AGCO Corporation's Common Stock and Junior Preferred Stock purchase rights are registered pursuant to Section 12(b) of the Act and are listed on the New York Stock Exchange.

AGCO Corporation is a well-known seasoned issuer.

AGCO Corporation is required to file reports pursuant to Section 13 or Section 15(d) of the Act. AGCO Corporation (1) has filed all reports required to be filed by Section 13 or 15(d) of the Act during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days.

Disclosure of delinquent filers pursuant to Item 405 of Regulation S-K will be contained in a definitive proxy statement, portions of which are incorporated by reference into Part III of this Form 10-K.

AGCO Corporation has submitted electronically and posted on its corporate website every Interactive Data File for the periods required to be submitted and posted pursuant to Rule 405 of Regulation S-T.

The aggregate market value of AGCO Corporation's Common Stock (based upon the closing sales price quoted on the New York Stock Exchange) held by non-affiliates as of June 30, 2013 was approximately \$4.6 billion. For this purpose, directors and officers have been assumed to be affiliates. As of February 14, 2014, 93,689,239 shares of AGCO Corporation's Common Stock were outstanding.

AGCO Corporation is a large accelerated filer and is not a shell company.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of AGCO Corporation's Proxy Statement for the 2014 Annual Meeting of Stockholders are incorporated by reference into Part III of this Form 10-K.

PART I

Item 1. Business

AGCO Corporation (“AGCO,” “we,” “us,” or the “Company”) was incorporated in Delaware in April 1991. Our executive offices are located at 4205 River Green Parkway, Duluth, Georgia 30096, and our telephone number is (770) 813-9200. Unless otherwise indicated, all references in this Form 10-K to the Company include our subsidiaries.

General

We are a leading manufacturer and distributor of agricultural equipment and related replacement parts throughout the world. We sell a full range of agricultural equipment, including tractors, combines, self-propelled sprayers, hay tools, forage equipment, tillage, implements and grain storage and protein production systems. Our products are widely recognized in the agricultural equipment industry and are marketed under a number of well-known brands, including: Challenger®, Fendt®, GSI®, Massey Ferguson® and Valtra®. We distribute most of our products through a combination of approximately 3,100 independent dealers and distributors in more than 140 countries. In addition, we provide retail financing through our retail finance joint ventures with Coöperatieve Centrale Raiffeisen-Boerenleenbank B.A., which we refer to as “Rabobank.”

Products

Tractors

We offer a full range of tractors in the high horsepower segment (primarily 100 to 585 horsepower). Our high horsepower tractors typically are used on larger farms and on cattle ranches for hay production. We also offer a full range of tractors in the utility tractor category (40 to 100 horsepower), including two-wheel and all-wheel drive versions. Our utility tractors are typically used on small- and medium-sized farms and in specialty agricultural industries, including dairy, livestock, orchards and vineyards. Our compact tractors (under 40 horsepower) are typically used on small farms and in specialty agricultural industries, such as dairies, landscaping and residential areas. Tractors accounted for approximately 60% of our net sales in 2013, 59% in 2012 and 66% in 2011.

Combines

Our combines are sold with a variety of threshing technologies. All combines are complemented by a variety of crop-harvesting heads, available in different sizes, which are designed to maximize harvesting speed and efficiency while minimizing crop loss. Combines accounted for approximately 6% of our net sales in both 2013 and 2012, and 7% in 2011.

Application Equipment

We offer self-propelled, three- and four-wheeled vehicles and related equipment for use in the application of liquid and dry fertilizers and crop protection chemicals. We manufacture chemical sprayer equipment for use both prior to planting crops, known as “pre-emergence,” and after crops emerge from the ground, known as “post-emergence.” Application equipment accounted for approximately 5% of our net sales in both 2013 and 2012, and 4% in 2011.

Hay Tools and Forage Equipment, Implements and Other Equipment

Our hay tools and forage equipment include both round and rectangular balers, self-propelled windrowers, disc mowers, spreaders and mower conditioners and are used for the harvesting and packaging of vegetative feeds used in the beef cattle, dairy, horse and alternative fuel industries.

We also distribute a wide range of implements, planters and other equipment for our product lines. Tractor-pulled implements are used in field preparation and crop management. Implements include: disc harrows, which improve field performance by cutting through crop residue, leveling seed beds and mixing chemicals with the soil; heavy tillage, which break up soil and mix crop residue into topsoil, with or without prior discing; and field cultivators, which prepare a smooth seed bed and destroy weeds. Tractor-pulled planters apply fertilizer and place seeds in the field. Other equipment primarily includes loaders, which are used for a variety of tasks including lifting and transporting hay crops.

Hay tools and forage equipment, implements, engines and other products accounted for approximately 9% of our net sales in 2013, 10% in 2012 and 8% in 2011.

Table of Contents

Grain Storage and Protein Production Systems

We manufacture and distribute grain storage and protein production systems, which include grain storage bins and related drying and handling equipment systems as well as swine and poultry feed storage and delivery, ventilation and watering systems. Grain storage and protein production systems accounted for approximately 7% of our net sales in both 2013 and 2012.

Engines

Our AGCO Power engines division produces diesel engines, gears and generating sets. The diesel engines are manufactured for use in a portion of our tractors, combines and sprayers, and are also sold to third parties. AGCO Power specializes in the manufacturing of off-road engines in the 50 to 590 horsepower range.

Precision Farming Technologies

We offer a variety of precision farming technologies that provide farmers with the capability to enhance productivity and profitability on the farm. A majority of these technologies are developed by third parties and are installed in our products and include satellite-based steering, field data collection, yield mapping and telemetry-based fleet management systems. While these products do not generate significant revenues, we believe that these products and related services are highly valued by professional farmers around the world and are integral to the growth of our machinery sales.

Replacement Parts

In addition to sales of new equipment, our replacement parts business is an important source of revenue and profitability for both us and our dealers. We sell replacement parts, many of which are proprietary, for all of the products we sell. These parts help keep farm equipment in use, including products no longer in production. Since most of our products can be economically maintained with parts and service for a period of ten to 20 years, each product that enters the marketplace provides us with a potential long-term revenue stream. In addition, sales of replacement parts typically generate higher gross profit margins and, historically, have been less cyclical than new product sales. Replacement parts accounted for approximately 13% of our net sales in both 2013 and 2012, and 15% in 2011.

Marketing and Distribution

We distribute products primarily through a network of independent dealers and distributors. Our dealers are responsible for retail sales to the equipment's end user in addition to after-sales service and support of the equipment. Our distributors may sell our products through a network of dealers supported by the distributor. Our sales are not dependent on any specific dealer, distributor or group of dealers. We intend to maintain the separate strengths and identities of our core brand names and product lines.

Europe

We market and distribute farm equipment and replacement parts to farmers in European markets through a network of approximately 1,110 independent dealers and distributors. In certain markets, we also sell Valtra tractors and parts directly to end users. In some cases, dealers carry competing or complementary products from other manufacturers. Sales in Europe accounted for approximately 48% of our net sales in both 2013 and 2012, and 52% in 2011.

North America

We market and distribute farm equipment and replacement parts to farmers in North America through a network of approximately 1,300 independent dealers, including 500 independent dealers of grain storage and protein production systems. Dealers may also sell competitive and dissimilar lines of products. Sales in North America accounted for approximately 26% of our net sales in both 2013 and 2012, and 20% in 2011.

South America

We market and distribute farm equipment and replacement parts to farmers in South America through several different networks. In Brazil and Argentina, we distribute products directly to approximately 340 independent dealers. In Brazil, dealers are generally exclusive to one manufacturer. Outside of Brazil and Argentina, we sell our products in South America through independent distributors. Sales in South America accounted for approximately 19% of our net sales in 2013, 18% in 2012 and 21% in 2011.

Table of Contents

Rest of the World

Outside of Europe, North America and South America, we operate primarily through a network of approximately 350 independent dealers and distributors, as well as associates and licensees, marketing our products and providing customer service support in approximately 85 countries in Africa, the Middle East, Australia and Asia. With the exception of Australia and New Zealand, where we directly support our dealer network, we generally utilize independent distributors, associates and licensees to sell our products. These arrangements allow us to benefit from local market expertise to establish strong market positions. Sales outside of Europe, North America and South America accounted for approximately 7% of our net sales in 2013, 8% in 2012 and 7% in 2011.

Associates and licensees provide a distribution channel in some markets for our products and/or a source of low-cost production for certain Massey Ferguson and Valtra products. Associates are entities in which we have an ownership interest, most notably in India. Licensees are entities in which we have no direct ownership interest, most notably in Pakistan and Turkey. The associate or licensee generally has the exclusive right to produce and sell Massey Ferguson or Valtra equipment in its home country but may not sell these products in other countries. We generally license to these associates and licensees certain technology, as well as the right to use the Massey Ferguson or Valtra trade names. We also sell products to associates and licensees in the form of components used in local manufacturing operations. Licensee manufacturers sell certain tractor models under the Massey Ferguson or Valtra brand names in the licensed territory and also may become a source of low-cost production for us.

Parts Distribution

Parts inventories are maintained and distributed through a network of master and regional warehouses throughout North America, South America, Europe, Africa and Australia in order to provide a timely response to customer demand for replacement parts. Our parts warehouses utilize inventory-tracking systems and rapid-response capabilities to ensure timely order fulfillment of parts to our dealers and customers.

Dealer Support and Supervision

We believe that one of the most important criteria affecting a farmer's decision to purchase a particular brand of equipment is the quality of the dealer who sells and services the equipment. We provide significant support to our dealers in order to improve the quality of our dealer network. We monitor each dealer's performance and profitability and establish programs that focus on continual dealer improvement. Our dealers generally have sales territories for which they are responsible.

We believe that our ability to offer our dealers a full product line of agricultural equipment and related replacement parts, as well as our ongoing dealer training and support programs focusing on business and inventory management, sales, marketing, warranty and servicing matters and products, helps ensure the vitality and increase the competitiveness of our dealer network. We also maintain dealer advisory groups to obtain dealer feedback on our operations.

We provide our dealers with volume sales incentives, demonstration programs and other advertising support to assist sales. We design our sales programs, including retail financing incentives, and our policies for maintaining parts and service availability with extensive product warranties to enhance our dealers' competitive position. In general, either party may cancel dealer contracts within certain notice periods.

Wholesale Financing

Primarily in the United States and Canada, we engage in the standard industry practice of providing dealers with floor plan payment terms for their inventories of farm equipment for extended periods. The terms of our wholesale finance agreements with our dealers vary by region and product line, with fixed payment schedules on all sales, generally ranging from one to 12 months. In the United States and Canada, dealers typically are not required to make an initial down payment, and our terms allow for an interest-free period generally ranging from one to 12 months, depending on the product. All equipment sales to dealers in the United States and Canada are immediately due upon a retail sale of the equipment by the dealer, with the exception of sales of grain storage and protein production systems. If not previously paid by the dealer, installment payments are required generally beginning after the interest-free period with the remaining outstanding equipment balance generally due within 12 months after shipment. We also provide financing to dealers on used equipment accepted in trade. We retain a security interest in a majority of the new and used equipment we finance. Sales of grain storage and protein production systems generally are payable within 30 days of shipment.

Table of Contents

Typically, sales terms outside the United States and Canada are of a shorter duration, generally ranging from 30 to 180 days. In many cases, we retain a security interest in the equipment sold on extended terms. In certain international markets, our sales are backed by letters of credit or credit insurance.

We offer various sales terms with respect to our products. For sales in most markets outside of the United States and Canada, we normally do not charge interest on outstanding receivables from our dealers and distributors. For sales to certain dealers or distributors in the United States and Canada, interest is generally charged at or above prime lending rates on outstanding receivable balances after interest-free periods. These interest-free periods vary by product and generally range from one to 12 months, with the exception of certain seasonal products, which bear interest after periods of up to 23 months depending on the time of year of the sale and the dealer or distributor's sales volume during the preceding year. Our North American geographical reportable segment comprises approximately 25.6% of our total net sales. For the year ended December 31, 2013, 20.8% and 4.3% of our net sales had maximum interest-free periods ranging from one to six months and seven to 12 months, respectively, related to our North American geographical reporting segment. Net sales with maximum interest-free periods ranging from 13 to 23 months were approximately 0.5% of our net sales during 2013. Actual interest-free periods are shorter than suggested by these percentages because receivables from our dealers and distributors in the United States and Canada are generally due immediately upon sale of the equipment to retail customers. Under normal circumstances, interest is not forgiven and interest-free periods are not extended.

We have an agreement to permit transferring, on an ongoing basis, of a majority of our wholesale receivables in North America and Europe to our AGCO Finance retail finance joint ventures, in which AGCO has a 49% interest. Upon transfer, the receivables maintain standard payment terms, including required regular principal payments on amounts outstanding, and interest charges at market rates. Qualified dealers may obtain additional financing through our U.S., Canadian and European retail finance joint ventures at the joint ventures' discretion. In addition, AGCO Finance entities may provide wholesale financing to dealers in Brazil and Australia.

Retail Financing

Through our AGCO Finance retail financing joint ventures located in the United States, Canada, Europe, Brazil, Argentina and Australia, end users of our products are provided with a competitive and dedicated financing source. These retail finance companies are owned 49% by AGCO and 51% by a wholly-owned subsidiary of Rabobank. Besides contributing to our overall profitability, the AGCO Finance joint ventures can enhance our sales efforts by tailoring retail finance programs to prevailing market conditions. Refer to "Retail Finance Joint Ventures" within Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" for further information.

In addition, Rabobank is the primary lender with respect to our credit facility and our 4¹/₂% senior term loan, as are more fully described in "Liquidity and Capital Resources" within Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations." Our historical relationship with Rabobank has been strong, and we anticipate its continued long-term support of our business.

Table of Contents

Manufacturing and Suppliers

Manufacturing and Assembly

We manufacture our products in locations intended to optimize capacity, technology or local costs. Furthermore, we continue to balance our manufacturing resources with externally-sourced machinery, components and replacement parts to enable us to better control inventory and our supply of components. We believe that our manufacturing facilities are sufficient to meet our needs for the foreseeable future. We manufacture the following products in the following locations:

Location	Product
Europe:	
Suolahti, Finland	Tractors
Beauvais, France	Tractors, transmissions and rear axles ⁽¹⁾
Marktobendorf, Germany	Tractors
Baumenheim, Germany	Cabs for tractors, components and parts
Linnavuori, Finland	Diesel engines
Breganze, Italy	Combines and headers
Hohenmölsen, Germany	Self-propelled forage harvesters, components and parts
Feucht, Germany	Hay tools
North America:	
Beloit, Kansas	Tillage and seeding equipment
Hesston, Kansas	Hay and forage equipment, combines and planters
Jackson, Minnesota	Tractors and self-propelled sprayers
Queretaro, Mexico	Tractors
Assumption, Illinois	Grain storage equipment
Taylorville, Illinois	Protein production systems
Paris, Illinois	Grain storage equipment
Newton, Illinois	Grain storage equipment
Flora, Illinois	Grain storage equipment
Bremen, Alabama	Protein production systems
Wahpeton, North Dakota ⁽²⁾	Air-seeding and tillage equipment
South America:	
General Rodrigues, Argentina	Tractors
Canoas, Rio Grande do Sul, Brazil	Tractors and self-propelled sprayers
Mogi das Cruzes, Brazil	Tractors and diesel engines
Santa Rosa, Rio Grande do Sul, Brazil	Combines and headers
Ibirubá, Rio Grande do Sul, Brazil	Planters, corn headers and front loaders
Ribeirão Preto, São Paulo, Brazil	Sugar cane harvesters and planters
Marau, Rio Grande do Sul, Brazil	Grain storage and protein production systems
Asia/Pacific:	
Daqing, China	Tractors
Changzhou, China	Tractors and diesel engines
Yanzhou, China	Combines and headers
Penang, Malaysia	Protein production systems

(1) Our transmissions and rear axles are manufactured through our GIMA joint venture with Claas Tractors SAS, in which we own a 50% interest.

(2) Our air-seeding and tillage equipment in North Dakota is manufactured through our AGCO-Amity joint venture, of which we own a 50% interest.

Third-Party Suppliers

We externally source many of our machinery, components and replacement parts. Our production strategy is intended to optimize our research and development and capital investment requirements and to allow us greater flexibility to respond to changes in market conditions.

We purchase some of the products we distribute from third-party suppliers. We purchase some tractor models from Tractors and Farm Equipment Limited (“TAFE”), as well as from Carraro S.p.A. and Iseki & Company, Limited. We also

5

Table of Contents

purchase other tractors, implements and hay and forage equipment from various third-party suppliers. Refer to “Related Parties” within Item 7 for further discussion of our relationship with TAFE.

In addition to the purchase of machinery, third-party suppliers supply us with significant components used in our manufacturing operations, such as engines and transmissions. We select third-party suppliers that we believe are low cost, high quality and possess the most appropriate technology. We also assist in the development of these products or component parts based upon our own design requirements. Our past experience with outside suppliers generally has been favorable.

Seasonality

Generally, retail sales by dealers to farmers are highly seasonal and are a function of the timing of the planting and harvesting seasons. To the extent practicable, we attempt to ship products to our dealers and distributors on a level basis throughout the year to reduce the effect of seasonal retail demands on our manufacturing operations and to minimize our investment in inventory. Our financing requirements are subject to variations due to seasonal changes in working capital levels, which typically increase in the first half of the year and then decrease in the second half of the year. The fourth quarter is also typically a period for large retail sales because of our customers’ year end tax planning considerations, the increase in availability of funds from completed harvests and the timing of dealer incentives.

Competition

The agricultural industry is highly competitive. We compete with several large national and international full-line suppliers, as well as numerous short-line and specialty manufacturers with differing manufacturing and marketing methods. Our two principal competitors on a worldwide basis are Deere & Company and CNH Industrial N.V. In certain Western European, South American and Asian countries, we have regional competitors that have significant market share in a single country or a group of countries.

We believe several key factors influence a buyer’s choice of farm equipment, including the strength and quality of a company’s dealers, the quality and pricing of products, dealer or brand loyalty, product availability, the terms of financing, and customer service. See “Marketing and Distribution” for additional information.

Engineering and Research

We make significant expenditures for engineering and applied research to improve the quality and performance of our products, to develop new products and to comply with government safety and engine emissions regulations. Our expenditures on engineering and research were approximately \$353.4 million, or 3.3% of net sales, in 2013, \$317.1 million, or 3.2% of net sales, in 2012, and \$275.6 million, or 3.1% of net sales in 2011.

Intellectual Property

We own and have licenses to the rights under a number of domestic and foreign patents, trademarks, trade names and brand names relating to our products and businesses. We defend our patent, trademark and trade and brand name rights primarily by monitoring competitors’ machines and industry publications and conducting other investigative work. We consider our intellectual property rights, including our rights to use our trade and brand names, important in the operation of our businesses. However, we do not believe we are dependent on any single patent, trademark or trade name or group of patents or trademarks, trade names or brand names.

Environmental Matters and Regulation

We are subject to environmental laws and regulations concerning emissions to the air, discharges of processed or other types of wastewater, and the generation, handling, storage, transportation, treatment and disposal of waste materials. These laws and regulations are constantly changing, and the effects that they may have on us in the future are impossible to predict with accuracy. It is our policy to comply with all applicable environmental, health and safety laws and regulations, and we believe that any expense or liability we may incur in connection with any noncompliance with any law or regulation or the cleanup of any of our properties will not have a materially adverse effect on us. We believe that we are in compliance in all material respects with all applicable laws and regulations.

The United States Environmental Protection Agency has issued regulations concerning permissible emissions from off-road engines. Our AGCO Power engines division, which specializes in the manufacturing of off-road engines in the 40 to 590 horsepower range, currently complies with Com II, Com IIIa, Com IIIb, Com IV, Tier II, Tier III, Tier 4i and Tier 4f

Table of Contents

emissions requirements set by European and United States regulatory authorities. We also are currently required to comply with other country regulations outside of the United States and Europe. We expect to meet future emissions requirements through the introduction of new technology to our engines and exhaust after-treatment systems, as necessary. In some markets (such as the United States) we must obtain governmental environmental approvals in order to import our products, and these approvals can be difficult or time consuming to obtain or may not be obtainable at all. For example, our AGCO Power engine division and our engine suppliers are subject to air quality standards, and production at our facilities could be impaired if AGCO Power and these suppliers are unable to timely respond to any changes in environmental laws and regulations affecting engine emissions. Compliance with environmental and safety regulations has added, and will continue to add, to the cost of our products and increase the capital-intensive nature of our business.

Climate change as a result of emissions of greenhouse gases is a significant topic of discussion and may generate U.S. and other regulatory responses. It is impracticable to predict with any certainty the impact on our business of climate change or the regulatory responses to it, although we recognize that they could be significant. The most direct impacts are likely to be an increase in energy costs, which would increase our operating costs (through increased utility and transportation costs) and an increase in the costs of the products we purchase from others. In addition, increased energy costs for our customers could impact demand for our equipment. It is too soon for us to predict with any certainty the ultimate impact of additional regulation, either directionally or quantitatively, on our overall business, results of operations or financial condition.

Our international operations also are subject to environmental laws, as well as various other national and local laws, in the countries in which we manufacture and sell our products. We believe that we are in compliance with these laws in all material respects and that the cost of compliance with these laws in the future will not have a materially adverse effect on us.

Regulation and Government Policy

Domestic and foreign political developments and government regulations and policies directly affect the agricultural industry in the United States and abroad and indirectly affect the agricultural equipment business. The application, modification or adoption of laws, regulations or policies could have an adverse effect on our business.

