Item 2.02. Results of Operations and Financial Condition

The Corning Incorporated press release dated January 27, 2009 regarding its financial results for the fourth quarter ended December 31, 2008 and its first quarter 2009 earnings guidance is attached hereto as Exhibit 99.

The information in this report, being furnished pursuant to Item 2.02 of Form 8-K, shall not be deemed to be filed for purposes of Section 18 of the Securities and Exchange Act of 1934, as amended (the Exchange Act), or otherwise subject to the liabilities of that Section, and is not incorporated by reference in any filing under the Securities Act of 1933, as amended, or the Exchange Act, except as expressly set forth by specific reference in such filing.

Item 2.05. Costs Associated with Exit or Disposal Activities

On January 27, 2009, Corning Incorporated issued a press release including the announcement that it will recognize certain charges against its results for the first quarter ended March 31, 2009 as a result of a restructuring plan. A copy of the press release is attached as Exhibit 99, and its Restructuring Plans section is incorporated herein by reference.

On January 26, 2009, Corning committed to a restructuring plan to reduce its workforce by 3,500 employees. Corning made the decision to restructure because of the shift in its core businesses in the fourth quarter of 2008 due to the economic recession and resulting lower anticipated 2009 sales levels. Corning expects to complete this restructuring plan by the end of 2009. We estimate the total costs of this plan to be in the range of \$115 million to \$165 million, of which total cash expenditures are expected to be roughly \$105 million to \$150 million related to termination benefits.

Corning Announces Fourth-Quarter Results

Plans restructuring actions in first quarter 2009

CORNING, N.Y. Corning Incorporated (NYSE:GLW) today announced results for the fourth quarter and full year 2008, along with the company's planned restructuring actions.

Fourth-Quarter Highlights

Sales were \$1.1 billion, down about 30% both sequentially and year over year.

Earnings per share were \$0.16. Excluding special items, earnings per share were \$0.13*, down about 70% both sequentially and year over year.

Display Technologies' combined LCD glass volume, including Corning's wholly owned business and Samsung Corning Precision Glass Co., Ltd. (SCP), was down 35% sequentially and 28% year over year. Volume in the company's wholly owned business was down about 50% sequentially and year over year, while volume at SCP was down 26% sequentially and only 4% year over year. Gross margin was 28%, reflecting lower volumes in all segments and the cost of capacity reductions.

At the end of the fourth quarter the company had \$2.8 billion in cash and short-term investments, \$1.2 billion greater than debt.

Full-Year Highlights

Sales were \$5.9 billion, up 1.5% from 2007.

Earnings per share were \$3.32. Excluding special items, earnings per share were \$1.53*, up 9% versus 2007.

Display Technologies' combined LCD glass volume was up 14%, including volume increases of 1% in the wholly owned business and 28% at SCP. Price declines were approximately 8% in both the wholly owned business and at SCP.

*These are non-GAAP financial measures. The reconciliation between GAAP and non-GAAP measures is provided in the tables following this news release, as well as on the company's investor relations website.

Restructuring Plans

Planned corporate-wide restructuring actions will result in first-quarter charges in the range of \$115 million to \$165 million pretax, in addition to the fourth-quarter restructuring charges of \$22 million. About 90% of the charge is for cash termination benefits, most of which will be paid in 2009. Certain of Corning's equity companies are also evaluating restructuring actions in the first quarter.

In total, Corning plans to reduce its workforce by about 3,500 employees, or 13%, before the end of the year. About 1,500 of the reductions are salaried employees. The company is also in the process of reducing more than 1,400 temporary workers.

The restructuring program will include a selective early retirement program, global workforce reductions and consolidation of manufacturing facilities. The company also suspended merit increases for its salaried employees.

Annualized savings of \$150 million to \$200 million are expected as a result of the restructuring actions.

We experienced a significant momentum shift in many of our core businesses in the fourth quarter as the recession took hold, Wendell P. Weeks, chairman and chief executive officer, said. As a result, we are adjusting our operations to reflect anticipated lower sales in 2009. We are also moving aggressively to reduce operating expenses and capital spending to continue to meet our goals of positive free cash flow and a healthy balance sheet.

Fourth-Quarter Segment Results

Sales in the Display Technologies segment were \$390 million, down 44% sequentially and 50% year over year. This significant decline resulted primarily from the supply chain's inventory reduction and lower retail sales of LCD products. Sequential price declines were slightly higher than the previous quarter. Positive foreign exchange rate movements partially offset the volume declines.

Telecommunications segment sales were \$405 million, down 18% sequentially and 6% compared to the fourth quarter of 2007.

