ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2007

(UNAUDITED)

1. The unaudited condensed consolidated financial statements presented herein have been prepared in accordance with the instructions to Form 10-QSB and do not include all of the information and disclosures required by U.S. Generally Accepted Accounting Principles. Therefore, these financial statements should be read in conjunction with the consolidated financial statements and related footnotes included in the Company's Form 10-KSB for the year ended December 31, 2006. These financial statements reflect all adjustments that are, in the opinion of management, necessary to fairly state the results for the interim periods reported. Certain amounts from the prior period have been reclassified to be consistent with the current period presentation.

2. The Company's consolidated financial statements have been presented on the basis that it is a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company and its subsidiaries have reported recurring losses from operations, including a net loss of \$1,703,970 during the six months ended June 30, 2007, a working capital deficit of \$11,156,888, and a stockholders' deficit balance of \$8,413,673 as of June 30, 2007. These factors indicate the Company and its subsidiaries' ability to continue in existence is dependent upon their ability to obtain additional long-term debt and/or equity financing and achieve profitable operations. The consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company and its subsidiaries be unable to continue in existence. The results of operations for the three and six months ended June 30, 2007 are not necessarily indicative of the results to be expected for the full year.

3. In January, March, and June 2007 the Company entered into callable secured convertible debt financings (the "Notes") for a total of \$1,335,000 from the same investors as previous callable secured debt financings in 2005 and 2006. The Notes have three year terms, interest rates of 6% to 8% per annum, and are accompanied by Registration Rights Agreements. The Company received net proceeds of \$1,290,000 from the Notes and issued a total of 50,000,000 seven year warrants at an exercise price of \$0.01 per share.

The Notes are convertible into common stock at the lesser of \$0.10 or 55% of the market price of the Company's common stock, as defined. Additionally, the Notes are secured by substantially all of the Company's assets and are further secured by 14,550,558 common shares of the Company which are owned by an officer/stockholder.

The Notes have an additional provision that the Company may redeem the debt prior to maturity by paying all outstanding balances plus a 50% prepayment penalty.

The face amount of all the callable secured convertible notes and accrued interest was \$4,534,699 and \$3,191,759 as of June 30, 2007 and December 31, 2006, respectively.

The Notes are potentially convertible into an unlimited number of shares of common stock. Accordingly, the Company has accounted for the Notes under SFAS 133, EITF 00-19 and DIG's B38 and B39 which require the beneficial conversion

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2007

(UNAUDITED)

features and the prepayment penalties of each of the Notes to be treated as embedded derivatives, to be recorded as a collective liability equal to the estimated fair value of the embedded derivatives. The Notes were convertible into 588,921,991 and 586,181,548 common shares at June 30, 2007 and December 31, 2006, respectively, and the conversion and prepayment features had estimated fair values of \$5,598,128 and \$4,876,175, at June 30, 2007 and December 31, 2006, respectively. The fair value of the conversion features and the prepayment penalties were estimated using the Black-Scholes option pricing model and taking a weighted average value based on certain probabilities that the debt would be converted and paid off prior to maturity at specified dates. The estimated fair value of the conversion features and prepayment penalties exceeded the carrying value of the Notes and the change in this excess amount for each reporting period is recorded as a gain or loss on derivative instruments in the Condensed Consolidated Statements of Operations. As the Company's common stock is highly volatile, material gains or losses for the change in estimated fair value are likely to occur in future periods.

In addition, all non-employee warrants and options that are exercisable during the period in which the Notes are outstanding are required to be recorded as liabilities at their fair value. Non-employee warrants and options to acquire a total of 102,315,001 and 58,599,501 common shares were outstanding at June 30, 2007 and December 31, 2006, respectively, and had estimated fair values of \$1,169,824 and \$380,083 at June 30, 2007 and December 31, 2006, respectively.

Assumptions used to value these instruments included assuming the Notes would be converted to common stock in equal amounts on a monthly basis, beginning July 2007, until the estimated full conversion of each Note, assuming all warrants and options would be exercised on their respective expiration dates, using volatility rates ranging from 90% and 105% for June 30, 2007 and 87% to 109% for December 31, 2006, and using risk free interest rates ranging from 4.28% to 4.96% for June 30, 2007 and 4.625% to 4.75% for December 31, 2006.

During the period of January 1, 2007 to June 30, 2007, the Noteholders converted a total of \$128,150 of the Notes into 21.8 million common shares. Subsequent to June 30, 2007 through August 13, 2007 the Noteholders converted a total of \$213,175 of the Notes into 36.75 million common shares.

In connection with the above described Notes, the Company entered into Registration Rights Agreements (the "Agreements") with the Noteholders, whereby the Company has agreed to use its best efforts to file, and have declared effective, registration statements with the Securities and Exchange Commission (SEC) within a specified number of days from the date of the Notes. The Company is required under the Agreements to register a number of shares no less than 2 times the number of shares required to convert all the convertible Notes. Each of the Notes have three year terms and the last Notes were issued on June 27, 2007.

These arrangements are classified as registration payment arrangements under FSP EITF 00-19-2. This new standard became effective for the first quarter of

JUNE 30, 2007

(UNAUDITED)

2007 and requires the Company to evaluate the probability of incurring penalties related to non-performance of the requirements of the Agreements. The Agreements provide for a penalty of 2% per month of the outstanding principal balance of the Notes if various provisions of the Agreements are not met, which amounted to \$83,809 as of June 30, 2007. The penalties accrue for as long as the terms of the Agreements are not met. At the Company's election, the penalties may be settled in either cash or in the Company's common stock priced at the Conversion Price as defined in the Notes. As of June 30, 2007 our evaluation of the Agreements and the penalty provisions determined that the probability of incurring the penalties is remote, and accordingly, no amount for these penalties has been accrued.

4.

As of June 30, 2007 we have accrued for liabilities, including interest, of \$539,347 which relate to various lawsuits and claims for the collection of the funds due. These include 8 leases totaling \$372,300 (reflected in Capital Lease Obligations) plus \$54,835 in additional interest (reflected in Accrued Interest) and one trade payable totaling \$85,801 (reflected in Accounts Payable) plus \$26,411 in additional interest (reflected in Accrued Interest). The leases are individually secured by specified equipment.

The accrued interest noted above was recorded based on our assessment of three cases that are seeking \$251,522, which we believe are probable. The creditors have received judgments in these cases, but have taken no further collection action. The Company will continue to accrue interest until these cases are settled or paid in full.

The Company has a total of two cases, that originally sought \$171,853, that we deem to have a remote possibility of incurring an additional unrecorded loss. The Company has negotiated payment agreements on these cases and, as of June 30, 2007, the recorded liability for these cases was \$169,070. We are current in our payments under the respective settlement agreements.

