obligations under the federal securities laws. In addition, being a public company has made it more expensive for us to obtain director and officer liability insurance.

Stock-Based Compensation

In October 2011, our stockholders approved the Company's 2011 Equity Incentive Plan, which was subsequently amended and restated in March 2013 (as amended, the "2011 Equity Plan"). The 2011 Equity Plan provides directors, executive officers, and other employees of the Company with additional incentives by allowing them to acquire an ownership interest in the business and, as a result, encouraging them to contribute to the Company's success. We may provide these incentives through the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares and units, and other cash-based or stock-based awards. As of June 30, 2014, 542,317 shares of common stock are authorized and reserved for issuance under the 2011 Equity Plan. This reserve automatically increases on each January 1 from 2014 through 2023, by an amount equal to the smaller of (i) 3.5% of the number of shares issued and outstanding on the immediately preceding December 31, or (ii) an amount determined by the Company's Board of Directors.

In the three and six months ended June 30, 2014, we granted from the 2011 Equity Plan 21,748 and 104,800 restricted shares and units of our common stock, respectively, to management, employees, and non-employee directors with an aggregate deferred compensation amount of approximately $216,000 and $953,000 at a weighted-average fair value of $9.93 and $9.09, respectively, per share. The restricted shares of our common stock granted provide for service-based vesting after three years following the grant date.

Share-based compensation expense relating to restricted stock awards during the three and six months ended June 30, 2014 and 2013 was $216,000 and $55,000, respectively, and $347,000 and $116,000, respectively. As of June 30, 2014, 8,508 shares have vested since the 2011 Equity Plan inception. Approximately $1.62 million of deferred compensation, which is expected to be recognized over the remaining weighted average vesting period of 1.6 years, was unrecognized at June 30, 2014.

Jumpstart Our Business Startups Act of 2012 (the "JOBS Act")

We qualify as an emerging growth company within the meaning of the rules under the Securities Act, and will utilize certain exemptions from various reporting requirements that are applicable to public companies that are not emerging growth companies. For example, we are not required to provide an auditor's attestation report on our internal controls in future annual reports on Form 10-K as otherwise required by Section 404(b) of the Sarbanes-Oxley Act. The JOBS Act also permits us, as an "emerging growth company," to take advantage of an extended transition period to comply with new or revised accounting standards applicable to public companies. We are choosing to "opt out" of this provision and, as a result, we will comply with new or revised accounting standards when they are required to be adopted by issuers. This decision to opt out of the extended transition period under the JOBS Act is irrevocable.

Critical Accounting Policies and Estimates

The discussion of our financial condition and results of operations is based upon our financial statements, which have been prepared in accordance with U.S. GAAP. During the preparation of these financial statements, we are required to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses, and related disclosures. On an ongoing basis, we evaluate our estimates and assumptions, including those discussed below. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances. The results of our analysis form the basis for making assumptions about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions, and the impact of such differences may be material to our financial statements. Our estimates and assumptions are evaluated periodically and adjusted when necessary. The more significant estimates affecting amounts reported in our consolidated financial statements relate to the revenue recognition on the percentage-of-completion method, reserves for professional liability claims, allowances for doubtful accounts, valuation of our intangible assets, contingent consideration and income taxes. During the three and six months ended June 30, 2014, we did not experience any significant changes in estimates or judgments inherent in the preparation of our consolidated financial statements. A summary of our significant accounting policies is contained in Note 2 to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2013.

Results of Operations

The following table represents our condensed results of operations for the periods indicated (in thousands of dollars and as a percentage of gross revenues):

	Three Months Ended June 30,				**Six Months Ended June 30,**			
	2014		**2013**		**2014**		**2013**

Three and six months Ended June 30, 2014 compared to the Three and six months Ended June 30, 2013

Gross revenues.

Our revenues increased approximately $12.1 million and $15.5 million, or approximately 70.4% and 47.3%, respectively, for the three and six months ended June 30, 2014, compared to the same periods in 2013. The increase in revenues is due primarily to organic growth from our existing platform as well as the contribution from various acquisitions completed in 2013 and during the six months of 2014. Excluding revenues from acquisitions closed during 2014, our revenues increased approximately $3.6 million and $6.3 million, or approximately 20.7% and 19.2%, respectively, for the three and six months ended June 30, 2014, compared to the same periods in 2013. We are currently unaware of delays in current projects and therefore are not anticipating such to influence future revenues. Such revenues could be affected by changes in economic conditions and the impact thereof on our public and quasi-public sector funded projects.

