SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2015

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-9210

OCCIDENTAL PETROLEUM CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

95-4035997

(I.R.S. Employer
Identification No.)

5 Greenway Plaza, Suite 110

Houston, Texas

(Address of principal executive offices)

77046

(Zip Code)

(713) 215-7000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. (See definition of "accelerated filer", "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act)

Yes No

Edgar Filing: OCCIDENTAL PETROLEUM CORP /DE/ - Form 10-Q

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Class	Outstanding at September 30, 2015
Common stock \$.20 par value	763,735,871

OCCIDENTAL PETROLEUM CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS
SEPTEMBER 30, 2015

1. General

In these unaudited consolidated condensed financial statements, "Occidental" means Occidental Petroleum Corporation, a Delaware corporation (OPC), or OPC and one or more entities in which it owns a controlling interest (subsidiaries). Occidental has made its disclosures in accordance with United States generally accepted accounting principles (GAAP) as they apply to interim reporting, and condensed or omitted, as permitted by the Securities and Exchange Commission's rules and regulations, certain information and disclosures normally included in consolidated financial statements and the notes. These unaudited consolidated condensed financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto in Occidental's Annual Report on Form 10-K for the year ended December 31, 2014.

In the opinion of Occidental's management, the accompanying unaudited consolidated condensed financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to fairly present Occidental's consolidated financial position as of September 30, 2015, and the consolidated statements of operations, comprehensive income and cash flows for the three and nine months ended September 30, 2015 and 2014, as applicable. The income and cash flows for the periods ended September 30, 2015 and 2014 are not necessarily indicative of the income or cash flows to be expected for the full year.

As a result of the spin-off of California Resources Corporation (California Resources), the statements of operations and cash flows related to California Resources have been treated as discontinued operations for the three and nine months ended September 30, 2014. The assets and liabilities of California Resources were removed from Occidental's consolidated balance sheet as of November 30, 2014. See Note 2, Asset Acquisitions, Dispositions and Other, for additional information.

2. Asset Acquisitions, Dispositions and Other

In October 2015, Occidental completed the sale of its Westwood building in Los Angeles, California for net proceeds of \$65 million. As of September 30, 2015, the Westwood building has been classified as held for sale.

In September 2015, Occidental entered into a sales agreement to sell its Williston operations in North Dakota. Occidental recorded a pre-tax impairment charge for \$763 million to write down the value of the Williston operations to the sales price and has classified the Williston assets and liabilities as held for sale. The transaction is expected to be completed in November 2015.

In June 2015, Occidental issued \$1.5 billion of debt that was comprised of \$750 million of 3.50-percent senior unsecured notes due 2025 and \$750 million of 4.625-percent senior unsecured notes due 2045. Occidental received net proceeds of approximately \$1.48 billion. Interest on the notes will be payable semi-annually in arrears in June and December of each year for both series of notes, beginning on December 15, 2015.

On November 30, 2014, the spin-off of Occidental's California oil and gas operations and related assets was completed through the distribution of 81.3 percent of the outstanding shares of common stock of California Resources to holders of Occidental common stock, creating an independent, publicly traded company. In connection with the spin-off, California Resources distributed to Occidental \$4.95 billion in restricted cash and \$1.15 billion in unrestricted cash. Occidental retained 71.5 million shares of California Resources. See Note 9, Fair Value Measurements, for additional information. In order to maintain the tax-free nature of the spin-off, the \$4.95 billion in

restricted cash must be used solely to pay dividends, repurchase common stock, repay debt, or a combination of the foregoing within 18 months following the distribution. The retained California Resources shares must be exchanged for Occidental shares or distributed by June 1, 2016. At September 30, 2015, the remaining balance of the restricted cash distribution was \$1.8 billion and was presented as "Restricted cash" on the consolidated balance sheet.

Sales and other operating revenues and income from discontinued operations related to California Resources for the three and nine months ended September 30, 2014 were as follows (in millions):

	Three months ended September 30	Nine months ended September 30
Sales and other operating revenue from discontinued operations	\$1,092	\$3,353
Income from discontinued operations before-tax	\$334	\$1,146
Income tax expense	(118) (404
Income from discontinued operations	\$216	\$742

3. Accounting and Disclosure Changes

In September 2015, the Financial Accounting Standards Board (FASB) issued rules removing the obligation for a business acquirer to retrospectively recognize adjustments to provisional amounts that were identified during the measurement period of a business combination. Under the new rules, the acquirer is required to record in the same period's financial statements the effect on earnings as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. The rules become effective for interim and annual periods beginning after December 15, 2015. The rules are not expected to have a significant impact on Occidental's financial statements upon adoption.

In August 2015, the FASB issued rules to defer the effective date of the new revenue recognition standard to interim and annual periods beginning after December 15, 2017. Under the new rules, an entity will recognize revenue when it transfers promised goods or services to customers in an amount that reflects what it expects to receive in exchange for the goods and services. The new rules also require more detailed disclosures related to the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The rules are not expected to have a significant impact on Occidental's financial statements upon adoption.

In May 2015, the FASB issued rules modifying how entities measure certain investments at net asset value as well as how they are categorized within the fair value hierarchy. The new rules remove the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share. The update also removes the requirement for certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practice, and instead requires it for only those investments the entity elects to measure as such. The rules become effective for fiscal years, and for interim periods, beginning after December 15, 2015. The rules will not have a significant impact on Occidental's financial statements.

In April 2015, the FASB issued rules simplifying the presentation of debt issuance costs. The new rules require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The rules become effective for fiscal years, and for interim periods, beginning after December 15, 2015. The rules will not have a significant impact on Occidental's financial statements.

In February 2015, the FASB issued rules modifying how an entity should evaluate certain legal entities for consolidation. The modifications change how limited partnerships and similar legal entities are evaluated, eliminate the presumption that a general partner should consolidate limited partnerships, change the consolidation analysis for reporting entities that are involved with variable interest entities, and change the scope exception for certain legal entities, among other things. The rules become effective for fiscal years, and for interim periods, beginning after December 15, 2015. The rules are not expected to have an impact on Occidental's financial statements upon adoption.

In January 2015, the FASB issued rules that eliminate from GAAP the concept of an extraordinary item. The presentation and disclosure guidance for items that are unusual in nature or occur infrequently will be retained and expanded to include items that are both unusual in nature and infrequently occurring. The rules do not impact Occidental's financial statements upon adoption.

4. Supplemental Cash Flow Information

Occidental paid United States federal, state and foreign income taxes of \$0.8 billion and \$2.6 billion during the nine months ended September 30, 2015 and 2014, respectively. Interest paid totaled \$0.2 billion in each of the nine months ended September 30, 2015 and 2014.

5. Inventories

A portion of inventories is valued under the LIFO method. The valuation of LIFO inventory for interim periods is based on Occidental's estimates of year-end inventory levels and costs. Inventories as of September 30, 2015 and December 31, 2014 consisted of the following (in millions):

	2015	2014
Raw materials	\$69	\$71
Materials and supplies	601	585
Finished goods	541	485
	1,211	1,141
Revaluation to LIFO	(89) (89
Total	\$1,122	\$1,052

6. Environmental Liabilities and Expenditures

Occidental's operations are subject to stringent federal, state, local and foreign laws and regulations related to improving or maintaining environmental quality.

