UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2014
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission File Number: 000-15637

SVB FINANCIAL GROUP

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

3003 Tasman Drive, Santa Clara, California

(Address of principal executive offices)

(408) 654-7400

(Registrant's telephone number, including area code)

91-1962278

(I.R.S. Employer
Identification No.)

95054-1191

(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T

(§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At October 31, 2014, 50,849,278 shares of the registrant's common stock (\$0.001 par value) were outstanding.

SVB FINANCIAL GROUP AND SUBSIDIARIES

NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation

SVB Financial Group is a diversified financial services company, as well as a bank holding company and financial holding company. SVB Financial was incorporated in the state of Delaware in March 1999. Through our various subsidiaries and divisions, we offer a variety of banking and financial products and services to support our clients of all sizes and stages throughout their life cycles. In these notes to our consolidated financial statements, when we refer to “SVB Financial Group,” “SVBFG”, the “Company,” “we,” “our,” “us” or use similar words, we mean SVB Financial Group and all of its subsidiaries collectively, including Silicon Valley Bank (the “Bank”), unless the context requires otherwise. When we refer to “SVB Financial” or the “Parent” we are referring only to the parent company, SVB Financial Group, unless the context requires otherwise.

The accompanying unaudited interim consolidated financial statements reflect all adjustments of a normal and recurring nature that are, in the opinion of management, necessary to fairly present our financial position, results of operations and cash flows in accordance with GAAP. Such unaudited interim consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the SEC. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. The results of operations for the three and nine months ended September 30, 2014 are not necessarily indicative of results to be expected for any future periods. These unaudited interim consolidated financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2013 (“2013 Form 10-K”).

During the second quarter of 2014, we re-designated certain securities from the classification of "available-for-sale" ("AFS") to "held-to-maturity" ("HTM"). Transfers of investment securities into the held-to-maturity category from the available-for-sale category are made at fair value at the date of transfer. The unrealized gains (losses), net of tax, are retained in other comprehensive income, and the carrying value of the held-to-maturity securities are amortized over the life of the securities in a manner consistent with the amortization of a premium or discount. Our decision to re-designate the securities was based on our ability and intent to hold these securities to maturity. Other than the re-designation of securities from AFS to HTM, the accompanying unaudited interim consolidated financial statements have been prepared on a consistent basis with the accounting policies described in Consolidated Financial Statements and Supplementary Data—Note 2—“Summary of Significant Accounting Policies” under Part II, Item 8 of our 2013 Form 10-K.

The preparation of unaudited interim consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates may change as new information is obtained. Significant items that are subject to such estimates include measurements of fair value, the valuation of non-marketable securities, the valuation of equity warrant assets, the adequacy of the allowance for loan losses and reserve for unfunded credit commitments, and the recognition and measurement of income tax assets and liabilities.

Principles of Consolidation and Presentation

Our consolidated financial statements include the accounts of SVB Financial Group and entities in which we have a controlling financial interest. We determine whether we have a controlling financial interest in an entity by evaluating whether the entity is a voting interest entity or a VIE and whether the applicable accounting guidance requires consolidation. All significant intercompany accounts and transactions have been eliminated.

Voting interest entities are entities that have sufficient equity and provide the equity investors voting rights that enable them to make significant decisions relating to the entity’s operations. For these types of entities, the Company’s determination of whether it has a controlling interest is based on ownership of the majority of the entities’ voting equity interest or through control of management of the entities.

VIEs are entities that, by design, either (1) lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) have equity investors that do not have the ability to

make significant decisions relating to the entity's operations through voting rights, or do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity. We determine whether we have a controlling financial interest in a VIE by considering whether our involvement with the VIE is significant and whether we are the primary beneficiary based on the following:

1. We have the power to direct the activities of the VIE that most significantly impact the entity's economic performance;

Table of Contents

2. The aggregate indirect and direct variable interests held by the Company have the obligation to absorb losses or the right to receive benefits from the entity that could be significant to the VIE; and,

3. Qualitative and quantitative factors regarding the nature, size, and form of our involvement with the VIE.

Voting interest entities in which we have a controlling financial interest or by which we control through management rights are consolidated into our financial statements.

We have not provided financial or other support during the periods presented to any VIE that we were not previously contractually required to provide. We are variable interest holders in certain partnerships for which we are not the primary beneficiary. We perform on-going reassessments on the status of the entities and whether facts or circumstances have changed in relation to previously evaluated voting interest entities and our involvement in VIEs which could cause our consolidation conclusion to change.

Impact of Adopting ASU No. 2013-08, Amendments to the Scope, Measurement and Disclosure Requirement for Investment Companies

In June 2013, the FASB issued an accounting standards update, which modified the guidance in ASC 946 for determining whether an entity is an investment company, as well as the measurement and disclosure requirements for investment companies. The ASU does not change current accounting where a noninvestment company parent retains the specialized accounting applied by an investment company subsidiary in consolidation. ASU 2013-08 was effective on a prospective basis for the interim and annual reporting periods beginning after December 15, 2013, and was therefore adopted in the first quarter of 2014. This standard did not have any impact on our financial position, results of operations or stockholders' equity.

Impact of Adopting ASU No. 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists

In July 2013, the FASB issued a new accounting standard which requires an unrecognized tax benefit to be presented as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss or a tax credit carryforward that the entity intends to use and is available for settlement at the reporting date. ASU 2013-11 was effective for, and adopted by the Company, in the first quarter of 2014. The adoption of ASU 2013-11 did not have a material impact on our financial position, results of operations or stockholders' equity.

Recently Issued Accounting Pronouncements

In January 2014, the FASB issued a new accounting standard (ASU 2014-01, Investments - Equity Method and Joint Ventures (Topic 323), Accounting for Investments in Qualified Affordable Housing Projects), which permits entities that invest in qualified affordable housing projects through limited liability entities that are flow-through entities for tax purposes to make an accounting policy election to use proportional amortization method or apply an equity or cost method. If the proportional amortization method is elected, retrospective presentation is required for prior periods.

The guidance is effective on a retrospective basis for the interim and annual reporting periods beginning after December 15, 2014, with early adoption available. We are currently assessing the impact of this guidance, however, we do not expect it to have a material impact on our financial position, results of operations or stockholders' equity.

In May 2014, the FASB issued a new accounting standard (ASU 2014-09, Revenue from Contracts with Customers (Topic 606)), which provides revenue recognition guidance that is intended to create greater consistency with respect to how and when revenue from contracts with customers is shown in the income statement. The guidance requires that revenue from contracts with customers be recognized upon delivery of a good or service based on the amount of consideration expected to be received, and requires additional disclosures about revenue. The guidance will be effective on a retrospective basis beginning on January 1, 2017. We do not expect the adoption of this guidance to have a material impact on our financial position, results of operations or stockholders' equity.

In August 2014, the FASB issued a new accounting standard (ASU 2014-15, Going Concern (Topic 205-40)), which requires management to evaluate for each annual and interim reporting period whether there is substantial doubt about an entity's ability to continue as a going concern. The guidance will be effective for annual and quarterly periods ending after December 15, 2016 with early adoption permitted. We are currently developing processes and controls to adopt this guidance by the adoption period and do not expect the adoption of this guidance to have a material impact on our financial position, results of operations or stockholders' equity.

Reclassifications

Certain prior period amounts have been reclassified to conform to current period presentations.

Table of Contents

2. Stockholders' Equity and EPS

Common Stock

In the second quarter of 2014, to support the continued growth of our balance sheet, we completed a registered public offering of 4,485,000 shares of our common stock at an offering price of \$101.00 per share. We received net proceeds of \$434.9 million after deducting underwriting discounts and commissions.

EPS

Basic EPS is the amount of earnings available to each share of common stock outstanding during the reporting period. Diluted EPS is the amount of earnings available to each share of common stock outstanding during the reporting period adjusted to include the effect of potentially dilutive common shares. Potentially dilutive common shares include incremental shares issued for stock options and restricted stock units outstanding under our equity incentive plans and our ESPP. Potentially dilutive common shares are excluded from the computation of dilutive EPS in periods in which the effect would be antidilutive. The following is a reconciliation of basic EPS to diluted EPS for the three and nine months ended September 30, 2014 and 2013:

(Dollars and shares in thousands, except per share amounts)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Numerator:				
Net income available to common stockholders	\$62,995	\$67,621	\$205,093	\$157,096
Denominator:				
Weighted average common shares outstanding-basic	50,752	45,580	48,281	45,180
Weighted average effect of dilutive securities:				
Stock options and ESPP	534	429	580	405
Restricted stock units	285	193	339	180
Denominator for diluted calculation	51,571	46,202	49,200	45,765
Earnings per common share:				
Basic	\$1.24	\$1.48	\$4.25	\$3.48
Diluted	\$1.22	\$1.46	\$4.17	\$3.43

The following table summarizes the weighted-average common shares excluded from the diluted EPS calculation as they were deemed to be antidilutive for the three and nine months ended September 30, 2014 and 2013:

(Shares in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Stock options	241	343	140	546
Restricted stock units	1	—	2	1
Total	242	343	142	547

Accumulated Other Comprehensive Income

The following table summarizes the items reclassified out of accumulated other comprehensive income into the Consolidated Statements of Income (unaudited) for the three and nine months ended September 30, 2014 and 2013:

(Dollars in thousands)	Income Statement Location	Three months ended September 30,		Nine months ended September 30,	
		2014	2013	2014	2013
Reclassification adjustment for losses (gains) included in net income	Gains on investment securities, net	\$990	\$(219)	\$17,411	\$(949)
Related tax (benefit) expense	Income tax expense	(400)	85	(7,030)	363
Total reclassification adjustment for losses (gains) included in net income, net		\$590	\$(134)	\$10,381	\$(586)

of tax

Table of Contents

3. Share-Based Compensation

For the three and nine months ended September 30, 2014 and 2013, we recorded share-based compensation and related tax benefits as follows:

	Three months ended September 30,		Nine months ended September 30,	
(Dollars in thousands)	2014	2013	2014	2013
Share-based compensation expense	\$7,520	\$6,723	\$22,285	\$18,945
Income tax benefit related to share-based compensation expense	(2,676)	(2,243)	(7,351)	(5,801)
Unrecognized Compensation Expense				

As of September 30, 2014, unrecognized share-based compensation expense was as follows:

(Dollars in thousands)	Unrecognized Expense	Average Expected Recognition Period - in Years
Stock options	\$16,282	2.64
Restricted stock units	35,324	2.56
Total unrecognized share-based compensation expense	\$51,606	

Share-Based Payment Award Activity

The table below provides stock option information related to the 2006 Equity Incentive Plan for the nine months ended September 30, 2014:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life in Years	Aggregate Intrinsic Value of In-The-Money Options
Outstanding at December 31, 2013	1,514,159	\$55.27		
Granted	239,383	108.27		
Exercised	(283,498)	47.56		
Forfeited	(21,975)	71.17		
Outstanding at September 30, 2014	1,448,069	65.30	4.25	\$ 67,825,947
Vested and expected to vest at September 30, 2014	1,397,466	64.55	4.20	66,495,669
Exercisable at September 30, 2014	727,829	50.48	3.08	44,843,070

The aggregate intrinsic value of outstanding options shown in the table above represents the pretax intrinsic value based on our closing stock price of \$112.09 as of September 30, 2014. The total intrinsic value of options exercised during the three and nine months ended September 30, 2014 was \$7.7 million and \$18.4 million, respectively, compared to \$6.5 million and \$18.4 million for the comparable 2013 period.

The table below provides information for restricted stock units under the 2006 Equity Incentive Plan for the nine months ended September 30, 2014:

	Shares	Weighted Average Grant Date Fair Value
Nonvested at December 31, 2013	682,347	\$65.93
Granted	197,687	107.85
Vested	(200,856)	64.05
Forfeited	(25,268)	73.02
Nonvested at September 30, 2014	653,910	78.91

4. Cash and Cash Equivalents

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

The following table details our cash and cash equivalents at September 30, 2014 and December 31, 2013:

(Dollars in thousands)	September 30, 2014	December 31, 2013
Cash and due from banks (1)	\$ 1,815,581	\$ 1,349,688
Securities purchased under agreements to resell (2)	50,834	172,989
Other short-term investment securities	6,122	16,102
Total cash and cash equivalents	\$ 1,872,537	\$ 1,538,779

At September 30, 2014 and December 31, 2013, \$883 million and \$715 million, respectively, of our cash and due (1) from banks was deposited at the Federal Reserve Bank and was earning interest at the Federal Funds target rate, and interest-earning deposits in other financial institutions were \$442 million and \$300 million, respectively.

At September 30, 2014 and December 31, 2013, securities purchased under agreements to resell were collateralized (2) by U.S. Treasury securities and U.S. agency securities with aggregate fair values of \$52 million and \$176 million, respectively. None of these securities received as collateral were sold or repledged as of September 30, 2014 or December 31, 2013.

5. Investment Securities

Our investment securities portfolio consists of an available-for-sale securities portfolio and a held-to-maturity securities portfolio, both of which represent interest-earning investment securities, and a non-marketable and other securities portfolio, which primarily represents investments managed as part of our funds management business.

Available-for-Sale Securities

The major components of our available-for-sale investment securities portfolio at September 30, 2014 and December 31, 2013 are as follows:

(Dollars in thousands)	September 30, 2014			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Carrying Value
Available-for-sale securities, at fair value:				
U.S. treasury securities	\$ 6,886,952	\$ 2,245	\$ (12,898)	\$ 6,876,299
U.S. agency debentures	3,592,129	28,744	(15,040)	3,605,833
Residential mortgage-backed securities:				
Agency-issued collateralized mortgage obligations—fixed rate	2,003,337	20,671	(18,075)	2,005,933
Agency-issued collateralized mortgage obligations—variable rate	830,139	5,818	—	835,957
Equity securities	9,502	749	(837)	9,414
Total available-for-sale securities	\$ 13,322,059	\$ 58,227	\$ (46,850)	\$ 13,333,436

(Dollars in thousands)	December 31, 2013			
	Amortized Cost	Unrealized Gains	Unrealized Losses	Carrying Value
Available-for-sale securities, at fair value:				
U.S. agency debentures	\$ 4,344,652	\$ 41,365	\$ (40,785)	\$ 4,345,232
Residential mortgage-backed securities:				
Agency-issued mortgage-backed securities	2,472,528	17,189	(16,141)	2,473,576
Agency-issued collateralized mortgage obligations—fixed rate	3,386,670	24,510	(85,422)	3,325,758
Agency-issued collateralized mortgage obligations—variable rate	1,183,333	3,363	(123)	1,186,573

Table of Contents

The following table summarizes our unrealized losses on our available-for-sale securities portfolio into categories of less than 12 months and 12 months or longer as of September 30, 2014:

(Dollars in thousands)	September 30, 2014					
	Less than 12 months		12 months or longer		Total	
	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses
Available-for-sale securities:						
U.S. treasury securities	\$4,736,436	\$(12,898)	\$—	\$—	\$4,736,436	\$(12,898)
U.S. agency debentures	688,808	(2,373)	553,231	(12,667)	1,242,039	(15,040)
Residential mortgage-backed securities:						
Agency-issued collateralized mortgage obligations—fixed rate	659,886	(2,523)	469,850	(15,552)	1,129,736	(18,075)
Equity securities	5,546	(837)	—	—	5,546	(837)
Total temporarily impaired securities: (1)	\$6,090,676	\$(18,631)	\$1,023,081	\$(28,219)	\$7,113,757	\$(46,850)

As of September 30, 2014, we identified a total of 182 investments that were in unrealized loss positions, of which 34 investments totaling \$1.0 billion with unrealized losses of \$28.2 million have been in an impaired position for a period of time greater than 12 months. As of September 30, 2014, we do not intend to sell any impaired fixed income investment securities prior to recovery of our adjusted cost basis, and it is more likely than not that we will (1) not be required to sell any of our securities prior to recovery of our adjusted cost basis. Based on our analysis as of September 30, 2014, we deem all impairments to be temporary, and therefore changes in value for our temporarily impaired securities as of the same date are included in other comprehensive income. Market valuations and impairment analyses on assets in the available-for-sale securities portfolio are reviewed and monitored on a quarterly basis.

The following table summarizes our unrealized losses on our available-for-sale securities portfolio into categories of less than 12 months and 12 months or longer as of December 31, 2013:

(Dollars in thousands)	December 31, 2013					
	Less than 12 months		12 months or longer		Total	
	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses	Fair Value of Investments	Unrealized Losses

Municipal bonds and notes	3,404	(21)	—	—	3,404	(21)
Equity securities	910	(483)	—	—	910	(483)
Total temporarily impaired securities	\$5,978,236	\$(152,383)	\$154,250	\$(8,015)	\$6,132,486	\$(160,398)

Table of Contents

The following table summarizes the remaining contractual principal maturities and fully taxable equivalent yields on fixed income investment securities classified as available-for-sale as of September 30, 2014. The weighted average yield is computed using the amortized cost of fixed income investment securities, which are reported at fair value. For U.S. Treasury securities, the expected maturity is the actual contractual maturity of the notes. Expected remaining maturities for certain U.S. agency debentures may occur earlier than their contractual maturities because the note issuers have the right to call outstanding amounts ahead of their contractual maturity. Expected maturities for mortgage-backed securities may differ significantly from their contractual maturities because mortgage borrowers have the right to prepay outstanding loan obligations with or without penalties. Mortgage-backed securities classified as available-for-sale typically have original contractual maturities from 10 to 30 years whereas expected average lives of these securities tend to be significantly shorter and vary based upon structure and prepayments in lower rate environments.

	September 30, 2014									
	Total		One Year or Less		After One Year to Five Years		After Five Years to Ten Years		After Ten Years	
(Dollars in thousands)	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield	Carrying Value	Weighted Average Yield

Total	\$13,324,022	1.35	\$795,388	1.45	\$8,267,147	1.13	\$1,903,070	2.14	\$2,358,417	1.43

Held-to-Maturity Securities

During the second quarter of 2014, we re-designated certain securities from the classification of “available-for-sale” to “held-to-maturity.” The securities re-designated primarily consisted of agency-issued mortgage securities and collateralized mortgage obligations (“CMOs”) with a total carrying value of \$5.4 billion at June 1, 2014. At the time of re-designation the securities had net unrealized gains totaling \$22.5 million, net of tax, recorded in other comprehensive income and are being amortized over the life of the securities in a manner consistent with the amortization of a premium or discount. Our decision to re-designate the securities was based on our ability and intent to hold these securities to maturity. Factors used in assessing the ability to hold these securities to maturity were future liquidity needs and sources of funding. Held-to-maturity securities are carried on the balance sheet at amortized cost and the changes in the value of these securities, other than impairment charges, are not reported on the financial statements.

The major components of our held-to-maturity investment securities portfolio at September 30, 2014 are as follows:

(Dollars in thousands)	September 30, 2014			Fair Value
	Amortized Cost	Unrealized Gains	Unrealized Losses	
Held-to-maturity securities, at cost:				
U.S. agency debentures (1)	\$349,993	\$1,588	\$(1,165)	\$350,416
Residential mortgage-backed securities:				
Agency-issued mortgage-backed securities	2,919,715	16	(20,712)	2,899,019
Agency-issued collateralized mortgage obligations—fixed rate	2,489,538	384	(24,052)	2,465,870
Agency-issued collateralized mortgage obligations—variable rate	139,182	7	(14)	139,175
Agency-issued commercial mortgage-backed securities	679,379	350	(4,391)	675,338
Municipal bonds and notes	84,218	81	(224)	84,075
Total held-to-maturity securities	\$6,662,025	\$2,426	\$(50,558)	\$6,613,893

(1) Consists of pools of Small Business Investment Company debentures issued and guaranteed by the U.S. Small Business Administration, an independent agency of the United States.

The following table summarizes our unrealized losses on our held-to-maturity securities portfolio into categories of less than 12 months and 12 months or longer as of September 30, 2014:

(Dollars in thousands)	September 30, 2014					
	Less than 12 months		12 months or longer		Total	
	Fair Value of Unrealized Investments	Losses	Fair Value of Unrealized Investments	Losses	Fair Value of Unrealized Investments	Losses
Held-to-maturity securities:						
U.S. agency debentures	\$205,383	\$(837)	\$47,987	\$(328)	\$253,370	\$(1,165)
Residential mortgage-backed securities:						
Agency-issued mortgage-backed securities	2,890,039	(20,712)	—	—	2,890,039	(20,712)
Agency-issued collateralized mortgage obligations—fixed rate	1,316,900	(12,438)	806,042	(11,614)	2,122,942	(24,052)
Agency-issued collateralized mortgage obligations—variable rate	77,567	(14)	—	—	77,567	(14)

Municipal bonds and notes	55,365	(224)	—	—	55,365	(224)
Total temporarily impaired securities (2):	\$5,123,941	\$(38,616)	\$854,029	\$(11,942)	\$5,977,970	\$(50,558)

(1) Represents securities in an unrealized loss position for twelve months or longer in which the amortized cost basis was re-set for those securities re-designated from AFS to HTM effective June 1, 2014.

Table of Contents

(2) As of September 30, 2014, we identified a total of 329 investments that were in unrealized loss positions, of which 28 investments totaling \$854.0 million with unrealized losses of \$11.9 million have been in an impaired position for a period of time greater than 12 months. As of September 30, 2014, we do not intend to sell any impaired fixed income investment securities prior to recovery of our adjusted cost basis, and it is more likely than not that we will not be required to sell any of our securities prior to recovery of our adjusted cost basis, which is consistent with our classification of these securities. Based on our analysis as of September 30, 2014, we deem all impairments to be temporary. Market valuations and impairment analyses on assets in the held-to-maturity securities portfolio are reviewed and monitored on a quarterly basis.

Table of Contents

The following table summarizes the remaining contractual principal maturities and fully taxable equivalent yields on fixed income investment securities classified as held-to-maturity as of September 30, 2014. Interest income on certain municipal bonds and notes (non-taxable investments) are presented on a fully taxable equivalent basis using the federal statutory tax rate of 35%. The weighted average yield is computed using the amortized cost of fixed income investment securities, which are reported at fair value. Expected remaining maturities for certain U.S. agency debentures may occur earlier than their contractual maturities because the note issuers have the right to call outstanding amounts ahead of their contractual maturity. Expected maturities for mortgage-backed securities may differ significantly from their contractual maturities because mortgage borrowers have the right to prepay outstanding loan obligations with or without penalties. Mortgage-backed securities classified as held-to-maturity typically have original contractual maturities from 10 to 30 years whereas expected average lives of these securities tend to be significantly shorter and vary based upon structure and prepayments in lower rate environments.

SVB Capital Partners II, LP (i)	302	5.1	708	5.1
Other private equity fund (ii)	7,640	58.2	3,695	58.2
Total venture capital and private equity fund investments	\$1,078,911		\$862,972	

(i) At September 30, 2014, we had a direct ownership interest of 1.3 percent and an indirect ownership interest of 3.8 percent in the fund through our ownership interest of SVB Strategic Investors Fund II, LP.

(ii) At September 30, 2014, we had a direct ownership interest of 41.5 percent and indirect ownership interests of 12.6 percent and 4.1 percent in the fund through our ownership interest of SVB Capital—NT Growth Partners, LP and SVB Capital Preferred Return Fund, LP, respectively.

The following table shows the amounts of other venture capital investments held by the following consolidated (2) funds and our ownership percentage of each fund at September 30, 2014 and December 31, 2013 (fair value accounting):

Table of Contents

(Dollars in thousands)	September 30, 2014		December 31, 2013	
	Amount	Ownership %	Amount	Ownership %
Silicon Valley BancVentures, LP	\$5,616	10.7 %	\$6,564	10.7 %
SVB Capital Partners II, LP (i)	17,802	5.1	22,684	5.1
Capital Partners III, LP	15,000	0.4	—	—
SVB Capital Shanghai Yangpu Venture Capital Fund	5,445	6.8	3,591	6.8
Total other venture capital investments	\$43,863		\$32,839	

- (i) At September 30, 2014, we had a direct ownership interest of 1.3 percent and an indirect ownership interest of 3.8 percent in the fund through our ownership of SVB Strategic Investors Fund II, LP.

Investments classified as other securities (fair value accounting) represent direct equity investments in public companies held by our consolidated funds. At September 30, 2014, the amount primarily includes total unrealized gains of \$143.8 million in one public company, FireEye, Inc. ("FireEye"). The extent to which any unrealized gains (3) (or losses) will become realized is subject to a variety of factors, including among other things, changes in prevailing market prices and the timing of any sales or distribution of securities, which are subject to our funds' separate discretionary securities sales/distribution and governance processes and may also be constrained by lock-up agreements. None of the FireEye related investments currently are subject to a lock-up agreement.

- (4) The following table shows the carrying value and our ownership percentage of each investment at September 30, 2014 and December 31, 2013 (equity method accounting):

(Dollars in thousands)	September 30, 2014		December 31, 2013	
	Amount	Ownership %	Amount	Ownership %
Gold Hill Capital 2008, LP (i)	\$20,685	15.5 %	\$21,867	15.5 %
China Joint Venture investment	79,457	50.0	79,940	50.0
Other investments	41,771	Various	41,076	Various
Total other investments (equity method accounting)	\$141,913		\$142,883	

- (i) At September 30, 2014, we had a direct ownership interest of 11.5 percent in the fund and an indirect interest in the fund through our investment in Gold Hill Capital 2008, LLC of 4.0 percent.

Represents investments in 281 and 288 funds (primarily venture capital funds) at September 30, 2014 and December 31, 2013, respectively, where our ownership interest is typically less than 5% of the voting interests of each such fund and in which we do not have the ability to exercise significant influence over the partnerships (5) operating activities and financial policies. The carrying value, and estimated fair value, of these venture capital and private equity fund investments (cost method accounting) was \$143 million, and \$240 million, respectively, as of September 30, 2014. The carrying value, and estimated fair value, of these venture capital and private equity fund investments (cost method accounting) was \$149 million and \$215 million, respectively, as of December 31, 2013.

