PART I. FINANCIAL INFORMATION  
SAFE HARBOR STATEMENT UNDER THE PRIVATE  
SECURITIES LITIGATION REFORM ACT OF 1995

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from the results discussed in the forward-looking statements. These factors include those set forth in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, under the caption "Cautionary Statements for Purposes of the Safe Harbor Provisions of the Securities Litigation Reform Act" to this Quarterly Report on Form 10-Q for the quarterly period ended February 28, 2015.

CHS INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Note 1 Summary of Significant Accounting Policies

Basis of Presentation

The unaudited Consolidated Balance Sheet as of February 28, 2015, the Consolidated Statements of Operations for the three and six months ended February 28, 2015 and 2014, the Consolidated Statements of Comprehensive Income for the three and six months ended February 28, 2015 and 2014, and the Consolidated Statements of Cash Flows for the six months ended February 28, 2015 and 2014, reflect in the opinion of our management, all normal recurring adjustments necessary for a fair statement of the financial position, results of operations and cash flows for the interim periods presented. The results of operations and cash flows for interim periods are not necessarily indicative of results for a full fiscal year because of, among other things, the seasonal nature of our businesses. Our Consolidated Balance Sheet data as of August 31, 2014, has been derived from our audited consolidated financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America (GAAP).

The notes to our consolidated financial statements make reference to our Energy and Ag reportable segments, as well as our Corporate and Other category, which represents an aggregation of individually immaterial operating segments. See Note 10, Segment Reporting for more information.

Our consolidated financial statements include the accounts of CHS and all of our wholly-owned and majority-owned subsidiaries and limited liability companies, including National Cooperative Refinery Association (NCRA) in our Energy segment. The effects of all significant intercompany transactions have been eliminated.

These statements should be read in conjunction with the consolidated financial statements and notes thereto for the year ended August 31, 2014, included in our Annual Report on Form 10-K, filed with the Securities and Exchange Commission.

Derivative Financial Instruments and Hedging Activities

Our derivative instruments primarily consist of commodity and freight futures and forward contracts and, to a lesser degree, may include foreign currency and interest rate swap contracts. These contracts are economic hedges of price risk, but are not designated or accounted for as hedging instruments for accounting purposes, with the exception of certain interest rate swap contracts which are accounted for as cash flow hedges or fair value hedges. Derivative instruments are recorded on our Consolidated Balance Sheets at fair value. See Note 11, Derivative Financial Instruments and Hedging Activities and Note 12, Fair Value Measurements for additional information.

Even though we have netting arrangements for our exchange-traded futures and options contracts and certain over-the-counter (OTC) contracts, we report our derivatives on a gross basis on our Consolidated Balance Sheets. Our associated margin deposits are also reported on a gross basis.

Major Maintenance Activities

In our Energy segment, major maintenance activities (turnarounds) at our two refineries are accounted for under the deferral method. Turnarounds are the scheduled and required shutdowns of refinery processing units. The costs related to the significant overhaul and refurbishment activities include materials and direct labor costs. The costs of turnarounds are deferred when incurred and amortized on a straight-line basis over the period of time estimated to

lapse until the next turnaround occurs, which is generally 2 to 4 years. The amortization expense related to turnaround costs is included in cost of goods sold in our Consolidated Statements of Operations. The selection of the deferral method, as opposed to expensing the turnaround costs when incurred, results in deferring recognition of the turnaround expenditures. The deferral method also results in the classification of the related cash outflows as investing activities in our Consolidated Statements of Cash Flows, whereas expensing these costs as incurred, would result in classifying the cash outflows as operating activities.

For the three and six months ended February 28, 2015, major repairs turnaround expenditures were \$7.2 million and \$8.3 million, respectively. There were no turnaround expenditures for the three and six months ended February 28, 2014.

#### Recent Accounting Pronouncements

Table of Contents

In February 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis." ASU No. 2015-02 amended the process that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. ASU No. 2015-02 is effective for the annual period ending after December 15, 2015, and for annual periods and interim periods thereafter. Early application is permitted. We are currently evaluating the impact the adoption will have on our consolidated financial statements in fiscal 2017.

In November 2014, the FASB issued ASU No. 2014-16, "Determining Whether the Host Contract in a Hybrid Financial Instrument Issued in the Form of a Share Is More Akin to Debt or to Equity." The amendments in this ASU do not change the current criteria in GAAP for determining when separation of certain embedded derivative features in a hybrid financial instrument is required. The amendments clarify that an entity should consider all relevant terms and features, including the embedded derivative feature being evaluated for bifurcation, in evaluating the nature of the host contract. The ASU applies to all entities that are issuers of, or investors in, hybrid financial instruments that are issued in the form of a share and is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted. The adoption of ASU 2014-16 is not expected to have a material effect on our consolidated financial statements in fiscal 2016.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers." ASU No. 2014-09 requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those good or services. The guidance also requires an entity to disclose sufficient qualitative and quantitative information surrounding the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts from customers. This ASU supersedes the revenue recognition requirements in Topic 605, Revenue Recognition, and most industry-specific guidance throughout the Industry Topics of the Codification. The amendments in this standard are effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. The guidance permits the use of either a retrospective or cumulative effect transition method. We have not yet selected a transition method and we are currently evaluating the impact the adoption will have on our consolidated financial statements in fiscal 2018.

## Note 2      Receivables

	February 28, 2015	August 31, 2014
	(Dollars in thousands)	
Trade accounts receivable	\$1,659,243	\$2,153,929
CHS Capital notes receivable	645,195	633,475
Other	313,288	304,798
	2,617,726	3,092,202
Less allowances and reserves	102,877	103,639
Total receivables	\$2,514,849	\$2,988,563

Trade accounts receivable are initially recorded at a selling price, which approximates fair value, upon the sale of goods or services to customers. Subsequently, trade accounts receivable are carried at net realizable value, which includes an allowance for estimated uncollectible amounts. We calculate this allowance based on our history of write-offs, level of past due accounts, and our relationships with, and the economics status of, our customers.

CHS Capital, LLC (CHS Capital), our wholly-owned subsidiary, has notes receivable from commercial borrowers and producer borrowings. The short-term notes receivable generally have terms of 12-14 months and are reported at their outstanding principle balances as CHS Capital has the ability and intent to hold these notes to maturity. The carrying value of CHS Capital notes receivable approximates fair value, given their short duration and the use of market

pricing adjusted for risk. The notes receivable from commercial borrowers are collateralized by various combinations of mortgages, personal property, accounts and notes receivable, inventories and assignments of certain regional cooperatives' capital stock. These loans are primarily originated in the states of Minnesota, Wisconsin, North Dakota and Michigan. CHS Capital also has loans receivable from producer borrowers which are collateralized by various combinations of growing crops, livestock, inventories, accounts receivable, personal property and supplemental mortgages. In addition to the short-term amounts included in the table above, CHS Capital had long-term notes receivable with durations of not more than 10 years of \$148.3 million and \$159.7 million at February 28, 2015 and August 31, 2014, respectively. The long-term notes receivable are included in other assets on our

Table of Contents

Consolidated Balance Sheets. As of February 28, 2015 and August 31, 2014 the commercial notes represented 51% and 46%, respectively, and the producer notes represented 49% and 54%, respectively, of the total CHS Capital notes receivable.

CHS Capital evaluates the collectability of both commercial and producer notes on a specific identification basis, based on the amount and quality of the collateral obtained, and records specific loan loss reserves when appropriate. A general reserve is also maintained based on historical loss experience and various qualitative factors. In total, our specific and general loan loss reserves related to CHS Capital are not material to our consolidated financial statements, nor are the historical write-offs. The accrual of interest income is discontinued at the time the loan is 90 days past due unless the credit is well-collateralized and in process of collection. The amount of CHS Capital notes that were past due was not material at any reporting date presented.

CHS Capital has commitments to extend credit to a customer as long as there is no violation of any condition established in the contract. As of February 28, 2015, customers of CHS Capital have additional available credit of approximately \$1.0 billion.

## Note 3 Inventories

	February 28, 2015	August 31, 2014
	(Dollars in thousands)	
Grain and oilseed	\$ 1,444,271	\$ 961,327
Energy	831,639	875,719
Crop nutrients	479,320	374,023
Feed and farm supplies	869,425	448,454
Processed grain and oilseed	68,437	84,498
Other	4,432	16,232
Total inventories	\$ 3,697,524	\$ 2,760,253

As of February 28, 2015, we valued approximately 14% of inventories, primarily related to Energy, using the lower of cost, determined on the LIFO method, or market (16% as of August 31, 2014). If the FIFO method of accounting had been used, inventories would have been higher than the reported amount by \$147.6 million and \$538.7 million at February 28, 2015 and August 31, 2014, respectively. An actual valuation of inventory under the LIFO method can be made only at the end of each year based on the inventory levels and costs at that time. Interim LIFO calculations are based on management's estimates of expected year-end inventory levels and costs, and are subject to the final year-end LIFO inventory valuation.

## Note 4 Investments

As of August 31, 2014, we owned 84.0% of NCRA and with the closings in September 2014, our ownership increased to 88.9%. In fiscal 2012, we entered into an agreement to purchase the remaining shares of NCRA from Growmark Inc. and MFA Oil Company in separate closings to be held annually through fiscal 2016. Pursuant to this agreement, we made payments during the six months ended February 28, 2015 and 2014 of \$66.0 million and \$66.0 million, respectively. The present value of the remaining payments is included as mandatorily redeemable noncontrolling interest on our Consolidated Balance Sheets. In addition to these payments, we paid \$16.5 million during the six months ended February 28, 2014 related to the associated crack spread contingent liability. The fair value of the remaining contingent liability was \$121.1 million as of February 28, 2015.

## Equity Method Investments

Joint ventures and other investments, in which we have significant ownership and influence, but not control, are accounted for in our consolidated financial statements using the equity method of accounting. Our significant equity method investments are summarized below.

We have a 50% interest in Ventura Foods, LLC (Ventura Foods), a joint venture which produces and distributes primarily vegetable oil-based products, and is included in Corporate and Other. We account for Ventura Foods as an equity method investment, and as of February 28, 2015, our carrying value of Ventura Foods exceeded our share of their equity by \$12.9 million, which represents equity method goodwill. As of February 28, 2015, the carrying value of our investment in Ventura Foods was \$331.6 million.

Table of Contents

In fiscal 2014, we formed Ardent Mills, LLC (Ardent Mills), a joint venture with Cargill Incorporated (Cargill) and ConAgra Foods, Inc., which combines the North American flour milling operations of the three parent companies, giving CHS a 12% interest in Ardent Mills. Prior to closing, we contributed \$32.8 million to Horizon Milling, LLC to pay off existing debt as a pre-condition to close. Upon closing, Ardent Mills was financed with funds from third-party borrowings, which did not require credit support from the owners. We received \$121.2 million of cash proceeds distributed to us in proportion to our ownership interest, adjusted for deviations in specified working capital target amounts, and recognized a gain of \$109.2 million associated with this transaction. In connection with the closing, the parties also entered into various ancillary and non-compete agreements including, among other things, an agreement for us to supply Ardent Mills with certain wheat products. As we hold one of the five board seats, we account for Ardent Mills as an equity method investment included in Corporate and Other. As of February 28, 2015, the carrying value of our investment in Ardent Mills was \$204.4 million.

TEMCO, LLC (TEMCO) is owned and governed by Cargill (50%) and CHS (50%). Both owners have committed to sell all of their feedgrains, wheat, oilseeds and by-product origination that are tributary to the Pacific Northwest, United States (Pacific Northwest) to TEMCO and to use TEMCO as their exclusive export-marketing vehicle for such grains exported through the Pacific Northwest through January 2037. We account for TEMCO as an equity method investment included in our Ag segment. As of February 28, 2015, the carrying value of our investment in TEMCO was \$63.5 million.

Other Short-Term Investments

As of February 28, 2015, we have invested \$315.0 million of the proceeds from the September 2014 Class B Series 3 Preferred Stock issuance (see Note 8, Equities for additional information) in time deposits with original maturities of six and nine months with select highly-rated financial institution counterparties. These short-term investments are included in other current assets on our Consolidated Balance Sheet.

Note 5 Property, Plant and Equipment

As of February 28, 2015 and August 31, 2014, total property, plant and equipment, net of accumulated depreciation and amortization, was \$4.4 billion and \$4.0 billion, respectively. The increase in fiscal 2015 is driven by an increase in construction in progress of \$358.7 million related primarily to capital projects at our refineries and the fertilizer plant project discussed below.

In September 2014, our Board of Directors approved plans to construct a nitrogen fertilizer plant located in Spiritwood, North Dakota. We currently estimate the construction costs to be more than \$3.0 billion, with the plant anticipated to be operational during calendar year 2018. As of February 28, 2015, we have capitalized approximately \$68.4 million related to this project. As required by GAAP, we review long-lived assets for impairment when events or changes in circumstances, including significant changes in actual or expected operating results, indicate that the asset's carrying value may not be recoverable.