In addition to the above leases that are subject to litigation, there are four leases, with a recorded liability of \$192,080, that are in default. As required by U.S. Generally Accepted Accounting Principles, the principal balance of the leases that are in default have been classified as current liabilities.

Successful settlement of the above claims is dependent on future financing.

The Company may become involved in a lawsuit or legal proceeding at any time in the ordinary course of business. Litigation is subject to inherent uncertainties, and an unexpected adverse result may arise that may adversely affect its business. Certain lawsuits have been filed against the Company for collection of funds due that are delinquent, as described above. The Company is not aware of any additional legal proceeding or claims that it believes will have, individually or in the aggregate, a material adverse affect on its business, financial condition or operating results.

Edgar Filing: ITRONICS INC - Form 10QSB

JUNE 30, 2007

(UNAUDITED)

5. In the first quarter of 2006 all of the Series 2000 Convertible Promissory Notes became due and are now in default. The total principal and interest due at June 30, 2007 is \$3,500,119. The Company is formulating a plan to seek extensions of these notes and has recorded these notes as current liabilities. No collection action has been taken to date.

6. Following is a summary of finished goods, work in progress, and raw materials inventories as of June 30, 2007 and December 31, 2006. The raw material and work in progress balances below include \$557,490 and \$405,631 in silver bearing unprocessed photochemicals or partially processed materials as of June 30, 2007 and December 31, 2006, respectively.

	June 30, <u>2007</u>	Dec. 31, <u>2006</u>
Finished goods	\$ 41,378	\$ 19,275
Work in progress	506,052	340,594
Raw materials	360,814	292,691
	908,244	652,560
Less: Silver recoverability and slow moving reserves	104,161	104,161
Net Inventory	\$804,083	\$548,399

7. The Company has outstanding three categories of warrants and options that may be exercised to acquire common stock; these include warrants, convertible debt options, and employee options. The following table summarizes warrant and option activity for the period January 1, 2006 through June 30, 2007:

	<u>Warrants</u>	<u>Convertible Debt Options</u>	<u>Employee Options</u>	<u>Total</u>
Under option, December 31, 2005	27,313,260	134,823,379	6,108,000	168,244,639
Granted	41,496,924	584,810,362	226,000	626,533,286

Edgar Filing: ITRONICS INC - Form 10QSB

Exercised	(100,000)	(111,222,642)	-	(111,322,642)
Expired/Adjusted	(10,110,683)	(22,229,551)	(12,000)	(32,352,234)
Under option, December 31, 2006	58,599,501	586,181,548	6,322,000	651,103,049
Granted	50,000,000	24,504,763	135,000	74,639,763
Exercised	-	(21,764,320)	-	(21,764,320)
Expired/Adjusted	(6,284,500)	-	-	(6,284,500)
Under option, June 30, 2007	102,315,001	588,921,991	6,457,000	697,693,992

The average price for all warrants and options granted and exercised was \$0.0087 for the six months ended June 30, 2007 and \$0.0146 for the year ended December 31, 2006.

13

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2007

(UNAUDITED)

The 22,229,551 in expired/adjusted convertible debt options in 2006 listed above is related to the 2000 Series Convertible Promissory Notes discussed in Note 5 above. If the Company is successful in negotiating extensions of these notes, the convertible options may be renewed and the eventual number of potential options could be significantly higher than the amount that was adjusted.

The following table summarizes the warrants and options outstanding as of June 30, 2007:

<u>Expiration Dates</u>	<u>No. of Shares</u>	<u>Exercise Price</u>	<u>Weighted Average Exercise Price</u>
<u>Warrants:</u>			
January to June 2014	50,000,000	\$0.010	
November 2013	20,000,000	0.040	

Edgar Filing: ITRONICS INC - Form 10QSB

July 2013	20,000,000	0.050	
March 2010	1,000,000	0.100	
June 2008	100,000	0.150	
July 2010 to February 2011	3,740,001	0.150	
January to March 2008	5,625,000	0.225	
December 2007	1,850,000	0.375	
Total Warrants	102,315,001		\$0.0482
<u>Convertible Debt Options:</u>			
August 2008 to June 2010	588,921,991	\$0.0108	\$0.0077
<u>Employee Options:</u>			
August 2007 to February 2017	465,000	\$0.150	
One year after employment ends	1,600,000	0.150	
May 2017	25,000	0.160	
October 2007	250,000	0.200	
January 2015 to February 2017	100,000	0.200

One year after employment ends	3,000,000	0.300	
October 2012 to October 2013	17,000	0.500	
Total Employee Options	6,457,000		\$0.2388
Total Warrants and Options	697,693,992		\$0.0158

Edgar Filing: ITRONICS INC - Form 10QSB

JUNE 30, 2007

(UNAUDITED)

The 588,921,991 convertible debt options listed above relate to the callable secured convertible debt discussed in Note 3 above. As of June 30, 2007 \$4,534,699 of principal and accrued interest were convertible into common stock at the lower of \$0.10 per share or 55% of a calculated market price. Consequently, the number of shares and the conversion price can vary up or down materially, depending on the Company's stock price at any point in time.

8. Loss per Common Share:

Loss per common share is calculated based on the consolidated net loss for the period divided by the weighted average number of common shares outstanding during the three and six months ended June 30, 2007 and 2006. For purposes of computing diluted income per share, common stock equivalents are excluded for periods with net losses as their effect would be antidilutive.

Following is a reconciliation of Net Income (Loss) and Weighted average number of shares outstanding, in the computation of earnings (loss) per share (EPS) for the three and six months ended June 30, 2007 and 2006.

	Three months Ended June 30,		Six months Ended June 30,	
	<u>2007</u>	<u>2006</u>	<u>2007</u>	<u>2006</u>
Net Income (Loss)	\$(1,235,605)	\$273,947	\$(1,703,970)	\$(5,249)
Less: Preferred stock dividends	-	-	-	-
Basic and diluted EPS income (loss) available to common stockholders	\$(1,235,605)	\$273,947	\$(1,703,970)	\$(5,249)
Weighted average number of shares outstanding (1,000 s)	374,749	213,590	366,715	206,315
Common equivalent shares (1,000 s)	N/A	284,281	N/A	N/A
Diluted average number of shares outstanding (1,000 s)	374,749	497,871	366,715	206,315
Per share amount -basic	\$(0.003)	\$0.001	\$(0.005)	\$-0-
Per share amount- diluted	\$(0.003)	\$0.001	\$(0.005)	\$-0-

Warrants, options, and shares to be issued, totaling 717,396,547 and 284,281,228 shares as of June 30, 2007 and 2006, respectively, would dilute EPS, and accordingly are not included in the computation of EPS for the three and six months ended June 30, 2007 and the six months ended June 30, 2006.