We are subject to various federal, state and local laws affecting our business, as well as to a variety of regulations relating to such matters as working conditions and product safety. A variety of laws regulate our contractual relationships with our dealers. These laws impose substantive standards on the relationships between us and our dealers, including events of default, grounds for termination, non-renewal of dealer contracts and equipment repurchase requirements. Such laws could adversely affect our ability to terminate our dealers.

Employees

As of December 31, 2013, we employed approximately 22,100 employees, including approximately 5,800 employees in the United States and Canada. A majority of our employees at our manufacturing facilities, both domestic and international, are represented by collective bargaining agreements and union contracts with terms that expire on varying dates. We currently do not expect any significant difficulties in renewing these agreements.

Available Information

Our Internet address is www.agcocorp.com. We make the following reports filed by us available, free of charge, on our website under the heading "SEC Filings" in our website's "Investors" section located under "Company":

- annual reports on Form 10-K;

quarterly reports on Form 10-Q;
current reports on Form 8-K;
proxy statements for the annual meetings of stockholders; and
Forms 3, 4 and 5

The foregoing reports are made available on our website as soon as practicable after they are filed with the Securities and Exchange Commission (“SEC”).

Table of Contents

We also provide corporate governance and other information on our website. This information includes: charters for the committees of our board of directors, which are available under the heading “Committee Charters” in the “Corporate Governance” section of our website’s “About AGCO” section located under “Company;” and our Code of Conduct, which is available under the heading “Code of Conduct” in the “Corporate Governance” section of our website’s “About AGCO” section located under “Company.”

In addition, in the event of any waivers of our Code of Conduct, those waivers will be available under the heading “Office of Ethics and Compliance” in the “Corporate Governance” section of our website’s “About AGCO” section located under “Company.”

Financial Information on Geographical Areas

For financial information on geographic areas, see Note 13 to our Consolidated Financial Statements contained in this Form 10-K under the caption “Segment Reporting,” which information is incorporated herein by reference.

Table of Contents

Item 1A. Risk Factors

We make forward-looking statements in this report, in other materials we file with the SEC or otherwise release to the public, and on our website. In addition, our senior management might make forward-looking statements orally to analysts, investors, the media and others. Statements concerning our future operations, prospects, strategies, products, manufacturing facilities, legal proceedings, financial condition, future financial performance (including growth and earnings) and demand for our products and services, and other statements of our plans, belief, or expectations, including the statements contained in Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” regarding industry conditions, currency translation impacts, pricing impacts, market demand, farm incomes, commodities prices, market share improvements, government financing programs, general economic conditions, availability of financing, net sales, working capital, capital expenditure and debt service requirements, gross margin improvements, market expansion and development, reserves for loan losses, engineering expenditures, compliance with financial covenants, support of lenders, recovery of amounts under guarantee, uncertain income tax provisions, funding of our pension and postretirement benefit plans, conversion features of our notes, or realization of net deferred tax assets, are forward-looking statements. The forward-looking statements we make are not guarantees of future performance and are subject to various assumptions, risks and other factors that could cause actual results to differ materially from those suggested by these forward-looking statements. These factors include, among others, those set forth below and in the other documents that we file with the SEC. There also are other factors that we may not describe, generally because we currently do not perceive them to be material, that could cause actual results to differ materially from our expectations.

We expressly disclaim any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Our financial results depend entirely upon the agricultural industry, and factors that adversely affect the agricultural industry generally, including declines in the general economy, increases in farm input costs, weather conditions, lower commodity prices and changes in the availability of credit for our retail customers, will adversely affect us.

Our success depends heavily on the vitality of the agricultural industry. Historically, the agricultural industry, including the agricultural equipment business, has been cyclical and subject to a variety of economic factors, governmental regulations and legislation, and weather conditions. Sales of agricultural equipment generally are related to the health of the agricultural industry, which is affected by farm income, farm input costs, debt levels and land values, all of which reflect levels of commodity prices, acreage planted, crop yields, agricultural product demand, including crops used as renewable energy sources, government policies and government subsidies. Sales also are influenced by economic conditions, interest rate and exchange rate levels, and the availability of retail financing. Trends in the industry, such as farm consolidations, may affect the agricultural equipment market. In addition, weather conditions, such as floods, heat waves or droughts, and pervasive livestock diseases can affect farmers’ buying decisions. Downturns in the agricultural industry due to these or other factors could vary by market and are likely to result in decreases in demand for agricultural equipment, which would adversely affect our sales, growth, results of operations and financial condition. Moreover, volatility in demand makes it difficult for us to accurately predict sales and optimize production. This, in turn, can result in higher costs, including inventory carrying costs and underutilized manufacturing capacity. During previous downturns in the farm sector, we experienced significant and prolonged declines in sales and profitability, and we expect our business to remain subject to similar market fluctuations in the future.

The agricultural equipment industry is highly seasonal, and seasonal fluctuations significantly impact results of operations and cash flows.

The agricultural equipment business is highly seasonal, which causes our quarterly results and our available cash flow to fluctuate during the year. Farmers generally purchase agricultural equipment in the Spring and Fall in conjunction with the major planting and harvesting seasons. In addition, the fourth quarter typically is a significant period for retail sales because of our customers' year-end tax planning considerations, the increase in availability of funds from completed harvests and the timing of dealer incentives. Our net sales and income from operations historically have been the lowest in the first quarter and have increased in subsequent quarters as dealers anticipate increased retail sales in subsequent quarters.

Most of our sales depend on the retail customers' obtaining financing, and any disruption in their ability to obtain financing, whether due to economic downturns or otherwise, will result in the sale of fewer products by us. In addition, the collectability of receivables that are created from our sales, as well as from such retail financing, is critical to our business.

Most retail sales of the products that we manufacture are financed, either by our joint ventures with Rabobank or by a bank or other private lender. During 2013, our joint ventures with Rabobank, which are controlled by Rabobank and are dependent upon Rabobank for financing as well, financed approximately 50% of the retail sales of our tractors and combines in

Table of Contents

the markets where the joint ventures operate. Any difficulty by Rabobank in continuing to provide that financing, or any business decision by Rabobank as the controlling member not to fund the business or particular aspects of it (for example, a particular country or region), would require the joint ventures to find other sources of financing (which may be difficult to obtain), or us to find another source of retail financing for our customers, or our customers would be required to utilize other retail financing providers. In prior economic downturns, financing for capital equipment purchases generally became more difficult in certain regions and, in some cases, was expensive to obtain. To the extent that financing is not available, or available only at unattractive prices, our sales would be negatively impacted.

In addition, both AGCO and our retail finance joint ventures have substantial accounts receivable from dealers and retail customers, and we would be adversely impacted if the collectability of these receivables was not consistent with historical experience; this collectability is dependent on the financial strength of the farm industry, which in turn is dependent upon the general economy and commodity prices, as well as several of the other factors discussed in this “Risk Factors” section.

Our success depends on the introduction of new products, which requires substantial expenditures.

Our long-term results depend upon our ability to introduce and market new products successfully. The success of our new products will depend on a number of factors, including:

- innovation;
- customer acceptance;
- the efficiency of our suppliers in providing component parts and of our manufacturing facilities in producing final products; and
- the performance and quality of our products relative to those of our competitors.

As both we and our competitors continuously introduce new products or refine versions of existing products, we cannot predict the level of market acceptance or the amount of market share our new products will achieve. We have experienced delays in the introduction of new products in the past, and we cannot make any assurances that we will not experience delays in the future. Any delays or problems with our new product launches will adversely affect our operating results. In addition, introducing new products can result in decreases in revenues from our existing products. Consistent with our strategy of offering new products and product refinements, we expect to continue to use a substantial amount of capital for product development and refinement. We may need more capital for product development and refinement than is available to us, which could adversely affect our business, financial condition or results of operations.

Our expansion plans in emerging markets could entail significant risks.

Our strategies include establishing a greater manufacturing and marketing presence in emerging markets such as China and Russia. In addition, we are growing our use of component suppliers in these markets. As we progress with these strategies, it will involve a significant investment of capital and other resources and entail various risks. These include risks attendant to obtaining necessary governmental approvals and the construction of the facilities in a timely manner and within cost estimates, the establishment of supply channels, the commencement of efficient manufacturing operations and, ultimately, the acceptance of the products by our customers. While we expect the expansion to be successful, should we encounter difficulties involving these or similar factors, it may not be as successful as we anticipate.

We face significant competition and if we are unable to compete successfully against other agricultural equipment manufacturers, we would lose customers and our net sales and profitability would decline.

The agricultural equipment business is highly competitive, particularly in North America, Europe and South America. We compete with several large national and international companies that, like us, offer a full line of agricultural equipment. We also compete with numerous short-line and specialty manufacturers of agricultural equipment. Our two key competitors, Deere & Company and CNH Industrial N.V., are substantially larger than we are and have greater financial and other resources. In addition, in some markets, we compete with smaller regional competitors with significant market share in a single country or group of countries. Our competitors may substantially increase the resources devoted to the development and marketing, including discounting, of products that compete with our products. In addition, competitive pressures in the agricultural equipment business may affect the market prices of new and used equipment, which, in turn, may adversely affect our sales margins and results of operations.

We maintain an independent dealer and distribution network in the markets where we sell products. The financial and operational capabilities of our dealers and distributors are critical to our ability to compete in these markets. In addition, we

Table of Contents

compete with other manufacturers of agricultural equipment for dealers. If we are unable to compete successfully against other agricultural equipment manufacturers, we could lose dealers and their end customers and our net sales and profitability may decline.

Rationalization or restructuring of manufacturing facilities, including plant expansions and system upgrades at our manufacturing facilities, may cause production capacity constraints and inventory fluctuations.

The rationalization of our manufacturing facilities has at times resulted in, and similar rationalizations or restructurings in the future may result in, temporary constraints upon our ability to produce the quantity of products necessary to fill orders and thereby complete sales in a timely manner. In addition, system upgrades at our manufacturing facilities that impact ordering, production scheduling and other related manufacturing processes are complex, and could impact or delay production targets. A prolonged delay in our ability to fill orders on a timely basis could affect customer demand for our products and increase the size of our product inventories, causing future reductions in our manufacturing schedules and adversely affecting our results of operations. Moreover, our continuous development and production of new products will often involve the retooling of existing manufacturing facilities. This retooling may limit our production capacity at certain times in the future, which could adversely affect our results of operations and financial condition. In addition, the expansion and reconfiguration of existing manufacturing facilities, as well as the start up of new manufacturing operations in emerging markets, such as China and Russia, could increase the risk of production delays, as well as require significant investments of capital.

We depend on suppliers for components, parts and raw materials for our products, and any failure by our suppliers to provide products as needed, or by us to promptly address supplier issues, will adversely impact our ability to timely and efficiently manufacture and sell products. We also are subject to raw material price fluctuations, which can adversely affect our manufacturing costs.

Our products include components and parts manufactured by others. As a result, our ability to timely and efficiently manufacture existing products, to introduce new products and to shift manufacturing of products from one facility to another depends on the quality of these components and parts and the timeliness of their delivery to our facilities. At any particular time, we depend on many different suppliers, and the failure by one or more of our suppliers to perform as needed will result in fewer products being manufactured, shipped and sold. If the quality of the components or parts provided by our suppliers is less than required and we do not recognize that failure prior to the shipment of our products, we will incur higher warranty costs. The timely supply of component parts for our products also depends on our ability to manage our relationships with suppliers, to identify and replace suppliers that fail to meet our schedules or quality standards, and to monitor the flow of components and accurately project our needs. The shift from our existing suppliers to new suppliers, including suppliers in emerging markets in the future, also may impact the quality and efficiency of our manufacturing capabilities, as well as impact warranty costs. A significant increase in the price of any component or raw material could adversely affect our profitability. We cannot avoid exposure to global price fluctuations, such as occurred in the past with the costs of steel and related products, and our profitability depends on, among other things, our ability to raise equipment and parts prices sufficiently enough to recover any such material or component cost increases.

A majority of our sales and manufacturing take place outside the United States, and, as a result, we are exposed to risks related to foreign laws, taxes, economic conditions, labor supply and relations, political conditions and governmental policies. These risks may delay or reduce our realization of value from our international operations.

For the year ended December 31, 2013, we derived approximately \$8,570.4 million, or 79%, of our net sales from sales outside the United States. The foreign countries in which we do the most significant amount of business are Germany, France, Brazil, the United Kingdom, Finland and Canada. In addition, we have significant manufacturing

operations in France, Germany, Brazil, Italy and Finland and have established manufacturing operations in emerging markets, such as China. Our results of operations and financial condition may be adversely affected by the laws, taxes, economic conditions, labor supply and relations, political conditions, and governmental policies of the foreign countries in which we conduct business. Our business practices in these foreign countries must comply with U.S. law, including the Foreign Corrupt Practices Act (“FCPA”). We have a compliance program in place designed to reduce the likelihood of potential violations of the FCPA, but we cannot provide assurances that future violations will not occur. If significant violations were to occur, they could subject us to fines and other penalties as well as increased compliance costs. Some of our international operations also are subject to various risks that are not present in domestic operations, including restrictions on dividends and the repatriation of funds. Foreign developing markets may present special risks, such as unavailability of financing, inflation, slow economic growth, price controls and compliance with U.S. regulations.

Table of Contents

Domestic and foreign political developments and government regulations and policies directly affect the international agricultural industry, which affects the demand for agricultural equipment. If demand for agricultural equipment declines, our sales, growth, results of operations and financial condition may be adversely affected. The application, modification or adoption of laws, regulations, trade agreements or policies adversely affecting the agricultural industry, including the imposition of import and export duties and quotas, expropriation and potentially burdensome taxation, could have an adverse effect on our business. The ability of our international customers to operate their businesses and the health of the agricultural industry, in general, are affected by domestic and foreign government programs that provide economic support to farmers. As a result, farm income levels and the ability of farmers to obtain advantageous financing and other protections would be reduced to the extent that any such programs are curtailed or eliminated. Any such reductions likely would result in a decrease in demand for agricultural equipment. For example, a decrease or elimination of current price protections for commodities or of subsidy payments for farmers in the European Union, the United States, Brazil or elsewhere in South America could negatively impact the operations of farmers in those regions, and, as a result, our sales may decline if these farmers delay, reduce or cancel purchases of our products. In emerging markets some of these (and other) risks can be greater than they might be elsewhere. In addition, in some cases, the financing provided by our joint ventures with Rabobank or by others is supported by a government subsidy or guarantee. The programs under which those subsidies and guarantees are provided generally are of limited duration and subject to renewal and contain various caps and other limitations. In some markets, for example, Brazil, this support is quite significant. In the event the governments that provide this support elect not to renew these programs, and were financing not available, whether through our joint ventures or otherwise, our sales would be negatively impacted.

As a result of the multinational nature of our business and the acquisitions that we have made over time, our corporate and tax structures are complex, with a significant portion of our operations being held through foreign holding companies. As a result, it can be inefficient, from a tax perspective, for us to repatriate or otherwise transfer funds, and we may be subject to a greater level of tax-related regulation and reviews by multiple governmental units than would companies with a more simplified structure. In addition, our foreign and U.S. operations routinely sell products to, and license technology to other operations of ours. The pricing of these intra-company transactions is subject to regulation and review as well. While we make every effort to comply with all applicable tax laws, audits and other reviews by governmental units could result in our being required to pay additional taxes, interest and penalties.

We recently have experienced substantial and sustained volatility with respect to currency exchange rate and interest rate changes which can adversely affect our reported results of operations and the competitiveness of our products.

We conduct operations in a variety of currencies. Our production costs, profit margins and competitive position are affected by the strength of the currencies in countries where we manufacture or purchase goods relative to the strength of the currencies in countries where our products are sold. In addition, we are subject to currency exchange rate risk to the extent that our costs are denominated in currencies other than those in which we earn revenues and to risks associated with translating the financial statements of our foreign subsidiaries from local currencies into United States dollars. Similarly, changes in interest rates affect our results of operations by increasing or decreasing borrowing costs and finance income. Our most significant transactional foreign currency exposures are the Euro, the Brazilian real and the Canadian dollar in relation to the United States dollar, and the Euro in relation to the British pound. Where naturally offsetting currency positions do not occur, we attempt to manage these risks by economically hedging some, but not necessarily all, of our exposures through the use of foreign currency forward exchange or option contracts. As with all hedging instruments, there are risks associated with the use of foreign currency forward exchange or option contracts, interest rate swap agreements and other risk management contracts. While the use of such hedging instruments provides us with protection for a finite period of time from certain fluctuations in currency exchange and interest rates, we potentially forego the benefits that might result from favorable fluctuations in currency exchange and interest rates. In addition, any default by the counterparties to these transactions could adversely affect us. Despite our

use of economic hedging transactions, currency exchange rate or interest rate fluctuations may adversely affect our results of operations, cash flow and financial condition.

We are subject to extensive environmental laws and regulations, including increasingly stringent engine emissions standards, and our compliance with, or our failure to comply with, existing or future laws and regulations could delay production of our products or otherwise adversely affect our business.

We are subject to increasingly stringent environmental laws and regulations in the countries in which we operate. These regulations govern, among other things, emissions into the air, discharges into water, the use, handling and disposal of hazardous substances, waste disposal and the remediation of soil and groundwater contamination. Our costs of complying with these or any other current or future environmental regulations may be significant. For example, the European Union and the United States have adopted more stringent environmental regulations regarding emissions into the air, and it is possible that the U.S. Congress will pass emissions-related legislation in connection with concerns regarding greenhouse gases. We may be adversely impacted by costs, liabilities or claims with respect to our operations under existing laws or those that may be

Table of Contents

adopted in the future. If we fail to comply with existing or future laws and regulations, we may be subject to governmental or judicial fines or sanctions, or we may not be able to sell our products and, therefore, our business and results of operations could be adversely affected.

In addition, the products that we manufacture or sell, particularly engines, are subject to increasingly stringent environmental regulations. As a result, we will likely incur increased engineering expenses and capital expenditures to modify our products to comply with these regulations. Further, we may experience production delays if we or our suppliers are unable to design and manufacture components for our products that comply with environmental standards established by regulators. For instance, we are required to meet more stringent engine emission reduction standards, including Tier 4 requirements, that are applicable to engines we manufacture or incorporate into our products, and we expect to meet these requirements through the introduction of new technology to our products, engines and exhaust after-treatment systems, as necessary. Failure to meet such requirements could materially affect our business and results of operations.

We are subject to recently adopted SEC disclosure obligations relating to “conflict minerals” (columbite-tantalite, cassiterite (tin), wolframite (tungsten) and gold) that are sourced from the Democratic Republic of Congo or adjacent countries. The first reports under these disclosure obligations are due to be filed with the SEC not later than May 2014. Complying with these requirements will require us to incur additional costs, including the costs to determine the sources of any conflict minerals used in our products and to modify our processes or products, if required. As a result, we may choose to modify the sourcing, supply and pricing of materials in our products. In addition, we may face reputational and regulatory risks if the information that we receive from our suppliers is inaccurate or inadequate, or our process in obtaining that information does not fulfill the SEC’s requirements. We have a formal policy with respect to the use of conflict minerals in our products that is intended to minimize, if not eliminate, conflict minerals sourced from the covered countries to the extent that we are unable to document that they have been obtained from conflict-free sources.

Our labor force is heavily unionized, and our contractual and legal obligations under collective bargaining agreements and labor laws subject us to the risks of work interruption or stoppage and could cause our costs to be higher.

Most of our employees, most notably at our manufacturing facilities, are subject to collective bargaining agreements and union contracts with terms that expire on varying dates. Several of our collective bargaining agreements and union contracts are of limited duration and, therefore, must be re-negotiated frequently. As a result, we incur various administrative expenses associated with union representation of our employees. Furthermore, we are at greater risk of work interruptions or stoppages than non-unionized companies, and any work interruption or stoppage could significantly impact the volume of products we have available for sale. In addition, collective bargaining agreements, union contracts and labor laws may impair our ability to reduce our labor costs by streamlining existing manufacturing facilities and in restructuring our business because of limitations on personnel and salary changes and similar restrictions.

We have significant pension obligations with respect to our employees and our available cash flow may be adversely affected in the event that payments became due under any pension plans that are unfunded or underfunded. Declines in the market value of the securities used to fund these obligations result in increased pension expense in future periods.

A portion of our active and retired employees participate in defined benefit pension plans under which we are obligated to provide prescribed levels of benefits regardless of the value of the underlying assets, if any, of the applicable pension plan. To the extent that our obligations under a plan are unfunded or underfunded, we will have to use cash flow from operations and other sources to pay our obligations either as they become due or over some shorter

funding period. In addition, since the assets that we already have provided to fund these obligations are invested in debt instruments and other securities, the value of these assets varies due to market factors. Historically, these fluctuations have been significant and sometimes adverse, and there can be no assurances that they will not be significant in the future. As of December 31, 2013, we had approximately \$257.8 million in unfunded or underfunded obligations related to our pension and other postretirement health care benefits.

Our business routinely is subject to claims and legal actions, some of which could be material.

We routinely are a party to claims and legal actions incidental to our business. These include claims for personal injuries by users of farm equipment, disputes with distributors, vendors and others with respect to commercial matters, and disputes with taxing and other governmental authorities regarding the conduct of our business. While these matters generally are not material, it is entirely possible that a matter will arise that is material to our business.

Table of Contents

We have a substantial amount of indebtedness, and, as a result, we are subject to certain restrictive covenants and payment obligations that may adversely affect our ability to operate and expand our business.

We have a substantial amount of indebtedness. As of December 31, 2013, we had total long-term indebtedness, including current portions of long-term indebtedness of approximately \$1,250.2 million, total stockholders' equity of approximately \$4,044.8 million and a ratio of total indebtedness to equity of approximately 0.31 to 1.0. We also had short-term obligations of \$336.1 million, capital lease obligations of \$5.5 million, and unconditional purchase or other long-term obligations of \$639.1 million. In addition, we had guaranteed indebtedness owed to third parties and our retail finance joint ventures of approximately \$171.6 million, primarily related to dealer and end-user financing of equipment.