Direct costs.

Our direct costs increased approximately $8.7 million and $11.1 million, or approximately 101.5% and 70.2%, respectively, for the three and six months ended June 30, 2014, compared to the same periods in 2013. The increase in direct costs compared to the same periods in 2013 is primarily due to an increase in our utilization of billable employees in 2014 and direct costs incurred during the first quarter and second quarter of 2014 from operations of business acquired after June 30, 2013. Direct costs of contracts include direct labor and all costs incurred in connection with and directly for the benefit of client contracts. The level of direct costs of contracts may fluctuate between reporting periods due to a variety of factors, including the amount of sub-consultant costs we incur during a period. On those projects where we are responsible for subcontract labor or third-party materials and equipment, we reflect the amounts of such items in both gross revenues and costs. To the extent that we incur a significant amount of pass-through costs in a period, our direct costs of contracts are likely to increase as well.

As a percentage of gross revenues, direct costs of contracts were 59.1% and 55.8% for the three and six months ended June 30, 2014, respectively, as compared to 50.0% and 48.3% for the three and six months ended June 30, 2013, respectively. The decrease in gross profit percentage for the three and six months ended June 30, 2014 was primarily due to the gross profit margin generated by the recently acquired AK. AK is a technical staffing business in the energy industry, which is generally a high volume and lower margin business. However, the administrative overhead costs (i.e., indirect labor, facilities costs, etc.) for this type of operation are typically lower than our other service lines. The relationship between direct costs of contracts and revenues will fluctuate between reporting periods depending on a variety of factors, including the mix of business during the reporting periods being compared as well as the level of margins earned from the various types of services provided. As revenues from sub-consultant costs typically have lower margin rates associated with them, it is not unusual for us to experience an increase or decrease in such revenues without experiencing a corresponding increase or decrease in our gross margins and income from operations.

Operating expenses.

Our operating expenses increased approximately $2.7 million and $3.4 million, or 36.7% and 22.8%, respectively, for the three and six months ended June 30, 2014, compared to the same periods in 2013. The increase in operating expenses was due to integration costs from businesses acquired subsequent to June 30, 2013. Operating expenses include the costs of the marketing and support staffs, other marketing expenses, management and administrative personnel costs, payroll taxes, bonuses and all employee benefits and the portion of salaries and wages not allocated to direct costs of revenues. Operating expenses also include facility costs, depreciation and amortization, professional services, legal and accounting fees, and administrative operating costs. We expense operating costs when incurred. Operating expenses typically fluctuate as a result of changes in headcount (both corporate and field locations) and the amount of spending required to support our professional services activities, which normally require additional overhead costs. Therefore, when our professional services revenues increase or decrease, it is not unusual to see a corresponding change in operating expenses.

As a percentage of revenues, operating expenses were 34.9% and 38.1%, respectively, for the three and six months ended June 30, 2014, as compared to 43.5% and 45.8%, respectively, for the three and six months ended June 30, 2013. This decrease was the result of the increase in utilization of our professional staff compared to the same period last year, internal focus on performance optimization and the scalability of operations.

Other expenses, net.

Our other expenses, net, increased by approximately $30,000 and decreased by approximately $7,000, respectively, for the three and six months ended June 30, 2014, compared to the same periods in 2013. Other expenses consist of of interest expense on our outstanding debt. The change in other expenses is due to the change in the average principal amount of outstanding debt during the six months ended June 30, 2014, compared to the same periods in 2013.

Income taxes.

Our consolidated effective income tax rate was 36.6% for the three and six months ended June 30, 2014. The difference between the effective income tax rate and the combined statutory federal and state income tax rate of approximately 39.0% is principally due to the federal domestic production activities deduction. The effective rate during the three and six months ended June 30, 2014 does not include the impact of research and development credits as these credits expired effective January 1, 2014. Our consolidated effective income tax rate was 30.7% and 28.2%, respectively, for the three and six months ended June 30, 2013. The difference in the effective income tax rate compared to the combined statutory federal and state tax rate of 39.0% is principally due to the domestic production activities deduction and research and development credits. The effective income tax rate for the six months ended June 30, 2013 also includes the discrete tax benefit of 3.9% related to the retroactive legislative reinstatement on January 2, 2013 of the federal research and development tax credit for the year ended December 31, 2012, which is required to be included in the period the reinstatement was enacted into law.