Table of Contents

The following table presents the components of gains and losses (realized and unrealized) on investment securities for the three and nine months ended September 30, 2014 and 2013:

(Dollars in thousands)	Three months ended		Nine months ended	
	September 30, 2014	2013	September 30, 2014	2013
Gross gains on investment securities:				
Available-for-sale securities, at fair value (1)	\$45	\$317	\$642	\$3,167

Non-marketable securities (cost method accounting):				
Venture capital and private equity fund investments (3)	(272) (689) (781) (1,462
Other investments	—	(3,952) (260) (4,300
Total gross losses on investment securities	(80,567) (8,920) (265,880) (32,271
Gains on investment securities, net	\$5,644	\$187,862	\$172,236	\$255,861

(1) Includes realized gains (losses) on sales of available-for-sale equity securities that are recognized in the income statement. Unrealized gains (losses) on available-for-sale fixed income and equity securities are recognized in other comprehensive income. The cost basis of available-for-sale securities sold is determined on a specific identification basis.

(2) Other securities (fair value accounting) includes net losses of \$49.8 million for the three months ended September 30, 2014, and net losses of \$21.7 million (including \$66.5 million of realized gains) for the nine months ended September 30, 2014, attributable to one public company, FireEye. The extent to which any unrealized gains (or losses) will become realized is subject to a variety of factors, including among other things, changes in prevailing market prices and the timing of any sales or distribution of securities, which are subject to our securities sales and governance processes and may also be constrained by lock-up agreements. None of the FireEye related investments currently are subject to a lock-up agreement.

(3) For the three months ended September 30, 2014 and 2013, includes OTTI losses of \$0.3 million from the declines in value for 5 of the 281 investments and \$0.4 million from the declines in value for 12 of the 293 investments, respectively. For the nine months ended September 30, 2014 and 2013, includes OTTI losses of \$0.7 million from the declines in value for 22 of the 281 investments and \$1.2 million from the declines in value for 37 of the 293 investments, respectively. We concluded that any declines in value for the remaining investments were temporary, and as such, no OTTI was required to be recognized.

Table of Contents

6. Loans and Allowance for Loan Losses

We serve a variety of commercial clients in the technology, life science, venture capital/private equity and premium wine industries. Our technology clients generally tend to be in the industries of hardware (semiconductors, communications and electronics), software and related services, and energy and resource innovation ("ERI"). Because of the diverse nature of ERI products and services, for our loan-related reporting purposes, ERI-related loans are reported under our hardware, software, life science and other commercial loan categories, as applicable. Our life science clients are concentrated in the medical devices and biotechnology sectors. Loans made to venture capital/private equity firm clients typically enable them to fund investments prior to their receipt of funds from capital calls. Loans to the premium wine industry focus on vineyards and wineries that produce grapes and wines of high quality.

In addition to commercial loans, we make consumer loans through SVB Private Bank and provide real estate secured loans to eligible employees through our EHOP. Our private banking clients are primarily venture capital/private equity professionals and executive leaders in the innovation companies they support. These products and services include real estate secured home equity lines of credit, which may be used to finance real estate investments and loans used to purchase, renovate or refinance personal residences. These products and services also include restricted stock purchase loans and capital call lines of credit.

We also provide community development loans made as part of our responsibilities under the Community Reinvestment Act. These loans are included within "Construction loans" below and are primarily secured by real estate. The composition of loans, net of unearned income of \$95 million and \$89 million at September 30, 2014 and December 31, 2013, respectively, is presented in the following table:

(Dollars in thousands)	September 30, 2014	December 31, 2013
Commercial loans:		
Software	\$4,503,369	\$4,102,636
Hardware	1,072,102	1,213,032
Venture capital/private equity	2,921,184	2,386,054
Life science	1,245,527	1,170,220
Premium wine	186,675	149,841
Other	241,815	288,904
Total commercial loans	10,170,672	9,310,687
Real estate secured loans:		
Premium wine (1)	562,893	514,993
Consumer loans (2)	1,047,935	873,255
Other	30,152	30,743
Total real estate secured loans	1,640,980	1,418,991
Construction loans	80,102	76,997
Consumer loans	125,427	99,711
Total loans, net of unearned income (3)	\$12,017,181	\$10,906,386

(1) Included in our premium wine portfolio are gross construction loans of \$111 million and \$112 million at September 30, 2014 and December 31, 2013, respectively.

(2) Consumer loans secured by real estate at September 30, 2014 and December 31, 2013 were comprised of the following:

(Dollars in thousands)	September 30, 2014	December 31, 2013
Loans for personal residence	\$860,024	\$685,327
Loans to eligible employees	129,979	121,548
Home equity lines of credit	57,932	66,380

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Consumer loans secured by real estate	\$1,047,935	\$873,255
---------------------------------------	-------------	-----------

(3) Included within our total loan portfolio are credit card loans of \$122 million and \$85 million at September 30, 2014 and December 31, 2013, respectively.

Credit Quality Indicators

For each individual client, we establish an internal credit risk rating for that loan, which is used for assessing and monitoring credit risk as well as performance of the loan and the overall portfolio. Our internal credit risk ratings are also used to summarize the risk of loss due to failure by an individual borrower to repay the loan. For our internal credit risk ratings, each individual loan is given a risk rating of 1 through 10. Loans risk-rated 1 through 4 are performing loans and translate to an internal rating of “Pass”, with loans risk-rated 1 being cash secured. Loans risk-rated 5 through 7 are performing loans, however, we consider them as demonstrating higher risk which requires more frequent review of the individual exposures; these translate to an internal rating of “Performing (Criticized)”. A majority of our Performing (Criticized) loans are from our SVB Accelerator practice, serving our emerging or early stage clients. Loans risk-rated 8 and 9 are loans that are considered to be impaired and are on nonaccrual status. Loans are placed on nonaccrual status when they become 90 days past due as to principal or interest payments (unless the principal and interest are well secured and in the process of collection), or when we have determined, based upon most recent available information, that the timely collection of principal or interest is not probable; these loans are deemed “impaired” (For further description of nonaccrual loans, refer to Note 2—“Summary of Significant Accounting Policies” under Part II, Item 8 of our 2013 Form 10-K). Loans rated 10 are charged-off and are not included as part of our loan portfolio balance. We review our credit quality indicators for performance and appropriateness of risk ratings as part of our evaluation process for our allowance for loan losses.

Table of Contents

The following table summarizes the credit quality indicators, broken out by portfolio segment and class of financing receivables as of September 30, 2014 and December 31, 2013:

(Dollars in thousands)	Pass	Performing (Criticized)	Impaired	Total

Table of Contents

TDRs

As of September 30, 2014 we had 10 TDRs with a total carrying value of \$10.3 million where concessions have been granted to borrowers experiencing financial difficulties, in an attempt to maximize collection. There were unfunded commitments available for funding of \$0.8 million to the clients associated with these TDRs as of September 30, 2014. The following table summarizes our loans modified in TDRs, broken out by portfolio segment and class of financing receivables at September 30, 2014 and December 31, 2013:

(Dollars in thousands)	September 30, 2014	December 31, 2013
Loans modified in TDRs:		
Commercial loans:		
Software	\$7,848	\$5,860

Consumer loans:		
Other consumer loans	224	670
Total consumer loans	224	670
Total	\$10,300	\$22,433

The following table summarizes the recorded investment in loans modified in TDRs, broken out by portfolio segment and class of financing receivable, for modifications made during the three and nine months ended September 30, 2014 and 2013:

(Dollars in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Loans modified in TDRs during the period:				
Commercial loans:				
Software	\$496	\$1,007	\$7,848	\$1,007
Hardware	—	6,330	—	7,783
Venture capital/ private equity	—	—	—	88
Premium wine	—	—	614	—
Other	—	—	—	734
Total commercial loans	496	7,337	8,462	9,612
Consumer loans:				
Other consumer loans	—	—	—	41
Total consumer loans	—	—	—	41
Total loans modified in TDRs during the period (1)	\$496	\$7,337	\$8,462	\$9,653

(1) There were no partial charge-offs on loans classified as TDRs for the three and nine months ended September 30, 2014. There were partial charge-offs of \$1.2 million and \$2.4 million on loans classified as TDRs for the three and nine months ended September 30, 2013, respectively.

During the three months ended September 30, 2014, new TDRs of \$0.5 million were modified through payment deferrals granted to our clients. During the nine months ended September 30, 2014, new TDRs of \$7.1 million were modified through payment deferrals granted to our clients and \$1.3 million were modified through partial forgiveness of principal.

During the three and nine months ended September 30, 2013, new TDRs of \$7.3 million and \$9.7 million, respectively, were modified through payment deferrals granted to our clients and no principal or interest was forgiven. The related allowance for loan losses for the majority of our TDRs is determined on an individual basis by comparing the carrying value of the loan to the present value of the estimated future cash flows, discounted at the pre-modification contractual

Table of Contents

interest rate. For certain TDRs, the related allowance for loan losses is determined based on the fair value of the collateral if the loan is collateral dependent.

There were no loans modified in TDRs within the previous 12 months that subsequently defaulted during the three and nine months ended September 30, 2014 and 2013.

Charge-offs and defaults on previously restructured loans are evaluated to determine the impact to the allowance for loan losses, if any. The evaluation of these defaults may impact the assumptions used in calculating the reserve on other TDRs and impaired loans as well as management's overall outlook of macroeconomic factors that affect the reserve on the loan portfolio as a whole. After evaluating the charge-offs and defaults experienced on our TDRs we determined that no change to our reserving methodology was necessary to determine the allowance for loan losses as of September 30, 2014.

7. Short-Term Borrowings and Long-Term Debt

The following table represents outstanding short-term borrowings and long-term debt at September 30, 2014 and December 31, 2013:

(Dollars in thousands)	Maturity	Principal value at September 30, 2014	Carrying Value	
			September 30, 2014	December 31, 2013
Short-term borrowings:				
Other short-term borrowings	(1)	\$6,630	\$6,630	\$5,080
Total short-term borrowings			\$6,630	\$5,080
Long-term debt:				
5.375% Senior Notes	September 15, 2020	\$350,000	\$348,378	\$348,209
6.05% Subordinated Notes (2)	June 1, 2017	45,964	50,497	51,987
7.0% Junior Subordinated Debentures	October 15, 2033	50,000	54,889	55,020
Total long-term debt			\$453,764	\$455,216

(1) Represents cash collateral received from certain counterparties in relation to market value exposures of derivative contracts in our favor, primarily for our interest rate swap agreement related to our 6.05% Subordinated Notes.

At September 30, 2014 and December 31, 2013, included in the carrying value of our 6.05% Subordinated Notes (2) was an interest rate swap valued at \$5.0 million and \$6.5 million, respectively, related to hedge accounting associated with the notes.

Interest expense related to long-term debt was \$5.8 million and \$17.4 million for the three and nine months ended September 30, 2014, and \$5.7 million and \$17.4 million for the three and nine months ended September 30, 2013. Interest expense is net of the hedge accounting impact from our interest rate swap agreement related to our 6.05% Subordinated Notes. The weighted average interest rate associated with our short-term borrowings as of September 30, 2014 was 0.07 percent.

Available Lines of Credit

We have certain facilities in place to enable us to access short-term borrowings on a secured (using high-quality fixed income securities as collateral) and an unsecured basis. These include repurchase agreements and uncommitted federal funds lines with various financial institutions. As of September 30, 2014, we did not borrow against our uncommitted federal funds lines. We also pledge securities to the FHLB of San Francisco and the discount window at the Federal Reserve Bank. The market value of collateral pledged to the FHLB of San Francisco (comprised primarily of U.S. agency debentures and mortgage securities) at September 30, 2014 totaled \$1.2 billion, all of which was unused and available to support additional borrowings. The market value of collateral pledged at the discount window of the Federal Reserve Bank at September 30, 2014 totaled \$517 million, all of which was unused and available to support additional borrowings.

8. Derivative Financial Instruments

We primarily use derivative financial instruments to manage interest rate risk, currency exchange rate risk, and to assist customers with their risk management objectives. Also, in connection with negotiating credit facilities and certain other services, we often obtain equity warrant assets giving us the right to acquire stock in private, venture-backed companies in the technology and life science industries.

Table of Contents

Interest Rate Risk

Interest rate risk is our primary market risk and can result from timing and volume differences in the repricing of our interest rate-sensitive assets and liabilities and changes in market interest rates. To manage interest rate risk for our 6.05% Subordinated Notes, we entered into a fixed-for-floating interest rate swap agreement at the time of debt issuance based upon LIBOR with matched-terms. Net cash benefits associated with our interest rate swap is recorded as a reduction in “Interest expense—Borrowings,” a component of net interest income. The fair value of our interest rate swap is calculated using a discounted cash flow method and adjusted for credit valuation associated with counterparty risk. Changes in the fair value of the interest rate swap are reflected in either other assets (if in an asset position) or other liabilities (if in a liability position).

We assess hedge effectiveness under ASC 815, Derivatives and Hedging, using the long-haul method. Any differences associated with our interest rate swap that arise as a result of hedge ineffectiveness is recorded through net gains on derivative instruments, in noninterest income, a component of consolidated net income.

Currency Exchange Risk

We enter into foreign exchange forward contracts to economically reduce our foreign exchange exposure risk associated with the net difference between foreign currency denominated assets and liabilities, primarily in Pound Sterling and Euro. We do not designate any foreign exchange forward contracts as derivative instruments that qualify for hedge accounting. Changes in currency rates on foreign currency denominated instruments are included in other noninterest income, a component of noninterest income. We may experience ineffectiveness in the economic hedging relationship, because the instruments are revalued based upon changes in the currency’s spot rate on the principal value, while the forwards are revalued on a discounted cash flow basis. We record forward agreements in gain positions in other assets and loss positions in other liabilities, while net changes in fair value are recorded through net gains on derivative instruments, in noninterest income, a component of consolidated net income. Additionally, through our global banking operations we maintain customer deposits denominated in the Euro and Pound Sterling which are used to fund certain loans in these currencies to limit our exposure to currency fluctuations.

Other Derivative Instruments

Equity Warrant Assets

Our equity warrant assets are concentrated in private, venture-backed companies in the technology and life science industries. Most of these warrant agreements contain net share settlement provisions, which permit us to pay the warrant exercise price using shares issuable under the warrant (“cashless exercise”). We value our equity warrant assets using a modified Black-Scholes option pricing model, which incorporates assumptions about the underlying asset value, volatility, and the risk-free rate. We make valuation adjustments for estimated remaining life and marketability for warrants issued by private companies. Equity warrant assets are recorded at fair value in other assets, while changes in their fair value are recorded through net gains on derivative instruments, in noninterest income, a component of consolidated net income.

Loan Conversion Options

In connection with negotiating certain credit facilities, we occasionally extend loan facilities which have convertible option features. The convertible loans may be converted into a certain number of shares determined by dividing the principal amount of the loan by the applicable conversion price. Because our loan conversion options have underlying and notional values and had no initial net investment, these assets qualify as derivative instruments. We value our loan conversion options using a modified Black-Scholes option pricing model, which incorporates assumptions about the underlying asset value, volatility, and the risk-free rate. Loan conversion options are recorded at fair value in other assets, while changes in their fair value are recorded through net gains on derivative instruments, in noninterest income, a component of consolidated net income.

Other Derivatives

We sell forward and option contracts to clients who wish to mitigate their foreign currency exposure. We economically reduce the currency risk from this business by entering into opposite way contracts with correspondent banks. These relationships do not qualify for hedge accounting. The contracts generally have terms of one year or less, although we may have contracts extending for up to five years. Generally, we have not experienced nonperformance on these contracts, have not incurred credit losses, and anticipate performance by all counterparties to such

agreements. Contracts in an asset position are included in other assets and contracts in a liability position are included in other liabilities. The net change in the fair value of these contracts is recorded through net gains on derivative instruments, in noninterest income, a component of consolidated net income.

We sell interest rate contracts to clients who wish to mitigate their interest rate exposure. We economically reduce the interest rate risk from this business by entering into opposite way contracts with correspondent banks. We do not designate any of these contracts (which are derivative instruments) as qualifying for hedge accounting. Contracts in an asset position are included in other assets and contracts in a liability position are included in other liabilities. The net change in the fair value of

Table of Contents

these derivatives is recorded through net gains on derivative instruments, in noninterest income, a component of consolidated net income.

Counterparty Credit Risk

We are exposed to credit risk if counterparties to our derivative contracts do not perform as expected. We mitigate counterparty credit risk through credit approvals, limits, monitoring procedures and obtaining collateral, as appropriate. With respect to measuring counterparty credit risk for derivative instruments, we measure the fair value of a group of financial assets and financial liabilities on a net risk basis by counterparty portfolio.

The total notional or contractual amounts, fair value, collateral and net exposure of our derivative financial instruments at September 30, 2014 and December 31, 2013 were as follows:

(Dollars in thousands)	Balance Sheet Location	September 30, 2014				December 31, 2013

-----	------------	----------	-----------	------------	----------	------------

(1) Cash collateral received from our counterparties in relation to market value exposures of derivative contracts in our favor is recorded as a component of “short-term borrowings” on our consolidated balance sheets.

Net exposure for contracts in a gain position reflects the replacement cost in the event of nonperformance by all such counterparties. The credit ratings of our institutional counterparties as of September 30, 2014 remain at investment grade or higher and there were no material changes in their credit ratings during the three and nine months ended September 30, 2014.

31

Table of Contents

A summary of our derivative activity and the related impact on our consolidated statements of income for the three and nine months ended September 30, 2014 and 2013 is as follows:

(Dollars in thousands)	Statement of income location	Three months ended		Nine months ended	
		September 30, 2014	2013	September 30, 2014	2013
Derivatives designated as hedging instruments:

Net (losses) associated with currency risk		\$(111)	\$(322)	\$(309)	\$(1,060)
Other derivative instruments:					
Net gains on equity warrant assets	Net gains on derivative instruments	\$ 13,157	\$ 18,780	\$ 50,859	\$ 29,475
Gains (losses) on client foreign exchange forward contracts, net	Net gains on derivative instruments	\$ 886	\$(411)	\$ 1,358	\$(237)
Net (losses) gains on other derivatives (1)	Net gains on derivative instruments	\$(22)	\$(517)	\$(738)	\$ 55

(1) Primarily represents the change in fair value of loan conversion options.

Balance Sheet Offsetting

Certain of our derivative and other financial instruments are subject to enforceable master netting arrangements with our counterparties. These agreements provide for the net settlement of multiple contracts with a single counterparty through a single payment, in a single currency, in the event of default on or termination of any one contract. The following table summarizes our assets subject to enforceable master netting arrangements as of September 30, 2014 and December 31, 2013:

Table of Contents

Dues and publications	719	399	1,852	1,302
Other	4,711	2,661	9,381	6,855
Total other noninterest expense	\$15,796	\$10,649	\$40,113	\$30,273

10. Segment Reporting

We have three reportable segments for management reporting purposes: Global Commercial Bank, SVB Private Bank and SVB Capital. The results of our operating segments are based on our internal management reporting process. Our operating segments' primary source of revenue is from net interest income, which is primarily the difference between interest earned on loans, net of funds transfer pricing ("FTP"), and interest paid on deposits, net of FTP. Accordingly, our segments are reported using net interest income, net of FTP. FTP is an internal measurement framework designed to assess the financial impact of a financial institution's sources and uses of funds. It is the mechanism by which an earnings credit is given for deposits raised, and an earnings charge is made for funded loans. FTP is calculated at an instrument level based on account characteristics.

We also evaluate performance based on provision for loan losses, noninterest income and noninterest expense, which are presented as components of segment operating profit or loss. In calculating each operating segment's noninterest expense, we consider the direct costs incurred by the operating segment as well as certain allocated direct costs. As part of this review, we allocate certain corporate overhead costs to a corporate account. We do not allocate income taxes to our segments. Additionally, our management reporting model is predicated on average asset balances; therefore, period-end asset balances are not presented for segment reporting purposes. Changes in an individual client's primary relationship designation have resulted, and in the future may result, in the inclusion of certain clients in different segments in different periods.

Unlike financial reporting, which benefits from the comprehensive structure provided by GAAP, our internal management reporting process is highly subjective, as there is no comprehensive, authoritative guidance for management reporting. Our management reporting process measures the performance of our operating segments based on our internal operating structure, which is subject to change from time to time, and is not necessarily comparable with similar information for other financial services companies.

Table of Contents

For reporting purposes, SVB Financial Group has three operating segments for which we report our financial information:

Global Commercial Bank is comprised of results from the following:

Our Commercial Bank products and services are provided by the Bank to commercial clients in the technology, life science and clean technology (energy and resource innovation) industries. The Bank provides solutions to the financial needs of commercial clients, through credit, global treasury management, foreign exchange, global trade finance, and other services. It serves clients within the United States, as well as non-U.S. clients in key international entrepreneurial markets. In addition, the Bank and its subsidiaries offer a variety of investment services and solutions, including investment advisory and broker-dealer services.

Our Private Equity Division provides banking products and services primarily to our venture capital and private equity clients.

Our Wine practice provides banking products and services to our premium wine industry clients. This practice is formerly known as SVB Specialty Lending and included our Community Development Finance practice which makes loans as part of our responsibilities under the Community Reinvestment Act. During the third quarter of 2014, management realigned the organizational structure of our Community Development Finance practice in order to improve its oversight and compliance for loans made as part of our responsibilities under the Community Reinvestment Act. This practice, formerly included in the GCB results, has been moved into "Other Items". Prior period results have been recast to conform to the new composition of these reportable segments and had no material effect on either the Global Commercial Bank or Other reporting segments.

SVB Analytics provides equity valuation services to companies and venture capital/private equity firms.

Debt Fund Investments is comprised of our investments in certain debt funds.

SVB Private Bank is the private banking division of the Bank, which provides banking products and a range of personal financial solutions for consumers. Our clients are primarily venture capital/private equity professionals and executive leaders of the innovation companies they support. We offer a customized suite of private banking services, including mortgages, home equity lines of credit, restricted stock purchase loans, capital call lines of credit and other secured and unsecured lending, as well as cash and wealth management services.

SVB Capital is the venture capital investment arm of SVBFG, which focuses primarily on funds management. SVB Capital manages funds (primarily venture capital funds) on behalf of third party limited partners and SVB Financial Group. The SVB Capital family of funds is comprised of funds of funds and direct venture funds. SVB Capital generates income for the Company primarily through management fees, carried interest arrangements and returns through the Company's investments in the funds.

The summary financial results of our operating segments are presented along with a reconciliation to our consolidated interim results.

Table of Contents

Our segment information for the three and nine months ended September 30, 2014 and 2013 is as follows:

(Dollars in thousands)	Global Commercial Bank (1)	SVB Private Bank	SVB Capital (1)	Other Items (2)	Total
Three months ended September 30, 2014					
Net interest income	\$187,184	\$7,344	\$12	\$26,025	\$220,565
(Provision for) loan losses	(16,185)	(425)	—	—	(16,610)
Noninterest income	57,756	491	1,064	20,856	80,167
Noninterest expense (3)	(128,685)	(2,574)	(3,036)	(47,694)	(181,989)
Income (loss) before income tax expense (4)	\$100,070	\$4,836	\$(1,960)	\$(813)	\$102,133

Noninterest expense (3)	(107,495)	(2,484)	(2,728)	(47,817)	(160,524)
Income before income tax expense (4)	\$93,234	\$5,086	\$32,730	\$132,534	\$263,584
Total average loans, net of unearned income	\$8,576,443	\$942,411	\$—	\$27,087	\$9,545,941
Total average assets (5)	21,336,583	998,640	329,680	407,831	23,072,734
Total average deposits	18,994,374	535,611	—	29,903	19,559,888
Nine months ended September 30, 2014					
Net interest income	\$541,375	\$23,529	\$55	\$56,899	\$621,858
(Provision for) reduction of loan losses	(18,833)	(218)	—	—	(19,051)
Noninterest income	169,414	1,121	35,617	198,450	404,602
Noninterest expense (3)	(374,289)	(7,709)	(8,815)	(137,058)	(527,871)
Income before income tax expense (4)	\$317,667	\$16,723	\$26,857	\$118,291	\$479,538
Total average loans, net of unearned income	\$9,917,115	\$1,120,647	\$—	\$60,635	\$11,098,397
Total average assets (5)	28,828,400	1,027,707	328,048	1,221,098	31,405,253
Total average deposits	26,020,715	805,167	—	56,231	26,882,113
Nine months ended September 30, 2013					
Net interest income	\$465,893	\$18,226	\$5	\$26,222	\$510,346
(Provision for) reduction of loan losses	(36,030)	1,007	—	—	(35,023)
Noninterest income	144,893	867	48,179	240,554	434,493
Noninterest expense (3)	(313,080)	(6,263)	(7,871)	(125,616)	(452,830)
Income before income tax expense (4)	\$261,676	\$13,837	\$40,313	\$141,160	\$456,986
Total average loans, net of unearned income	\$8,175,626	\$886,679	\$—	\$23,874	\$9,086,179
Total average assets (5)	20,732,425	910,551	277,136	575,980	22,496,092
Total average deposits	18,480,510	493,204	—	15,646	18,989,360

(1) Global Commercial Bank's and SVB Capital's components of net interest income, noninterest income, noninterest expense and total average assets are shown net of noncontrolling interests for all periods presented. Noncontrolling

interest is included within "Other Items" as discussed below.