Depreciation expense during the three and six months ended February 28, 2015 was \$72.7 million and \$143.2 million, respectively. Depreciation expense during the three and six months ended February 28, 2014 was \$60.7 million and \$120.1 million, respectively.

Note 6 Goodwill and Other Intangible Assets

Edgar Filing: CHS INC - Form 10-Q

Goodwill of \$154.9 million and \$158.7 million on February 28, 2015 and August 31, 2014, respectively, is included in other assets on our Consolidated Balance Sheets. Changes in the net carrying amount of goodwill for the six months ended February 28, 2015, by segment, are as follows:

	Energy	Ag	Corporate and Other	Total
	(Dollars in thousands)			
Balances, August 31, 2014	\$552	\$151,246	\$6,898	\$158,696
Goodwill acquired during the period	—	388	—	388
Effect of foreign currency translation adjustments	—	(4,217	) —	(4,217 )
Balances, February 28, 2015	\$552	\$147,417	\$6,898	\$154,867

Table of Contents

Intangible assets subject to amortization primarily include customer lists, trademarks and agreements not to compete, and are amortized over their respective useful lives (ranging from 2 to 30 years). Information regarding intangible assets included in other assets on our Consolidated Balance Sheets is as follows:

	February 28, 2015			August 31, 2014		
	Carrying Amount	Accumulated Amortization	Net	Carrying Amount	Accumulated Amortization	Net
	(Dollars in thousands)					
Customer lists	\$70,375	\$ (28,472 )	\$41,903	\$69,862	\$ (26,114 )	\$43,748
Trademarks and other intangible assets	42,402	(30,853 )	11,549	41,293	(29,587 )	11,706
Total intangible assets	\$112,777	\$ (59,325 )	\$53,452	\$111,155	\$ (55,701 )	\$55,454

Total amortization expense for intangible assets during the three and six months ended February 28, 2015 was \$1.8 million and \$3.6 million, respectively. Total amortization expense for intangible assets during the three and six months ended February 28, 2014 was \$2.6 million and \$4.9 million, respectively. The estimated annual amortization expense related to intangible assets subject to amortization for the next five years is as follows:

	(Dollars in thousands)
Year 1	\$7,089
Year 2	6,409
Year 3	4,802
Year 4	3,609
Year 5	3,489

#### Note 7 Notes Payable and Long-Term Debt

Our notes payable and long-term debt are subject to various restrictive requirements for maintenance of minimum consolidated net worth and other financial ratios. We were in compliance with our debt covenants as of February 28, 2015.

	February 28, 2015	August 31, 2014
	(Dollars in thousands)	
Notes payable	\$1,015,783	\$840,699
CHS Capital notes payable	345,832	318,774
Total notes payable	\$1,361,615	\$1,159,473

On February 28, 2015, our primary line of credit was a five-year revolving facility with a committed amount of \$2.5 billion. We had no amounts outstanding as of February 28, 2015 and August 31, 2014.

Interest, net for the three and six months ended February 28, 2015 and 2014 is as follows:

	For the Three Months Ended		For the Six Months Ended	
	February 28,		February 28,	
	2015	2014	2015	2014
	(Dollars in thousands)			
Interest expense

*Readily marketable inventories* Our readily marketable inventories primarily include our grain and oilseed inventories that are stated at net realizable values which approximate market values. These commodities are readily marketable, have quoted market prices and may be sold without significant additional processing. We estimate the fair market values of these inventories included in Level 2 primarily based on exchange-quoted prices, adjusted for differences in local markets. Changes in the fair market values of these inventories are recognized in our Consolidated Statements of Operations as a component of cost of goods sold.

*Commodity, freight and foreign currency derivatives* Exchange-traded futures and options contracts are valued based on unadjusted quoted prices in active markets and are classified within Level 1. Our forward

Table of Contents**CHS INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)**

commodity purchase and sales contracts, flat price or basis fixed derivative contracts, ocean freight derivative contracts and other OTC derivatives are determined using inputs that are generally based on exchange traded prices and/or recent market bids and offers, adjusted for location specific inputs, and are classified within Level 2. The location specific inputs are generally broker or dealer quotations, or market transactions in either the listed or OTC markets. Changes in the fair values of these contracts are recognized in our Consolidated Statements of Operations as a component of cost of goods sold.

*Short-term investments* Our short-term investments represent an enhanced cash fund closed due to credit-market turmoil, classified as Level 3. These investments are valued using expected present values to determine the fair market values.

*Available-for-sale investments* Our available-for-sale investments in common stock of other companies are valued based on unadjusted quoted prices on active exchanges and are classified within Level 1.

*Rabbi Trust assets* Our Rabbi Trust assets are valued based on unadjusted quoted prices on active exchanges and are classified within Level 1.

*Interest rate swap derivative* During fiscal 2009, we entered into an interest rate swap classified within Level 2, with a notional amount of \$150.0 million, expiring in 2010, to lock in the interest rate for \$150.0 million of our \$1.3 billion five-year revolving line of credit. The rate is based on the London Interbank Offered Rate (LIBOR) and settles monthly. We have not designated or accounted for the interest rate swap as a hedging instrument for accounting purposes. Changes in fair values are recognized in our Consolidated Statements of Operations as interest expense.

The table below represents a reconciliation for assets and liabilities, measured at fair value on a recurring basis, using significant unobservable inputs (Level 3). This consists of our short-term investments that were carried at fair value prior to the adoption of SFAS No. 157 and reflect assumptions a marketplace participant would use at February 28, 2009:

		<b>Level 3 Instruments Short-Term Investments</b>
Balance, September 1, 2008	\$	7,154
Total losses (realized/unrealized) included in marketing, general and administrative expense		(1,031)
Purchases, issuances and settlements		(3,046)
Transfer in (out) of Level 3		
Balance, February 28, 2009	\$	3,077

SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, provides entities with an option to report financial assets and liabilities and certain other items at fair value, with changes in fair value reported in

earnings, and requires additional disclosures related to an entity's election to use fair value reporting. It also requires entities to display the fair value of those assets and liabilities for which the entity has elected to use fair value on the face of the balance sheet. SFAS No. 159 was effective for us on September 1, 2008, and we made no elections to measure any assets or liabilities at fair value, other than those instruments already carried at fair value.

**Note 12. Commitments and Contingencies**

*Guarantees*

We are a guarantor for lines of credit for related companies. As of February 28, 2009, our bank covenants allowed maximum guarantees of \$500.0 million, of which \$18.7 million was outstanding. All outstanding loans with respective creditors are current as of February 28, 2009.

Table of Contents**CHS INC. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) (Continued)**

Our guarantees for certain debt and obligations under contracts for our subsidiaries and members as of February 28, 2009 are as follows:

Entities	Guarantee/ Maximum Exposure	Exposure on February 28, 2009	Nature of Guarantee	Expiration Date	Triggering Event	Recourse Provisions	Assets Held as Collateral
Mountain Country, LLC	\$ 150	\$ 6	Obligations by Mountain Country, LLC under credit agreement	None stated, but may be terminated upon 90 days prior notice in regard to future obligations	Credit agreement default	Subrogation against Mountain Country, LLC	Some or all assets of borrower are held as collateral and should be sufficient to cover guarantee exposure
Morgan County Investors, LLC	\$ 383	383	Obligations by Morgan County Investors, LLC under credit agreement	When obligations are paid in full, scheduled for year 2018	Credit agreement default	Subrogation against Morgan County Investors, LLC	Some or all assets of borrower are held as collateral and should be sufficient to cover guarantee exposure
Horizon Milling, LLC	\$ 5,000		Indemnification and reimbursement of 24% of damages related to Horizon Milling, LLC performance under a flour sales agreement	None stated, but may be terminated by any party upon 90 days prior notice in regard to future obligations	Nonperformance under flour sales agreement	Subrogation against Horizon Milling, LLC	None
TEMCO, LLC	\$ 35,000		Obligations by TEMCO under credit agreement	None stated	Credit agreement default	Subrogation against TEMCO, LLC	None
TEMCO, LLC	\$ 1,000		Obligations by TEMCO under counterparty	None stated, but may be terminated upon	Nonpayment	Subrogation against TEMCO,	None

		\$ 18,686					

\* The maximum exposure on any give date is equal to the actual guarantees extended as of that date, not to exceed \$1.0 million.

**Table of Contents**

**Item 2. *Management's Discussion and Analysis of Financial Condition and Results of Operations***

**General**

The following discussions of financial condition and results of operations should be read in conjunction with the unaudited interim financial statements and notes to such statements and the cautionary statement regarding forward-looking statements found at the beginning of Part I, Item 1, of this Quarterly Report on Form 10-Q, as well as our consolidated financial statements and notes thereto for the year ended August 31, 2008, included in our Annual Report on Form 10-K, filed with the Securities and Exchange Commission. This discussion contains forward-looking statements based on current expectations, assumptions, estimates and projections of management. Actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, as more fully described in the cautionary statement and elsewhere in this Quarterly Report on Form 10-Q.

CHS Inc. (CHS, we or us) is a diversified company, which provides grain, foods and energy resources to businesses and consumers on a global basis. As a cooperative, we are owned by farmers, ranchers and their member cooperatives across the United States. We also have preferred stockholders that own shares of our 8% Cumulative Redeemable Preferred Stock.

We provide a full range of production agricultural inputs such as refined fuels, propane, farm supplies, animal nutrition and agronomy products, as well as services, which include hedging, financing and insurance services. We own and operate petroleum refineries and pipelines, and market and distribute refined fuels and other energy products, under the Cenex<sup>®</sup> brand through a network of member cooperatives and independents. We purchase grains and oilseeds directly and indirectly from agricultural producers primarily in the midwestern and western United States. These grains and oilseeds are either sold to domestic and international customers, or further processed into a variety of grain-based food products.

The consolidated financial statements include the accounts of CHS and all of our wholly-owned and majority-owned subsidiaries and limited liability companies, including National Cooperative Refinery Association (NCRA) in our Energy segment. The effects of all significant intercompany transactions have been eliminated.

We operate three business segments: Energy, Ag Business and Processing. Together, our three business segments create vertical integration to link producers with consumers. Our Energy segment produces and provides for the wholesale distribution of petroleum products and transports those products. Our Ag Business segment purchases and resells grains and oilseeds originated by our country operations business, by our member cooperatives and by third parties, and also serves as wholesaler and retailer of crop inputs. Our Processing segment converts grains and oilseeds into value-added products. Corporate and Other primarily represents our business solutions operations, which consists of commodities hedging, insurance and financial services related to crop production.

Corporate administrative expenses are allocated to all three business segments, and Corporate and Other, based on direct usage for services that can be tracked, such as information technology and legal, and other factors or considerations relevant to the costs incurred.

Many of our business activities are highly seasonal and operating results will vary throughout the year. Overall, our income is generally lowest during the second fiscal quarter and highest during the third fiscal quarter. Our business segments are subject to varying seasonal fluctuations. For example, in our Ag Business segment, our retail agronomy, crop nutrients and country operations businesses generally experience higher volumes and income during the spring planting season and in the fall, which corresponds to harvest. Also in our Ag Business segment, our grain marketing operations are subject to fluctuations in volume and earnings based on producer harvests, world grain prices and demand. Our Energy segment generally experiences higher volumes and profitability in certain operating areas, such

as refined products, in the summer and early fall when gasoline and diesel fuel usage is highest and is subject to global supply and demand forces. Other energy products, such as propane, may experience higher volumes and profitability during the winter heating and crop drying seasons.

Our revenues, assets and cash flows can be significantly affected by global market prices for commodities such as petroleum products, natural gas, grains, oilseeds, crop nutrients and flour. Changes in market prices for commodities that we purchase without a corresponding change in the selling prices of those products can affect

**Table of Contents**

revenues and operating earnings. Commodity prices are affected by a wide range of factors beyond our control, including the weather, crop damage due to disease or insects, drought, the availability and adequacy of supply, government regulations and policies, world events, and general political and economic conditions.

While our revenues and operating results are derived from businesses and operations which are wholly-owned and majority-owned, a portion of our business operations are conducted through companies in which we hold ownership interests of 50% or less and do not control the operations. We account for these investments primarily using the equity method of accounting, wherein we record our proportionate share of income or loss reported by the entity as equity income from investments, without consolidating the revenues and expenses of the entity in our Consolidated Statements of Operations. These investments principally include our 50% ownership in each of the following companies: Agriliance LLC (Agriliance), TEMCO, LLC (TEMCO) and United Harvest, LLC (United Harvest), and our 39.35% ownership in Multigrain S.A., included in our Ag Business segment; and our 50% ownership in Ventura Foods, LLC (Ventura Foods) and our 24% ownership in Horizon Milling, LLC (Horizon Milling) and Horizon Milling G.P., included in our Processing segment.