9. The Company adopted the provisions of SFAS 123R, *Share-Based Payments*, on January 1, 2006. Accordingly, compensation costs for all share-based awards to employees are measured based on the grant date fair value of those awards and recognized over the period during which the employee is required to perform

15

ITRONICS INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

JUNE 30, 2007

(UNAUDITED)

service in exchange for the award (generally over the vesting period of the award). We have no awards with market or performance conditions. Effective January 1, 2006 and for all periods subsequent to that date, SFAS 123R supersedes our previous accounting under Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"). In March 2005, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 107 ("SAB 107") relating to SFAS 123R. The Company has applied the provisions of SAB 107 in its adoption of SFAS 123R.

Total estimated share-based compensation expense recognized under SFAS 123R for the three months ended June 30, 2007 and 2006 was \$737 and \$617, respectively, and is included in general and administrative expenses. Total estimated share-based compensation expense recognized under SFAS 123R for the six months ended June 30, 2007 and 2006 was \$1,725 and \$3,290, respectively.

10. Following is financial information for each of the Company's segments. No changes have occurred in the basis of segmentation since December 31, 2006.

Reconciliation of segment revenues, gross profit (loss), operating income (loss), other income (expense), and net income (loss) before taxes to the respective consolidated amounts follows:

11. The Company holds marketable securities that are available for sale, which consist solely of equity securities. The carrying amount on the balance sheets of these securities is adjusted to fair value at each balance sheet date. The adjustment to fair value is an unrealized holding gain or loss that is reported in Other Comprehensive Income. At present, these unrealized gains or losses are the only component of Accumulated and Other Comprehensive Income. The Company had Accumulated Unrealized Holding Gains of \$3,115 at June 30, 2007 and \$-0- at December 31, 2006. No losses were reclassified out of accumulated other comprehensive income into earnings during the three and six months ended June 30, 2007 and the three months ended June 30, 2006. No gains were reclassified out of accumulated other comprehensive income into earnings during the six months ended June 30, 2006. The table below illustrates the amount of unrealized holding gains and losses included in other comprehensive income, net of tax effects of \$0. The reclassification adjustment listed in the below table

Edgar Filing: ITRONICS INC - Form 10QSB

JUNE 30, 2007

(UNAUDITED)

represents unrealized holding gains and losses transferred into earnings as securities are sold.

Following are the components of Other Comprehensive Income:

12. In February 2007 the Company exchanged its membership interest in its worker's compensation mutual insurance company for \$205,938 cash and \$138,353 in marketable securities of a New York Stock Exchange traded stock insurance company. The total of \$344,291 is included as a gain on sale of investments in the Condensed Consolidated Statements of Operations.

Item 2. Management's Discussion and Analysis or Plan of Operations

Some of the information in this report contains forward-looking statements that involve substantial risks and uncertainties. You can identify these statements by forward-looking words such as "may," "will," "expect," "anticipate," "believe," "estimate" and "continue," or similar words. You should read statements that contain these words carefully because they:

- discuss our future expectations;
- contain projections of our future results of operations or of our financial condition; and
- state other "forward-looking" information.

We believe it is important to communicate our expectations. However, there may be events in the future that we are not able to accurately predict or over which we have no control. Our actual results and the timing of certain events could differ materially from those anticipated in these forward-looking statements.

Results of Operations

We reported consolidated revenues of \$849,065 for the quarter ended June 30, 2007, compared to \$768,023 for the prior year quarter, an increase of 11%. The increase was due to an increase in GOLD n GRO Fertilizer segment revenue of \$80,800, or 11%. The consolidated net loss was \$1,235,605, or \$0.003 per share, for the quarter ended June 30, 2007, compared to a net income of \$273,947 or \$0.001 per share for the comparable 2006 period, an increased loss of \$1,509,600. Consolidated revenues for the first six months of 2007 were \$1,385,252 compared to \$1,120,285 for the prior year period, an increase of 24%. The consolidated net loss was \$1,703,970 or \$0.005 per share, for the six months ended June 30, 2007, compared to a net loss of \$5,249 or \$0 per share for the comparable 2006 period, an increased loss of \$1,698,700.

To provide a more complete understanding of the factors contributing to the changes in revenues, operating expenses, other income (expense) and the resulting operating income (loss) and net income (loss) before taxes, the discussion presented below is separated into our two operating segments.

Total segment revenues for the second quarter of 2007 were approximately \$847,400, an increase of 11% from the second quarter of 2006. Total fertilizer sales for the quarter were \$752,700 (845 tons), compared to \$660,200 (847 tons) for the 2006 second quarter, an increase of 14% in

20

dollars and a nominal decrease in tonnage. Sales of bulk Chelated Liquid Micro-nutrients were \$612,900 (645 tons) and \$551,800 (636 tons) for the second quarter of 2007 and 2006, respectively, an increase of 11% in dollars and 1% in tonnage. Sales of bulk Chelated Liquid Multi-nutrients were \$75,000 (181 tons) and \$71,000 (205 tons) for the second quarter of 2007 and 2006, respectively, an increase of 6% in dollars and a decrease of 12% in tonnage. A new Chelated Secondary Nutrient product was introduced in the second quarter of 2006. Sales of this product were \$24,600 (18 tons) and \$7,200 (6 tons) for the second quarter of 2007 and 2006, respectively, an increase of 242% in dollars and 218% in tonnage. The overall increase in sales was due to a combination of price increases of the GOLD n GRO fertilizers and a shift in sales efforts toward higher value products. Total photochemical services revenue for the quarter increased \$24,700 on an increased volume of 487% from the second quarter of 2006 due to the addition of two new wholesale customers in the fourth quarter of 2006. Silver sales were \$52,100(3,405 ounces) for the quarter, compared to \$88,400(8,735 ounces) for the prior year second quarter, a decrease of 41% in dollars and 61% in ounces. The decrease is primarily from decreased sales of processed silver bullion due to reduced furnace availability caused by power surges in the electrical supply. We are working with the local power company to solve the electrical surge problem.

Cost of sales increased \$101,500 due primarily to increases in raw materials costs of \$68,100 resulting from increased sales and payroll costs of \$16,800 related to increased volume in photochemical services. The segment recorded a gross profit of \$124,500 for the quarter, compared to a gross profit of \$145,200 for the second quarter of 2006, a decreased gross profit of \$20,700, or 14%.