The "Other Items" column reflects the adjustments necessary to reconcile the results of the operating segments to the consolidated financial statements prepared in conformity with GAAP. Noninterest income is primarily attributable to noncontrolling interests and gains on equity warrant assets. Noninterest expense primarily consists of expenses associated with corporate support functions such as finance, human resources, marketing, legal and other expenses. Additionally, average assets primarily consist of cash and cash equivalents and loans from our Community Development Finance practice as part of our responsibilities under the Community Reinvestment Act.

Table of Contents

The Global Commercial Bank segment includes direct depreciation and amortization of \$5.4 million and \$4.9 (3) million for the three months ended September 30, 2014 and 2013, respectively and \$15.4 million and \$14.0 million for the nine months ended September 30, 2014 and 2013, respectively.

(4) The internal reporting model used by management to assess segment performance does not calculate income tax expense by segment. Our effective tax rate is a reasonable approximation of the segment rates.

(5) Total average assets equal the greater of total average assets or the sum of total liabilities and total stockholders' equity for each segment.

11. Off-Balance Sheet Arrangements, Guarantees and Other Commitments

In the normal course of business, we use financial instruments with off-balance sheet risk to meet the financing needs of our customers. These financial instruments include commitments to extend credit, commercial and standby letters of credit and commitments to invest in venture capital and private equity fund investments. These instruments involve credit risk to varying degrees. Credit risk is defined as the possibility of sustaining a loss because other parties to the financial instrument fail to perform in accordance with the terms of the contract.

Commitments to Extend Credit

The following table summarizes information related to our commitments to extend credit at September 30, 2014 and December 31, 2013:

(Dollars in thousands)	September 30, 2014	December 31, 2013
Loan commitments available for funding: (1)		
Fixed interest rate commitments	\$1,434,100	\$1,392,781
Variable interest rate commitments	12,059,816	9,101,973
Total loan commitments available for funding	13,493,916	10,494,754
Commercial and standby letters of credit (2)	1,137,721	975,968
Total unfunded credit commitments	\$14,631,637	\$11,470,722
Commitments unavailable for funding (3)	\$1,691,660	\$1,006,168
Maximum lending limits for accounts receivable factoring arrangements (4)	1,004,402	894,276
Reserve for unfunded credit commitments (5)	35,489	29,983

(1) Represents commitments which are available for funding, due to clients meeting all collateral, compliance and financial covenants required under loan commitment agreements.

(2) See below for additional information on our commercial and standby letters of credit.

(3) Represents commitments which are currently unavailable for funding, due to clients failing to meet all collateral, compliance and financial covenants under loan commitment agreements.

(4) We extend credit under accounts receivable factoring arrangements when our clients' sales invoices are deemed creditworthy under existing underwriting practices.

(5) Our reserve for unfunded credit commitments includes an allowance for both our unfunded loan commitments and our letters of credit.

Commercial and Standby Letters of Credit

The table below summarizes our commercial and standby letters of credit at September 30, 2014. The maximum potential amount of future payments represents the amount that could be remitted under letters of credit if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from the collateral held or pledged.

(Dollars in thousands)	Expires In One Year or Less	Expires After One Year	Total Amount Outstanding	Maximum Amount of Future Payments
Financial standby letters of credit	\$936,790	\$129,337	\$1,066,127	\$1,066,127
Performance standby letters of credit	57,058	8,162	65,220	65,220
Commercial letters of credit	6,374	—	6,374	6,374
Total	\$1,000,222	\$137,499	\$1,137,721	\$1,137,721

Table of Contents

Deferred fees related to financial and performance standby letters of credit were \$8.4 million at September 30, 2014 and \$8.2 million at December 31, 2013. At September 30, 2014, collateral in the form of cash of \$465.3 million and available-for-sale securities of \$1.3 million were available to us to reimburse losses, if any, under financial and performance standby letters of credit.

Commitments to Invest in Venture Capital and Private Equity Funds

We make commitments to invest in venture capital and private equity funds, which in turn make investments generally in, or in some cases make loans to, privately-held companies. Commitments to invest in these funds are generally made for a 10-year period from the inception of the fund. Although the limited partnership agreements governing these investments typically do not restrict the general partners from calling 100% of committed capital in one year, it is customary for these funds to generally call most of the capital commitments over 5 to 7 years; however in certain cases, the funds may not call 100% of committed capital over the life of the fund. The actual timing of future cash requirements to fund these commitments is generally dependent upon the investment cycle, overall market conditions, and the nature and type of industry in which the privately held companies operate. The following table details our total capital commitments, unfunded capital commitments, and our ownership percentage in each fund at September 30, 2014:

Our Ownership in Venture Capital/Private Equity Funds (Dollars in thousands)	SVBFG Capital Commitments	SVBFG Unfunded Commitments	SVBFG Ownership of each Fund (4) %
Silicon Valley BancVentures, LP	\$6,000	\$ 270	10.7
SVB Capital Partners II, LP (1)	1,200	162	5.1
Capital Partners III, LP	750	649	0.4
SVB Capital Shanghai Yangpu Venture Capital Fund	945	163	6.8
SVB Strategic Investors Fund, LP	15,300	688	12.6
SVB Strategic Investors Fund II, LP	15,000	1,050	8.6
SVB Strategic Investors Fund III, LP	15,000	1,425	5.9
SVB Strategic Investors Fund IV, LP	12,239	2,325	5.0
Strategic Investors Fund V Funds	515	239	Various
Strategic Investors Fund VI Funds	500	402	0.2
Strategic Investors Fund VII Funds	500	500	0.2
SVB Capital Preferred Return Fund, LP	12,688	—	20.0
SVB Capital—NT Growth Partners, LP	24,670	1,340	33.0
Other private equity fund (2)	9,338	—	58.2
Partners for Growth, LP	25,000	9,750	50.0
Debt funds (equity method accounting)	64,574	4,950	Various
Other fund investments (3)	300,461	22,909	Various
Total	\$504,680	\$ 46,822	

(1) Our ownership includes direct ownership of 1.3 percent and indirect ownership interest of 3.8 percent through our investment in SVB Strategic Investors Fund II, LP.

(2) Our ownership includes direct ownership of 41.5 percent and indirect ownership interests of 12.6 percent and 4.1 percent in the fund through our ownership interest of SVB Capital - NT Growth Partners, LP and SVB Capital Preferred Return Fund, LP, respectively.

(3) Represents commitments to 286 funds (primarily venture capital funds) where our ownership interest is generally less than 5 percent of the voting interests of each such fund.

(4) We are subject to the Volcker Rule, which restricts or limits our sponsorship of and ownership of interests in “covered” funds including venture capital and private equity funds. For funds that we sponsor, the Volcker Rule limits the amount of our investment to 3% of the fund, and our aggregate investments in all such funds must not exceed 3% of our Tier 1 capital. The current deadline to conform to these limits is July 21, 2015. The time period to divest an investment that is not permitted by the final rule may be extended by the Federal Reserve Board for up

to two one-year general extensions, and one additional extension up to five additional years for investments in funds that are considered illiquid. We intend to seek the maximum extensions available to us. However, there is no guarantee that the Federal Reserve Board will grant any of these extensions. See “Business - Supervision and Regulation” under Item 1 of Part I of our 2013 Form 10-K.

Table of Contents

The following table details the amounts of remaining unfunded commitments to venture capital and private equity funds by our consolidated managed funds of funds (including our interest and the noncontrolling interests) at September 30, 2014:

Limited Partnership (Dollars in thousands)	Unfunded Commitments
SVB Strategic Investors Fund, LP	\$ 2,250
SVB Strategic Investors Fund II, LP	5,589
SVB Strategic Investors Fund III, LP	15,641
SVB Strategic Investors Fund IV, LP	41,205
Strategic Investors Fund V Funds	162,335
Strategic Investors Fund VI Funds	239,268
SVB Capital Preferred Return Fund, LP	5,886
SVB Capital—NT Growth Partners, LP	6,044
Other private equity fund	243
Total	\$ 478,461

12. Income Taxes

We are subject to income tax in the U.S. federal jurisdiction and various state and foreign jurisdictions and have identified our federal tax return and tax returns in California and Massachusetts as major tax filings. U.S. federal tax examinations through 2009 have been concluded. Our U.S. federal tax returns for 2008, 2010 and subsequent years remain open to examination. Our California tax returns for 2008 and subsequent tax years remain open to examination. Massachusetts tax returns for 2008, 2010 and subsequent years remain open to examination.

At September 30, 2014, our unrecognized tax benefit was \$0.4 million, the recognition of which would reduce our income tax expense by \$0.3 million. We do not expect that our unrecognized tax benefit will materially change in the next 12 months.

We recognize interest and penalties related to income tax matters as part of income before income taxes. Interest and penalties were not material for the three and nine months ended September 30, 2014.

13. Fair Value of Financial Instruments

Fair Value Measurements

Our available-for-sale securities, derivative instruments and certain non-marketable and other securities are financial instruments recorded at fair value on a recurring basis. We make estimates regarding valuation of assets and liabilities measured at fair value in preparing our interim consolidated financial statements.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (the “exit price”) in an orderly transaction between market participants at the measurement date. There is a three-level hierarchy for disclosure of assets and liabilities recorded at fair value. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable and the significance of those inputs in the fair value measurement. Observable inputs reflect market-derived or market-based information obtained from independent sources, while unobservable inputs reflect our estimates about market data and views of market participants. The three levels for measuring fair value are based on the reliability of inputs and are as follows:

Level 1

Fair value measurements based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these instruments does not entail a significant degree of judgment. Assets utilizing Level 1 inputs include U.S. Treasury securities, exchange-traded equity securities and certain marketable securities accounted for under fair value accounting.

Level 2

Fair value measurements based on quoted prices in markets that are not active or for which all significant inputs are observable, directly or indirectly. Valuations for the available-for-sale securities are provided by third party external

pricing service providers. We review the methodologies used to determine the fair value, including understanding the nature and observability of the inputs used to determine the price. Additional corroboration, such as obtaining a non-binding price from a broker, may be obtained depending on the frequency of trades of the security and the level of liquidity or depth of the market. The valuation

38

Table of Contents

methodology that is generally used for the Level 2 assets is the income approach. Below is a summary of the significant inputs used for each class of Level 2 assets and liabilities:

U.S. agency debentures: Fair value measurements of U.S. agency debentures are based on the characteristics specific to bonds held, such as issuer name, coupon rate, maturity date and any applicable issuer call option features.

Valuations are based on market spreads relative to similar term benchmark market interest rates, generally U.S. Treasury securities.

Agency-issued mortgage-backed securities: Agency-issued mortgage-backed securities are pools of individual conventional mortgage loans underwritten to U.S. agency standards with similar coupon rates, tenor, and other attributes such as geographic location, loan size and origination vintage. Fair value measurements of these securities are based on observable price adjustments relative to benchmark market interest rates taking into consideration estimated loan prepayment speeds.

Agency-issued collateralized mortgage obligations: Agency-issued collateralized mortgage obligations are structured into classes or tranches with defined cash flow characteristics and are collateralized by U.S. agency-issued mortgage pass-through securities. Fair value measurements of these securities incorporate similar characteristics of mortgage pass-through securities such as coupon rate, tenor, geographic location, loan size and origination vintage, in addition to incorporating the effect of estimated prepayment speeds on the cash flow structure of the class or tranche. These measurements incorporate observable market spreads over an estimated average life after considering the inputs listed above.

Agency-issued commercial mortgage-backed securities: Fair value measurements of these securities are based on spreads to benchmark market interest rates (usually U.S. Treasury rates or rates observable in the swaps market), prepayment speeds, loan default rate assumptions and loan loss severity assumptions on underlying loans.

Municipal bonds and notes: Bonds issued by municipal governments generally have stated coupon rates, final maturity dates and are subject to being called ahead of the final maturity date at the option of the issuer. Fair value measurements of these securities are priced based on spreads to other municipal benchmark bonds with similar characteristics; or, relative to market rates on U.S. Treasury bonds of similar maturity.

Interest rate swap assets: Fair value measurements of interest rate swaps are priced considering the coupon rate of the fixed leg of the contract and the variable coupon on the floating leg of the contract. Valuation is based on both spot and forward rates on the swap yield curve and the credit worthiness of the contract counterparty.

Foreign exchange forward and option contract assets and liabilities: Fair value measurements of these assets and liabilities are priced based on spot and forward foreign currency rates and option volatility assumptions and the credit worthiness of the contract counterparty.

Equity warrant assets (public portfolio): Fair value measurements of equity warrant assets of publicly-traded portfolio companies are valued based on the Black-Scholes option pricing model. The model uses the price of publicly-traded companies (underlying stock price), stated strike prices, warrant expiration dates, the risk-free interest rate and market-observable option volatility assumptions.

Level 3

The fair value measurement is derived from valuation techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect our own estimates of assumptions we believe market participants would use in pricing the asset. Below is a summary of the valuation techniques used for each class of Level 3 assets:

Venture capital and private equity fund investments: Fair value measurements are based on the net asset value per share as obtained from the investee funds' management, as the funds do not have a readily determinable fair value and the funds prepare their financial statements using guidance consistent with fair value accounting. We account for differences between our measurement date and the date of the fund investment's net asset value by using the most recent available financial information from the investee general partner, adjusted for any contributions paid, distributions received from the investment, and significant fund transactions or market events during the reporting period.

Other venture capital investments: Fair value measurements are based on consideration of a range of factors including, but not limited to, the price at which the investment was acquired, the term and nature of the investment, local market conditions, values for comparable securities, and as it relates to the private company, the current and projected

operating performance, exit strategies and financing transactions subsequent to the acquisition of the investment. The significant unobservable inputs used in the fair value measurement include the information about each portfolio company, including actual and forecasted results, cash position, recent or planned transactions and market comparable companies. Significant changes to any one of these inputs in isolation could result in a significant change in the fair value measurement, however, we generally consider all factors available through ongoing communication with the portfolio companies and venture capital fund managers to determine whether there are changes to the portfolio company or the environment that indicate a change in the fair value measurement.

Table of Contents

Other securities: Fair value measurements of equity securities of public companies are priced based on quoted market prices less a discount if the securities are subject to certain sales restrictions. Marketability discounts generally range from 10% to 20% depending on the duration of the sale restrictions which typically range from 3 to 6 months.

Equity warrant assets (public portfolio): Fair value measurements of equity warrant assets of publicly-traded portfolio companies are valued based on the Black-Scholes option pricing model. The model uses the price of publicly-traded companies (underlying stock price), stated strike prices, warrant expiration dates, the risk-free interest rate and market-observable option volatility assumptions. Modeled asset values are further adjusted by applying a discount of up to 20% for certain warrants that have lockup restrictions or other features that indicate a discount to fair value is warranted. As a lock-up term nears, and other sale restrictions are lifted, discounts are adjusted downward to 0 percent once all restrictions expire or are removed.

Equity warrant assets (private portfolio): Fair value measurements of equity warrant assets of private portfolio companies are priced based on a modified Black-Scholes option pricing model to estimate the asset value by using stated strike prices, option expiration dates, risk-free interest rates and option volatility assumptions. Option volatility assumptions used in the modified Black-Scholes model are based on public market indices whose members operate in similar industries as companies in our private company portfolio. Option expiration dates are modified to account for estimates to actual life relative to stated expiration. Overall model asset values are further adjusted for a general lack of liquidity due to the private nature of the associated underlying company. There is a direct correlation between changes in the volatility and remaining life assumptions in isolation and the fair value measurement while there is an inverse correlation between changes in the liquidity discount assumption and the fair value measurement.

It is our policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements. When available, we use quoted market prices to measure fair value. If market prices are not available, fair value measurement is based upon valuation techniques that use primarily market-based or independently-sourced market parameters, including interest rate yield curves, prepayment speeds, option volatilities and currency rates. Substantially all of our financial instruments use the foregoing methodologies, and are categorized as a Level 1 or Level 2 measurement in the fair value hierarchy. However, in certain cases, when market observable inputs for our valuation techniques may not be readily available, we are required to make judgments about assumptions we believe market participants would use in estimating the fair value of the financial instrument, and based on the significance of those judgments, the measurement may be determined to be a Level 3 fair value measurement.

The degree of management judgment involved in determining the fair value of a financial instrument is dependent upon the availability of quoted market prices or observable market parameters. For financial instruments that trade actively and have quoted market prices or observable market parameters, there is minimal subjectivity involved in measuring fair value. When observable market prices and parameters are not fully available, management judgment is necessary to estimate fair value. For inactive markets, there is little information, if any, to evaluate if individual transactions are orderly. Accordingly, we are required to estimate, based upon all available facts and circumstances, the degree to which orderly transactions are occurring and provide more weighting to price quotes that are based upon orderly transactions. In addition, changes in the market conditions may reduce the availability of quoted prices or observable data. For example, reduced liquidity in the capital markets or changes in secondary market activities could result in observable market inputs becoming unavailable. Therefore, when market data is not available, we use valuation techniques requiring more management judgment to estimate the appropriate fair value measurement. Accordingly, the degree of judgment exercised by management in determining fair value is greater for financial assets and liabilities categorized as Level 3.

Table of Contents

The following fair value hierarchy table presents information about our assets and liabilities that are measured at fair value on a recurring basis as of September 30, 2014:

(Dollars in thousands)	Level 1	Level 2	Level 3	Balance at September 30, 2014
Assets				
Available-for-sale securities:				
U.S. treasury securities	\$6,876,299	\$—	\$—	\$6,876,299
U.S. agency debentures	—	3,605,833	—	3,605,833
Residential mortgage-backed securities:				
Agency-issued collateralized mortgage obligations - fixed rate	—	2,005,933	—	2,005,933
Agency-issued collateralized mortgage obligations - variable rate	—	835,957	—	835,957
Equity securities	4,211	5,203	—	9,414
Total available-for-sale securities	6,880,510	6,452,926	—	13,333,436
Non-marketable and other securities (fair value accounting):				
Non-marketable securities:				
Venture capital and private equity fund investments	—	—	1,078,911	1,078,911
Other venture capital investments	—	—	43,863	43,863
Other securities	181,265	—	—	181,265
Total non-marketable and other securities (fair value accounting)	181,265	—	1,122,774	1,304,039
Other assets:				
Interest rate swaps	—	4,965	—	4,965
Foreign exchange forward and option contracts	—	17,234	—	17,234
Equity warrant assets	—	1,563	93,397	94,960
Client interest rate derivatives	—	2,173	—	2,173
Total assets (1)	\$7,061,775	\$6,478,861	\$1,216,171	\$14,756,807
Liabilities				
Foreign exchange forward and option contracts	\$—	\$15,833	\$—	\$15,833
Client interest rate derivatives	—	2,317	—	2,317
Total liabilities	\$—	\$18,150	\$—	\$18,150

(1) Included in Level 1 and Level 3 assets are \$163.6 million and \$1.0 billion, respectively, attributable to noncontrolling interests calculated based on the ownership percentages of the noncontrolling interests.

Table of Contents

The following fair value hierarchy table presents information about our assets and liabilities that are measured at fair value on a recurring basis as of December 31, 2013:

(Dollars in thousands)	Level 1	Level 2	Level 3	Balance at December 31, 2013
Assets				
Available-for-sale securities:				
U.S. agency debentures	\$—	\$4,345,232	\$—	\$4,345,232
Residential mortgage-backed securities:				
Agency-issued mortgage-backed securities	—	2,473,576	—	2,473,576
Agency-issued collateralized mortgage obligations - fixed rate	—	3,325,758	—	3,325,758
Agency-issued collateralized mortgage obligations - variable rate	—	1,186,573	—	1,186,573
Agency-issued commercial mortgage-backed securities	—	564,604	—	564,604
Municipal bonds and notes	—	86,027	—	86,027
Equity securities	3,732	1,319	—	5,051
Total available-for-sale securities	3,732	11,983,089	—	11,986,821
Non-marketable and other securities (fair value accounting):				
Non-marketable securities:				
Venture capital and private equity fund investments	—	—	862,972	862,972
Other venture capital investments	—	—	32,839	32,839
Other Securities	2,125	—	319,249	321,374
Total non-marketable and other securities (fair value accounting)	2,125	—	1,215,060	1,217,185
Other assets:				
Interest rate swaps	—	6,492	—	6,492
Foreign exchange forward and option contracts	—	15,530	—	15,530
Equity warrant assets	—	3,622	99,891	103,513
Loan conversion options	—	314	—	314
Client interest rate derivatives	—	1,265	—	1,265
Total assets (1)	\$5,857	\$12,010,312	\$1,314,951	\$13,331,120
Liabilities				
Foreign exchange forward and option contracts	\$—	\$12,617	\$—	\$12,617
Client interest rate derivatives	—	1,396	—	1,396
Total liabilities	\$—	\$14,013	\$—	\$14,013

(1) Included in Level 1 and Level 3 assets are \$2.0 million and \$1.1 billion, respectively, attributable to noncontrolling interests calculated based on the ownership percentages of the noncontrolling interests.

Table of Contents

The following table presents additional information about Level 3 assets measured at fair value on a recurring basis for the three and nine months ended September 30, 2014 and 2013, respectively:

(Dollars in thousands)	Beginning Balance	Total Realized and Unrealized Gains (Losses) Included in Income	Purchases	Sales	Issuances	Distributions and Other Settlements	Transfers Out of Level 3	Ending Balance
Three months ended September 30, 2014

Table of Contents

- (1) Realized and unrealized gains (losses) are recorded in the line items “gains on investment securities, net”, and “other noninterest income”, components of noninterest income.
- (2) Realized and unrealized gains (losses) are recorded in the line item “gains on derivative instruments, net”, a component of noninterest income.

44

Table of Contents

The following table presents the amount of unrealized gains (losses) included in earnings (which is inclusive of noncontrolling interest) attributable to Level 3 assets still held at September 30, 2014 and 2013:

(Dollars in thousands)	Three months ended		Nine months ended	
	September 30, 2014	2013	September 30, 2014	2013
Non-marketable and other securities (fair value accounting):				
Venture capital and private equity fund investments	\$57,967	\$32,694	\$207,885	\$89,705
Other venture capital investments	(1,231) 4,603	78	5,720
Other securities (fair value accounting)	—	143,301	78,967	143,301
Total non-marketable and other securities (fair value accounting) (1)	56,736	180,598	286,930	238,726
Other assets:				
Equity warrant assets (2)	6,911	14,205	17,777	19,788
Total unrealized gains, net	\$63,647	\$194,803	\$304,707	\$258,514
Unrealized gains attributable to noncontrolling interests	\$47,165	\$164,871	\$193,841	\$215,340

(1) Unrealized gains (losses) are recorded in the line items “gains on investment securities, net”, and “other noninterest income”, components of noninterest income.

(2) Unrealized gains (losses) are recorded in the line item “gains on derivative instruments, net”, a component of noninterest income.

The following table presents quantitative information about the significant unobservable inputs used for certain of our Level 3 fair value measurements at September 30, 2014 and December 31, 2013. We have not included in this table our venture capital and private equity fund investments (fair value accounting) as we use net asset value per share (as obtained from the general partners of the investments) as a practical expedient to determine fair value.

(Dollars in thousands)	Fair value	Valuation Technique	Significant Unobservable Inputs	Weighted Average
September 30, 2014:				
Other venture capital investments (fair value accounting)	\$43,863	Private company equity pricing	(1)	(1))
Equity warrant assets (public portfolio)	529	Modified Black-Scholes option pricing model	Volatility	43.9 %
			Risk-Free interest rate	2.1 %
			Sales restrictions discount (2)	15.7 %
Equity warrant assets (private portfolio)	92,868	Modified Black-Scholes option pricing model	Volatility	38.2 %
			Risk-Free interest rate	1.0 %
			Marketability discount (3)	20.0 %
			Remaining life assumption (4)	45.0 %
December 31, 2013:				
Other venture capital investments (fair value accounting)	\$32,839	Private company equity pricing	(1)	(1))
Other securities	319,249	Modified stock price	Sales restrictions discount (2)	12.0 %
Equity warrant assets (public portfolio)	24,217	Modified Black-Scholes option pricing model	Volatility	41.3 %
			Risk-Free interest rate	1.7 %
			Sales restrictions discount (2)	13.7 %
	75,674		Volatility	40.1 %

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Equity warrant assets (private portfolio)	Modified Black-Scholes option pricing model	Risk-Free interest rate	0.8	%
		Marketability discount (3)	22.5	%
		Remaining life assumption (4)	45.0	%

In determining the fair value of our other venture capital investment portfolio, we evaluate a variety of factors related to each underlying private portfolio company including, but not limited to, actual and forecasted results, (1) cash position, recent or planned transactions and market comparable companies. Additionally, we have ongoing communication with the portfolio companies and venture capital fund managers, to determine whether there is a material change in fair value.

45

Table of Contents

These factors are specific to each portfolio company and a weighted average or range of values of the unobservable inputs is not meaningful.

We adjust quoted market prices of public companies, which are subject to certain sales restrictions. Sales (2) restriction discounts generally range from 10 percent to 20 percent depending on the duration of the sales restrictions, which typically range from 3 to 6 months.

Our marketability discount is applied to all private company warrants to account for a general lack of liquidity due (3) to the private nature of the associated underlying company. The quantitative measure used is based on long-run averages and is influenced over time by various factors, including market conditions. On a quarterly basis, a sensitivity analysis is performed on our marketability discount.

We adjust the contractual remaining term of private company warrants based on our estimate of the actual (4) remaining life, which we determine by utilizing historical data on cancellations and exercises. At September 30, 2014, the weighted average contractual remaining term was 6.25 years, compared to our estimated remaining life of 2.81 years. On a quarterly basis, a sensitivity analysis is performed on our remaining life assumption.