Cofina Financial, LLC (Cofina Financial), a joint venture company formed in 2005, makes seasonal and term loans to member cooperatives and businesses and to individual producers of agricultural products. Through August 31, 2008, we held a 49% ownership interest in Cofina Financial and accounted for our investment, included in Corporate and Other, using the equity method of accounting. On September 1, 2008, Cofina Financial became a wholly-owned subsidiary when we purchased the remaining 51% ownership interest for \$53.3 million. The purchase price included cash of \$48.5 million and the assumption of certain liabilities of \$4.8 million.

The general conditions most affecting revenues, cost of goods sold and earnings when comparing the current quarter or the first six months of this fiscal year with the same period of a year ago is the depreciation in commodity prices. Grain, processed grain, crude oil, finished energy products and fertilizer values all have declined dramatically from their extremely high values of a year ago. While we have maintained or improved sale volumes in most of our business operations (wholesale crop nutrients being an exception to this statement because of adverse fall weather conditions), revenues and the corresponding cost of goods sold have declined in most of our businesses compared to the corresponding period of last year because of the affect of lower per unit values.

Certain reclassifications have been made to prior period amounts to conform to current period classifications. These reclassifications had no effect on previously reported net income, equities or total cash flows.

**Results of Operations*****Comparison of the three months ended February 28, 2009 and February 29, 2008***

*General.* We recorded income before income taxes of \$96.3 million during the three months ended February 28, 2009 compared to \$197.4 million during the three months ended February 29, 2008, a decrease of \$101.1 million (51%). Operating results reflected lower pretax earnings in our Ag Business and Processing segments, along with Corporate and Other, which were partially offset by increased pretax earnings in our Energy segment.

Our Energy segment generated income before income taxes of \$75.1 million for the three months ended February 28, 2009 compared to \$44.7 million in the three months ended February 29, 2008. This increase in earnings of \$30.4 million (68%) is primarily from higher margins on refined fuels at both our Laurel, Montana refinery and our NCRA refinery in McPherson, Kansas. Earnings in our propane, equipment and renewable fuels marketing businesses also increased during the three months ended February 28, 2009 when compared to the same three-month period of the previous year. These increases in earnings were partially offset by reduced earnings in our lubricants and transportation businesses.

Our Ag Business segment generated income before income taxes of \$13.0 million for the three months ended February 28, 2009 compared to \$120.0 million in the three months ended February 29, 2008, a decrease in earnings of \$107.0 million (89%). Earnings from our wholesale crop nutrients business decreased \$44.3 million. The market prices for crop nutrients products fell significantly during our first half of fiscal 2009, and due to a wet fall season, we had a higher quantity of inventories on hand at the end of our first quarter than is typical at that time of year. Fertilizer margins realized were significantly reduced compared to the same period in the previous fiscal year. In

**Table of Contents**

order to reflect our wholesale crop nutrients inventories at net-realizable values, we made a lower-of-cost or market adjustment in this business of \$56.8 million in November, 2008, of which \$18.1 million is remaining at the end of the second quarter of fiscal 2009. A net gain from the sale of a 50% owned Canadian agronomy joint venture investment was exceeded by a decrease from our share of equity investment earnings in Agriliance (50% ownership interest), net of reduced allocated internal expenses, for a net improvement in agronomy earnings of \$1.1 million. Our grain marketing earnings decreased by \$61.2 million during the three months ended February 28, 2009 compared with the same three-month period in fiscal 2008, primarily from net decreased grain product margins and reduced earnings from our joint ventures. Volatility in the grain markets created opportunities for increased grain margins during fiscal 2008. Our country operations earnings decreased \$2.6 million, primarily as a result of reduced grain margins related to lower grain bushels sold.

Our Processing segment generated income before income taxes of \$9.2 million for the three months ended February 28, 2009 compared to income of \$28.0 million in the three months ended February 29, 2008, a decrease in earnings of \$18.8 million (67%). Oilseed processing earnings decreased \$8.9 million during the three months ended February 28, 2009 compared to the same period in the prior year, primarily due to reduced margins in our crushing operations, which were partially offset by improved margins in our refining operations. Our share of earnings from our wheat milling joint ventures, net of allocated internal expenses, decreased by \$11.9 million for the three months ended February 28, 2009 compared to the same period in the prior year, primarily as a result of reduced margins on the products sold. Our share of earnings from Ventura Foods, our packaged foods joint venture, net of allocated internal expenses, decreased by \$1.4 million during the three months ended February 28, 2009, compared to the same period in the prior year, primarily as a result of increased commodity prices, reducing margins on the products sold. Our losses, net of allocated internal expenses, related to VeraSun Energy Corporation (VeraSun), an ethanol manufacturing company in which we hold a minority ownership interest, decreased \$3.4 million for the three months ended February 29, 2008 compared to the same period in the prior year. Effective April 1, 2008, US BioEnergy and VeraSun completed a merger, and as a result of our change in ownership interest, we no longer have significant influence, and therefore account for VeraSun, the surviving entity, as an available-for-sale investment.

Corporate and Other generated a net loss before income taxes of \$1.1 million for the three months ended February 28, 2009 compared to income of \$4.7 million in the three months ended February 29, 2008, a decrease in earnings of \$5.8 (124%). This decrease is primarily attributable to reduced business volume related to our financial, insurance and hedging services. Lower commodity prices have reduced the need for customers to borrow, and lower volatility in commodity prices has affected hedging business volumes.

*Net Income.* Consolidated net income for the three months ended February 28, 2009 was \$82.3 million compared to \$168.0 million for the three months ended February 29, 2008, which represents an \$85.7 million (51%) decrease.

*Revenues.* Consolidated revenues were \$5.2 billion for the three months ended February 28, 2009 compared to \$6.9 billion for the three months ended February 29, 2008, which represents a \$1.7 billion (25%) decrease.

Total revenues include other revenues generated primarily within our Ag Business segment and Corporate and Other. Our Ag Business segment's country operations elevators and agri-service centers derive other revenues from activities related to production agriculture, which include grain storage, grain cleaning, fertilizer spreading, crop protection spraying and other services of this nature, and our grain marketing operations receive other revenues at our export terminals from activities related to loading vessels. Corporate and Other derives revenues primarily from our financing, hedging and insurance operations.

Our Energy segment revenues, after elimination of intersegment revenues, of \$1.5 billion decreased by \$839.1 million (36%) during the three months ended February 28, 2009 compared to the three months ended February 29, 2008. During the three months ended February 28, 2009 and February 29, 2008, our Energy segment recorded revenues

from our Ag Business segment of \$57.6 million and \$71.4 million, respectively. The net decrease in revenues of \$839.1 million is comprised of a decrease of \$883.9 million related to a reduction in prices on refined fuels, propane and renewable fuels marketing products and was partially offset by \$44.8 million related to a net increase in sales volume. Refined fuels revenues decreased \$597.7 million (41%), of which \$708.9 million was related to a net average selling price decrease, partially offset by \$111.2 million due to increased volumes, compared to the same period in the previous year. The average selling price of refined fuels decreased \$1.15 per gallon (45%),

**Table of Contents**

while volumes increased 8% when comparing the three months ended February 28, 2009 with the same period a year ago. Renewable fuels marketing revenues decreased \$156.2 million (59%), mostly from a 49% decrease in volumes, in addition to a decrease of \$0.40 (20%) per gallon, when compared with the same three-month period in the previous year. The decrease in renewable fuels marketing volumes was primarily attributable to the loss of two customers. Propane revenues decreased by \$10.6 million (3%), of which \$32.3 million related to a decrease in the net average selling price, partially offset by \$21.7 million related to an increase in volumes, when compared to the same period in the previous year. The average selling price of propane decreased \$0.13 per gallon (9%), while sales volume increased 7% in comparison to the same period of the prior year. The increase in propane volumes primarily reflects increased demand caused by colder temperatures improving home heating volumes.

Our Ag Business segment revenues, after elimination of intersegment revenues, of \$3.4 billion, decreased \$854.4 million (20%) during the three months ended February 28, 2009 compared to the three months ended February 29, 2008. Grain revenues in our Ag Business segment totaled \$2.8 billion and \$3.6 billion during the three months ended February 28, 2009 and February 29, 2008, respectively. Of the grain revenues decrease of \$782.2 million (22%), \$517.8 million is due to decreased average grain selling prices and \$264.4 million is attributable to decreased volumes during the three months ended February 28, 2009 compared to the same period last fiscal year. The average sales price of all grain and oilseed commodities sold reflected a decrease of \$1.27 per bushel (16%) over the same three-month period in fiscal 2008. The 2008 fall harvest produced good yields throughout most of the United States, with the quality of most grains rated as good. The average month-end market price per bushel of spring wheat, soybeans and corn decreased \$7.67, \$3.90 and \$1.22, respectively. Volumes decreased 7% during the three months ended February 28, 2009 compared with the same period of a year ago. Wheat and barley reflected the largest volume decreases, partially offset by increased volumes in soybeans, compared to the three months ended February 29, 2008.

Wholesale crop nutrient revenues in our Ag Business segment totaled \$325.8 million and \$397.9 million during the three months ended February 28, 2009 and February 29, 2008, respectively. Of the wholesale crop nutrient revenues decrease of \$72.1 million (18%), \$66.7 million is attributable to decreased volumes and \$5.4 million is due to decreased average fertilizer selling prices during the three months ended February 28, 2009 compared to the same period last fiscal year. Volumes decreased 17% during the three months ended February 28, 2009 compared with the same period of a year ago mainly due to higher fertilizer prices and a fall season that experienced excess moisture, making it difficult for farmers to spread fertilizers until spring. The average sales price of all fertilizers sold reflected a decrease of \$6 per ton (2%) over the same three-month period in fiscal 2008.

Our Ag Business segment non-grain or non-wholesale crop nutrients product revenues of \$247.5 million decreased by \$10.7 million (4%) during the three months ended February 28, 2009 compared to the three months ended February 28, 2009, primarily the result of decreased revenues in our country operations business of retail energy and seed products, partially offset by increased revenues of feed products. Other revenues within our Ag Business segment of \$43.0 million during the three months ended February 28, 2009 increased \$10.6 million (33%) compared to the three months ended February 29, 2008, primarily from grain handling and service revenues.

Our Processing segment revenues, after elimination of intersegment revenues, of \$269.9 million decreased \$20.1 million (7%) during the three months ended February 28, 2009 compared to the three months ended February 29, 2008. Because our wheat milling and packaged foods operations are operated through non-consolidated joint ventures, revenues reported in our Processing segment are entirely from our oilseed processing operations. Oilseed processing revenues decreased \$25.2 million (16%), of which \$19.7 million was due to a 12% decrease in sales volume and \$5.5 was related to lower average sales prices. Oilseed refining revenues increased \$1.1 million (1%), of which \$5.5 million was due to higher average sales prices, partially offset by a \$4.4 million or a 4% net decrease in sales volume. The average selling price of processed oilseed decreased \$11 per ton (4%) and the average selling price of refined oilseed products increased \$.02 per pound (5%) compared to the same three-month period of

fiscal 2008. The changes in the average selling price of products are primarily driven by the average lower price of soybeans.

*Cost of Goods Sold.* Consolidated cost of goods sold were \$5.0 billion for the three months ended February 28, 2009 compared to \$6.6 billion for the three months ended February 29, 2008, which represents a \$1.6 billion (25%) decrease.

**Table of Contents**

Our Energy segment cost of goods sold, after elimination of intersegment costs, of \$1.4 billion decreased by \$889.4 million (40%) during the three months ended February 28, 2009 compared to the same period of the prior year. The decrease in cost of goods sold is primarily due to decreased per unit costs for refined fuels products. On a more product-specific basis, the average cost of refined fuels decreased \$1.20 (47%) per gallon, while volumes increased 8% compared to the three months ended February 29, 2008. We process approximately 55,000 barrels of crude oil per day at our Laurel, Montana refinery and 80,000 barrels of crude oil per day at NCRA's McPherson, Kansas refinery. The average cost decrease is primarily related to lower input costs at our two crude oil refineries and lower average prices on the refined products that we purchased for resale compared to the three months ended February 29, 2008. The average per unit cost of crude oil purchased for the two refineries decreased 53% compared to the three months ended February 29, 2008. Renewable fuels marketing costs decreased \$155.1 million (59%), mostly from a 49% decrease in volumes driven by the loss of two customers, when compared with the same three-month period in the previous year. The average cost of propane decreased \$0.15 (11%) per gallon, while volumes increased 7% compared to the three months ended February 29, 2008. The increase in propane volumes primarily reflects increased demand caused by home heating.