We are continuing our efforts on sales of Photochemical Silver Concentrators in order to provide a long term base of used photochemical supply. In March 2007 we received a deposit on a Photochemical Silver Concentrator and it was delivered in July 2007. We also are now aggressively seeking new large scale photochemical recycling customers, and between August 2006 and April 2007, we obtained three new significant wholesale customers. As a result of these new customers, we expect the rate of growth in sales volume will be significantly greater than the rate of growth in sales dollars. The addition of these customers is expected to increase photochemical raw material (on an unconcentrated basis) up to 400% greater than the volume in 2006.

We have also initiated discussions with other large scale potential customers. We anticipate that the new customers, along with our existing suppliers, will provide sufficient raw material for fertilizer production into the spring 2008 fertilizer season. If we are successful in gaining some of the other potential customers, we expect raw material needs to be met well into the future.

Segment operating expenses increased \$83,100 from the second quarter of 2006. This was primarily from increases in research and development costs of \$9,700 related to EPA registration of the GOLD n GRO Guardian and research on application of GOLD n GRO fertilizers on corn, and \$69,200 in sales and marketing expenses related to increased corporate marketing and the addition of an agronomist to the staff in May 2006.

These factors resulted in a 2007 second quarter segment operating loss of \$429,700 compared to a loss of \$325,900 for the second quarter of 2006, an increased operating loss of \$103,800, or 32%.

21

Other income (expense) was an expense of \$628,700 for the quarter, compared to income of \$680,300 for the 2006 second quarter, an increased other expense of \$1,309,000. The increase in other expense is due primarily to an increase in loss on derivative instruments of \$1,297,300. The gain or loss on derivatives is calculated each quarter and is subject to material changes, either up or down, based on changes in our stock price, which is highly volatile.

The changes in operating loss and other income resulted in a segment net loss before taxes of \$1,058,400 for the quarter ended June 30, 2007, compared to segment net income before taxes of \$354,400 for the prior year quarter, an increased loss of \$1,412,800.

For the first six months of 2007, segment revenues were \$1,378,600, compared to \$1,098,400 for the comparable 2006 period, an increase of 26%. The increase is due to increases in fertilizer and photochemical services revenues. Gross profit for the first six months of 2007 was \$143,900, compared to \$133,800 for the comparable prior year period, an improvement of 8%. Operating loss for the first six months of 2007 was approximately \$919,800 compared to \$769,600 for the first six months of 2006, an increased loss of \$150,200, or 20%.

Other income (expense) was an expense of \$565,400 for the first six months of 2007, compared to income of \$905,300 for the comparable 2006 period, an increased expense of \$1,470,600. The increased expense is due to an increased loss on derivative instruments, which was partially offset by an increase in gains on sale of investments of \$205,900. The gain or loss on derivatives is calculated each quarter and is subject to material changes, either up or down, based on changes in our stock price, which is highly volatile.

The changes in operating loss and other expenses resulted in a segment net loss before taxes of \$1,485,200 for the six months ended June 30, 2007, compared to segment net income before taxes of \$135,700 for the prior year period, an increased loss of \$1,620,900.

Mining technical services revenue was \$1,700 for the quarter ended June 30, 2007, compared to \$1,500 for the comparable quarter of 2006, a nominal increase. Cost of sales increased nominally. These factors resulted in a second quarter gross loss for the segment of \$6,000 compared to \$5,400 for the prior year second quarter, a nominal increased loss.

In early May 2005 the technical services satellite office was closed due to the winding down of most of the technical service contracts and completion of the majority of the data gathering for the insidemetals.com project, but certain key staff members have been retained. Programming

22

is continuing for insidemetals.com and launch of the website Information Portal occurred in August 2005. Revenues from the website have been nominal to date.

The redirection of Whitney & Whitney, Inc. to reduce emphasis on technical consulting services and to launch an internet information portal is brought about by the fact that Dr. Whitney, our President, has often been the lead person in generating new consulting contracts. Our President's increased responsibilities for managing the expanding GOLD n GRO fertilizer segment and overall corporate activities has reduced his time availability to actively participate in the consulting segment. Part of our objective in shifting the focus of the technical services segment is to retain our core professional staff that can provide assistance on possible future technical service contracts as well as perform administrative duties for the GOLD n GRO fertilizer segment, while at the same time adding a potential source of revenue that is not dependent upon labor sales and which can be managed by a professional staff. The information portal also better utilizes the Whitney & Whitney, Inc. library and information resources that are already in existence. For the three months ended June 30, 2007 and 2006 we allocated costs of approximately \$62,700 and \$49,500, respectively, to the development of the web site. The site was launched in mid-August 2005 and we are now fine-tuning the general presentation of the site, as well as improving the profiled mining company information. We expect this level of spending to continue into at least the fourth quarter of 2007. As improvements to the site are completed and information maintenance becomes routine, we will reduce or redirect staff resources as needed. In recent months traffic volume has expanded to a level that we believe makes it worthwhile for gold exploration companies to begin paid advertising on the website. A program to solicit advertising customers is being developed and is being offered to gold exploration companies. We hired a manager of marketing and sales in October 2006. He is responsible for marketing efforts for both the insidemetals.com website and for technical consulting services to the mining industry.

Total segment operating expenses for the second quarter of 2007 increased \$60,800, due primarily to increased research and development costs and sales and marketing costs related to the insidemetals.com website discussed above.

The combination of these factors resulted in a 2007 second quarter segment operating loss of \$185,400, compared to an operating loss of \$124,000 for the second quarter of 2006, an increased operating loss of \$61,400, or 49%.

Other income (loss) for the second quarter of 2007 was a gain of \$8,200 compared to a gain of \$43,600 for the prior year second quarter. This decrease in other income is due to reduced sales of marketable securities.

The changes in operating loss and other income resulted in a segment net loss before taxes of \$177,200 for the quarter ended June 30, 2007, compared to a loss of \$80,400 for the prior year quarter, an increased loss of \$96,700, or 120%.

For the first six months of 2007, segment revenue totaled \$6,600 compared to \$21,900 for the first six months of 2006, a decrease of 70%. This is primarily attributable to completion of a technical services project in the first quarter 2006. Gross loss for the first six months of 2007 was \$9,100, compared to a gross loss of \$800 for the comparable prior year period, an increased gross loss of \$8,300. Operating loss for the period was \$365,300 compared to an operating loss of \$238,800 for the comparable 2006 period, an increased operating loss of \$126,600, or 53%.

23

Other income (loss) for the first six months of 2007 was a gain of \$146,500 compared to a gain of \$97,800 for the prior year period. This increase is due to due to the sale of a membership interest in the Company's worker's compensation mutual insurance company.