Liquidity and Capital Resources

Our principal sources of liquidity are our cash and cash equivalents balances, cash flow from operations, our lines of credit, and access to financial markets. Our principal uses of cash are operating expenses, working capital requirements, capital expenditures, repayment of debt, and acquisition expenditures. We believe our sources of liquidity, including cash flow from operations, existing cash and cash equivalents, proceeds from our recent initial public offering, proceeds from the exercise of warrants issued in connection therewith, and borrowing capacity under our credit facility will be sufficient to meet our projected cash requirements. This includes the increased operating expenses we began to incur in April 2013 and will continue to incur in connection with becoming a publicly traded company, such as financial and accounting personnel we have hired or will hire and our planned strategic acquisition activity for at least the next twelve months. We will monitor our capital requirements thereafter to ensure our needs are in line with available capital resources.

We believe our experienced employees and management team are our most valuable resources. Attracting, training, and retaining key personnel have been and will remain critical to our success. To achieve our human capital goals, we intend to remain focused on providing our personnel with entrepreneurial opportunities to increase client contact within their areas of expertise and to expand our business within our service offerings.

Cash Flows

As of June 30, 2014, our cash and cash equivalents totaled $5.6 million and accounts receivable, net of allowance for doubtful accounts, totaled $25.1 million, compared to $13.9 million and $16.7 million, respectively, on December 31, 2013. As of June 30, 2014, our accounts payable and accrued liabilities were $5.1 million and $5.2 million, respectively, compared to $3.8 million and $4.2 million, respectively, on December 31, 2013. Also, as of June 30, 2014, we had notes payable, stock repurchase obligations, and contingent considerations of $7.3 million, $1.3 million, and $0.9 million, respectively, compared to $4.2 million, $1.6 million and $1.0 million, respectively, on December 31, 2013.

Operating activities.

For the six months ended June 30, 2014, net cash used in operating activities amounted to $2.3 million, primarily attributable to net income of $1.8 million, which included non-cash charges of $0.9 million from depreciation and amortization, and increases of $1.7 million in accounts payable and accrued liabilities partially offset by increases of $6.2 million in accounts receivable. During 2014, we made income tax payments of approximately $1.4 million.

For the six months ended June 30, 2013, net cash provided by operating activities amounted to $0.3 million, primarily attributable to net income of $1.3 million, a decrease of $2.2 million in deferred and income taxes payable and an increase of $1.0 million to accounts receivable, partially offset by non-cash charges of $0.7 million from depreciation and amortization and increases of $1.4 million in accounts payable and accrued liabilities. During 2013, we made income tax payments of approximately $2.5 million, which included payment of income taxes as a result of our acquisition of Nolte during 2010, whereby Nolte was required to switch from a cash basis taxpayer to an accrual basis taxpayer.

Investing activities.

For the six months ended June 30, 2014, net cash used in investing activities amounted to $5.0 million, primarily resulting from cash used for our acquisitions of $4.2 million, payment of contingent consideration of $0.2 million and

the purchase of property and equipment of $0.6 million for our ongoing operations.

For the six months ended June 30, 2013, net cash used in investing activities amounted to $1.1 million, primarily resulting from cash used for the acquisition of Consilium Partners and purchase of property and equipment.

Financing activities.

For the six months ended June 30, 2014, net cash used by financing activities amounted to $0.9 million, primarily from scheduled principal repayments of $0.6 million towards long-term debt and $0.3 million in stock repurchase obligations.

For the six months ended June 30, 2013, net cash provided by financing activities amounted to $5.2 million, primarily attributable to gross proceeds of $9.7 million from our initial public offering which was offset by initial public offering costs paid of $1.6 million. Also contributing to the net cash provided by financing activities were borrowings of $0.5 million from the then existing Line Facilities (defined below), offset by principal repayments of $3.0 million towards long-term debt and $0.3 million in stock repurchase obligations.