Our Ag Business segment cost of goods sold, after elimination of intersegment costs, of \$3.3 billion, decreased \$770.4 million (19%) during the three months ended February 28, 2009 compared to the same period of the prior year. Grain cost of goods sold in our Ag Business segment totaled \$2.7 billion and \$3.5 billion during the three months ended February 28, 2009 and February 29, 2008, respectively. The cost of grains and oilseed procured through our Ag Business segment decreased \$730.0 million (21%) compared to the three months ended February 29, 2008. This is primarily the result of a \$1.17 (15%) decrease in the average cost per bushel and a 7% net decrease in bushels sold as compared to the prior year. Wheat and barley reflected the largest volume decreases, partially offset by increased volumes in soybeans, compared to the three months ended February 29, 2008. The average month-end market price per bushel of our primary grains decreased compared to the same three-month period a year ago.

Wholesale crop nutrients cost of goods sold in our Ag Business segment totaled \$350.6 million and \$378.4 million during the three months ended February 28, 2009 and February 29, 2008, respectively. This \$27.8 million (7%) decrease in wholesale crop nutrients cost of goods sold includes the continued market decline in the fertilizer business, as compared to the same period in fiscal 2008. In order to reflect our wholesale crop nutrients inventories at net-realizable values, we made a lower-of-cost or market adjustment in this business of \$56.8 million in November, 2008, of which \$18.1 million is remaining at the end of the second quarter of fiscal 2009. The average cost per ton of fertilizer increased \$85 (24%), excluding the lower-of-cost or market adjustment, while net volumes decreased 17% when compared to the same three-month period in the prior year. The net volume decrease is mainly due to higher fertilizer prices that discouraged purchases and a fall season with adverse weather conditions, making it difficult for farmers to spread fertilizers until spring.

Our Ag Business segment cost of goods sold, excluding the cost of grains and wholesale crop nutrients procured through this segment, decreased during the three months ended February 28, 2009 compared to the three months ended February 29, 2008, primarily due to lower price per unit costs for retail crop protection and energy products. These decreases were partially offset by volume increases, which resulted primarily from acquisitions made and reflected in the reporting periods.

Our Processing segment cost of goods sold, after elimination of intersegment costs, of \$261.3 million decreased \$12.3 million (5%) compared to the three months ended February 29, 2008, which was primarily due to decreased volumes of processed soybeans.

*Marketing, General and Administrative.* Marketing, general and administrative expenses of \$99.0 million for the three months ended February 28, 2009 increased by \$24.0 million (32%) compared to the three months ended February 29, 2008. This net increase includes the consolidation of Cofina Financial, additional allowances for bad

debt mostly within our Ag Business segment, expansion of foreign operations, other acquisitions and general inflation.

*(Gain) Loss on Investments.* Net gain on investments of \$3.0 million for the three months ended February 28, 2009 compared to \$0.2 million for the three months ended February 29, 2008, reflects an increase in earnings of \$2.8 million and primarily relates to a gain on the sale of a Canadian agronomy investment during the three months

**Table of Contents**

ended February 28, 2009. We recorded a slight gain in our Processing segment for the three months ended February 29, 2008 of \$0.2 million.

*Interest, net.* Net interest of \$13.8 million for the three months ended February 28, 2009 decreased \$4.3 million (24%) compared to the same period last fiscal year. Interest expense for the three months ended February 28, 2009 and February 29, 2008 was \$18.7 million and \$22.1 million, respectively. Interest income, generated primarily from marketable securities, was \$4.9 million and \$4.0 million, for the three months ended February 28, 2009 and February 29, 2008, respectively. The interest expense decrease of \$3.4 million (15%) was in spite of an increase in interest expense of \$2.2 million as the result of the consolidation of Cofina Financial and an increase in interest expense of \$2.9 million due to less capitalized interest related to construction projects. Through August 31, 2008, we held a 49% ownership interest in Cofina Financial and accounted for our investment using the equity method of accounting. On September 1, 2008, we purchased Cenex Finance Association's 51% ownership interest. These increases were more than offset by decreases in the average short-term borrowings for loans, excluding those of Cofina Financial. For the three months ended February 28, 2009 and February 29, 2008, we capitalized interest of \$1.3 million and \$4.2 million, respectively, primarily related to construction projects in our Energy segment. The average level of short-term borrowings decreased \$620.3 million during the three months ended February 28, 2009, compared to the same three-month period in fiscal 2008. This dramatic reduction in short-term borrowings was the result of the lower commodity prices, which reduced working capital needs. The net increase in interest income of \$0.9 million (22%) was primarily within Corporate and Other and relates to marketable securities.

*Equity Income from Investments.* Equity income from investments of \$10.4 million for the three months ended February 28, 2009 decreased \$35.0 million (77%) compared to the three months ended February 29, 2008. We record equity income or loss from the investments in which we have an ownership interest of 50% or less and have significant influence, but not control, for our proportionate share of income or loss reported by the entity, without consolidating the revenues and expenses of the entity in our Consolidated Statements of Operations. The net decrease in equity income from investments was attributable to reduced earnings from investments in our Ag Business, Processing and Energy segments and Corporate and Other of \$21.3 million, \$11.8 million, \$0.6 million and \$1.3 million, respectively.

Our Ag Business segment generated reduced equity investment earnings of \$21.3 million. Our share of equity investment earnings or losses in agronomy decreased earnings by \$1.8 million mostly from reduced retail margins, which was partially offset by improved earning of a Canadian agronomy joint venture. We had a net decrease of \$19.2 million from our share of equity investment earnings in our grain marketing joint ventures during the three months ended February 28, 2009 compared to the same period the previous year, which is primarily related to decreased export margins. Our country operations business reported an aggregate decrease in equity investment earnings of \$0.3 million from several small equity investments.

Our Processing segment generated reduced equity investment earnings of \$11.8 million. Ventura Foods, our vegetable oil-based products and packaged foods joint venture, recorded reduced earnings of \$1.7 million compared to the same three-month period in fiscal 2008. Ventura Foods' decrease in earnings was primarily due to higher commodity prices resulting in lower margins on the products sold. A shifting demand balance for soybeans for both food and renewable fuels meant addressing supply and price challenges for both CHS and our Ventura Foods joint venture. Horizon Milling, our domestic and Canadian wheat milling joint ventures, recorded reduced earnings of \$11.6 million, net. Volatility in the grain markets created opportunities for increased wheat margins for Horizon Milling during the second quarter of fiscal 2008 and has continued with reduced margins in fiscal 2009. Typically, results are affected by U.S. dietary habits and although the preference for a low carbohydrate diet appears to have reached the bottom of its cycle, milling capacity, which had been idled over the past few years because of lack of demand for flour products, can easily be put back into production as consumption of flour products increases, which may depress gross margins in the milling industry. During our second fiscal quarter of 2008, we recorded equity losses of \$1.4 million related to

US BioEnergy, an ethanol manufacturing company in which we held a minority ownership interest. Effective April 1, 2008, US BioEnergy and VeraSun completed a merger, and as a result of our change in ownership interest we no longer have significant influence, and therefore account for VeraSun, the surviving entity, as an available-for-sale investment.

**Table of Contents**

Our Energy segment generated decreased equity investment earnings of \$0.6 million related to an equity investment held by NCRA.

Corporate and Other generated reduced equity investment earnings of \$1.4 million, as compared to the three months ended February 29, 2008, primarily due to our consolidating Cofina Financial.

*Minority Interests.* Minority interests of \$19.4 million for the three months ended February 28, 2009 increased by \$6.5 million (51%) compared to the three months ended February 29, 2008. This net increase was a result of more profitable operations within our majority-owned subsidiaries compared to the same three-month period in the prior year. Substantially all minority interests relate to NCRA, an approximately 74.5% owned subsidiary, which we consolidate in our Energy segment.

*Income Taxes.* Income tax expense of \$14.0 million for the three months ended February 28, 2009 compared with \$29.3 million for the three months ended February 29, 2008, resulting in effective tax rates of 14.5% and 14.9%, respectively. The federal and state statutory rate applied to nonpatronage business activity was 38.9% for the three-month periods ended February 28, 2009 and February 29, 2008. The income taxes and effective tax rate vary each year based upon profitability and nonpatronage business activity during each of the comparable years.

***Comparison of the six months ended February 28, 2009 and February 29, 2008***

*General.* We recorded income before income taxes of \$252.4 million during the six months ended February 28, 2009 compared to \$535.2 million during the six months ended February 29, 2008, a decrease of \$282.8 million (53%). Included in the results for the first fiscal quarter of 2008 was a \$91.7 million gain on the sale of all of our 1,610,396 shares of CF Industries Holdings stock. Included in the results for the first fiscal quarter of 2009 were a \$15.7 million gain on the sale of all of our 180,000 shares of NYMEX Holdings stock, and a \$70.7 million impairment loss on our investment in VeraSun. Operating results reflected lower pretax earnings in our Ag Business and Processing segments and Corporate and Other, which were partially offset by increased pretax earnings in our Energy segment.

Our Energy segment generated income before income taxes of \$259.8 million for the six months ended February 28, 2009 compared to \$153.2 million in the six months ended February 29, 2008. This increase in earnings of \$106.6 million (70%) is primarily from higher margins on refined fuels at both our Laurel, Montana refinery and our NCRA refinery in McPherson, Kansas. In our first quarter of fiscal 2009, we sold all of our 180,000 shares of NYMEX Holdings stock for proceeds of \$16.1 million and recorded a pretax gain of \$15.7 million. Earnings in our propane, equipment and renewable fuels marketing businesses improved, while our lubricants and transportation businesses decreased earnings during the six months ended February 28, 2009 when compared to the same six-month period of the previous year.

Our Ag Business segment generated income before income taxes of \$32.7 million for the six months ended February 28, 2009 compared to \$324.7 million in the six months ended February 29, 2008, a decrease in earnings of \$292.0 million (90%). In our first fiscal quarter of 2008, we sold all of our 1,610,396 shares of CF Industries Holdings stock for proceeds of \$108.3 million and recorded a pretax gain of \$91.7 million. Earnings from our wholesale crop nutrients business decreased \$94.4 million. The market prices for crop nutrients products fell significantly during our first half of fiscal 2009, and due to a wet fall season, we had a higher quantity of inventories on hand at the end of our first quarter than is typical at that time of year. In order to reflect our wholesale crop nutrients inventories at net-realizable values, we made a lower-of-cost or market adjustment in this business of \$56.8 million in November, 2008, of which \$18.1 million is remaining at the end of the second quarter of fiscal 2009. A gain on the sale of a Canadian agronomy equity investment along with improved performance by Agriliance, an agronomy joint venture in which we hold a 50% interest, resulted in a \$4.7 million increase in earnings from these investments, net of allocated

internal expenses. Our grain marketing earnings decreased by \$93.8 million during the six months ended February 28, 2009 compared with the same six-month period in fiscal 2008, primarily from net decreased grain product margins and reduced earnings from our joint ventures. Volatility in the grain markets created exceptional opportunities for grain margins during the first half of fiscal 2008. Our country operations earnings decreased \$16.8 million, primarily as a result of reduced grain volumes and decreased crop nutrient margins.

**Table of Contents**

Our Processing segment generated a net loss before income taxes of \$43.5 million for the six months ended February 28, 2009 compared to income of \$48.2 million in the six months ended February 29, 2008, a decrease in earnings of \$91.7 million. Our losses related to VeraSun increased \$68.1 million for the six months ended February 28, 2009 compared to the same period in the prior year. Effective April 1, 2008, US BioEnergy and VeraSun completed a merger, and as a result of our change in ownership interest, we no longer have significant influence, and therefore account for VeraSun, the surviving entity, as an available-for-sale investment. During the first fiscal quarter ended November 30, 2008, we recorded a \$70.7 million impairment on our investment in VeraSun, as further discussed below in (gain) loss on investments. Oilseed processing earnings decreased \$1.8 million during the six months ended February 28, 2009 compared to the same period in the prior year, primarily due to reduced margins and volumes in our crushing operations, partially offset by improved margins in our refining operations. Our share of earnings from our wheat milling joint ventures, net of allocated internal expenses, decreased by \$14.9 million for the six months ended February 28, 2009 compared to the same period in the prior year, primarily as a result of reduced margins on the products sold. Our share of earnings from Ventura Foods, our packaged foods joint venture, net of allocated internal expenses, decreased by \$6.9 million during the six months ended February 28, 2009, compared to the same period in the prior year, primarily as a result of increased commodity prices, reducing margins on the products sold.

Corporate and Other generated income before income taxes of \$3.3 million for the six months ended February 28, 2009 compared to \$9.1 million in the six months ended February 29, 2008, a decrease in earnings of \$5.8 million (64%). This decrease is primarily attributable to our hedging, insurance and financial services.

*Net Income.* Consolidated net income for the six months ended February 28, 2009 was \$219.5 million compared to \$468.9 million for the six months ended February 29, 2008, which represents a \$249.4 million (53%) decrease.

*Revenues.* Consolidated revenues were \$12.9 billion for the six months ended February 28, 2009 compared to \$13.4 billion for the six months ended February 29, 2008, which represents a \$505.7 million (4%) decrease.

