annual shareholders meeting held May 18, 2001. The name change has been filed with the Secretary of State of Texas and will take effect immediately.

The board of directors had recommended the name change to more appropriately reflect the expanding business of the company. Currently, GulfWest's oil and natural gas reserves are comprised of 52% oil and 48% natural gas. The company plans to continue to expand its role in the domestic natural gas industry by (i) acquiring additional interests in natural gas properties, (ii) increasing the production and reserve base of its existing natural gas properties, and (iii) acquiring ownership of more natural gas gathering systems and pipelines.

The shareholders also re-elected the seven incumbent directors for a one year term and approved increasing the number of shares that can be issued pursuant to the company's Employee Stock Option Plan from one million to two million shares.