Financing

On January 31, 2014, we entered into a Business Loan Agreement with Western Alliance Bank, an Arizona corporation (“Western Alliance”), as lender, which provides for a two-year, $8.0 million revolving credit facility with a maturity date of January 31, 2016 (the “Credit Facility”). The interest rate is prime rate plus 0.50%, with a minimum of 3.75%. As of June 30, 2014, the actual interest rate was 3.75%. The Credit Facility contains a cross default and cross collateralization provision with the Term Loan (as defined below). The Credit Facility contains certain financial covenants, including an annual maximum debt to tangible net worth ratio of 4.00:1.00 as of December 31, 2013 and 8.5:1 for each annual period ending on the last day of each fiscal year thereafter. In addition, the Credit Facility contains an annual minimum debt service coverage ratio equal to 1.50:1.00 for each annual period ending on the last day of the fiscal year beginning December 31, 2013. The Credit Facility also contains financial reporting covenant provisions and other covenants, representations, warranties, indemnities, and events of default that are customary for facilities of this type. The Credit Facility is guaranteed by (i) NV5, (ii) Nolte, and (iii) Mr. Dickerson Wright. The Credit Facility is secured by a first priority lien on substantially all of the assets of the Company, NV5, and Nolte. In connection with entering into the Credit Facility, on January 31, 2014, the Company terminated its two credit facilities totaling $4.0 million (the “Line Facilities”). As of June 30, 2014, the outstanding balance on the Credit Facility was $0.

We have a note payable to Western Alliance with a maturity date of February 1, 2015 (the “Term Loan”). The interest rate on the Term Loan is at prime with a minimum of 4.50%. As of June 30, 2014 and December 31, 2013, the actual interest rate was 4.50% and 5.0%, respectively. The Term Loan is payable in monthly principal installments of $46,000 with a lump sum of the remaining principal balance outstanding due at maturity. The Term Loan is collateralized by substantially all of our assets and is guaranteed by certain of our stockholders, NV5 Holdings, Inc., and Nolte, which guarantee in the case of Mr. Wright, remains in effect for the term of the Term Loan regardless of Mr. Wright’s continuing employment. As of June 30, 2014 and December 31, 2013, we had outstanding balances of approximately $0.8 million and $1.1 million, respectively, in connection with the Term Loan.

The note held by the seller of the Nolte business (the “Nolte Note”) is currently outstanding with a maturity date of July 29, 2017. The Nolte Note bears interest at the prime rate plus 1%, subject to a maximum rate of 7.0%. As of June 30, 2014 and December 31, 2013, the actual interest rate was 4.25%. Under the terms of the Nolte Note, as amended, we pay quarterly principal installments of approximately $0.1 million plus interest. The Nolte Note is unsecured and is subordinated to our bank note, although we are permitted to make our periodic principal and interest payments. The outstanding balance of the Nolte Note was approximately $1.5 million and $1.7 million as of June 30, 2014 and December 31, 2013, respectively.

As of June 30, 2014 and December 31, 2013, there are stock repurchase obligations which represent notes payable for the repurchase of common stock of certain former noncontrolling interests in Nolte. These notes are unsecured and subordinated to bank debt and the maintenance of related debt covenants, and bear interest from 3.25% to 4.25%. The rates adjust annually based on the prime rate. The notes require quarterly interest and principal payments through their maturity dates, which range between 2014 and 2019. The outstanding balance of the stock repurchase obligation was $1.3 million and $1.6 million as of June 30, 2014 and December 31, 2013, respectively.

On January 31, 2014, we acquired certain assets of AQC. The purchase price included an uncollateralized non-interest bearing promissory note in the aggregate principal amount of $300,000 for which we have imputed interest at a rate of 3.75% (the "AQC Note"). This note is payable in two equal payments of $150,000 each, due on the first and second anniversaries of the effective date of January 31, 2014. The carrying value of the AQC Note was approximately $288,000 as of June 30, 2014.

On March 21, 2014, we acquired AK. The purchase price included a $3.0 million promissory note bearing interest at 3.0% (the "AK Note") that is payable in three equal payments of $1.0 million each due on the first, second and third anniversaries of the effective date of March 21, 2014. The outstanding balance of the AK Note was approximately $3,000,000 as of June 30, 2014.

On June 30, 2014, we acquired certain assets of ORSI. The purchase price included an uncollateralized non-interest bearing promissory note in the principal amount of $450,000 (the "ORSI Note"), which has an imputed interest rate of 3.75%. The ORSI Note is payable in two equal payments of $225,000 each due on the first and second anniversaries of the effective date of June 30, 2014. The outstanding balance of the ORSI Note was $426,000 as of June 30, 2014.

On July 27, 2012, we acquired certain assets and assumed certain liabilities of Kaderabek Company ("Kaco"). The purchase price included a note in the aggregate principal amount of $2.0 million (the "Kaco Note") ,bearing interest at 3.0% for the first year and 200 basis points over the one-year LIBOR for the years thereafter, which is payable as follows: $0.5 million due by (and paid on) December 28, 2012 and three equal payments of $0.5 million each due on the first, second and third anniversaries of the effective date of July 27, 2012. As of June 30, 2014 and December 31, 2013, the actual interest rate was 2.55% and 2.58%, respectively. The outstanding balance of the Kaco Note was $1.0 million as of June 30, 2014 and December 31, 2013.

