Although management of Superior Industries International, Inc. (the "Company") has been working diligently to complete all of the required information for its Annual Report on Form 10-K for the fiscal year ended December 26, 2010, (the "Form 10-K"), the Company is unable, without unreasonable effort or expense, to complete the financial statements and related disclosures to be included in the Form 10-K on or before March 11, 2011, due to unanticipated delays experienced in the preparation of the Form 10-K. These delays were primarily a result of performing additional analyses and reviews of the Company's international deferred taxes, the balance sheet classifications of certain short-term fixed deposits and the completion of management's assessment of the effectiveness of the Company's internal control over financial reporting.

The Company expects that it will be able to complete the work described above in time for the Company to file its Form 10-K for the fiscal year ended December 26, 2010 within the fifteen-day extension provided by Rule 12b-25.

[ ] No

(3) Is it anticipated that any significant change in results of operations from the corresponding period for the last fiscal year will be reflected by the earnings statements to be included in the subject report or portion thereof?

Yes  No

Net sales are expected to increase 72 percent to \$719.5 million for the year ended December 26, 2010 when compared to the comparable periods in the prior year, primarily as a result of the significant recovery experienced in the North American automobile industry and the resulting increase in unit shipments caused by increased customer demand for our products.

It is expected that gross profit will increase to \$89.2 million, or 12 percent of net sales, for the year ended December 26, 2010 when compared to the comparable periods in the prior year, primarily due to the increased net sales and higher plant utilization rates resulting from increased customer demand, as well as the absence of certain severance and plant shut-down costs that were included in the prior year.

Selling, general and administrative expenses are expected to be higher by \$5.6 million for the year ended December 26, 2010 when compared to the comparable periods in the prior year. This increase is primarily as a result of increases in expenses related

to incentive bonus expense, which is based on a percentage of income, costs of our new enterprise resource planning system and the provision for doubtful accounts.

Operating income is expected to increase to \$59.8 million for the year ended December 26, 2010 when compared to the comparable periods in the prior year, primarily as a result of the increased net sales and increased gross profit, as described above, and the elimination of certain plant closure and related costs and impairment charges that were included in the prior year periods.

Net income is expected to be \$51.6 million and diluted earnings per share is expected to be \$1.93 per diluted share for the year ended December 26, 2010.

The results of operations discussed above are estimates and are subject to revision until the Company completes its preparation and review of the financial statements and related disclosures that need to be included in the Form 10-K.