The laws that require or address environmental remediation, including the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and similar federal, state, local and foreign laws, may apply retroactively and regardless of fault, the legality of the original activities or the current ownership or control of sites. OPC or certain of its subsidiaries participate in or actively monitor a range of remedial activities and government or private proceedings under these laws with respect to alleged past practices at operating, closed and third-party sites. Remedial activities may include one or more of the following: investigation involving sampling, modeling, risk assessment or monitoring; cleanup measures including removal, treatment or disposal of hazardous substances; or operation and maintenance of remedial systems. Government or private proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties, injunctive relief and government oversight costs.

As of September 30, 2015, Occidental participated in or monitored remedial activities or proceedings at 148 sites. The following table presents Occidental's environmental remediation reserves as of September 30, 2015, the current portion of which is included in accrued liabilities (\$79 million) and the remainder in deferred credits and other liabilities — other (\$236 million). The reserves are grouped as environmental remediation sites listed or proposed for listing by the United States Environmental Protection Agency on the CERCLA National Priorities List (NPL sites) and three categories of non-NPL sites — third-party sites, Occidental-operated sites and closed or non-operated Occidental sites.

	Number of Sites	Reserve Balance (in millions)
NPL sites	33	\$21
Third-party sites	66	101

Edgar Filing: OCCIDENTAL PETROLEUM CORP /DE/ - Form 10-Q

Occidental-operated sites	18	102
Closed or non-operated Occidental sites	31	91
Total	148	\$315

9

As of September 30, 2015, Occidental's environmental reserves exceeded \$10 million each at 10 of the 148 sites described above, and 104 of the sites each had reserves of \$1 million or less. Based on current estimates, Occidental expects to expend funds corresponding to approximately half of the current environmental reserves at the sites described above over the next three to four years and the balance at these sites over the subsequent 10 or more years. Occidental believes its range of reasonably possible additional losses beyond those liabilities recorded for environmental remediation at these sites could be up to \$395 million. The status of Occidental's involvement with the sites and related significant assumptions has not changed materially since December 31, 2014. For additional information regarding environmental matters, refer to Note 7, Lawsuits, Claims, Commitments and Contingencies.

7. Lawsuits, Claims, Commitments and Contingencies

OPC or certain of its subsidiaries are involved, in the normal course of business, in lawsuits, claims and other legal proceedings that seek, among other things, compensation for alleged personal injury, breach of contract, property damage or other losses, punitive damages, civil penalties, or injunctive or declaratory relief. OPC or certain of its subsidiaries also are involved in proceedings under CERCLA and similar federal, state, local and foreign environmental laws. These environmental proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties and injunctive relief. Usually OPC or such subsidiaries are among many companies in these environmental proceedings and have to date been successful in sharing response costs with other financially sound companies. Further, some lawsuits, claims and legal proceedings involve acquired or disposed assets with respect to which a third party or Occidental retains liability or indemnifies the other party for conditions that existed prior to the transaction.

Occidental accrues reserves for outstanding lawsuits, claims and proceedings when it is probable that a liability has been incurred and the liability can be reasonably estimated. Occidental has disclosed its reserve balances for environmental matters. Reserve balances for other matters as of September 30, 2015 and December 31, 2014 were not material to Occidental's consolidated balance sheets. Occidental also evaluates the amount of reasonably possible losses that it could incur as a result of the matters mentioned above. Occidental has disclosed its range of reasonably possible additional losses for sites where it is a participant in environmental remediation. Occidental believes that other reasonably possible losses that it could incur in excess of reserves accrued on the balance sheet would not be material to its consolidated financial position or results of operations.

During the course of its operations, Occidental is subject to audit by tax authorities for varying periods in various federal, state, local and foreign tax jurisdictions. Although taxable years through 2009 for United States federal income tax purposes have been audited by the IRS pursuant to its Compliance Assurance Program, subsequent taxable years are currently under review. Additionally, in December 2012, Occidental filed United States federal refund claims for tax years 2008 and 2009, which are subject to IRS review. Taxable years from 2000 through the current year remain subject to examination by foreign and state government tax authorities in certain jurisdictions. In certain of these jurisdictions, tax authorities are in various stages of auditing Occidental's income taxes. During the course of tax audits, disputes have arisen and other disputes may arise as to facts and matters of law. Occidental believes that the resolution of outstanding tax matters would not have a material adverse effect on its consolidated financial position or results of operations.

OPC, its subsidiaries or both have indemnified various parties against specified liabilities those parties might incur in the future in connection with purchases and other transactions that they have entered into with Occidental. These indemnities usually are contingent upon the other party incurring liabilities that reach specified thresholds. As of September 30, 2015, Occidental is not aware of circumstances that it believes would reasonably be expected to lead to indemnity claims that would result in payments materially in excess of reserves.

8. Retirement and Post-retirement Benefit Plans

The following tables set forth the components of the net periodic benefit costs for Occidental's defined benefit pension and post-retirement benefit plans for the three and nine months ended September 30, 2015 and 2014 (in millions):

Three months ended September 30	2015		2014	
Net Periodic Benefit Costs	Pension Benefit	Post-retirement Benefit	Pension Benefit	Post-retirement Benefit
Service cost	\$2	\$7	\$3	\$7
Interest cost	5	10	6	10
Expected return on plan assets	(7) —	(8) —
Recognized actuarial loss	3	6	1	4
Total	\$3	\$23	\$2	\$21

Net Periodic Benefit Costs	Pension Benefit	Post-retirement Benefit	Pension Benefit	Post-retirement Benefit
Service cost	\$6	\$21	\$9	\$19
Interest cost	15	30	18	34
Expected return on plan assets	(21) —	(25) —
Recognized actuarial loss	7	20	4	16
Total	\$7	\$71	\$6	\$69

Occidental contributed approximately \$2 million and \$1 million to its defined benefit pension plans in the three-months ended September 30, 2015 and 2014, respectively. Occidental contributed approximately \$7 million and \$4 million in the nine months ended September 30, 2015 and 2014, respectively.

9. Fair Value Measurements

Occidental has categorized its assets and liabilities that are measured at fair value in a three-level fair value hierarchy, based on the inputs to the valuation techniques: Level 1 — using quoted prices in active markets for the assets or liabilities; Level 2 — using observable inputs other than quoted prices for the assets or liabilities; and Level 3 — using unobservable inputs. Transfers between levels, if any, are recognized at the end of each reporting period.

Fair Values — Recurring

Occidental primarily applies the market approach for recurring fair value measurements, maximizes its use of observable inputs and minimizes its use of unobservable inputs. Occidental utilizes the mid-point between bid and ask prices for valuing the majority of its assets and liabilities measured and reported at fair value. In addition to using market data, Occidental makes assumptions in valuing its assets and liabilities, including assumptions about the risks inherent in the inputs to the valuation technique. For assets and liabilities carried at fair value, Occidental measures fair value using the following methods:

Occidental values exchange-cleared commodity derivatives using closing prices provided by the exchange as of the balance sheet date. Those derivatives are classified as Level 1. Over-the-Counter (OTC) bilateral financial commodity contracts, foreign exchange contracts, options and physical commodity forward purchase and sale contracts are generally classified as Level 2 and are generally valued using quotations provided by brokers or industry-standard models that consider various inputs, including quoted forward prices for commodities, time value, volatility factors, credit risk and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these inputs are observable in the marketplace throughout the full term of the instrument, and can be derived from observable data or are supported by observable prices at which transactions are executed in the marketplace.