Environmental Technologies segment sales were \$128 million, down 28% sequentially and 32% year over year. Fourth-quarter sales of automotive products declined sharply reflecting the global decline in the automotive industry. Heavy-duty diesel sales remained weak.

Corning's equity earnings from Dow Corning Corporation were \$86 million, down sequentially as the recession began to impact the demand for silicone products, but up slightly year over year.

Looking Forward

James B. Flaws, vice chairman and chief financial officer, said, "We anticipate a slow start to 2009 with first-quarter combined display volume down 20% to 25% as the supply chain continues to reduce inventory during the seasonally weaker retail sales quarter. As we announced last December, we will also have high-single-digit price declines in the first quarter. As a result, sales, gross margin and net income will be sequentially lower. We expect earnings per share*, before special items, to be about break-even in the first quarter.

On the other hand, recent news about the display supply chain and end market is encouraging. Retail sales of LCD TV were stronger in December than we anticipated and this trend is continuing into early January. We estimate that the display supply chain has reduced total inventory levels to be close to year-end 2007 levels. This reduction, while painful for us in the fourth quarter, moves us closer to the day that glass demand rebounds. We are currently anticipating a significant increase in glass demand in the second quarter.

During these tough times, our three priorities are preserving cash, restructuring the company to be profitable at a lower sales level, and accelerating new products while maintaining our focus on long-term growth opportunities," he said.

The company is concentrating on its short-term growth opportunities by investing in Gen 10 LCD manufacturing, extending its bend-insensitive ClearCurve® optical fiber products into new markets, introducing next-generation advanced diesel engine substrates and filters, expanding applications for its Gorilla® glass and pursuing new initiatives in thin-film photovoltaics.

As previously announced, the company has reduced its 2009 capital spending to \$1.1 billion, of which about \$525 million relates to construction completed in 2008. "We have a goal of being free cash flow positive for the year, but expect our first-half free cash flow to be negative," he said.

Flaws said that Corning is sizing the company's cost structure for about \$5 billion of sales in 2009. "This level is above our first-quarter run rate and reflects our belief that the display supply chain contraction will end in the second quarter. If we do not see this improvement, we will consider further consolidation of manufacturing facilities and additional workforce reductions.

Flaws concluded by noting that, despite the current impact of the global recession, we remain well positioned in our core businesses for the long term. This recession will end. The exact timing is difficult to predict but we know that the world is not going backwards. Optical fiber solutions will continue to replace older copper lines and LCD televisions are making CRT models obsolete. And stronger environmental regulations will soon be taking effect. Demand for our products will increase as the economy improves.

Corning will provide more information on its 2009 outlook at its annual investor relations meeting in New York on Friday, Feb. 6 at 9 a.m. ET at the Times Center. Attendees can register online at the company's investor relations web site. The company also will be presenting at the Thomas Weisel Telecom and Technology Conference on Feb. 10 in San Francisco.

Fourth-Quarter Conference Call Information

The company will host a fourth-quarter conference call on Tuesday, Jan. 27 at 8:30 a.m. ET. The access code is 981250. The webcast will be archived for one year following the call.

Presentation of Information in this News Release

Non-GAAP financial measures are not in accordance with, or an alternative to, GAAP. Corning's non-GAAP net income and EPS measures exclude restructuring, impairment and other charges and adjustments to prior estimates for such charges. Additionally, the company's non-GAAP measures exclude adjustments to asbestos settlement reserves, gains and losses arising from debt retirements, charges or credits arising from adjustments to the valuation allowance against deferred tax assets, equity method charges resulting from impairments of equity method investments or restructuring, impairment or other charges taken by equity method companies and gains from discontinued operations. The company believes presenting non-GAAP net income and EPS measures is helpful to analyze financial performance without the impact of unusual items that may obscure trends in the company's underlying performance. These non-GAAP measures are reconciled on the company's Web site at www.corning.com/investor_relations and accompany this news release.

Forward-Looking and Cautionary Statements

This press release contains forward-looking statements (within the meaning of the Private Securities Litigation Reform Act of 1995), which are based on current expectations and assumptions about Corning's financial results and business operations, that involve substantial risks and uncertainties that could cause actual results to differ materially. These risks and uncertainties include: the effect of global political, economic and business conditions; conditions in the financial and credit markets; currency fluctuations; tax rates; product demand and industry capacity; competition; reliance on a concentrated customer base; manufacturing efficiencies; cost reductions; availability of critical components and materials; new product commercialization; pricing fluctuations and changes in the mix of sales between premium and non-premium products; new plant start-up or restructuring costs; possible disruption in commercial activities due to terrorist activity, armed conflict, political instability or major health concerns; adequacy of insurance; equity company activities; acquisition and divestiture activities; the level of excess or obsolete inventory; the rate of technology change; the ability to enforce patents; product and components performance issues; stock price fluctuations; and adverse litigation or regulatory developments. These and other risk factors are detailed in Corning's filings with the Securities and Exchange Commission. Forward-looking statements speak only as of the day that they are made, and Corning undertakes no obligation to update them in light of new information or future events.

