ITEM 7.01 REGULATION FD DISCLOSURE

The Company's Fleet Status Report at February 1, 2007 is attached hereto as Exhibit 99.1. Such information is being furnished under Regulation FD and should

Edgar Filing: ATWOOD OCEANICS INC - Form 8-K

not be deemed to be filed under Section 18 of the Exchange Act. The Fleet Status Report has also been posted on the Company's website at www.atwd.com. All changes from the Company's last Fleet Status Report dated January 23, 2007 are highlighted in yellow on the Company's website.

As noted in the attached Fleet Status Report, operating costs in December 2006 for most of our drilling units reflect some degree of volatility. Factors impacting high operating costs during the first quarter of fiscal year 2007 were end of calendar year bonuses paid to rig shorebase personnel; start-up costs associated with rigs commencing operations in new drilling areas (VICKSBURG in Thailand), (ATWOOD BEACON in India) and (SEAHAWK in West Africa); additional costs associated with shipyard periods (ATWOOD FALCON and ATWOOD BEACON) and higher than normal maintenance costs incurred on the ATWOOD HUNTER during the fourteen zero rate days in December when the rig was undergoing required regulatory inspections. At this time, there are no planned downtimes for any of our rigs for the remainder of fiscal year 2007. The VICKSBURG and ATWOOD EAGLE currently have planned required regulatory inspections during the first quarter of fiscal year 2008 that could be moved forward to the fourth quarter of fiscal year 2007 depending upon each rig's operating schedule. With no planned downtime periods for the remainder of fiscal year 2007 (assuming the VICKSBURG and ATWOOD EAGLE required inspections remain as of now scheduled for the first quarter of fiscal year 2008), there should be less volatility in operating costs for the remainder of fiscal year 2007.

The ATWOOD FALCON had an average operating cost during the first quarter of fiscal year 2007 of \$95,000 per day due to expensing certain costs incurred in the shipyard upgrade period. With the expensing of these costs now complete, we expect ongoing operating costs for the ATWOOD FALCON to be between \$45,000 and \$50,000. The ATWOOD SOUTHERN CROSS is also expected to have average daily operating costs in the Black Sea between \$45,000 and \$50,000. Operating costs for the ATWOOD EAGLE and ATWOOD HUNTER is expected to be around \$85,000 and \$55,000, respectively. Operating costs for our bottom supported drilling units are expected to average between \$30,000 and \$35,000 per day for the ATWOOD BEACON and RICHMOND and \$35,000 to \$40,000 for the VICKSBURG, which is incurring higher operating costs in Thailand than when it worked in Malaysia. The SEAHAWK is expected to incur operating costs between \$60,000 and \$70,000 per day (including amortization of certain deferred costs) while continuing to work in a start-up environment offshore Equatorial Guinea. Operating costs will vary for all rigs depending upon each rig's specific operating activities. As shown from the high costs incurred in the first quarter of fiscal year 2007, the daily operating cost estimates above may increase when a rig is being relocated to a new drilling location, when a rig is undergoing required inspections or when a rig is undergoing extraordinary maintenance or equipment replacement.

Statements contained in this report with respect to the future are forward-looking statements. These statements reflect management's reasonable judgment with respect to future events. Forward-looking statements involve risks and uncertainties. Actual results could differ materially from those anticipated as a result of various factors including; the Company's dependence on the oil and gas industry; the risks involved the construction of a rig; competition; operating risks; risks involved in foreign operations; risks associated with possible disruption in operations due to terrorism; risks associated with a possible disruption in operations due to a war with Iraq; and governmental regulations and environmental matters. A list of additional risk factors can be found in the Company's annual report on Form 10-K for the year ended September 30, 2006, filed with the Securities and Exchange Commission.
