FORM 10-Q

[Mark One]

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended June 30, 2015

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission File Number 0-32637

AMES NATIONAL CORPORATION

(Exact Name of Registrant as Specified in Its Charter)

IOWA **42-1039071**
(State or Other Jurisdiction of (I. R. S. Employer

Incorporation or Organization) Identification Number)

405 FIFTH STREET

AMES, IOWA 50010

(Address of Principal Executive Offices)

Registrant's Telephone Number, Including Area Code: **(515) 232-6251**

Not Applicable

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes X No _____

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this Chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes X No _____

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer", "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer _____ Accelerated filer X Non-accelerated filer _____ Smaller reporting company _____

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes _____ No X

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

AMES NATIONAL CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements (*unaudited*)

1. Significant Accounting Policies

The consolidated financial statements for the three and six months ended June 30, 2015 and 2014 are unaudited. In the opinion of the management of Ames National Corporation (the "Company"), these financial statements reflect all adjustments, consisting only of normal recurring accruals, necessary to present fairly these consolidated financial statements. The results of operations for the interim periods are not necessarily indicative of results which may be expected for an entire year. Certain information and footnote disclosures normally included in complete financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted in accordance with the requirements for interim financial statements. The interim financial statements and notes thereto should be read in conjunction with the year-end audited financial statements contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 (the "Annual Report"). The consolidated financial statements include the accounts of the Company and its wholly-owned banking subsidiaries (the "Banks"). All significant intercompany balances and transactions have been eliminated in consolidation.

Goodwill: Goodwill represents the excess of cost over the fair value of net assets acquired. Goodwill resulting from acquisitions is not amortized, but is tested for impairment annually or whenever events change and circumstances indicate that it is more likely than not that an impairment loss has occurred. Goodwill is tested for impairment using a two-step process that begins with an estimation of the fair value of a reporting unit. The second step, if necessary, measures the amount of impairment, if any.

Significant judgment is applied when goodwill is assessed for impairment. This judgment includes developing cash flow projections, selecting appropriate discount rates, identifying relevant market comparables, incorporating general economic and market conditions and selecting an appropriate control premium. At June 30, 2015, Company management has performed a goodwill impairment analysis and determined goodwill was not impaired.

2. Branch Acquisition

On August 29, 2014, First National Bank (FNB) completed the purchase of three bank branches of First Bank located in West Des Moines and Johnston, Iowa (the "Acquisition"). The Acquisition was consistent with the Bank's strategy to strengthen and expand its Iowa market share. The acquired assets and liabilities were recorded at fair value at the date of acquisition and were reflected in the September 30, 2014 financial statements as such. These branches were

purchased for cash consideration of \$4.1 million. As a result of the Acquisition, the Company recorded a core deposit intangible asset of \$1,018,000 and goodwill of \$1,131,000. The results of operations for this acquisition have been included since the transaction date of August 29, 2014. The fair value of credit deteriorated purchased loans related to this Acquisition is \$1,507,000. These purchased loans are included in the impaired loan category in the financial statements.

Table Of Contents

The following table summarizes the fair value of the total consideration transferred as a part of the Acquisition as well as the fair value of identifiable assets acquired and liabilities assumed as of August 29, 2014, the effective date of the transaction.

| | |
|---|--------------|
| Cash consideration transferred | \$4,147,680 |
| Recognized amounts of identifiable assets acquired and liabilities assumed: | |
| Cash and Due from Banks | \$20,576,661 |
| Interest bearing deposits in financial institutions | 5,719,000 |
| Securities available-for-sale | 10,602,454 |
| Loans receivable | 44,620,021 |
| Accrued interest receivable | 230,332 |
| Bank premises and equipment | 3,864,900 |
| Other real estate owned | 1,267,720 |
| Core deposit intangible asset | 1,018,000 |
| Other assets | 748,511 |
| Deposits | (81,962,650) |
| Securities sold under agreements to repurchase | (2,815,297) |
| Accrued interest payable and other liabilities | (853,439) |
| Total identifiable net assets | \$3,016,213 |
| Goodwill | \$1,131,467 |

On August 29, 2014, the contractual balance of loans receivable acquired was \$45,584,000 and the contractual balance of the deposits assumed was \$81,841,000. Loans receivable acquired include commercial real estate, 1-4 family real estate, commercial operating and consumer loans.

The acquired loans at contractual values as of August 29, 2014 were determined to be risk rated as follows:

| | |
|------------------------------------|--------------|
| Pass | \$29,840,000 |
| Watch | 6,659,000 |
| Special Mention | 1,478,000 |
| Substandard | 5,460,000 |
| Deteriorated credit | 2,147,000 |
| Total loans acquired at book value | \$45,584,000 |

Loans acquired as deteriorated credit loans are classified as impaired loans.

The core deposit intangible asset is amortized to expense on a declining basis over a period of nine years. The loan market valuation is accreted to income on a declining basis over a six year period. The time deposits market valuation is amortized to expense on a declining basis over a two year period.

Table Of Contents

3.Dividends

On May 13, 2015, the Company declared a cash dividend on its common stock, payable on August 17, 2015 to stockholders of record as of August 3, 2015, equal to \$0.20 per share.

4.Earnings Per Share

Earnings per share amounts were calculated using the weighted average shares outstanding during the periods presented. The weighted average outstanding shares for the three and six months ended June 30, 2015 and 2014 were 9,310,913. The Company had no potentially dilutive securities outstanding during the periods presented.

5.Off-Balance Sheet Arrangements

The Company is party to financial instruments with off-balance sheet risk in the normal course of business. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet. No material changes in the Company's off-balance sheet arrangements have occurred since December 31, 2014.

6.Fair Value Measurements

Assets and liabilities carried at fair value are required to be classified and disclosed according to the process for determining fair value. There are three levels of determining fair value.

Level 1: Inputs to the valuation methodology are quoted prices, unadjusted, for identical assets or liabilities in active markets. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

Level 2: Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatility, prepayment speeds, credit risk); or inputs derived principally from or can be corroborated by observable market data by correlation or other means.

Level 3: Inputs to the valuation methodology are unobservable and significant to the fair value measurement. Level 3 assets and liabilities include financial instruments whose value is determined using discounted cash flow methodologies, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Table Of Contents

The following table presents the balances of assets measured at fair value on a recurring basis by level as of June 30, 2015 and December 31, 2014. *(in thousands)*

| Description | Total | Level 1 | Level 2 | Level 3 |
|--|-----------|------------|-----------|------------|
| 2015 | | | | |
| U.S. government treasuries | \$1,459 | \$1,459 | \$- | \$ - |
| U.S. government agencies | 104,278 | - | 104,278 | - |
| U.S. government mortgage-backed securities | 108,756 | - | 108,756 | - |
| State and political subdivisions | 278,906 | - | 278,906 | - |
| Corporate bonds | 49,220 | - | 49,220 | - |
| Equity securities, common stock | 797 | 797 | - | - |
| Equity securities, other | 3,217 | - | 3,217 | - |
| | \$546,633 | \$2,256 | \$544,377 | \$ - |
| 2014 | | | | |
| U.S. government treasuries | \$1,447 | \$1,447 | \$- | \$ - |
| U.S. government agencies | 87,307 | - | 87,307 | - |
| U.S. government mortgage-backed securities | 120,985 | - | 120,985 | - |
| State and political subdivisions | 281,776 | - | 281,776 | - |
| Corporate bonds | 47,320 | - | 47,320 | - |
| Equity securities, common stock | 758 | 758 | - | - |
| Equity securities, other | 2,909 | - | 2,909 | - |
| | \$542,502 | \$2,205 | \$540,297 | \$ - |

Level 1 securities include equity securities traded on an active exchange, such as the New York Stock Exchange, as well as U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. U.S. government mortgage-backed securities, state and political subdivisions, most corporate bonds and other equity securities are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things.

The Company's policy is to recognize transfers between Levels at the end of each reporting period, if applicable. There were no transfers between Levels of the fair value hierarchy during the six months ended June 30, 2015.