On April 30, 2013, we acquired certain assets and assumed certain liabilities of Consilium Partners. The purchase price included an uncollateralized promissory note in the aggregate principal amount of $200,000,bearing interest at 4.0%, payable in three equal payments of $66,666 each due on the first, second and third anniversaries of the effective date of April 30, 2013. The outstanding balance of this note was $133,000 and $200,000 as of June 30, 2014 and December 31, 2013, respectively.

On July 8, 2013, we acquired certain assets and assumed certain liabilities of the Tampa, Florida division of PH&A. The purchase price included an uncollateralized promissory note in the aggregate principal amount of $168,000, bearing interest at 4.0%, payable in two equal payments of $84,000 each due on December 31, 2013 and December 31, 2014. The outstanding balance of this note was $84,000 as of June 30, 2014 and December 31, 2013.

On August 12, 2013, the Company acquired certain assets and assumed certain liabilities of Dunn Environmental, Inc. The purchase price consisted of an uncollateralized promissory note in the aggregate principal amount of approximately $92,000 (bearing interest at 4.0%), payable in two equal payments of approximately $46,000 each due on the first and second anniversaries of the effective date of August 12, 2013. The outstanding balance of this note was $92,000 as of June 30, 2014 and December 31, 2013.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of June 30, 2014.

Effects of Inflation

Based on our analysis of the periods presented, we believe that inflation has not had a material effect on our operating results. There can be no assurance that future inflation will not have an adverse impact on our operating results and financial condition.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers.* This ASU is a comprehensive new revenue recognition model that requires a company to recognize revenue to depict the transfer of goods or services to a customer at an amount that reflects the consideration it expects to receive in exchange for those goods or services. This ASU is effective for annual reporting periods beginning after December 15, 2016 and early adoption is not permitted. Accordingly, the Company will adopt this ASU on January 1, 2017. Companies may use either a full retrospective or a modified retrospective approach to adopt this ASU and management has not yet determined which method it will apply. The Company is currently evaluating the impact of adopting ASU 2014-09 on the Company's consolidated net income, financial position or cash flows.

Cautionary Statement about Forward Looking Statements

Our disclosure and analysis in this Quarterly Report on Form 10-Q contain “forward-looking” statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the Private Securities Litigation Reform Act of 1995. From time to time, we also provide forward-looking statements in other materials we release to the public, as well as oral forward-looking statements. Forward-looking statements include, but are not limited to, statements regarding our “expectations,” “hopes,” “beliefs,” “intentions,” or “strategies” regarding the future. In addition, any statements that refer to projections, forecasts, or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. We have tried, wherever possible, to identify such statements by using words such as, but not limited to, “anticipate,” “believe,” “expect,” “intend,” “estimate,” “predict,” “project,” “may,” “might,” “would,” “will,” “likely,” “will likely result,” “continue,” “could,” “future,” “plan,” “possible,” “potential,” “target,” “forecast,” “seek,” “strategy” and other words and terms of similar meaning, but the absence of these words does not mean that a statement is not forward looking. The forward-looking statements in this Current Report on Form 10-Q reflect the Company’s current views with respect to future events and financial performance.

Forward-looking statements are not historical factors and should not be read as a guarantee or assurance of future performance or results, and will not necessarily be accurate indications of the times at, or by, or if which such performance or results will be achieved. Forward-looking statements are based on information available at the time those statements are made or management's good faith beliefs, expectations and assumptions as of that time with respect to future events. Because forward-looking statements relate to the future, they are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward-looking statements. Important factors that could cause such differences include, but are not limited to:

- our ability to retain the continued service of our key professionals and to identify, hire and retain additional qualified professionals;
- changes in demand from the local and state government and private clients that we serve;
- general economic conditions, nationally and globally, and their effect on the demand and market for our services;
- fluctuations in our results of operations;
- the government's funding and budgetary approval process;
- the possibility that our contracts may be terminated by our clients;
- our ability to win new contracts and renew existing contracts;
- our dependence on a limited number of clients;
- our ability to complete projects timely, in accordance with our customers' expectations, or profitability;
- our ability to successfully execute our mergers and acquisitions strategy, including the integration of new companies into our business;
- our ability to successfully manage our growth strategy;
- our ability to raise capital in the future;
- competitive pressures and trends in our industry and our ability to successfully compete with our competitors;
- our ability to avoid losses under fixed-price contracts;
- the credit and collection risks associated with our clients;
- our ability to comply with procurement laws and regulations;
- changes in laws, regulations, or policies;
- the enactment of legislation that could limit the ability of local, state and federal agencies to contract for our privatized services;
- our ability to complete our backlog of uncompleted projects as currently projected;
- the risk of employee misconduct or our failure to comply with laws and regulations;
- our ability to control, and operational issues pertaining to, business activities that we conduct with business partners and other third parties; and
- significant influence by our principal stockholder and the existence of certain anti-takeover measures in our governing documents.

