  - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Item 8.01. Other Events.

Freeport-McMoRan Copper & Gold Inc. (FCX) issued a press release dated September 10, 2008, announcing a small scale failure encompassing approximately 75,000 tonnes of material at the Grasberg open pit operated by its 90.6 percent owned subsidiary PT Freeport Indonesia (PT-FI), and revised its projected copper and gold sales volumes for 2008. There were no injuries or property damage resulting from this event (see exhibit 99.1).

FCX is also providing an update on the estimated impact of the recent decline in copper prices on its previously reported June 30, 2008, open pounds. At June 30, 2008, FCX's copper sales included 369 million pounds of copper (net of minority interests) priced at an average of \$3.88 per pound and subject to final pricing over the next several months. Assuming that the September 5, 2008, quarter-to-date average pricing of \$3.62 per pound and forward price of \$3.14 per pound were applied to the June 30 provisionally priced sales, the weighted average final price for these sales would be approximately \$3.43 per pound resulting in a reduction to third quarter revenues of approximately \$230 million and a reduction to third quarter net income of approximately \$100 million. FCX estimates that each \$0.05 change in the copper forward price from the September 5, 2008, price would impact third quarter net income by \$5 million. The LME closing spot price for copper on September 9, 2008, was \$3.11 per pound.

In addition, FCX is providing an update on its share purchases under its open market share purchase program for up to 30 million shares. From August 2008 through September 9, 2008, FCX has acquired 4.9 million shares for approximately \$400 million (\$81.95 per share average), and 25.1 million shares remain available under this program. The timing of future purchases of FCX common stock is dependent on many factors, including the price of FCX's common shares, FCX's operating results, cash flows and financial position, copper, gold and molybdenum prices, and general economic and market conditions.

**Cautionary Statement.** This Form 8-K contains forward-looking statements in which we discuss factors we believe may affect our performance in the future. Forward-looking statements are all statements other than historical facts, such as statements regarding projected ore grades and milling rates, projected sales volumes and open market purchases of FCX common stock. Accuracy of the forward-looking statements depends on assumptions about events that change over time and is thus susceptible to periodic change based on actual experience and new developments. FCX cautions readers that it assumes no obligation to update or publicly release any revisions to the forward-looking statements in this Form 8-K and, except to the extent required by applicable law, does not intend to update or otherwise revise the forward-looking statements more frequently than quarterly. Additionally, important factors that might cause future results to differ from these projections include mine sequencing, production rates, industry risks, commodity prices, political risks, weather-related risks, labor relations, currency translation risks and other factors described in FCX's Annual Report on Form 10-K for the year ended December 31, 2007, filed with the Securities and Exchange Commission (SEC).

Item 9.01. Financial Statements and Exhibits.

(d) Exhibits.

The Exhibit included as part of this Current Report is listed in the attached Exhibit Index.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