Table Of Contents

Certain assets are measured at fair value on a nonrecurring basis; that is, they are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents the assets carried on the balance sheet (after specific reserves) by caption and by level within the valuation hierarchy as of June 30, 2015 and December 31, 2014. (*in thousands*)

| Description | Total | Level 1 | Level 2 | Level 3 |
|-------------------------|---------|------------|------------|------------|
| 2015 | | | | |
| Loans receivable | \$664 | \$ - | \$ - | \$664 |
| Other real estate owned | 4,588 | - | - | 4,588 |
| Total | \$5,252 | \$ - | \$ - | \$5,252 |
| 2014 | | | | |
| Loans receivable | \$692 | \$ - | \$ - | \$692 |
| Other real estate owned | 8,436 | - | - | 8,436 |
| Total | \$9,128 | \$ - | \$ - | \$9,128 |

Loans Receivable: Loans in the tables above consist of impaired credits held for investment. In accordance with the loan impairment guidance, impairment was measured based on the fair value of collateral less estimated selling costs for collateral dependent loans. Fair value for impaired loans is based upon appraised values of collateral adjusted for trends observed in the market. A valuation allowance was recorded for the excess of the loan's recorded investment over the amounts determined by the collateral value method. This valuation allowance is a component of the allowance for loan losses. The Company considers these fair value measurements as level 3.

Other Real Estate Owned: Other real estate owned in the table above consists of real estate obtained through foreclosure. Other real estate owned is recorded at fair value less estimated selling costs, at the date of transfer, with any impairment amount charged to the allowance for loan losses. Subsequent to the transfer, other real estate owned is carried at the lower of cost or fair value, less estimated selling costs, with any impairment amount recorded as a noninterest expense. The carrying value of other real estate owned is not re-measured to fair value on a recurring basis but is subject to fair value adjustments when the carrying value exceeds the fair value less estimated selling costs. Management uses appraised values and adjusts for trends observed in the market and for disposition costs in determining the value of other real estate owned. A valuation allowance was recorded for the excess of the asset's recorded investment over the amount determined by the fair value, less estimated selling costs. This valuation allowance is a component of the allowance for other real estate owned. The valuation allowance was \$4,286,000 as of June 30, 2015 and \$6,389,000 as of December 31, 2014. The Company considers these fair values level 3.

Table Of Contents

The significant inputs used in the fair value measurements for Level 3 assets measured at fair value on a nonrecurring basis as of June 30, 2015 and December 31, 2014 are as follows: (*in thousands*)

| 2015 | | | | |
|-------------------------|-----------|--------------------------|----------------------|---------------|
| | Estimated | Valuation | | Range |
| | Fair | Techniques | Unobservable Inputs | (Average) |
| | Value | | | |
| Impaired Loans | \$664 | Evaluation of collateral | Estimation of value | NM* |
| Other real estate owned | \$4,588 | Appraisal | Appraisal adjustment | 3% - 10% (6%) |
| 2014 | | | | |
| | Estimated | Valuation | | Range |
| | Fair | Techniques | Unobservable Inputs | (Average) |
| | Value | | | |
| Impaired Loans | \$692 | Evaluation of collateral | Estimation of value | NM* |
| Other real estate owned | \$8,436 | Appraisal | Appraisal adjustment | 4% - 10% (7%) |

* Not Meaningful. Evaluations of the underlying assets are completed for each impaired loan with a specific reserve. The types of collateral vary widely and could include accounts receivables, inventory, a variety of equipment and real estate. Collateral evaluations are reviewed and discounted as appropriate based on knowledge of the specific type of collateral. In the case of real estate, an independent appraisal may be obtained. Types of discounts considered included aging of receivables, condition of the collateral, potential market for the collateral and estimated disposal costs. These discounts will vary from loan to loan, thus providing a range would not be meaningful.

Accounting principles generally accepted in the United State of America (GAAP) requires disclosure of the fair value of financial assets and financial liabilities, including those that are not measured and reported at fair value on a recurring basis or nonrecurring basis. The methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a recurring or nonrecurring basis are discussed above. The methodologies for other financial assets and financial liabilities are discussed below.

Fair value of financial instruments:

Disclosure of fair value information about financial instruments, for which it is practicable to estimate that value, is required whether or not recognized in the consolidated balance sheets. In cases in which quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimate of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases could not be realized in immediate settlement of the instruments. Certain financial instruments with a fair value that is not practicable to estimate and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value amounts presented do not necessarily represent the underlying value of the Company.

The following disclosures represent financial instruments in which the ending balances at June 30, 2015 and December 31, 2014 are not carried at fair value in their entirety on the consolidated balance sheets.

Cash and due from banks, federal funds sold and interest bearing deposits in financial institutions: The recorded amount of these assets approximates fair value.

Table Of Contents

Securities available-for-sale: Fair value measurement for Level 1 securities is based upon quoted prices. Fair value measurement for Level 2 securities are based upon quoted prices, if available. If quoted prices are not available, the Company obtains fair value measurements from an independent pricing service. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the security's terms and conditions, among other things. Level 1 securities include equity securities traded on an active exchange, such as the New York Stock Exchange, as well as U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets. U.S government mortgage-backed securities, state and political subdivisions, some corporate bonds and other equity securities are reported at fair value utilizing Level 2 inputs.

Loans receivable: The fair value of loans is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates, which reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the historical experience, with repayments for each loan classification modified, as required, by an estimate of the effect of current economic and lending conditions. The effect of nonperforming loans is considered in assessing the credit risk inherent in the fair value estimate.

Loans held for sale: The fair value of loans held for sale is based on prevailing market prices.

Deposit liabilities: Fair values of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings and NOW accounts, and money market accounts, are equal to the amount payable on demand as of the respective balance sheet date. Fair values of certificates of deposit are based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities. The fair value estimates do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market.

Securities sold under agreements to repurchase: The carrying amounts of securities sold under agreements to repurchase approximate fair value because of the generally short-term nature of the instruments.

FHLB advances and other borrowings: Fair values of FHLB advances and other borrowings are estimated using discounted cash flow analysis based on interest rates currently being offered with similar terms.

Accrued income receivable and accrued interest payable: The carrying amounts of accrued income receivable and accrued interest payable approximate fair value.

Commitments to extend credit and standby letters of credit: The fair values of commitments to extend credit and standby letters of credit are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreement and credit worthiness of the counterparties. The carrying value and fair value of the commitments to extend credit and standby letters of credit are not considered significant.

Limitations: Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Table Of Contents

The estimated fair values of the Company's financial instruments as described above as of June 30, 2015 and December 31, 2014 are as follows: *(in thousands)*

| | | 2015 | | 2014 | |
|--|----------------------------------|--------------------|----------------------------|--------------------|----------------------------|
| | Fair Value Hierarchy Level | Carrying Amount | Estimated Fair Value | Carrying Amount | Estimated Fair Value |

| 2015: | | | | | | |
| Securities available-for-sale: | | | | | | |
| U.S. government agencies | \$40,670 | \$ (426) | \$6,743 | \$ (181) | \$47,413 | \$ (607) |
| U.S. government mortgage-backed securities | 16,842 | (92) | - | - | 16,842 | (92) |
| State and political subdivisions | 79,675 | (922) | 8,056 | (170) | 87,731 | (1,092) |
| Corporate bonds | 21,726 | (289) | 14,742 | (490) | 36,468 | (779) |
| | \$158,913 | \$ (1,729) | \$29,541 | \$ (841) | \$188,454 | \$ (2,570) |

| | Less than 12 Months | | 12 Months or More | | Total | |
|--|---------------------|----------------------|-------------------|----------------------|---------------|----------------------|
| | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses | Fair Value | Unrealized Losses |
| 2014: | | | | | | |
| Securities available-for-sale: | | | | | | |
| U.S. government agencies | \$14,016 | \$ (64) | \$17,523 | \$ (448) | \$31,539 | \$ (512) |
| U.S. government mortgage-backed securities | 6,934 | (20) | 16,123 | (88) | 23,057 | (108) |
| State and political subdivisions | 45,618 | (252) | 24,880 | (397) | 70,498 | (649) |
| Corporate bonds | 8,937 | (73) | 20,724 | (838) | 29,661 | (911) |
| | \$75,505 | \$ (409) | \$79,250 | \$ (1,771) | \$154,755 | \$ (2,180) |

Gross unrealized losses on debt securities totaled \$2,570,000 as of June 30, 2015. These unrealized losses are generally due to changes in interest rates or general market conditions. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and industry analysts' reports. Management concluded that the gross unrealized losses on debt securities were temporary. Due to potential changes in conditions, it is at least reasonably possible that changes in fair values and management's assessments will occur in the near term and that such changes could materially affect the amounts reported in the Company's financial statements.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payment of principal and interest when due according to the contractual terms of the loan agreement. The credit deteriorated loans acquired as a part of the Acquisition have been included in the following information. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. The Company will apply its normal loan review procedures to identify loans that should be evaluated for impairment.

| | - \$ | - | \$ | - | 3 \$ | 68 | \$ | 68 |

The Company did not grant any concessions on any loans experiencing financial difficulties during the three and six months ended June 30, 2015.