Total revenues include other revenues generated primarily within our Ag Business segment and Corporate and Other. Our Ag Business segment's country operations elevators and agri-service centers derive other revenues from activities related to production agriculture, which include grain storage, grain cleaning, fertilizer spreading, crop protection spraying and other services of this nature, and our grain marketing operations receive other revenues at our export terminals from activities related to loading vessels. Corporate and Other derives revenues primarily from our financing, hedging and insurance operations.

Our Energy segment revenues, after elimination of intersegment revenues, of \$4.0 billion decreased by \$816.3 million (17%) during the six months ended February 28, 2009 compared to the six months ended February 29, 2008. During the six months ended February 28, 2009 and February 29, 2008, our Energy segment recorded revenues from our Ag Business segment of \$141.6 million and \$149.3 million, respectively. The net decrease in revenues of \$816.3 million is comprised of a net decrease of \$836.6 million related to lower prices on refined fuels, propane and renewable fuels marketing products, partially offset by \$20.3 million related to a net increase in sales volume. Refined fuels revenues decreased \$604.2 million (19%), of which \$707.7 million was related to a net average selling price decrease, partially offset by \$103.5 million, which was attributable to increased volumes, compared to the same period in the previous year. The sales price of refined fuels decreased \$0.53 per gallon (21%), while volumes increased 3% when comparing the six months ended February 28, 2009 with the same period a year ago. Renewable fuels marketing revenues decreased \$229.0 million (46%), mostly from a 43% decrease in volumes and a decrease of \$0.12 (6%) per gallon, when compared with the same six-month period in the previous year. The decrease in renewable fuels marketing volumes was primarily attributable to the loss of two customers. Propane revenues increased \$89.7 million (18%), of which \$110.6 million related to an increase in volumes, partially offset by \$20.9 million due to a decrease in the net average selling price, when compared to the same period in the previous year. Propane sales volume increased 22%,

while the average selling price of propane decreased \$0.05 per gallon (3%) in comparison to the same period of the prior year. The increase in propane volumes primarily reflects increased demand caused by an earlier home heating and improved crop drying season.

Our Ag Business segment revenues, after elimination of intersegment revenues, of \$8.4 billion, increased \$256.7 million (3%) during the six months ended February 28, 2009 compared to the six months ended February 29,

**Table of Contents**

2008. Grain revenues in our Ag Business segment totaled \$6.6 billion and \$6.5 billion during the six months ended February 28, 2009 and February 29, 2008, respectively. Of the grain revenues increase of \$112.8 million (2%), \$281.6 million is attributable to increased average grain selling prices, partially offset by \$168.8 million due to a 3% decrease in volumes during the six months ended February 28, 2009 compared to the same period last fiscal year. The average sales price of all grain and oilseed commodities sold reflected an increase of \$0.33 per bushel (4%) over the same six-month period in fiscal 2008. The 2008 fall harvest produced good yields throughout most of the United States, with the quality of most grains rated as good. The average month-end market price per bushel of wheat, soybeans and corn decreased approximately \$5.00, \$2.33 and \$0.43 when compared to the six months ended February 29, 2008, respectively.

Wholesale crop nutrient revenues in our Ag Business segment totaled \$959.3 million and \$931.3 million during the six months ended February 28, 2009 and February 29, 2008, respectively. Of the wholesale crop nutrient revenues increase of \$28.0 million (3%), \$311.1 million is due to increased average fertilizer selling prices, partially offset by \$283.1 million which is attributable to decreased volumes during the six months ended February 28, 2009 compared to the same period last fiscal year. The average sales price of all fertilizers sold reflected an increase of \$171 per ton (48%) over the same six-month period in fiscal 2008. Volumes decreased 30% during the six months ended February 28, 2009 compared with the same period of a year ago mainly due to higher fertilizer prices and adverse weather conditions this past fall, making it difficult for farmers to spread fertilizers until spring.

Our Ag Business segment non-grain or non-wholesale crop nutrients product revenues of \$731.1 million increased by \$99.9 million (16%) during the six months ended February 28, 2009 compared to the six months ended February 28, 2008, primarily the result of increased revenues in our country operations business of retail crop nutrients, crop protection and feed products. Other revenues within our Ag Business segment of \$90.6 million during the six months ended February 28, 2009 increased \$16.0 million (21%) compared to the six months ended February 29, 2008, primarily from grain handling and service revenues.

Our Processing segment revenues, after elimination of intersegment revenues, of \$580.2 million increased \$47.0 million (9%) during the six months ended February 28, 2009 compared to the six months ended February 29, 2008. Because our wheat milling and packaged foods operations are operated through non-consolidated joint ventures, revenues reported in our Processing segment are entirely from our oilseed processing operations. Oilseed refining revenues increased \$41.6 million (17%), of which \$57.7 million was due to higher average sales prices, partially offset by a \$16.1 million or a 7% net decrease in sales volume. Oilseed processing revenues decreased \$4.8 million (2%), of which \$19.7 million was due to a 7% net decrease in sales volume, partially offset by \$14.9 million, which was due to higher average sales prices. The average selling price of processed oilseed increased \$14 per ton (6%) and the average selling price of refined oilseed products increased \$0.11 per pound (26%) compared to the same six-month period of fiscal 2008. The changes in the average selling price of products are primarily driven by the higher average price of soybeans.

*Cost of Goods Sold.* Consolidated cost of goods sold were \$12.4 billion for the six months ended February 28, 2009 compared to \$12.8 billion for the six months ended February 29, 2008, which represents a \$469.0 million (4%) decrease.

Our Energy segment cost of goods sold, after elimination of intersegment costs, of \$3.6 billion decreased by \$941.5 million (21%) during the six months ended February 28, 2009 compared to the same period of the prior year. The decrease in cost of goods sold is primarily due to decreased per unit costs for refined fuels products. On a more product-specific basis, the average cost of refined fuels decreased \$0.60 (24%) per gallon, while volumes increased 3% compared to the six months ended February 29, 2008. We process approximately 55,000 barrels of crude oil per day at our Laurel, Montana refinery and 80,000 barrels of crude oil per day at NCRA's McPherson, Kansas refinery. The average cost decrease is primarily related to lower input costs at our two crude oil refineries and lower average

prices on the refined products that we purchased for resale compared to the six months ended February 29, 2008. The average per unit cost of crude oil purchased for the two refineries decreased 30% compared to the six months ended February 29, 2008. Renewable fuels marketing costs decreased \$227.2 million (46%), mostly from a 43% decrease in volumes driven by the loss of two customers, when compared with the same six-month period in the previous year. The average cost of propane decreased \$0.06 (4%) per gallon, while volumes increased 22%

**Table of Contents**

compared to the six months ended February 29, 2008. The increase in propane volumes primarily reflects increased demand caused by an earlier home heating season and an improved crop drying season.

Our Ag Business segment cost of goods sold, after elimination of intersegment costs, of \$8.2 billion, increased \$425.4 million (6%) during the six months ended February 28, 2009 compared to the same period of the prior year. Grain cost of goods sold in our Ag Business segment totaled \$6.4 billion and \$6.2 billion during the six months ended February 28, 2009 and February 29, 2008, respectively. The cost of grains and oilseed procured through our Ag Business segment increased \$193.3 million (3%) compared to the six months ended February 29, 2008. This is primarily the result of a \$0.42 (6%) increase in the average cost per bushel, partially offset by a 3% net decrease in bushels sold as compared to the prior year. Wheat and barley volumes decreased while soybeans and corn reflected increases compared to the six months ended February 29, 2008. The average month-end market price per bushel of spring wheat, soybeans and corn decreased compared to the same six-month period a year ago.

Wholesale crop nutrients cost of goods sold in our Ag Business segment totaled \$1,006.7 million and \$888.6 million during the six months ended February 28, 2009 and February 29, 2008, respectively. Of this \$118.1 million (13%) increase in wholesale crop nutrients cost of goods sold, \$56.8 million is due to the lower-of-cost or market adjustment on inventories, as previously discussed. The average cost per ton of fertilizer increased \$203.2 (60%), excluding the lower-of-cost or market adjustment, while net volumes decreased 30% when compared to the same six-month period in the prior year. The net volume decrease is mainly due to higher fertilizer prices and a wetter fall, making it difficult for farmers to spread fertilizers.

Our Ag Business segment cost of goods sold, excluding the cost of grains and wholesale crop nutrients procured through this segment, increased during the six months ended February 28, 2009 compared to the six months ended February 29, 2008, primarily due to higher volumes and price per unit costs for retail crop nutrients and feed products. The volume increases resulted primarily from acquisitions made and reflected in the reporting periods.

Our Processing segment cost of goods sold, after elimination of intersegment costs, of \$553.3 million increased \$46.7 million (9%) compared to the six months ended February 29, 2008, which was primarily due to increased costs of soybeans, partially offset by volume decreases.

*Marketing, General and Administrative.* Marketing, general and administrative expenses of \$186.7 million for the six months ended February 28, 2009 increased by \$45.3 million (32%) compared to the six months ended February 29, 2008. This net increase includes the consolidation of Cofina Financial, additional allowances for bad debt mostly within our Ag Business segment, expansion of foreign operations, other acquisitions and general inflation.

*(Gain) Loss on Investments.* Net loss on investments of \$52.0 million for the six months ended February 28, 2009 compared to a net gain on investments of \$95.2 million for the six months ended February 29, 2008, reflects a decrease in earnings of \$147.2 million. During our first quarter of fiscal 2009, we recorded a \$70.7 million impairment on our investment in VeraSun in our Processing segment. The impairment was based on VeraSun's market value of \$0.28 per share on its last day of trading, November 3, 2008. This loss was partially offset by a gain on investments in our Energy segment. We sold all of our 180,000 shares of NYMEX Holdings stock for proceeds of \$16.1 million and recorded a pretax gain of \$15.7 million. Also during the six months ended February 28, 2009, included in our Ag Business segment were gains on available for sale securities sold of \$3.0 million.

In our first fiscal quarter of 2008, we sold all of our 1,610,396 shares of CF Industries Holdings stock for proceeds of \$108.3 million and recorded a pretax gain of \$91.7 million. Also, during the six months ended February 29, 2008, included in our Energy and Ag Business segments and Corporate and Other were gains on available-for-sale securities sold of \$17 thousand, \$2.9 million and \$1.0 million, respectively. These gains were partially offset by losses on investments of \$0.4 million in our Processing segment.

*Interest, net.* Net interest of \$34.0 million for the six months ended February 28, 2009 increased \$2.3 million (7%) compared to the same period last fiscal year. Interest expense for the six months ended February 28, 2009 and February 29, 2008 was \$40.1 million and \$40.4 million, respectively. Interest income, generated primarily from marketable securities, was \$6.2 million and \$8.8 million, for the six months ended February 28, 2009 and

**Table of Contents**

February 29, 2008, respectively. The interest expense decrease of \$0.3 million (1%) is after the effect of an additional \$5.5 million of interest expense resulting from the consolidation of Cofina Financial and after the effect of an additional \$6.3 million of interest expense resulting from a reduction of capitalized interest on construction projects that were in progress during fiscal 2008. Through August 31, 2008, we held a 49% ownership interest in Cofina Financial and accounted for our investment using the equity method of accounting. On September 1, 2008, we purchased Cenex Finance Association's 51% ownership interest. For the six months ended February 28, 2009 and February 29, 2008, we capitalized interest of \$2.2 million and \$8.5 million, respectively, primarily related to construction projects in our Energy segment. These increases in interest expense were more than offset by decreases in the average short-term interest rate and short-term borrowings, excluding the borrowings of Cofina Financial to finance its own loan portfolio. The average short-term interest rate decreased 2.62% for loans excluding Cofina Financial, while the average level of short-term borrowings decreased \$569.0 million during the six months ended February 28, 2009, compared to the same six-month period in fiscal 2008, mostly due to decreased working capital needs resulting from the lower commodity prices. The net decrease in interest income of \$2.7 million (30%) was mostly at NCRA within our Energy segment, which primarily relates to marketable securities with interest yields considerably lower than a year ago.

*Equity Income from Investments.* Equity income from investments of \$31.1 million for the six months ended February 28, 2009 decreased \$45.5 million (59%) compared to the six months ended February 29, 2008. We record equity income or loss from the investments in which we have an ownership interest of 50% or less and have significant influence, but not control, for our proportionate share of income or loss reported by the entity, without consolidating the revenues and expenses of the entity in our Consolidated Statements of Operations. The net decrease in equity income from investments was attributable to reduced earnings from investments in our Processing, Ag Business and Energy segments and Corporate and Other of \$22.7 million, \$19.6 million, \$0.5 million and \$2.7 million, respectively.