Holders of our 1¹/₄% convertible senior subordinated notes due 2036 may convert the notes if, during any fiscal quarter, the closing sales price of our common stock exceeds 120% of the conversion price of \$40.44 per share for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter. Future classification between current and long-term debt of our 1¹/₄% convertible senior subordinated notes depends on the closing sales price of our common stock during future quarters. In the event the notes are converted in the future, we believe we will be able to repay the notes with available cash on hand, funds from our credit facility or a combination of these sources.

Our substantial indebtedness could have important adverse consequences. For example, it could:

- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, which would reduce the availability of our cash flow to fund future working capital, capital expenditures, acquisitions and other general corporate purposes;
- increase our vulnerability to general adverse economic and industry conditions;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- restrict us from introducing new products or pursuing business opportunities;
- place us at a competitive disadvantage compared to our competitors that have relatively less indebtedness; and
- limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds, pay cash dividends or engage in or enter into certain transactions.

Our business increasingly is subject to regulations relating to privacy and data protection, and if we violate any of those regulations we could be subject to significant liability.

Increasingly the United States, the European Union and other governmental entities are imposing regulations designed to protect the collection, maintenance and transfer of personal information. Other regulations govern the collection and transfer of financial data and data security generally. These regulations generally impose penalties in the event of violations. In addition, we also could be subject to cyber attacks that, if successful, could compromise our information technology systems and our ability to conduct business.

In addition, our business relies on the Internet as well as other electronic communications systems that, by their nature, may be subject to efforts by so-called "hackers" to either disrupt our business or steal data or funds. While we strive to maintain customary protections against hackers, there can be no assurance that at some point a hacker will breach those safeguards and damage our business, possibly materially.

We may encounter difficulties in integrating businesses we acquire and may not fully achieve, or achieve within a reasonable time frame, expected strategic objectives and other expected benefits of the acquisitions.

We may at times seek to expand through acquisitions of other businesses. We would expect to realize strategic and other benefits as a result of our acquisitions, including, among other things, the opportunity to extend our reach in the agricultural industry and provide our customers with an even wider range of products and services. However, it is impossible to predict with certainty whether, or to what extent, these benefits will be realized or whether we will be able to integrate acquired businesses in a timely and effective manner. For example:

- the costs of integrating acquired businesses and their operations may be higher than we expect and may require significant attention from our management; and

- our ability to successfully carry out our growth strategies for acquired businesses will be affected by, among other things, our ability to maintain and enhance our relationships with their existing customers, our ability to provide

Table of Contents

additional product distribution opportunities to them through our existing distribution channels, changes in the spending patterns and preferences of customers and potential customers, fluctuating economic and competitive conditions and our ability to retain their key personnel.

Our ability to address these issues will determine the extent to which we are able to successfully integrate, develop and grow acquired businesses and to realize the expected benefits of these transactions. Our failure to do so could have a material adverse effect on our revenues, operating results and financial condition following the transactions.

Item 3. Legal Proceedings

On June 27, 2008, the Republic of Iraq filed a civil action in federal court in the Southern District of New York, Case No. 08 CIV 59617, naming as defendants one of our French subsidiaries and two of our other foreign subsidiaries that participated in the United Nations Oil for Food Program (the “Program”). Ninety-one other entities or companies also were named as defendants in the civil action due to their participation in the Program. The complaint purports to assert claims against each of the defendants seeking damages in an unspecified amount. On February 6, 2013, the federal court dismissed the complaint with prejudice. The plaintiff has appealed the decision and the appellate process is ongoing. Although we intend to vigorously defend against this action, it is not possible at this time to predict the outcome of this action or its impact, if any, on us, although if the outcome was adverse, we could be required to pay damages.

On October 30, 2012, a third-party complaint was filed in federal court in the Southern District of Texas, Case No. 09 CIV 03884, naming as defendants one of our French subsidiaries and two of our other foreign subsidiaries. Sixty other entities or companies also were named as third-party defendants. The complaint asserts claims against the defendants, certain of which are also third-party plaintiffs, seeking unspecified damages arising from their participation in the Program. The third-party plaintiffs seek contribution from the third-party defendants. On February 12, 2014, the federal court dismissed the third-party complaint with prejudice. The appeals period has not expired. Although we intend to vigorously defend against this action, it is not possible at this time to predict the outcome of the action or its impact, if any, on us, although if the outcome was adverse, we could be required to pay damages.

In August 2008, as part of a routine audit, the Brazilian taxing authorities disallowed deductions relating to the amortization of certain goodwill recognized in connection with a reorganization of our Brazilian operations and the related transfer of certain assets to our Brazilian subsidiaries. The amount of the tax disallowance through December 31, 2013, not including interest and penalties, was approximately 131.5 million Brazilian reais (or approximately \$55.7 million). The amount ultimately in dispute will be greater because of interest and penalties. We have been advised by our legal and tax advisors that our position with respect to the deductions is allowable under the tax laws of Brazil. We are contesting the disallowance and believe that it is not likely that the assessment, interest or penalties will be required to be paid. However, the ultimate outcome will not be determined until the Brazilian tax appeal process is complete, which could take several years.

We are a party to various other legal claims and actions incidental to our business. We believe that none of these claims or actions, either individually or in the aggregate, is material to our business or financial statements as a whole, including our results of operations and financial condition.

Item 4. Mine Safety Disclosures

PART II

Item 5. Market For Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange ("NYSE") and trades under the symbol AGCO. As of the close of business on February 14, 2014, the closing stock price was \$52.10, and there were 376 stockholders of record (this number does not include stockholders who hold their stock through brokers, banks and other nominees). The following table sets forth, for the periods indicated, the high and low sales prices for our common stock for each quarter within the last two years, as reported on the NYSE as well as the amount of the dividend paid.

	High	Low	Dividend
2013			
First Quarter	\$55.15	\$49.07	\$0.10
Second Quarter	56.83	47.29	0.10
Third Quarter	61.88	49.63	0.10
Fourth Quarter	64.60	56.31	0.10
	High	Low	Dividend
2012			
First Quarter	\$54.00	\$44.11	\$—
Second Quarter	51.25	38.09	—
Third Quarter	48.00	40.29	—
Fourth Quarter	49.90	42.48	—

Dividend Policy

On January 24, 2013, our Board of Directors approved the initiation of quarterly cash dividends to our stockholders. A quarterly dividend of \$0.10 per common share was paid to each of our stockholders each quarter during 2013. On January 24, 2014, our Board of Directors approved an increase in our quarterly dividend from \$0.10 per share to \$0.11 per share beginning in the first quarter of 2014. Future dividends will be subject to our Board of Directors' approval. We cannot provide any assurance that we will continue to pay dividends in the future. Although we are in compliance with all provisions of our debt agreements, both our credit facility and the indenture governing our senior subordinated notes and term loan contain restrictions on our ability to pay dividends in certain circumstances.

Issuer Purchases of Equity Securities

In July 2012, our Board of Directors approved a share repurchase program under which we can repurchase up to \$50.0 million shares of our common stock. This share repurchase program does not have an expiration date. In December 2013, our Board of Directors approved an additional share repurchase program under which we can repurchase up to \$500.0 million shares of our common stock through an expiration date of June 2015. We did not repurchase any shares of our common stock during the fourth quarter of 2013. As of December 31, 2013, \$531.4 million of our common stock was authorized to be repurchased through open market or private negotiated transactions. Refer to Note 8 to our Consolidated Financial Statements for further information regarding these programs.

Table of Contents

Item 6. Selected Financial Data

The following tables present our selected consolidated financial data. The data set forth below should be read together with Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," and our historical Consolidated Financial Statements and the related notes. The Consolidated Financial Statements as of December 31, 2013 and 2012 and for the years ended December 31, 2013, 2012 and 2011 and the reports thereon are included in Item 8 in this Form 10-K. The historical financial data may not be indicative of our future performance.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

We are a leading manufacturer and distributor of agricultural equipment and related replacement parts throughout the world. We sell a full range of agricultural equipment, including tractors, combines, self-propelled sprayers, hay tools, forage equipment, tillage, implements, and grain storage and protein production systems. Our products are widely recognized in the agricultural equipment industry and are marketed under a number of well-known brand names, including: Challenger®, Fendt®, GSI®, Massey Ferguson®, and Valtra®. We distribute most of our products through a combination of approximately 3,100 dealers, distributors, associates and licensees. In addition, we provide retail financing through our retail finance joint ventures with Rabobank.

Results of Operations

We sell our equipment and replacement parts to our independent dealers, distributors and other customers. A large majority of our sales are to independent dealers and distributors that sell our products to end users. To the extent practicable, we attempt to sell products to our dealers and distributors on a level basis throughout the year to reduce the effect of seasonal demands on our manufacturing operations and to minimize our investment in inventories. However, retail sales by dealers to farmers are highly seasonal and are linked to the planting and harvesting seasons. In certain markets, particularly in North America, there is often a time lag, which varies based on the timing and level of retail demand, between our sale of the equipment to the dealer and the dealer's sale to a retail customer.

The following table sets forth, for the periods indicated, the percentage relationship to net sales of certain items included in our Consolidated Statements of Operations:

	Years Ended December 31,					
	2013 ⁽¹⁾		2012		2011 ⁽¹⁾	
		%		%		%
Net sales	100.0		100.0		100.0

Net income attributable to AGCO Corporation and subsidiaries	5.5	%	5.2	%	6.6	%

(1) Rounding may impact summation of amounts.

2013 Compared to 2012

Net income attributable to AGCO Corporation and subsidiaries for 2013 was \$597.2 million, or \$6.01 per diluted share, compared to net income for 2012 of \$522.1 million, or \$5.30 per diluted share.

Net sales for 2013 were approximately \$10,786.9 million, or 8.3% higher than 2012, primarily due to sales increases in all of our geographical segments, partially offset by the unfavorable impact of currency translation. Income from operations was \$900.7 million in 2013 compared to \$693.2 million in 2012. The increase in income from operations during 2013 was a result of the increase in net sales as well as improved gross margins resulting from factory efficiency and cost control

Table of Contents

initiatives, favorable pricing and relatively low levels of material cost inflation. Higher engineering expenses associated with new product development and engine emission requirements partially offset gross margin improvements.

In our North America region, income from operations increased approximately \$66.0 million in 2013 compared to 2012, primarily due to higher net sales, a favorable sales mix and margin improvement initiatives. Income from operations in our South American region increased approximately \$51.1 million in 2013 compared to 2012, primarily due to higher sales volumes and the benefit of cost-reduction initiatives. In our Europe/Africa/Middle East (“EAME”) region, income from operations increased approximately \$83.3 million in 2013 compared to 2012, primarily due to higher net sales and improved factory efficiencies, partially offset by higher engineering expenses. Income from operations in the Asia/Pacific region decreased approximately \$9.7 million in 2013 compared to 2012, as a result of increased manufacturing start-up costs and market development expenses in China, which offset the benefit of increased sales in the region.

Retail Sales

Worldwide industry equipment demand for farm equipment was relatively stable during 2013 in most major markets compared to 2012. Crop production improved to more normal levels and farm income remained relatively high across most of the developed farm markets during 2013. Improved yields in North America and high levels of farm income supported industry sales. Favorable exchange and financing rates, improved weather conditions and attractive commodity prices generated strong demand in South America. In Western Europe, favorable farm economics in France and Germany supported industry demand, while market conditions remained soft in the weather-impacted regions of the United Kingdom and parts of Northern Europe.

In the United States and Canada, industry unit retail sales of tractors and combines increased approximately 9% and 8%, respectively, in 2013 compared to 2012. Continued favorable farm economics resulted in the strength of retail sales, particularly for larger, high horsepower equipment. In South America, industry unit retail sales of tractors in 2013 increased approximately 17% compared to 2012. Industry unit retail sales of tractors increased approximately 17% and 59% in Brazil and Argentina, respectively, during 2013 compared to 2012. Industry unit retail sales of combines in South America increased approximately 35% during 2013 compared to 2012. In South America, supportive government financing programs in Brazil as well as favorable commodity prices and improved harvests all contributed to the market growth in Brazil and in Argentina. In Western Europe, industry unit retail sales of tractors and combines decreased approximately 1% and 10%, respectively, in 2013 compared to 2012. Growth in France was offset by declines in the United Kingdom and Finland due to poor weather conditions, while the German market remained relatively flat. Our net sales in our Asia/Pacific segment for 2013 were approximately 13% higher than 2012, primarily due to increases in China, East Asia and Australia.

Results of Operations

Net sales for 2013 were \$10,786.9 million compared to \$9,962.2 million for 2012, primarily due to the positive impacts of market growth, partially offset by the unfavorable impact of foreign currency translation. Foreign currency translation negatively impacted net sales during 2013 as compared to 2012 by approximately \$121.5 million, or 1.2%, primarily due to the weakening of the Brazilian real, which was partially offset by the strengthening of the Euro. The following table sets forth, for the year ended December 31, 2013, the impact to net sales of currency translation by geographical segment (in millions, except percentages):

	Change	Change due to Currency Translation
--	--------	--

Edgar Filing: AGCO CORP /DE - Form 10-K

	2013	2012	\$	%	\$	%		
North America	\$2,757.8	\$2,584.4	\$173.4	6.7	\$(7.7)	(0.3))	%
South America	2,039.7	1,855.7	184.0	9.9	(220.2)	(11.9))	%
Europe/Africa/Middle East	5,481.5	5,073.7	407.8	8.0	115.9	2.3		%
Asia/Pacific	507.9	448.4	59.5	13.3	(9.5)	(2.1))	%
	\$10,786.9	\$9,962.2	\$824.7	8.3	\$(121.5)	(1.2))	%

Regionally, net sales in North America increased during 2013 compared to 2012, primarily as a result of improved industry demand. The most significant increases in sales were in high horsepower tractors, sprayers, implements and grain storage equipment. Excluding the negative impact of foreign currency translation, net sales were higher in Brazil and Argentina with growth mainly in high horsepower tractors, sprayers and grain storage equipment. In the EAME region, net sales increased in 2013 compared to 2012, with the largest net sales increases in France and Germany, partially offset by lower net sales in

Table of Contents

Central and Eastern Europe. In Asia/Pacific, net sales increased in 2013 compared to 2012, primarily due to net sales increases in China, East Asia and Australia. We estimate that worldwide average price increases were approximately 2% and 3% in 2013 and 2012, respectively. Consolidated net sales of tractors and combines, which consisted of approximately 66% of our net sales in 2013, increased approximately 10% in 2013 compared to 2012. Unit sales of tractors and combines increased approximately 5% during 2013 compared to 2012. The unit sales increase and the increase in net sales can differ due to foreign currency translation, pricing and sales mix changes.

The following table sets forth, for the years ended December 31, 2013 and 2012, the percentage relationship to net sales of certain items included in our Consolidated Statements of Operations (in millions, except percentages):

	2013		2012		
	\$	% of Net Sales	\$	% of Net Sales	
Gross profit	\$2,390.6	22.2 %	\$2,123.2	21.3 %	
Selling, general and administrative expenses	1,088.7	10.1 %	1,041.2	10.5 %	
Engineering expenses	353.4	3.3 %	317.1	3.2 %	
Impairment charge	—	— %	22.4	0.2 %	
Amortization of intangibles	47.8	0.4 %	49.3	0.5 %	
Income from operations	\$900.7	8.4 %	\$693.2	6.9 %	

Gross profit as a percentage of net sales increased during 2013 compared to 2012, primarily due to favorable pricing, higher sales volume, low material cost inflation and purchasing and factory efficiency initiatives. Unit production of tractors and combines during 2013 was approximately 5% higher than 2012. We recorded approximately \$2.3 million and \$2.4 million of stock compensation expense within cost of goods sold during 2013 and 2012, respectively, as is more fully explained in Note 1 to our Consolidated Financial Statements.

Selling, general and administrative expenses (“SG&A expenses”) as a percentage of net sales decreased slightly during 2013 compared to 2012, primarily due to the increase in net sales, which was partially offset by new market expansion expenses. We recorded approximately \$32.6 million and \$34.6 million of stock compensation expense within SG&A expenses during 2013 and 2012, respectively, as is more fully explained in Note 1 to our Consolidated Financial Statements. Engineering expenses increased during 2013 compared to 2012, primarily due to increased investment levels for new product development and costs to meet new engine emission standards in the United States and Europe.

Interest expense, net was \$58.0 million for 2013 compared to \$57.6 million for 2012, which is more fully explained in “Liquidity and Capital Resources.”

Other expense, net was \$40.1 million in 2013 compared to \$34.8 million in 2012. Other expenses net increased during 2013 compared to 2012, primarily due to increased losses on sales of receivables. Losses on sales of receivables primarily under our accounts receivable sales agreements, were approximately \$25.6 million and \$21.8 million in 2013 and 2012, respectively.

We recorded an income tax provision of \$258.5 million in 2013 compared to \$137.9 million in 2012. Our tax provision is impacted by the differing tax rates of the various tax jurisdictions in which we operate, permanent differences for items treated differently for financial accounting and income tax purposes, and losses in jurisdictions where no income tax benefit is recorded. Our 2012 income tax rate provision (as reconciled in Note 5 to our Consolidated Financial Statements) included the usage of approximately \$54.7 million of valuation allowance resulting from income generated in the United States during 2012. The 2012 income tax provision also included a reversal of approximately \$13.8 million of the remaining valuation allowance previously established against our U.S.

deferred tax assets and the recognition of certain U.S. research and development tax credits of approximately \$13.1 million.

A valuation allowance is established when it is more likely than not that some portion or all of a company's deferred tax assets will not be realized. We assessed the likelihood that our deferred tax assets would be recovered from estimated future taxable income and available income tax planning strategies. At December 31, 2013 and 2012, we had gross deferred tax assets of \$423.2 million and \$478.0 million, respectively, including \$69.7 million and \$94.9 million, respectively, related to net operating loss carryforwards. At December 31, 2013, we had total valuation allowances as an offset to the gross deferred tax assets of \$77.2 million, primarily related to net operating loss carryforwards in Brazil, China and Russia. At December 31,

Table of Contents

2012, we had total valuation allowances as an offset to the gross deferred tax assets of approximately \$74.5 million, primarily related to net operating loss carryforwards in Brazil, Switzerland, China and Russia. Realization of the remaining deferred tax assets as of December 31, 2013 will depend on generating sufficient taxable income in future periods, net of reversing deferred tax liabilities. We believe it is more likely than not that the remaining net deferred tax assets will be realized.

As of December 31, 2013 and 2012, we had approximately \$122.2 million and \$94.5 million, respectively, of unrecognized tax benefits, all of which would impact our effective tax rate if recognized. As of December 31, 2013 and 2012, we had approximately \$61.9 million and \$23.5 million, respectively, of current accrued taxes related to uncertain income tax positions connected with ongoing tax audits in various jurisdictions that we expect to settle or pay in the next 12 months. We recognize interest and penalties related to uncertain income tax positions within our income tax provision. As of December 31, 2013 and 2012, we had accrued interest and penalties related to unrecognized tax benefits of approximately \$14.4 million and \$11.9 million, respectively. See Note 5 to our Consolidated Financial Statements for further discussion of our uncertain income tax positions.

Equity in net earnings of affiliates, which is primarily comprised of income from our retail finance joint ventures, was \$48.2 million in 2013 compared to \$53.5 million in 2012. The reduction in income was primarily a result of lower income in our manufacturing joint ventures. Refer to “Retail Finance Joint Ventures” for further information regarding our retail finance joint ventures and their results of operations.

2012 Compared to 2011

Net income attributable to AGCO Corporation and subsidiaries for 2012 was \$522.1 million, or \$5.30 per diluted share, compared to net income for 2011 of \$583.3 million, or \$5.95 per diluted share.

Net sales for 2012 were approximately \$9,962.2 million, or 13.6% higher than 2011, primarily due to sales increases in all of our geographical segments as well as the favorable impact of acquisitions, partially offset by the unfavorable impact of currency translation. Income from operations was \$693.2 million in 2012 compared to \$610.3 million in 2011. The increase in income from operations during 2012 was a result of the benefits of acquisitions, an increase in net sales and improved gross margins resulting from price increases, higher production levels, a better sales mix, and material cost control initiatives, partially offset by higher engineering and SG&A expenses and a non-cash goodwill and other intangible asset impairment charge related to our Chinese harvesting business.

In our North America region, income from operations increased approximately \$169.0 million in 2012 compared to 2011, primarily due to the positive impact of acquisitions, higher net sales and margin improvement initiatives. Income from operations in our South American region increased approximately \$18.5 million in 2012 compared to 2011, primarily due to higher sales and improved margins from cost control efforts. In our EAME region, income from operations decreased approximately \$12.0 million in 2012 compared to 2011, primarily due to a weaker mix of products, the negative impact of currency translation and the impact of lower production and start-up costs associated with our new Fendt assembly facility in Germany in the second half of the year. Income from operations in the Asia/Pacific region decreased approximately \$13.7 million in 2012 compared to 2011, primarily due to increased market development costs in China, partially offset by acquisition benefits and improved gross margins.

Retail Sales

Worldwide industry equipment demand for farm equipment was relatively stable during 2012 in most major markets compared to 2011. Global commodity prices remained at higher levels due to weather-related production difficulties across many of the developed markets. In North America, industry demand was strong in 2012 compared to 2011.

