Item 2.02 Results of Operations and Financial Condition.

On December 4, 2012, Big Lots, Inc. (“we,” “us” or “our”) issued a press release and conducted a conference call, both of which reported our third quarter fiscal 2012 unaudited results, provided an update on the status of our previously announced \$200 million share repurchase program, and updated guidance for fiscal 2012.

The press release and conference call both included “non-GAAP financial measures,” as that term is defined by Rule 101 of Regulation G (17 CFR Part 244) and Item 10 of Regulation S-K (17 CFR Part 229). Specifically, segment-level diluted earnings (loss) per share from continuing operations, a non-GAAP financial measure, was included. This non-GAAP financial measure reflects the portion of our consolidated diluted earnings per share that is attributable to the performance of each of our U.S. and Canadian segments. Additionally, the following non-GAAP financial measures were included: (i) adjusted gross margin; (ii) adjusted gross margin rate; (iii) adjusted operating profit; (iv) adjusted operating profit rate; (v) adjusted income tax expense; (vi) adjusted effective income tax rate; (vii) adjusted income from continuing operations; (viii) adjusted net income; (ix) adjusted diluted earnings per common share from continuing operations; and (x) adjusted diluted earnings per common share. These non-GAAP financial measures exclude from the most directly comparable financial measure calculated and presented in accordance with accounting principles generally accepted in the United States of America (“GAAP”), a non-cash, after-tax charge of approximately \$3.4 million, or \$0.06 per diluted share, incurred during the first quarter of fiscal 2012 in connection with an inventory accounting change associated with the implementation of new retail inventory systems. As required by Rule 100 of Regulation G and Item 10 of Regulation S-K, the press release, which was posted in the Investor Relations section of our website and referred to during the conference call, contained a presentation of the most directly comparable financial measure calculated and presented in accordance with GAAP and a reconciliation of the difference between the non-GAAP financial measure and the most directly comparable financial measure calculated and presented in accordance with GAAP.

Our management believes that disclosure of the segment-level non-GAAP financial measures provides useful information to investors because they separately reflect the portion of our consolidated diluted earnings per share that is attributable to the performance of each of our U.S. and Canadian segments. Our management also believes that disclosure of the non-GAAP financial measures that exclude the inventory charge provides useful information to investors because they present an alternative and more relevant method for measuring our operating performance, excluding a special item included in the most directly comparable GAAP financial measures, that our management believes is more indicative of our ongoing operating results and financial condition. These non-GAAP financial measures, along with the most directly comparable GAAP financial measures, are used by our management in evaluating our operating performance.

Non-GAAP financial measures should not be considered in isolation from, or as a substitute for, financial information presented in accordance with GAAP. Non-GAAP financial measures as reported by us may not be comparable to similarly titled items reported by other companies.