For the three and nine months ended September 30, 2014 and 2013, we did not have any material transfers between Level 2 and Level 1. Transfers from Level 3 to Level 1 for the three months ended September 30, 2014 include \$5.8 million as a result of the expiration of lockup and other restrictions on one of our other securities portfolio companies. Transfers from Level 3 to Level 1 for the nine months ended September 30, 2014 included \$380.1 million as a result of the expiration of lockup and other restrictions on certain of our other securities. Transfers from Level 3 to Level 2 for the nine months ended September 30, 2013 include \$3.6 million due to the IPO of one of our portfolio companies. All other transfers from Level 3 to Level 2 for the three and nine months ended September 30, 2014 and 2013 were due to the transfer of equity warrant assets from our private portfolio to our public portfolio (see our Level 3 reconciliation above). All amounts reported as transfers represent the fair value as of the date of the change in circumstances that caused the transfer.

Financial Instruments not Carried at Fair Value

FASB guidance over financial instruments requires that we disclose estimated fair values for our financial instruments not carried at fair value. Fair value estimates, methods and assumptions, set forth below for our financial instruments, are made solely to comply with these requirements.

Fair values are based on estimates or calculations at the transaction level using present value techniques in instances where quoted market prices are not available. Because broadly traded markets do not exist for many of our financial instruments, the fair value calculations attempt to incorporate the effect of current market conditions at a specific time. The aggregation of the fair value calculations presented herein does not represent, and should not be construed to represent, the underlying value of the Company.

The following describes the methods and assumptions used in estimating the fair values of financial instruments, excluding financial instruments already recorded at fair value as described above.

Cash and Cash Equivalents

Cash and cash equivalents include cash on hand, cash balances due from banks, interest-earning deposits, securities purchased under agreements to resell and other short-term investment securities. The carrying amount is a reasonable estimate of fair value because of the insignificant risk of changes in fair value due to changes in market interest rates, and the instruments are purchased in conjunction with our cash management activities.

Held-to-Maturity Securities

Held-to-maturity securities include similar investments held in our available-for-sale securities portfolio and are valued using the same methodologies. All securities included in our held-to-maturity securities portfolio are valued using Level 2 inputs. Refer to Level 2 fair value measurements above for significant inputs used in the valuation of our held-to-maturity investment securities.

Non-Marketable Securities (Cost and Equity Method Accounting)

Non-marketable securities includes other investments (equity method accounting), low income housing tax credit funds (equity method accounting), venture capital and private equity fund investments (cost method accounting), and other venture capital investments (cost method accounting). Other investments (equity method accounting) include

our investment in SPD Silicon Valley Bank ("SPD-SVB"), our joint venture bank in China. At this time, the carrying value of our investment in SPD-SVB is a reasonable estimate of fair value. The fair value of the remaining other investments (equity method accounting) and the fair value of venture capital and private equity fund investments (cost method accounting) and other venture capital investments

Table of Contents

(cost method accounting) is based on financial information obtained from the investee or obtained from the fund investments' or debt fund investments' respective general partners. For private company investments, estimated fair value is based on consideration of a range of factors including, but not limited to, the price at which the investment was acquired, the term and nature of the investment, local market conditions, values for comparable securities, current and projected operating performance, exit strategies, and financing transactions subsequent to the acquisition of the investment. For our fund investments, we utilize the net asset value per share as obtained from the general partners of the investments. We adjust the net asset value per share for differences between our measurement date and the date of the fund investment's net asset value by using the most recently available financial information from the investee general partner, for example June 30th for our September 30th consolidated financial statements, adjusted for any contributions paid, distributions received from the investment, and significant fund transactions or market events during the reporting period. The carrying value of our low income housing tax credit funds (equity method accounting) is a reasonable estimate of fair value.

Loans

The fair value of fixed and variable rate loans is estimated by discounting contractual cash flows using rates that reflect current pricing for similar loans and the projected forward yield curve. This method is not based on the exit price concept of fair value required under ASC 820, Fair Value Measurements and Disclosures.

FHLB and Federal Reserve Bank Stock

Investments in FHLB and Federal Reserve Bank stock are recorded at cost. The carrying amounts of these investments are reasonable estimates of fair value because the securities are restricted to member banks and they do not have a readily determinable market value.

Accrued Interest Receivable and Payable

The carrying amounts of accrued interest receivable and payable are reasonable estimates of fair value due to the short-term nature of these balances.

Deposits

The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, interest-bearing checking accounts, money market accounts and interest-bearing sweep deposits is equal to the amount payable on demand at the measurement date. The fair value of time deposits is estimated by discounting the cash flows using our cost of borrowings and the projected forward yield curve over their remaining contractual term.

Short-Term Borrowings

Short-term borrowings at both September 30, 2014 and December 31, 2013 included cash collateral received from our counterparties in relation to derivative contracts where the net market value is in our favor, primarily for our interest rate swap agreement related to our 6.05% Subordinated Notes. The carrying amount of the cash collateral is a reasonable estimate of fair value.

Long-Term Debt

Long-term debt at September 30, 2014 and December 31, 2013 included our 5.375% Senior Notes, 7.0% Junior Subordinated Debentures and 6.05% Subordinated Notes. The fair value of long-term debt is generally based on quoted market prices, when available, or is estimated based on calculations utilizing third-party pricing services and current market spread, price indications from reputable dealers or observable market prices of the underlying instrument(s), whichever is deemed more reliable. Also included in the estimated fair value of our 6.05% Subordinated Notes are amounts related to hedge accounting associated with the note.

Off-Balance Sheet Financial Instruments

The fair value of net available commitments to extend credit is estimated based on the average amount we would receive or pay to execute a new agreement with identical terms and pricing, while taking into account the counterparties' credit standing.

Letters of credit are carried at their fair value, which was equivalent to the residual premium or fee at September 30, 2014 and December 31, 2013. Commitments to extend credit and letters of credit typically result in loans with a market interest rate if funded.

Table of Contents

The following fair value hierarchy table presents the estimated fair values of our financial instruments that are not carried at fair value at September 30, 2014 and December 31, 2013:

(Dollars in thousands)	Carrying Amount	Estimated Fair Value		
		Level 1	Level 2	Level 3
September 30, 2014:				
Financial assets:				
Cash and cash equivalents	\$1,872,537	\$1,872,537	\$—	\$—
Held-to-maturity securities	6,662,025	—	6,613,893	—
Non-marketable and other securities (cost and equity method accounting)	399,511	—	—	497,855
Net commercial loans	10,721,645	—	—	10,884,474
Net consumer loans	1,166,475	—	—	1,121,639
FHLB and Federal Reserve Bank stock	41,026	—	—	41,026

(2)

At September 30, 2014 and December 31, 2013, included in the carrying value and estimated fair value of our 6.05% Subordinated Notes was an interest rate swap valued at \$5.0 million and \$6.5 million, respectively, related to hedge accounting associated with the notes.

Table of Contents

Investments in Entities that Calculate Net Asset Value Per Share

FASB guidance over certain fund investments requires that we disclose the fair value of funds, significant investment strategies of the investees, redemption features of the investees, restrictions on the ability to sell investments, estimate of the period of time over which the underlying assets are expected to be liquidated by the investee, and unfunded commitments related to the investments.

Our investments in debt funds and venture capital and private equity fund investments generally cannot be redeemed. Alternatively, we expect distributions, if any, to be received primarily through IPOs and M&A activity of the underlying assets of the fund. Subject to applicable requirements under the Volcker Rule, we do not have any plans to sell any of these fund investments. If we decide to sell these investments in the future, the investee fund's management must approve of the buyer before the sale of the investments can be completed. The fair values of the fund investments have been estimated using the net asset value per share of the investments, adjusted for any differences between our measurement date and the date of the fund investment's net asset value by using the most recently available financial information from the investee general partner, for example June 30th, for our September 30th consolidated financial statements, adjusted for any contributions paid, distributions received from the investment, and significant fund transactions or market events during the reporting period.

The following table is a summary of the estimated fair values of these investments and remaining unfunded commitments for each major category of these investments as of September 30, 2014:

(Dollars in thousands)	Carrying Amount	Fair Value	Unfunded Commitments
Non-marketable securities (fair value accounting):			
Venture capital and private equity fund investments (1)	\$ 1,078,911	\$1,078,911	\$ 478,461
Non-marketable securities (equity method accounting):			
Other investments (2)	47,662	49,064	5,836
Non-marketable securities (cost method accounting):			
Venture capital and private equity fund investments (3)	142,710	239,857	22,022
Total	\$ 1,269,283	\$1,367,832	\$ 506,319

Venture capital and private equity fund investments within non-marketable securities (fair value accounting) include investments made by our managed funds of funds and one of our direct venture funds. These investments represent investments in venture capital and private equity funds that invest primarily in U.S. and global (1) technology and life sciences companies. Included in the fair value and unfunded commitments of fund investments under fair value accounting are \$995 million and \$474 million, respectively, attributable to noncontrolling interests. It is estimated that we will receive distributions from the fund investments over the next 10 to 13 years, depending on the age of the funds and any potential extensions of terms of the funds.

Other investments within non-marketable securities (equity method accounting) include investments in debt funds and venture capital and private equity fund investments that invest in or lend money to primarily U.S. and global (2) technology and life sciences companies. It is estimated that we will receive distributions from the fund investments over the next 5 to 7 years, depending on the age of the funds.

Venture capital and private equity fund investments within non-marketable securities (cost method accounting) include investments in venture capital and private equity fund investments that invest primarily in U.S. and global (3) technology and life sciences companies. It is estimated that we will receive distributions from the fund investments over the next 5 to 7 years, depending on the age of the funds and any potential extensions of the terms of the funds.

14. Legal Matters

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against us or our affiliates. In accordance with applicable accounting guidance, we establish accruals for all lawsuits, claims and expected settlements when we believe it is probable that a loss has been incurred and the amount of the loss is reasonably estimable. When a loss contingency is not both probable and estimable, we do not establish an accrual. Any such loss estimates are inherently uncertain, based on currently available information and are subject to

management's judgment and various assumptions. Due to the inherent subjectivity of these estimates and unpredictability of outcomes of legal proceedings, any amounts accrued may not represent the ultimate resolution of such matters.

To the extent we believe any potential loss relating to such lawsuits and claims may have a material impact on our liquidity, consolidated financial position, results of operations, and/or our business as a whole and is reasonably possible but not probable,

we disclose information relating to any such potential loss, whether in excess of any established accruals or where there is no established accrual. We also disclose information relating to any material potential loss that is probable but not reasonably estimable. Where reasonably practicable, we will provide an estimate of loss or range of potential loss. No disclosures are generally made for any loss contingencies that are deemed to be remote.

Based upon information available to us, our review of lawsuits and claims filed or pending against us to date and consultation with our outside legal counsel, we have not recognized a material accrual liability for these matters, nor do we currently expect it is reasonably possible that these matters will result in a material liability to the Company. However, the outcome of litigation and other legal and regulatory matters is inherently uncertain, and it is possible that one or more of such matters currently pending or threatened could have an unanticipated material adverse effect on our liquidity, consolidated financial position, results of operations, and/or our business as a whole, in the future.

15. Related Parties

SVB Financial has commitments under two partially-syndicated revolving line of credit facilities totaling \$65.0 million to Gold Hill Capital 2008 LP, a venture debt fund, and an affiliated fund, for which SVB Financial has ownership interests. Of the \$65.0 million, \$6.0 million is syndicated to another lender. SVB Financial has an 11.5 percent direct ownership interest and a 4.0 percent indirect ownership interest in Gold Hill Capital 2008 LP through our 83.8 percent interest in its general partner, Gold Hill Capital 08, LLC. The lines of credit are secured and bear an interest rate of national Prime plus one percent. The highest outstanding balance under SVB Financial's portion of the facility for the three months ended September 30, 2014 was \$19.1 million. SVB Financial's portion of the outstanding balance was \$5.0 million at September 30, 2014 and \$23.0 million at December 31, 2013.

During the nine months ended September 30, 2014, the Bank made loans to related parties, including certain companies in which certain of our directors or their affiliated venture funds are beneficial owners of ten percent or more of the equity securities of such companies. Such loans: (a) were made in the ordinary course of business; (b) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other non-related persons; and (c) did not involve more than the normal risk of collectability or present other unfavorable features. Additionally, we also provide real estate secured loans to eligible employees through our EHOP.

16. Subsequent Events

Update on Investments in FireEye

As of September 30, 2014, our managed funds (including SVB Financial's interest) held approximately 4.9 million shares of FireEye common stock ("FireEye Shares"). From September 30, 2014 to November 6, 2014, the market share price of FireEye's common stock has slightly decreased from \$30.56 to \$30.04 and as such there has not been a significant decline in the valuation of our remaining FireEye related investments.

Investment gains (or losses) relating to the remaining 4.9 million FireEye Shares held by our managed funds are based on valuation changes or the sale of such securities, and are subject to FireEye's stock price, which is subject to market conditions and various other factors. Additionally, any future gains and losses with respect to the remaining shares held by our managed funds at September 30, 2014 are currently unrealized, and the extent such gains (or losses) will become realized is subject to a variety of factors, including among other things, changes in prevailing market prices and timing of any sales or distribution of securities, which are subject to our funds' separate discretionary securities sales/distribution and governance processes.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

This Quarterly Report on Form 10-Q, including in particular "Management's Discussion and Analysis of Financial Condition and Results of Operations" under Part I, Item 2 of this report, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Management has in the past and might in the future make forward-looking statements orally to analysts, investors, the media and others. Forward-looking statements are statements that are not historical facts. Broadly speaking, forward-looking statements include, but are not limited to, the following:

- Projections of our net interest income, noninterest income, earnings per share, noninterest expenses (including professional services, compliance, compensation and other costs), cash flows, balance sheet positions, capital expenditures, liquidity and capitalization or other financial items

- Descriptions of our strategic initiatives, plans or objectives for future operations, including pending sales or acquisitions

- Forecasts of venture capital/private equity funding and investment levels

- Forecasts of future interest rates, economic performance, and income from investments

- Forecasts of expected levels of provisions for loan losses, loan growth and client funds

- Descriptions of assumptions underlying or relating to any of the foregoing

In this Quarterly Report on Form 10-Q, we make forward-looking statements, including, but not limited to, those discussing our management's expectations about:

- Market and economic conditions (including interest rate environment, and levels of public offerings, mergers/acquisitions and venture capital financing activities) and the associated impact on us

- The sufficiency of our capital, including sources of capital (such as deposits and funds generated through retained earnings), the extent to which capital may be used or required, our capital category classification, and management of our capital ratios

- The adequacy of our liquidity position, including sources of liquidity (such as funds generated through retained earnings)

- Our overall investment plans, strategies and activities, including venture capital/private equity funding and investments, and our investment of excess cash/liquidity

- The realization, timing, valuation and performance of equity or other investments, including the impact of changes in our valuation of our investments (such as FireEye), and the volatility of any gains or losses

- The likelihood that the market value of our temporarily impaired investments will recover

- Our intent to sell our available-for-sale securities prior to recovery of our cost basis, or the likelihood of such

- Our ability and intent to hold our held-to-maturity securities until maturity

- The impact on our interest income from mortgage prepayment levels as it relates to our premium amortization expense, and from changes in loan yields due to shifts in loan mix

- Expected cash requirements for unfunded commitments to certain investments, including capital calls

- Our overall management of interest rate risk, including managing the sensitivity of our interest-earning assets and interest-bearing liabilities to interest rates, and the impact to earnings from a change in interest rates

- The credit quality of our loan portfolio, including levels and trends of nonperforming loans, impaired loans, criticized loans and troubled debt restructurings

- The adequacy of reserves (including allowance for loan and lease losses) and the appropriateness of our methodology for calculating such reserves

- The level of loan and deposit and client investment fund balances

- The level of client investment fees and associated margins

- The profitability of our products and services, including loan yields, loan pricing, and interest margins

Table of Contents

- Our strategic initiatives, including the expansion of operations and business activities in China, Hong Kong, India, Israel, the UK and elsewhere domestically or internationally
 - The expansion and growth of our noninterest income sources
 - Distributions of venture capital, private equity or debt fund investment proceeds; intentions to sell such fund investments
 - The changes in, or adequacy of, our unrecognized tax benefits and any associated impact
 - The realization of certain deferred tax assets, and of any benefit stemming from certain net operating loss carryforwards
 - The extent to which counterparties, including those to our forward and option contracts, will perform their contractual obligations
 - The condition and suitability of our properties
 - The manner in which we compete
 - The effect of application of accounting pronouncements and regulatory requirements
 - The effect of lawsuits and claims
 - Regulatory developments, including the nature and timing of the adoption and effectiveness of requirements under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), new capital requirements and other applicable Federal, State and International laws and regulations, and any related impact on us
 - The expected impact of the "Volcker Rule" under the Dodd-Frank Act, including our intention to seek the maximum extensions to the conformance period applicable to us
- You can identify these and other forward-looking statements by the use of words such as “becoming,” “may,” “will,” “should,” “could,” “would,” “predicts,” “potential,” “continue,” “anticipates,” “believes,” “estimates,” “seeks,” “expects,” “plans,” “intends,” “may expect,” “could expect,” or comparable terminology. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we have based these expectations on our beliefs as well as our assumptions, and such expectations may prove to be incorrect. Our actual results of operations and financial performance could differ significantly from those expressed in or implied by our management’s forward-looking statements.
- Factors that could cause actual results to differ from the expectations stated in the forward-looking statements include, but are not limited to, factors discussed elsewhere in this Quarterly Report on Form 10-Q, under “Risk Factors” set forth in our Annual Report on Form 10-K for the year ended December 31, 2013 (“2013 Form 10-K”), as filed with the SEC on February 27, 2014, and other documents we file with the SEC. We urge investors to consider all of these factors carefully in evaluating the forward-looking statements contained in this report. All subsequent written or oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. The forward-looking statements included in this filing are made only as of the date of this filing. We assume no obligation and do not intend to revise or update any forward-looking statements contained in this Quarterly Report on Form 10-Q, except as applicable by law.
- The following discussion and analysis of financial condition and results of operations should be read in conjunction with our interim unaudited consolidated financial statements and accompanying notes as presented in Part I, Item 1 of this report and in conjunction with our 2013 Form 10-K.

Reclassifications

Certain prior period amounts have been reclassified to conform to current period presentations.

Management’s Overview of Third Quarter 2014 Performance

Overall, we had a strong third quarter in 2014, which was reflective of continued strong balance sheet growth, healthy loan and fee activity and solid credit quality. We continued to perform well as a result of our focus on innovation companies and their investors, continued positive business conditions for our clients and our efforts to secure client relationships. We had net income available to common stockholders of \$63.0 million and diluted EPS of \$1.22 for the third quarter of 2014. This compares to net income of \$67.6 million and diluted EPS of \$1.46 in the third quarter of 2013. In the third quarter of 2014, compared to the third quarter of 2013, we experienced strong growth in net interest income as a result of the increase in interest earned from our fixed income investment portfolio due to an increase in average investments of \$8.1 billion, driven by our significant deposit growth, with record high quarterly average

deposits of \$29.7 billion, and loan growth of \$1.9 billion. In addition, we had solid gains on our equity warrant assets, growth in core fee income and continued strength in our liquidity and capital base. Net gains on investment securities of \$55.4 million, excluding FireEye losses of \$49.8 million, were also strong in the third quarter of 2014. Our total client funds, which consist of on-balance sheet deposits and off-balance sheet client investment funds, also increased,

Table of Contents

reflecting growth from our existing and new clients. We continued to invest in the improvement and expansion of our product offerings and infrastructure, which resulted in a \$21.5 million increase in our noninterest expense primarily from increases in professional services, business development and travel and other expenses supporting client services.

Third quarter 2014 results (compared to the third quarter 2013, where applicable) included:

Continued strong growth in our lending business with record high average loan balances of \$11.4 billion, an increase of \$1.9 billion, or 19.8 percent. Period-end loan balances were \$12.0 billion, an increase of \$2.2 billion, or 22.3 percent.

Average investment securities, excluding non-marketable and other securities, of \$18.2 billion, an increase of \$8.1 billion, or 80.7 percent. Period-end investment securities, excluding non-marketable and other securities, of \$20.0 billion, an increase of \$9.8 billion, or 95.8 percent.

Average deposit balances of \$29.7 billion, an increase of \$10.2 billion, or 52.0 percent. Period-end deposit balances of \$31.1 billion, an increase of \$11.1 billion, or 55.6 percent.

Average total client funds (comprised of on-balance sheet deposits and off-balance sheet client investment funds) were \$60.7 billion, an increase of \$16.2 billion, or 36.4 percent. Period-end total client funds were \$62.3 billion, an increase of \$17.0 billion, or 37.4 percent.

Net interest income (fully taxable equivalent basis) of \$221.0 million, an increase of \$43.5 million, or 24.5 percent, primarily due to an increase in interest income from fixed income investment securities and loans, attributable to growth in average investment and loan balances of \$8.1 billion and \$1.9 billion, respectively, driven by the strong average deposit growth mentioned above.

Net interest margin of 2.73 percent, compared to 3.32 percent, primarily reflective of a 49 basis point decrease in the overall yield of our loan portfolio as well as the shift in the composition of our interest earning assets from our higher-yielding loan portfolio to our lower-yielding fixed income investments portfolio.

Provision for loan losses of \$16.6 million, compared to \$10.6 million. The provision of \$16.6 million was primarily driven by \$8.3 million in net charge-offs, \$7.0 million from period-end loan growth and \$3.7 million due to a change in the composition of our performing loan portfolio, offset by a \$2.4 million decrease in the reserve for impaired loans resulting from lower impaired loan balances.

Non-GAAP core fee income of \$53.3 million, an increase of \$10.1 million, or 23.5 percent, primarily from an increase in foreign exchange and credit card fee income, reflective of increased client activity and transaction volumes. (See non-GAAP reconciliation under the section "Results of Operations—Noninterest Income")

Net gains on investment securities of \$5.6 million, compared to net gains of \$187.9 million. [Non-GAAP net losses on investment securities, net of noncontrolling interests were \$1.1 million, compared to net gains of \$36.5 million (See non-GAAP reconciliation under the section "Results of Operations—Noninterest Income—Gains on Investment Securities, Net").] The decrease in net gains primarily resulted from losses on our FireEye related investments. Specifically, we had losses on investment securities related to FireEye of \$49.8 million (\$9.5 million net of noncontrolling interests) during the third quarter of 2014, compared to FireEye related gains of \$138.7 million (\$26.6 million net of noncontrolling interests) for the third quarter of 2013. See "Results of Operations—Noninterest Income—Gains on Investment Securities, Net" for details about our FireEye related investments during the three and nine months ended September 30, 2014.

Net gains on equity warrant assets of \$13.2 million, a decrease of \$5.6 million, or 29.9 percent, compared to \$18.8 million. This decrease was primarily driven by the exercise of our FireEye warrants during the first quarter of 2014, which were held in our equity warrant asset portfolio during the third quarter of 2013 and contributed an \$8.1 million gain from the increased valuation of the warrants during the third quarter of 2013. The decrease of \$8.1 million is offset by an increase in the number of equity warrant assets held at September 30, 2014 as well as gains due to increases in valuations across the equity warrant asset portfolio.

Noninterest expense of \$182.0 million, an increase of \$21.5 million, or 13.4 percent. This increase was primarily due to increased professional services, compensation and benefits, as a result of an increase in average FTEs, business development and travel and other expenses. Average FTEs increased by 10.4 percent to 1,850 for the three months ended September 30, 2014, compared to 1,675 FTEs for the comparable 2013 period.

Edgar Filing: SVB FINANCIAL GROUP - Form 10-Q

Table of Contents

- (1) See “Results of Operations–Noninterest Income” for a description and reconciliation of non-GAAP core fee income and noninterest income.
- (2) See “Results of Operations–Noninterest Expense” for a description and reconciliation of non-GAAP noninterest expense and non-GAAP operating efficiency ratio.
- (3) Three and nine months ended September 30, 2014 average balances are reflective of the re-designation from available-for-sale to held-to-maturity effective June 1, 2014.
- (4) Ratio represents annualized consolidated net income available to common stockholders divided by quarterly and year-to-date average assets.
- (5) Ratio represents annualized consolidated net income available to common stockholders divided by quarterly and year-to-date average SVBFG stockholders’ equity.
- (6) See “Capital Resources–Capital Ratios” for a reconciliation of non-GAAP tangible common equity to tangible assets and tangible common equity to risk-weighted assets.
- (7) The operating efficiency ratio is calculated by dividing total noninterest expense by total taxable-equivalent net interest income plus noninterest income.
- (8) Book value per common share is calculated by dividing total SVBFG stockholders’ equity by total outstanding common shares at period-end.

Critical Accounting Policies and Estimates

The accompanying management’s discussion and analysis of results of operations and financial condition is based upon our unaudited interim consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these financial statements in accordance with GAAP requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, expenses and related disclosure of contingent assets and liabilities. Management evaluates estimates and assumptions on an ongoing basis. Management bases its estimates on historical experiences and various other factors and assumptions that are believed to be reasonable under the circumstances. Actual results may differ materially from these estimates under different assumptions or conditions.

There have been no significant changes during the nine months ended September 30, 2014 to the items that we disclosed as our critical accounting policies and estimates in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” under Part II, Item 7 of our 2013 Form 10-K.

Results of Operations

Net Interest Income and Margin (Fully Taxable Equivalent Basis)

Net interest income is defined as the difference between interest earned on loans, fixed income investment portfolio (available-for-sale and held-to-maturity securities), short-term investment securities and interest paid on funding sources. Net interest income is our principal source of revenue. Net interest margin is defined as the amount of annualized net interest income, on a fully taxable equivalent basis, expressed as a percentage of average interest-earning assets. Net interest income and net interest margin are presented on a fully taxable equivalent basis to consistently reflect income from taxable loans and securities and tax-exempt securities based on the federal statutory tax rate of 35 percent.