Despite an extensive drought in the United States, higher crop prices and extensive crop insurance resulted in near record farm income levels in the region. In South America, industry demand improved in the second half of 2012 from lower levels in the first half of the year as a result of better weather conditions. Improved crop yields, attractive government financing subsidies in Brazil and favorable commodity prices also helped to strengthen industry demand. Industry conditions in the key Western European markets of Germany and France remained stable while adverse weather negatively impacted market conditions in Southern Europe, Scandinavia and Finland.

In the United States and Canada, industry unit retail sales of tractors increased approximately 10% in 2012 compared to 2011. Industry unit retail sales of combines were relatively flat in 2012 compared to 2011. Continued favorable farm economics resulted in the strength of retail sales, particularly for larger, high horsepower equipment. In South America, industry unit retail sales of tractors in 2012 increased approximately 3% compared to 2011. Industry unit retail sales of tractors in the major market of Brazil increased approximately 7% and were relatively flat in Argentina during 2012 compared to 2011.

Table of Contents

Industry unit retail sales in Brazil remained at high levels due to attractive farm economics and supportive government subsidized financing programs. Industry unit retail sales of combines in South America during 2012 were relatively flat compared to 2011. In Western Europe, industry unit retail sales of tractors decreased approximately 3% while industry unit retail sales of combines increased approximately 5% in 2012 compared to 2011. Growth in the key markets of France and Germany was offset by declines in Southern Europe due to dry weather and weak economic conditions, as well as declines in Scandinavia and Finland due to wet weather conditions and a late harvest. Our net sales in our Asia/Pacific segment for 2012 were approximately 58% higher than 2011, primarily due to increases in Australia, New Zealand and China.

Results of Operations

Net sales for 2012 were \$9,962.2 million compared to \$8,773.2 million for 2011, primarily due to the positive impacts of market growth and acquisitions, partially offset by the unfavorable impact of foreign currency translation. Acquisitions positively impacted net sales by approximately \$774.3 million, or 8.8%, during 2012 compared to 2011. Foreign currency translation negatively impacted net sales during 2012 as compared to 2011 by approximately \$672.7 million, or 7.7%, primarily due to the weakening of the Euro and the Brazilian real. The following table sets forth, for the year ended December 31, 2012, the impact to net sales of currency translation and acquisitions by geographical segment (in millions, except percentages):

			Change		Change due to Acquisitions		Change due to Currency Translation	
	2012	2011	\$	%	\$	%	\$	%
North America	\$2,584.4	\$1,770.6	\$813.8	46.0	\$475.7	26.9	\$(11.6)	(0.7)
South America	1,855.7	1,871.5	(15.8)	(0.8)	87.5	4.7	(295.5)	(15.8)
Europe/Africa/Middle East	5,073.7	4,847.2	226.5	4.7	104.7	2.2	(357.7)	(7.4)
Asia/Pacific	448.4	283.9	164.5	57.9	106.4	37.5	(7.9)	(2.8)
	\$9,962.2	\$8,773.2	\$1,189.0	13.6	\$774.3	8.8	\$(672.7)	(7.7)

Regionally, net sales in North America increased during 2012 compared to 2011, primarily as a result of our acquisition of GSI Holding Corp. ("GSI") and improved industry demand. The most significant increases in sales, excluding acquisitions, were in high horsepower tractors, hay equipment and sprayers. Excluding the negative impact of foreign currency translation, net sales were higher in Brazil and were partially offset by declines in Argentina. In the EAME region, net sales increased in 2012 compared to 2011, with the largest net sales increases in France, Germany and Russia, partially offset by lower net sales in Southern Europe and Finland. In Asia/Pacific, net sales increased in 2012 compared to 2011, primarily due to net sales increases in Australia, New Zealand and China. We estimate that worldwide average price increases were approximately 3% in both 2012 and 2011. Consolidated net sales of tractors and combines, which consisted of approximately 65% of our net sales in 2012, increased approximately 2% in 2012 compared to 2011. Unit sales of tractors and combines also increased approximately 2% during 2012 compared to 2011. The unit sales increase and the increase in net sales can differ due to foreign currency translation, pricing and sales mix changes.

The following table sets forth, for the years ended December 31, 2012 and 2011, the percentage relationship to net sales of certain items included in our Consolidated Statements of Operations (in millions, except percentages):

	2012		2011	
	\$	% of Net Sales	\$	% of Net Sales
Gross profit	\$2,123.2	21.3	\$1,776.1	20.2

Edgar Filing: AGCO CORP /DE - Form 10-K

Selling, general and administrative expenses	1,041.2	10.5	%	869.3	9.9	%
Engineering expenses	317.1	3.2	%	275.6	3.1	%
Restructuring and other infrequent income	—	—	%	(0.7)	—	%
Impairment charge	22.4	0.2	%	—	—	%
Amortization of intangibles	49.3	0.5	%	21.6	0.2	%
Income from operations	\$693.2	6.9	%	\$610.3	7.0	%

Gross profit as a percentage of net sales increased during 2012 compared to 2011. Favorable pricing, higher production volumes throughout most of 2012 and cost control initiatives helped to produce higher margins. Our gross margins

Table of Contents

were negatively impacted by the slow ramp of production and related start-up costs experienced in the fourth quarter of 2012 associated with our new German tractor assembly facility. Unit production of tractors and combines during 2012 was approximately 3% higher than 2011. We recorded approximately \$2.4 million and \$1.6 million of stock compensation expense within cost of goods sold during 2012 and 2011, respectively, as is more fully explained in Note 1 to our Consolidated Financial Statements.

SG&A expenses as a percentage of net sales increased during 2012 compared to 2011, primarily due to increased market development and new system upgrade costs. We recorded approximately \$34.6 million and \$23.0 million of stock compensation expense within SG&A expenses during 2012 and 2011, respectively, as is more fully explained in Note 1 to our Consolidated Financial Statements. Engineering expenses increased during 2012 compared to 2011, primarily due to higher spending for the development of new products and costs to meet new engine emission standards in the United States and Europe.

During the fourth quarter of 2012, we recorded a non-cash impairment charge of approximately \$22.4 million related to goodwill and certain other identifiable assets associated with our Chinese harvesting business in accordance with the provisions of Accounting Standard Codification 350, "Intangibles-Goodwill and Other" ("ASC 350"). The operating results of our Chinese harvesting business from the date of acquisition in November 2011, combined with recently completed forecasts, resulted in our conclusion that it was more likely than not that the fair value of our Chinese harvesting reporting unit was less than its carrying amount. See Note 1 to our Consolidated Financial Statements for further discussion.

Interest expense, net was \$57.6 million for 2012 compared to \$30.2 million for 2011. The increase in 2012 was due to increased debt levels during 2012, associated with the funding of recent acquisitions, as is more fully explained in "Liquidity and Capital Resources."

Other expense, net was \$34.8 million in 2012 compared to \$19.1 million in 2011. Losses on sales of receivables primarily under our accounts receivable sales agreements were approximately \$21.8 million and \$22.0 million in 2012 and 2011, respectively. Other expense, net increased primarily due to foreign exchange losses in 2012 compared to foreign exchange gains in 2011.

We recorded an income tax provision of \$137.9 million in 2012 compared to \$24.6 million in 2011. Our tax provision is impacted by the differing tax rates of the various tax jurisdictions in which we operate, permanent differences for items treated differently for financial accounting and income tax purposes, and losses in jurisdictions where no income tax benefit is recorded. Our 2012 income tax rate provision (as reconciled in Note 5 to our Consolidated Financial Statements) included the usage of approximately \$54.7 million of valuation allowance resulting from income generated in the United States during 2012. The 2012 income tax provision also included a reversal of approximately \$13.8 million of the remaining valuation allowance previously established against our U.S. deferred tax assets and the recognition of certain U.S. research and development tax credits of approximately \$13.1 million. We assessed the likelihood that our remaining U.S. deferred tax assets would be recovered from estimable future taxable income and determined the reversal was appropriate during the fourth quarter of 2012 as a result of improved profitability during 2012 of our core equipment business and the inclusion of the GSI business that was acquired at the end of 2011.

A valuation allowance is established when it is more likely than not that some portion or all of a company's deferred tax assets will not be realized. We assessed the likelihood that our deferred tax assets would be recovered from estimated future taxable income and available income tax planning strategies. At December 31, 2012 and 2011, we had gross deferred tax assets of \$478.0 million and \$498.2 million, respectively, including \$94.9 million and \$181.6 million, respectively, related to net operating loss carryforwards. At December 31, 2012, we had total valuation allowances as an offset to the gross deferred tax assets of \$74.5 million, primarily related to net operating

loss carryforwards in Brazil, Switzerland, China and Russia. At December 31, 2011, we had total valuation allowances as an offset to the gross deferred tax assets of approximately \$145.8 million, primarily related to net operating loss carryforwards in Brazil, Switzerland, China, Russia and the United States.

As of December 31, 2012 and 2011, we had approximately \$94.5 million and \$71.1 million, respectively, of unrecognized tax benefits, all of which would impact our effective tax rate if recognized. As of December 31, 2012 and 2011, we had approximately \$23.5 million and \$23.0 million, respectively, of current accrued taxes related to uncertain income tax positions connected with ongoing tax audits in various jurisdictions that we expect to settle or pay in the next 12 months. We recognize interest and penalties related to uncertain income tax positions within our income tax provision. As of December 31, 2012 and 2011, we had accrued interest and penalties related to unrecognized tax benefits of approximately \$11.9 million and \$7.6 million, respectively. See Note 5 to our Consolidated Financial Statements for further discussion of our uncertain income tax positions.

Table of Contents

Equity in net earnings of affiliates, which is primarily comprised of income from our retail finance joint ventures, was \$53.5 million in 2012 compared to \$48.9 million in 2011. Refer to “Retail Finance Joint Ventures” for further information regarding our retail finance joint ventures and their results of operations.

Quarterly Results

The following table presents unaudited interim operating results. We believe that the following information includes all adjustments, consisting only of normal recurring adjustments, necessary to present fairly our results of operations for the periods presented.

	Three Months Ended			
	March 31	June 30	September 30	December 31
	(In millions, except per share data)			
2013:				
Net sales	\$2,403.1	\$3,048.2	\$2,475.9	\$2,859.7
Gross profit	533.1	710.3	556.2	591.0
Income from operations	177.4	327.1	199.0	197.2
Net income	117.1	213.1	125.2	136.9
Net loss attributable to noncontrolling interests	0.9	0.6	1.0	2.4
Net income attributable to AGCO Corporation and subsidiaries	118.0	213.7	126.2	139.3
Net income per common share attributable to AGCO Corporation and subsidiaries — diluted	1.19	2.15	1.27	1.40
2012:				
Net sales	\$2,273.7	\$2,690.1	\$2,295.0	\$2,703.4
Gross profit	493.0	611.4	491.0	527.8
Income from operations	169.8	264.9	139.6	118.9
Net income	121.2	202.1	92.1	101.0
Net (income) loss attributable to noncontrolling interests	(1.0) 2.8	2.4	1.5
Net income attributable to AGCO Corporation and subsidiaries	120.2	204.9	94.5	102.5
Net income per common share attributable to AGCO Corporation and subsidiaries — diluted	1.21	2.08	0.96	1.04

Retail Finance Joint Ventures

Our AGCO Finance retail finance joint ventures provide retail financing and wholesale financing to our dealers in the United States, Canada, Europe, Brazil, Argentina and Australia. The joint ventures are owned 49% by AGCO and 51% by a wholly owned subsidiary of Rabobank, a financial institution based in the Netherlands. The majority of the assets of the retail finance joint ventures represents finance receivables. The majority of the liabilities represents notes payable and accrued interest. Under the various joint venture agreements, Rabobank or its affiliates provide financing to the joint ventures, primarily through lines of credit. We do not guarantee the debt obligations of the joint ventures. As of December 31, 2013, our capital investment in the retail finance joint ventures, which is included in “Investment in affiliates” on our Consolidated Balance Sheets, was approximately \$390.2 million compared to \$354.4 million as of December 31, 2012. The total finance portfolio in our retail finance joint ventures was approximately \$9.4 billion and \$8.3 billion as of December 31, 2013 and 2012, respectively. The total finance portfolio as of December 31, 2013 included approximately \$7.8 billion of retail receivables and \$1.6 billion of wholesale receivables from AGCO dealers. The total finance portfolio as of December 31, 2012 included approximately \$7.0 billion of retail receivables

and \$1.3 billion of wholesale receivables from AGCO dealers. The wholesale receivables were either sold directly to AGCO Finance without recourse from our operating companies or AGCO Finance provided the financing directly to the dealers. During 2013, 2012 and 2011, we made a total of approximately \$15.5 million, \$7.1 million and \$8.3 million, respectively, of investments in our retail finance joint ventures in Germany and the Netherlands, primarily related to additional capital required as a result of increased retail finance portfolios during 2013, 2012 and 2011. During 2013, our share in the earnings of the retail finance joint ventures, included in “Equity in net earnings of affiliates” within our Consolidated Statements of Operations, was \$48.8 million compared to \$48.6 million in 2012.

Table of Contents

The total finance portfolio in our retail finance joint venture in Brazil was \$1.8 billion and \$2.0 billion as of December 31, 2013 and 2012, respectively. As a result of weak market conditions in Brazil in 2005 and 2006, a substantial portion of this portfolio had been included in a payment deferral program directed by the Brazilian government relating to retail contracts entered into during 2004, where scheduled payments were rescheduled several times between 2005 and 2008. The impact of the deferral program resulted in higher delinquencies and lower collateral coverage for the portfolio. While the joint venture currently considers its reserves for loan losses to be adequate, it continually monitors its reserves considering borrower payment history, the value of the underlying equipment financed, and further payment deferral programs implemented by the Brazilian government. To date, our retail finance joint ventures in markets outside of Brazil have not experienced any significant changes in the credit quality of their finance portfolios. However, there can be no assurance that the portfolio credit quality will not deteriorate, and, given the size of the portfolio relative to the joint ventures' level of equity, a significant adverse change in the joint ventures' performance would have a material impact on the joint ventures and on our operating results.

Outlook

Our operations are subject to the cyclical nature of the agricultural industry. Sales of our equipment have been and are expected to continue to be affected by changes in net cash farm income, farm land values, weather conditions, the demand for agricultural commodities, farm industry related legislation, availability of financing and general economic conditions.

Worldwide industry demand is expected to decline in 2014 compared to 2013 levels. Based on their current levels, lower commodity prices in 2014 are expected to result in reduced farm income and weaker industry demand across the developed agricultural equipment markets. Our net sales in 2014 are expected to be relatively flat compared to 2013, primarily due to forecasted pricing increases and market share improvements offsetting the impact of the projected industry decline. We expect gross margin improvement to be offset by increased engineering expenditures and expenses related to new market expansion and development.

Recent Acquisitions

In January 2012, we acquired 61% of Santal Equipamentos S.A. Comércio e Indústria ("Santal") for approximately R\$36.7 million, net of approximately R\$11.9 million cash acquired (or approximately \$20.1 million, net). Santal, headquartered in Ribeirão Preto, Brazil, manufactures and distributes sugar cane planting, harvesting, handling and transportation equipment as well as replacement parts across Brazil. The acquisition of Santal provides our customers in Brazil with a wider range of agricultural products and services. The acquisition was funded with available cash on hand. We recorded approximately \$28.0 million of goodwill and approximately \$2.6 million of trade name, trademark and patent identifiable intangible assets associated with the acquisition.

On November 30, 2011, we acquired GSI for \$932.2 million, net of approximately \$27.9 million cash acquired. GSI, headquartered in Assumption, Illinois, is a leading manufacturer of grain storage and protein production systems. GSI sells its products globally through independent dealers. The acquisition was financed by the issuance of \$300.0 million of 5⁷/₈% senior notes and our credit facility. As a result of the acquisition, we recorded a tax benefit of approximately \$149.3 million within "Income tax (benefit) provision" in our Consolidated Statements of Operations for the year ended December 31, 2011, resulting from a reversal of a portion of our previously established deferred tax valuation allowance. The reversal was required to offset deferred tax liabilities established as part of the acquisition accounting for GSI relating to acquired amortizable intangible assets.

On November 30, 2011, we acquired 98% of Shandong Dafeng Machinery Co., Ltd. (“Dafeng”) for approximately 171.7 million yuan (or approximately \$26.9 million). We acquired approximately \$17.1 million of cash and assumed approximately \$41.1 million of indebtedness associated with the transaction. Dafeng is located in Yanzhou, China and manufactures a complete range of corn, grain, rice and soybean harvesting machines for Chinese domestic markets. The acquisition was funded with available cash on hand.

The results of operations for the acquisitions of Santal, GSI and Dafeng have been included in our Consolidated Financial Statements as of and from the dates of the respective acquisitions. We allocated the purchase price of each acquisition to the assets acquired and liabilities assumed based on their fair values as of the respective acquisition dates. See Note 2 to our Consolidated Financial Statements for further information.

Table of Contents

Liquidity and Capital Resources

Our financing requirements are subject to variations due to seasonal changes in inventory and receivable levels. Internally generated funds are supplemented when necessary from external sources, primarily our credit facility and accounts receivable sales agreement facilities.

We believe that these facilities, together with available cash and internally generated funds, will be sufficient to support our working capital, capital expenditures and debt service requirements for the foreseeable future:

• Our \$300.0 million of 5⁷/₈% senior notes which mature in 2021 (see further discussion below).

Our revolving credit and term loan facility, consisting of a \$600.0 million multi-currency revolving credit facility and a \$360.0 million term loan facility, which expires in December 2016. As of December 31, 2013,

- no amount was outstanding under the multi-currency revolving credit facility and \$360.0 million was outstanding under the term loan facility. We had the availability to borrow \$600.0 million under the multi-currency revolving credit facility (see further discussion below).

• Our €200.0 million (or approximately \$275.0 million as of December 31, 2013) 4¹/₂% senior term loan, which matures in 2016 (see further discussion below).

• Our \$201.2 million of 1¹/₄% convertible senior subordinated notes, which mature in 2036 and may be converted earlier based on the closing sales price of our common stock (see further discussion below).

Our accounts receivable sales agreements with our retail finance joint ventures in the United States, Canada and Europe. As of December 31, 2013, approximately \$1.3 billion of cash had been received under these agreements (see further discussion below).

In addition, although we are in complete compliance with the financial covenants contained in these facilities and currently expect to continue to maintain such compliance, should we ever encounter difficulties, our historical relationship with our lenders has been strong and we anticipate their continued long-term support of our business.

Current facilities

Our \$300.0 million of 5⁷/₈% senior notes due December 1, 2021 constitute senior unsecured and unsubordinated indebtedness. Interest is payable on the notes semi-annually in arrears on June 1 and December 1 of each year. At any time prior to September 1, 2021, we may redeem the notes, in whole or in part from time to time, at our option, at a redemption price equal to the greater of (i) 100% of the principal amount plus accrued and unpaid interest, including additional interest, if any, to, but excluding, the redemption date, or (ii) the sum of the present values of the remaining scheduled payments of principal and interest (exclusive of interest accrued to the date of redemption) discounted to the redemption date at the treasury rate plus 0.5% plus accrued and unpaid interest, including additional interest, if any. Beginning September 1, 2021, we may redeem the notes, in whole or in part from time to time, at our option, at a redemption price equal to 100% of the principal amount plus accrued and unpaid interest.

Our revolving credit and term loan facility consists of a \$600.0 million multi-currency revolving credit facility and a \$360.0 million term loan facility. The maturity date of our credit facility is December 1, 2016. We are required to make quarterly payments towards the term loan of \$5.0 million that will increase to \$10.0 million commencing March 2015. Interest accrues on amounts outstanding under the credit facility, at our option, at either (1) LIBOR plus a margin ranging from 1.0% to 2.0% based on our leverage ratio, or (2) the base rate, which is equal to the higher of (i) the administrative agent's base lending rate for the applicable currency, (ii) the federal funds rate plus 0.5%, and (iii) one-month LIBOR for loans denominated in U.S. dollars plus 1.0% plus a margin ranging from 0.0% to 0.5% based on our leverage ratio. The credit facility contains covenants restricting, among other things, the incurrence of indebtedness and the making of certain payments, including dividends, and is subject to acceleration in the event of a default. We also must fulfill financial covenants with respect to a total debt to EBITDA ratio and an interest coverage

ratio. As of December 31, 2013, we had \$360.0 million of outstanding borrowings under the credit facility and availability to borrow approximately \$600.0 million. As of December 31, 2012, we had \$465.0 million of outstanding borrowings under the credit facility and availability to borrow approximately \$515.0 million.

Our €200.0 million term loan with Rabobank is due May 2, 2016. We have the ability to prepay the term loan before its maturity date. Interest is payable on the term loan at 4¹/₂% per annum, payable quarterly in arrears on March 31, June 30, September 30 and December 31 of each year. The term loan contains covenants restricting, among other things, the incurrence of indebtedness and the making of certain payments, including dividends, and is subject to acceleration in the event of default. We also must fulfill financial covenants with respect to a total debt to EBITDA ratio and an interest coverage ratio.

Table of Contents

Our \$201.2 million of 1¹/₄% convertible senior subordinated notes due December 15, 2036, issued in December 2006, provided for the settlement upon conversion in cash up to the principal amount of the notes with any excess conversion value settled in shares of our common stock. Interest is payable on the notes at 1¹/₄% per annum, payable semi-annually in arrears in cash on June 15 and December 15 of each year. The notes are convertible into shares of our common stock at an effective price of \$40.44 per share, subject to adjustment, including to reflect the impact to the conversion rate upon payment of any dividends to the Company's stockholders. The current effective price reflects a conversion rate for the notes of 24.7268 shares of common stock per \$1,000 principal amount of notes. Beginning December 19, 2013, we could redeem any of the notes at a redemption price of 100% of their principal amount, plus accrued interest, as well as settle any excess conversion value with shares of our common stock. Holders of the notes may require us to repurchase the notes at a repurchase price of 100% of their principal amount, plus accrued interest, on December 15, 2016, 2021, 2026 and 2031. Holders of our 1¹/₄% convertible senior subordinated notes had the right to require us to repurchase the notes at a repurchase price of 100% of their principal amount, plus any interest, on December 15, 2013. No notes were tendered for repurchase. See Note 6 to our Consolidated Financial Statements for a full description of these notes.