Occidental values commodity derivatives based on a market approach that considers various assumptions, including quoted forward commodity prices and market yield curves. The assumptions used include inputs that are generally unobservable in the marketplace, or are observable but have been adjusted based upon various assumptions and the fair value is designated as Level 3 within the valuation hierarchy.

Occidental values its available for sale investment in California Resources based on the closing share price of California Resources' common stock as of the balance sheet date. This investment is classified as Level 1. At September 30, 2015, Occidental had approximately 71.5 million shares of common stock of California Resources, which are recorded as a \$186 million available for sale investment. As a result of a declining trading price in the third quarter of 2015, Occidental has recorded unrealized losses of \$208 million in accumulated other comprehensive income for this available for sale investment. Occidental considers available evidence including the results of California Resources, the volatility of oil prices, recent unrealized gains and losses resulting from share price fluctuation, and other factors to determine whether the decline in value is other than temporary. Occidental has concluded the investment is not impaired at September 30, 2015.

Occidental generally uses an income approach to measure fair value when observable inputs are unavailable. This approach utilizes management's judgments regarding expectations of projected cash flows, and discounts those cash flows using a risk adjusted discount rate.

The following tables provide fair value measurement information for such assets and liabilities that are measured on a recurring basis as of September 30, 2015 and December 31, 2014 (in millions):

Fair Value Measurements at September 30, 2015:

Description	Level 1	Level 2	Level 3	Netting and Collateral	Total Fair Value
Assets:					
Commodity derivatives	\$235	\$51	\$—	\$(223)	\$63
Available for sale investment	\$186	\$—	\$—	\$—	\$186
Liabilities:					
Commodity derivatives	\$251	\$293	\$—	\$(240)	\$304

Fair Value Measurements at December 31, 2014:

Description	Level 1	Level 2	Level 3	Netting and Collateral	Total Fair Value
Assets:					
Commodity derivatives	\$712	\$127	\$—	\$(742)	\$97
Available for sale investment	\$394	\$—	\$—	\$—	\$394
Liabilities:					
Commodity derivatives	\$750	\$246	\$—	\$(756)	\$240

Fair Values — Nonrecurring

The following table provides fair value measurement for such proved domestic and international oil and gas properties that are measured on a nonrecurring basis as of September 30, 2015. Occidental considers the sales agreement to sell its Williston operations as Level 3 in the fair value hierarchy. The following table also includes those proved properties measured for impairment based on an income approach. The impairment tests, including the fair value estimation, incorporated a number of assumptions involving expectations of future cash flows. These assumptions included estimates of future product prices, which Occidental based on forward price curves and, where applicable, contractual prices, estimates of oil and gas reserves, estimates of future expected operating and development costs and a risk adjusted discount rate. These inputs are categorized as Level 3 in the fair value hierarchy. See Note 11, Industry Segments, for additional information.

Description	Fair Value Measurements at September 30, 2015 Using			Net Book Value	Total Pre-tax (a) (Non-cash) Impairment Loss
	Level 1	Level 2	Level 3		
Assets:					
Impaired proved oil and gas assets - domestic	\$—	\$—	\$1,071	\$2,654	\$1,583
Impaired proved oil and gas assets - international	\$—	\$—	\$466	\$1,767	\$1,301

(a) Amount represents net book value at date of assessment.

Other Financial Instruments

The carrying amounts of cash and cash equivalents and other on-balance-sheet financial instruments, other than long term fixed-rate debt, approximate fair value. The cost, if any, to terminate Occidental's off-balance-sheet financial instruments is not significant. Occidental estimates the fair value of fixed-rate debt based on the quoted market prices for those instruments or on quoted market yields for similarly rated debt instruments, taking into account such instruments' maturities. The estimated fair value of Occidental's debt as of September 30, 2015 and December 31, 2014 was \$8.7 billion and \$7.0 billion, respectively, and its carrying value net of unamortized discount as of September 30, 2015 and December 31, 2014 was \$8.3 billion and \$6.8 billion, respectively. The majority of Occidental's debt is classified as Level 1, with \$68 million classified as Level 2.

10. Derivatives

Derivatives are carried at fair value and on a net basis when a legal right of offset exists with the same counterparty. Occidental applies hedge accounting when transactions meet specified criteria for cash-flow hedge treatment and management elects and documents such treatment. Otherwise, any fair value gains or losses are recognized in earnings in the current period.

Occidental uses a variety of derivative instruments, including cash-flow hedges and derivative instruments not designated as hedging instruments, to obtain average prices for the relevant production month and to improve realized prices for oil and gas. Occidental only occasionally hedges its oil and gas production, and, when it does, the volumes are usually insignificant.

Cash-Flow Hedges

Occidental's marketing and trading operations, from time to time, store natural gas purchased from third parties at Occidental's North American leased storage facilities. Derivative instruments are used to fix margins on the future sales of the stored volumes through March 2016. As of September 30, 2015, Occidental had approximately 13 billion cubic feet of natural gas held in storage, and had cash-flow hedges for the forecast sale, to be settled by physical delivery, of approximately 6 billion cubic feet of stored natural gas. As of December 31, 2014, Occidental did not have any cash-flow hedges.

Occidental's after-tax gains and losses recognized in, and reclassified to income from, Accumulated Other Comprehensive Income (AOCI) for derivative instruments classified as cash-flow hedges for the three and nine months ended September 30, 2015 and 2014, and the ending AOCI balances for each period, were not material. The gains and losses reclassified to income were recognized in net sales, and the amount of the ineffective portion of cash-flow hedges was immaterial for the three and nine months ended September 30, 2015 and 2014.

Derivatives Not Designated as Hedging Instruments

The following table summarizes Occidental's net volumes of outstanding commodity derivatives contracts not designated as hedging instruments, including both financial and physical derivative contracts as of September 30, 2015 and December 31, 2014:

Commodity	Net Outstanding Position			
	Long / (Short)	2015	2014	
Oil (million barrels)	81	(9)	
Natural gas (billion cubic feet)	(54)	(32)

Carbon dioxide (billion cubic feet)

607

621

The volumes in the table above exclude contracts tied to index prices, for which the fair value, if any, is minimal at any point in time. These excluded contracts do not expose Occidental to price risk because the contract prices fluctuate with index prices.

13

Occidental fulfills short positions through its own production or by third-party purchase contracts. Subsequent to September 30, 2015, Occidental entered into purchase contracts for a substantial portion of the short positions outstanding at quarter end and has sufficient production capacity and the ability to enter into additional purchase contracts to satisfy the remaining positions.

Approximately \$119 million of net losses from derivatives not designated as hedging instruments and \$72 million of net losses were recognized in net sales for the three months ended September 30, 2015 and 2014, respectively. Approximately \$163 million of net losses from derivatives not designated as hedging instruments and \$12 million of net gains were recognized in net sales for the nine months ended September 30, 2015 and 2014, respectively.