Our Processing segment generated reduced equity investment earnings of \$22.7 million. Ventura Foods, our vegetable oil-based products and packaged foods joint venture, recorded reduced earnings of \$7.2 million compared to the same six-month period in fiscal 2008. Ventura Foods' decrease in earnings was primarily due to higher commodity prices resulting in lower margins on the products sold. A shifting demand balance for soybeans for both food and renewable fuels meant addressing supply and price challenges for both CHS and our Ventura Foods joint venture. Horizon Milling, our domestic and Canadian wheat milling joint ventures, recorded reduced earnings of \$14.8 million, net. Volatility in the grain markets created opportunities for increased wheat margins for Horizon Milling during the first half of fiscal 2008 and has continued with reduced margins in fiscal 2009. Typically, results are affected by U.S. dietary habits and although the preference for a low carbohydrate diet appears to have reached the bottom of its cycle, milling capacity, which had been idled over the past few years because of lack of demand for flour products, can easily be put back into production as consumption of flour products increases, which may depress gross margins in the milling industry. During the six months ended February 29, 2008, we recorded equity earnings of \$0.8 million related to US BioEnergy, an ethanol manufacturing company in which we held a minority ownership interest. Effective April 1, 2008, US BioEnergy and VeraSun completed a merger, and as a result of our change in ownership interest we no longer have significant influence, and therefore account for VeraSun, the surviving entity, as an available-for-sale investment.

Our Ag Business segment generated reduced equity investment earnings of \$19.6 million. Our share of equity investment earnings or losses in agronomy increased earnings by \$4.4 million including improved retail margins, and includes improved earnings of a Canadian agronomy joint venture. We had a net decrease of \$23.3 million from our share of equity investment earnings in our grain marketing joint ventures during the six months ended February 28, 2009 compared to the same period the previous year, which is primarily related to decreased export margins. Our country operations business reported an aggregate decrease in equity investment earnings of \$0.7 million from several small equity investments.

Our Energy segment generated increased equity investment earnings of \$0.5 million related to an equity investment held by NCRA.

Corporate and Other generated reduced earnings of \$2.7 million from equity investment earnings, as compared to the six months ended February 29, 2008, primarily due to our consolidating Cofina Financial.

**Table of Contents**

*Minority Interests.* Minority interests of \$41.5 million for the six months ended February 28, 2009 increased by \$5.7 million (16%) compared to the six months ended February 29, 2008. This net increase was a result of more profitable operations within our majority-owned subsidiaries compared to the same six-month period in the prior year. Substantially all minority interests relate to NCRA, an approximately 74.5% owned subsidiary, which we consolidate in our Energy segment.

*Income Taxes.* Income tax expense of \$32.9 million for the six months ended February 28, 2009 compared with \$66.2 million for the six months ended February 29, 2008, resulting in effective tax rates of 13.0% and 12.4%, respectively. During the six months ended February 28, 2009, we provided a valuation allowance of \$21.2 million related to deferred tax assets associated with the carryforward of certain capital losses. The federal and state statutory rate applied to nonpatronage business activity was 38.9% for the six-month periods ended February 28, 2009 and February 29, 2008. The income taxes and effective tax rate vary each year based upon profitability and nonpatronage business activity during each of the comparable years.

**Liquidity and Capital Resources**

On February 28, 2009, we had working capital, defined as current assets less current liabilities, of \$1,754.2 million and a current ratio, defined as current assets divided by current liabilities, of 1.5 to 1.0, compared to working capital of \$1,738.6 million and a current ratio of 1.4 to 1.0 on August 31, 2008. On February 29, 2008, we had working capital of \$1,563.0 million and a current ratio of 1.3 to 1.0 compared to working capital of \$821.9 million and a current ratio of 1.3 to 1.0 on August 31, 2007. During the six months ended February 29, 2008, increases in working capital included the impact of the cash received from additional long-term borrowings of \$600.0 million and the distribution of crop nutrients net assets from Agrilience, our agronomy joint venture.

On February 28, 2009, our committed lines of credit consisted of a five-year revolving facility in the amount of \$1.3 billion which expires in May 2011 and a 364-day revolving facility in the amount of \$300.0 million which expires in February 2010. These credit facilities are established with a syndication of domestic and international banks, and our inventories and receivables financed with them are highly liquid. On February 28, 2009, we had no outstanding balance on our five-year revolver compared with \$797.8 million outstanding on February 29, 2008. On February 28, 2009, we had no outstanding balance on our 364-day revolver compared to \$130.0 million outstanding on the facility in place on February 29, 2008. In addition, we have two commercial paper programs totaling \$125.0 million with banks participating in our five-year revolver. On February 28, 2009, we had no commercial paper outstanding compared with \$36.7 million outstanding on February 29, 2008. Due to the decline in commodity prices during the six months ended February 28, 2009, as further discussed in *Cash Flows from Operations*, our average borrowings have been much lower in comparison to the six months ended February 29, 2008. With our current available capacity on our committed lines of credit, we believe that we have adequate liquidity to cover any increase in net operating assets and liabilities and expected capital expenditures in the foreseeable future.

In addition, our wholly-owned subsidiary, Cofina Financial, makes seasonal and term loans to member cooperatives, businesses and individual producers of agricultural products included in our cash flows from investing activities, and has its own financing explained in further detail below in our cash flows from financing activities.

**Cash Flows from Operations**

Cash flows from operations are generally affected by commodity prices and the seasonality of our businesses. These commodity prices are affected by a wide range of factors beyond our control, including weather, crop conditions, drought, the availability and the adequacy of supply and transportation, government regulations and policies, world events, and general political and economic conditions. These factors are described in the cautionary statements and may affect net operating assets and liabilities, and liquidity.

Our cash flows provided by operating activities were \$934.2 million for the six months ended February 28, 2009, compared to cash flows used in operating activities of \$432.7 million for the six months ended February 29, 2008. The fluctuation in cash flows when comparing the two periods is primarily from a net decrease in operating assets and liabilities during the six months ended February 28, 2009, compared to a net increase in 2008. Commodity prices have declined significantly during the six months ended February 28, 2009, and have resulted in lower working capital needs compared to August 31, 2008. During the six months ended February 29, 2008,

**Table of Contents**

volatility in commodity prices had the opposite affect, and increased prices resulted in higher working capital needs when compared to August 31, 2007.

Our operating activities provided net cash of \$934.2 million during the six months ended February 28, 2009. Net income of \$219.5 million, net non-cash expenses and cash distributions from equity investments of \$205.9 million and a decrease in net operating assets and liabilities of \$508.8 million provided the cash flows from operating activities. The primary components of net non-cash expenses and cash distributions from equity investments included depreciation and amortization, including major repair costs, of \$107.3 million, loss on investments of \$52.0 million, minority interests of \$41.5 million and redemptions from equity investments, net of income from those investments, of \$10.1 million. Loss on investments was previously discussed in Results of Operations, and primarily includes the impairment of our VeraSun investment, partially offset by gains from the sales of an agronomy investment and our NYMEX Holdings common stock. The decrease in net operating assets and liabilities was caused primarily by a decline in commodity prices reflected in decreased receivables and inventories, partially offset by a decrease in accounts payable and accrued expenses and an increase in other current assets on February 28, 2009, when compared to August 31, 2008. On February 28, 2009, the per bushel market prices of our three primary grain commodities, corn, soybeans and spring wheat, decreased by \$2.18 (38%), \$4.58 (34%) and \$2.35 (27%), respectively, when compared to the prices on August 31, 2008. Crude oil market prices decreased \$70.70 (61%) per barrel between August 31, 2008 and February 28, 2009. In addition, on February 28, 2009, fertilizer commodity prices affecting our wholesale crop nutrients and country operations retail businesses generally had decreases between 21% and 66%, depending on the specific products, compared to prices on August 31, 2008. Partially offsetting the impact of the decline in commodity prices was an increase in our feed and farm supplies inventory as well as prepaid agronomy products, included in other current assets, in our Ag Business segment as we began building fertilizer inventories at our country operations retail locations in anticipation of spring planting. Grain inventory quantities also increased in our Ag Business segment by 49.0 million bushels (47%).

Our operating activities used net cash of \$432.7 million during the six months ended February 29, 2008. Net income of \$468.9 million and net non-cash expenses and cash distributions from equity investments of \$14.4 million were exceeded by an increase in net operating assets and liabilities of \$916.0 million. The primary components of net non-cash expenses and cash distributions from equity investments included depreciation and amortization, including major repair costs, of \$97.6 million, deferred tax of \$39.9 million and minority interests of \$35.8 million, partially offset by gains on investments of \$95.2 million and income from equity investments, net of redemptions from those investments of \$57.5 million. Losses and gains on investments were previously discussed in Results of Operations, and primarily include the gain on the sale of all of our shares of CF common stock. The increase in net operating assets and liabilities was caused primarily by increased commodity prices reflected in increased receivables, inventories, derivative assets and hedging deposits included in other current assets, partially offset by an increase in customer advance payments, derivative liabilities, and accounts payable and accrued expenses on February 29, 2008, when compared to August 31, 2007. On February 29, 2008, the per bushel market prices of our three primary grain commodities, spring wheat, soybeans and corn, increased by \$11.33 (164%), \$6.54 (75%) and \$2.22 (69%), respectively, when compared to the prices on August 31, 2007. Grain inventory quantities in our Ag Business segment increased by 6.8 million bushels (5%) when comparing inventories at February 29, 2008 to August 31, 2007. In addition, our feed and farm supplies inventories in our Ag Business segment increased significantly during the period as we began building fertilizer inventories at our country operations retail locations in anticipation of spring planting. In general, crude oil prices increased \$27.80 (38%) per barrel on February 29, 2008 when compared to August 31, 2007.

Crude oil prices are expected to remain relatively low in the foreseeable future. Grain prices are influenced significantly by global projections of grain stocks available until the next harvest, which has been affected by demand from the ethanol industry in recent years. Grain prices were volatile during fiscal 2008 and 2007, and although they have declined significantly during fiscal 2009, we anticipate continued price volatility, but within a narrower band of

real values.

Cash usage is usually greatest during the second quarter of our fiscal year as we build inventories at our retail operations in our Ag Business segment and make payments on deferred payment contracts which have accumulated over the course of the prior calendar year. Our net income has historically been the lowest during our second fiscal quarter and highest during our third fiscal quarter, although we can not ensure this historical trend will continue. We

**Table of Contents**

believe that we have adequate capacity through our committed credit facilities to meet any likely increase in net operating assets and liabilities.

**Cash Flows from Investing Activities**

For the six months ended February 28, 2009 and February 29, 2008, the net cash flows used in our investing activities totaled \$124.4 million and \$402.1 million, respectively.

Excluding investments, further discussed below, the acquisition of property, plant and equipment comprised the primary use of cash totaling \$136.8 million and \$187.3 million for the six months ended February 28, 2009 and February 29, 2008, respectively. Included in our acquisitions for the six months ended February 29, 2008, were expenditures of \$101.9 million for the installation of a coker unit at our Laurel, Montana refinery along with other refinery improvements that were completed during fiscal 2008.

For the year ending August 31, 2009, we expect to spend approximately \$503.9 million for the acquisition of property, plant and equipment. The EPA has passed a regulation that requires the reduction of the benzene level in gasoline to be less than 0.62% volume by January 1, 2011. As a result of this regulation, our refineries will incur capital expenditures to reduce the current gasoline benzene levels to the regulated levels. We anticipate the combined capital expenditures for benzene removal for our Laurel and NCRA refineries to be approximately \$130 million, of which \$73 million is included in budgeted capital expenditures for fiscal 2009.

Expenditures for major repairs related to our refinery turnarounds during the six months ended February 28, 2009 and February 29, 2008, were approximately \$1 thousand and \$21.7 million, respectively.

In October 2003, we and NCRA reached agreements with the EPA and the State of Montana's Department of Environmental Quality and the State of Kansas Department of Health and Environment regarding the terms of settlements with respect to reducing air emissions at our Laurel, Montana and NCRA's McPherson, Kansas refineries. These settlements are part of a series of similar settlements that the EPA has negotiated with major refiners under the EPA's Petroleum Refinery Initiative. The settlements take the form of consent decrees filed with the U.S. District Court for the District of Montana (Billings Division) and the U.S. District Court for the District of Kansas. Each consent decree details potential capital improvements, supplemental environmental projects and operational changes that we and NCRA have agreed to implement at the relevant refinery over several years. The consent decrees also required us and NCRA to pay approximately \$0.5 million in aggregate civil cash penalties. As of February 28, 2009, the aggregate capital expenditures for us and NCRA related to these settlements was approximately \$36 million, and we anticipate spending an additional \$5 million before December 2011. We do not believe that the settlements will have a material adverse effect on us or NCRA.

The Montana Department of Environmental Quality (MDEQ) issued a Notice of Violation to us dated September 4, 2007 alleging that our refinery in Laurel, Montana exceeded nitrogen oxides (NOx) limits under a refinery operating permit. Following receipt of the letter, we provided certain facts and explanations regarding the matter to the MDEQ. By letter dated June 27, 2008, the MDEQ has proposed a civil penalty of approximately \$0.2 million with respect to the incident. We intend to enter into settlement discussions with the MDEQ in an attempt to alleviate the civil penalty. We believe we are currently in compliance with the NOx limits under the permit, and do not believe that the civil penalty will have a material adverse effect on us.