In addition, holders may convert the notes if, during any fiscal quarter, the closing sales price of the our common stock exceeds 120% of the conversion price of \$40.44 per share for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter. As of December 31, 2013, the closing sales price of our common stock had exceeded 120% of the conversion price of the 1¹/₄% convertible senior subordinated notes for at least 20 trading days in the 30 consecutive trading days ending December 31, 2013, and, therefore, the holders of the notes may convert the notes during the three months ending March 31, 2014. Due to the ability of the holders of the notes to convert the notes during the three months ending March 31, 2014, we classified the notes as a current liability as of December 31, 2013. As of December 31, 2012, we classified the notes as a current liability due to the redemption feature of the notes. We also classified approximately \$9.2 million of the equity component of the 1¹/₄% convertible senior subordinated notes as "Temporary equity" as of December 31, 2012. The amount classified as "Temporary equity" was measured as the excess of (i) the amount of cash that would be required to be paid upon conversion over (ii) the current carrying amount of the liability-classified component. As of December 31, 2013, the amount of principal cash required to be repaid upon conversion of the 1¹/₄% convertible senior subordinated notes was equivalent to the carrying amount of the liability-classified component. Future classification of the notes between current liabilities and long-term debt beyond will be dependent on the closing sales price of our common stock during future quarters, until the fourth quarter of 2015.

During 2013, holders of our 1¹/₄% convertible senior subordinated notes converted less than \$0.1 million of principal amount of the notes. We issued 286 shares of our common stock associated with the less than \$0.1 million excess conversion value of the notes. We reflected the repayment of the principal of the notes totaling less than \$0.1 million within "Conversion of convertible senior subordinated notes" within our Consolidated Statements of Cash Flows for the year ended December 31, 2013. Subsequent to December 31, 2013, holders of our 1¹/₄% convertible senior subordinated notes converted approximately \$49.6 million of principal amount of the notes. We issued 377,957 shares of our common stock associated with the \$21.9 million excess conversion value of the notes.

The 1¹/₄% convertible senior subordinated notes will impact the diluted weighted average shares outstanding in future periods depending on our stock price for the excess conversion value using the treasury stock method. Refer to Notes 1 and 6 of our Consolidated Financial Statements for further discussion.

Our accounts receivable sales agreements in North America and Europe permit the sale, on an ongoing basis, of a majority of our wholesale receivables to our 49% owned U.S., Canadian and European retail finance joint ventures. The sales of all receivables are without recourse to us. We do not service the receivables after the sale occurs, and we do not maintain any direct retained interest in the receivables. These agreements are accounted for as off-balance sheet

transactions and have the effect of reducing accounts receivable and short-term liabilities by the same amount. As of December 31, 2013 and 2012, cash received from receivables sold under the U.S., Canadian and European accounts receivable agreements was approximately \$1.3 billion and \$1.1 billion, respectively.

Our AGCO Finance retail joint ventures in Brazil and Australia also provide wholesale financing to our dealers. The receivables associated with these arrangements are also without recourse to us. As of December 31, 2013 and 2012, these retail finance joint ventures had approximately \$68.2 million and \$100.6 million, respectively, of outstanding accounts receivable associated with these arrangements. These arrangements are accounted for as off-balance sheet transactions. In addition, we sell certain trade receivables under factoring arrangements to other financial institutions around the world. These arrangements are also accounted for as off-balance sheet transactions.

Table of Contents

Former facilities

During 2011, holders of our former 1³/₄% convertible senior subordinated notes converted approximately \$161.0 million of principal amount of the notes. We issued 3,926,574 shares of our common stock associated with the \$195.9 million excess conversion value of the notes. We reflected the repayment of the principal of the notes totaling \$161.0 million within “Conversion of convertible senior subordinated notes” within our Consolidated Statements of Cash Flows for the year ended December 31, 2011.

Cash Flows

Cash flows provided by operating activities were \$797.0 million during 2013 compared to \$666.4 million during 2012. The increase in cash flows provided by operating activities during 2013 was primarily due to an increase in net income.

Our working capital requirements are seasonal, with investments in working capital typically building in the first half of the year and then reducing in the second half of the year. We had \$1,705.1 million in working capital at December 31, 2013, as compared with \$1,489.9 million at December 31, 2012. Accounts receivable and inventories, combined, at December 31, 2013 were \$329.0 million higher than at December 31, 2012. The increase in accounts receivable and inventories as of December 31, 2013 compared to December 31, 2012 was as a result of net sales growth and an increase in inventory levels in part to support the transition of production to Tier 4 emission compliant products in 2014.

Our debt to capitalization ratio, which is total indebtedness divided by the sum of total indebtedness and stockholders' equity, was 23.6% at December 31, 2013 compared to 26.9% at December 31, 2012.

In December 2013, we executed a cash repatriation of approximately \$844.8 million from certain of our foreign subsidiaries to our U.S. holding company, with insignificant U.S. tax impacts. The repatriated cash is expected to be used to fund \$550.0 million of share repurchase programs as well as for other general corporate purposes as is more fully described in Note 8 to our Consolidated Financial Statements.

Contractual Obligations

The future payments required under our significant contractual obligations, excluding foreign currency option and forward contracts, as of December 31, 2013 are as follows (in millions):

	Payments Due By Period				
	Total	2014	2015 to 2016	2017 to 2018	2019 and Beyond
Indebtedness ⁽¹⁾	\$1,250.2	\$311.7	\$621.1	\$1.6	\$315.8
Interest payments related to long-term debt ⁽¹⁾	182.1	36.7	60.9	35.6	48.9
Capital lease obligations	5.5	2.7	2.5	0.3	—
Operating lease obligations	180.1	48.8	60.3	25.6	45.4
Unconditional purchase obligations	181.4	142.9	28.6	9.9	—
Other short-term and long-term obligations ⁽²⁾	431.6	107.7	72.1	100.6	151.2
Total contractual cash obligations	\$2,230.9	\$650.5	\$845.5	\$173.6	\$561.3
	Amount of Commitment Expiration Per Period				
	Total	2014	2015 to 2016	2017 to 2018	2019 and Beyond

Standby letters of credit and similar instruments	\$16.7	\$16.3	\$0.2	\$0.2	\$—
Guarantees	171.6	166.5	4.3	0.8	—
Total commercial commitments and letters of credit	\$188.3	\$182.8	\$4.5	\$1.0	\$—

-
- Estimated interest payments are calculated assuming current interest rates over minimum maturity periods specified in debt agreements. Debt may be repaid sooner or later than such minimum maturity periods.
- (1) Indebtedness amounts reflect the principal amount of our convertible senior subordinated notes, senior term loan, senior notes and credit facility.
- Other short-term and long-term obligations include estimates of future minimum contribution requirements under our U.S. and non-U.S. defined benefit pension and postretirement plans. These estimates are based on current
- (2) legislation in the countries we operate within and are subject to change. Other short-term and long-term obligations also include income tax liabilities related to uncertain income tax positions connected with ongoing income tax audits in various jurisdictions.

Table of Contents

Commitments and Off-Balance Sheet Arrangements

Guarantees

We maintain a remarketing agreement with our retail finance joint venture in the United States, whereby we are obligated to repurchase repossessed inventory at market values. We have an agreement with our retail finance joint venture in the United States which limits our purchase obligations under this arrangement to \$6.0 million in the aggregate per calendar year. We believe that any losses that might be incurred on the resale of this equipment will not materially impact our financial position or results of operations, due to the fact that the repurchase obligation would be equivalent to the fair value of the underlying equipment.

At December 31, 2013, we guaranteed indebtedness owed to third parties of approximately \$171.6 million, primarily related to dealer and end-user financing of equipment. Such guarantees generally obligate us to repay outstanding finance obligations owed to financial institutions if dealers or end users default on such loans through 2018. We believe the credit risk associated with these guarantees is not material to our financial position or results of operations. Losses under such guarantees have historically been insignificant. In addition, we generally would expect to be able to recover a significant portion of the amounts paid under such guarantees from the sale of the underlying financed farm equipment, as the fair value of such equipment is expected to offset a substantial portion of the amounts paid.

Other

At December 31, 2013, we had outstanding designated and non-designated foreign exchange contracts with a gross notional amount of approximately \$1,338.7 million. The outstanding contracts as of December 31, 2013 range in maturity through December 2014. Gains and losses on such contracts are historically substantially offset by losses and gains on the exposures being hedged. See “Foreign Currency Risk Management” for additional information.

As discussed in “Liquidity and Capital Resources,” we sell a majority of our wholesale accounts receivable in North America and Europe to our U.S., Canadian and European retail finance joint ventures. We also sell certain accounts receivable under factoring arrangements to financial institutions around the world. We have determined that these facilities should be accounted for as off-balance sheet transactions.

Contingencies

As a result of Brazilian tax legislation impacting value added taxes (“VAT”), we have recorded a reserve of approximately \$62.8 million and \$59.6 million against our outstanding balance of Brazilian VAT taxes receivable as of December 31, 2013 and 2012, respectively, due to the uncertainty as to our ability to collect the amounts outstanding.

In June 2008, the Republic of Iraq filed a civil action against three of our foreign subsidiaries that participated in the United Nations Oil for Food Program. On February 6, 2013, the federal court dismissed the complaint with prejudice. The plaintiff has filed a notice of appeal with respect to the decision. On October 30, 2012, a third-party complaint was filed in federal court in the Southern District of Texas naming as defendants three of our foreign subsidiaries. The complaint asserts claims against the defendants, certain of which are also third-party plaintiffs, seeking unspecified damages arising from their participation in the Program. On February 12, 2014, the federal court dismissed the third-party complaint with prejudice. The appeals period has not expired. As part of routine audits, the Brazilian taxing authorities disallowed deductions relating to the amortization of certain goodwill recognized in connection with a reorganization of our Brazilian operations and the related transfer of certain assets to our Brazilian subsidiaries. See Note 11 to our Consolidated Financial Statements for further discussion of these matters.

Related Parties

Rabobank is a 51% owner in our retail finance joint ventures, which are located in the United States, Canada, Europe, Brazil, Argentina and Australia. Rabobank is also the principal agent and participant in our credit facility. The majority of the assets of our retail finance joint ventures represents finance receivables. The majority of the liabilities represents notes payable and accrued interest. Under the various joint venture agreements, Rabobank or its affiliates provide financing to the joint venture companies, primarily through lines of credit. We do not guarantee the debt obligations of the retail finance joint ventures. During 2013, 2012 and 2011, we made a total of approximately \$15.5 million, \$7.1 million and \$8.3 million, respectively, of investments in our retail finance joint ventures in Germany and the Netherlands, primarily related to additional capital required as a result of increased retail finance portfolios during 2013, 2012 and 2011.

Table of Contents

Our retail finance joint ventures provide retail and wholesale financing to our dealers. The terms of the financing arrangements offered to our dealers are similar to arrangements the retail finance joint ventures provide to unaffiliated third parties. In addition, we transfer, on an ongoing basis, a majority of our wholesale receivables in North America and Europe to our U.S., Canadian and European retail finance joint ventures. See Note 3 to our Consolidated Financial Statements for further discussion of these agreements. We maintain a remarketing agreement with our U.S. retail finance joint venture, AGCO Finance LLC, as discussed above under “Commitments and Off-Balance Sheet Arrangements.” In addition, as part of sales incentives provided to end users, we may from time to time subsidize interest rates of retail financing provided by our retail finance joint ventures. The cost of those programs is recognized at the time of sale to our dealers.

TAFE, in which we hold a 23.75% interest, manufactures Massey Ferguson-branded equipment primarily in India and also supplies tractors and components to us for sale in other markets. Mallika Srinivasan, who is the Chairman and Chief Executive Officer of TAFE, is currently a member of our Board of Directors. During 2013, 2012 and 2011, we purchased approximately \$90.7 million, \$104.5 million and \$80.4 million, respectively, of tractors and components from TAFE.

During 2013, 2012 and 2011, we paid approximately \$3.3 million, \$3.8 million and \$4.0 million, respectively, to PPG Industries, Inc. for painting materials used in our manufacturing processes. Our Chairman, President and Chief Executive Officer is currently a member of the board of directors of PPG Industries, Inc.

During 2013, we paid approximately \$2.3 million to Ryerson, Inc. for steel used in our manufacturing processes. Michael Arnold, who is the President and Chief Executive Officer of Ryerson, Inc., is currently a member of our Board of Directors.

Foreign Currency Risk Management

We have significant manufacturing operations in the United States, France, Germany, Finland and Brazil, and we purchase a portion of our tractors, combines and components from third-party foreign suppliers, primarily in various European countries and in Japan. We also sell products in over 140 countries throughout the world. The majority of our net sales outside the United States are denominated in the currency of the customer location, with the exception of sales in the Middle East, Africa, Asia and parts of South America, where net sales are primarily denominated in British pounds, Euros or United States dollars. See Note 13 to our Consolidated Financial Statements for net sales by customer location. Our most significant transactional foreign currency exposures are the Euro, the Brazilian real and the Canadian dollar in relation to the United States dollar, and the Euro in relation to the British pound. Fluctuations in the value of foreign currencies create exposures, which can adversely affect our results of operations.

We attempt to manage our transactional foreign currency exposure by hedging foreign currency cash flow forecasts and commitments arising from the anticipated settlement of receivables and payables and from future purchases and sales. Where naturally offsetting currency positions do not occur, we hedge certain, but not all, of our exposures through the use of foreign currency contracts. Our translation exposure resulting from translating the financial statements of foreign subsidiaries into United States dollars is not hedged. Our most significant translation exposures are the Euro, the British pound and the Brazilian real in relation to the United States dollar. When practical, this translation impact is reduced by financing local operations with local borrowings. Our hedging policy prohibits use of foreign currency contracts for speculative trading purposes.

All derivatives are recognized on our Consolidated Balance Sheets at fair value. On the date a derivative contract is entered into, we designate the derivative as either (1) a fair value hedge of a recognized liability, (2) a cash flow hedge of a forecasted transaction, (3) a hedge of a net investment in a foreign operation, or (4) a non-designated derivative

instrument. We currently engage in derivatives that are cash flow hedges of forecasted transactions as well as non-designated derivative instruments. Changes in the fair value of non-designated derivative contracts are reported in current earnings. During 2013, 2012 and 2011, we designated certain foreign currency contracts as cash flow hedges of forecasted sales and purchases. The effective portion of the fair value gains or losses on these cash flow hedges are recorded in other comprehensive loss and are subsequently reclassified into cost of goods sold during the period the sales and purchases are recognized. These amounts offset the effect of the changes in foreign currency rates on the related sale and purchase transactions. The amount of the net (loss) gain recorded in other comprehensive loss that was reclassified to cost of goods sold during the years ended December 31, 2013, 2012 and 2011 was approximately \$(0.5) million, \$(8.1) million and \$5.2 million, respectively, on an after-tax basis. The amount of the unrealized (loss) gain recorded to other comprehensive loss related to the outstanding cash flow hedges as of December 31, 2013, 2012 and 2011 was approximately \$(0.2) million, \$0.7 million and \$(4.3) million, respectively, on an after-tax basis. The outstanding contracts as of December 31, 2013 range in maturity through December 2014.

Table of Contents

Assuming a 10% change relative to the currency of the hedge contract, the fair value of the foreign currency instruments could be negatively impacted by approximately \$61.6 million as of December 31, 2013. Due to the fact that these instruments are primarily entered into for hedging purposes, the gains or losses on the contracts would largely be offset by losses and gains on the underlying firm commitment or forecasted transaction.

Interest Rates

We manage interest rate risk through the use of fixed rate debt and may in the future utilize interest rate swap contracts. We have fixed rate debt from our convertible senior subordinated notes, senior notes and senior term loan. Our floating rate exposure is related to our credit facility and our accounts receivable sales facilities, which are tied to changes in United States and European LIBOR rates. Assuming a 10% increase in interest rates, interest expense, net for the year ended December 31, 2013 would have increased by approximately \$3.8 million.

We had no interest rate swap contracts outstanding during the years ended December 31, 2013, 2012 and 2011.

Recent Accounting Pronouncements

See Note 1 to our Consolidated Financial Statements for more information regarding recent accounting pronouncements and their impact to our consolidated results of operations and financial position.

Critical Accounting Estimates

We prepare our Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles. In the preparation of these financial statements, we make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The significant accounting policies followed in the preparation of the financial statements are detailed in Note 1 to our Consolidated Financial Statements. We believe that our application of the policies discussed below involves significant levels of judgment, estimates and complexity.

Due to the level of judgment, complexity and period of time over which many of these items are resolved, actual results could differ from those estimated at the time of preparation of the financial statements. Adjustments to these estimates would impact our financial position and future results of operations.

Allowance for Doubtful Accounts

We determine our allowance for doubtful accounts by actively monitoring the financial condition of our customers to determine the potential for any nonpayment of trade receivables. In determining our allowance for doubtful accounts, we also consider other economic factors, such as aging trends. We believe that our process of specific review of customers combined with overall analytical review provides an effective evaluation of ultimate collectability of trade receivables. Our loss or write-off experience was approximately 0.1% of net sales in 2013.

Discount and Sales Incentive Allowances

We provide various volume bonus and sales incentive programs with respect to our products. These sales incentive programs include reductions in invoice prices, reductions in retail financing rates, dealer commissions and dealer incentive allowances. In most cases, incentive programs are established and communicated to our dealers on a quarterly basis. The incentives are paid either at the time of invoice (through a reduction of invoice price), at the time

of the settlement of the receivable, at the time of retail financing, at the time of warranty registration, or at a subsequent time based on dealer purchases. The incentive programs are product line specific and generally do not vary by dealer. The cost of sales incentives associated with dealer commissions and dealer incentive allowances is estimated based upon the terms of the programs and historical experience, is based on a percentage of the sales price, and is recorded at the later of (a) the date at which the related revenue is recognized, or (b) the date at which the sales incentive is offered. The related provisions and accruals are made on a product or product-line basis and are monitored for adequacy and revised at least quarterly in the event of subsequent modifications to the programs. Volume discounts are estimated and recognized based on historical experience, and related reserves are monitored and adjusted based on actual dealer purchases and the dealers' progress towards achieving specified cumulative target levels. We record the cost of interest subsidy payments, which is a reduction in the retail financing rates, at the later of (a) the date at which the related revenue is recognized, or (b) the date at which the sales incentive is offered. Estimates of these incentives are based on the terms of the programs and historical experience. All incentive programs are recorded and presented as a reduction of revenue due to the fact that we do not receive an identifiable benefit in exchange for

Table of Contents

the consideration provided. Reserves for incentive programs that will be paid either through the reduction of future invoices or through credit memos are recorded as “accounts receivable allowances” within our Consolidated Balance Sheets. Reserves for incentive programs that will be paid in cash, as is the case with most of our volume discount programs, as well as sales incentives associated with accounts receivable sold to our U.S. and Canadian retail finance joint ventures, are recorded within “Accrued expenses” within our Consolidated Balance Sheets.

At December 31, 2013, we had recorded an allowance for discounts and sales incentives of approximately \$236.6 million, primarily related to allowances in our North America geographical segment that will be paid either through a reduction of future invoices, through credit memos to our dealers or through reductions in retail financing rates. If we were to allow an additional 1% of sales incentives and discounts at the time of retail sale, for those sales subject to such discount programs, our reserve would increase by approximately \$8.5 million as of December 31, 2013. Conversely, if we were to decrease our sales incentives and discounts by 1% at the time of retail sale, our reserve would decrease by approximately \$8.5 million as of December 31, 2013.

Inventory Reserves

Inventories are valued at the lower of cost or market using the first-in, first-out method. Market is current replacement cost (by purchase or by reproduction, dependent on the type of inventory). In cases where market exceeds net realizable value (i.e., estimated selling price less reasonably predictable costs of completion and disposal), inventories are stated at net realizable value. Market is not considered to be less than net realizable value reduced by an allowance for an approximately normal profit margin. Determination of cost includes estimates for surplus and obsolete inventory based on estimates of future sales and production. Changes in demand and product design can impact these estimates. We periodically evaluate and update our assumptions when assessing the adequacy of inventory adjustments.

Deferred Income Taxes and Uncertain Income Tax Positions

We recorded an income tax provision of \$258.5 million in 2013 compared to \$137.9 million in 2012. Our tax provision is impacted by the differing tax rates of the various tax jurisdictions in which we operate, permanent differences for items treated differently for financial accounting and income tax purposes, and losses in jurisdictions where no income tax benefit is recorded.

A valuation allowance is established when it is more likely than not that some portion or all of a company’s deferred tax assets will not be realized. We assessed the likelihood that our deferred tax assets would be recovered from estimated future taxable income and available income tax planning strategies. At December 31, 2013 and 2012, we had gross deferred tax assets of \$423.2 million and \$478.0 million, respectively, including \$69.7 million and \$94.9 million, respectively, related to net operating loss carryforwards. At December 31, 2013, we had total valuation allowances as an offset to the gross deferred tax assets of \$77.2 million primarily related to net operating loss carryforwards in Brazil, China and Russia. At December 31, 2012, we had total valuation allowances as an offset to the gross deferred tax assets of approximately \$74.5 million, primarily related to net operating loss carryforwards in Brazil, Switzerland, China and Russia. Realization of the remaining deferred tax assets as of December 31, 2013 will depend on generating sufficient taxable income in future periods, net of reversing deferred tax liabilities. We believe it is more likely than not that the remaining net deferred tax assets will be realized.