Fair Value of Derivatives

The following table presents the gross and net fair values of Occidental's outstanding derivatives as of September 30, 2015 and December 31, 2014 (in millions):

September 30, 2015	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Cash-flow hedges ^(a)				
Commodity contracts	Other current assets	3	Accrued liabilities	—
		3		—
Derivatives not designated as hedging instruments ^(a)				
	Other current assets	274	Accrued liabilities	309
Commodity contracts	Long-term receivables and other assets, net	9	Deferred credits and other liabilities	235
		283		544
Total gross fair value		286		544
Less: counterparty netting and cash collateral ^(b,d)		(223)		(240)
Total net fair value of derivatives		\$63		\$304
December 31, 2014	Asset Derivatives		Liability Derivatives	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives not designated as hedging instruments ^(a)				
	Other current assets	828	Accrued liabilities	886
Commodity contracts	Long-term receivables and other assets, net	11	Deferred credits and other liabilities	110
		839		996
Total gross fair value		839		996
Less: counterparty netting and cash collateral ^(c,d)		(742)		(756)
Total net fair value of derivatives		\$97		\$240

(a) Fair values are presented at gross amounts, including when the derivatives are subject to master netting arrangements and presented on a net basis in the consolidated balance sheets.

(b) As of September 30, 2015, collateral received of \$1 million has been netted against the derivative assets and collateral paid of \$17 million has been netted against derivative liabilities.

(c)

As of December 31, 2014, no collateral was received against the derivative assets and collateral paid of \$8 million has been netted against derivative liabilities.

(d) Select clearinghouses and brokers require Occidental to post an initial margin deposit. Collateral, mainly for initial margin, of \$35 million and \$44 million deposited by Occidental has not been reflected in these derivative fair value tables as of September 30, 2015 and December 31, 2014, respectively. This collateral is included in other current assets in the consolidated balance sheets as of September 30, 2015 and December 31, 2014, respectively.

See Note 9, Fair Value Measurements, for fair value measurement disclosures on derivatives.

Credit Risk

A large portion of Occidental's derivative transaction volume is executed through the over-the-counter (OTC) market. Occidental is subject to counterparty credit risk to the extent the counterparty to the derivatives is unable to meet its settlement commitments. Occidental manages this credit risk by selecting counterparties that it believes to be financially strong, by spreading the credit risk among many such counterparties, by entering into master netting arrangements with the counterparties and by requiring collateral, as appropriate. Occidental actively monitors the creditworthiness of each counterparty and records valuation adjustments to reflect counterparty risk, if necessary. Occidental executes the rest of its derivative transactions in the exchange-traded market, which are subject to minimal credit risk as a significant portion of these transactions is settled on a daily margin basis with select clearinghouses and brokers.

Certain of Occidental's OTC derivative instruments contain credit-risk-contingent features, primarily tied to credit ratings for Occidental or its counterparties, which may affect the amount of collateral that each would need to post. As of September 30, 2015 and December 31, 2014, Occidental had a net liability of zero and \$4 million, respectively, which is net of collateral posted of zero and \$3 million, respectively. Occidental believes that if it had received a one-notch reduction in its credit ratings, it would not have resulted in a material change in its collateral-posting requirements as of September 30, 2015 and December 31, 2014.

11. Industry Segments

Occidental conducts its operations through three segments: (1) oil and gas; (2) chemical; and (3) midstream and marketing. The oil and gas segment explores for, develops and produces oil and condensate, natural gas liquids (NGLs) and natural gas. The chemical segment mainly manufactures and markets basic chemicals and vinyls. The midstream and marketing segment gathers, processes, transports, stores, purchases and markets oil, condensate, NGLs, natural gas, carbon dioxide (CO₂) and power. It also trades around its assets, including transportation and storage capacity, and trades oil, NGLs, gas and power. Additionally, the midstream and marketing segment invests in entities that conduct similar activities.

Earnings of industry segments generally exclude income taxes, interest income, interest expense, environmental remediation expenses, unallocated corporate expenses and discontinued operations, but include gains and losses from dispositions of segment and geographic area assets and income from the segments' equity investments. Intersegment sales eliminate upon consolidation and are generally made at prices approximating those that the selling entity would be able to obtain in third-party transactions.

The following tables present Occidental's industry segments (in millions):

	Oil and Gas	Chemical	Midstream and Marketing	Corporate and Eliminations	Total
Three months ended September 30, 2015					
Net sales	\$2,054	\$1,008	\$231	\$(177)	\$3,116
Pre-tax operating profit (loss)	\$(3,128) ^(a)	\$272 ^(b)	\$24	\$(219) ^(c)	\$(3,051)

Discontinued operations, net	—	—	—	213	213
Net income attributable to noncontrolling interest	—	—	(3)	—	(3)
Net income (loss) attributable to common stock	\$1,568	\$140	\$105	\$(605)	\$1,208
Nine months ended September 30, 2015					
Net sales	\$6,405	\$3,038	\$722	\$(491)	\$9,674
Pre-tax operating profit (loss)	\$(3,039) ^(a)	\$547 ^(b)	\$96	\$(385) ^(c)	\$(2,781)
Income taxes	—	—	—	140 ^(d)	140
Discontinued operations, net	—	—	—	(10)	(10)
Net income (loss) attributable to common stock	\$(3,039)	\$547	\$96	\$(255)	\$(2,651)
Nine months ended September 30, 2014					
Net sales	\$10,891	\$3,694	\$1,041	\$(621)	\$15,005
Pre-tax operating profit (loss)	\$5,054	\$409	\$483	\$(348) ^(c)	\$5,598
Income taxes	—	—	—	(2,302) ^(d)	(2,302)
Discontinued operations, net	—	—	—	741	741
Net income attributable to noncontrolling interest	—	—	(8)	—	(8)
Net income (loss) attributable to common stock	\$5,054	\$409	\$475	\$(1,909)	\$4,029

(a) The three months ended September 30, 2015 includes pre-tax impairment charges of \$3.1 billion. In September 2015, Occidental entered into a sales agreement to sell its Williston operations in North Dakota, and as such an impairment charge of \$756 million was recorded to write down the net book value of the assets and liabilities held for sale to the sales price. Due to the significant decline in oil and gas futures prices, Occidental also recorded impairment charges on proved and unproved properties related to Occidental's domestic gas operations of \$924 million, Iraq

operations of \$760 million and Libya operations of \$676 million. The nine months ended September 30, 2015 also reflected first quarter impairment charges of \$195 million for Occidental's South Texas Eagle Ford non-operated properties and \$41 million to write-off the remaining investment in Yemen due to the collapse of the country's government.

(b) Includes gain on the sale of an idled chemical site for \$98 million.

(c) Includes unallocated net interest expense, administration expense, environmental remediation and other pre-tax items.

(d) Includes all foreign and domestic income taxes from continuing operations.

12. Earnings Per Share

Occidental's instruments containing rights to nonforfeitable dividends granted in stock-based awards are considered participating securities prior to vesting and, therefore, net income allocated to these participating securities has been deducted from earnings in computing basic and diluted EPS under the two-class method.