Investments made during the six months ended February 28, 2009 and February 29, 2008, totaled \$90.2 million and \$321.2 million, respectively. During the six months ended February 28, 2009 and February 29, 2008, we invested \$76.3 million and \$30.3 million, respectively, in Multigrain AG (Multigrain), included in our Ag Business segment. The investment during the current fiscal year was for Multigrain's increased capital needs resulting from expansion of

their operations. Our current ownership interest in Multigrain is 39.35%. Also during the six months ended February 28, 2009, we made a \$10.0 million capital contribution to Ventura Foods, included in our Processing segment, with an additional \$25.0 million contribution to Ventura Foods in March 2009. In September 2007, Agriliance distributed its wholesale crop nutrients and crop protection assets to us and Land O Lakes, Inc. (Land O Lakes), respectively, and continues to operate primarily its retail distribution business until further repositioning of that business occurs. During the six months ended February 29, 2008, we made a \$13.0 million net cash payment to Land O Lakes in order to maintain equal capital accounts in Agriliance. During the same six-month period, our

**Table of Contents**

net contribution to Agrilience was \$240.0 million which supported their working capital requirements, with Land O Lakes making equal contributions, primarily for crop nutrient and crop protection product trade payables that were not assumed by us or Land O Lakes upon the distribution of the assets, as well as Agrilience's ongoing retail operations.

Cash acquisitions of businesses, net of cash received, totaled \$76.4 million and \$5.3 million during the six months ended February 28, 2009 and February 29, 2008, respectively. As previously discussed, through August 31, 2008, we held a 49% ownership interest in Cofina Financial and accounted for our investment using the equity method of accounting. On September 1, 2008, we purchased the remaining 51% ownership interest for \$53.3 million. The purchase price included cash of \$48.5 million and the assumption of certain liabilities of \$4.8 million. During the six months ended February 28, 2009, our Ag Business segment had acquisitions of \$36.2 million. During the six months ended February 29, 2008, we paid for a distillers dried grain business included in our Ag Business segment.

Various cash acquisitions of intangibles were \$1.3 million and \$1.9 million for the six months ended February 28, 2009 and February 29, 2008, respectively.

Partially offsetting our cash outlays for investing activities during the six months ended February 28, 2009, were changes in notes receivable that resulted in an increase in cash flows of \$123.6 million. Of this change, \$112.1 million of the increase in cash flows is from Cofina Financial notes receivable and the balance of \$11.5 million is primarily due to the reduction of related party notes receivable at NCRA from its minority owners, Growmark, Inc. and MFA Oil Company. During the six months ended February 29, 2008, changes in notes receivable resulted in a decrease in cash flows of \$6.4 million, primarily due to an increase in related party notes receivable at NCRA from its minority owners.

Also partially offsetting our cash outlays for investing activities for the six months ended February 28, 2009 and February 29, 2008, were proceeds from the sale of investments of \$41.6 million and \$114.2 million, respectively, which were previously discussed in *Results of Operations*, and primarily include proceeds from the sale of an agronomy investment and our NYMEX Holdings common stock during fiscal 2009, and our CF common stock during fiscal 2008. In addition, for the six months ended February 28, 2009 and February 29, 2008, we received redemptions of investments totaling \$10.0 million and \$34.2 million, respectively, and received proceeds from the disposition of property, plant and equipment of \$4.4 million and \$5.8 million, respectively.

**Cash Flows from Financing Activities***Working Capital Financing*

We finance our working capital needs through short-term lines of credit with a syndication of domestic and international banks. In May 2006, we renewed and expanded our committed lines of revolving credit to include a five-year revolver in the amount of \$1.1 billion, with the ability to expand the facility an additional \$200.0 million. In October 2007, we expanded that facility, receiving additional commitments in the amount of \$200.0 million from certain lenders under the agreement. The additional commitments increased the total borrowing capacity to \$1.3 billion on the facility, with no outstanding balance on February 28, 2009. In February 2009, we renewed our 364-day revolver with a syndication of banks for a committed amount of \$300.0 million, with no outstanding balance on February 28, 2009. In addition to these lines of credit, we have a committed revolving credit facility dedicated to NCRA, with a syndication of banks in the amount of \$15.0 million. In December 2008, the line of credit dedicated to NCRA was renewed for an additional year. Our wholly-owned subsidiary, CHS Europe S.A., has uncommitted lines of credit to finance its normal trade grain transactions, which are collateralized by \$17.4 million of inventories and receivables at February 28, 2009. On February 28, 2009, August 31, 2008 and February 29, 2008, we had total short-term indebtedness outstanding on these various facilities and other miscellaneous short-term notes payable

totaling \$17.4 million, \$106.2 million and \$971.0 million, respectively. Proceeds from our long-term borrowings of \$600.0 million during the six months ended February 29, 2008, were used to pay down our five-year revolver and is explained in further detail below.

During fiscal 2007, we instituted two commercial paper programs, totaling up to \$125.0 million, with two banks participating in our five-year revolving credit facility. Terms of our five-year revolving credit facility allow a

**Table of Contents**

maximum usage of commercial paper of \$200.0 million at any point in time. These commercial paper programs do not increase our committed borrowing capacity in that we are required to have at least an equal amount of undrawn capacity available on our five-year revolving facility as to the amount of commercial paper issued. On February 28, 2009 and August 31, 2008, we had no commercial paper outstanding, compared to \$36.7 million outstanding on February 29, 2008.

*Cofina Financial Financing*

Cofina Funding, LLC (Cofina Funding), a wholly-owned subsidiary of Cofina Financial, has available credit totaling \$255.2 million as of February 28, 2009, under note purchase agreements with various purchasers, through the issuance of short-term notes payable. Cofina Financial sells eligible commercial loans receivable it has originated to Cofina Funding, which are then pledged as collateral under the note purchase agreements. The notes payable issued by Cofina Funding bear interest at variable rates based on commercial paper and Eurodollar rates, with a weighted average commercial paper interest rate of 2.354% and a weighted average Eurodollar interest rate of 1.601% as of February 28, 2009. Borrowings by Cofina Funding utilizing the issuance of commercial paper under the note purchase agreements totaled \$269.2 million as of February 28, 2009. As of February 28, 2009, \$129.0 million of related loans receivable were accounted for as sales when they were surrendered in accordance with SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. As a result, the net borrowings under the note purchase agreements were \$140.2 million.

Cofina Financial also sells loan commitments it has originated to ProPartners Financial (ProPartners) on a recourse basis. The total capacity for commitments under the ProPartners program is \$120.0 million. The total outstanding commitments under the program totaled \$76.7 million as of February 28, 2009, of which \$49.0 million was borrowed under these commitments with an interest rate of 2.10%.

Cofina Financial also borrows funds under short-term notes issued as part of a surplus funds program. Borrowings under this program are unsecured and bear interest at variable rates ranging from 1.50% to 2.00% as of February 28, 2009, and are due upon demand. Borrowings under these notes totaled \$66.4 million as of February 28, 2009.

*Long-term Debt Financing*

We typically finance our long-term capital needs, primarily for the acquisition of property, plant and equipment, with long-term agreements with various insurance companies and banks. In June 1998, we established a long-term credit agreement through cooperative banks. This facility committed \$200.0 million of long-term borrowing capacity to us, with repayments through fiscal 2009. The amount outstanding on this credit facility was \$24.6 million, \$49.2 million and \$62.3 million on February 28, 2009, August 31, 2008 and February 29, 2008, respectively. Interest rates on February 28, 2009 ranged from 3.66% to 7.13%. Repayments of \$24.6 million and \$13.1 million were made on this facility during the six months ended February 28, 2009 and February 29, 2008, respectively.

Also in June 1998, we completed a private placement offering with several insurance companies for long-term debt in the amount of \$225.0 million with an interest rate of 6.81%. Repayments are due in equal annual installments of \$37.5 million each, in the years 2008 through 2013. During the six months ended February 28, 2009 and February 29, 2008, no repayments were due.

In January 2001, we entered into a note purchase and private shelf agreement with Prudential Insurance Company. The long-term note in the amount of \$25.0 million has an interest rate of 7.9% and is due in equal annual installments of approximately \$3.6 million in the years 2005 through 2011. A subsequent note for \$55.0 million was issued in March 2001, related to the private shelf facility. The \$55.0 million note has an interest rate of 7.43% and is due in equal annual installments of approximately \$7.9 million in the years 2005 through 2011. Repayments of \$3.6 million

were made during each of the six months ended February 28, 2009 and February 29, 2008.

In October 2002, we completed a private placement with several insurance companies for long-term debt in the amount of \$175.0 million, which was layered into two series. The first series of \$115.0 million has an interest rate of 4.96% and is due in equal semi-annual installments of approximately \$8.8 million during the years 2007 through 2013. The second series of \$60.0 million has an interest rate of 5.60% and is due in equal semi-annual installments

**Table of Contents**

of approximately \$4.6 million during years 2012 through 2018. Repayments of \$8.8 million were made on the first series notes during each of the six months ended February 28, 2009 and February 29, 2008.

In March 2004, we entered into a note purchase and private shelf agreement with Prudential Capital Group, and in April 2004, we borrowed \$30.0 million under this arrangement. One long-term note in the amount of \$15.0 million has an interest rate of 4.08% and is due in full at the end of the three-year term in 2010. Another long-term note in the amount of \$15.0 million has an interest rate of 4.39% and is due in full at the end of the seven-year term in 2011. In April 2007, we amended our Note Purchase and Private Shelf Agreement with Prudential Investment Management, Inc. and several other participating insurance companies to expand the uncommitted facility from \$70.0 million to \$150.0 million. We borrowed \$50.0 million under the shelf arrangement in February 2008, for which the aggregate long-term notes have an interest rate of 5.78% and are due in equal annual installments of \$10.0 million during the years 2014 through 2018.

In September 2004, we entered into a private placement with several insurance companies for long-term debt in the amount of \$125.0 million with an interest rate of 5.25%. Repayments are due in equal annual installments of \$25.0 million during years 2011 through 2015.

In October 2007, we entered into a private placement with several insurance companies and banks for long-term debt in the amount of \$400.0 million with an interest rate of 6.18%. Repayments are due in equal annual installments of \$80.0 million during years 2013 through 2017.

In December 2007, we established a ten-year long-term credit agreement through a syndication of cooperative banks in the amount of \$150.0 million, with an interest rate of 5.59%. Repayments are due in equal semi-annual installments of \$15.0 million each, starting in June 2013 through December 2018.

Through NCRA, we had revolving term loans outstanding of \$0.5 million and \$1.5 million on August 31, 2008 and February 29, 2008, respectively, with no outstanding balance on February 28, 2009. Repayments of \$0.5 million and \$1.5 million were made during the six months ended February 28, 2009 and February 29, 2008, respectively.

On February 28, 2009, we had total long-term debt outstanding of \$1,151.5 million, of which \$174.6 million was bank financing, \$954.0 million was private placement debt and \$22.9 million was industrial development revenue bonds, and other notes and contracts payable. The aggregate amount of long-term debt payable presented in the Management Discussion and Analysis in our Annual Report on Form 10-K for the year ended August 31, 2008, has not changed materially during the six months ended February 28, 2009. On February 29, 2008, we had long-term debt outstanding of \$1,259.7 million. Our long-term debt is unsecured except for other notes and contracts in the amount of \$10.9 million; however, restrictive covenants under various agreements have requirements for maintenance of minimum working capital levels and other financial ratios. We were in compliance with all debt covenants and restrictions as of February 28, 2009.

In December 2006, NCRA entered into an agreement with the City of McPherson, Kansas related to certain of its ultra-low sulfur fuel assets, with a cost of approximately \$325.0 million. The City of McPherson issued \$325.0 million of Industrial Revenue Bonds (IRBs) which were transferred to NCRA, as consideration in a financing agreement between the City of McPherson and NCRA, related to the ultra-low sulfur fuel assets. The term of the financing obligation is ten years, at which time NCRA has the option of extending the financing obligation or purchasing the assets for a nominal amount. NCRA has the right at anytime to offset the financing obligation to the City of McPherson against the IRBs. No cash was exchanged in the transaction and none is anticipated to be exchanged in the future. Due to the structure of the agreement, the financing obligation and the IRBs are shown net in our consolidated financial statements. In March 2007, notification was sent to the bond trustees to pay the IRBs down by \$324.0 million, at which time the financing obligation to the City of McPherson was offset against the IRBs. The

balance of \$1.0 million will remain outstanding until the final ten-year maturity.

We did not have any new long-term borrowings during the six months ended February 28, 2009. During the six months ended February 29, 2008, we borrowed \$600.0 million on a long-term basis. During the six months ended February 28, 2009 and February 29, 2008, we repaid long-term debt of \$39.0 million and \$30.2 million, respectively.