As of December 31, 2013 and 2012, we had approximately \$122.2 million and \$94.5 million, respectively, of unrecognized tax benefits, all of which would impact our effective tax rate if recognized. As of December 31, 2013 and 2012, we had approximately \$61.9 million and \$23.5 million, respectively, of current accrued taxes related to uncertain income tax positions connected with ongoing tax audits in various jurisdictions that we expect to settle or

pay in the next 12 months. We recognize interest and penalties related to uncertain income tax positions in income tax expense. As of December 31, 2013 and 2012, we had accrued interest and penalties related to unrecognized tax benefits of approximately \$14.4 million and \$11.9 million, respectively. See Note 5 to our Consolidated Financial Statements for further discussion of our uncertain income tax positions.

Warranty and Additional Service Actions

We make provisions for estimated expenses related to product warranties at the time products are sold. We base these estimates on historical experience of the nature, frequency and average cost of warranty claims. In addition, we take into consideration the number and magnitude of additional service actions expected to be approved and policies related to additional service actions. Due to the uncertainty and potential volatility of these estimated factors, changes in our assumptions could materially affect net income.

Table of Contents

Our estimate of warranty obligations is reevaluated on a quarterly basis. Experience has shown that initial data for any product series line can be volatile; therefore, our process relies upon long-term historical averages until sufficient data is available. As actual experience becomes available, it is used to modify the historical averages to ensure that the forecast is within the range of likely outcomes. Resulting balances are then compared with present spending rates to ensure that the accruals are adequate to meet expected future obligations.

See Note 1 to our Consolidated Financial Statements for more information regarding costs and assumptions for warranties.

Insurance Reserves

Under our insurance programs, coverage is obtained for significant liability limits as well as those risks required by law or contract. It is our policy to self-insure a portion of certain expected losses related primarily to workers' compensation and comprehensive general, product liability and vehicle liability. We provide insurance reserves for our estimates of losses due to claims for those items for which we are self-insured. We base these estimates on the expected ultimate settlement amount of claims, which often have long periods of resolution. We closely monitor the claims to maintain adequate reserves.

Pensions

We sponsor defined benefit pension plans covering certain employees, principally in the United States, the United Kingdom, Germany, Finland, Norway, France, Switzerland, Australia and Argentina. Our primary plans cover certain employees in the United States and the United Kingdom.

In the United States, we sponsor a funded, qualified pension plan for our salaried employees, as well as a separate funded qualified pension plan for our hourly employees. Both plans are frozen, and we fund at least the minimum contributions required under the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code to both plans. In addition, we sponsor an unfunded, nonqualified pension plan for certain executives.

In the United Kingdom, we sponsor a funded pension plan that provides an annuity benefit based on participants' final average earnings and service. Participation in this plan is limited to certain older, longer service employees and existing retirees. This plan is closed to new participants.

See Note 7 to our Consolidated Financial Statements for more information regarding costs and assumptions for employee retirement benefits.

Nature of Estimates Required. The measurement date for all of our benefit plans is December 31. The measurement of our pension obligations, costs and liabilities is dependent on a variety of assumptions provided by management and used by our actuaries. These assumptions include estimates of the present value of projected future pension payments to all plan participants, taking into consideration the likelihood of potential future events such as salary increases and demographic experience. These assumptions may have an effect on the amount and timing of future contributions.

Assumptions and Approach Used. The assumptions used in developing the required estimates include the following key factors:

- Discount rates
- Salary growth
- Retirement rates
- Inflation
- Expected return on plan assets
- Mortality rates

For the years ended December 31, 2013, 2012 and 2011, we used a globally consistent methodology to set the discount rate in the countries where our largest benefit obligations exist. In the United States, the United Kingdom and the Euro Zone, we constructed a hypothetical bond portfolio of high-quality corporate bonds and then applied the cash flows of our benefit plans to those bond yields to derive a discount rate. The bond portfolio and plan-specific cash flows vary by country, but the methodology in which the portfolio is constructed is consistent. In the United States, the bond portfolio is large enough to result in taking a “settlement approach” to derive the discount rate, where high-quality corporate bonds are assumed to be purchased and the resulting coupon payments and maturities are used to satisfy our largest U.S. pension plan’s projected benefit payments. In the United Kingdom and the Euro Zone, the discount rate is derived using a “yield curve approach,” where an individual spot rate, or zero coupon bond yield, for each future annual period is developed to discount each future benefit

Table of Contents

payment and, thereby, determine the present value of all future payments. Under the settlement and yield curve approaches, the discount rate is set to equal the single discount rate that produces the same present value of all future payments.

The other key assumptions and methods were set as follows:

Our inflation assumption is based on an evaluation of external market indicators.

The salary growth assumptions reflect our long-term actual experience, the near-term outlook and assumed inflation.

The expected return on plan asset assumptions reflects asset allocations, investment strategy, historical experience and the views of investment managers, and reflect a projection of the expected arithmetic returns over 10 years.

Retirement and termination rates primarily are based on actual plan experience and actuarial standards of practice.

The mortality rates for the U.S. plans were updated in 2013 to reflect expected improvements in the life expectancy of the plan participants.

The fair value of assets used to determine the expected return on assets does not reflect any delayed recognition of assets gains and losses.

The effects of actual results differing from our assumptions are accumulated and amortized over future periods and, therefore, generally affect our recognized expense in such periods.

Our U.S. and U.K. pension plans, including our U.S. nonqualified pension plan, comprised approximately 86% of our consolidated projected benefit obligation as of December 31, 2013. If the discount rate used to determine the 2013 projected benefit obligation for our U.S. pension plans was decreased by 25 basis points, our projected benefit obligation would have increased by approximately \$2.2 million at December 31, 2013, and our 2014 pension expense would increase by approximately \$0.1 million. If the discount rate used to determine the 2013 projected benefit obligation for our U.S. pension plans was increased by 25 basis points, our projected benefit obligation would have decreased by approximately \$2.1 million at December 31, 2013, and our 2014 pension expense would decrease by approximately \$0.1 million. If the discount rate used to determine the projected benefit obligation for our U.K. pension plan was decreased by 25 basis points, our projected benefit obligation would have increased by approximately \$25.8 million at December 31, 2013, and our 2014 pension expense would increase by approximately \$0.7 million. If the discount rate used to determine the projected benefit obligation for our U.K. pension plan was increased by 25 basis points, our projected benefit obligation would have decreased by approximately \$24.6 million at December 31, 2013, and our 2014 pension expense would decrease by approximately \$0.7 million. In addition, if the expected long-term rate of return on plan assets related to our U.K. pension plan was increased or decreased by 25 basis points, our 2014 pension expense would decrease or increase by approximately \$1.5 million each, respectively. The impact to our U.S. pension plan for a 25 basis point change in our expected long-term rate of return would have an insignificant impact to our 2014 pension expense.

Unrecognized actuarial losses related to our qualified pension plans were \$260.3 million as of December 31, 2013 compared to \$321.5 million as of December 31, 2012. Unrecognized actuarial losses related to our U.S. nonqualified pension plan were \$5.2 million as of December 31, 2013 compared to \$11.9 million as of December 31, 2012. The decrease in unrecognized losses between years primarily resulted from an increase in discount rates during 2013 and favorable investment performance. The unrecognized actuarial losses will be impacted in future periods by actual asset returns, discount rate changes, currency exchange rate fluctuations, actual demographic experience and certain other factors. For some of our qualified defined benefit pension plans, these losses, to the extent they exceed 10% of the greater of the plan's liabilities or the fair value of assets ("the gain/loss corridor") will be amortized on a straight-line basis over the average remaining service period of active employees expected to receive benefits. For our U.S. salaried, U.S. hourly and U.K. pension plans, the population covered is predominantly inactive participants, and losses related to those plans, to the extent they exceed the gain/loss corridor, will be amortized over the average

remaining lives of those participants while covered by the respective plan. As of December 31, 2013, the average amortization period was 18 years for our U.S. qualified pension plans and 22 years for our non-U.S. pension plans. The estimated net actuarial loss for qualified defined benefit pension plans expected to be amortized from our accumulated other comprehensive loss during the year ended December 31, 2014 is approximately \$8.6 million compared to approximately \$13.3 million during the year ended December 31, 2013. For our U.S. nonqualified pension plan, the population is predominantly active participants, and losses related to the plan will be amortized over the average future working lifetime of the active participants. As of December 31, 2013, the average amortization period was 11.5 years for our U.S. nonqualified pension plan. The estimated net actuarial losses for the U.S. nonqualified pension plan expected to be amortized from our accumulated other comprehensive loss during the year ended December 31, 2014 is approximately \$0.1 million compared to approximately \$0.7 million during the year ended December 31, 2013.

Table of Contents

Investment Strategy and Concentration of Risk

The weighted average asset allocation of our U.S. pension benefit plans at December 31, 2013 and 2012 are as follows:

Asset Category	2013	2012	
Large and small cap domestic equity securities	48	% 45	%
International equity securities	16	% 14	%
Domestic fixed income securities	16	% 21	%
Other investments	20	% 20	%
Total	100	% 100	%

The weighted average asset allocation of our non-U.S. pension benefit plans at December 31, 2013 and 2012 are as follows:

Asset Category	2013	2012	
Equity securities	45	% 42	%
Fixed income securities	30	% 34	%
Other investments	25	% 24	%
Total	100	% 100	%

All tax-qualified pension fund investments in the United States are held in the AGCO Corporation Master Pension Trust. Our global pension fund strategy is to diversify investments across broad categories of equity and fixed income securities with appropriate use of alternative investment categories to minimize risk and volatility. The primary investment objective of our pension plans is to secure participant retirement benefits. As such, the key objective in the pension plans' financial management is to promote stability and, to the extent appropriate, growth in funded status.

The investment strategy for the plans' portfolio of assets balances the requirement to generate returns with the need to control risk. The asset mix is recognized as the primary mechanism to influence the reward and risk structure of the pension fund investments in an effort to accomplish the plans' funding objectives. The overall investment strategy for the U.S.-based pension plans is to achieve a mix of approximately 15% of assets for the near-term benefit payments and 85% for longer-term growth. The overall U.S. pension funds invest in a broad diversification of asset types. Our U.S. target allocation of retirement fund investments is 45% large- and small-cap domestic equity securities, 15% international equity securities, 20% broad fixed income securities and 20% in alternative investments. We have noted that over long investment horizons, this mix of investments would achieve an average return of approximately 7.0%. The overall investment strategy for the non-U.S. based pension plans is to achieve a mix of approximately 30% of assets for the near-term benefit payments and 70% for longer-term growth. The overall non-U.S. pension funds invest in a broad diversification of asset types. Our non-U.S. target allocation of retirement fund investments is 45% equity securities, 30% broad fixed income investments and 25% in alternative investments. The majority of our non-U.S. pension fund investments are related to our pension plan in the United Kingdom. We have noted that over very long periods, this mix of investments would achieve an average return in excess of 7.8%. In arriving at the choice of an expected return assumption of 7.0% for our U.K.-based plans for the year ended December 31, 2014, we have tempered this historical indicator with lower expectations for returns and equity investment in the future as well as the administrative costs of the plans.

Equity securities primarily include investments in large-cap and small-cap companies located across the globe. Fixed income securities include corporate bonds of companies from diversified industries, mortgage-backed securities, agency mortgages, asset-backed securities and government securities. Alternative and other assets include investments in hedge fund of funds that follow diversified investment strategies. To date, we have not invested pension funds in our own stock, and we have no intention of doing so in the future.

Within each asset class, careful consideration is given to balancing the portfolio among industry sectors, geographies, interest rate sensitivity, dependence on economic growth, currency and other factors affecting investment returns. The assets are managed by professional investment firms. They are bound by precise mandates and are measured against specific benchmarks. Among asset managers, consideration is given, among others, to balancing security concentration, issuer concentration, investment style and reliance on particular active investment strategies.

Table of Contents

As of December 31, 2013, our unfunded or underfunded obligations related to our qualified pension plans were approximately \$190.5 million, primarily due to our pension plan in the United Kingdom. In 2013, we contributed approximately \$41.0 million towards those obligations, and we expect to fund approximately \$42.6 million in 2014. Future funding is dependent upon compliance with local laws and regulations and changes to those laws and regulations in the future, as well as the generation of operating cash flows in the future. We currently have an agreement in place with the trustees of the U.K. defined benefit plan that obligates us to fund approximately £15.4 million per year (or approximately \$25.6 million) towards that obligation for the next ten years. The funding arrangement is based upon the current underfunded status and could change in the future as discount rates, local laws and regulations, and other factors change.

Other Postretirement Benefits (Retiree Health Care and Life Insurance)

We provide certain postretirement health care and life insurance benefits for certain employees, principally in the United States and Brazil. Participation in these plans has been generally limited to older employees and existing retirees. See Note 7 to our Consolidated Financial Statements for more information regarding costs and assumptions for other postretirement benefits.

Nature of Estimates Required. The measurement of our obligations, costs and liabilities associated with other postretirement benefits, such as retiree health care and life insurance, requires that we make use of estimates of the present value of the projected future payments to all participants, taking into consideration the likelihood of potential future events such as health care cost increases and demographic experience, which may have an effect on the amount and timing of future payments.

Assumptions and Approach Used. The assumptions used in developing the required estimates include the following key factors:

- Health care cost trends
- Discount rates
- Retirement rates
- Inflation
- Medical coverage elections
- Mortality rates

Our health care cost trend assumptions are developed based on historical cost data, the near-term outlook, efficiencies and other cost-mitigating actions, including further employee cost sharing, administrative improvements and other efficiencies, and an assessment of likely long-term trends. For the years ended December 31, 2013, 2012 and 2011, as previously discussed, we used a globally consistent methodology to set the discount rate in the countries where our largest benefit obligations exist. In the United States, we constructed a hypothetical bond portfolio of high-quality corporate bonds and then applied the cash flows of our benefit plans to those bond yields to derive a discount rate. In the United States, the bond portfolio is large enough to result in taking a “settlement approach” to derive the discount rate, where high-quality corporate bonds are assumed to be purchased and the resulting coupon payments and maturities are used to satisfy our largest U.S. pension plan’s projected benefit payments. After the bond portfolio is selected, a single discount rate is determined such that the market value of the bonds purchased equals the discounted value of the plan’s benefit payments. For our Brazilian plan, we based the discount rate on government bond indices within that country. The indices used were chosen to match our expected plan obligations and related expected cash flows. Our inflation assumptions are based on an evaluation of external market indicators. Retirement and termination rates are based primarily on actual plan experience and actuarial standards of practice. The mortality rates for the U.S. plans were updated during 2013 to reflect expected improvements in the life expectancy of the plan participants. The effects of actual results differing from our assumptions are accumulated and amortized over future periods and, therefore, generally affect our recognized expense in such future periods.

Our U.S. postretirement health care and life insurance plans represent approximately 92% of our consolidated projected benefit obligation. If the discount rate used to determine the 2013 projected benefit obligation for our U.S. postretirement benefit plans was decreased by 25 basis points, our projected benefit obligation would have increased by approximately \$0.7 million at December 31, 2013, and our 2014 postretirement benefit expense would increase by a nominal amount. If the discount rate used to determine the 2013 projected benefit obligation for our U.S. postretirement benefit plans was increased by 25 basis points, our projected benefit obligation would have decreased by approximately \$0.7 million, and our 2014 pension expense would decrease by a nominal amount.

Unrecognized actuarial losses related to our U.S. and Brazilian postretirement benefit plans were \$4.1 million as of December 31, 2013 compared to \$10.8 million as of December 31, 2012, of which \$6.5 million and \$10.0 million, respectively, related to our U.S. postretirement benefit plans. The decrease in losses primarily reflects the increase in the discount rate during 2013. The unrecognized actuarial losses will be impacted in future periods by discount rate changes, actual demographic

Table of Contents

experience, actual health care inflation and certain other factors. These losses, to the extent they exceed the gain/loss corridor, will be amortized on a straight-line basis over the average remaining service period of active employees expected to receive benefits, or the average remaining lives of inactive participants, covered under the postretirement benefit plans. As of December 31, 2013, the average amortization period was 13 years for our U.S. postretirement benefit plans. The estimated net actuarial loss for postretirement health care benefits expected to be amortized from our accumulated other comprehensive loss during the year ended December 31, 2014 is approximately \$0.1 million, compared to approximately \$0.5 million during the year ended December 31, 2013.

As of December 31, 2013, we had approximately \$30.3 million in unfunded obligations related to our U.S. and Brazilian postretirement health and life insurance benefit plans. In 2013, we made benefit payments of approximately \$1.8 million towards these obligations, and we expect to make benefit payments of approximately \$1.8 million towards these obligations in 2014.

For measuring the expected U.S. postretirement benefit obligation at December 31, 2013 and 2012, we assumed a 7.5% and 8.0% health care cost trend rate for 2014 and 2013, respectively, decreasing to 5.0% by 2019. For measuring the Brazilian postretirement benefit plan obligation at December 31, 2013, we assumed a 12.25% health care cost trend rate for 2014, decreasing to 6.45% by 2024. For measuring the Brazilian postretirement benefit plan obligation at December 31, 2012, we assumed a 10.7% health care cost trend rate for 2013, decreasing to 6.2% by 2022. Changing the assumed health care cost trend rates by one percentage point each year and holding all other assumptions constant would have the following effect to service and interest cost for 2013 and the accumulated postretirement benefit obligation at December 31, 2013 (in millions):

	One Percentage Point Increase	One Percentage Point Decrease
Effect on service and interest cost	\$0.4	\$(0.3)
Effect on accumulated benefit obligation	\$3.8	\$(3.8)

Litigation

We are party to various claims and lawsuits arising in the normal course of business. We closely monitor these claims and lawsuits and frequently consult with our legal counsel to determine whether they may, when resolved, have a material adverse effect on our financial position or results of operations and accrue and/or disclose loss contingencies as appropriate.

Goodwill, Other Intangible Assets and Long-Lived Assets

We test goodwill and other indefinite-lived intangible assets for impairment on an annual basis or on an interim basis if an event occurs or circumstances change that would reduce the fair value of a reporting unit below its carrying value. Our annual qualitative or quantitative assessments involve determining an estimate of the fair value of our reporting units in order to evaluate whether an impairment of the current carrying amount of goodwill and other indefinite-lived intangible assets exists. A qualitative assessment evaluates whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step quantitative goodwill impairment test. The first step of a quantitative goodwill impairment test, used to identify potential impairment, compares the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not considered impaired, and, thus, the second step of the quantitative impairment test is unnecessary. If the carrying amount of a reporting unit exceeds its fair value, the second step of the quantitative goodwill impairment test is performed to measure the amount of impairment loss, if any. Fair values are derived based on an evaluation of past and expected future performance of our reporting units. A reporting unit is an operating segment or one level below an operating segment, for example, a component. A

component of an operating segment is a reporting unit if the component constitutes a business for which discrete financial information is available and our executive management team regularly reviews the operating results of that component. In addition, we combine and aggregate two or more components of an operating segment as a single reporting unit if the components have similar economic characteristics. Our reportable segments are not our reporting units.

The second step of the quantitative goodwill impairment test, used to measure the amount of impairment loss, compares the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of goodwill. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination; that is, we allocate the fair value of a reporting unit to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire

Table of Contents

the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill.

We utilize a combination of valuation techniques, including a discounted cash flow approach and a market multiple approach, when making quantitative goodwill assessments. As stated above, goodwill is tested qualitatively or quantitatively for impairment on an annual basis and more often if indications of impairment exist.

We review our long-lived assets, which include intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss is recognized when the undiscounted future cash flows estimated to be generated by the asset to be held and used are not sufficient to recover the unamortized balance of the asset. An impairment loss would be recognized based on the difference between the carrying values and estimated fair value. The estimated fair value is determined based on either the discounted future cash flows or other appropriate fair value methods with the amount of any such deficiency charged to income in the current year. If the asset being tested for recoverability was acquired in a business combination, intangible assets resulting from the acquisition that are related to the asset are included in the assessment. Estimates of future cash flows are based on many factors, including current operating results, expected market trends and competitive influences. We also evaluate the amortization periods assigned to intangible assets to determine whether events or changes in circumstances warrant revised estimates of useful lives. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value, less estimated costs to sell.

We make various assumptions, including assumptions regarding future cash flows, market multiples, growth rates and discount rates, in our assessments of goodwill, other indefinite-lived intangible assets and long-lived assets for impairment. The assumptions about future cash flows and growth rates are based on the current and long-term business plans of the reporting unit or related to the long-lived assets. Discount rate assumptions are based on an assessment of the risk inherent in the future cash flows of the reporting unit or long-lived assets. These assumptions require significant judgments on our part, and the conclusions that we reach could vary significantly based upon these judgments.

During the fourth quarter of 2012, we recorded a non-cash impairment charge of approximately \$22.4 million related to goodwill and certain other identifiable intangible assets associated with our Chinese harvesting business in accordance with ASC 350. See Note 1 to our Consolidated Financial Statements for further discussion.

The results of our goodwill and long-lived assets impairment analyses conducted as of October 1, 2013 and 2011 indicated that no reduction in the carrying amount of goodwill and long-lived assets was required. The results of our goodwill impairment analysis conducted as of October 1, 2012 indicated that no other reduction in the carrying amount of goodwill and long-lived assets was required.