SEGMENT RESULTS

(Unaudited; in millions)

- (1) Depreciation expense for Corning's reportable segments includes an allocation of depreciation of corporate property not specifically identifiable to a segment.
- (2) Research, development, and engineering expenses includes direct project spending which is identifiable to a segment.
- (3) In the three months and year ended December 31, 2008, restructuring, impairment and other charges and (credits) includes a charge of \$22 million comprised primarily of severance costs for a restructuring plan in the Telecommunications segment.
- (4) Many of Corning's administrative and staff functions are performed on a centralized basis. Where practicable, Corning charges these expenses to segments based upon the extent to which each business uses a centralized function. Other staff functions, such as corporate finance, human resources and legal are allocated to segments, primarily as a percentage of sales. In the year ended December 31, 2008, earnings (loss) before minority interest and equity earnings (loss) included a \$12 million litigation settlement in the Display Technologies segment and a \$14 million loss on the sale of a business in the All Other segment.
- (5) In the three months and year ended December 31, 2007, equity in earnings (loss) of affiliated companies, net of impairments includes net charges of \$14 million and \$40 million, respectively, related to impairments and other charges and credits for Samsung Corning and is included in the All Other segment.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Restructuring

In the fourth quarter of 2008, Corning recorded a charge of \$22 million pretax and \$21 million after-tax, which was comprised primarily of severance costs for a restructuring plan in the Telecommunications segment.

2. Asbestos Settlement

On March 28, 2003, Corning announced that it had reached agreement with the representatives of asbestos claimants for the settlement of all current and future asbestos claims against Corning and Pittsburgh Corning Corporation (PCC) which might arise from PCC products or operations (the 2003 Plan). On December 21, 2006, the Bankruptcy Court issued an order denying confirmation of the 2003 Plan. On January 10, 2008, some of the parties in the proceeding advised the Bankruptcy Court that they had made substantial progress on an amended plan of reorganization (the Amended PCC Plan) that resolved issues raised by the Court in denying the confirmation of the 2003 Plan.

As a result of progress in the parties' continuing negotiations, Corning believes the Amended PCC Plan now represents the most probable outcome of this matter and the probability that the 2003 plan will become effective has diminished. The proposed settlement under the Amended PCC Plan requires Corning to contribute its equity interest in PCC and Pittsburgh Corning Europe, N.V. (PCE) and to contribute a fixed series of cash payments, recorded at present value on December 31, 2008. Corning will have the option to contribute shares rather than cash, but the liability is fixed by dollar value and not number of shares. As a result, the estimated asbestos settlement liability is no longer impacted by movements in the value of Corning common stock. The Amended PCC Plan does not include non-PCC asbestos claims that may be or have been raised against Corning. Corning has recorded an additional amount for such claims in its estimated asbestos settlement liability.

In the first quarter of 2008, we recorded a \$327 million reduction to our estimated liability for asbestos litigation as a result of the increase in the likelihood of a settlement under the Amended PCC Plan and a corresponding decrease in the likelihood of a settlement under terms of the 2003 Plan. In the second, third and fourth quarters of 2008, we recorded pretax and after-tax charges of \$9 million, \$6 million and a credit of \$28 million, respectively to adjust the asbestos settlement liability for the change in value of the components of the Amended PCC Plan.

3. Cash and Short-Term Investments

In the fourth quarter of 2008, Corning recorded a pretax and after-tax loss of \$11 million on certain available-for-sale securities that were included in cash and short-term investments.

4. Provision for Income Taxes

In the fourth quarter of 2008, Corning released an additional \$45 million of valuation allowances on our U.S. deferred tax assets as a result of a change in our estimate of current-year U.S. taxable income.

RECONCILIATION OF NON-GAAP FINANCIAL MEASURE TO GAAP FINANCIAL MEASURE

Three Months Ended December 31, 2008

(Unaudited; amounts in millions, except per share amounts)

Corning's net income and earnings per share (EPS) excluding special items for the fourth quarter of 2008 are non-GAAP financial measures within the meaning of Regulation G of the Securities and Exchange Commission. Non-GAAP financial measures are not in accordance with, or an alternative to, generally accepted accounting principles (GAAP). The company believes presenting non-GAAP net income and EPS is helpful to analyze financial performance without the impact of unusual items that may obscure trends in the company's underlying performance. A detailed reconciliation is provided below outlining the differences between these non-GAAP measures and the directly related GAAP measures.