The changes in operating loss and other income resulted in a segment net loss before taxes of \$218,800 for the six months ended June 30, 2007, compared to a net loss of \$141,000 for the prior year period, an increased loss of \$77,800, or 55%.

SUMMARY

On a consolidated basis, the various changes in revenues and operating expenses resulted in a second quarter 2007 operating loss of \$615,100, compared to \$449,900 for the second quarter of 2006, an increased operating loss of \$165,200, or 37%. Net loss before taxes for the second quarter 2007 was \$1,235,600 compared to a net income before taxes of \$273,900 for the prior year second quarter, an increased loss of \$1,509,600. For the six month period ended June 30, 2007 the operating loss was \$1,285,100 compared to \$1,008,300 for the prior year comparable period, an increased operating loss of \$276,800, or 27%. Net loss before taxes for the six months ended June 30, 2007 was \$1,704,000 compared to \$5,200 for the prior year six month period, an increased loss of \$1,698,700.

Changes in Financial Condition; Capitalization

Cash amounted to \$260,300 as of June 30, 2007, compared to \$20,100 as of June 30, 2006. Net cash used for operating activities was approximately \$1,125,100 for the first six months of 2007. The cash used for operating activities during the period was financed primarily by proceeds of \$1,290,000 from the issuance of callable secured convertible notes, less \$87,100 in debt issuance costs, and sale of investments of \$312,200.

Total assets increased \$586,900 during the six months ended June 30, 2007 to \$4,852,500. Current assets increased \$592,100 due to increases in cash of \$260,300, accounts receivable of \$42,900, marketable securities of \$43,000, and inventory of \$255,700. Inventory increased primarily due to a combination of a build-up of silver in solution resulting from greater volume coming from the new customers discussed above, and work in progress on a Photochemical Silver Concentrator which was delivered in July 2007. Net property and equipment decreased \$20,100 due to investment in equipment totaling \$84,500, primarily costs related to an air purification system in the refinery, which was offset by current period depreciation and amortization. Other assets increased \$15,000 due to an increase in net deferred loan fees related to the callable secured convertible note financing.

Current liabilities increased during the six months ended June 30, 2007 by \$1,609,400 and total liabilities increased by \$1,571,100. The increase is primarily due to an increase of \$1,511,700 in the estimated fair value of derivative instruments. The major components of this increase include \$1,335,000 in new convertible debt borrowing, \$136,000 in accrued interest, and a net increase in estimated fair value of derivative instruments of \$168,800, which were partially offset by the conversion of \$128,200 of convertible debt into common stock. Other changes in

current liabilities include increases of \$196,100 in current maturities of convertible notes and accrued interest, and \$75,700 in customer deposits. These increases were partially offset by decreases of \$18,400 in accounts payable and \$38,200 in current maturities of capital lease obligations.

Liquidity and Capital Resources

During the six months ended June 30, 2007, working capital decreased by \$1,017,300 to a deficit balance of \$11,156,900. The decline is due primarily to the increase in estimated fair value of derivative instrument liabilities discussed above.

In order to solve the Company's liquidity problems, management has implemented a plan of financing its operations through the private placements of common shares, convertible debt, conversion of debt to common shares, and payment of consulting and other labor services with common shares. The Company obtained financing of \$2 million and \$2.25 million in 2006 and 2005, respectively, through the issuance of callable secured convertible debt. During the first six months of 2007, the Company obtained \$1.335 million from the issuance of callable secured convertible debt. For the immediate future, the Company plans to obtain additional debt financing from this investor group.

We are actively working to establish a longer term financing plan that will identify capital sources for the Company's financing needs over a three to five year period. Once this plan is established, needs for financing will be adjusted and the plan will be extended annually.

In addition to continuing the above described efforts, development of the technology necessary to manufacture fertilizer from photochemicals has been completed. In March 1998 the Company's subsidiary, Itronics Metallurgical, Inc., signed a definitive manufacturing and distribution agreement with Western

Farm Services, Inc. (WFS). The agreement gives WFS the exclusive license and right to manufacture and market the GOLD n GRO line of fertilizer products in the states of Arizona, California, Hawaii, Idaho, Oregon and Washington. The agreement is for five years, with five year renewal options. In March 2003, the companies entered the second five year term of the agreement.

In addition, to meet short term cash needs, we have negotiated a 10 day payment period on invoices to our primary distributor, at a cost of 1% of the invoice amount. We also periodically factor certain inventory items and receivables to help with short term cash needs. These arrangements are with unrelated individuals, carry interest at 2% to 3% per month, and the lenders are secured by a blanket UCC on specified inventory items and on specified invoices. As of June 30, 2007, no factored inventory and receivables were outstanding.

The Company is focusing on expanding GOLD n GRO fertilizer sales and the related photochemical and silver sales necessary to achieve profitability, but this growth is subject to a number of uncertainties, including the annual seasonal nature of fertilizer sales related to crop cycles, short term weather patterns in specific markets, the rate of GOLD n GRO fertilizer adoption in existing and new markets, and the availability of funding to support sales growth.

Growth Plans and Implementation

Our GOLD 'n GRO Fertilizer segment created the GOLD 'n GRO line of liquid fertilizers. The pioneering development work is complete, many field trials have been completed on the first products and other field trials are under way.

The Mining Technical Services segment originally provided typical consulting services which required high level technical personnel, including our President, devoted to each project. To reduce our dependence on our President to generate new consulting contracts, while better utilizing our core professional staff, the division has been reconfigured to focus most of its efforts on a global Internet Information Portal "insidemetals.com". The information portal operates 24 hours per day 7 days per week and can be accessed anywhere in the world where computers and the Internet are available. Anyone with access to the Internet anywhere in the world can subscribe to the service at any time using their credit card to pay the subscription fee.

With the successful completion of the initial pioneering development work by the GOLD 'n GRO Fertilizer segment, and with the launch of the insidemetals.com information portal by the Mining Technical Services Division, we are implementing growth plans for both divisions that are expected to drive expansion well into the future. The status of these plans and their implementation is described for each division.

GOLD 'n GRO Fertilizer Segment (Itronics Metallurgical, Inc.)

Our manufacturing plant is presently configured to produce 2.4 million gallons of GOLD 'n GRO fertilizer annually (about 11,400 tons) and can be expanded to produce 7.2 million gallons of GOLD'n GRO per year, (approximately 36,000 tons). GOLD'n GRO fertilizer production in 2006 utilized about 5 percent of planned capacity. Planned expansions to achieve the 36,000 ton volume include increasing both dry raw material and liquid storage, increasing tank truck loading capacity, and automation of certain manufacturing functions. Expansion can be achieved incrementally as fertilizer sales continue to grow.