The forward-looking statements contained or incorporated by reference in this report are based on our current expectations and beliefs concerning future developments and their potential effects on us. There can be no assurance that future developments affecting us will be those that we have anticipated. These forward-looking statements involve a number of risks, uncertainties, or assumptions, many of which are beyond our control, that may cause actual results or performance to be materially different from those expressed or implied by these forward-looking statements. These risks and uncertainties include, but are not limited to, those factors described in "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2013. We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as may be required under applicable securities laws. You are advised, however, to consult any further disclosures we make on

related subjects in our Form 10-Q, 8-K and 10-K reports filed with the SEC. Our Annual Report on Form 10-K filing for the fiscal year ended December 31, 2013 listed various important factors that could cause actual results to differ materially from expected and historic results. We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995, as amended. Readers can find them in "Item 1A. Risk Factors" of that filing and under the same heading of this filing. You may obtain a copy of our Annual Report on Form 10-K through our website, www.nv5.com. Information contained on our website is not incorporated into this report. In addition to visiting our website, you may read and copy any document we file with the SEC at the SEC's Public Reference Room at 100 F. Street, NE, Washington, D.C. 20549 or at www.sec.gov. Please call the SEC at 1-800-SEC-0330 for information on the Public Reference Room.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that, as of the end of the period covered by this Quarterly Report on Form 10-Q, the Company’s disclosure controls and procedures, were effective such that the information relating to the Company required to be disclosed in our SEC reports (i) is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and (ii) is accumulated and communicated to the Company’s management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

Under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial Officer, we conducted an evaluation of any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our most recently completed fiscal quarter. Based on that evaluation, our Principal Executive Officer and Principal Financial Officer concluded that there have not been any changes in our internal control over financial reporting during our most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.`

From time to time, we are subject to various legal proceedings that arise in the normal course of our business activities. As of the date of this Quarterly Report on Form 10-Q, we are not a party to any litigation the outcome of which, if determined adversely to us, would individually or in the aggregate be reasonably expected to have a material adverse effect on our results of operations or financial position.

ITEM 1A. RISK FACTORS.

There have been no material changes to any of the risk factors disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 filed with the SEC.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

Recent Sales of Unregistered Securities

During the three months ended June 30, 2014, we issued the following securities that were not registered under the Securities Act:

In April 2014, we issued 10,152 shares of our common stock as partial consideration for our April 2013 acquisition of Consilium Partners. We issued these shares in reliance upon Section 4(a)(2) of the Securities Act as a transaction by an issuer not involving a public offering.

We did not, nor do we plan to, pay or give, directly or indirectly, any commission or other remuneration, including underwriting discounts or commissions, in connection with the issuance of securities listed above. In addition, each of the certificates issued or to be issued representing the securities in the transactions listed above bears or will bear a restrictive legend permitting the transfer thereof only in compliance with applicable securities laws. The recipients of securities in the transactions listed above represented to us or will be required to represent to us their intention to

acquire the securities for investment only and not with a view to or for sale in connection with any distribution thereof. All recipients had or have adequate access, through their employment or other relationship with our Company or through other access to information provided by our Company, to information about our Company.

Issuer Purchase of Equity Securities

None.

Use of Proceeds from our Initial Public Offering and Warrant Exercise

On March 26, 2013, our registration statement on Form S-1 (File No. 333-186229) was declared effective for our initial public offering. To the extent any net proceeds are used to repay any debt obligations, the aggregate outstanding balance of our notes payable to banks and former owners of acquired companies as of June 30, 2014 was approximately $9.7 million with interest rates ranging from 3.0% to 5.0%. Except as disclosed in the previous sentence, there have been no changes regarding the use of proceeds from our initial public offering and warrant exercise from the disclosure in our Annual Report on Form 10-K for the year ended December 31, 2013.