Analysis of Net Interest Income Changes Due to Volume and Rate (Fully Taxable Equivalent Basis)

Net interest income is affected by changes in the amount and composition of interest-earning assets and interest-bearing liabilities, referred to as “volume change.” Net interest income is also affected by changes in yields earned on interest-earning assets and rates paid on interest-bearing liabilities, referred to as “rate change.” The following table sets forth changes in interest income for each major category of interest-earning assets and interest expense for each major category of interest-bearing liabilities. The table also reflects the amount of simultaneous changes attributable to both volume and rate changes for the periods indicated. For this table, changes that are not solely due to either volume or rate are allocated in proportion to the percentage changes in average volume and average rate.

Net Interest Income (Fully Taxable Equivalent Basis)						

Three months ended September 30, 2014 and 2013

Net interest income increased by \$43.5 million to \$221.0 million for the three months ended September 30, 2014, compared to \$177.5 million for the comparable 2013 period. Overall, we saw an increase in our net interest income primarily due to higher average loan and investment securities balances. These increases were partially offset by lower overall loan and investment yields.

The main factors affecting interest income and interest expense for the three months ended September 30, 2014, compared to the comparable 2013 period are discussed below:

Interest income for the three months ended September 30, 2014 increased by \$44.1 million primarily due to:

A \$29.9 million increase in interest income on investment securities to \$74.7 million for the three months ended September 30, 2014, compared to \$44.8 million for the comparable 2013 period. The increase was reflective of an increase in average investment securities balances of \$8.1 billion as a result of deposit growth, offset by a decrease in the overall yield on our investment securities portfolio, which decreased 13 basis points to 1.63 percent. Lower reinvestment yields, resulting from a lower overall market rate environment and an increase in purchases of U.S. Treasury securities during the three months ended September 30, 2014, contributed to a decrease in yields of 28 basis points. This decrease was offset by a 15 basis point benefit from lower premium amortization expense. As of September 30, 2014, the remaining unamortized net premium balance on our investment securities portfolio was \$12.0 million (net of discounts of \$94.6 million), compared to \$87.8 million (net of discounts of \$20.6 million) as of the comparable 2013 period.

A \$13.6 million increase in interest income on loans to \$153.3 million for the three months ended September 30, 2014, compared to \$139.7 million for the comparable 2013 period. This increase was reflective of an increase in average loan balances of \$1.9 billion, partially offset by a decrease in both gross loan and loan fee yields. Gross loan yields, excluding loan interest recoveries and loan fees, decreased to 4.39 percent from 4.78 percent,

Table of Contents

reflective of a continued change in the mix of our overall loan portfolio. Consistent with recent quarters, our average loan growth during the third quarter of 2014 was primarily driven by venture capital/private equity loans which, on average, tend to have lower yields. The overall low market rate environment and increased price competition also continued to put pressure on loan yields. Loan fee yields decreased 6 basis points to 90 basis points, from 96 basis points in the comparable 2013 period, as a result of the decrease in regular amortizing fee income as a percentage of total interest income.

Interest expense for the three months ended September 30, 2014 increased to \$8.8 million, compared to \$8.1 million for the comparable 2013 period. The increase in interest expense was primarily from interest-bearing money market deposits of \$0.5 million, mainly attributable to growth of \$1.9 billion in our average money market deposits.

Nine months ended September 30, 2014 and 2013

Net interest income increased by \$111.5 million to \$623.1 million for the nine months ended September 30, 2014, compared to \$511.6 million for the comparable 2013 period. Overall, the increase in our net interest income was primarily due to higher average loan balances and growth in our investment securities portfolio, which has increased as a result of the continued growth in deposits. These increases were partially offset by lower overall loan and investments yields.

The main factors affecting interest income and interest expense for the nine months ended September 30, 2014, compared to the comparable 2013 period are discussed below:

Interest income for the nine months ended September 30, 2014 increased by \$113.9 million primarily due to:

A \$57.3 million increase in interest income on investment securities with the majority of the increase due to a \$4.8 billion increase in average balances due to strong deposit growth. Interest income was offset by a decrease in the overall yield on our investment securities portfolio, which decreased 5 basis points to 1.71 percent. Lower reinvestment yields, resulting from a lower overall market rate environment and an increase in purchases of U.S. Treasury securities during the nine months ended September 30, 2014, contributed to a decrease in yields of 15 basis points. This decrease was offset by a 10 basis point benefit from lower premium amortization expense.

A \$53.9 million increase in interest income on loans, primarily due to an increase in average loan balances of \$2.0 billion. Gross loan yields, excluding loan interest recoveries and loan fees, decreased, reflective of a continued change in the mix of our overall loan portfolio. As mentioned above, our loan growth through the third quarter of 2014 primarily came from our venture capital/private equity loan portfolio which, on average, tend to have lower yielding loans. In addition, driven primarily by early loan repayments, non-recurring loan fee income increased \$9.2 million to \$30.0 million for the nine months ended September 30, 2014 compared to \$20.8 million for the comparable 2013 period. The overall low market rate environment and increased price competition also continued to put pressure on loan yields.

Interest expense for the nine months ended September 30, 2014 increased to \$26.3 million, compared to \$23.9 million for the comparable 2013 period. The increase in interest expense was primarily from interest-bearing money market deposits of \$2.4 million, mainly attributable to growth of \$1.9 billion in our average money market deposit balances.

Net Interest Margin (Fully Taxable Equivalent Basis)

Our net interest margin decreased by 59 basis points to 2.73 percent for the three months ended September 30, 2014, compared to 3.32 percent for the comparable 2013 period.

Our net interest margin decreased by 45 basis points to 2.87 percent for the nine months ended September 30, 2014, compared to 3.32 percent for the comparable 2013 period.

The decrease in our net interest margin for both the three and nine months ended September 30, 2014, was primarily reflective of the shift in the composition of our interest-earning assets as a result of the significant growth in deposits (higher average cash and investment securities balances and lower average loan balances as a percentage of total earning assets) and, as noted above, lower overall loan and investment yields, partially offset by lower premium amortization expense on investment securities. Our loan portfolio (higher-yielding assets) comprised 36 percent, and 38 percent, of our average interest-earning assets during the three and nine months ended September 30, 2014, respectively, compared to 45 percent and 44 percent, respectively, for the comparable 2013 periods.

Table of Contents

Average Balances, Yields and Rates Paid (Fully Taxable Equivalent Basis)

The average yield earned on interest-earning assets is the amount of annualized fully taxable equivalent interest income expressed as a percentage of average interest-earning assets. The average rate paid on funding sources is the amount of annualized interest expense expressed as a percentage of average funding sources. The following tables set forth average assets, liabilities, noncontrolling interests and SVBFG stockholders' equity, interest income, interest expense, annualized yields and rates, and the composition of our annualized net interest margin for the three and nine months ended September 30, 2014 and 2013:

- (3)

Table of Contents

(4) Nonaccrual loans are reflected in the average balances of loans.

(5) Interest income includes loan fees of \$71.6 million and \$60.0 million for the nine months ended September 30, 2014 and 2013, respectively.

Average investment securities of \$1.8 billion and \$1.3 billion for the nine months ended September 30, 2014 and (6) 2013, respectively, were classified as other assets as they were noninterest-earning assets. These investments primarily consisted of non-marketable and other securities.

Provision for Loan Losses

Our provision for loan losses is based on our evaluation of the existing allowance for loan losses in relation to total gross loans using historical and other objective information, and on our qualitative assessment of the inherent and identified credit risks of the loan portfolio. The following table summarizes our allowance for loan losses for the three and nine months ended September 30, 2014 and 2013:

(Dollars in thousands)	Three months ended September		Nine months ended September		
	30, 2014	2013	30, 2014	2013	
Allowance for loan losses, beginning balance	\$120,728	\$119,571	\$142,886	\$110,651	
Provision for loan losses	16,610	10,638	19,051	35,023	
Gross loan charge-offs	(10,657)	(8,149)	(38,189)	(29,150)	
Loan recoveries	2,380	2,674	5,313	8,210	
Allowance for loan losses, ending balance	\$129,061	\$124,734	\$129,061	\$124,734	
Provision for loan losses as a percentage of period-end total gross loans (annualized)	0.54	% 0.43	% 0.21	% 0.47	%
Gross loan charge-offs as a percentage of average total gross loans (annualized)	0.37	0.34	0.46	0.43	
Net loan charge-offs as a percentage of average total gross loans (annualized)	0.28	0.23	0.39	0.31	
Allowance for loan losses as a percentage of period-end total gross loans	1.07	1.26	1.07	1.26	
Period-end total gross loans	\$12,112,474	\$9,914,199	\$12,112,474	\$9,914,199	
Average total gross loans	11,528,172	9,627,912	11,184,840	9,164,538	

Three months ended September 30, 2014 and 2013

Our provision for loan losses was \$16.6 million for the three months ended September 30, 2014, compared to a provision of \$10.6 million for the comparable 2013 period. The provision of \$16.6 million for the third quarter of 2014 was primarily driven by \$8.3 million in net charge-offs, \$7.0 million from period-end loan growth and \$3.7 million due to a change in the composition of our performing loan portfolio, offset by a \$2.4 million decrease in the reserve for impaired loans resulting from lower impaired loan balances. The provision of \$10.6 million for the three months ended September 30, 2013 was primarily driven by \$5.5 million in net charge-offs, an increase of \$3.1 million in the reserve for impaired loans and \$2.3 million related to new loans during the quarter.

Gross loan charge-offs of \$10.7 million for the third quarter of 2014 primarily came from our early-stage software and hardware loan portfolios. Net loan charge-offs of \$8.3 million represented 0.28 percent of average total gross loans, compared to net charge offs of \$5.5 million, or 0.23 percent of average total gross loans for the comparable 2013 period.

Nine months ended September 30, 2014 and 2013

We had a provision for loan losses of \$19.1 million for the nine months ended September 30, 2014, compared to a provision of \$35.0 million for the comparable 2013 period. The provision of \$19.1 million for the nine months ended September 30, 2014 was primarily due to \$32.9 million of net charge-offs and \$12.2 million from period-end loan growth, offset by a \$19.0 million decrease in the reserve for impaired loans resulting from a decrease in impaired loan balances and a reserve release of \$7.1 million due to the improvement of the credit quality of our overall loan portfolio. The provision of \$35.0 million for the nine months ended September 30, 2013 was primarily driven by net charge-offs of \$20.9 million and period-end loan growth.

Gross loan charge-offs of \$38.2 million for the nine months ended September 30, 2014 were primarily from our hardware and software client portfolios. Loan recoveries of \$5.3 million for the nine months ended September 30, 2014 were primarily from our hardware client portfolio.

See “Consolidated Financial Condition—Credit Quality and Allowance for Loan Losses” below and Note 6—“Loans and Allowance for Loan Losses” of the “Notes to Interim Consolidated Financial Statements (unaudited)” under Part I, Item 1 of this report for further details on our allowance for loan losses.

Noninterest Income

A summary of noninterest income for the three and nine months ended September 30, 2014 and 2013 is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Non-GAAP core fee income:						
Foreign exchange fees	\$17,911	\$13,667	31.1	\$53,035	\$41,529	27.7
Credit card fees	10,909	8,188	33.2	31,440	23,245	35.3
Deposit service charges	10,126	8,902	13.7	29,344	26,602	10.3
Lending related fees (1)	6,029	5,265	14.5	18,208	13,835	31.6
Letters of credit and standby letters of credit fees	4,557	3,790	20.2	11,507	10,879	5.8
Client investment fees	3,814	3,393	12.4	10,751	10,392	3.5
Total non-GAAP core fee income (2)	53,346	43,205	23.5	154,285	126,482	22.0
Gains on investment securities, net	5,644	187,862	(97.0)	172,236	255,861	(32.7)
Gains on derivative instruments, net	26,538	9,422	181.7	63,480	27,802	128.3
Other	(5,361)	17,161	(131.2)	14,601	24,348	(40.0)
Total noninterest income	\$80,167	\$257,650	(68.9)	\$404,602	\$434,493	(6.9)

Lending related fees consists of fee income associated with credit commitments such as unused commitment fees, (1) syndication fees and other loan processing fees and, historically, has been included in other noninterest income.

Prior period amounts have been reclassified to conform to the current period presentation.

(2) The following table provides a reconciliation of GAAP noninterest income to non-GAAP core fee income:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
GAAP noninterest income (as reported)	\$80,167	\$257,650	(68.9)	\$404,602	\$434,493	(6.9)
Less: gains on investment securities, net	5,644	187,862	(97.0)	172,236	255,861	(32.7)
Less: gains on derivative instruments, net	26,538	9,422	181.7	63,480	27,802	128.3
Less: other noninterest income	(5,361)	17,161	(131.2)	14,601	24,348	(40.0)
Non-GAAP core fee income (1)	\$53,346	\$43,205	23.5	\$154,285	\$126,482	22.0

(1) This non-GAAP measure represents noninterest income, but excludes certain line items where performance is typically subject to market or other conditions beyond our control.

Included in net income is income and expense attributable to noncontrolling interests. We recognize, as part of our investment funds management business through SVB Capital and Debt Fund Investments, the entire income or loss from funds where we own significantly less than 100% of the investment. We are required under GAAP to consolidate 100% of the results of entities that we are deemed to control, even though we may own less than 100% of such entities. The relevant amounts attributable to investors other than us are reflected under "Net Income Attributable to Noncontrolling Interests" on our statements of income. Where applicable, the non-GAAP tables presented below for noninterest income and net gains on investment securities exclude noncontrolling interests. We believe these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide meaningful supplemental information regarding our performance by excluding certain items that represent income attributable to investors other than us and our subsidiaries. Our management uses, and believes that investors benefit from referring to, these non-GAAP financial measures in assessing our operating results and when planning, forecasting and analyzing future periods. However, these non-GAAP financial measures should be considered in addition to, not as a substitute for or preferable to, financial measures prepared in accordance with GAAP.

Table of Contents

The following table provides a summary of non-GAAP noninterest income, net of noncontrolling interests for the three and nine months ended September 30, 2014 and 2013:

Non-GAAP noninterest income, net of noncontrolling interests (Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
GAAP noninterest income (as reported)	\$80,167	\$257,650	(68.9)%	\$404,602	\$434,493	(6.9)%
Less: income attributable to noncontrolling interests, including carried interest	4,911	151,830	(96.8)	156,304	205,071	(23.8)
Non-GAAP noninterest income, net of noncontrolling interests	\$75,256	\$105,820	(28.9)	\$248,298	\$229,422	8.2

Gains (losses) on Investment Securities, Net

Net gains (losses) on investment securities include both gains and losses from our non-marketable and other securities, as well as gains and losses from sales of our available-for-sale securities portfolio, when applicable.

Our available-for-sale and held-to-maturity securities portfolios are primarily fixed income investment portfolios that are managed to earn an appropriate portfolio yield over the long-term while maintaining sufficient liquidity and credit diversification as well as addressing our asset/liability management objectives. Sales of equity securities held as a result of our exercised warrants, result in net gains or losses on investment securities. These sales are consistent with the guidelines of our investment policy related to the management of our liquidity position and interest rate risk. Though infrequent, sales of investment securities in our fixed income portfolio may result in net gains or losses and are also within the guidelines of our investment policy.

Our non-marketable and other securities portfolio primarily represents investments in venture capital and private equity funds, venture debt funds and private and public portfolio companies. We experience variability in the performance of our non-marketable and other securities from quarter to quarter, which results in net gains or losses on investment securities (both realized and unrealized). This variability is due to a number of factors, including unrealized changes in the values of our investments, changes in the amount of realized gains from distributions, or changes in liquidity events and general economic and market conditions. Unrealized gains from non-marketable and other securities for any single period are typically driven by valuation changes, and are therefore subject to potential increases or decreases in future periods. Such variability may lead to volatility in the gains from investment securities and as such our results for a particular period are not necessarily indicative of our expected performance in a future period.

The extent to which any unrealized gains will become realized is subject to a variety of factors, including, among other things, the expiration of certain sales restrictions to which these equity securities may be subject to, market conditions, the actual sales of securities and the timing of such actual sales.

For the three months ended September 30, 2014, we had net gains on investment securities of \$5.6 million, compared to net gains of \$187.9 million for the comparable 2013 period. Net losses on investment securities, net of noncontrolling interests, were \$1.1 million for the three months ended September 30, 2014, compared to net gains of \$36.5 million for the comparable 2013 period.

Net losses, net of noncontrolling interests, of \$1.1 million for the three months ended September 30, 2014 were primarily driven by the following:

- Losses of \$8.5 million from our managed direct venture funds, mainly related to valuation declines due to the decrease in the public company stock price of FireEye. During the third quarter of 2014, FireEye contributed to \$9.5 million in losses, offset by net gains of \$1.1 million from the remaining portfolio investments.

- Gains of \$4.0 million from our managed funds of funds, primarily related to unrealized valuation adjustments of two of our funds of funds.

-

Gains of \$3.5 million from our strategic and other investments, primarily driven by strong distributions from our strategic venture capital fund investments.

For the nine months ended September 30, 2014, we had net gains on investment securities of \$172.2 million, compared to \$255.9 million for the comparable 2013 period. Net gains on investment securities, net of noncontrolling interests, were \$14.2 million for the nine months ended September 30, 2014, compared to net gains of \$51.1 million for the comparable 2013 period.

The gains, net of noncontrolling interests, of \$14.2 million for the nine months ended September 30, 2014 were primarily driven by the following:

Table of Contents

Gains of \$16.9 million from our managed funds of funds, primarily related to unrealized valuation adjustments of two of our funds of funds.

Gains of \$15.8 million from our strategic and other investments, primarily driven by distributions from strategic venture capital fund investments as well as the acquisition of one of our direct equity investments during the second quarter of 2014, for which we recorded a gain of \$4.7 million.

Losses of \$17.4 million from our equity securities holdings, primarily attributable to the sale of shares of FireEye common stock (acquired through the exercise of certain warrants) during the second quarter of 2014.

The following tables provide a summary of non-GAAP net (losses) gains on investment securities, net of noncontrolling interests, for the three and nine months ended September 30, 2014 and 2013:

(Dollars in thousands)	Managed Funds of Funds	Managed Direct Venture Funds	Debt Funds	Available-For-Sale Securities	Strategic and Other Investments	Total

NM—Not meaningful

(1) At September 30, 2014, we held warrants in 1,415 companies, compared to 1,309 companies at September 30, 2013.

(2) Represents the net gains for foreign exchange forward contracts executed on behalf of clients, excluding any spread or fees earned in connection with these trades.

(3) Represents the change in the fair value of foreign exchange forward contracts used to economically reduce our foreign exchange exposure related to certain foreign currency denominated instruments. Refer to revaluation of foreign currency instruments included in the line item "other" within noninterest income for the amount we were able to partially offset.

(4) Primarily represents the change in fair value of loan conversion options held by SVB Financial and our interest rate swap.

Net gains on derivative instruments were \$26.5 million for the three months ended September 30, 2014, compared to net gains of \$9.4 million for the comparable 2013 period. The increase in net gains on derivative instruments was primarily attributable to the following:

Net gains on equity warrant assets of \$13.2 million for the three months ended September 30, 2014, compared to \$18.8 million for the comparable 2013 period. The \$5.6 million decrease was primarily due to net gains of \$6.4 million from increases in warrant valuations, primarily attributable to our private company warrant portfolio, compared to net gains of \$14.5 million for the comparable 2013 period, from increases in warrant valuations, primarily attributable to our public company warrant portfolio which included FireEye and Twitter warrants.

Net gains of \$12.5 million on foreign exchange forward contracts hedging certain of our foreign currency denominated instruments for the three months ended September 30, 2014, compared to net losses of \$8.4 million for the comparable 2013 period. The higher gains for the three months ended September 30, 2014 were primarily attributable to the strengthening of the U.S. Dollar against the Euro and Pound Sterling. These gains are offset by losses of \$12.6 million from the revaluation of foreign currency denominated instruments that are included in the line item "other" within noninterest income as noted below.

Net gains on derivative instruments were \$63.5 million for the nine months ended September 30, 2014, compared to net gains of \$27.8 million for the comparable 2013 period. The increase in net gains on derivative instruments was primarily attributable to the following:

• Net gains on equity warrant assets of \$50.9 million for the nine months ended September 30, 2014, compared to \$29.5 million for the comparable 2013 period. The \$21.4 million increase was primarily due to net gains of \$28.7

Table of Contents

million from the exercise of equity warrant assets, primarily reflective of the exercise and conversion of several of our public equity warrants including, FireEye and Twitter, compared to \$6.9 million for the comparable 2013 period. Net gains of \$12.0 million on foreign exchange forward contracts hedging certain of our foreign currency denominated instruments for the nine months ended September 30, 2014, compared to net losses of \$1.5 million for the comparable 2013 period. The gains recognized for the nine months ended September 30, 2014 were primarily attributable to the strengthening of the U.S. Dollar against the Euro and Pound Sterling, however, the gains are offset by losses of \$12.3 million from the revaluation of foreign currency denominated instruments that are included in the line item "other" within noninterest income as noted below.

Foreign Exchange Fees

Foreign exchange fees were \$17.9 million and \$53.0 million for the three and nine months ended September 30, 2014, respectively, compared to \$13.7 million and \$41.5 million for the comparable 2013 periods. The increase was primarily due to increased utilization of foreign currency products by our clients, resulting in an increase in the number of trades and commissioned notional volumes.

Credit Card Fees

Credit card fees were \$10.9 million and \$31.4 million for the three and nine months ended September 30, 2014, respectively, compared to \$8.2 million and \$23.2 million for the comparable 2013 periods. The increase reflects increased client utilization of our credit card products and custom payment solutions by new and existing clients.

Deposit Service Charges

Deposit service charges were \$10.1 million and \$29.3 million for the three and nine months ended September 30, 2014, respectively, compared to \$8.9 million and \$26.6 million for the comparable 2013 periods. The increases are reflective of the increase in the number of deposit clients, as well as increases in transaction volumes and size, during the three and nine months ended September 30, 2014.

Lending Related Fees

Lending related fees were \$6.0 million and \$18.2 million for the three and nine months ended September 30, 2014, respectively, compared to \$5.3 million and \$13.8 million for the comparable 2013 periods. The increase was primarily due to an increase in unused commitment fees as our loan commitments available for funding balance increased from \$9.8 billion to \$13.5 billion.

Client Investment Fees

Client investment fees were \$3.8 million and \$10.8 million for the three and nine months ended September 30, 2014, respectively, compared to \$3.4 million and \$10.4 million for the comparable 2013 periods. The nominal change was reflective of lower margins earned on certain products due to low rates in the short-term fixed income markets. There was an increase in average client investment funds driven by our clients' increased utilization of our off-balance sheet products managed by SVB Asset Management, as well as our cash sweep product. The increases in average balances were partially offset by historically low yields on certain products. The following table summarizes average client investment funds for the three and nine months ended September 30, 2014 and 2013:

(Dollars in millions)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Client directed investment assets (1)	\$7,168	\$7,412	(3.3)%	\$7,288	\$7,052	3.3%
Client investment assets under management (2)	17,006	11,925	42.6	15,541	11,577	34.2
Sweep money market funds	6,814	5,622	21.2	6,597	4,920	34.1
Total average client investment funds (3)	\$30,988	\$24,959	24.2	\$29,426	\$23,549	25.0

(1) Comprised of mutual funds and Repurchase Agreement Program assets.

(2) These funds represent investments in third party money market mutual funds and fixed-income securities managed by SVB Asset Management.

(3) Client investment funds are maintained at third party financial institutions and are not recorded on our balance sheet.

Table of Contents

The following table summarizes period-end client investment funds at September 30, 2014 and December 31, 2013:

(Dollars in millions)	September 30, 2014	December 31, 2013	% Change
Client directed investment assets	\$6,491	\$7,073	(8.2)%
Client investment assets under management	17,376	12,677	37.1
Sweep money market funds	7,277	6,613	10.0
Total period-end client investment funds	\$31,144	\$26,363	18.1

Other Noninterest (Loss) Income

A summary of other noninterest income for the three and nine months ended September 30, 2014 and 2013 is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Fund management fees	\$3,574	\$2,822	26.6 %	\$9,888	\$8,531	15.9 %
Service-based fee income	2,180	1,901	14.7	6,459	5,706	13.2
(Losses) gains on revaluation of foreign currency instruments (1)	(12,640)	8,069	NM	(12,347)	444	NM
Other (2)	1,525	4,369	(65.1)	10,601	9,667	9.7
Total other noninterest (loss) income	\$(5,361)	\$17,161	(131.2)	\$14,601	\$24,348	(40.0)

NM—Not meaningful

Represents the revaluation of foreign currency denominated financial instruments issued and held by us, primarily (1) loans, deposits and cash. These instruments partially offset the impact of changes in internal foreign exchange forward contracts. Refer to internal foreign exchange forward contracts, net included within gains on derivative instruments as noted above.

(2)Includes dividends on FHLB/FRB stock, correspondent bank rebate income and other fee income.

Total loss in other noninterest income was \$5.4 million for the three months ended September 30, 2014, compared to income of \$17.2 million for the comparable 2013 period. The income in other noninterest income was \$14.6 million for the nine months ended September 30, 2014, compared to \$24.3 million for the comparable 2013 period. The decreases of \$22.6 million and \$9.7 million for the three and nine months ended September 30, 2014, respectively, were primarily due to losses of \$12.6 million and \$12.3 million, respectively, from the revaluation of foreign currency instruments, compared to net gains of \$8.1 million and \$0.4 million, respectively, for the comparable periods of 2013. The losses from the revaluation of foreign currency instruments were offset by net gains of \$12.5 million and \$12.0 million for the three and nine months ended September 30, 2014, respectively, compared to net losses of \$8.4 million and \$1.5 million, respectively for the comparable periods of 2013, on internal foreign exchange forward contracts economically hedging certain of these instruments, which are included within noninterest income in the line item "gains on derivative instruments" as noted above.

