We expect we will require additional capital to meet our long term operating requirements. We expect to raise additional capital through, among other things, the sale of equity or debt securities.

Three and Nine Months Periods Ended October 31, 2012 and October 31, 2011

Our net losses for the three and nine months periods ended October 31, 2012 were \$1,876 and \$32,268. During the three and nine months periods ended October 31, 2011 our net losses were \$1,815 and \$ 6,853. During the three and nine months periods ended October 31, 2012 and October 31, 2011 we have not generated any revenue.

During the three and nine months periods ended October 31, 2012, our operating expenses were professional fees of \$1,763 and \$ 30,711, advertising was \$15 and \$ 45 and amortization was \$98 and \$ 294. During the three and nine months periods ended October 31, 2011, our operating expenses were professional fees of \$ 1,800 and \$ 5,300, bank fees of \$ 0 and \$ 34, and general and administrative expenses of \$ 15 and \$ 1,519. The weighted average number of shares outstanding was 5,300,000 for the three and nine months periods ended October 31, 2012 and 2011 respectively.

Liquidity and Capital Resources

Three Months Period Ended October 31, 2012

As at October 31, 2012, our total assets were \$645 compared to \$15,112 in total assets at January 31, 2012. Total assets were comprised of \$73 in cash and property and equipment of \$572. As at October 31, 2012, our current liabilities were \$22,326. Stockholders' equity was \$ (21,681) as of October 31, 2012 compare to stockholders' equity of \$10,587 as of January 31, 2012.

Cash Flows from Operating Activities

We have not generated positive cash flows from operating activities. For the nine months period ended October 31, 2012, net cash used in operating activities was \$(35,524), which was primarily our loss from operations of \$(32,268). For the period from inception (April 19, 2010) to October 31, 2012, net cash used in operating activities was \$(45,123), which was primarily our loss from operations of \$(46,681).

Cash Flows from Investing Activities

For the nine months period ended October 31, 2012, the Company have not generated any cash flow.

Cash Flows from Financing Activities

We have financed our operations primarily from either advancements or the issuance of equity. For the nine months period ended October 31, 2012, net cash provided by financing activities was \$21,351. For the period from inception (April 19, 2010) to October 31, 2012, net cash provided by financing activities was \$46,376 received from proceeds from issuance of common stock.

Plan of Operation and Funding

We expect that working capital requirements will continue to be funded through a combination of our existing funds and further issuances of securities. Our working capital requirements are expected to increase in line with the growth of our business.

Existing working capital, further advances and debt instruments, and anticipated cash flow are expected to be adequate to fund our operations over the next three months. We have no lines of credit or other bank financing arrangements. Generally, we have financed operations to date through the proceeds of the private placement of equity and debt instruments. In connection with our business plan, management anticipates additional increases in operating expenses and capital expenditures relating to: (i) acquisition of inventory; (ii) developmental expenses associated with a start-up business; and (iii) marketing expenses. We intend to finance these expenses with further issuances of securities, and debt issuances. Thereafter, we expect we will need to raise additional capital and generate revenues to meet long-term operating requirements. Additional issuances of equity or convertible debt securities will result in dilution to our current shareholders. Further, such securities might have rights, preferences or privileges senior to our common stock. Additional financing may not be available upon acceptable terms, or at all. If adequate funds are not available or are not available on acceptable terms, we may not be able to take advantage of prospective new business endeavors or opportunities, which could significantly and materially restrict our business operations. We will have to raise additional funds in the next twelve months in order to sustain and expand our operations. We currently do not have a specific plan of how we will obtain such funding; however, we anticipate that additional funding will be in the form of equity financing from the sale of our common stock. We have and will continue to seek to obtain short-term loans from our directors, although no future arrangement for additional loans has been made. We do not have any agreements with our directors concerning these loans. We do not have any arrangements in place for any future equity financing.

Off-Balance Sheet Arrangements

As of the date of this Quarterly Report, we do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Going Concern

The independent auditors' review report accompanying our January 31, 2012 financial statements contained an explanatory paragraph expressing substantial doubt about our ability to continue as a going concern. The financial statements have been prepared "assuming that we will continue as a going concern," which contemplates that we will realize our assets and satisfy our liabilities and commitments in the ordinary course of business.

ITEM 4. MINE SAFETY DISCLOSURES

Our management is responsible for establishing and maintaining a system of disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) that is designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive officer or officers and principal financial officer or officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

An evaluation was conducted under the supervision and with the participation of our management of the effectiveness of the design and operation of our disclosure controls and procedures as of October 31, 2012. Based on that evaluation, our management concluded that our disclosure controls and procedures were not effective as of such date to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. Such officer also confirmed that there was no change in our internal control over financial reporting during the three-month period ended October 31, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