## **Table of Contents**

### *Other Financing*

Distributions to minority owners for the six months ended February 28, 2009 and February 29, 2008, were \$14.9 million and \$49.3 million, respectively, and were primarily related to NCRA.

During the six months ended February 28, 2009 and February 29, 2008, changes in checks and drafts outstanding resulted in a decrease in cash flows of \$52.9 million and an increase in cash flows of \$54.4 million, respectively.

In accordance with the bylaws and by action of the Board of Directors, annual net earnings from patronage sources are distributed to consenting patrons following the close of each fiscal year. Patronage refunds are calculated based on amounts using financial statement earnings. The cash portion of the patronage distribution is determined annually by the Board of Directors, with the balance issued in the form of capital equity certificates. Consenting patrons have agreed to take both the cash and the capital equity certificate portion allocated to them from our previous fiscal year's income into their taxable income, and as a result, we are allowed a deduction from our taxable income for both the cash distribution and the allocated capital equity certificates as long as the cash distribution is at least 20% of the total patronage distribution. The patronage earnings from the fiscal year ended August 31, 2008, were distributed during the six months ended February 28, 2009. The cash portion of this distribution, deemed by the Board of Directors to be 35%, was \$226.3 million. During the six months ended February 29, 2008, we distributed cash patronage of \$195.0 million.

Redemptions of capital equity certificates, approved by the Board of Directors, are divided into two pools, one for non-individuals (primarily member cooperatives) who may participate in an annual pro-rata program for equities held by them, and another for individuals who are eligible for equity redemptions at age 70 or upon death. The amount that each non-individual receives under the pro-rata program in any year is determined by multiplying the dollars available for pro-rata redemptions, if any that year, as determined by the Board of Directors, by a fraction, the numerator of which is the amount of patronage certificates eligible for redemption held by them, and the denominator of which is the sum of the patronage certificates eligible for redemption held by all eligible holders of patronage certificates that are not individuals. In addition to the annual pro-rata program, the Board of Directors approved additional equity redemptions to non-individuals in prior years targeting older capital equity certificates which were redeemed in cash in fiscal 2008 and 2007. In accordance with authorization from the Board of Directors, we expect total redemptions related to the year ended August 31, 2008, that will be distributed in fiscal 2009, to be approximately \$97.8 million, of which \$34.7 million was redeemed in cash during the six months ended February 28, 2009 compared to \$69.7 million during the six months ended February 29, 2008. We also redeemed \$49.9 million of capital equity certificates during the six months ended February 28, 2009, by issuing shares of our 8% Cumulative Redeemable Preferred Stock (Preferred Stock) pursuant to a Registration Statement on Form S-1 filed with the Securities and Exchange Commission. During the six months ended February 29, 2008, we redeemed \$46.4 million of capital equity certificates by issuing shares of our Preferred Stock.

Our Preferred Stock is listed on the NASDAQ Global Select Market under the symbol CHSCP. On February 28, 2009, we had 10,976,107 shares of Preferred Stock outstanding with a total redemption value of approximately \$274.4 million, excluding accumulated dividends. Our Preferred Stock accumulates dividends at a rate of 8% per year, which are payable quarterly, and is redeemable at our option. At this time, we have no current plan or intent to redeem any Preferred Stock. Dividends paid on our preferred stock during the six months ended February 28, 2009 and February 29, 2008, were \$9.0 million and \$7.2 million, respectively.

### **Off Balance Sheet Financing Arrangements**

#### *Lease Commitments:*

Our lease commitments presented in Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended August 31, 2008, have not materially changed during the six months ended February 28, 2009.

## **Table of Contents**

### ***Guarantees:***

We are a guarantor for lines of credit for related companies. As of February 28, 2009, our bank covenants allowed maximum guarantees of \$500.0 million, of which \$18.7 million was outstanding. All outstanding loans with respective creditors are current as of February 28, 2009.

### ***Debt:***

There is no material off balance sheet debt.

### ***Cofina Financial:***

The transfer of loans receivable of \$129.0 million were accounted for as sales when they were surrendered in accordance with SFAS No. 140 Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities .

## **Contractual Obligations**

Our contractual obligations are presented in Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended August 31, 2008. Since August 31, 2008, notes payable increased from the consolidation of Cofina Financial. In addition, commodity prices have declined significantly during the six months ended February 28, 2009. As a result, grain purchase contracts have declined between 51% and 68% compared to the year ended August 31, 2008. Fertilizer supply contracts have decreased 55% from August 31, 2008, primarily due to the recent depreciation of fertilizer prices.

## **Critical Accounting Policies**

Our Critical Accounting Policies are presented in our Annual Report on Form 10-K for the year ended August 31, 2008. There have been no changes to these policies during the six months ended February 28, 2009.

## **Effect of Inflation and Foreign Currency Transactions**

We believe that inflation and foreign currency fluctuations have not had a significant effect on our operations since we conduct essentially all of our business in U.S. dollars.

## **Recent Accounting Pronouncements**

In December 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 141R, Business Combinations. SFAS No. 141R provides companies with principles and requirements on how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree, as well as the recognition and measurement of goodwill acquired in a business combination. SFAS No. 141R also requires certain disclosures to enable users of the financial statements to evaluate the nature and financial effects of the business combination. Acquisition costs associated with the business combination will generally be expensed as incurred. SFAS No. 141R is effective for business combinations occurring in fiscal years beginning after December 15, 2008. Early adoption of SFAS No. 141R is not permitted. The impact on our consolidated financial statements of adopting SFAS No. 141R will depend on the nature, terms and size of business combinations completed after the effective date.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements, an Amendment of Accounting Research Bulletin (ARB) No. 51. This statement amends ARB No. 51 to establish accounting and reporting standards for the noncontrolling interest (minority interest) in a subsidiary and for the deconsolidation of a subsidiary. Upon its adoption, noncontrolling interests will be classified as equity in our Consolidated Balance Sheets. Income and comprehensive income attributed to the noncontrolling interest will be included in our Consolidated Statements of Operations and our Consolidated Statements of Equities and Comprehensive Income. SFAS No. 160 is effective for fiscal years beginning after December 15, 2008. The provisions of this standard must be applied retrospectively upon adoption. The adoption of SFAS No. 160 will effect the presentation of these items in our consolidated financial statements.

**Table of Contents**

In December 2008, the FASB issued FSP SFAS No. 132(R)-1, *Employers' Disclosures about Postretirement Benefit Plan Assets*, which expands the disclosure requirements about fair value measurements of plan assets for pension plans, postretirement medical plans, and other funded postretirement plans. This FSP is effective for fiscal years ending after December 15, 2009, with early adoption permitted. As FSP SFAS No. 132(R)-1 is only disclosure-related, it will not have an impact on our financial position or results of operations.

In April 2009, the FASB issued FSP SFAS No. 141R-1, *Accounting for Assets Acquired and Liabilities Assumed in a Business Combination That Arise from Contingencies*. This FSP amends and clarifies SFAS No. 141R on initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in a business combination. It is effective for business combinations occurring in fiscal years beginning on or after December 15, 2008. The impact on our consolidated financial statements of adopting SFAS No. 141R-1 will depend on the nature, terms and size of business combinations completed after the effective date.

**CAUTIONARY STATEMENTS FOR PURPOSES OF THE SAFE HARBOR PROVISIONS OF THE SECURITIES LITIGATION REFORM ACT**

Any statements contained in this report regarding the outlook for our businesses and their respective markets, such as projections of future performance, statements of our plans and objectives, forecasts of market trends and other matters, are forward-looking statements based on our assumptions and beliefs. Such statements may be identified by such words or phrases as *will likely result*, *are expected to*, *will continue*, *outlook*, *will benefit*, *is anticipated*, *estimated*, *project*, *management believes* or similar expressions. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those discussed in such statements and no assurance can be given that the results in any forward-looking statement will be achieved. For these statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. Any forward-looking statement speaks only as of the date on which it is made, and we disclaim any obligation to subsequently revise any forward-looking statement to reflect events or circumstances after such date or to reflect the occurrence of anticipated or unanticipated events.

Certain factors could cause our future results to differ materially from those expressed or implied in any forward-looking statements contained in this report. These factors include the factors discussed in Item 1A of our Annual Report on Form 10-K for the fiscal year ended August 31, 2008 under the caption *Risk Factors*, the factors discussed below and any other cautionary statements, written or oral, which may be made or referred to in connection with any such forward-looking statements. Since it is not possible to foresee all such factors, these factors should not be considered as complete or exhaustive.

Our revenues and operating results could be adversely affected by changes in commodity prices.

Our operating results could be adversely affected if our members were to do business with others rather than with us.

We participate in highly competitive business markets in which we may not be able to continue to compete successfully.

Changes in federal income tax laws or in our tax status could increase our tax liability and reduce our net income.

We incur significant costs in complying with applicable laws and regulations. Any failure to make the capital investments necessary to comply with these laws and regulations could expose us to financial liability.

Environmental liabilities could adversely affect our results and financial condition.

Actual or perceived quality, safety or health risks associated with our products could subject us to liability and damage our business and reputation.

Our operations are subject to business interruptions and casualty losses; we do not insure against all potential losses and could be seriously harmed by unexpected liabilities.

**Table of Contents**

Our cooperative structure limits our ability to access equity capital.

Consolidation among the producers of products we purchase and customers for products we sell could adversely affect our revenues and operating results.

If our customers choose alternatives to our refined petroleum products our revenues and profits may decline.

Operating results from our agronomy business could be volatile and are dependent upon certain factors outside of our control.

Technological improvements in agriculture could decrease the demand for our agronomy and energy products.

We operate some of our business through joint ventures in which our rights to control business decisions are limited.

**Item 3. *Quantitative and Qualitative Disclosures About Market Risk***

We did not experience any material changes in market risk exposures for the period ended February 28, 2009, that affect the quantitative and qualitative disclosures presented in our Annual Report on Form 10-K for the year ended August 31, 2008.

**Item 4T. *Controls and Procedures***

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act )) as of February 28, 2009. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of that date, our disclosure controls and procedures were effective.

During the second fiscal quarter ended February 28, 2009, there was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**Table of Contents****PART II. OTHER INFORMATION****Item 1. *Legal Proceedings***

The Montana Department of Environmental Quality (MDEQ) issued a Notice of Violation to us dated September 4, 2007 alleging that our refinery in Laurel, Montana exceeded nitrogen oxides (NOx) limits under a refinery operating permit. Following receipt of the letter, we provided certain facts and explanations regarding the matter to the MDEQ. By letter dated June 27, 2008, the MDEQ has proposed a civil penalty of approximately \$0.2 million with respect to the incident. We intend to enter into settlement discussions with the MDEQ in an attempt to alleviate the civil penalty. We believe we are currently in compliance with the NOx limits under the permit, and do not believe that the civil penalty will have a material adverse affect on us.

**Item 1A. *Risk Factors***

There were no material changes to our risk factors during the period covered by this report. See the discussion of risk factors in Item 1A of our Annual Report on Form 10-K for the fiscal year ended August 31, 2008.

**Item 4. *Submission of Matters to a Vote of Security Holders***

We held our Annual Meeting December 4-5, 2008, and the following directors were re-elected to the Board of Directors for a three-year term on December 5, 2008: Curt Eischens, Jerry Hasnedl, Richard Owen, Bruce Anderson, and Dan Schurr. Newly elected for a three-year term was Greg Kruger. The following directors terms of office continued after the meeting: Donald Anthony, Robert Bass, Dennis Carlson, Steve Fritel, David Kayser, Jim Kile, Randy Knecht, Michael Mulcahey, Steve Riegel, Duane Stenzel, and Michael Toelle.

Our members adopted a resolution to amend our Bylaws during our Annual Meeting held December 4-5, 2008, to add the remaining unassigned states to one of the existing eight regions used for the nomination and election of directors.

**Item 6. *Exhibits***

<b>Exhibit</b>	<b>Description</b>
10.1	Second Amendment to Credit Agreement (364-day Revolving Loan) by and between CHS Inc., CoBank, ACB and the Syndication Parties dated as of February 10, 2009 (Incorporated by reference to our Current Report on Form 8-K, filed February 11, 2009)
10.2	Fifth Amendment to 2006 Amended and Restated Credit Agreement by and among CHS Inc., CoBank, ACB and the Syndication Parties dated February 10, 2009 (Incorporated by reference to our Current Report on Form 8-K, filed February 11, 2009)
10.3	Amendment No. 1 to Note Purchase Agreement (Series 2008-A) dated February 25, 2009, by and among Cofina Funding LLC, as the Issuer; Victory Receivables Corporation, as the Conduit Purchaser; and The Bank of Tokyo-Mitsubishi UFJ, Ltd., New York Branch, as the Funding Agent and as a Committed Purchaser (Incorporated by reference to our Current Report on Form 8-K, filed March 2, 2009)
31.1	Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2	Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
32.1	Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

32.2 Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002