There was no new TDR activity in the three months ended June 30, 2014. However, during the three months ended March 31, 2014, the Company granted concessions to two borrowers experiencing financial difficulties. The commercial real estate loan was restructured as an interest only loan for a period of time. The agricultural and consumer loan's maturity dates were extended one year with interest only until maturity.

A TDR loan is considered to have payment default when it is past due 60 days or more.

No TDR loan modified during the twelve months ended June 30, 2015 had a payment default. One TDR loan modified during the twelve months ended June 30, 2014 had a payment default. This modified TDR loan had a balance as of June 30, 2014 of \$94,000.

There were no charge-offs related to TDRs for the six months ended June 30, 2015. There was one charge-off related to a TDR for the six months ended June 30, 2014 in the amount of \$44,000. For the six months ended June 30, 2014, the specific reserves were reduced by \$100,000 as a result of one TDR that is no longer considered impaired.

Table Of Contents

9. Other Real Estate Owned

The following table provides the composition of other real estate owned as of June 30, 2015 and December 31, 2014: *(in thousands)*

| | 2015 | 2014 |
|---------------------------------------|----------------|----------------|
| Construction and land development | \$2,933 | \$5,385 |
| 1 to 4 family residential real estate | 824 | 1,270 |
| Commercial real estate | 831 | 1,781 |
| | \$4,588 | \$8,436 |

The Company is actively marketing the assets referred to in the table above. Management uses appraised values and adjusts for trends observed in the market and for disposition costs in determining the value of other real estate owned. The assets above are primarily located in the metropolitan Des Moines, Iowa and Ames, Iowa areas.

10. Goodwill

As of August 29, 2014, FNB acquired three bank branches located in West Des Moines and Johnston, Iowa, which resulted in the recognition of \$1.1 million of goodwill. Goodwill recognized in the Acquisition was primarily attributable to an expanded market share and economies of scale expected from combining the operations of the West Des Moines and Johnston, Iowa branches with FNB. The goodwill is not amortized but is evaluated for impairment at least annually. For income tax purposes, goodwill is amortized over fifteen years.

11. Core deposit intangible asset

In conjunction with the Acquisition of the three bank branches in 2014, the Company recorded \$1.0 million in core deposit intangible assets. The following sets forth the carrying amounts and accumulated amortization of core deposit intangible assets at June 30, 2015 and December 31, 2014: *(in thousands)*

| 2015 | | 2014 | |
|-----------------|-----------------------------|-----------------|-----------------------------|
| Gross Amount | Accumulated Amortization | Gross Amount | Accumulated Amortization |

Core deposit intangible asset \$2,518 \$ 1,011 \$2,518 \$ 788

The weighted average life of the core deposit intangible is 3 years as of June 30, 2015 and December 31, 2014.

Table Of Contents

The following sets forth the activity related to core deposit intangible assets for the three and six months ended June 30, 2015 and 2014: *(in thousands)*

| | Three Months Ended June 30, 2015 | | Six Months Ended June 30, 2014 | |
|--|---|-------|---|---------|
| Beginning core deposit intangible, net | \$1,617 | \$964 | \$1,730 | \$1,029 |
| Amortization | (110) | (61) | (223) | (126) |
| Ending core deposit intangible, net | \$1,507 | \$903 | \$1,507 | \$903 |

Estimated remaining amortization expense on core deposit intangible for the years ending is as follows: *(in thousands)*

| | |
|-------|---------|
| 2015 | \$198 |
| 2016 | 354 |
| 2017 | 299 |
| 2018 | 251 |
| 2019 | 127 |
| 2020 | 71 |
| After | 207 |
| | \$1,507 |

The June 30, 2015 capital ratios are calculated under the Basel III capital rules that became effective on January 1, 2015. Capital ratios prior to January 1, 2015 were calculated under the prompt corrective capital rules that were in effect for those periods.

As disclosed in the Company's Form 10-K filed with the Securities and Exchange Commission on March 12, 2015, in July 2013, the Federal Reserve Board and the FDIC issued final rules implementing the Basel III regulatory capital framework and related Dodd-Frank Wall Street Reform and Consumer Protection Act changes. The rules revise minimum capital requirements and adjust prompt corrective action thresholds. The final rules revise the regulatory capital elements, add a new common equity Tier I capital ratio, increase the minimum Tier 1 capital ratio requirements and implement a new capital conservation buffer. The rules also permit certain banking organizations to

retain, through a one-time election, the existing treatment for accumulated other comprehensive income. The Company and the Banks have made the election to retain the existing treatment for accumulated other comprehensive income. The final rules took effect for the Company and the Banks on January 1, 2015, subject to a transition period for certain parts of the rules.

The June 30, 2015 table above includes the new regulatory capital ratio requirements that became effective on January 1, 2015. Beginning in 2016, an additional capital conservation buffer will be added to the minimum requirements for capital adequacy purposes, subject to a three year phase-in period. The capital conservation buffer will be fully phased-in on January 1, 2019 at 2.5 percent. A banking organization with a conservation buffer of less than 2.5 percent (or the required phase-in amount in years prior to 2019) will be subject to limitations on capital distributions, including dividend payments and certain discretionary bonus payments to executive officers. At the present time, the ratios for the Company and the Banks are sufficient to meet the fully phased-in conservation buffer.

14. Subsequent Events

Management evaluated subsequent events through the date the financial statements were issued. There were no significant events or transactions occurring after June 30, 2015, but prior to August 6, 2015, that provided additional evidence about conditions that existed at June 30, 2015. There were no other significant events or transactions that provided evidence about conditions that did not exist at June 30, 2015.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Ames National Corporation (the "Company") is a bank holding company established in 1975 that owns and operates five bank subsidiaries in central Iowa (the "Banks"). The following discussion is provided for the consolidated operations of the Company and its Banks, First National Bank, Ames, Iowa (First National), State Bank & Trust Co. (State Bank), Boone Bank & Trust Co. (Boone Bank), Reliance State Bank (Reliance Bank), and United Bank & Trust NA (United Bank). The purpose of this discussion is to focus on significant factors affecting the Company's financial condition and results of operations.

The Company does not engage in any material business activities apart from its ownership of the Banks. Products and services offered by the Banks are for commercial and consumer purposes including loans, deposits and wealth management services. The Banks also offer investment services through a third-party broker-dealer. The Company employs twelve individuals to assist with financial reporting, human resources, audit, compliance, marketing, technology systems and the coordination of management activities, in addition to 209 full-time equivalent individuals employed by the Banks.

The Company's primary competitive strategy is to utilize seasoned and competent Bank management and local decision making authority to provide customers with faster response times and more flexibility in the products and services offered. This strategy is viewed as providing an opportunity to increase revenues through creating a competitive advantage over other financial institutions. The Company also strives to remain operationally efficient to provide better profitability while enabling the Company to offer more competitive loan and deposit rates.