As of December 31, 2013, we had approximately \$1,178.7 million of goodwill. While our annual impairment testing in 2013 supported the carrying amount of this goodwill, we may be required to reevaluate the carrying amount in future periods, thus utilizing different assumptions that reflect the then current market conditions and expectations, and, therefore, we could conclude that an impairment has occurred.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Quantitative and Qualitative Disclosures about Market Risk information required by this Item set forth under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations - Foreign Currency Risk Management" and "- Interest Rates" on pages 32 and 33 under Item 7 of this Form 10-K are incorporated herein by reference.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

AGCO Corporation:

We have audited the accompanying consolidated balance sheets of AGCO Corporation and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013. In connection with our audits of the consolidated financial statements, we also have audited the financial statement schedule as listed in Item 15(a)(2). These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of AGCO Corporation and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), AGCO Corporation's internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control — Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 28, 2014 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Operations and Summary of Significant Accounting Policies

Business

AGCO Corporation and subsidiaries (“AGCO” or the “Company”) is a leading manufacturer and distributor of agricultural equipment and related replacement parts throughout the world. The Company sells a full range of agricultural equipment, including tractors, combines, hay tools, sprayers, forage equipment, tillage, implements and grain storage and protein production systems. The Company’s products are widely recognized in the agricultural equipment industry and are marketed under a number of well-known brand names including: Challenger®, Fendt®, GSI®, Massey Ferguson®, and Valtra®. The Company distributes most of its products through a combination of approximately 3,100 independent dealers and distributors. In addition, the Company provides retail financing in the United States, Canada, Europe, South America and Australia through its retail finance joint ventures with Coöperatieve Centrale Raiffeisen-Boerenleenbank B.A., or “Rabobank.”

Basis of Presentation

The Company’s Consolidated Financial Statements represent the consolidation of all wholly-owned companies, majority-owned companies and joint ventures where the Company has been determined to be the primary beneficiary. The Company records investments in all other affiliate companies using the equity method of accounting when it has significant influence. Other investments, including those representing an ownership of less than 20%, are recorded at cost. All significant intercompany balances and transactions have been eliminated in the Consolidated Financial Statements. Certain prior period amounts have been reclassified to conform to the current period presentation.

Basis of Consolidation of Joint Ventures and Other Variable Interest Entities

GIMA is a joint venture between AGCO and Claas Tractor SAS to cooperate in the field of purchasing, design and manufacturing of components for agricultural tractors. Each party has a 50% ownership interest in the joint venture and has an investment of approximately €4.2 million in the joint venture. Both parties purchase all of the production output of the joint venture. The Company does not consolidate the GIMA joint venture into the Company’s results of operations or financial position, as the Company does not have a controlling financial interest in GIMA based on the shared powers of both joint venture partners to direct the activities that most significantly impact GIMA’s financial performance.

Rabobank is a 51% owner in the Company’s retail finance joint ventures. The majority of the assets of the Company’s retail finance joint ventures represents finance receivables. The majority of the liabilities represents notes payable and accrued interest. Under the various joint venture agreements, Rabobank or its affiliates provide financing to the joint venture companies, primarily through lines of credit. The Company does not guarantee the debt obligations of the retail finance joint ventures. The Company’s retail finance joint ventures provide retail financing and wholesale financing to its dealers (Notes 3 and 12). The Company has determined that the retail finance joint ventures do not meet the consolidation requirements and should be accounted for under the voting interest model. In making this determination, the Company evaluated the sufficiency of the equity at risk for each retail finance joint venture, the ability of the joint venture investors to make decisions about the joint ventures’ activities that have a significant effect on the success of the entities and their economic performance, the obligations to absorb expected losses of the joint ventures, and the rights to receive expected residual returns.

During 2011, the Company acquired 50% of AGCO-Amity JV, LLC (“AGCO-Amity JV”), thereby creating a joint venture between the Company and Amity Technology LLC. AGCO-Amity JV is located in North Dakota and manufactures air-seeding and tillage equipment. As the Company has a controlling voting interest to direct the activities that most significantly impact the joint venture, the Company has consolidated the joint venture’s operations in the Company’s results of operations and financial position commencing as of and from the date of the formation of the joint venture.

During 2012, the Company acquired 61% of Santal Equipamentos S.A. Comércio e Indústria (“Santal”), a manufacturer and distributor of sugar cane planting, harvesting, handling and transportation equipment as well as replacement parts across Brazil. As the Company has a controlling voting interest to direct the activities that most significantly impact Santal, the Company has consolidated Santal’s operations in the Company’s results of operations and financial position commencing as of and from the date of acquisition.

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Revenue Recognition

Sales of equipment and replacement parts are recorded by the Company when title and risks of ownership have been transferred to an independent dealer, distributor or other customer. In certain countries, sales of certain grain storage and protein production systems where the Company is responsible for construction or installation are recorded at the completion of the project. Payment terms vary by market and product, with fixed payment schedules on all sales. The terms of sale generally require that a purchase order or order confirmation accompany all shipments. Title generally passes to the dealer or distributor upon shipment, and the risk of loss upon damage, theft or destruction of the equipment is the responsibility of the dealer, distributor or third-party carrier. In certain foreign countries, the Company retains a form of title to goods delivered to dealers until the dealer makes payment so that the Company can recover the goods in the event of customer default on payment. This occurs as the laws of some foreign countries do not provide for a seller's retention of a security interest in goods in the same manner as established in the United States Uniform Commercial Code. The only right the Company retains with respect to the title are those enabling recovery of the goods in the event of customer default on payment. The dealer or distributor may not return equipment or replacement parts while its contract with the Company is in force. Replacement parts may be returned only under promotional and annual return programs. Provisions for returns under these programs are made at the time of sale based on the terms of the program and historical returns experience. The Company may provide certain sales incentives to dealers and distributors. Provisions for sales incentives are made at the time of sale for existing incentive programs. These provisions are revised in the event of subsequent modification to the incentive program. See "Accounts and Notes Receivable" for further discussion.

In the United States and Canada, all equipment sales to dealers are immediately due upon a retail sale of the equipment by the dealer with the exception of sales of grain storage and protein production systems. If not previously paid by the dealer in the United States and Canada, installment payments are required generally beginning after the interest-free period with the remaining outstanding equipment balance generally due within 12 months after shipment. Interest generally is charged on the outstanding balance six to 12 months after shipment. Sales terms of some highly seasonal products provide for payment and due dates based on a specified date during the year regardless of the shipment date. Equipment sold to dealers in the United States and Canada is paid in full on average within 12 months of shipment. Sales of replacement parts generally are payable within 30 days of shipment, with terms for some larger, seasonal stock orders generally requiring payment within six months of shipment. Sales of grain storage and protein production systems generally are payable within 30 days of shipment.

In other international markets, equipment sales are generally payable in full within 30 to 180 days of shipment. Payment terms for some highly seasonal products have a specified due date during the year regardless of the shipment date. Sales of replacement parts generally are payable within 30 to 90 days of shipment, with terms for some larger, seasonal stock orders generally payable within six months of shipment.

In certain markets, particularly in North America, there is a time lag, which varies based on the timing and level of retail demand, between the date the Company records a sale and when the dealer sells the equipment to a retail customer.

Foreign Currency Translation

The financial statements of the Company's foreign subsidiaries are translated into United States currency in accordance with Accounting Standard Codification ("ASC") 830, "Foreign Currency Matters." Assets and liabilities are translated to United States dollars at period-end exchange rates. Income and expense items are translated at average rates of exchange prevailing during the period. Translation adjustments are included in "Accumulated other comprehensive loss"

in stockholders' equity within the Company's Consolidated Balance Sheets. Gains and losses, which result from foreign currency transactions, are included in the accompanying Consolidated Statements of Operations.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The estimates made by management primarily relate to accounts and notes receivable, inventories, deferred income tax valuation allowances, goodwill and other identifiable intangible assets, and certain accrued liabilities, principally relating to reserves for volume discounts and sales incentives, warranty obligations, product liability and workers' compensation obligations, and pensions and postretirement benefits.

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Cash and Cash Equivalents

Cash at December 31, 2013 and 2012 of \$465.2 million and \$403.6 million, respectively, consisted primarily of cash on hand and bank deposits. The Company considers all investments with an original maturity of three months or less to be cash equivalents. Cash equivalents at December 31, 2013 and 2012 of \$582.0 million and \$377.7 million, respectively, consisted primarily of money market deposits, certificates of deposits and overnight investments.

Accounts and Notes Receivable

Accounts and notes receivable arise from the sale of equipment and replacement parts to independent dealers, distributors or other customers. Payments due under the Company's terms of sale generally range from one to 12 months and are not contingent upon the sale of the equipment by the dealer or distributor to a retail customer. Under normal circumstances, payment terms are not extended and equipment may not be returned. In certain regions, with respect to most equipment sales, including the United States and Canada, the Company is obligated to repurchase equipment and replacement parts upon cancellation of a dealer or distributor contract. These obligations are required by national, state or provincial laws and require the Company to repurchase a dealer or distributor's unsold inventory, including inventories for which the receivable has already been paid.

The Company offers various sales terms with respect to its products. For sales in most markets outside of the United States and Canada, the Company does not normally charge interest on outstanding receivables with its dealers and distributors. For sales to certain dealers or distributors in the United States and Canada, interest is charged at or above prime lending rates on outstanding receivable balances after interest-free periods. These interest-free periods vary by product and generally range from one to 12 months, with the exception of certain seasonal products, which bear interest after various periods up to 23 months depending on the time of year of the sale and the dealer or distributor's sales volume during the preceding year. The Company's North American geographical reportable segment comprised approximately 25.6% of the Company's total net sales during 2013. For the year ended December 31, 2013, 20.8% and 4.3% of the Company's net sales had maximum interest-free periods ranging from one to six months and seven to 12 months, respectively, related to its North American geographical reporting segment. Net sales with maximum interest-free periods ranging from 13 to 23 months were approximately 0.5% of the Company's net sales during 2013. Actual interest-free periods are shorter than described above because the equipment receivable from dealers or distributors in the United States and Canada is due immediately upon sale of the equipment to a retail customer. Under normal circumstances, interest is not forgiven and interest-free periods are not extended. The Company has an agreement to permit transferring, on an ongoing basis, substantially all of its wholesale interest-bearing and non-interest bearing accounts receivable in North America to its U.S. and Canadian retail finance joint ventures. Upon transfer, the receivables maintain standard payment terms, including required regular principal payments on amounts outstanding, and interest charges at market rates. The Company also has accounts receivable sales agreements that permit the sale, on an ongoing basis, of a majority of its accounts receivables in Europe to its European retail finance joint ventures. Upon transfer, the receivables maintain standard payment terms. Qualified dealers may obtain additional financing through the Company's U.S., Canadian and European retail finance joint ventures at the joint ventures' discretion.

The Company provides various volume bonus and sales incentive programs with respect to its products. These sales incentive programs include reductions in invoice prices, reductions in retail financing rates, dealer commissions and dealer incentive allowances. In most cases, incentive programs are established and communicated to the Company's dealers on a quarterly basis. The incentives are paid either at the time of invoice (through a reduction of invoice price), at the time of the settlement of the receivable, at the time of retail financing, at the time of warranty registration, or at a subsequent time based on dealer purchases. The incentive programs are product-line specific and generally do not

vary by dealer. The cost of sales incentives associated with dealer commissions and dealer incentive allowances is estimated based upon the terms of the programs and historical experience, is based on a percentage of the sales price, and is recorded at the later of (a) the date at which the related revenue is recognized, or (b) the date at which the sales incentive is offered. The related provisions and accruals are made on a product or product-line basis and are monitored for adequacy and revised at least quarterly in the event of subsequent modifications to the programs. Volume discounts are estimated and recognized based on historical experience, and related reserves are monitored and adjusted based on actual dealer purchases and the dealers' progress towards achieving specified cumulative target levels. The Company records the cost of interest subsidy payments, which is a reduction in the retail financing rates, at the later of (a) the date at which the related revenue is recognized, or (b) the date at which the sales incentive is offered. Estimates of these incentives are based on the terms of the programs and historical experience. All incentive programs are recorded and presented as a reduction of revenue due to the fact that the Company does not receive an identifiable benefit in exchange for the consideration provided. Reserves for incentive programs that will be paid either through the reduction of future invoices or through credit memos are recorded as "accounts receivable allowances" within the Company's

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Consolidated Balance Sheets. Reserves for incentive programs that will be paid in cash, as is the case with most of the Company's volume discount programs, as well as sales with incentives associated with accounts receivable sold to its U.S. and Canadian retail finance joint ventures, are recorded within "Accrued expenses" within the Company's Consolidated Balance Sheets.

Accounts and notes receivable are shown net of allowances for sales incentive discounts available to dealers and for doubtful accounts. Cash flows related to the collection of receivables are reported within "Cash flows from operating activities" within the Company's Consolidated Statements of Cash Flows. Accounts and notes receivable allowances at December 31, 2013 and 2012 were as follows (in millions):

	2013	2012
Sales incentive discounts	\$30.4	\$21.5
Doubtful accounts	34.9	38.1
	\$65.3	\$59.6

The Company transfers certain accounts receivable under its accounts receivable sales agreements with its retail finance joint ventures (Note 3). The Company records such transfers as sales of accounts receivable when it is considered to have surrendered control of such receivables under the provisions of Accounting Standards Update ("ASU") 2009-16, "Transfers and Servicing (Topic 860): Accounting for Transfers of Financial Assets." Cash payments are made to the Company's U.S. and Canadian retail finance joint ventures for sales incentive discounts provided to dealers related to outstanding accounts receivables sold. The balances of such sales discount reserves that are recorded within "Accrued expenses" as of December 31, 2013 and 2012 were approximately \$206.2 million and \$143.7 million, respectively.

Inventories

Inventories are valued at the lower of cost or market using the first-in, first-out method. Market is current replacement cost (by purchase or by reproduction, dependent on the type of inventory). In cases where market exceeds net realizable value (i.e., estimated selling price less reasonably predictable costs of completion and disposal), inventories are stated at net realizable value. Market is not considered to be less than net realizable value reduced by an allowance for an approximately normal profit margin. At December 31, 2013 and 2012, the Company had recorded \$119.9 million and \$99.2 million, respectively, as an adjustment for surplus and obsolete inventories. These adjustments are reflected within "Inventories, net" within the Company's Consolidated Balance Sheets.

Inventories, net at December 31, 2013 and 2012 were as follows (in millions):

	2013	2012
Finished goods	\$775.7	\$598.5
Repair and replacement parts	550.2	505.6
Work in process	109.0	137.5
Raw materials	581.2	461.5
Inventories, net	\$2,016.1	\$1,703.1

Cash flows related to the sale of inventories are reported within "Cash flows from operating activities" within the Company's Consolidated Statements of Cash Flows.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost, less accumulated depreciation and amortization. Depreciation is provided on a straight-line basis over the estimated useful lives of 10 to 40 years for buildings and improvements, 3 to 15 years for machinery and equipment, and 3 to 10 years for furniture and fixtures. Expenditures for maintenance and repairs are charged to expense as incurred.

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Property, plant and equipment, net at December 31, 2013 and 2012 consisted of the following (in millions):

	2013	2012
Land	\$ 109.3	\$ 100.1
Buildings and improvements	714.8	618.8
Machinery and equipment	1,852.0	1,616.2

Property, plant and equipment, net	\$ 1,602.3	\$ 1,406.1

Goodwill, Other Intangible Assets and Long-Lived Assets

ASC 350, "Intangibles — Goodwill and Other," establishes a method of testing goodwill and other indefinite-lived intangible assets for impairment on an annual basis or on an interim basis if an event occurs or circumstances change that would reduce the fair value of a reporting unit below its carrying value. The Company's annual qualitative or quantitative assessments involve determining an estimate of the fair value of the Company's reporting units in order to evaluate whether an impairment of the current carrying amount of goodwill and other indefinite-lived intangible assets exists. A qualitative assessment evaluates whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step quantitative goodwill impairment test. The first step of a quantitative goodwill impairment test, used to identify potential impairment, compares the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not considered impaired, and, thus, the second step of the quantitative impairment test is unnecessary. If the carrying amount of a reporting unit exceeds its fair value, the second step of the quantitative goodwill impairment test is performed to measure the amount of impairment loss, if any. Fair values are derived based on an evaluation of past and expected future performance of the Company's reporting units. A reporting unit is an operating segment or one level below an operating segment, for example, a component. A component of an operating segment is a reporting unit if the component constitutes a business for which discrete financial information is available and the Company's executive management team regularly reviews the operating results of that component. In addition, the Company combines and aggregates two or more components of an operating segment as a single reporting unit if the components have similar economic characteristics. The Company's reportable segments are not its reporting units.

The second step of the quantitative goodwill impairment test, used to measure the amount of impairment loss, if any, compares the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of goodwill. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination; that is, the Company allocates the fair value of a reporting unit to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. The Company utilizes a combination of valuation techniques, including a discounted cash flow approach and a market multiple approach, when making quantitative goodwill assessments.

The Company reviews its long-lived assets, which include intangible assets subject to amortization, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss is recognized when the undiscounted future cash flows estimated to be generated by the asset to be held and used are not sufficient to recover the unamortized balance of the asset. An impairment loss would be

recognized based on the difference between the carrying values and estimated fair value. The estimated fair value is determined based on either the discounted future cash flows or other appropriate fair value methods with the amount of any such deficiency charged to income in the current year. If the asset being tested for recoverability was acquired in a business combination, intangible assets resulting from the acquisition that are related to the asset are included in the assessment. Estimates of future cash flows are based on many factors, including current operating results, expected market trends and competitive influences. The Company also evaluates the amortization periods assigned to its intangible assets to determine whether events or changes in circumstances warrant revised estimates of useful lives. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value, less estimated costs to sell.

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

During the fourth quarter of 2012, the Company conducted a quantitative goodwill impairment analysis of its Chinese harvesting business and also reviewed its long-lived assets for impairment, including its trademark, distribution network and land use right identifiable intangible assets. The goodwill and long-lived asset impairment analyses indicated that a reduction in the carrying amount of the Chinese harvesting business's goodwill and certain other identifiable intangible assets was required. Accordingly, the Company recorded an impairment charge of approximately \$22.4 million within "Impairment charge" in the Company's Consolidated Statement of Operations for the year ended December 31, 2012. The Chinese harvesting business operates within the Asia/Pacific geographical reportable segment. The Company's accumulated goodwill impairment is approximately \$180.5 million, which is comprised of approximately \$9.1 million recorded in 2012 related to the Chinese harvesting reporting unit and approximately \$171.4 million recorded in 2006 related to the Company's sprayer reporting unit. The sprayer reporting unit operates within the North American geographical reportable segment.

The results of the Company's goodwill and long-lived assets impairment analyses conducted as of October 1, 2013 and 2011 indicated that no reduction in the carrying amount of the Company's goodwill and long-lived assets was required. The results of the Company's goodwill impairment analysis conducted as of October 1, 2012 indicated that no other reduction in the carrying amount of goodwill and long-lived assets was required.

Changes in the carrying amount of goodwill during the years ended December 31, 2013, 2012 and 2011 are summarized as follows (in millions):

	North America	South America	Europe/Africa/ Middle East	Asia/Pacific	Consolidated
Balance as of December 31, 2010	\$3.1	\$196.7	\$432.9	\$—	\$632.7
Acquisition	412.8	38.3	85.3	69.3	605.7
Adjustments related to income taxes	—	—	(9.1)) —	(9.1)
Foreign currency translation	—	(22.8)) (12.3)) 0.3	(34.8)
Balance as of December 31, 2011	415.9	212.2	496.8	69.6	1,194.5
Acquisition	0.8	29.0	—	(3.7)) 26.1
Impairment charge	—	—	—	(9.1)) (9.1)
Adjustments related to income taxes	—	—	(7.8)) —	(7.8)
Foreign currency translation	—	(21.9)) 9.3	1.3	(11.3)
Balance as of December 31, 2012	416.7	219.3	498.3	58.1	1,192.4
Acquisition	7.3	—	—	—	7.3
Adjustments related to income taxes	—	—	(8.0)) —	(8.0)
Foreign currency translation	—	(28.6)) 16.3	(0.7)) (13.0)
Balance as of December 31, 2013	\$424.0	\$190.7	\$506.6	\$57.4	\$1,178.7

During 2013, 2012 and 2011, the Company reduced goodwill for financial reporting purposes by approximately \$8.0 million, \$7.8 million and \$9.1 million, respectively, related to the realization of tax benefits associated with the excess tax basis deductible goodwill resulting from the Company's acquisition of Valtra.

The Company amortizes certain acquired identifiable intangible assets primarily on a straight-line basis over their estimated useful lives, which range from 5 to 50 years. The acquired intangible assets have a weighted average useful life as follows:

Intangible Asset	Weighted-Average Useful Life
Patents and technology	13 years
Customer relationships	14 years

Trademarks and trade names	21	years
Land use rights	47	years

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

For the years ended December 31, 2013, 2012 and 2011, acquired intangible asset amortization was \$47.8 million, \$49.3 million and \$21.6 million, respectively. The Company estimates amortization of existing intangible assets will be \$39.9 million for 2014, \$39.9 million for 2015, \$38.8 million for 2016, \$38.4 million for 2017, and \$38.3 million for 2018.