We have developed the following eight-part approach to growth:

1. Increase sales in the established market segments.
2. Develop GOLD'n GRO fertilizer applications for more crops.
3. Expand sales to new territories.
4. Expand the GOLD'n GRO specialty fertilizer product line.
5. Complete development of and commercialize the new glass/tile products.
6. Develop and commercialize environmentally friendly metal leaching reagents for recovery of silver, gold, and other metals.
7. Continue facilities expansion and technology development.
8. Acquire established companies and/or their technologies.

Plans and status of implementing each of the growth categories is explained in more detail in the following sections.

1. Increase sales in established market segments.

We are selling into or developing applications for the three major segments. These are:

26

- a. Specialty Agriculture which includes Avocados, citrus, grapes, fruit and nut trees, and vegetables.
- b. Bulk Field Crops which include alfalfa, cereal grains, corn, cotton, and soybeans.
- c. The Urban Market, which includes home lawn and garden, landscape construction and maintenance, nursery and greenhouse markets, and golf courses.

Our primary focus is to increase bulk GOLD 'n GRO liquid fertilizer sales as rapidly as possible. This is being achieved by expanding sales in the Specialty Agriculture segment and in the Bulk Field Crops segment. There are on-going small package sales in the Urban Market, but these are small relative to the other two segments.

2. Develop GOLD'n GRO fertilizer applications for more crops.

Based on our experience to date, it takes approximately two to five years to develop a new fertilizer product, which includes regulatory approval. It typically takes another two to four years to achieve market acceptance of successful products, which includes field trials to demonstrate product effectiveness.

We are performing field trials in Idaho, Oregon, and Washington for applications on onions, potatoes, and winter wheat. We also have begun field trials in Rhode Island for lawn, landscape, and nursery application and have started several new trials in California for silage corn applications.

We are marketing a GOLD'n GRO base liquid nutrition program. The program is called the "Gallon and a Quart" or "4 to 1" program. It calls for one gallon of GOLD 'n GRO base liquid for each quart of GOLD'n GRO chelated micro-nutrient used in soil applications. Field demonstrations have shown improved nutrition uptake and crop output under this cost effective program. Marketing of this program is expected to produce substantial increases in the tonnage of GOLD'n GRO fertilizer sales.

In 2006 we began contributing to an ongoing Zinc Nutrition Research Program at Utah State University in Logan, Utah. To date, the research has demonstrated the effectiveness of GOLD 'n GRO 9-0-1+7% Zinc as a chelated liquid zinc micronutrient fertilizer for zinc deficient corn. Results include preventing visual symptoms of zinc deficiency, significantly increased tissue concentration of zinc compared to untreated plants, and doubled dry mass.

3. Expand sales to new territories.

The GOLD'n GRO products are being sold in Arizona, California, Colorado, Idaho, Nevada, Oregon, Rhode Island, Washington, and Utah, with the majority of our sales in central California. We completed registration of select GOLD 'n GRO fertilizers in Idaho, Oregon and Washington in 2005 and in Utah in 2006; sales development is now underway. Two GOLD'n GRO products are registered in seven northeastern states and all of the products are registered in New York and in New Jersey. Based on our experience, commercial sales can be generated

approximately one to two years after introductory sales activities are initiated. We are in the process of identifying distributors for New York and the other seven Northeastern states. Each new geographic area developed will require the same procedural approach.

27

The expansion into the Northwest states of Idaho, Oregon, Washington, and Utah is being managed by one field agronomist. The cost of maintaining that position ranges from \$120,000 to \$150,000 per year. The expansion into the Northeast states is being managed by one part time person at an annual cost of approximately \$30,000. That person is also the lead person in seeking customers for our Photochemical Silver Concentrators. We plan to increase these spending levels in 2007, depending on sales support requirements.

In general, expansion to new regions of the country will require at least one field agronomist for each new region at a cost similar to that for the Northwest region. In addition, each state has varying registration requirements for product labels and costs of registration. Development of product labels is done internally using existing staff. Registration fees for each state vary widely, ranging from \$25 to \$600 per year, largely depending on how many products are registered in the particular state. For the near term, we anticipate utilizing present staff and management for corporate support of the sales efforts for both existing regions and for the new regions. For the longer term, as we expand we will need to add corporate support personnel. In 2006 we added a Ph.D. agronomist, to support GOLD n GRO sales efforts.

Our plan to expand sales in Urban Markets requires the consumer to utilize fertilizer injection equipment. This equipment provides economical, easy use of liquid fertilizers for consumer lawns and gardens. We added two types of fertilizer injectors to our "e" store, which is our first step in this market. Additionally, other fertilizer injectors are already available to consumers through irrigation supply stores.

4. Expand the GOLD'n GRO specialty fertilizer product line.

We are developing two new specialty products, a calcium plus magnesium fertilizer named GOLD n GRO 11-0-0+5% Ca (Calcium) and a high magnesium content fertilizer named GOLD n GRO 8-0-0+3% Mg (Magnesium), both targeting foliar and soil application. We have registered both products in Nevada and California. Sales development started in the second quarter of 2006.

We are developing a new category of repellent fertilizers that are expected to be sold at higher profit margins than our other products. The GOLD n GRO Guardian deer repellent fertilizer is an example of this type of specialty fertilizer. The U.S. market for deer repellents is believed to exceed \$50 million in annual sales. Products currently in the market have limited effectiveness so we believe that there is a real opportunity for a line of systemic products that are effective for several weeks after each application. GOLD'n GRO Guardian small plot tests have shown effectiveness for 8 to 12 weeks as well as excellent wintertime effectiveness.

We acquired ownership interest in the GOLD n GRO Guardian trademark, product rights, and the repelling product in 2005. We now own 100% of all rights related to GOLD n GRO Guardian. Currently, this product line is strictly for non-food plant applications.

Due to the repelling ingredients in GOLD n GRO Guardian, it will need to be registered with the EPA before it can be sold to the public. We have engaged consultants experienced in the EPA registration process and are presently working with them to do the work needed to complete the registration. In July 2007 we completed the first step in the registration process by completing a draft label. We are now working on the second step of the registration process, which is to have the product tested for safety in an independent laboratory. Samples for

28

testing have been prepared and sent to a testing laboratory and the required tests will be performed under the supervision of our consultants. Testing is expected to be completed in 90 to 120 days. In parallel with the registration process, we have reached agreement to enter into a long term supply arrangement with a large foreign manufacturer of the repelling ingredient. This ingredient also needs to be registered with the EPA. We submitted a registration application in July 2007 and the EPA accepted the application in early August 2007. Registration is expected to take three to four months. Once testing on the GOLD n GRO Guardian is completed and the repelling ingredient is registered, an application for registration of the GOLD n GRO Guardian can be submitted. Final registration approval is expected to take six to eight months after submittal of the application.