The principal sources of Company revenues and cash flow are: (i) interest and fees earned on loans made by the Company and Banks; (ii) interest on fixed income investments held by the Company and Banks; (iii) fees on wealth management services provided by those Banks exercising trust powers; (iv) service charges on deposit accounts maintained at the Banks and (v) Merchant and card fees. The Company's principal expenses are: (i) interest expense on

deposit accounts and other borrowings; (ii) provision for loan losses; (iii) salaries and employee benefits; (iv) data processing costs associated with maintaining the Banks' loan and deposit functions; (v) occupancy expenses for maintaining the Bank's facilities; and (vi) other real estate owned expenses. The largest component contributing to the Company's net income is net interest income, which is the difference between interest earned on earning assets (primarily loans and investments) and interest paid on interest bearing liabilities (primarily deposits and other borrowings). One of management's principal functions is to manage the spread between interest earned on earning assets and interest paid on interest bearing liabilities in an effort to maximize net interest income while maintaining an appropriate level of interest rate risk.

Table Of Contents

On August 29, 2014, First National purchased substantially all of the assets, including loans, and assumed substantially all of the liabilities, including deposit accounts, of First Bank, an Iowa state chartered bank located in West Des Moines, Iowa, for \$4.1 million. First National operates all three bank offices previously operated by First Bank in West Des Moines, Iowa and Johnston, Iowa.

The Company had net income of \$3,365,000, or \$0.36 per share, for the three months ended June 30, 2015, compared to net income of \$3,855,000, or \$0.41 per share, for the three months ended June 30, 2014. Total equity capital as of June 30, 2015 totaled \$156.6 million or 11.8% of total assets.

The decrease in quarterly earnings can be primarily attributed to the provision for loan losses and other real estate owned expenses, offset by an increase in loan interest income and gain on the sale of securities.

Net loan recoveries totaled \$24,000 for the three months ended June 30, 2015 and net loan charge-offs totaled \$87,000 for the three months ended June 30, 2014. The provision for loan losses totaled \$922,000 and \$36,000 for the three months ended June 30, 2015 and 2014, respectively.

The Company had net income of \$7,000,000, or \$0.75 per share, for the six months ended June 30, 2015, compared to net income of \$8,381,000, or \$0.90 per share, for the six months ended June 30, 2014.

The decrease in earnings can be primarily attributed to the gain on the sale of premises and equipment in 2014 with no corresponding gain in 2015, the provision for loan losses, salaries and benefits and other real estate owned expenses, offset in part by an increase in loan interest income.

Net loan recoveries totaled \$34,000 for the six months ended June 30, 2015 and net loan charge-offs totaled \$130,000 for the six months ended June 30, 2014. The provision for loan losses totaled \$999,000 and \$75,000 for the six months ended June 30, 2015 and 2014, respectively.

The following management discussion and analysis will provide a review of important items relating to:

Challenges
Key Performance Indicators and Industry Results

Critical Accounting Policies
Income Statement Review
Balance Sheet Review
Asset Quality Review and Credit Risk Management
Liquidity and Capital Resources
Forward-Looking Statements and Business Risks

Challenges

Management has identified certain events or circumstances that may negatively impact the Company's financial condition and results of operations in the future and is attempting to position the Company to best respond to those challenges. These challenges are addressed in the Company's most recent Annual Report on Form 10-K filed on March 12, 2015.

Key Performance Indicators and Industry Results

Certain key performance indicators for the Company and the industry are presented in the following chart. The industry figures are compiled by the Federal Deposit Insurance Corporation (the "FDIC") and are derived from 6,419 commercial banks and savings institutions insured by the FDIC. Management reviews these indicators on a quarterly basis for purposes of comparing the Company's performance from quarter-to-quarter against the industry as a whole.

*Latest available data

Key performances indicators include:

Return on Assets

This ratio is calculated by dividing net income by average assets. It is used to measure how effectively the assets of the Company are being utilized in generating income. The Company's annualized return on average assets was 1.01% and 1.23% for the three months ended June 30, 2015 and 2014, respectively. The decrease in this ratio in 2015 from the previous period is due to an increase in average assets in 2015 along with a decrease in net income.

Return on Equity

This ratio is calculated by dividing net income by average equity. It is used to measure the net income or return the Company generated for the shareholders' equity investment in the Company. The Company's return on average equity was 8.48% and 10.27% for the three months ended June 30, 2015 and 2014, respectively. The decrease in this ratio in 2015 from the previous period is due to the decrease in net income.

Net Interest Margin

The net interest margin for the three months ended June 30, 2015 and 2014 was 3.32% and 3.30%, respectively. The ratio is calculated by dividing net interest income by average earning assets. Earning assets are primarily made up of loans and investments that earn interest. This ratio is used to measure how well the Company is able to maintain interest rates on earning assets above those of interest-bearing liabilities, which is the interest expense paid on deposits and other borrowings. The increase in this ratio in 2015 is primarily the result of an increase in the average balance of loans, offset in part by a decrease in the average balances of investment securities.

Table Of Contents

Efficiency Ratio

This ratio is calculated by dividing noninterest expense by net interest income and noninterest income. The ratio is a measure of the Company's ability to manage noninterest expenses. The Company's efficiency ratio was 54.88% and 50.49% for the three months ended June 30, 2015 and 2014, respectively. The increase in the efficiency ratio in 2015 from the previous period is primarily the result of the Acquisition and other real estate owned expenses, which resulted in higher noninterest expense.

Capital Ratio

The average capital ratio is calculated by dividing average total equity capital by average total assets. It measures the level of average assets that are funded by shareholders' equity. Given an equal level of risk in the financial condition of two companies, the higher the capital ratio, generally the more financially sound the company. The Company's capital ratio of 11.86% as of June 30, 2015 is significantly higher than the industry average as of March 31, 2015.

Industry Results

The FDIC Quarterly Banking Profile reported the following results for the first quarter of 2015:

Earnings Growth Is Broad-Based

Rising revenues helped lift the quarterly net income of FDIC-insured institutions to \$39.8 billion in first quarter 2015. This is \$2.6 billion (6.9%) more than the industry earned in first quarter 2014. The improvement in net income was attributable to a \$4.3 billion (2.6%) increase in net operating revenue (the sum of net interest income and total noninterest income). Almost two out of every three banks (62.7%) reported higher profits than the year before, while only 5.6% were unprofitable. This is the lowest percentage of unprofitable institutions since second quarter 2005. The average return on assets (ROA) rose slightly to 1.02% from 1.01% in first quarter 2014.

Trading Income Registers Strong Growth

Noninterest income totaled \$62.7 billion, an increase of \$2.8 billion (4.6%) compared with first quarter 2014. Trading revenue was \$1.5 billion (23.9%) higher, while noninterest income from the sale, securitization, and servicing of 1-to-4 family residential real estate loans was up \$545 million (15.6%) from the year-earlier quarter. A majority of banks—57.3%—reported year-over-year growth in noninterest income.

Margins Remain Under Pressure

Net interest income rose to \$105.7 billion in the first quarter, up \$1.5 billion (1.5%) from the year before. Total interest income was \$1.2 billion (1%) higher, while total interest expense was \$343 million (2.9%) lower. The average net interest margin (NIM) fell to 3.02%, from 3.16% a year earlier, as higher-yielding assets matured and were replaced by lower-yielding investments in a low interest-rate environment. Fewer than half of all banks—43.2%—reported year-over-year improvement in their quarterly NIMs.

Loan Losses Improve Across All Major Loan Categories

For a third consecutive quarter, loan-loss provisions posted a year-over-year increase. Banks set aside \$8.4 billion in loss provisions, an increase of \$756 million (9.9%) from first quarter 2014. This is the largest quarterly total for loss provisions since second quarter 2013. Net charge-offs fell, year over year, for the 19th quarter in a row. Banks charged off \$9 billion in uncollectible loans, a decline of \$1.4 billion (13.2%) compared with first quarter 2014. The annualized net charge-off rate fell to 0.43% from 0.52% the year before. This is the lowest quarterly charge-off rate since third quarter 2006. Charge-offs were lower across all major loan categories. The largest year-over-year declines occurred in home equity lines of credit (down \$352 million, 38.8%) and credit cards (down \$293 million, 5.3%).