Basic EPS was computed by dividing net income attributable to common stock, net of income allocated to participating securities, by the weighted-average number of common shares outstanding during each period, net of treasury shares and including vested but unissued shares and share units. The computation of diluted EPS reflects the additional dilutive effect of stock options and unvested stock awards.

The following table presents the calculation of basic and diluted EPS for the three and nine months ended September 30, 2015 and 2014 (in millions, except per-share amounts):

	Three months ended September 30		Nine months ended September 30	
	2015	2014	2015	2014
Basic EPS				
Income (loss) from continuing operations	\$(2,606)	\$998	\$(2,641)	\$3,296
Less: Income from continuing operations attributable to noncontrolling interest	—	(3)	—	(8)
Income (loss) from continuing operations attributable to common stock	(2,606)	995	(2,641)	3,288
Discontinued operations, net	(3)	213	(10)	741
Net income (loss)	(2,609)	1,208	(2,651)	4,029
Less: Net income allocated to participating securities	—	(3)	—	(8)
Net income (loss), net of participating securities	(2,609)	1,205	(2,651)	4,021
Weighted average number of basic shares	763.3	777.4	766.4	783.7
Basic EPS	\$(3.42)	\$1.55	\$(3.46)	\$5.13
Diluted EPS				
Net income (loss), net of participating securities	\$(2,609)	\$1,205	\$(2,651)	\$4,021
Weighted average number of basic shares	763.3	777.4	766.4	783.7
Dilutive effect of potentially dilutive securities	—	0.3	—	0.4
Total diluted weighted average common shares	763.3	777.7	766.4	784.1
Diluted EPS	\$(3.42)	\$1.55	\$(3.46)	\$5.13

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

In this report, "Occidental" means Occidental Petroleum Corporation (OPC), or OPC and one or more entities in which it owns a controlling interest (subsidiaries). Portions of this report contain forward-looking statements and involve risks and uncertainties that could materially affect expected results of operations, liquidity, cash flows and business prospects. Actual results may differ from anticipated results, sometimes materially, and reported results should not be considered an indication of future performance. Factors that could cause results to differ include, but are not limited to: global commodity pricing fluctuations; supply and demand considerations for Occidental's products; higher-than-expected costs; the regulatory approval environment; reorganization or restructuring of Occidental's operations; not successfully completing, or any material delay of, field developments, expansion projects, capital expenditures, efficiency projects, acquisitions or dispositions; uncertainties about the estimated quantities of oil and natural gas reserves; lower-than-expected production from development projects or acquisitions; exploration risks; general economic slowdowns domestically or internationally; political conditions and events; liability under environmental regulations including remedial actions; litigation; disruption or interruption of production or manufacturing or facility damage due to accidents, chemical releases, labor unrest, weather, natural disasters, cyber attacks or insurgent activity; failure of risk management; changes in law or regulations; or changes in tax rates. Words such as "estimate," "project," "predict," "will," "would," "should," "could," "may," "might," "anticipate," "plan," "intend," "goal," "target," "objective," "likely" or similar expressions that convey the prospective nature of events or outcomes generally indicate forward-looking statements. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this report. Unless legally required, Occidental does not undertake any obligation to update any forward-looking statements, as a result of new information, future events or otherwise. Material risks that may affect Occidental's results of operations and financial position appear in Part I, Item 1A "Risk Factors" of Occidental's Annual Report on Form 10-K for the year ended December 31, 2014 (the 2014 Form 10-K).

Consolidated Results of Operations

Occidental reported a net loss of \$2.6 billion for the third quarter of 2015 on net sales of \$3.1 billion, compared to net income of \$1.2 billion on net sales of \$4.9 billion for the same period of 2014. Diluted loss per share was \$3.42 for the third quarter of 2015 compared to earnings per share of \$1.55 for the third quarter of 2014. Occidental reported a net loss of \$2.7 billion for the first nine months of 2015 on net sales of \$9.7 billion, compared to net income of \$4.0 billion on net sales of \$15.0 billion for the same period of 2014. Diluted loss per share was \$3.46 for the first nine months of 2015, compared to earnings per share of \$5.13 for the same period of 2014.

The decrease in net income (loss) for the three and nine months ended September 30, 2015, from a year earlier reflect oil and gas asset impairment charges, significantly lower realized crude oil prices and to a lesser extent the impact of significantly lower realized NGLs and gas prices, partially offset by higher crude oil volumes.

Selected Statements of Operations Items

Net sales decreased for the three and nine months ended September 30, 2015, compared to the same periods of 2014, due to significantly lower realized prices for all oil and gas commodities, and to a lesser extent, lower sales prices on most products for the chemical business, which was partially offset by higher crude oil volumes. Gain (loss) on sale of assets, net, for the three and nine months ended September 30, 2015, reflected a gain on the sale of an idled chemical site for \$98 million. Gain (loss) on sale of assets, net, for the nine months ended September 30, 2014, included a gain of \$532 million from the sale of Occidental's operations in Hugoton Field.

Cost of sales for the three and nine months ended September 30, 2015, compared to the same periods in 2014, reflected lower raw material and energy costs for the chemical business. Asset impairments and related items in the Oil and Gas segment for the three and nine months ended September 30, 2015 reflected impairment charges of \$3.1

billion. In September 2015, Occidental entered into a sales agreement to sell its Williston operations in North Dakota, and as such an impairment charge of \$763 million was recorded to write down the net book value of the assets and liabilities held for sale to the sales price. Due to the significant decline in oil and gas futures prices, Occidental also recorded impairment charges on proved and unproved properties related to Occidental's domestic gas operations of \$924 million, Iraq operations of \$760 million and Libya operations of \$676 million. The nine months ended September 30, 2015 also reflected first quarter impairment charges of \$195 million for Occidental's South Texas Eagle Ford non-operated properties and \$41 million to write-off the remaining investment in Yemen due to the collapse of the country's government. The decrease in selling, general and administrative and other operating expense for the three and nine months ended September 30, 2015, compared to the same periods of 2014, reflected

lower compensation related expenses. The increase in depreciation, depletion and amortization (DD&A) expense for the three and nine months ended September 30, 2015, compared to the same periods of 2014, reflected higher oil and gas sales volumes, partially offset by lower DD&A rates. Taxes other than on income for the three and nine months ended September 30, 2015, compared to the same periods of 2014, reflected lower production taxes, which are mostly tied to oil and gas prices.

The domestic and foreign income tax benefit for the three and nine months ended September 30, 2015, compared to domestic and foreign income tax provision for the same periods of 2014, is due to lower operating income in 2015 compared to 2014 resulting from lower oil and gas prices, asset impairments and related items.

Selected Analysis of Financial Position

See “Liquidity and Capital Resources” for a discussion about the changes in cash and cash equivalents and restricted cash.