We believe the users of the GOLD n GRO deer repellent fertilizer will be upscale homeowners, commercial landscapers, and municipal facilities, and wholesale and retail nurseries. The initial sales center will be in Rhode Island.

5. Complete development of and commercialize glass/tile products.

In 2003, we developed and produced glass /tile products proving that the product concept is technically viable. When the development of the glass/ceramic tile product is complete, we will achieve the ability to recycle 100 percent of the photoliquid materials received from customers, including waste that is generated internally during fertilizer production. We have completed preliminary market research for the tile markets, but expect to do much more work to develop a plan to enter this market.

6. Develop and commercialize metal leaching reagents for recovery of silver, gold, and other metals.

We are developing applications of our technology to extract silver from photoliquids to the mining sector. This work is being expanded and a small pilot circuit will be established to chemically process certain categories of silver-bearing solid wastes. The gold mining sector currently uses cyanide and other toxic chemicals in their leaching process. We believe it may be possible to create and adapt new non-toxic leaching reagents and leaching procedures for processing other secondary materials and certain types of mine generated products. Support for this belief is that photochemicals are specifically designed to leach silver from film and a major component of photochemicals completely detoxifies and eliminates cyanide. The specific markets for leaching reagents in gold and silver mining is large and world wide, but has not yet been studied in detail for market development. Our Technical Services Division maintains an extensive library and database of mines and mining activities worldwide, which provides us ready access to market information as we need it. Much pilot plant work, including one or more field pilot operations, must be completed before quantitative market studies can be completed.

We plan to establish joint ventures with mining companies to research and develop these environmentally compatible gold and silver leaching chemicals and technology. We believe that the market for these leaching chemicals, once established, will be much larger and less seasonal than the fertilizer market and that it offers a second pathway to large scale growth.

7. Continue facilities expansion and technology development.

As fertilizer sales volume increases, we will need to increase tank truck loading capacity. With the introduction of additional bulk products and increased demand for our products, load out capacity for shipment of three more bulk products is needed. The first phase, construction of a containment area, was substantially completed in late 2006.

While we believe that we can handle expected growth in 2007 with the existing load-out module, we hope to complete construction on the new load out equipment during the second half of 2007, subject to the availability of financing.

In the first quarter of 2006 the Company tripled silver recovery capacity. With this expansion, the refinery operations became large enough to require the installation of an air purification system so that emissions from the expanded operation could be completely controlled. Planning and permitting for this installation were undertaken in the second and third quarters of 2006. Installation began in the fourth quarter of 2006 and operation start up was completed in mid-March 2007.

During the first quarter 2007 GOLD n GRO fertilizer manufacturing expanded to a level that requires an air purification system so that emissions can be completely controlled. Work to design and permit this system is underway and is targeted for completion in the third quarter. The schedule for installation has not yet been established.

Both the refinery air purification system and the fertilizer manufacturing air purification system perform the purification by wet scrubbing which produces water containing fertilizer ingredients. Part of the expansion planning that is now underway includes developing and implementing methods to utilize the water generated by air purification in fertilizer manufacturing. Normal industrial air purification systems generally produce waste which must be disposed off-site and requires payment of disposal fees. The Company s technology is being integrated so that the scrubbing water becomes a viable raw material for use in fertilizer manufacturing. The Company s air purification technology has the advantage of being "zero discharge" and is expected to be lower cost by producing a fertilizer raw material and by not having off-site waste disposal costs.

The Company reduced work on implementing its new iron and sulfur leach process while the refinery air purification system was being developed, installed, and started up. The work level required to complete development, specify, and size the equipment required for the new leach circuit was expanded early in the second quarter 2007, but with other higher priority planning and expansion activities that are underway, the Company has revised its plan for starting up this operation and now expects to have the leaching circuit completed to where intermittent operations can begin in the first quarter of 2008.

The refinery currently produces three products; silver bullion, silver-bearing iron matte, and glass which contains a small amount of silver. The refinery currently has solids drying capabilities, but the iron matte and the glass, which were formerly produced in relatively small amounts have been stored for future processing. This year s projected increase in silver output and the next refinery expansion will increase production of iron matte and glass to levels that require expanded solids handling capabilities which include crushing, grinding, screening, one or more solids separation processes, liquid-solids separation, drying, and expanded storage capabilities. In addition, the stored matte and glass when combined with

on-going production have now reached a volume that is sufficient to justify processing.

Because the solids handling requirements are not fully known at this time, the Company is utilizing modular development to create the individual process systems with the objective that when the actual larger scale requirements are better known it can integrate the individual processing systems into a viable solids processing flow sheet. The individual process systems for crushing and screening are in final stages of specification and sizing. The Company plans to install and start up the solids screening system during the third and fourth quarters of 2007. This system will be used initially to process silver-bearing iron matte and is expected to generate an increase in silver sales in the fourth quarter of 2007. The crushing system will be installed after the screening system is operational and is expected to produce further increases in silver output. Additional solids processing modules are being developed and will be discussed in more detail in future quarterly reports.

8. Acquire established companies and/or their technologies.

To enhance our operations and market presence, we intend to acquire small established companies or their technologies. In 2005, we completed our acquisition of the GOLD n GRO Guardian technology. Further acquisitions will depend on the potential benefits and suitable financing.

Mining Technical Services Segment (Whitney & Whitney, Inc.)

Historically, this division provided consulting services to the mining industry. In August 2005, we launched an Information Portal on the Internet. This division has a two-part approach to growth:

- Continue to provide consulting services.
- "e-commerce" Internet Information Portal-"insidemetals.com".

Plans and status of implementing each of the growth categories is explained in more detail in the following sections.

a. Continue to provide consulting services

We intend to continue a low level effort to solicit and perform technical services for mining companies and other businesses or government agencies that have mineral interests or minerals related responsibilities

b. "e-commerce" Internet Information Portal-"insidemetals.com".

In August 2005, we launched the website "insidemetals.com," an Information Portal targeting the companies and individuals interested in the mining and precious metals industry. The website is beginning to generate revenue by charging a subscription fee for monthly access to the site and by selling advertising to gold exploration companies. Currently, the site contains an array of information about gold and companies in the gold industry. We intend to add information on other mineral sectors gradually.