Table Of Contents

Noncurrent Loan Rate Continues to Fall

Noncurrent loan balances declined for a 20th consecutive quarter. The amount of loans that were noncurrent (90 days or more past due, or in nonaccrual status) fell by \$9.7 billion (6%) in the first three months of 2015. The average noncurrent loan rate declined from 1.96% to 1.83%, a seven-year low. Noncurrent balances fell in all major loan categories except loans to commercial and industrial (C&I) borrowers. Noncurrent C&I loans rose by \$998 million (11.7%), and the noncurrent rate on C&I loans rose from 0.50% to 0.54%. These are the two lowest noncurrent rates for C&I loans in the 31 years for which data are available. At the end of the quarter, \$54.5 billion (36.6%) of total noncurrent loan balances carried U.S. government guarantees or were covered by loss-sharing agreements with the FDIC.

Reserve Reductions Diminish

Banks reduced their reserves for loan losses by \$1.6 billion (1.3%) during the quarter. This is the 20th consecutive quarter that the industry's loss reserves have declined, but it is the smallest quarterly decline during this period. Reserves totaled \$121 billion at the end of the quarter, down \$142.1 billion (54%) from the peak level of five years ago. The average ratio of reserves-to-total loans and leases fell from 1.48% to 1.45%, the lowest level since fourth quarter 2007. The "coverage ratio" of reserves to noncurrent loans improved for a 10th consecutive quarter, rising from 75.4% to 79.1% as a result of the decline in noncurrent loan balances.

New Capital Rules Take Effect

Equity capital increased by \$30.7 billion (1.8%) during the quarter, and the average equity-to-assets ratio rose from 11.15% to 11.18%. Retained earnings added \$17.5 billion to equity, \$266 million (1.5%) more than the year before. New regulatory capital rules that took effect in the first quarter added a new regulatory capital element, the Common Equity Tier 1 (CET1) capital ratio, to the Prompt Corrective Action (PCA) capital requirements. For 96.8% of all institutions, the CET1 capital ratio was identical to their Tier 1 risk-based capital ratio. The average CET1 ratio for the industry at the end of the quarter was 12.65%, compared with an average of 12.75% for the Tier 1 risk-based capital ratio. The new rules also added elements of accumulated other comprehensive income (AOCI) to the calculation of Tier 1 capital unless institutions elected to opt out of the inclusion. More than 99% of banks eligible for the election chose to opt out.

Loans Post a \$52.5 Billion Increase

Total assets of insured institutions increased by \$224.3 billion (1.4%) to \$15.8 trillion during the first three months of 2015. Total loan and lease balances rose by \$52.5 billion (0.6%), as C&I loans increased by \$32.4 billion (1.9%), real estate loans secured by nonfarm nonresidential real estate properties increased by \$13.4 billion (1.2%), and residential mortgage loans rose by \$13.2 billion (0.7%). Credit card balances and agricultural production loans posted seasonal declines of \$38.5 billion (5.4%) and \$6.5 billion (8.3%), respectively, and home equity lines of credit (HELOCs) fell by \$8.4 billion (1.7%). This is the 24th consecutive quarterly decline for HELOC balances. Banks' securities holdings increased by \$48.4 billion (1.5%), as mortgage-backed securities rose by \$45.2 billion (2.6%). Securities designated as held to maturity increased by \$42.4 billion (6.6%), and the amount of securities maturing or repricing in 15 years or more rose by \$46.8 billion (6.5%). Banks increased their balances at Federal Reserve institutions by \$65.1 billion (4.7%) during the quarter, to \$1.4 trillion, or 9.2% of total industry assets.

Table Of Contents

Large Denomination Deposits Post Strong Growth

Total deposits increased by \$194.4 billion (1.7%), as deposits in foreign offices declined by \$15.8 billion (1.1%), and domestic office deposits rose by \$210.2 billion (2%). Deposits in accounts of less than \$250,000, which typically experience strong growth in first quarters, increased by \$110.4 billion (2.1%). Balances in larger-denomination accounts, which usually have little or no growth in first quarters, rose by \$104.1 billion (2%). Nondeposit liabilities declined by \$688 million (0.03%), as banks reduced their Federal Home Loan Bank advances by \$31.2 billion (6.7%).

Problem List Is at a Six-Year Low

The number of insured commercial banks and savings institutions filing quarterly financial reports declined from 6,509 to 6,419 in the first quarter. Mergers absorbed 86 institutions, while four insured institutions failed. For a fifth consecutive quarter, no new charters were added. The number of full-time equivalent employees declined by 5,349 to 2,042,596. The number of institutions on the FDIC's "Problem List" declined for the 16th consecutive quarter, falling from 291 to 253. Total assets of problem institutions fell from \$86.7 billion to \$60.3 billion.

Critical Accounting Policies

The discussion contained in this Item 2 and other disclosures included within this report are based, in part, on the Company's audited December 31, 2014 consolidated financial statements. These statements have been prepared in accordance with accounting principles generally accepted in the United States of America. The financial information contained in these statements is, for the most part, based on the financial effects of transactions and events that have already occurred. However, the preparation of these statements requires management to make certain estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses.

The Company's significant accounting policies are described in the "Notes to Consolidated Financial Statements" contained in the Company's Annual Report. Based on its consideration of accounting policies that involve the most complex and subjective estimates and judgments, management has identified its most critical accounting policies to be those related to the allowance for loan losses, valuation of other real estate owned, the assessment of other-than-temporary impairment of certain securities available-for-sale and the valuation of goodwill.

Allowance for Loan Losses

The allowance for loan losses is established through a provision for loan losses that is treated as an expense and charged against earnings. Loans are charged against the allowance for loan losses when management believes that collectability of the principal is unlikely. The Company has policies and procedures for evaluating the overall credit quality of its loan portfolio, including timely identification of potential problem loans. On a quarterly basis, management reviews the appropriate level for the allowance for loan losses, incorporating a variety of risk considerations, both quantitative and qualitative. Quantitative factors include the Company's historical loss experience, delinquency and charge-off trends, collateral values, known information about individual loans and other factors. Qualitative factors include the general economic environment in the Company's market area. To the extent actual results differ from forecasts and management's judgment, the allowance for loan losses may be greater or lesser than future charge-offs. Due to potential changes in conditions, it is at least reasonably possible that change in estimates will occur in the near term and that such changes could be material to the amounts reported in the Company's financial statements.

Table Of Contents

Other Real Estate Owned

Real estate properties acquired through or in lieu of foreclosure are initially recorded at the fair value less estimated selling cost at the date of foreclosure. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan losses. After foreclosure, independent appraisals or evaluations are periodically performed by management and property held for sale is carried at the lower of the new cost basis or fair value less cost to sell. Impairment losses are measured as the amount by which the carrying amount of a property exceeds its fair value, and any subsequent write-downs are recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the lower of its cost basis or fair value less cost to sell. Costs of significant property improvements are capitalized, whereas costs relating to holding property are expensed. The portion of interest costs relating to development of real estate is capitalized. The appraisals or evaluations are inherently subjective and require estimates that are susceptible to significant revisions as more information becomes available. Due to potential changes in conditions, it is at least reasonably possible that changes in fair values will occur in the near term and that such changes could materially affect the amounts reported in the Company's financial statements.

Other-Than-Temporary Impairment of Available-for-Sale Securities

Declines in the fair value of securities available-for-sale below their cost that are deemed to be other-than-temporary are generally reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers: (1) the intent to sell the investment securities and the more likely than not requirement that the Company will be required to sell the investment securities prior to recovery; (2) the length of time and the extent to which the fair value has been less than cost; and (3) the financial condition and near-term prospects of the issuer. Due to potential changes in conditions, it is at least reasonably possible that change in management's assessment of other-than-temporary impairment will occur in the near term and that such changes could be material to the amounts reported in the Company's financial statements.

Goodwill

Goodwill arose in connection with two acquisitions. For the purposes of goodwill impairment testing, determination of the fair value of the reporting units involves the use of significant estimates and assumptions. Through June 30, 2015, no conditions indicated impairment has incurred. The next annual test will be performed in the fourth quarter of 2015. Actual future test results may differ from the present evaluation of impairment due to changes in the conditions used at the time of that evaluation.