The decrease in trade receivables, net, at September 30, 2015, compared to December 31, 2014, was due to the significant decline in oil and gas realized prices for all products. Assets held for sale as of September 30, 2015 included the Williston assets and the Westwood building. The decrease in the available for sale investment reflected the decrease in fair value of the investment in California Resources as of September 30, 2015, compared to December 31, 2014. The increase in investments in unconsolidated entities is primarily a result of capital contributions associated with the joint venture for the ethylene cracker at the OxyChem Ingleside facility. The decrease in property, plant and equipment, net, reflected DD&A, impairments and the reclassification of the Williston assets and the Westwood building to assets held for sale, partially offset by capital expenditures of \$4.2 billion.

Current maturities of long-term debt at September 30, 2015 is comprised of \$700 million 2.5-percent senior notes due February 2016 and \$750 million 4.125-percent senior notes due September 2016. The decrease in accounts payable at September 30, 2015, compared to December 31, 2014, was due to the payments on the higher capital and operating expenses accrued at year-end 2014, which was paid in the first half of 2015. The decrease in accrued liabilities at September 30, 2015 reflected the first half of the year payments for compensation-related costs and settlement payments related to the State of New Jersey litigation. The decrease in domestic and foreign income taxes payable at September 30, 2015 is primarily due to the current year domestic loss position. The decrease in stockholders' equity was mainly due to the current year net loss, dividend payments and treasury share purchases.

Segment Operations

Occidental conducts its operations through three segments: (1) oil and gas; (2) chemical; and (3) midstream and marketing. The oil and gas segment explores for, develops and produces oil and condensate, NGLs and natural gas. The chemical segment mainly manufactures and markets basic chemicals and vinyls. The midstream and marketing segment gathers, processes, transports, stores, purchases and markets oil, condensate, NGLs, natural gas, CO₂ and power. It also trades around its assets, including transportation and storage capacity, and trades oil, NGLs, gas and other commodities. Additionally, the midstream and marketing segment invests in entities that conduct similar activities.

The following table sets forth the sales and earnings of each operating segment and corporate items for the three and nine months ended September 30, 2015 and 2014 (in millions):

	Three months ended September 30		Nine months ended September 30	
	2015	2014	2015	2014

(a) Intersegment sales eliminate upon consolidation and are generally made at prices approximating those that the selling entity would be able to obtain in third-party transactions.

(b) Refer to "Significant Transactions and Events Affecting Earnings," "Oil and Gas Segment," "Chemical Segment," "Midstream and Marketing Segment" and "Corporate" discussions that follow.

(c) Represents amounts attributable to common stock shown after deducting a noncontrolling interest amount of \$3 million and \$8 million for the three and nine months ended September 30, 2014, respectively.

Significant Transactions and Events Affecting Earnings

The following table sets forth significant transactions and events affecting Occidental's earnings that vary widely and unpredictably in nature, timing and amount for the three and nine months ended September 30, 2015 and 2014 (in millions):

	Three months ended September 30		Nine months ended September 30	
	2015	2014	2015	2014

Income tax expense (benefit)				
Federal and state	(747) 155	(919) 674
Foreign	302	544	779	1,628

Edgar Filing: OCCIDENTAL PETROLEUM CORP /DE/ - Form 10-Q

Total	(445)	699	(140)	2,302
Income (loss) from continuing operations ^(a)	\$(2,606)	\$995	\$(2,641)	\$3,288
Worldwide effective tax rate	15	%	41	%	5	% 41 %

(a) Represents amounts attributed to income from continuing operations after deducting a noncontrolling interest amount of \$3 million and \$8 million for the three and nine months ended September 30, 2014, respectively.

Occidental's worldwide effective tax rate of 5 percent for the nine months ended September 30, 2015 is lower than the comparative period of 2014 due to the mix of domestic operating losses and foreign operating income, domestic oil and gas asset impairments which are taxed at statutory rates and foreign oil and gas asset impairments which have no reported tax benefits. Excluding the impact of impairments and other nonrecurring items, Occidental's worldwide effective tax rate for the nine months ended September 30, 2015 would be 74 percent.

Oil and Gas Segment

The following tables set forth the production and sales volumes of oil, NGLs and natural gas per day for the three and nine months ended September 30, 2015 and 2014. The differences between the production and sales volumes per day are generally due to the timing of shipments at Occidental's international locations where the product is loaded onto tankers.

Production Volumes per Day	Three months ended September 30		Nine months ended September 30	
	2015	2014	2015	2014
Oil (MBBL)				
United States ^(a)	204	182	203	178
Middle East/North Africa	207	171	195	171
Latin America	25	29	34	25
NGLs (MBBL)				
United States ^(a)	58	55	56	53
Middle East/North Africa	22	7	15	7
Natural Gas (MMCF)				
United States ^(a)	419	462	433	460
Middle East/North Africa	607	426	529	416
Latin America	9	12	10	12
Total production volumes (MBOE) ^(a,b)	689	595	665	582

Sales Volumes per Day	Three months ended September 30		Nine months ended September 30	
	2015	2014	2015	2014
Oil (MBBL)				
United States ^(a)	204	182	203	178
Middle East/North Africa	179	166	185	163
Latin America	34	29	34	28
NGLs (MBBL)				
United States ^(a)	58	55	56	53

Natural Gas (MMCF)				
United States ^(a)	419	462	433	460
Middle East/North Africa	607	426	529	416
Latin America	9	12	10	12
Total sales volumes (MBOE) ^(a,b)	670	590	655	577

Note: MBBL represents thousand barrels. MMCF represents million cubic feet.

(a) Excluding Hugoton daily production and sales volumes of 3 MBBL of oil, 1 MBBL of NGLs and 22 MMCF of gas for the nine months ended September 30, 2014.

(b) Natural gas volumes have been converted to barrels of oil equivalent (BOE) based on energy content of six thousand cubic feet (MCF) of gas to one barrel of oil. Barrels of oil equivalence does not necessarily result in price equivalence. The price of natural gas on a BOE basis is currently substantially lower than the corresponding price for oil and has been similarly lower for a number of years. For example, for the nine months ended September 30, 2015 the average prices of West Texas Intermediate (WTI) oil and New York Mercantile Exchange (NYMEX) natural gas were \$51.00 per barrel and \$2.86 per MCF, respectively, resulting in an oil-to-gas ratio of over 17 to 1.

The following tables present information about Occidental's average realized prices and index prices for the three and nine months ended September 30, 2015 and 2014:

	Three months ended September 30		Nine months ended September 30

Oil and gas segment losses were \$3.1 billion for the third quarter of 2015, compared with segment earnings of \$1.6 billion for the third quarter of 2014. The decrease in earnings reflected \$3.3 billion in asset impairments and related items as well as significantly lower commodity prices for all products, especially crude oil, partially offset by higher crude oil volumes and lower DD&A rates and cash operating expenses.

For the third quarter of 2015, total company average daily oil and gas production volumes increased by 94,000 BOE to 689,000 BOE from 595,000 BOE in the third quarter of 2014. Domestic average daily production increased by 17,000 BOE to 332,000 BOE in the current quarter with the majority of the increase coming from oil production, which grew by 22,000 barrels to 204,000 barrels per day, with all of the increase coming from Occidental's Permian Resources business unit. The increase in domestic oil production was partially offset by lower oil and natural gas production in the Midcontinent and Other regions. International average daily production increased to 357,000 BOE in the third quarter of 2015 from 280,000 BOE in third quarter of 2014. The increase in international production is mainly due to production from Al Hosn Gas and the impact of production sharing agreements. Worldwide average daily sales volumes were 670,000 BOE for the third quarter of 2015, compared with 590,000 BOE for the same period of 2014. Sales volumes were lower than production volumes due to the timings of liftings in the Middle East/North Africa.