Overall Summary of Investments in FireEye

Our FireEye-related investments held during the third quarter of 2014 were primarily shares of FireEye common stock ("FireEye Shares") held by our managed direct venture funds from prior investments. As of September 30, 2014, our managed funds (including SVB Financial's interest) held approximately 4.9 million shares of FireEye Shares.

During the nine months ended September 30, 2014, net losses, related to FireEye Shares held by our managed direct venture funds, were \$21.7 million (\$4.2 million net of noncontrolling interests) and primarily consisted of unrealized losses resulting from the decline in the common stock price of FireEye.

As of September 30, 2014, our managed funds (including SVB Financial's interest) held approximately 4.9 million shares of FireEye common stock ("FireEye Shares"). From September 30, 2014 to November 5, 2014, the market share price of FireEye's common stock has slightly decreased from \$30.56 to \$30.04 and as such there has not been a significant decline in the valuation of our remaining FireEye related investments.

Investment gains (or losses) relating to the remaining 4.9 million FireEye Shares held by our managed funds are based on valuation changes or the sale of any securities, and are subject to FireEye's stock price, which is subject to market conditions and

Table of Contents

various other factors. Additionally, any future gains and losses reported above with respect to the remaining shares held by our managed funds at September 30, 2014 are currently unrealized, and the extent such gains (or losses) will become realized is subject to a variety of factors, including among other things, changes in prevailing market prices and the timing of any sales or distribution of securities, which are subject to our funds' separate discretionary securities sales/distribution governance processes.

Noninterest Expense

A summary of noninterest expense for the three and nine months ended September 30, 2014 and 2013 is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Compensation and benefits	\$99,932	\$96,869	3.2	\$302,259	\$270,315	11.8
Professional services	26,081	18,966	37.5	68,383	52,759	29.6
Premises and equipment	12,631	12,171	3.8	36,267	34,298	5.7
Business development and travel	10,022	7,378	35.8	29,465	23,433	25.7
Net occupancy	7,437	5,898	26.1	22,436	17,460	28.5
FDIC assessments	4,587	2,913	57.5	13,660	9,148	49.3
Correspondent bank fees	3,278	2,906	12.8	9,755	9,009	8.3
Provision for unfunded credit commitments	2,225	2,774	(19.8)	5,533	6,135	(9.8)
Other	15,796	10,649	48.3	40,113	30,273	32.5
Total noninterest expense	\$181,989	\$160,524	13.4	\$527,871	\$452,830	16.6

Included in noninterest expense is expense attributable to noncontrolling interests. See below for a summary of non-GAAP noninterest expense and non-GAAP operating efficiency ratio, both of which exclude noncontrolling interests.

Non-GAAP Noninterest Expense

We use and report non-GAAP noninterest expense, non-GAAP taxable equivalent revenue and non-GAAP operating efficiency ratio, which excludes noncontrolling interests. We believe these non-GAAP financial measures, when taken together with the corresponding GAAP financial measures, provide meaningful supplemental information regarding our performance by: (i) excluding certain items that represent expenses attributable to investors other than us and our subsidiaries, or certain items that do not occur every reporting period; or (ii) providing additional information used by management that is not otherwise required by GAAP or other applicable requirements. Our management uses, and believes that investors benefit from referring to, these non-GAAP financial measures in assessing our operating results and when planning, forecasting and analyzing future periods. However, these non-GAAP financial measures should be considered in addition to, not as a substitute for or preferable to, financial measures prepared in accordance with GAAP. The table below provides a summary of non-GAAP noninterest expense and non-GAAP operating efficiency ratio, both net of noncontrolling interests for the three and nine months ended September 30, 2014 and 2013:

Table of Contents

	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Non-GAAP operating efficiency ratio, net of noncontrolling interests (Dollars in thousands, except ratios)						
GAAP noninterest expense	\$ 181,989	\$ 160,524	13.4 %	\$ 527,871	\$ 452,830	16.6 %
Less: amounts attributable to noncontrolling interests	4,743	3,290	44.2	13,331	9,017	47.8
Non-GAAP noninterest expense, net of noncontrolling interests	\$ 177,246	\$ 157,234	12.7	\$ 514,540	\$ 443,813	15.9
GAAP taxable equivalent net interest income	\$ 220,981	\$ 177,525	24.5	\$ 623,130	\$ 511,640	21.8
Less: income attributable to noncontrolling interests	9	19	(52.6)	12	63	(81.0)
Non-GAAP taxable equivalent net interest income, net of noncontrolling interests	\$ 220,972	\$ 177,506	24.5	\$ 623,118	\$ 511,577	21.8
GAAP noninterest income	\$ 80,167	\$ 257,650	(68.9)	\$ 404,602	\$ 434,493	(6.9)
Non-GAAP noninterest income, net of noncontrolling interests	75,256	105,820	(28.9)	248,298	229,422	8.2
GAAP taxable equivalent revenue	\$ 301,148	\$ 435,175	(30.8)	\$ 1,027,732	\$ 946,133	8.6
Non-GAAP taxable equivalent revenue, net of noncontrolling interests	\$ 296,228	\$ 283,326	4.6	\$ 871,416	\$ 740,999	17.6
GAAP operating efficiency ratio	60.43	% 36.89	% 63.8	51.36	% 47.86	% 7.3
Non-GAAP operating efficiency ratio (1)	59.83	% 55.50	% 7.8	59.05	% 59.89	% (1.4)

(1) The non-GAAP operating efficiency ratio is calculated by dividing non-GAAP noninterest expense, net of noncontrolling interests, by non-GAAP taxable-equivalent revenue, net of noncontrolling interests.

Compensation and Benefits Expense

The following table provides a summary of our compensation and benefits expense for the three and nine months ended September 30, 2014 and 2013:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Compensation and benefits						
Salaries and wages	\$ 47,106	\$ 39,926	18.0 %	\$ 136,616	\$ 118,458	15.3 %
Incentive compensation & ESOP	26,161	30,599	(14.5)	80,355	74,452	7.9
Other employee benefits (1)	26,665	26,344	1.2	85,288	77,405	10.2
Total compensation and benefits	\$ 99,932	\$ 96,869	3.2	\$ 302,259	\$ 270,315	11.8
Period-end full-time equivalent employees	1,881	1,683	11.8	1,881	1,683	11.8
Average full-time equivalent employees	1,850	1,675	10.4	1,784	1,662	7.3

(1) Other employee benefits includes employer payroll taxes, group health and life insurance, share-based compensation, 401(k), warrant and retention program plans, agency fees and other employee related expenses.

Compensation and benefits expense was \$99.9 million for the three months ended September 30, 2014, compared to \$96.9 million for the comparable 2013 period. The key changes in factors affecting compensation and benefits expense were as follows:

An increase of \$7.2 million in salaries and wages expense, primarily due to an increase in the number of average FTEs. Average FTEs increased by 175 to 1,850 FTEs for the three months ended September 30, 2014, compared to 1,675 FTEs for the comparable 2013 period, primarily to support our product development, operational and sales and advisory teams, as well as to support our commercial banking operations and initiatives.

A decrease of \$4.4 million in incentive compensation and ESOP expense, primarily reflective of current expectations for our internal performance targets for 2014.

Table of Contents

Compensation and benefits expense was \$302.3 million for the nine months ended September 30, 2014, compared to \$270.3 million for the comparable 2013 period. The key changes in factors affecting compensation and benefits expense were as follows:

An increase of \$18.2 million in salaries and wages expense, primarily due to an increase in the number of average FTEs. Average FTEs increased by 122 to 1,784 FTEs for the nine months ended September 30, 2014, compared to 1,662 FTEs for the comparable 2013 period.

An increase of \$5.9 million in incentive compensation and ESOP expense, primarily reflective of our continued strong performance in 2014 and an increase in the number of average FTEs compared to the nine months ended September 30, 2014.

An increase of \$7.9 million in other employee benefits, primarily due to an increase in share-based compensation expense mainly as a result of the increase in the valuation of our common stock as well as an increase in contract agency fees primarily supporting our commercial banking operations. These increases were offset by a decrease in warrant incentive compensation expense, which was higher in the third quarter of 2013 due to the impact of the increase in valuation related to FireEye after its IPO.

Our variable compensation plans primarily consist of our Incentive Compensation Plan, Direct Drive Incentive Compensation Plan, 401(k) and ESOP Plan, Retention Program and Warrant Incentive Plan (See descriptions in our 2013 Form 10-K). Total costs incurred under these plans were \$29.6 million and \$94.6 million for the three and nine months ended September 30, 2014, respectively, compared to \$36.4 million and \$89.4 million for the comparable 2013 periods, respectively. These amounts are included in total compensation and benefits expense discussed above.

Professional Services

Professional services expense was \$26.1 million and \$68.4 million for the three and nine months ended September 30, 2014, respectively, compared to \$19.0 million and \$52.8 million for the comparable 2013 periods. The increase was primarily due to increased activities to support our expansion of product offerings as well as our continued investment into ongoing business and IT infrastructure initiatives.

Business Development and Travel

Business development and travel was \$10.0 million and \$29.5 million for the three and nine months ended September 30, 2014, respectively, compared to \$7.4 million and \$23.4 million for the comparable 2013 periods. The increase was primarily due to an increase in client related events supporting the growth of our business as well as employee related expenses due to the increase in average FTEs.

Net Occupancy

Net occupancy expense was \$7.4 million and \$22.4 million for the three and nine months ended September 30, 2014, respectively, compared to \$5.9 million and \$17.5 million for the comparable 2013 periods. The increase was reflective of lease renewals at higher rates, reflective of market conditions, and the expansion of certain existing offices.

FDIC Assessments

FDIC assessments expense was \$4.6 million and \$13.7 million for the three and nine months ended September 30, 2014, respectively, compared to \$2.9 million and \$9.1 million for the comparable 2013 periods, respectively. The increase was primarily due to the increase of \$11.5 billion in average assets since the third quarter of 2013.

Provision for Unfunded Credit Commitments

We recorded a provision for unfunded credit commitments of \$2.2 million and \$5.5 million for the three and nine months ended September 30, 2014, respectively, compared to a provision of \$2.8 million and \$6.1 million for the comparable 2013 periods, respectively. The provision of \$2.2 million for the three months ended September 30, 2014 was primarily reflective of a \$1.1 billion increase in total unfunded commitments during the third quarter of 2014. The provision of \$5.5 million for the nine months ended September 30, 2014 was primarily reflective of a \$3.2 billion increase in total unfunded credit commitments during the nine months ended September 30, 2014.

Table of Contents

Other Noninterest Expense

A summary of other noninterest expense for the three and nine months ended September 30, 2014 and 2013 is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Client services	\$3,215	\$1,920	67.4 %	\$8,160	\$5,711	42.9 %
Tax credit fund amortization	2,228	1,519	46.7	6,758	4,174	61.9
Data processing services	2,229	2,020	10.3	6,497	5,814	11.7
Telephone	1,931	1,571	22.9	5,217	4,640	12.4
Postage and supplies	763	559	36.5	2,248	1,777	26.5
Dues and publications	719	399	80.2	1,852	1,302	42.2
Other	4,711	2,661	77.0	9,381	6,855	36.8
Total other noninterest expense	\$15,796	\$10,649	48.3	\$40,113	\$30,273	32.5

Other noninterest expense was \$15.8 million for the three months ended September 30, 2014, compared to \$10.6 million for the comparable 2013 period. The increase of \$5.2 million for the three month period was primarily due to a \$1.3 million increase in client services, related to increased transaction processing volumes and \$0.7 million increase in tax credit fund amortization expense reflective of approximately \$28.3 million in additional tax credit fund investment purchases since September 30, 2013 and \$0.7 million for increased marketing expense for advertising/promotion in new and existing markets, included in other.

Other noninterest expense was \$40.1 million for the nine months ended September 30, 2014, compared to \$30.3 million for the comparable 2013 period. The increase of \$9.8 million for the nine month period was primarily due to the increase in tax credit fund amortization expense of \$2.6 million reflective of approximately \$28.3 million in additional tax credit fund investment purchases since September 30, 2013 and an increase of \$2.4 million in client services expense, related to increased transaction processing volumes, and \$1.0 million for increased marketing expense for advertising/promotion in new and existing markets, included in other.

Net Income Attributable to Noncontrolling Interests

Included in net income is income and expense attributable to noncontrolling interests. The relevant amounts allocated to investors in our consolidated subsidiaries, other than us, are reflected under "Net Income Attributable to Noncontrolling Interests" on our statements of income.

In the table below, noninterest income consists primarily of investment gains and losses from our consolidated funds. Noninterest expense is primarily related to management fees paid by our managed funds to SVB Financial's subsidiaries as the funds' general partners. A summary of net income attributable to noncontrolling interests for the three and nine months ended September 30, 2014 and 2013 is as follows:

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Net interest income (1)	\$(9)	\$(19)	(52.6)%	\$(12)	\$(63)	(81.0)%
Noninterest income (1)	(1,185)	(169,126)	(99.3)	(159,362)	(223,912)	(28.8)
Noninterest expense (1)	4,743	3,290	44.2	13,331	9,017	47.8
Carried interest (loss) income (2)	(3,726)	17,296	(121.5)	3,058	18,841	(83.8)
Net income attributable to noncontrolling interests	\$(177)	\$(148,559)	(99.9)	\$(142,985)	\$(196,117)	(27.1)

(1) Represents noncontrolling interests' share in net interest income, noninterest income and noninterest expense.

(2) Represents the preferred allocation of income (or change in income) earned by us as the general partner of certain consolidated funds.

Net income attributable to noncontrolling interests was \$0.2 million for the third quarter of 2014, compared to \$148.6 million for the comparable 2013 period. Net income attributable to noncontrolling interests of \$0.2 million for the

third quarter of 2014 was primarily a result of the following:

• Noninterest income of \$1.2 million consisting primarily of the following:

70

Table of Contents

Net gains on investment securities (including carried interest) attributable to noncontrolling interests of \$6.8 million (\$3.1 million excluding carried interest) primarily from gains of \$38.2 million from our managed funds of funds partially offset by losses of \$31.4 million from our managed direct venture funds primarily related to the decline in the FireEye valuation. See "Results of Operations—Noninterest Income—Gains on Investment Securities, Net". The decrease of \$21.1 million in carried interest income, to a loss of \$3.7 million for the third quarter of 2014 compared to income of \$17.3 million for the comparable 2013 period, also primarily reflects the impact of the decline in FireEye valuations in our managed direct funds, and

Net losses attributable to noncontrolling interests of \$1.7 million, included in noninterest income, from foreign currency translation adjustments on our foreign investments, in our managed funds of funds, as a result of the significant increase in the value of the U.S. dollar during the third quarter of 2014.

Noninterest expense of \$4.7 million, primarily related to management fees paid by the noncontrolling interests to our subsidiaries that serve as the general partner.

Net income attributable to noncontrolling interests was \$143.0 million for the nine months ended September 30, 2014, compared to \$196.1 million for the comparable 2013 period. Net income attributable to noncontrolling interests of \$143.0 million for the nine months ended September 30, 2014 was primarily a result of the following:

Noninterest income of \$159.4 million consisting primarily of the following:

Net gains on investment securities (including carried interest) attributable to noncontrolling interests of \$158.1 million (\$161.1 million excluding carried interest) primarily from gains of \$175.1 million from our managed funds of funds partially offset by losses of \$17.1 million from our managed direct venture funds primarily related to the decline in the FireEye valuation. "Results of Operations—Noninterest Income—Gains on Investment Securities, Net". The decrease of \$15.7 million in carried interest income, to \$3.1 million for the nine months ended September 30, 2014 compared to \$18.8 million for the comparable 2013 period, also primarily reflects the impact of the decline in FireEye valuations in our managed direct funds, and

Net losses attributable to noncontrolling interests of \$1.5 million, included in noninterest income, from foreign currency translation adjustments on our foreign investments, in our managed funds of funds, as a result of the significant increase in the value of the U.S. dollar during the third quarter of 2014.

Noninterest expense of \$13.3 million, primarily related to management fees paid by the noncontrolling interests to our subsidiaries that serve as the general partner.

Table of Contents

Income Taxes

Our effective income tax expense rate was 38.2 percent for the three months ended September 30, 2014, compared to 41.2 percent for the three months ended September 30, 2013. The components of our tax rate were consistent for the third quarter and first three quarters of 2014 and 2013, respectively. Our effective income tax expense rate was 39.1 percent for the nine months ended September 30, 2014, compared to 39.8 percent for the comparable 2013 period. The decrease in our effective tax rate is primarily attributable to increased benefits recognized on tax-exempt investments as a result of additional purchases made during the three and nine months ended September 30, 2014.

Our effective tax rate is calculated by dividing income tax expense by the sum of income before income tax expense and the net income attributable to noncontrolling interests.

Operating Segment Results

Table of Contents

We have three segments for which we report our financial information: Global Commercial Bank, SVB Private Bank and SVB Capital.

We report segment information based on the “management” approach, which designates the internal reporting used by management for making decisions and assessing performance as the source of our reporting segments. Please refer to Note 10—“Segment Reporting” of the “Notes to Interim Consolidated Financial Statements (unaudited)” under Part I, Item 1 of this report for additional details.

Our primary source of revenue is from net interest income, which is primarily the difference between interest earned on loans, net of FTP, and interest paid on deposits, net of FTP. Accordingly, our segments are reported using net interest income, net of FTP. FTP is an internal measurement framework designed to assess the financial impact of a financial institution’s sources and uses of funds. It is the mechanism by which an earnings credit is given for deposits raised, and an earnings charge is made for funded loans.

We also evaluate performance based on provision for loan losses, noninterest income and noninterest expense, which are presented as components of segment operating profit or loss. In calculating each operating segment’s noninterest expense, we consider the direct costs incurred by the operating segment as well as certain allocated direct costs. As part of this review, we allocate certain corporate overhead costs to a corporate account. We do not allocate income taxes to our segments. Additionally, our management reporting model is predicated on average asset balances; therefore, period-end asset balances are not presented for segment reporting purposes.

Changes in an individual client’s primary relationship designation have resulted, and in the future may result, in the inclusion of certain clients in different segments in different periods. The following is our reportable segment information for the three and nine months ended September 30, 2014 and 2013:

Global Commercial Bank

(Dollars in thousands)	Three months ended September 30,			Nine months ended September 30,		
	2014	2013	% Change	2014	2013	% Change
Net interest income	\$187,184	\$162,371	15.3 %	\$541,375	\$465,893	16.2 %
Provision for loan losses	(16,185)	(11,633)	39.1	(18,833)	(36,030)	(47.7)
Noninterest income	57,756	49,991	15.5	169,414	144,893	16.9
Noninterest expense	(128,685)	(107,495)	19.7	(374,289)	(313,080)	19.6
Income before income tax expense	\$100,070	\$93,234	7.3	\$317,667	\$261,676	21.4
Total average loans, net of unearned income	\$10,192,945	\$8,576,443	18.8	\$9,917,115	\$8,175,626	21.3
Total average assets	31,809,853	21,336,583	49.1	28,828,400	20,732,425	39.0
Total average deposits	28,795,499	18,994,374	51.6	26,020,715	18,480,510	40.8

Three months ended September 30, 2014 compared to the three months ended September 30, 2013

Income before income tax expense from our Global Commercial Bank (“GCB”) increased to \$100.1 million for the three months ended September 30, 2014, compared to \$93.2 million for the comparable 2013 period. Income before income tax expense was primarily driven by higher net interest income due to strong average loan growth. The key components of GCB's performance for the three months ended September 30, 2014 compared to the comparable 2013 period are discussed below.

Net interest income from our GCB increased by \$24.8 million for the three months ended September 30, 2014, primarily due to a \$13.8 million increase in loan interest income resulting mainly from an increase in average loan balances, partially offset by lower loan yields. Additionally, GCB had a \$19.0 million increase in the FTP earned for deposits due to strong average deposit growth. These increases were partially offset by a \$4.0 million decrease in the FTP earned for deposits from decreases in market interest rates.

GCB had a provision for loan losses of \$16.2 million for the three months ended September 30, 2014, compared to \$11.6 million for the comparable 2013 period. The provision of \$16.2 million for the three months ended September 30, 2014 was primarily driven from net charge-offs, period-end loan growth and the change in composition of our performing loan portfolio, offset by a decrease in the reserve for impaired loans resulting from a decrease in impaired loan balances. The provision of \$11.6 million for the three months ended September 30, 2013 was primarily

attributable to net charge-offs, an increase in our reserve for impaired loans and period-end loan growth. Noninterest income increased by \$7.8 million for the three months ended September 30, 2014, primarily related to higher foreign exchange fees, credit card fees and deposit service charges. The increase in foreign exchange fees was primarily due to

73

Table of Contents

increased utilization of foreign currency products by our clients, resulting in an increase in the number of trades and commissioned notional volumes. The increase in credit card fees was primarily due to increases in client volumes and the addition of new credit card clients. The increase in deposit service charges is reflective of the increase in the number of deposit clients, as well as increases in transaction volumes and size.

Noninterest expense increased by \$21.2 million for the three months ended September 30, 2014, primarily due to increased activities to support our expansion of product offerings as well as our continued investment into ongoing business and IT infrastructure initiatives. Also, increases in compensation and benefits expenses related to our salaries and wages contributed to the increase. The increase in our salaries and wages expenses was primarily due to an increase in the average number of FTEs at GCB, which increased by 151 to 1,503 FTEs for the three months ended September 30, 2014, compared to 1,352 FTEs for the comparable 2013 period. The increase in average FTEs was attributable to increases in positions for product development, operational and sales and advisory, as well as to support our commercial banking operations and initiatives. Net occupancy costs for GCB also increased due to the impact of lease renewals at higher rates, reflective of market conditions, and the expansion of certain existing offices.

Nine months ended September 30, 2014 compared to the nine months ended September 30, 2013

Net interest income from our Global Commercial Bank (“GCB”) increased by \$75.5 million for the nine months ended September 30, 2014, primarily due to an increase in loan interest income resulting mainly from an increase in average loan balances and an increase in the FTP earned for deposits due to deposit growth. These increases were partially offset by a decrease in the FTP earned for deposits from decreases in market interest rates.

We had a provision for loan losses for GCB of \$18.8 million for the nine months ended September 30, 2014, compared to a provision of \$36.0 million for the comparable 2013 period. The provision of \$18.8 million for the nine months ended September 30, 2014 was primarily due to net charge-offs and period-end loan growth, offset by a decrease in our reserve for impaired loans due to a decrease in impaired loan balances and a reserve release reflective of improvement in the overall credit quality of gross performing loans. The provision for the comparable 2013 period was primarily attributable to net charge-offs, an increase in our reserve for impaired loans and, due to period-end loan growth.

Noninterest income increased by \$24.5 million for the nine months ended September 30, 2014, primarily due to an increase in foreign exchange fees, credit card fees and unused commitment fees. The increase in foreign exchange fees was primarily due to increased utilization of foreign currency products by our clients, resulting in an increase in the number of trades and commissioned notional volumes. The increase in credit card fees was primarily due to the addition of new credit card clients and an increase in client activity. The increase in unused commitment fees was primarily due to an increase in unfunded credit commitments.

Noninterest expense increased by \$61.2 million for the nine months ended September 30, 2014, primarily due to an increase in salaries and wages, net occupancy and professional services. The increase in salaries and wages was primarily due to an increase in the average number of FTEs at GCB, which increased by 107 to 1,448 for the nine months ended September 30, 2014, compared to 1,341 for the comparable 2013 period. The increase in average FTEs was attributable to increases in positions for product development, operational and sales and advisory, as well as to support our commercial banking operations and initiatives. The increase in professional services was due to increased activities to support our expansion of product offerings as well as our continued investment into ongoing business and IT infrastructure initiatives. Net occupancy costs increased due to the impact of lease renewals at higher rates, reflective of market conditions, and the expansion of certain existing offices.

Table of Contents

Three months ended September 30, 2014 compared to the three months ended September 30, 2013

Net interest income from SVB Private Bank increased by \$1.1 million for the three months ended September 30, 2014, primarily due to an increase in loan interest income resulting primarily from an increase in average loan balances and loan yields.

We had a provision for loan losses from SVB Private Bank of \$0.4 million for the three months ended September 30, 2014, primarily due to period-end loan growth. For the three months ended September 30, 2013, the reduction of loan losses of \$1.0 million was primarily due to a decrease in the reserve for impaired loans resulting from lower impaired loan balances.

Nine months ended September 30, 2014 compared to the nine months ended September 30, 2013

Net interest income from SVB Private Bank increased by \$5.3 million for the nine months ended September 30, 2014, primarily due to an increase in loan interest income resulting from an increase in average loan balances.

Noninterest expense increased by \$1.4 million for the nine months ended September 30, 2014, primarily driven by expenses related to our new Wealth Advisory practice.

NM - Not meaningful

SVB Capital's components of noninterest (loss) income primarily include net gains and losses on non-marketable and other securities, carried interest and fund management fees. All components of (loss) income before income tax expense discussed below are net of noncontrolling interests.

We experience variability in the performance of SVB Capital from quarter to quarter due to a number of factors, including changes in the values of our funds' underlying investments, changes in the amount of distributions and general economic and market conditions. Such variability may lead to volatility in the gains and losses from investment securities and cause our results to differ from period to period. Results for a particular period may not be indicative of future performance.

Three months ended September 30, 2014 compared to the three months ended September 30, 2013

SVB Capital had noninterest income of \$1.1 million for the three months ended September 30, 2014, compared to noninterest income of \$35.5 million for the comparable 2013 period. The decrease in noninterest income was primarily due to net losses on investment securities related to valuation declines. SVB Capital's components of noninterest income primarily include the following:

- Net losses on investment securities of \$2.1 million for the three months ended September 30, 2014, compared to net gains of \$31.8 million for the comparable 2013 period. The net losses on investment securities of \$2.1 million for the three months ended September 30, 2014 were primarily driven by unrealized valuation losses and reductions in carried interest allocations in two of our managed direct venture funds, related to FireEye. These losses were partially offset by gains from our managed funds of funds primarily related to unrealized valuation adjustments of two of our funds of funds and strategic and other investments, primarily driven by strong distributions from strategic venture capital fund investments.