Table Of Contents**Income Statement Review for the Three Months ended June 30, 2015**

The following highlights a comparative discussion of the major components of net income and their impact for the three months ended June 30, 2015 and 2014:

AVERAGE BALANCES AND INTEREST RATES

The following two tables are used to calculate the Company's net interest margin. The first table includes the Company's average assets and the related income to determine the average yield on earning assets. The second table includes the average liabilities and related expense to determine the average rate paid on interest bearing liabilities. The net interest margin is equal to the interest income less the interest expense divided by average earning assets.

Net Interest Income

For the three months ended June 30, 2015 and 2014, the Company's net interest margin adjusted for tax exempt income was 3.32% and 3.30%, respectively. Net interest income, prior to the adjustment for tax-exempt income, for

the three months ended June 30, 2015 totaled \$9,787,000 compared to \$8,979,000 for the three months ended June 30, 2014.

For the three months ended June 30, 2015, interest income increased \$713,000, or 7.0%, when compared to the same period in 2014. The increase from 2014 was primarily attributable to higher average balance of loans, offset in part by lower average balances of investment securities. The higher average balances of loans were due primarily to the Acquisition and favorable economic conditions that fueled loan demand. The decrease in the average balance of investments securities was primarily used to fund the loan growth.

Interest expense decreased \$95,000, or 8.2%, for the three months ended June 30, 2015 when compared to the same period in 2014. The lower interest expense for the period is primarily attributable to lower average rates paid on time deposits due to continued low market interest rates.

Table Of Contents

Provision for Loan Losses

The Company's provision for loan losses was \$922,000 and \$36,000 for the three months ended June 30, 2015 and 2014, respectively. Net loan recoveries were \$24,000 and net loan charge-offs were \$87,000 for the three months ended June 30, 2015 and 2014, respectively. The growth in the loan portfolio was a primary factor in the increase in the provision for loan losses. Asset quality indicators for the Company, including impaired and past due loans, remain at favorable levels, including those problem assets obtained in the Acquisition. Payment performance on the Acquisition's loan portfolio has exceeded management expectations through June 30, 2015.

Noninterest Income and Expense

Noninterest income increased \$673,000 for the three months ended June 30, 2015 compared to the same period in 2014. The increase in noninterest income is primarily due to gain on the sale of securities in 2015. Exclusive of realized securities gains, noninterest income was 10% higher in the second quarter of 2015 compared to the same period in 2014, primarily due to increased gain on sale of loans held for sale and higher merchant and card fees. The increase in the gain on the sale of loans held for sale is due to increased secondary market volume. The increase in merchant and card income is due primarily to the Acquisition.

Noninterest expense increased \$1,283,000 or 23.7% for the three months ended June 30, 2015 compared to the same period in 2014 primarily as a result of increases in salaries and benefits, data processing expenses and occupancy expenses, related to the Acquisition. In addition, other real estate owned expenses were higher as a result of an impairment write down. The efficiency ratio for the second quarter of 2015 was 54.88%, compared to 50.49% in 2014.

Income Taxes

The provision for income taxes expense for the three months ended June 30, 2015 and 2014 was \$1,216,000 and \$1,414,000, respectively, representing an effective tax rate of 27% for both periods.

Net Interest Income

For the six months ended June 30, 2015 and 2014, the Company's net interest margin adjusted for tax exempt income was 3.30% and 3.27%, respectively. Net interest income, prior to the adjustment for tax-exempt income, for the three

months ended June 30, 2015 totaled \$19,233,000 compared to \$17,713,000 for the six months ended June 30, 2014.

For the six months ended June 30, 2015, interest income increased \$1,338,000, or 6.7%, when compared to the same period in 2014. The increase from 2014 was primarily attributable to higher average balance of loans, offset in part by lower average balances of investment securities. The higher average balance of loans was attributable to the Acquisition and favorable economic conditions that fueled loan demand. The decrease in the average balance of investments securities was primarily used to fund the loan growth. Excluding the Acquisition, the average loan portfolio grew over 11% from a year ago.

Table Of Contents

Interest expense decreased \$181,000, or 7.7%, for the six months ended June 30, 2015 when compared to the same period in 2014. The lower interest expense for the period is primarily attributable to lower average rates paid on time deposits due to continued low market interest rates

Provision for Loan Losses

The Company's provision for loan losses was \$999,000 and \$75,000 for the six months ended June 30, 2015 and 2014, respectively. Net loan recoveries were \$34,000 and net loan charge-offs were \$130,000 for the six months ended June 30, 2015 and 2014, respectively. Asset quality indicators for the Company, including impaired and past due loans, remain at favorable levels, including those problem assets obtained in the Acquisition. Payment performance on the Acquisition's loan portfolio has exceeded management expectations through June 30, 2015.

Noninterest Income and Expense

Noninterest income decreased \$507,000 for the six months ended June 30, 2015 compared to the same period in 2014. The decrease in noninterest income is primarily due to a gain on the sale of premises and equipment in 2014 with no corresponding gain in 2015. Excluding this gain and the gain on the sale of securities, noninterest income increased \$375,000, or 11%. This increase was primarily due to gain on the sale of loans held for sale and merchant and card fees. The increase in the gain on the sale of loans held for sale is due to increased secondary market volume. The increase in merchant and card income is due primarily to the Acquisition.

Noninterest expense increased \$2,093,000 or 19% for the six months ended June 30, 2015 compared to the same period in 2014 primarily as a result of increased salaries and benefits and other real estate owned expenses. The increase in salaries and benefits and data processing was mainly the result of the Acquisition. The increase in other real estate owned expenses was due primarily to an impairment write down.

Income Taxes

The provision for income taxes expense for the six months ended June 30, 2015 and 2014 was \$2,576,000 and \$3,199,000, representing an effective tax rate of 27% and 28%, respectively. The decrease in the effective rate is due primarily to the impact of the one-time gain on premises and equipment in 2014.

Balance Sheet Review

As of June 30, 2015, total assets were \$1,322,119,000, a \$21,088,000 increase compared to December 31, 2014. The increase in assets was due primarily to loans. The increase in assets was funded primarily by an increase in deposits.

Investment Portfolio

The investment portfolio totaled \$546,633,000 as of June 30, 2015, an increase of \$4,130,000 or 1% from the December 31, 2014 balance of \$542,502,000. The increase in the investment portfolio was primarily due to purchases of U.S. government agencies, offset in part by sales and pay downs of U.S. government mortgage-backed securities.

On a quarterly basis, the investment portfolio is reviewed for other-than-temporary impairment. As of June 30, 2015, gross unrealized losses of \$2,570,000, are considered to be temporary in nature due to the interest rate environment of 2015 and other general economic factors. As a result of the Company's favorable liquidity position, the Company does not have the intent to sell securities with an unrealized loss at the present time. In addition, management believes it is more likely than not that the Company will hold these securities until recovery of their fair value to cost basis and avoid considering present unrealized loss positions to be other-than-temporary.

Table Of Contents

At June 30, 2015, the Company's investment securities portfolio included securities issued by 275 government municipalities and agencies located within 25 states with a fair value of \$278.9 million. At December 31, 2014, the Company's investment securities portfolio included securities issued by 314 government municipalities and agencies located within 25 states with a fair value of \$281.8 million. No one municipality or agency represents a concentration within this segment of the investment portfolio. The largest exposure to any one municipality or agency as of June 30, 2015 was \$5.4 million (approximately 1.9% of the fair value of the governmental municipalities and agencies) represented by the Urbandale, Iowa Community School District to be repaid by sales tax revenues and property taxes.