Worldwide commodity prices for the third quarter of 2015 were significantly lower than the third quarter of 2014. The average quarterly WTI and Brent prices decreased to \$46.43 per barrel and \$51.17 per barrel, respectively, for the

23

third quarter of 2015, compared to \$97.17 per barrel and \$103.39 per barrel, respectively, for the third quarter of 2014. Worldwide realized crude oil prices declined by 49 percent to \$47.78 per barrel for the third quarter of 2015, compared to \$94.26 per barrel in the third quarter of 2014. Worldwide realized NGL prices decreased by 62 percent to \$14.68 per barrel in the third quarter of 2015, compared to \$38.20 per barrel in the third quarter of 2014. Domestic realized natural gas prices decreased by 40 percent in the third quarter of 2015 to \$2.24 per MCF, compared to \$3.74 per MCF in the third quarter of 2014.

Oil and gas segment losses were \$3.0 billion for the first nine months of 2015, compared with segment earnings of \$5.1 billion for the same period of 2014. The decrease in earnings reflected \$3.6 billion in asset impairments and related items, significantly lower commodity prices for all products, especially crude oil, partially offset by higher crude oil volumes and lower DD&A rates.

Oil and gas production volumes for the first nine months of 2015 averaged 665,000 BOE per day, compared with 582,000 BOE per day for the first nine months of 2014, excluding Hugoton production. Domestic daily production averaged 331,000 BOE and 308,000 BOE for the first nine months of 2015 and 2014, respectively. Average domestic oil production increased by 25,000 barrels per day in the first nine months of 2015 compared to the first nine months of 2014 with all of the increase coming from Occidental's Permian Resources business unit. Average international daily production volumes increased to 334,000 BOE for the first nine months of 2015 from 274,000 BOE for the first nine months of 2014. The increase in international production is mainly due to production from Al Hosn Gas and the impact of production sharing agreements. Worldwide average daily sales volumes were 655,000 BOE in the first nine months of 2015, compared with 577,000 BOE for the same period of 2014.

Worldwide realized crude oil prices fell by 48 percent to \$50.33 per barrel for the first nine months of 2015, compared with \$97.20 per barrel for the first nine months of 2014. Worldwide realized NGL prices fell by 58 percent to \$16.73 per barrel for the first nine months of 2015, compared with \$40.27 per barrel for the first nine months of 2014. Domestic realized gas prices decreased by 44 percent to \$2.28 per MCF for the first nine months of 2015, compared to \$4.10 per MCF for the first nine months of 2014.

Worldwide realized oil, NGLs and gas prices have fallen significantly from an average of \$90.13 per barrel, \$37.01 per barrel, and \$2.55 per MCF in 2014 to \$50.33 per barrel, \$16.73 per barrel, and \$1.55 per MCF for the first nine months of 2015. The unweighted arithmetic average first-day-of-the-month price for WTI decreased from \$94.99 for 2014 to \$51.49 for the first ten months of 2015. These lower prices will result in negative price related changes to Occidental's year end proved oil, NGLs and gas reserves at December 31, 2015 due to the shortening of the economic life of these proved reserves.

Chemical Segment

Chemical segment earnings for the three and nine months ended September 30, 2015 were \$272 million and \$547 million, respectively, compared to \$140 million and \$409 million for the same periods of 2014, respectively. The higher earnings in 2015 compared to the same periods in 2014 reflected lower ethylene and energy costs and a gain on the sale of an idled chemical site partially offset by lower sales prices across most product lines.

Midstream and Marketing Segment

Midstream and marketing earnings were \$24 million and \$96 million for the three and nine months ended September 30, 2015, respectively, compared to \$105 million and \$475 million for the same periods in 2014, respectively. The decrease in quarterly and nine month earnings is due to lower marketing and trading results due to a narrowing of Midland to Gulf Coast price differentials and lower domestic gas plant results due to the decline in NGL prices. The nine months results also reflected lower pipeline income as a result of lower Dolphin pipeline third party gas sales, the

impact from Occidental's reduced ownership in Plains GP Holdings after the fourth quarter 2014 sale of a portion of its interest and lower power generation income.

Liquidity and Capital Resources

At September 30, 2015, Occidental had \$2.5 billion and \$1.8 billion in unrestricted and restricted cash, respectively. Income and cash flows are largely dependent on the oil and gas segment's realized prices, sales volumes and operating costs. Occidental funds its operating needs and planned capital expenditures, dividends and any debt payments from cash on hand and cash generated from operations. Occidental, from time to time, may access and has accessed debt markets for general corporate purposes, including acquisitions.

In order to maintain the tax-free nature of the spin-off of California Resources, Occidental's use of restricted cash must be used solely to pay dividends, repurchase common stock, repay debt, or a combination of the foregoing within 18 months from the date of the distribution to Occidental.

Net cash provided by operating activities was \$2.4 billion for the nine months ended September 30, 2015, compared to \$8.2 billion for the same period in 2014, which includes \$1.8 billion in operating cash flows from discontinued operations. Operating cash flows were negatively impacted by significantly lower realized prices for all oil and natural gas commodities. The impact of the chemical and the midstream and marketing segments on overall cash flows is typically less significant than the impact of the oil and gas segment because the chemical and midstream and marketing segments are significantly smaller. The usage of working capital of approximately \$938 million for the nine months ended September 30, 2015 reflected lower realized prices that impacted receivable collections and payments related to higher capital and operating spending accrued in the fourth quarter of 2014 and paid in 2015.

Occidental's net cash used by investing activities was \$5.1 billion for the first nine months of 2015, compared to \$6.8 billion for the same period of 2014, which included \$1.7 billion in investing cash flows used by discontinued operations. Capital expenditures for the first nine months of 2015 were \$4.2 billion of which \$3.6 billion was for the oil and gas segment. The change in capital accrual for the nine months ended September 30, 2015 reflected amounts paid in the first half of 2015 related to capital expenditures incurred and accrued in the fourth quarter of 2014.

Occidental's net cash provided by financing activities was \$1.5 billion for the first nine months of 2015, compared to net cash used by financing activities of \$1.9 billion for the same period of 2014. The \$2.3 billion change in restricted cash was due to \$0.6 billion in purchases of treasury stock and \$1.7 billion used to pay dividends. Occidental issued senior notes in the second quarter of 2015 resulting in net proceeds of approximately \$1.48 billion. See Note 2, Asset Acquisitions, Dispositions, and Other.

As of September 30, 2015, Occidental was in compliance with all covenants of its financing agreements and had substantial capacity for additional unsecured borrowings, the payment of cash dividends and other distributions on, or acquisitions of, Occidental stock.

Environmental Liabilities and Expenditures

Occidental's operations are subject to stringent federal, state, local and foreign laws and regulations related to improving or maintaining environmental quality. Occidental's environmental compliance costs have generally increased over time and are expected to rise in the future. Occidental factors environmental expenditures for its operations into its business planning process as an integral part of producing quality products responsive to market demand.