Fund management fees of \$3.6 million and \$2.8 million for the three months ended September 30, 2014 and 2013, respectively. The increase is primarily due to the addition of the Capital Partners III, LP fund in 2014.

Nine months ended September 30, 2014 compared to the nine months ended September 30, 2013

Noninterest income decreased by \$12.6 million to \$35.6 million for the nine months ended September 30, 2014, primarily due to valuation declines in our investment securities. SVB Capital's components of noninterest income primarily include the following:

75

Table of Contents

Net gains on investment securities of \$25.4 million for the nine months ended September 30, 2014, compared to net gains of \$39.0 million for the comparable 2013 period. The net gains on investment securities of \$25.4 million for the nine months ended September 30, 2014 were primarily driven by unrealized valuation gains from our managed funds of funds and gains from our strategic and other investments, which were primarily driven by strong distributions from strategic venture capital fund investments as well as the sale of one of our direct equity investments, for which we recorded a realized gain of \$4.7 million, partially offset by losses from two of our managed direct venture funds, related to FireEye.

Fund management fees of \$9.9 million for the nine months ended September 30, 2014, compared to \$8.5 million for the comparable 2013 period. Fund management fees increased primarily due to the addition of the Capital Partners III, LP fund in 2014.

Consolidated Financial Condition

Our total assets, total liabilities and stockholders' equity were \$36.0 billion at September 30, 2014, an increase of \$9.6 billion, or 36.4 percent, compared to \$26.4 billion at December 31, 2013. Below is a summary of the individual components driving the changes in total assets, total liabilities and stockholders' equity.

Cash and Cash Equivalents

Cash and cash equivalents totaled \$1.9 billion at September 30, 2014, an increase of \$0.4 billion, or 21.7 percent, compared to \$1.5 billion at December 31, 2013. The increase was primarily reflective of a \$7.3 billion increase in average deposits and \$0.4 billion in net proceeds from our stock offering in the second quarter of 2014, offset by an increase of \$4.6 billion in average investment securities and \$1.7 billion in average loans.

As of September 30, 2014 and December 31, 2013, \$883 million and \$715 million, respectively, of our cash and due from banks was deposited at the Federal Reserve Bank and was earning interest at the Federal Funds target rate, and interest-earning deposits in other financial institutions were \$442 million and \$300 million, respectively.

Investment Securities

Investment securities totaled \$21.7 billion at September 30, 2014, an increase of \$8.1 billion, or 59.8 percent, compared to \$13.6 billion at December 31, 2013. Our investment securities portfolio consists of an available-for-sale securities portfolio and a held-to-maturity portfolio, both of which primarily represent interest-earning investment securities, and a non-marketable and other securities portfolio, which primarily represents investments managed as part of our funds management business. The increase of \$8.1 billion included an increase of \$8.0 billion in our fixed income securities portfolio as well as an increase of \$0.1 billion in non-marketable and other securities reflective of our significant deposit growth during the nine months ended September 30, 2014. The major components of the change are explained below.

Available-for-Sale Securities

Our available-for-sale securities portfolio is a fixed income investment portfolio that is managed to earn an appropriate portfolio yield over the long-term while maintaining sufficient liquidity and credit diversification as well as addressing our asset/

Table of Contents

liability management objectives. Available-for-sale securities were \$13.3 billion at September 30, 2014, an increase of \$1.3 billion, or 11.2 percent, compared to \$12.0 billion at December 31, 2013. The increase was due to purchases of new available-for-sale securities of \$8.1 billion, which were primarily comprised of fixed-rate U.S. Treasury securities, partially offset by a \$5.4 billion transfer of securities out of our available-for-sale securities portfolio into a held-to-maturity securities portfolio as discussed below and paydowns, scheduled maturities and called maturities of \$1.4 billion.

Securities classified as available-for-sale are carried at fair market value with changes in fair market value recorded as unrealized gains or losses in a separate component of shareholders equity.

Held-to-Maturity Securities

During the second quarter of 2014, we re-designated certain securities from the classification of "available-for-sale" to "held-to-maturity." The securities re-designated primarily consisted of agency-issued mortgage securities and CMOs with a total carrying value of \$5.4 billion at June 1, 2014. At the time of re-designation the securities had unrealized gains totaling \$22.5 million, net of tax, recorded in accumulated other comprehensive income and are being amortized over the life of the securities in a manner consistent with the amortization of a premium or discount. Our decision to re-designate the securities was based on our ability and intent to hold these securities to maturity. Factors used in assessing the ability to hold these securities to maturity were future liquidity needs and sources of funding.

Period-end held-to-maturity securities were \$6.7 billion at September 30, 2014. During the nine months ended of 2014, there were purchases of \$1.6 billion primarily comprised of agency-issued mortgage securities, partially offset by paydowns and maturities of \$0.3 billion. Average held-to-maturity securities were \$2.5 billion for the nine months ended at September 30, 2014.

Securities classified as held-to-maturity are accounted for at cost with no adjustments for changes in fair value. For securities re-designated as held-to-maturity from available-for-sale, the unrealized gains at the date of transfer will continue to be reported as a separate component of shareholders' equity and amortized as mentioned above.

Portfolio duration is a standard measure used to approximate changes in the market value of fixed income instruments due to a change in market interest rates. The measure is an estimate based on the level of current market interest rates, expectations for changes in the path of forward rates and the effect of forward rates on mortgage prepayment speed assumptions. As such, portfolio duration will fluctuate with changes in market interest rates. Changes in portfolio duration are also impacted by changes in the mix of longer versus shorter term-to-maturity securities. At September 30, 2014 and December 31, 2013, our estimated fixed income securities portfolio duration was 3.0 years and 3.3 years, respectively.

Non-Marketable and Other Securities

Our non-marketable and other securities portfolio primarily represents investments in venture capital and private equity funds, debt funds and private and public portfolio companies. A majority of these investments are managed through our SVB Capital funds business in funds of funds and direct venture and private equity funds. Included in our non-marketable and other securities carried under fair value accounting are amounts that are attributable to noncontrolling interests. We are required under GAAP to consolidate 100% of these investments that we are deemed to control, even though we may own less than 100% of such entities. See below for a summary of the carrying value (as reported) of non-marketable and other securities compared to the amounts attributable to SVBFG.

Non-marketable and other securities were \$1.7 billion at September 30, 2014, an increase of \$0.1 billion, or 6.8 percent, compared to \$1.6 billion at December 31, 2013. The increase was primarily attributable to valuation gains in our managed funds of funds driven by valuation gains in fund investments. The increase was partially offset by valuation declines in our managed direct venture funds primarily attributable to declines in the market share price of FireEye. The following table summarizes the carrying value (as reported) of non-marketable and other securities compared to the amounts attributable to SVBFG (which generally represents the carrying value times our ownership percentage) at September 30, 2014 and December 31, 2013:

Table of Contents

(Dollars in thousands)	September 30, 2014		December 31, 2013	
	Carrying value (as reported)	Amount attributable to SVBFG	Carrying value (as reported)	Amount attributable to SVBFG

(3)

Investments classified as other securities (fair value accounting) represent direct equity investments in public companies held by our consolidated funds. At September 30, 2014, the amount primarily includes total unrealized gains of \$143.8 million in one public company, FireEye. The extent such gains (or losses) will become realized is subject to a variety of factors,

Table of Contents

including among other things, changes in prevailing market prices and the timing of any sales or distribution of securities, which are subject to our funds' separate discretionary securities sales/distribution governance processes.

Volcker Rule

As discussed in "Business - Supervision and Regulation" under Item 1 of Part I of our 2013 Form 10-K, federal regulatory agencies adopted final rules implementing the Volcker Rule under the Dodd-Frank Act, which, among other things, restricts or limits banks and certain of their affiliates from sponsoring or having ownership interests in "covered funds" including venture capital and private equity funds. Under the regulations implementing the Volcker Rule, these prohibitions and restrictions will apply to SVB Financial, the Bank and any affiliate of SVB Financial or the Bank (including the SVB Capital funds). SVB Financial maintains investments in certain venture capital and private equity funds, which are covered funds under the Volcker Rule, that it did not organize; maintains investments in covered funds that it organized, which investments exceed a three percent per fund limit that is generally imposed by the Volcker Rule; and it has aggregate investments in covered funds that may exceed three percent of its Tier 1 capital, which is another limit generally imposed by the Volcker Rule. SVB Financial (including its affiliates) expects, therefore, that it will be required to reduce the level of its investments in covered funds and to forego investment opportunities in certain funds in the future. SVB Financial is generally required by the final rules to come into conformance with these requirements by July 2015. The time period to divest an investment that is not permitted by the final rule may be extended by the Federal Reserve Board for up to two one-year extensions (which may be granted on a case-by-case or industry-wide basis), and an additional extension of up to five years for ownership interests in funds that are considered illiquid. We intend to seek the maximum extensions (up to July 2022) available to us. However, there is no guarantee that the Federal Reserve Board will grant any of these extensions. If we are not successful in obtaining one or more of these extensions or if the Federal Reserve does not otherwise provide any relief of from the restrictions under the Volcker Rule, we may be forced to divest certain of our investments on terms that may not be favorable to us.

We currently estimate that the covered fund ownership interests that we hold which are prohibited by the Volcker Rule restrictions, have, as of September 30, 2014, an aggregate carrying value of approximately \$250 million (and an aggregate fair value of \$345 million). These covered fund ownership interests are our ownership interests (excluding any noncontrolling interests) in our consolidated managed funds and certain of our non-marketable securities. We continue to assess the financial impact of the Volcker Rule on our fund investments, as well as the impact of other Volcker Rule restrictions on other areas of our business. The actual and expected financial impact from these restrictions on our investments, if any, will be dependent on a variety of factors, including: our ability to obtain regulatory extensions; our ability to sell the investments; our carrying value at the time of any sale; the actual sales price realized; the timing of such sales; and any subsequently-issued regulatory guidance or interpretations of the rules. (See "Risk Factors" under Item 1A of Part I of our 2013 Form 10-K.)

Loans

Loans, net of unearned income were \$12.0 billion at September 30, 2014, an increase of \$1.1 billion, or 10.2 percent, compared to \$10.9 billion at December 31, 2013. Unearned income was \$95 million at September 30, 2014 and \$89 million at December 31, 2013. Total gross loans were \$12.1 billion at September 30, 2014, an increase of \$1.1 billion, or 10.2 percent, compared to \$11.0 billion at December 31, 2013. Period-end loan growth came primarily from our technology and life sciences and venture capital/private equity loan portfolios. The breakdown of total gross loans and total loans as a percentage of total gross loans by category is as follows:

Table of Contents

(Dollars in thousands)	September 30, 2014		December 31, 2013		
	Amount	Percentage	Amount	Percentage	
Commercial loans:					
Software	\$4,545,324	37.5	% \$4,141,358	37.7	%

Total gross loans	\$3,144,211	\$1,721,554	\$1,908,739	\$1,613,025	\$2,607,739	\$10,995,268

At December 31, 2013, gross loans equal to or greater than \$20 million to any single client (individually or in the aggregate) totaled \$4.2 billion, or 38.4 percent of our portfolio. These loans represented 122 clients, and of these loans, none were on nonaccrual status as of December 31, 2013.

The credit profile of our clients varies across our loan portfolio, based on the nature of the lending we do for different market segments. Our technology and life sciences loan portfolio includes loans to clients at all stages of their life cycles, beginning with our SVB Accelerator practice, which serves our emerging or early-stage clients. Loans provided to early-stage clients represent a relatively small percentage of our overall portfolio at 10.5 percent of total gross loans at September 30, 2014, compared to 9.2 percent at December 31, 2013. Typically these loans are made to companies with modest or negative cash flows and no established record of profitable operations. Repayment of these loans may be dependent upon receipt by borrowers of additional equity financing from venture capitalist firms or others, or in some cases, a successful sale to a third party or an IPO. Venture capital firms may provide financing at lower levels, more selectively or on less favorable terms, which may have an adverse effect on our borrowers that are otherwise dependent on such financing to repay their loans to us. When repayment is dependent upon the next round of venture investment and there is an indication that further investment is unlikely or will not occur, it is often likely the company would need to be sold to repay debt in full. If reasonable efforts have not yielded a likely buyer willing to repay all debt at the close of the sale or on commercially viable terms, the account will most likely be deemed to be impaired.

At September 30, 2014, our lending to venture capital/private equity firms represented 24.3 percent of total gross loans, compared to 21.9 percent of total gross loans at December 31, 2013. Many of these clients have capital call lines of credit, the repayment of which is dependent on the payment of capital calls by the underlying limited partner investors in the funds managed by these firms.

At September 30, 2014, sponsor-led buyout loans represented 15.5 percent of total gross loans, compared to 12.5 percent of total gross loans at December 31, 2013. These loans are typically larger in nature and repayment is generally dependent upon the cash flows of the acquired company. However, these loans are typically highly-secured and therefore carry lower credit risk. The increase from December 31, 2013 to September 30, 2014 was primarily due to the use, by us, of an expanded definition for loans in the sponsor-led buyout loan portfolio.

At September 30, 2014, our asset-based lending, which consists primarily of working capital lines and accounts receivable factoring represented 7.3 percent and 3.8 percent, respectively, of total gross loans, compared to 7.3 percent and 4.2 percent, respectively at December 31, 2013. The repayment of these arrangements is dependent on the financial condition, and payment ability, of third parties with whom our clients do business.

Approximately 36.3 percent of our outstanding total gross loan balances as of September 30, 2014 were to borrowers based in California compared to 39.7 percent as of December 31, 2013. Other than California, there are no states with gross loan balances greater than 10 percent.

Table of Contents

See generally “Risk Factors–Credit Risks” set forth under Item 1A, Part I in our 2013 Form 10-K.

Credit Quality Indicators

As of September 30, 2014, our criticized and impaired loans represented 6.5 percent of our total gross loans compared to 5.7 percent at December 31, 2013. A majority of our criticized loans are from our SVB Accelerator portfolio, serving our emerging or early stage clients. Loans to early stage clients make up 10.5 percent of our loan portfolio. It is common for an emerging or early stage client’s remaining liquidity to fall temporarily below the threshold for a pass-rated credit during its capital-raising period for a new round of funding. This situation typically lasts a limited number of weeks and, in our experience, generally resolves itself with a subsequent round of venture funding. As a result, we expect that each of our early-stage clients will be managed through our criticized portfolio during a portion of their life cycle. Criticized loan levels will continue to vary but are expected to remain within the current range.

Credit Quality and Allowance for Loan Losses

Nonperforming assets consist of loans on nonaccrual status, loans past due 90 days or more still accruing interest, and Other Real Estate Owned ("OREO") and other foreclosed assets. We measure all loans placed on nonaccrual status for impairment based on the fair value of the underlying collateral or the net present value of the expected cash flows. The table below sets forth certain data and ratios between nonperforming loans, nonperforming assets and the allowance for loan losses:

(Dollars in thousands)	September 30, 2014	December 31, 2013		
Gross nonperforming, past due, and restructured loans:				
Impaired loans	\$11,687	\$51,649		
Loans past due 90 days or more still accruing interest	125	99		
Total nonperforming loans	11,812	51,748		
OREO and other foreclosed assets	561	1,001		
Total nonperforming assets	\$12,373	\$52,749		
Performing TDRs	\$890	\$403		
Nonperforming loans as a percentage of total gross loans	0.10	%	0.47	%
Nonperforming assets as a percentage of total assets	0.03		0.20	
Allowance for loan losses	\$129,061	\$142,886		
As a percentage of total gross loans	1.07	%	1.30	%
As a percentage of total gross nonperforming loans	1,092.63		276.12	
Allowance for loan losses for impaired loans	\$2,325	\$21,277		
As a percentage of total gross loans	0.02	%	0.19	%
As a percentage of total gross nonperforming loans	19.68		41.12	
Allowance for loan losses for total gross performing loans	\$126,736	\$121,609		
As a percentage of total gross loans	1.05	%	1.11	%
As a percentage of total gross performing loans	1.05		1.11	
Total gross loans	\$12,112,474	\$10,995,268		
Total gross performing loans	12,100,662	10,943,520		
Reserve for unfunded credit commitments (1)	35,489	29,983		
As a percentage of total unfunded credit commitments	0.24	%	0.26	%
Total unfunded credit commitments (2)	\$14,631,637	\$11,470,722		

(1) The “Reserve for unfunded credit commitments” is included as a component of other liabilities. See “Provision for Unfunded Credit Commitments” above for a discussion of the changes to the reserve.

(2) Includes unfunded loan commitments and letters of credit.

Our allowance for loan losses as a percentage of total gross loans decreased to 1.07 percent at September 30, 2014, compared to 1.30 percent at December 31, 2013. This decrease was driven by a decrease in reserves for impaired

loans primarily due to repayments of impaired loans as well as the improvement in the credit quality of the gross performing loan portfolio. Our

82

Table of Contents

reserve percentage for performing loans decreased to 1.05 percent at September 30, 2014, compared to 1.11 percent at December 31, 2013, primarily due to the continued strong performance of our performing loan portfolio.

Our nonperforming loans were \$11.8 million at September 30, 2014, compared to \$51.7 million at December 31, 2013. Our impaired loan balance decreased \$40.0 million as a result of \$34.7 million in net repayments and \$21.1 million in charge-offs, offset by \$15.9 million in new impaired loans. The allowance for loan losses related to impaired loans was \$2.3 million at September 30, 2014, compared to \$21.3 million at December 31, 2013.

Average impaired loans for the three and nine months ended September 30, 2014 were \$15.0 million and \$25.8 million, respectively, compared to \$39.3 million and \$40.7 million for the comparable 2013 periods. If the impaired loans had not been impaired, \$0.2 million and \$1.0 million in interest income would have been recorded for the three and nine months ended September 30, 2014 compared to \$0.2 million and \$1.4 million for the comparable 2013 periods.

Accrued Interest Receivable and Other Assets

A summary of accrued interest receivable and other assets at September 30, 2014 and December 31, 2013 is as follows:

(Dollars in thousands)	September 30, 2014	December 31, 2013	% Change
Derivative assets, gross (1)	\$119,332	\$127,114	(6.1)%
Foreign exchange spot contract assets, gross	83,185	73,423	13.3
Accrued interest receivable	81,334	67,772	20.0
FHLB and Federal Reserve Bank stock	41,026	40,632	1.0
Accounts receivable	30,573	15,773	93.8
Deferred tax assets	40,525	68,237	(40.6)
Other assets	110,989	72,159	53.8
Total accrued interest receivable and other assets	\$506,964	\$465,110	9.0

(1) See “Derivatives” section below.

Foreign Exchange Spot Contract Assets

Foreign exchange spot contract assets represent unsettled client trades at the end of the period. The increase of \$9.8 million was primarily due to increased client trade activity at period-end, and is consistent with the increase in foreign exchange spot contract liabilities (see “Other Liabilities” section below).

Accrued Interest Receivable

Accrued interest receivable consists of interest on our investment securities and loans. The increase of \$13.6 million was primarily due to an increase in interest receivable on our loans due to an increase in our average loan portfolio as well as an increase in interest receivable on our investment securities from growth in our fixed income investment portfolio.

Net Deferred Tax Assets

As of September 30, 2014, we were in a net deferred tax asset position of \$40.5 million, compared to a net deferred tax asset position of \$68.2 million at December 31, 2013. The decrease in our net deferred tax asset position of \$27.7 million is primarily reflective of the increase in the fair value of our investment securities portfolio due to the decrease in period-end market interest rates.

Table of Contents

Derivatives

Derivative instruments are recorded as a component of other assets and other liabilities on the balance sheet. The following table provides a summary of derivative assets and liabilities, net at September 30, 2014 and December 31, 2013:

(Dollars in thousands)	September 30, 2014	December 31, 2013	% Change
Assets:			
Equity warrant assets	\$94,960	\$103,513	(8.3)%
Foreign exchange forward and option contracts	17,234	15,530	11.0
Interest rate swaps	4,965	6,492	(23.5)
Loan conversion options	—	314	(100.0)
Client interest rate derivatives	2,173	1,265	71.8
Total derivative assets	\$119,332	\$127,114	(6.1)
Liabilities:			
Foreign exchange forward and option contracts	\$(15,833)	\$(12,617)	25.5
Client interest rate derivatives	(2,317)	(1,396)	66.0
Total derivative liabilities	\$(18,150)	\$(14,013)	29.5

Equity Warrant Assets

In connection with negotiating credit facilities and certain other services, we often obtain rights to acquire stock in the form of equity warrant assets in primarily private, venture-backed companies in the technology and life science industries. At September 30, 2014, we held warrants in 1,415 companies, compared to 1,320 companies at December 31, 2013. The change in fair value of equity warrant assets is recorded in gains on derivatives instruments, net, in noninterest income, a component of consolidated net income. The following table provides a summary of transactions and valuation changes for equity warrant assets for the three and nine months ended September 30, 2014 and 2013:

(Dollars in thousands)	Three months ended September 30,		Nine months ended September 30,	
	2014	2013	2014	2013
Balance, beginning of period	\$88,905	\$76,584	\$103,513	\$74,272
New equity warrant assets	3,488	4,490	10,919	10,934
Non-cash increases in fair value	6,430	14,471	23,262	22,963
Exercised equity warrant assets (1)	(3,802)	(3,144)	(42,157)	(15,546)
Terminated equity warrant assets	(61)	(149)	(577)	(371)
Balance, end of period	\$94,960	\$92,252	\$94,960	\$92,252

(1) Includes the exercise of several of our public equity warrants, including FireEye and Twitter, during the nine months ended September 30, 2014.

Foreign Exchange Forward and Foreign Currency Option Contracts

We enter into foreign exchange forward contracts and foreign currency option contracts with clients involved in foreign activities, either as the purchaser or seller, depending upon the clients' need. For each forward or option contract entered into with our clients, we enter into an opposite way forward or option contract with a correspondent bank, which mitigates the risk of fluctuations in currency rates. We also enter into forward contracts with correspondent banks to economically reduce our foreign exchange exposure related to certain foreign currency denominated instruments. Revaluations of foreign currency denominated instruments are recorded in the line item "Other" as part of noninterest income, a component of consolidated net income. We have not experienced nonperformance by any of our counterparties and therefore have not incurred related losses. Further, we anticipate performance by all counterparties. As a result of cash collateral received, we did not have any net exposure for foreign exchange forward and foreign currency option contracts at September 30, 2014 and our net exposure at December 31,

2013 was \$2.9 million. For additional information on our foreign exchange forward contracts and foreign currency option contracts, see Note 8- "Derivative Financial Instruments" of the "Notes to the Consolidated Financial Statements" under Part I, Item I in this report.

Table of Contents

Interest Rate Swaps

For information on our interest rate swaps, see Note 8–“Derivative Financial Instruments” of the “Notes to Interim Consolidated Financial Statements (unaudited)” under Part I, Item 1 of this report.

Deposits

Deposits were \$31.1 billion at September 30, 2014, an increase of \$8.7 billion, or 38.5 percent, compared to \$22.5 billion at December 31, 2013. The increase was driven by increases in our noninterest-demand and money market deposits of \$6.6 billion and \$2.1 billion, respectively, primarily related to strong financing, IPO and M&A activity in 2014 resulting in increased balances from existing clients and also reflective of growth from new clients, including strong levels of early-stage and venture capital/private client additions. During the nine months ended September 30, 2014, we experienced significant growth in our deposit levels and expect to see continued growth into 2015. At September 30, 2014, 27.8 percent of our total deposits were interest-bearing deposits, compared to 29.3 percent at December 31, 2013.

At September 30, 2014, the aggregate balance of time deposit accounts individually equal to or greater than \$100,000 totaled \$147 million, compared to \$197 million at December 31, 2013. At September 30, 2014, all time deposit accounts individually equal to or greater than \$100,000 were scheduled to mature within one year. No material portion of our deposits has been obtained from a single depositor and the loss of any one depositor would not materially affect our business.

Short-Term Borrowings

Short-term borrowings were \$6.6 million at September 30, 2014, compared to \$5.1 million at December 31, 2013. The increase was due to an increase in the amount of collateral held from our counterparties in relation to exposures in our favor on outstanding derivative contracts.

Long-Term Debt

Our long-term debt was \$454 million at September 30, 2014 and \$455 million at December 31, 2013. As of both September 30, 2014 and December 31, 2013, long-term debt included our 5.375% Senior Notes, 6.05% Subordinated Notes and 7.0% Junior Subordinated Debentures. For more information on our long-term debt, see Note 7–“Short-term Borrowings and Long-Term Debt” of the “Notes to Interim Consolidated Financial Statements (unaudited).”

Other Liabilities

A summary of other liabilities at September 30, 2014 and December 31, 2013 is as follows:

(Dollars in thousands)	September 30, 2014	December 31, 2013	% Change	
Foreign exchange spot contract liabilities, gross	\$197,844	\$90,725	118.1	%
Accrued compensation	92,893	117,134	(20.7)
Reserve for unfunded credit commitments	35,489	29,983	18.4	
Derivative liabilities, gross (1)	18,150	14,013	29.5	
Other	173,086	152,731	13.3	
Total other liabilities	\$517,462	\$404,586	27.9	

(1) See “Derivatives” section above.

Foreign Exchange Spot Contract Liabilities

Foreign exchange spot contract liabilities represent unsettled client trades at the end of the period. The increase of \$107 million was primarily due to increased client trade activity at period-end, and is consistent with the increase in foreign exchange spot contract assets. (See “Accrued Interest Receivable and Other Assets” section above).