The Company's procedures for evaluating investments in states, municipalities and political subdivisions include but are not limited to reviewing the offering statement and the most current available financial information, comparing yields to yields of bonds of similar credit quality, confirming capacity to repay, assessing operating and financial performance, evaluating the stability of tax revenues, considering debt profiles and local demographics, and for revenue bonds, assessing the source and strength of revenue structures for municipal authorities. These procedures, as applicable, are utilized for all municipal purchases and are utilized in whole or in part for monitoring the portfolio of municipal holdings. The Company does not utilize third party credit rating agencies as a primary component of determining if the municipal issuer has an adequate capacity to meet the financial commitments under the security for the projected life of the investment, and, therefore, does not compare internal assessments to those of the credit rating agencies. Credit rating downgrades are utilized as an additional indicator of credit weakness and as a reference point for historical default rates.

The following table summarizes the total general obligation and revenue bonds in the Company's investment securities portfolios as of June 30, 2015 and December 31, 2014 identifying the state in which the issuing government municipality or agency operates. (*Dollars in thousands*)

Table Of Contents

As of June 30, 2015 and December 31, 2014, the revenue bonds in the Company's investment securities portfolios were issued by government municipalities and agencies to fund public services such as community school facilities, college and university dormitory facilities, water utilities and electrical utilities. The revenue bonds are to be paid from primarily 8 revenue sources. The revenue sources that represent 5% or more, individually, as a percent of the total revenue bonds are summarized in the following table. (*Dollars in thousands*)

| | 2015 | | 2014 | |
|--|----------------|----------------------|----------------|----------------------|
| | Amortized Cost | Estimated Fair Value | Amortized Cost | Estimated Fair Value |
| Revenue bonds by revenue source | | | | |
| Sales tax | \$89,295 | \$90,717 | \$86,386 | \$88,449 |

| Other | 14,503 | 14,608 | 14,441 | 14,586 |
| Total revenue bonds by revenue source | \$147,909 | \$149,555 | \$143,895 | \$146,511 |

Loan Portfolio

The loan portfolio, net of the allowance for loan losses of \$9,872,000, totaled \$677,580,000 as of June 30, 2015, an increase of \$19,139,000, or 3%, from the December 31, 2014 balance of \$658,441,000. The increase in the loan portfolio is primarily due to increased loan volume in the construction real estate, commercial operating and agricultural real estate portfolios, offset by payments received in the agricultural operating portfolio.

Deposits

Deposits totaled \$1,079,378,000 as of June 30, 2015, an increase of \$27,255,000, or 3%, from the December 31, 2014 balance of \$1,052,123,000. The increase in deposits was primarily due to increases in public money market; public NOW accounts; retail money market accounts; and commercial money market accounts, offset in part by decreases in time deposits.

Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase totaled \$43,478,000 as of June 30, 2015, a decrease of \$7,786,000, or 15%, from the December 31, 2014 balance of \$51,265,000. The decrease was primarily the result of the withdrawal of a portion of one customer's securities sold under agreements to repurchase balances.

Off-Balance Sheet Arrangements

The Company is party to financial instruments with off-balance-sheet risk in the normal course of business. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the balance sheet. No material changes in the Company's off-balance sheet arrangements have occurred since December 31, 2014.

Table Of Contents

Asset Quality Review and Credit Risk Management

The Company's credit risk is historically centered in the loan portfolio, which on June 30, 2015 totaled \$677,580,000 compared to \$658,441,000 as of December 31, 2014. Net loans comprise 51.2% of total assets as of June 30, 2015. The object in managing loan portfolio risk is to reduce the risk of loss resulting from a customer's failure to perform according to the terms of a transaction and to quantify and manage credit risk on a portfolio basis. The Company's level of problem loans (consisting of nonaccrual loans and loans past due 90 days or more) as a percentage of total loans was 0.30% at June 30, 2015, as compared to 0.37% at December 31, 2014 and 0.23% at June 30, 2014. The Company's level of problem loans as a percentage of total loans at June 30, 2015 of 0.30% is lower than the Company's peer group (335 bank holding companies with assets of \$1 billion to \$3 billion) of 0.98% as of March 31, 2015.

Impaired loans, net of specific reserves, totaled \$1,697,000 as of June 30, 2015 and have declined \$373,000 as compared to the impaired loans of \$2,070,000 as of December 31, 2014 and increased \$730,000 as compared to the impaired loans of \$967,000 as of June 30, 2014. The decrease in impaired loans since December 31, 2014 is primarily due to payments received on various loans. The increase in impaired loans since June 30, 2014 is due primarily to the inclusion of credit deteriorated loans from the Acquisition.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payment of principal and interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. The Company applies its normal loan review procedures to identify loans that should be evaluated for impairment.

The Company had TDRs of \$929,000 as of June 30, 2015, of which all were included in impaired loans and on nonaccrual status. The Company had TDRs of \$1,129,000 as of December 31, 2014, all of which were included in impaired and nonaccrual loans.

TDRs are monitored and reported on a quarterly basis. Certain TDRs are on nonaccrual status at the time of restructuring. These borrowings are typically returned to accrual status after the following: sustained repayment performance in accordance with the restructuring agreement for a reasonable period of at least six months; and, management is reasonably assured of future performance. If the TDR meets these performance criteria and the interest rate granted at the modification is equal to or greater than the rate that the Company was willing to accept at the time of the restructuring for a new loan with comparable risk, then the loan will return to performing status.

For TDRs that were on nonaccrual status before the modification, a specific reserve may already be recorded. In periods subsequent to modification, the Company will continue to evaluate all TDRs for possible impairment and, as necessary, recognize impairment through the allowance. The Company had no charge-off related to TDRs for the six months ended June 30, 2015 and one charge-offs in the amount of \$44,000 for the six months ended June 30, 2014.

Loans past due 90 days or more that are still accruing interest are reviewed no less frequently than quarterly to determine if there is a strong reason that the credit should not be placed on non-accrual. As of June 30, 2015, non-accrual loans totaled \$2,024,000 and loans past due 90 days and still accruing totaled \$37,000. This compares to non-accrual loans of \$2,407,000 and loans past due 90 days and still accruing totaled \$36,000 as of December 31, 2014. Other real estate owned totaled \$4,588,000 as of June 30, 2015 and \$8,436,000 as of December 31, 2014.

Table Of Contents

The allowance for loan losses as a percentage of outstanding loans as of June 30, 2015 was 1.44%, as compared to 1.32% at December 31, 2014. The allowance for loan losses totaled \$9,872,000 and \$8,838,000 as of June 30, 2015 and December 31, 2014, respectively. Net recoveries of loans totaled \$34,000 for the six months ended June 30, 2015 as compared to net charge-offs of loans of \$130,000 for the six months ended June 30, 2014.

The allowance for loan losses is management's best estimate of probable losses inherent in the loan portfolio as of the balance sheet date. Factors considered in establishing an appropriate allowance include: an assessment of the financial condition of the borrower, a realistic determination of value and adequacy of underlying collateral, the condition of the local economy and the condition of the specific industry of the borrower, an analysis of the levels and trends of loan categories and a review of delinquent and classified loans.

Liquidity and Capital Resources

Liquidity management is the process by which the Company, through its Banks' Asset and Liability Committees (ALCO), ensures that adequate liquid funds are available to meet its financial commitments on a timely basis, at a reasonable cost and within acceptable risk tolerances. These commitments include funding credit obligations to borrowers, funding of mortgage originations pending delivery to the secondary market, withdrawals by depositors, maintaining adequate collateral for pledging for public funds, trust deposits and borrowings, paying dividends to shareholders, payment of operating expenses, funding capital expenditures and maintaining deposit reserve requirements.

Liquidity is derived primarily from core deposit growth and retention; principal and interest payments on loans; principal and interest payments, sale, maturity and prepayment of securities available-for-sale; net cash provided from operations; and access to other funding sources. Other funding sources include federal funds purchased lines, FHLB advances and other capital market sources.

As of June 30, 2015, the level of liquidity and capital resources of the Company remain at a satisfactory level. Management believes that the Company's liquidity sources will be sufficient to support its existing operations for the foreseeable future.

The liquidity and capital resources discussion will cover the following topics:

Review of the Company's Current Liquidity Sources

Review of Statements of Cash Flows

Company Only Cash Flows

Review of Commitments for Capital Expenditures, Cash Flow Uncertainties and Known Trends in Liquidity and Cash Flows Needs

Capital Resources

Review of the Company's Current Liquidity Sources

Liquid assets of cash and due from banks and interest-bearing deposits in financial institutions as of June 30, 2015 and December 31, 2014 totaled \$55,996,000 and \$55,200,000, respectively, and provide a level of liquidity.