We anticipate that mining company professionals, all government agencies with minerals related responsibilities, financial industry investment professionals, and individual investors who have an interest in investing in mining companies but who have limited mineral industry

knowledge will benefit from this Information Portal. The market scope for this service is global and is accessible with a "click of a mouse" in all countries of the world through the Internet. Whitney & Whitney, Inc. has contacts throughout the world and expects that the good will generated over a period of more than 25 years will provide market support for this service.

In recent months, traffic volume on the website has expanded to a level that we believe is sufficient to make it worthwhile for gold exploration companies to begin paid advertising on the website. A program to solicit advertising customers is being developed and is being offered to gold exploration companies beginning in the first quarter of 2007. To assist with the sales development program of the website, we hired a manager of marketing and sales in October 2006. He is responsible for marketing efforts for both the insidemetals.com website and for technical consulting services to the mining industry.

Item 3. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures. As of the end of the period covered by this report, we conducted an evaluation, under the supervision and with the participation of our principal executive and financial officer and principal accounting officer of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) of the Exchange Act). Based upon this evaluation, our principal executive and financial officer and principal accounting officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms.

(b) Changes in internal controls. There was no change in our internal controls or in other factors that could affect these controls during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II- OTHER INFORMATION

Item 1. Legal Proceedings

As of June 30, 2007 we have accrued liabilities, including interest, of \$539,347 which relate to various lawsuits and claims for the collection of funds due. These include 8 leases totaling \$372,300 (reflected in Capital Lease Obligations) plus \$54,835 in additional interest (reflected in Accrued Interest) and one trade payable totaling \$85,801 (reflected in Accounts Payable) plus \$26,411 in additional interest (reflected in Accrued Interest). The leases are individually secured by specified equipment.

The accrued interest noted above was recorded based on our assessment of three cases brought by creditors who are seeking \$251,522, which we believe are probable. The creditors have received judgments in these cases, but have taken no further collection action. We will continue to accrue interest until these cases are settled or paid in full.

32

We have a total of two cases, which originally sought \$171,853, that we deem to have a remote possibility of incurring an additional unrecorded loss. We have negotiated payment agreements on these cases and, as of June 30, 2007, the recorded liability for these cases was \$169,070. We are current in our payments under the respective settlement agreements.

Successful settlement of the above claims is dependent on future financing.

We may become involved in a lawsuit or legal proceeding at any time in the ordinary course of business. Litigation is subject to inherent uncertainties, and an unexpected result may arise that may adversely affect our business. Certain lawsuits have been filed against us for collection of funds due that are delinquent, as described above. We are not aware of any additional legal proceeding or claims that we believe will have, individually or in the aggregate, a material adverse affect on our business, financial condition or operating results.

Item 2. Changes in Securities and Use of Proceeds

(c) Recent Sales of Unregistered Securities:

In April 2007, we issued an aggregate of 97,500 and 93,750 shares of common stock valued at \$1,463 and \$1,500, respectively, to John W. Whitney, our President, as compensation for services performed on our behalf in his capacity as a director of our Company for the fourth quarter of 2006 and the first quarter of 2007, respectively.

In April 2007, we issued an aggregate of 62,500 shares of common stock valued at \$5,000 to Duane H. Rasmussen, our Vice President, as compensation for services performed on our behalf in his capacity as Vice President of our Company for periods in 2003 and prior.

In April 2007, we issued an aggregate of 46,667 shares of common stock valued at \$747 to two of our employees as compensation for services performed on our behalf in their capacity as employees of our Company for the first quarter of 2007.

In April 2007, we issued an aggregate of 2,000,000 shares of common stock valued at \$46,000 to Newport Capital Consultants, Inc. for corporate marketing services to be performed in 2007 and 2008.

In May 2007, we issued an aggregate of 300,000 shares of common stock valued at \$7,200 to J.H. Darbie & Co., Inc. for corporate marketing services to be performed in 2007.

In June 2007, we entered into Securities Purchase Agreements with three accredited investors (the "Investors") for an aggregate amount of (i) \$335,000 in secured convertible notes, and (ii) warrants to purchase 10,000,000 shares each of our common stock (the "Financing").

The Investors received three year convertible notes (the "Notes") bearing simple interest at 8% per annum. The Notes are convertible into our common stock at a price equal to the lesser of (i) \$0.10 or (ii) 55% of the average of the lowest 3 intraday trading prices during the 20

trading day period ending one trading day before the conversion date. Further, the Investors received seven year warrants to purchase a total of 10,000,000 shares of our common stock at an exercise price of \$0.01 per share.

On April 24, 2007, John W. Whitney, our President, converted \$220,000 of unpaid salary into 10,000,000 shares of common stock. The shares will be issued when sufficient cash is available to pay the related withholding taxes.

On May 30, 2007, John W. Whitney, our President, converted \$26,000 of unpaid salary into 2,000,000 shares of common stock. The shares will be issued when sufficient cash is available to pay the related withholding taxes.

We issued options to purchase an aggregate of 9,000 shares of common stock to Michael C. Horsley, our Controller, on May 1, 2007. The options are exercisable at \$0.15 per share and expire three years after grant.

We issued options to purchase an aggregate of 46,000 shares of common stock to five of our employees in May 2007. The options are exercisable at \$0.15 to \$0.16 per share and expire in three to ten years from grant.

All of the above offerings and sales were deemed to be exempt under rule 506 of Regulation D and Section 4(2) of the Securities Act of 1933, as amended. No advertising or general solicitation was employed in offering the securities. The offerings and sales were made to a limited number of persons, all of whom were accredited investors, business associates of Itronics Inc. or executive officers of Itronics Inc., and transfer was restricted by Itronics Inc. in accordance with the requirements of the Securities Act. In addition to representations by the above-referenced persons, we have made independent determinations that all of the above-referenced persons were accredited or

sophisticated investors, and that they were capable of analyzing the merits and risks of their investment, and that they understood the speculative nature of their investment. Furthermore, all of the above-referenced persons were provided with access to our Securities and Exchange Commission filings.

Except as expressly set forth above, the individuals and entities to whom we issued securities as indicated in this Item 2 are unaffiliated with us.

Item 3. Defaults Upon Senior Securities

In the first quarter of 2006 all of the Series 2000 Convertible Promissory Notes became due and are now in default. The total principal and interest due at June 30, 2007 is \$3,500,119. The Company is formulating a plan to seek extensions of these notes and has recorded these notes as current liabilities. No collection action has been taken to date.

In addition to the leases that are subject to litigation, there are four leases, with a recorded liability of \$192,080, that are in default. As required by U.S. Generally Accepted Accounting Principles, the principal balance of the leases that are in default have been classified as current liabilities.