Accrued Compensation

Accrued compensation includes amounts for our Incentive Compensation Plan, Direct Drive Incentive Compensation Plan, Retention Program, Warrant Incentive Plan, ESOP/profit sharing and other compensation arrangements. The decrease of \$24.2 million was primarily the result of 2013 incentive compensation payouts during the first quarter of 2014, partially offset by additional accruals for the nine months ended September 30, 2014.

Table of Contents

Reserve for Unfunded Credit Commitments

Our reserve for unfunded credit commitments increased to \$35.5 million at September 30, 2014, compared to \$30.0 million at December 31, 2013, due primarily to a \$3.1 billion increase in unfunded credit commitments from \$11.5 billion to \$14.6 billion for the nine months ended September 30, 2014.

Noncontrolling Interests

Noncontrolling interests totaled \$1.2 billion and \$1.1 billion at September 30, 2014 and December 31, 2013, respectively. The increase of \$0.1 billion was primarily due to net income attributable to noncontrolling interests of \$143.0 million for the nine months ended September 30, 2014, driven by gains on investment securities and carried interest of \$175.1 million from our managed funds of funds, partially offset by losses of \$17.1 million from our managed direct venture funds.

Fair Value Measurements

The following table summarizes our financial assets and liabilities that are measured at fair value on a recurring basis as of September 30, 2014 and December 31, 2013.

(Dollars in thousands)	September 30, 2014		December 31, 2013		
	Total Balance	Level 3	Total Balance	Level 3	
Assets carried at fair value	\$14,756,807	\$1,216,171	\$13,331,120	\$1,314,951	
As a percentage of total assets	40.9	% 3.4	% 50.5	% 5.0	%
Liabilities carried at fair value	\$18,150	\$—	\$14,013	\$—	
As a percentage of total liabilities	0.1	% —	% 0.1	% —	%
	Level 1 and 2	Level 3	Level 1 and 2	Level 3	
Percentage of assets measured at fair value	91.8	% 8.2	% 90.1	% 9.9	%

As of September 30, 2014, our available-for-sale securities, consisting primarily of U.S. Treasuries, agency-issued mortgage-backed securities and debentures issued by the U.S. government and its agencies, totaled \$13.3 billion, or 90.4 percent of our portfolio of assets measured at fair value on a recurring basis, compared to \$12.0 billion, or 89.9 percent, as of December 31, 2013. With the exception of U.S. Treasuries, which are classified as Level 1, these instruments were classified as Level 2 because their valuations were based on indicative prices corroborated by observable market quotes or valuation techniques with all significant inputs derived from or corroborated by observable market data. The fair value of our available-for-sale securities portfolio is sensitive to changes in levels of market interest rates and market perceptions of credit quality of the underlying securities. Market valuations and impairment analyses on assets in the available-for-sale securities portfolio are reviewed and monitored on a quarterly basis. Assets valued using Level 2 measurements also include equity warrant assets in shares of public company capital stock, marketable securities, interest rate swaps, foreign exchange forward and option contracts, loan conversion options and client interest rate derivatives.

Financial assets valued using Level 3 measurements consist of our investments in venture capital and private equity funds and direct equity investments in privately and publicly held companies, as well as equity warrant assets in shares of private and public company capital stock.

During the three and nine months ended September 30, 2014, the Level 3 assets that are measured at fair value on a recurring basis experienced net realized and unrealized gains of \$62.8 million and \$355.9 million (which is inclusive of noncontrolling interest), respectively, primarily due to valuation increases in underlying fund investments in our managed funds and from our equity warrant assets, as well as gains from liquidity events and distributions. During the three and nine months ended September 30, 2013, the Level 3 assets that are measured at fair value on a recurring basis experienced net realized and unrealized gains of \$200.3 million and \$265.7 million (which is inclusive of noncontrolling interest), respectively.

The valuation of non-marketable securities and equity warrant assets in shares of private company capital stock is subject to significant judgment. The inherent uncertainty in the process of valuing securities for which a ready market does not exist may cause our estimated values of these securities to differ significantly from the values that would have been derived had a ready market for the securities existed, and those differences could be material. The timing and amount of changes in fair value, if any, of these financial instruments depend upon factors beyond our control, including the performance of the underlying companies, fluctuations in the market prices of the preferred or common

stock of the underlying companies, general volatility and interest rate market factors, and legal and contractual restrictions. The timing and amount of actual net proceeds, if any, from the disposition of these financial instruments depend upon factors beyond our control, including investor demand for IPOs, levels of M&A activity, legal and contractual restrictions on our ability to sell, and the perceived and actual performance of portfolio companies. All of these factors are difficult to predict and there can be no assurances that we will realize the full value of these securities, which could result in significant losses. (See “Risk Factors” set forth in our 2013 Form 10-K).

Capital Resources

We maintain an adequate capital base to support anticipated asset growth, operating needs and unexpected credit risks, and to ensure that SVB Financial and the Bank are in compliance with all regulatory capital guidelines. Our primary sources of new capital include retained earnings and proceeds from the sale and issuance of our capital stock or other securities. In consultation with the Finance Committee of our Board of Directors, management engages in regular capital planning processes in an effort to optimize the use of the capital available to us and to appropriately plan for our future capital needs. The capital plan considers capital needs for the foreseeable future and allocates capital to both existing and future business activities. Expected future use or activities for which capital may be set aside include balance sheet growth and associated relative increases in market or credit exposure, investment activity, potential product and business expansions, acquisitions and strategic or infrastructure investments. In addition, we conduct capital stress tests as part of our annual capital planning process. The stress tests allow us to assess the impact of adverse changes in the economy and interest rates on our capital adequacy position.

Common Stock

To support the continued growth of our balance sheet, during the second quarter of 2014, we issued and sold in a registered public offering 4,485,000 shares of common stock at a price of \$101.00 per share. We received net proceeds of \$434.9 million after deducting underwriting discounts and commissions, of which \$400 million was contributed to the Bank for capital purposes.

SVBFG Stockholders' Equity

SVBFG stockholders' equity totaled \$2.7 billion at September 30, 2014, an increase of \$0.7 billion, or 38.4 percent, compared to \$2.0 billion at December 31, 2013. This increase was primarily due to the \$434.9 million in proceeds received in conjunction with the common stock equity offering as mentioned above and net income of \$205.1 million for the nine months ended September 30, 2014. Additionally, the increase in the net balance of our accumulated other comprehensive income to \$18.7 million from a net loss of \$48.8 million at December 31, 2013, was primarily driven by a \$96.3 million increase in the fair value of our fixed income security portfolios (\$57.5 million net of tax), which resulted from a decrease in the period-end market interest rates for the nine months ended September 30, 2014. Funds generated through retained earnings are a significant source of capital and liquidity and are expected to continue to be so in the future.

Capital Ratios

Both SVB Financial and the Bank are subject to various capital adequacy guidelines issued by the Federal Reserve Board and the California Department of Financial Institutions. To be classified as “adequately capitalized” under these capital guidelines, minimum ratios for (i) total risk-based capital, (ii) tier 1 risk-based capital and (iii) tier 1 leverage ratio for bank holding companies and banks are 8.0%, 4.0% and 4.0%, respectively.

To be classified as “well capitalized” under these capital guidelines, minimum ratios for total risk-based capital and tier 1 risk-based capital for bank holding companies and banks are 10.0% and 6.0%, respectively. Under the same capital adequacy guidelines, a well-capitalized state member bank must maintain a minimum tier 1 leverage ratio of 5.0%.

There is no tier 1 leverage requirement for a holding company to be deemed well-capitalized.

Regulatory capital ratios for SVB Financial and the Bank exceeded minimum federal regulatory guidelines for a well-capitalized depository institution as of September 30, 2014 and December 31, 2013. Capital ratios for SVB Financial and the Bank, compared to the minimum regulatory ratios to be considered “well capitalized” and “adequately capitalized”, are set forth below:

Table of Contents

	September 30, 2014	December 31, 2013	Minimum ratio to be "Well Capitalized"	Minimum ratio to be "Adequately Capitalized"
SVB Financial:				
Total risk-based capital ratio	14.97	% 13.13	% 10.0	% 8.0
Tier 1 risk-based capital ratio	14.03	11.94	6.0	4.0
Tier 1 leverage ratio	8.22	8.31	N/A	4.0
Tangible common equity to tangible assets ratio (1)(2)	7.55	7.44	N/A	N/A
Tangible common equity to risk-weighted assets ratio (1)(2)	13.97	11.63	N/A	N/A
Bank:				
Total risk-based capital ratio	13.06	% 11.32	% 10.0	% 8.0
Tier 1 risk-based capital ratio	12.11	10.11	6.0	4.0
Tier 1 leverage ratio	7.05	7.04	5.0	4.0
Tangible common equity to tangible assets ratio (1)(2)	6.76	6.59	N/A	N/A
Tangible common equity to risk-weighted assets ratio (1)(2)	12.14	9.87	N/A	N/A

(1) See below for a reconciliation of non-GAAP tangible common equity to tangible assets and tangible common equity to risk-weighted assets.

(2) The Federal Reserve Bank has not issued any minimum guidelines for the tangible common equity to tangible assets ratio or the tangible common equity to risk-weighted assets ratio. However, we believe these ratios provide meaningful supplemental information regarding our capital levels and are therefore provided above.

Our total risk-based capital ratio and tier 1 capital ratio, for both SVB Financial and the Bank, increased compared to December 31, 2013, primarily reflective of growth in retained earnings and SVB Financial's common stock offering during May 2014, which resulted in the issuance of 4,485,000 shares and net proceeds of \$434.9 million, of which \$400 million was contributed to the Bank and had a positive impact on Bank level capital ratios. The increase in our total risk-based capital ratios and tier 1 risk-based capital ratios reflect the increase in regulatory capital partially offset by the increase in risk-weighted assets during the period, primarily due to growth in our loans and our period-end unfunded commitments. The tier 1 leverage ratio for SVB Financial decreased compared to December 31, 2013 due to the increase in total average assets during the period, primarily due to the significant growth in client deposits that flowed into our investment securities portfolio, cash and loans, which more than offset the increase in regulatory capital. Our tier 1 leverage ratio for the Bank held relatively flat as our growth in regulatory capital matched our growth in assets. We continue to target a tier 1 leverage ratio for the Bank generally between 7 and 8 percent; though we may, from time to time, manage at levels outside of the target range based on various considerations, including changes in assets or capital mix, market conditions and management's expectations. While we expect our earnings to support a meaningful amount of our deposit growth, we will continue to evaluate the options available to us to support our growth and tier 1 leverage ratio for the Bank, such as contributing cash from SVB Financial to the Bank or potentially raising capital, including debt securities. All of our capital ratios are above the levels to be considered "well capitalized" under banking regulations.

The tangible common equity to tangible assets ratio and the tangible common equity to risk-weighted assets ratios are not required by GAAP or applicable bank regulatory requirements. However, we believe these ratios provide meaningful supplemental information regarding our capital levels. Our management uses, and believes that investors benefit from referring to, these ratios in evaluating the adequacy of the Company's capital levels; however, this financial measure should be considered in addition to, not as a substitute for or preferable to, comparable financial

measures prepared in accordance with GAAP. These ratios are calculated by dividing total SVBFG stockholder's equity, by total period-end assets and risk-weighted assets, after reducing both amounts by acquired intangibles, if any. The manner in which this ratio is calculated varies among companies. Accordingly, our ratio is not necessarily comparable to similar measures of other companies. The following table provides a reconciliation of non-GAAP financial measures with financial measures defined by GAAP for SVB Financial and the Bank for the periods ending September 30, 2014 and December 31, 2013:

87

Table of Contents

	SVB Financial		Bank		
	September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013	
Non-GAAP tangible common equity and tangible assets (dollars in thousands, except ratios)					
GAAP SVBFG stockholders' equity	\$2,721,957	\$1,966,270	\$2,324,461	\$1,639,024	
Tangible common equity	\$2,721,957	\$1,966,270	\$2,324,461	\$1,639,024	
GAAP Total assets	\$36,041,007	\$26,417,189	\$34,363,687	\$24,854,119	
Tangible assets	\$36,041,007	\$26,417,189	\$34,363,687	\$24,854,119	
Risk-weighted assets	\$19,482,333	\$16,901,501	\$19,144,527	\$16,612,870	
Tangible common equity to tangible assets	7.55	% 7.44	% 6.76	% 6.59	%
Tangible common equity to risk-weighted assets	13.97	11.63	12.14	9.87	

The tangible common equity to tangible assets ratio increased for SVB Financial and the Bank due to increases in total equity. See "SVBFG Stockholders' Equity" above for further details on changes to the individual components of our equity balance.

For both SVB Financial and the Bank, the tangible common equity to risk-weighted assets ratios increased due to increases in total equity, partially offset by increases in risk-weighted assets, which primarily reflects growth in our loan balances and our period-end unfunded loan commitments.

Off-Balance Sheet Arrangements

In the normal course of business, we use financial instruments with off-balance sheet risk to meet the financing needs of our customers. These financial instruments include commitments to extend credit, commercial and standby letters of credit and commitments to invest in venture capital and private equity fund investments. These instruments involve, to varying degrees, elements of credit risk. Credit risk is defined as the possibility of sustaining a loss because other parties to the financial instrument fail to perform in accordance with the terms of the contract. For details of our commitments to extend credit, and commercial and standby letters of credit, please refer to Note 11—"Off-Balance Sheet Arrangements, Guarantees, and Other Commitments" of the "Notes to Interim Consolidated Financial Statements (unaudited)" under Part I, Item 1 of this report.

Commitments to Invest in Venture Capital/Private Equity Funds

Subject to applicable regulatory requirements, including the Volcker Rule, we make investments. We make commitments to invest in venture capital and private equity funds, which in turn make investments generally in, or in some cases make loans to, privately-held companies. Commitments to invest in these funds are generally made for a 10-year period from the inception of the fund. Although the limited partnership agreements governing these investments typically do not restrict the general partners from calling 100% of committed capital in one year, it is customary for these funds to generally call most of the capital commitments over 5 to 7 years; however in certain cases, the funds may not call 100% of committed capital over the life of the fund. The actual timing of future cash requirements to fund these commitments is generally dependent upon the investment cycle, overall market conditions, and the nature and type of industry in which the privately held companies operate.

For further details on our commitments to invest in venture capital and private equity funds, refer to Note 11—"Off-Balance Sheet Arrangements, Guarantees, and Other Commitments" of the "Notes to Interim Consolidated Financial Statements (unaudited)" under Part I, Item 1 of this report.

Liquidity

The objective of liquidity management is to ensure that funds are available in a timely manner to meet our financial obligations, including, as necessary, paying creditors, meeting depositors' needs, accommodating loan demand and growth, funding investments, repurchasing securities and other operating or capital needs, without incurring undue cost or risk, or causing a disruption to normal operating conditions.

We regularly assess the amount and likelihood of projected funding requirements through a review of factors such as historical deposit volatility and funding patterns, present and forecasted market and economic conditions, individual client funding needs, and existing and planned business activities. Our Asset/Liability Committee ("ALCO"), which is a management committee, provides oversight to the liquidity management process and recommends policy guidelines

for the approval of the Finance Committee of our Board of Directors, and courses of action to address our actual and projected liquidity needs.

Our deposit base is, and historically has been, our primary source of liquidity. Our deposit levels and cost of deposits may fluctuate from time to time due to a variety of factors, including market conditions, prevailing interest rates, changes in client deposit behaviors, availability of insurance protection, and our offering of deposit products. We may also offer more investment alternatives off the balance sheet which may impact deposit levels. At September 30, 2014, our period-end total deposit balances

Table of Contents

increased by \$8.6 billion to \$31.1 billion, compared to \$22.5 billion at December 31, 2013. The overall increase in deposit balances was due to the addition of new clients and increased fundraising activity by our venture capital/private equity clients.

Our liquidity requirements can also be met through the use of our portfolio of liquid assets. Our definition of liquid assets includes cash and cash equivalents in excess of the minimum levels necessary to carry out normal business operations, short-term investment securities maturing within one year, available-for-sale securities eligible and available for financing or pledging purposes with a maturity in excess of one year and anticipated near-term cash flows from investments.

On a stand-alone basis, SVB Financial's primary liquidity channels include dividends from the Bank, its portfolio of liquid assets, and its ability to raise debt and capital. The ability of the Bank to pay dividends is subject to certain regulations described in "Business—Supervision and Regulation—Restriction on Dividends" under Part I, Item 1 of our 2013 Form 10-K.

Consolidated Summary of Cash Flows

Below is a summary of our average cash position and statement of cash flows for the nine months ended September 30, 2014 and 2013. For further details, see our "Interim Consolidated Statements of Cash Flows" under Part I, Item 1 of this report.

(Dollars in thousands)	Nine months ended September 30,	
	2014	2013
Average cash and cash equivalents	\$2,930,003	\$1,317,455
Percentage of total average assets	9.3	% 5.9
Net cash provided by operating activities	\$207,207	\$98,042
Net cash (used for) provided by investing activities	(8,947,778) 124,879
Net cash provided by financing activities	9,074,329	710,840
Net increase in cash and cash equivalents	\$333,758	\$933,761

Average cash and cash equivalents increased by \$1.6 billion, or 122.4 percent, to \$2.9 billion for the nine months ended September 30, 2014, compared to \$1.3 billion for the comparable 2013 period. The increase was primarily due to the continued strong growth in client deposit balances. Average deposits increased by \$7.9 billion to \$26.9 billion for the nine months ended September 30, 2014, compared to \$19.0 billion for the comparable 2013 period.

Cash provided by operating activities was \$207 million for the nine months ended September 30, 2014, primarily reflective of net income before noncontrolling interests of \$348 million and an increase in cash from unsettled client purchases of foreign exchange spot contracts of \$97 million, partially offset by non-cash net gains on investment securities of \$172 million.

Cash used for investing activities of \$8.9 billion for the nine months ended September 30, 2014 included \$9.6 billion for purchases of fixed income securities and \$1.1 billion for the increase in loan balances, partially offset by \$1.7 billion from maturities and paydowns from our fixed income securities investments.

Cash provided by financing activities was \$9.1 billion for the nine months ended September 30, 2014, primarily reflective of a net increase of \$8.7 billion in deposits and \$435 million in proceeds received in conjunction with the common stock equity offering in the second quarter of 2014.

Cash and cash equivalents were \$1.9 billion at both, September 30, 2014 and September 30, 2013.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**Interest Rate Risk Management**

Market risk is defined as the risk of adverse fluctuations in the market value of financial instruments due to changes in market interest rates. Interest rate risk is our primary market risk and can result from timing and volume differences in the repricing of our rate-sensitive assets and liabilities, widening or tightening of credit spreads, changes in the general level of market interest rates and changes in the shape and level of the benchmark LIBOR/SWAP yield curve.

Additionally, changes in interest rates can influence the rate of principal prepayments on mortgage securities which affects the rate of amortization of purchase premiums and discounts. Other market risks include foreign currency exchange risk and equity price risk. These risks are not considered significant interest rate sensitive risks and no separate quantitative information concerning them is presented herein.

Interest rate risk is managed by our ALCO. ALCO reviews the market valuation and 12-month forward looking earnings sensitivity of assets and liabilities to changes in interest rates, structural changes in investment and funding portfolios, loan and deposit activity and current market conditions. Adherence to relevant policies, which are approved by the Finance Committee of our Board of Directors, is monitored on an ongoing basis.

Table of Contents

Management of interest rate risk is carried out primarily through strategies involving our fixed income securities portfolio, available funding channels and capital market activities. In addition, our policies permit the use of off-balance sheet derivative instruments to assist in managing interest rate risk.

We utilize a simulation model to perform sensitivity analysis on the economic value of equity and net interest income under a variety of interest rate scenarios, balance sheet forecasts and proposed strategies. The simulation model provides a dynamic assessment of interest rate sensitivity embedded in our balance sheet which measures the potential variability in forecasted results relating to changes in market interest rates over time. We review our interest rate risk position on a quarterly basis at a minimum.

Model Simulation and Sensitivity Analysis

One application of the aforementioned simulation model involves measurement of the impact of market interest rate changes on our economic value of equity ("EVE"). EVE is defined as the market value of assets, less the market value of liabilities, adjusted for any off-balance sheet items. A second application of the simulation model measures the impact of market interest rate changes on our net interest income ("NII") assuming a static balance sheet as of the period-end reporting date. The market interest rate changes that affect us are principally short-term interest rates and include the following: (1) National Prime and SVB Prime rates; (2) 1-month and 3-month LIBOR; and (3) Fed Funds target rate. Changes in these short-term rates impact interest earned on our variable rate loans, variable rate investment securities and balances held as cash and cash equivalents. Additionally, deposit pricing generally follows overall changes in short-term interest rates.

The following table presents our EVE and NII sensitivity exposure at September 30, 2014 and December 31, 2013, related to an instantaneous and sustained parallel shift in market interest rates of 100 and 200 basis points.

Change in interest rates (basis points)	Estimated		Estimated Increase/(Decrease)		Estimated		Estimated Increase/(Decrease)	
	EVE	In EVE	Amount	Percent	NII	Amount	Percent	
	(Dollars in thousands)							
September 30, 2014:								
+200	\$6,122,674	\$ 958,409	18.6	%	\$1,101,195	\$170,682	18.3	%
+100	5,655,385	491,120	9.5		1,009,031	78,518	8.4	
—	5,164,265	—	—		930,513	—	—	
-100	4,821,473	(342,792)	(6.6)		902,796	(27,717)	(3.0)	
-200	5,075,194	(89,071)	(1.7)		875,798	(54,715)	(5.9)	
December 31, 2013:								
+200	\$4,656,411	\$ 477,866	11.4	%	\$990,190	\$161,314	19.5	%
+100	4,382,397	203,852	4.9		899,336	70,460	8.5	
—	4,178,545	—	—		828,876	—	—	
-100	3,960,086	(218,459)	(5.2)		826,222	(2,654)	(0.3)	
-200	4,041,604	(136,941)	(3.3)		822,448	(6,428)	(0.8)	

Economic Value of Equity

The estimated EVE in the preceding table is based on a combination of valuation methodologies including a discounted cash flow analysis and a multi-path lattice based valuation. Both methodologies use publicly available market interest rates. The model simulations and calculations are highly assumption-dependent and will change regularly as our asset/liability structure changes, as interest rate environments evolve, and as we change our assumptions in response to relevant market or business circumstances. These calculations do not reflect the changes that we anticipate or may make to reduce our EVE exposure in response to a change in market interest rates as a part of our overall interest rate risk management strategy.

As with any method of measuring interest rate risk, certain limitations are inherent in the method of analysis presented in the preceding table. We are exposed to yield curve risk, prepayment risk and basis risk, which cannot be fully modeled and expressed using the above methodology. Accordingly, the results in the preceding table should not be relied upon as a precise indicator of actual results in the event of changing market interest rates. Additionally, the resulting EVE and NII estimates are not intended to represent, and should not be construed to represent the underlying

value. In addition, we assume different deposit balance decay rates for each interest rate scenario based on a historical deposit study of our clients.

Our base case EVE at September 30, 2014 increased from December 31, 2013 by \$986 million, primarily due to the change in balance sheet mix, offset by flatter market yield curves due to market conditions. The flatter market yield curve has a \$326

Table of Contents

million negative impact on the EVE, which offsets some of the positive impacts from the change in balance sheet mix. The change in balance sheet mix was reflective of period-end increases of \$8.0 billion in fixed income investment securities, and \$1.1 billion in loans, partially offset by an increase of \$8.7 billion in deposits. EVE sensitivity increased in both the simulated upward and downward interest rate movements due to the increase in fixed income securities and the \$6.6 billion increase in noninterest-bearing deposits. In the simulated downward 200 bps interest rate movement, a relatively smaller decrease in EVE is due to the limited market value impact on deposits. The limited impact on deposits is attributed to deposit rates being at or near their absolute floors and a relative increase deposit balances.

12-Month Net Interest Income Simulation

Our expected 12-month net interest income at September 30, 2014 increased by \$102 million as compared to December 31, 2013, primarily due to an increase in the period-end total interest earning assets attributable to an increase of \$8.0 billion in our fixed income securities portfolio and an increase of \$1.1 billion in our loans. These increases were partially offset by lower yields on investments and loans as well as an increase of \$2.1 billion in interest-bearing deposits. The slight change in the intermediate portion of the yield curve attributed \$7.4 million to the increase. Net interest income sensitivity in the simulated upward interest rate movement, measured as a percentage change from the base, decreased slightly due to growth in interest-bearing deposits offsetting some of the benefits from the upward rate movement. The NII sensitivity increased in the simulated downward interest rate movements due to a lower market yield curve compared to levels at December 31, 2013. The change in the market yield curve increased the estimated prepayment of mortgage securities, which are assumed to be reinvested at lower market rates and, in turn, reduce interest income earned.

The simulation model used in the above analysis embeds floors in our interest rate scenarios, which prevent model benchmark rates from moving below 0.0%. In addition, we assume different deposit balance decay rates for each interest rate scenario based on a historical deposit study of our clients. These assumptions may change in future periods based on management discretion. Actual changes in our deposit pricing strategies may differ from our current model assumptions and may have an impact on our overall sensitivity.

ITEM 4. CONTROLS AND PROCEDURES**Disclosure Controls and Procedures**

Disclosure controls and procedures are the controls and other procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized, and reported within the time periods specified in SEC rules and forms. Disclosure controls and procedures include, among other things, processes, controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of our most recently completed fiscal quarter, pursuant to Exchange Act Rule 13a-15(b). Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective.

Changes in Internal Control

There were no changes in our internal control over financial reporting identified in management's evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the period covered by this Quarterly Report on Form 10-Q that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