Table Of Contents

Other sources of liquidity available to the Banks as of June 30, 2015 include outstanding lines of credit with the FHLB of Des Moines, Iowa of \$138,543,000, with \$20,030,000 of outstanding FHLB advances at June 30, 2015. Federal funds borrowing capacity at correspondent banks was \$115,691,000, with no outstanding federal fund purchase balances as of June 30, 2015. The Company had securities sold under agreements to repurchase totaling \$43,478,000, term repurchase agreements of \$13,000,000 and financing agreements of \$3,938,000 as of June 30, 2015.

Total investments as of June 30, 2015 were \$546,633,000 compared to \$542,502,000 as of December 31, 2014. These investments provide the Company with a significant amount of liquidity since all of the investments are classified as available-for-sale as of June 30, 2015.

The investment portfolio serves an important role in the overall context of balance sheet management in terms of balancing capital utilization and liquidity. The decision to purchase or sell securities is based upon the current assessment of economic and financial conditions, including the interest rate environment, liquidity and credit considerations. The portfolio's scheduled maturities represent a significant source of liquidity.

Review of Statements of Cash Flows

Net cash provided by operating activities for the six months ended June 30, 2015 totaled \$10,801,000 compared to the \$10,069,000 for the six months ended June 30, 2014. The increase of \$732,000 in net cash provided by operating activities was primarily due to the gain on the sale of premises in 2014 with no significant gain in 2015; the provision for loan losses; and the change in the loans held for sale.

Net cash provided by (used in) investing activities for the six months ended June 30, 2015 was \$(23,724,000) compared to \$204,000 for the six months ended June 30, 2014. The change in cash (used in) investing activities of \$23,928,000 was primarily due to changes in loans.

Net cash provided by (used in) financing activities for the six months ended June 30, 2015 totaled \$15,503,000 compared to \$(10,825,000) for the six months ended June 30, 2014. The change of \$26,328,000 in net cash provided by financing activities was primarily due to an increase in deposits, offset in part by a change in securities sold under repurchase agreements. As of June 30, 2015, the Company did not have any external debt financing, off-balance sheet financing arrangements, or derivative instruments linked to its stock.

Company Only Cash Flows

The Company's liquidity on an unconsolidated basis is heavily dependent upon dividends paid to the Company by the Banks. The Company requires adequate liquidity to pay its expenses and pay stockholder dividends. Dividends paid by the Banks to the Company amounted to \$4,050,000 and \$3,800,000 for the six months ended June 30, 2015 and 2014, respectively. Various federal and state statutory provisions limit the amounts of dividends banking subsidiaries are permitted to pay to their holding companies without regulatory approval. Federal Reserve policy further limits the circumstances under which bank holding companies may declare dividends. For example, a bank holding company should not continue its existing rate of cash dividends on its common stock unless its net income is sufficient to fully fund each dividend and its prospective rate of earnings retention appears consistent with its capital needs, asset quality and overall financial condition. In addition, the Federal Reserve and the FDIC have issued policy statements, which provide that insured banks and bank holding companies should generally pay dividends only out of current operating earnings. Federal and state banking regulators may also restrict the payment of dividends by order. The quarterly dividend declared by the Company increased to \$0.20 per share in 2015 from \$0.18 per share in 2014.

Table Of Contents

The Company, on an unconsolidated basis, has interest bearing deposits and marketable investment securities totaling \$9,044,000 as of June 30, 2015 that are presently available to provide additional liquidity to the Banks.

Review of Commitments for Capital Expenditures, Cash Flow Uncertainties and Known Trends in Liquidity and Cash Flows Needs

No other material capital expenditures or material changes in the capital resource mix are anticipated at this time. The primary cash flow uncertainty would be a sudden decline in deposits causing the Banks to liquidate securities. Historically, the Banks have maintained an adequate level of short-term marketable investments to fund the temporary declines in deposit balances. There are no known trends in liquidity and cash flow needs as of June 30, 2015 that are of concern to management.

Capital Resources

The Company's total stockholders' equity as of June 30, 2015 totaled \$156,569,000 and was higher than the \$154,674,000 recorded as of December 31, 2014. The increase in stockholders' equity was primarily due to net income, reduced by dividends declared and a decrease in accumulated other comprehensive income. The decrease in other comprehensive income is created by 2015 market interest rates trending higher, which resulted in lower fair values in the securities available-for-sale portfolio. At June 30, 2015 and December 31, 2014, stockholders' equity as a percentage of total assets was 11.84% and 11.89%, respectively. The capital levels of the Company exceed applicable regulatory guidelines as of June 30, 2015.

Forward-Looking Statements and Business Risks

The Private Securities Litigation Reform Act of 1995 provides the Company with the opportunity to make cautionary statements regarding forward-looking statements contained in this Quarterly Report, including forward-looking statements concerning the Company's future financial performance and asset quality. Any forward-looking statement contained in this Quarterly Report is based on management's current beliefs, assumptions and expectations of the Company's future performance, taking into account all information currently available to management. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to management. If a change occurs, the Company's business, financial condition, liquidity, results of operations, asset quality, plans and objectives may vary materially from those expressed in the forward-looking statements. The risks and uncertainties that may affect the actual results of the Company include, but are not limited to, the following: economic conditions, particularly in the concentrated geographic area in which the Company and its affiliate banks operate; competitive products and pricing available in the marketplace; changes in credit and other risks posed by the

Company's loan and investment portfolios, including declines in commercial or residential real estate values or changes in the allowance for loan losses dictated by new market conditions or regulatory requirements; fiscal and monetary policies of the U.S. government; changes in governmental regulations affecting financial institutions (including regulatory fees and capital requirements); changes in prevailing interest rates; credit risk management and asset/liability management; the financial and securities markets; the availability of and cost associated with sources of liquidity; the Company's ability to successfully integrate the assets being purchased from First Bank into its operations on a timely and cost effective basis; and other risks and uncertainties inherent in the Company's business, including those discussed under the headings "Risk Factors" and "Forward-Looking Statements and Business Risks" in the Company's Annual Report. Management intends to identify forward-looking statements when using words such as "believe", "expect", "intend", "anticipate", "estimate", "should" or similar expressions. Undue reliance should not be placed on these forward-looking statements. The Company undertakes no obligation to revise or update such forward-looking statements to reflect current events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Table Of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's market risk is comprised primarily of interest rate risk arising from its core banking activities of lending and deposit taking. Interest rate risk results from the changes in market interest rates which may adversely affect the Company's net interest income. Management continually develops and applies strategies to mitigate this risk. Management does not believe that the Company's primary market risk exposure and how it has been managed year-to-date in 2015 changed significantly when compared to 2014.

Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of the Company's management, including the Principal Executive Officer and Principal Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended). Based on that evaluation, the Company's management, including the Principal Executive Officer and Principal Financial Officer, concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms.

There was no change in the Company's internal control over financial reporting that occurred during the Company's last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Not applicable.

Item 1.A. Risk Factors

None.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In November, 2014, the Company approved a Stock Repurchase Plan which provided for the repurchase of up to 100,000 shares of the Company's common stock. As of June 30, 2015, there were 100,000 shares remaining to be purchased under the plan.

Table Of Contents

The following table provides information with respect to purchase made by or on behalf of the Company or any “affiliated purchases” (as defined in rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of the Company’s common stock during the three months ended June 30, 2015.

| Period | Total Number of Shares Purchased | Average Price Paid Per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans | Maximum Number of Shares that May Yet Be Purchased Under The Plan |
|---------------------------------|---|---|---|--|
| April 1, 2015 to April 30, 2015 | - | \$ - | - | 100,000 |
| May 1, 2015 to May 31, 2015 | - | \$ - | - | 100,000 |
| June 1, 2015 to June 30, 2015 | - | \$ - | - | 100,000 |
| Total | - | | - | |