The laws that require or address environmental remediation, including CERCLA and similar federal, state, local and foreign laws, may apply retroactively and regardless of fault, the legality of the original activities or the current ownership or control of sites. OPC or certain of its subsidiaries participate in or actively monitor a range of remedial activities and government or private proceedings under these laws with respect to alleged past practices at operating, closed and third-party sites. Remedial activities may include one or more of the following: investigation involving sampling, modeling, risk assessment or monitoring; cleanup measures including removal, treatment or disposal of hazardous substances; or operation and maintenance of remedial systems. Government or private proceedings seek funding or performance of remediation and, in some cases, compensation for alleged property damage, punitive damages, civil penalties, injunctive relief and government oversight costs.

Refer to Note 6, Environmental Liabilities and Expenditures, in the Notes to the Consolidated Condensed Financial Statements in Part I Item 1 of this Form 10-Q and to the Environmental Liabilities and Expenditures section of Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2014 Form 10-K for additional information regarding Occidental's environmental expenditures.

Lawsuits, Claims, Commitments and Contingencies

Occidental accrues reserves for outstanding lawsuits, claims and proceedings when it is probable that a liability has been incurred and the liability can be reasonably estimated. Occidental has disclosed its reserve balances for environmental matters. Reserve balances for other matters as of September 30, 2015 and December 31, 2014 were not material to Occidental's consolidated balance sheets. Occidental also evaluates the amount of reasonably

possible losses that it could incur as a result of the matters mentioned above. Occidental has disclosed its range of reasonably possible additional losses for sites where it is a participant in environmental remediation. Occidental believes that other reasonably possible losses that it could incur in excess of reserves accrued on the balance sheet would not be material to its consolidated financial position or results of operations. For further information, see Note 7, Lawsuits, Claims, Commitments and Contingencies, in the Notes to Consolidated Condensed Financial Statements in Part I Item 1 of this Form 10-Q.

Recently Adopted Accounting and Disclosure Changes

See Note 3, Accounting and Disclosure Changes, in the Notes to Condensed Consolidated Financial Statements in Part I Item 1 of this Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

For the three and nine months ended September 30, 2015, there were no material changes in the information required to be provided under Item 305 of Regulation S-K included under Item 7A, "Quantitative and Qualitative Disclosures About Market Risk" in the 2014 Form 10-K.

Item 4. Controls and Procedures

Occidental's President and Chief Executive Officer and its Senior Vice President and Chief Financial Officer supervised and participated in Occidental's evaluation of its disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon that evaluation, Occidental's President and Chief Executive Officer and Senior Vice President and Chief Financial Officer concluded that Occidental's disclosure controls and procedures were effective as of September 30, 2015.

There has been no change in Occidental's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the first nine months of 2015 that has materially affected, or is reasonably likely to materially affect, Occidental's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

In the second quarter of 2014, Occidental disclosed a claim asserted by the U.S. Environmental Protection Agency and the Pennsylvania Department of Environmental Protection against an Occidental subsidiary, INDSPEC Chemical Corporation, alleging the failure to comply with certain requirements regarding for the monitoring and control of fugitive emissions at its facility in Petrolia, Pennsylvania. In the third quarter of 2015, Occidental resolved the action by agreeing to pay \$153,100 in penalties and undertake certain additional measures to monitor and report on emissions.

As previously disclosed in Occidental's 2014 and 2015 proxy statements, on February 12, 2014, a complaint captioned Milton Pfeiffer and Emmy McElroy, derivatively on behalf of Occidental Petroleum Corporation, v. Spencer Abraham, et al. (naming all of Occidental's non-employee directors from 2011 through 2013 as defendants), purporting to be derivative claims, was filed in the Chancery Court of the State of Delaware (the Court). The complaint alleged that the individual defendants exceeded their authority under Occidental's stockholder-approved 2005 long-term incentive plan between 2011 and 2013 by approving and/or accepting restricted stock awards that vested on the date of grant and that compensation paid to certain of the individual defendants in 2011 and 2012 was unreasonable. The parties reached a settlement which was approved by the Court on September 28, 2015 (the Settlement). Pursuant to the Settlement, Occidental agreed to, among other things, freeze the compensation paid to each of its non-employee directors in 2015 and 2016 at the levels specified in Occidental's 2014 proxy statement; retain a compensation consultant to advise the Board on non-employee director compensation for 2017 and reasonably consult with plaintiffs' counsel regarding the retention of the consultant; and impose a three-year vesting requirement on stock awards granted to non-employee directors in 2012 and 2013.

For information regarding other legal proceedings, see Note 7, Lawsuits, Claims, Commitments and Contingencies in the Notes to Condensed Consolidated Financial Statements, in Part I Item 1 of this Form 10-Q, and Part I Item 3, "Legal Proceedings" in the 2014 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Share Repurchase Activities

Occidental's share repurchase activities for the three and nine months ended September 30, 2015, were as follows:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs ^(a)
First Quarter 2015	2,750,835	(b) \$75.07	2,650,000	
Second Quarter 2015	4,769,624	\$78.05	4,769,624	
July 1 - 31, 2015	—	\$—	—	
August 1 - 31, 2015	105,386	(b) \$65.73	—	
September 1 - 30, 2015	—	\$—	—	
Third Quarter 2015	105,386	(b) \$65.73	—	
Total	7,625,845	\$76.80	7,419,624	63,756,544

- Represents the total number of shares remaining at September 30, 2015 under Occidental's share repurchase
- (a) program of 185 million shares. The program was initially announced in 2005. The program does not obligate Occidental to acquire any specific number of shares and may be discontinued at any time.
 - (b) Includes purchases from the trustee of Occidental's defined contribution savings plan that are not part of publicly announced plans or programs.

Item 5. Other Information

In October 2015, Mr. Chazen notified Occidental that he intends to establish a pre-arranged trading plan to sell shares of Occidental's common stock in accordance with Rule 10b5-1 of the Securities Exchange Act of 1934 in order to satisfy personal charitable contributions and commitments for 2016. Under the terms of the proposed plan, Mr. Chazen may sell up to 250,000 shares of Occidental's common stock in a non-discretionary manner on a ratable, bi-weekly basis over a one-year period, beginning December 1, 2015. As of September 30, 2015, Mr. Chazen owned 1,974,733 shares of Occidental's common stock.

Item 6. Exhibits

- 3.(ii)* Bylaws of Occidental, as amended through October 8, 2015 (filed as Exhibit 3.(ii) to the Current Report on Form 8-K of Occidental dated October 8, 2015 (date of earliest event reported), filed October 14, 2015, File No. 1-9210).
- 10.1* Occidental Petroleum Corporation Savings Plan, Amended and Restated Effective as of January 1, 2015 (filed as Exhibit 4.5 to the Registration Statement on Form S-8 of Occidental, File No. 333-207413).
- 12 Statement regarding the computation of total enterprise ratios of earnings to fixed charges for the nine months ended September 30, 2015 and 2014, and for each of the five years in the period ended December 31, 2014.
- 31.1 Certification of CEO Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of CFO Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certifications of CEO and CFO Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