The Company has previously determined that two of its trademarks have an indefinite useful life. The Massey Ferguson trademark has been in existence since 1952 and was formed from the merger of Massey-Harris (established in the 1890's) and Ferguson (established in the 1930's). The Massey Ferguson brand is currently sold in over 140 countries worldwide, making it one of the most widely sold tractor brands in the world. The Company has also identified the Valtra trademark as an indefinite-lived asset. The Valtra trademark has been in existence since the late 1990's, but is a derivative of the Valmet trademark which has been in existence since 1951. The Valmet name transitioned to the Valtra name over a period of time in the marketplace. The Valtra brand is currently sold in approximately 50 countries around the world. Both the Massey Ferguson brand and the Valtra brand are primary product lines of the Company's business, and the Company plans to use these trademarks for an indefinite period of time. The Company plans to continue to make investments in product development to enhance the value of these brands into the future. There are no legal, regulatory, contractual, competitive, economic or other factors that the Company is aware of or that the Company believes would limit the useful lives of the trademarks. The Massey Ferguson and Valtra trademark registrations can be renewed at a nominal cost in the countries in which the Company operates.

Changes in the carrying amount of acquired intangible assets during 2013 and 2012 are summarized as follows (in millions):

	Trademarks and trade names	Customer Relationships	Patents and Technology	Land Use Rights	Total
Gross carrying amounts:					
Balance as of December 31, 2011	\$ 118.1	\$ 511.4	\$ 85.7	\$ 8.6	\$ 723.8

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

	Trademarks and trade names
Indefinite-lived intangible assets:	
Balance as of December 31, 2011	\$91.4
Foreign currency translation	0.8
Balance as of December 31, 2012	92.2
Foreign currency translation	1.5
Balance as of December 31, 2013	\$93.7

Accrued Expenses

Accrued expenses at December 31, 2013 and 2012 consisted of the following (in millions):

	2013	2012
Reserve for volume discounts and sales incentives	\$499.8	\$403.9
Warranty reserves	255.9	223.9
Accrued employee compensation and benefits	276.9	249.7
Accrued taxes	167.3	169.3
Other	189.3	179.7
	\$1,389.2	\$1,226.5

Warranty Reserves

The warranty reserve activity for the years ended December 31, 2013, 2012 and 2011 consisted of the following (in millions):

	2013	2012	2011
Balance at beginning of the year	\$256.9	\$240.5	\$199.5
Acquisitions	—	0.1	7.2
Accruals for warranties issued during the year	200.3	184.5	195.1
Settlements made (in cash or in kind) during the year	(165.7)	(171.7)	(152.6)
Foreign currency translation	3.4	3.5	(8.7)
Balance at the end of the year	\$294.9	\$256.9	\$240.5

The Company's agricultural equipment products are generally under warranty against defects in materials and workmanship for a period of one to four years. The Company accrues for future warranty costs at the time of sale based on historical warranty experience. Approximately \$39.0 million and \$33.0 million of warranty reserves are included in "Other noncurrent liabilities" in the Company's Consolidated Balance Sheets as of December 31, 2013 and 2012, respectively.

Insurance Reserves

Under the Company's insurance programs, coverage is obtained for significant liability limits as well as those risks required to be insured by law or contract. It is the policy of the Company to self-insure a portion of certain expected losses related primarily to workers' compensation and comprehensive general, product and vehicle liability. Provisions for losses expected under these programs are recorded based on the Company's estimates of the aggregate liabilities for the claims incurred.

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Stock Incentive Plans

Stock compensation expense was recorded as follows (in millions). Refer to Note 9 for additional information regarding the Company's stock incentive plans during 2013, 2012 and 2011:

	Years Ended		
	December 31,		
	2013	2012	2011
Cost of goods sold	\$2.3	\$2.4	\$1.6
Selling, general and administrative expenses	32.6	34.6	23.0
Total stock compensation expense	\$34.9	\$37.0	\$24.6

Research and Development Expenses

Research and development expenses are expensed as incurred and are included in engineering expenses in the Company's Consolidated Statements of Operations.

Advertising Costs

The Company expenses all advertising costs as incurred. Cooperative advertising costs are normally expensed at the time the revenue is earned. Advertising expenses for the years ended December 31, 2013, 2012 and 2011 totaled approximately \$60.5 million, \$60.2 million and \$50.1 million, respectively.

Shipping and Handling Expenses

All shipping and handling fees charged to customers are included as a component of net sales. Shipping and handling costs are included as a part of cost of goods sold, with the exception of certain handling costs included in selling, general and administrative expenses in the amount of \$29.3 million, \$31.0 million and \$29.9 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Interest Expense, Net

Interest expense, net for the years ended December 31, 2013, 2012 and 2011 consisted of the following (in millions):

	2013	2012	2011
Interest expense	\$78.8	\$77.7	\$59.0
Interest income	(20.8)	(20.1)	(28.8)
	\$58.0	\$57.6	\$30.2

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Refer to Note 5 for additional information regarding the Company's income taxes.

Net Income Per Common Share

Basic income per common share is computed by dividing net income by the weighted average number of common shares outstanding during each period. Diluted income per common share assumes the exercise of outstanding stock options, stock-settled stock appreciation rights (“SSARs”), the vesting of restricted stock and performance share awards, and the

56

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

appreciation of the excess conversion value of the contingently convertible senior subordinated notes using the treasury stock method when the effects of such assumptions are dilutive.

The Company's \$201.2 million aggregate principal amount of 1/4% convertible senior subordinated notes provided for the settlement upon conversion in cash up to the principal amount of the converted notes with any excess conversion value settled in shares of the Company's common stock. Dilution of weighted shares outstanding depends on the Company's stock price for the excess conversion value using the treasury stock method (Note 6). A reconciliation of net income attributable to AGCO Corporation and its subsidiaries and weighted average common shares outstanding for purposes of calculating basic and diluted net income per share during the years ended December 31, 2013, 2012 and 2011 is as follows (in millions, except per share data):

	2013	2012	2011
Basic net income per share:			
Net income attributable to AGCO Corporation and subsidiaries	\$597.2	\$522.1	\$583.3
Weighted average number of common shares outstanding	97.3	97.1	95.6
Basic net income per share attributable to AGCO Corporation and subsidiaries	\$6.14	\$5.38	\$6.10
Diluted net income per share:			
Net income attributable to AGCO Corporation and subsidiaries	\$597.2	\$522.1	\$583.3
Weighted average number of common shares outstanding	97.3	97.1	95.6
Dilutive stock options, SSARs, performance share awards and restricted stock awards	0.8	1.0	0.6
Weighted average assumed conversion of contingently convertible senior subordinated notes	1.3	0.5	1.9
Weighted average number of common shares and common share equivalents outstanding for purposes of computing diluted net income per share	99.4	98.6	98.1
Diluted net income per share attributable to AGCO Corporation and subsidiaries	\$6.01	\$5.30	\$5.95

SSARs to purchase 0.8 million shares, 0.6 million shares and 0.3 million shares, respectively, were outstanding for the years ended December 31, 2013, 2012 and 2011, respectively, but not included in the calculation of weighted average common and common equivalent shares outstanding because they had an antidilutive impact.

Comprehensive Income (Loss)

The Company reports comprehensive income (loss), defined as the total of net income (loss) and all other non-owner changes in equity and the components thereof in its Consolidated Statements of Stockholders' Equity and Consolidated Statements of Comprehensive Income. The components of other comprehensive loss and the related tax effects for the years ended December 31, 2013, 2012 and 2011 are as follows (in millions):

	AGCO Corporation and Subsidiaries			Noncontrolling Interests
	2013			2013
	Before-tax Amount	Income Taxes	After-tax Amount	After-tax Amount

Financial Instruments

The carrying amounts reported in the Company's Consolidated Balance Sheets for "Cash and cash equivalents," "Accounts and notes receivable" and "Accounts payable" approximate fair value due to the immediate or short-term maturity of these financial instruments. The carrying amounts of long-term debt under the Company's 4/2% senior term loan and credit facility (Note 6) approximate fair value based on the borrowing rates currently available to the Company for loans with similar terms and average maturities. At December 31, 2013, the estimated fair values of the Company's 5/8% senior notes and 1 1/4% convertible notes (Note 6), based on their listed market values, were \$322.1 million and \$290.5 million, respectively, compared to their carrying values of \$300.0 million and \$201.2 million, respectively. At December 31, 2012, the estimated fair values of the Company's 5/8% senior notes and 1 1/4% convertible notes (Note 6), based on their listed market values, were \$327.2 million and \$250.6 million, respectively, compared to their carrying values of \$300.0 million and \$192.1 million, respectively.

The Company uses foreign currency contracts to hedge the foreign currency exposure of certain receivables and payables. The contracts are for periods consistent with the exposure being hedged and generally have maturities of one year or less. These contracts are classified as non-designated derivative instruments. The Company also enters into foreign currency

58

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

contracts designated as cash flow hedges of expected sales. The Company's foreign currency contracts mitigate risk due to exchange rate fluctuations because gains and losses on these contracts generally offset losses and gains on the exposure being hedged.

The notional amounts of the foreign currency contracts do not represent amounts exchanged by the parties and, therefore, are not a measure of the Company's risk. The amounts exchanged are calculated on the basis of the notional amounts and other terms of the contracts. The credit and market risks under these contracts are not considered to be significant. The Company's hedging policy prohibits it from entering into any foreign currency contracts for speculative trading purposes. Refer to Note 10 for additional information regarding the Company's derivative instruments and hedging activities.

Recent Accounting Pronouncements

In July 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists" ("ASU 2013-11"). ASU 2013-11 requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit is presented in the financial statements as a liability and is not combined with deferred tax assets. The standard is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted. The Company plans to adopt this standard on January 1, 2014. The Company does not expect the adoption of ASU 2013-11 to have a material impact on the Company's results of operations or financial condition.

In February 2013, the FASB issued ASU 2013-02, "Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income" ("ASU 2013-02"). ASU 2013-02 does not change the current requirements for reporting net income or other comprehensive income in financial statements. The standard requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income ("AOCI") by component. The standard also requires an entity to present, either on the face of the statement where net income is presented or in the footnotes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is required to be reclassified to net income in its entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, the standard requires an entity to cross-reference other disclosures that provide additional detail on those amounts. The Company adopted ASU 2013-02 as of January 1, 2013 by presenting the required amounts in its footnote disclosures (Note 8).

In July 2012, the FASB issued ASU 2012-02, "Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment" ("ASU 2012-02"). ASU 2012-02 permits an entity to make a qualitative assessment of whether it is more likely than not that an indefinite-lived intangible asset is impaired. If an entity concludes it is more likely than not that the fair value of such an asset exceeds its carrying amount, it need not calculate the fair value of the asset in that year. This standard is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption was permitted. The adoption of ASU 2012-02 did not have a material impact on the Company's results of operations or financial condition.

In September 2011, the FASB issued ASU 2011-08, “Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment” (“ASU 2011-08”). ASU 2011-08 permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit’s fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it need not perform the two-step impairment test. This standard is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. Early adoption was permitted. The adoption of ASU 2011-08 did not have a material impact on the Company’s results of operations or financial condition.

In June 2011, the FASB issued ASU 2011-05, “Comprehensive Income (Topic 220): Presentation of Comprehensive Income” (“ASU 2011-05”). ASU 2011-05 increases the prominence of other comprehensive income in financial statements. ASU 2011-05 does not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The standard initially required that reclassification adjustments from other comprehensive income be measured and presented by income statement line item on the face of the statement of

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

operations. In December 2011, however, the FASB issued ASU 2011-12, "Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05" ("ASU 2011-12"). ASU 2011-12 defers the requirement to present components of reclassifications of other comprehensive income on the face of the statement of operations. The Company adopted ASU 2011-05 and 2011-12 by consecutively presenting the Consolidated Statements of Operations and the Consolidated Statements of Comprehensive Income for the years ended December 31, 2013, 2012 and 2011.

2. Acquisitions

In January 2012, the Company acquired 61% of Santal for approximately R\$36.7 million, net of approximately R\$11.9 million cash acquired (or approximately \$20.1 million, net). Santal, headquartered in Ribeirão Preto, Brazil, manufactures and distributes sugar cane planting, harvesting, handling and transportation equipment as well as replacement parts across Brazil. The acquisition of Santal will provide the Company's customers in Brazil with a wider range of agricultural products and services. The acquisition was funded with available cash on hand. The Company recorded approximately \$28.0 million of goodwill and approximately \$2.6 million of trade name, trademark and patent identifiable intangible assets associated with the acquisition. The goodwill generally resulted from the value of the cash flows expected to be generated in the future compared to the asset intensity of the business. The goodwill was reported within the Company's South American geographical reportable segment. The Company and the seller each have a call option and put option, respectively, with varying dates with respect to the remaining 39% interest in Santal. The fair value of the redeemable noncontrolling interest in Santal was recorded within "Temporary equity" in the Company's Condensed Consolidated Balance Sheet as of the acquisition date. The acquired other identifiable intangible assets of Santal as of the date of acquisition are summarized in the following table (in millions):

Intangible Asset	Amount	Weighted-Average Useful Life
Trademarks and trade names	\$1.5	5 years
Patents	1.1	5 years
	\$2.6	

On November 30, 2011, the Company acquired GSI Holdings Corp. ("GSI") for \$932.2 million, net of approximately \$27.9 million cash acquired. GSI, headquartered in Assumption, Illinois, is a leading manufacturer of grain storage and protein production systems. GSI sells its products globally through independent dealers. The acquisition was financed by the issuance of \$300.0 million of 5⁷/₈% senior notes and the Company's credit facility (Note 6). As a result of the acquisition, the Company recorded a tax benefit of approximately \$149.3 million within "Income tax (benefit) provision" in the Company's Consolidated Statement of Operations for the year ended December 31, 2011, resulting from a reversal of a portion of its previously established deferred tax valuation allowance. The reversal was required to offset deferred tax liabilities established as part of the acquisition accounting for GSI relating to acquired amortizable intangible assets (Note 5). The final fair values of the assets acquired and liabilities assumed as of the acquisition date are presented in the following table (in millions):

Current assets	\$216.0
Property, plant and equipment	69.6
Intangible assets	438.5
Goodwill	535.7
Other noncurrent assets	2.1
Total assets acquired	1,261.9
Current liabilities	133.6
Deferred tax liabilities	162.8
Long-term debt and other noncurrent liabilities	5.4

Total liabilities assumed	301.8
Net assets acquired	\$960.1

On November 30, 2011, the Company acquired 98% of Shandong Dafeng Machinery Co., Ltd. (“Dafeng”) for approximately 171.7 million yuan (or approximately \$26.9 million). The Company acquired approximately \$17.1 million of

60

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

cash and assumed approximately \$41.1 million of indebtedness associated with the transaction. Dafeng is located in Yanzhou, China and manufactures a complete range of corn, grain, rice and soybean harvesting machines for Chinese domestic markets. The acquisition was funded with available cash on hand. The fair value of the noncontrolling interest in Dafeng was recorded within “Noncontrolling interests” in the Company’s Consolidated Balance Sheet as of the acquisition date. During the fourth quarter of 2012, the Company recorded an impairment charge of approximately \$22.4 million within “Impairment charge” in the Company’s Consolidated Statement of Operations associated with the write-down of its Chinese harvesting reporting unit’s goodwill and certain other identifiable intangible assets. Refer to Note 1 for additional information.

The results of operations for the Santal, GSI, and Dafeng acquisitions have been included in the Company’s Consolidated Financial Statements as of and from the dates of the respective acquisitions. The Company allocated the purchase price of each acquisition to the assets acquired and liabilities assumed based on their fair values as of the respective acquisition dates. In general, the acquired assets of the acquisitions consisted primarily of accounts receivable, inventories, property, plant and equipment, and other identifiable intangible assets. The liabilities assumed generally consisted of accounts payable and indebtedness.

The following unaudited pro forma data summarizes the results of operations for the year ended December 31, 2011 as if the prior years’ acquisitions had occurred as of January 1, 2010. The unaudited pro forma information does not reflect the impact of future events that may occur after the acquisitions, including, but not limited to, anticipated cost savings from operating synergies. The unaudited pro forma financial information has been adjusted to give effect to adjustments that are directly related to the business combinations, factually supportable and expected to have a continuing impact. The adjustments include the application of the Company’s accounting policies, depreciation and amortization related to fair value adjustments to property, plant and equipment, intangible assets and inventory, tax-related adjustments, and the impact of the Company’s issuance of \$300.0 million of 5/8% senior notes and the new credit facility, which were used to finance the acquisition of GSI. This unaudited pro forma information has been prepared for comparative purposes only and does not purport to represent what the results of operations of the Company actually would have been had the transactions occurred on the date indicated or what the results of operations may be in any future period (in millions, except per share data):

	Year Ended December 31, 2011
Net sales	\$9,479.1
Net income attributable to AGCO Corporation and subsidiaries	629.5
Net income per common share attributable to AGCO Corporation and subsidiaries:	
Basic	\$6.58
Diluted	\$6.42

3. Accounts Receivable Sales Agreements

At December 31, 2013 and 2012, the Company had accounts receivable sales agreements that permit the sale, on an ongoing basis, of a majority of its wholesale receivables in North America and Europe to its 49% owned U.S., Canadian and European retail finance joint ventures. As of December 31, 2013 and 2012, the cash received from receivables sold under the U.S., Canadian and European accounts receivable sales agreements was approximately \$1.3 billion and \$1.1 billion, respectively.

Under the terms of the accounts receivable sales agreements in North America and Europe, the Company pays an annual servicing fee related to the servicing of the receivables sold. The Company also pays the respective AGCO Finance entities a subsidized interest payment with respect to the sales agreements, calculated based upon LIBOR plus

a margin on any non-interest bearing accounts receivable outstanding and sold under the sales agreements. These fees are reflected within losses on the sales of receivables included within "Other expense, net" in the Company's Consolidated Statements of Operations. The Company does not service the receivables after the sale occurs and does not maintain any direct retained interest in the receivables. The Company reviewed its accounting for the accounts receivable sales agreements and determined that these facilities should be accounted for as off-balance sheet transactions.

The Company's former European accounts receivable securitization facilities expired in October 2011. Wholesale accounts receivable were sold on a revolving basis to commercial paper conduits under the European facilities through a wholly-owned qualified special purpose entity in the United Kingdom. Losses on sales of receivables under the Company's

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

former European securitization facilities were reflected within “Interest expense, net” in the Company’s Consolidated Statements of Operations during 2011.

Losses on sales of receivables associated with the accounts receivable financing facilities discussed above, reflected within “Other expense, net” and “Interest expense, net” in the Company’s Consolidated Statements of Operations, were approximately \$25.6 million, \$21.8 million and \$22.0 million during 2013, 2012 and 2011, respectively.

The Company’s retail finance joint ventures in Brazil and Australia also provide wholesale financing to the Company’s dealers. The receivables associated with these arrangements are without recourse to the Company. The Company does not service the receivables after the sale occurs and does not maintain any direct retained interest in the receivables. As of December 31, 2013 and 2012, these retail finance joint ventures had approximately \$68.2 million and \$100.6 million, respectively, of outstanding accounts receivable associated with these arrangements. The Company reviewed its accounting for these arrangements and determined that these arrangements should be accounted for as off-balance sheet transactions.

In addition, the Company sells certain trade receivables under factoring arrangements to other financial institutions around the world. The Company reviewed the sale of such receivables and determined that these arrangements should be accounted for as off-balance sheet transactions.

4. Investments in Affiliates

Investments in affiliates as of December 31, 2013 and 2012 were as follows (in millions):

	2013	2012
Retail finance joint ventures	\$390.2	\$354.4
Manufacturing joint ventures	16.1	20.7
Other affiliates	9.8	15.2
	\$416.1	\$390.3

The Company’s manufacturing joint ventures as of December 31, 2013 consisted of GIMA and joint ventures with third-party manufacturers to assemble tractors in Algeria and engines in South America. The other joint ventures represent minority investments in farm equipment manufacturers, distributors and licensees.

The Company’s equity in net earnings of affiliates for the years ended December 31, 2013, 2012 and 2011 were as follows (in millions):

	2013	2012	2011
Retail finance joint ventures	\$48.8	\$48.6	\$43.6
Manufacturing and other joint ventures	(0.6) 4.9	5.3
	\$48.2	\$53.5	\$48.9

Summarized combined financial information of the Company’s retail finance joint ventures as of December 31, 2013 and 2012 and for the years ended December 31, 2013, 2012 and 2011 were as follows (in millions):

	December 31,	
	2013	2012
Total assets	\$9,442.7	\$8,474.8
Total liabilities	8,646.3	7,751.6
Partners’ equity	796.4	723.2

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

	For the Years Ended December 31,		
	2013	2012	2011
Revenues	\$389.2	\$377.8	\$364.2
Costs	239.4	226.5	220.5
Income before income taxes	\$149.8	\$151.3	\$143.7

The majority of the assets of the Company's retail finance joint ventures represents finance receivables. The majority of the liabilities represents notes payable and accrued interest. Under the various joint venture agreements, Rabobank or its affiliates provide financing to the joint venture companies (Note 12).

At December 31, 2013 and 2012, the Company's receivables from affiliates were approximately \$124.3 million and \$41.5 million, respectively. The receivables from affiliates are reflected within Accounts and notes receivable, net within the Company's Consolidated Balance Sheets.

The portion of the Company's retained earnings balance that represents undistributed retained earnings of equity method investees was approximately \$276.3 million and \$246.0 million as of December 31, 2013 and 2012, respectively.

5. Income Taxes

The sources of income (loss) before income taxes and equity in net earnings of affiliates were as follows for the years ended December 31, 2013, 2012 and 2011 (in millions):

	2013	2012	2011
United States	\$133.1	\$98.0	\$1.6
Foreign	669.5	502.8	559.4
Income before income taxes and equity in net earnings of affiliates	\$802.6	\$600.8	\$561.0

The provision for income taxes by location of the taxing jurisdiction for the years ended December 31, 2013, 2012 and 2011 consisted of the following (in millions):

	2013	2012	2011
Current:			
United States:			
Federal	\$9.2	\$(5.5)	\$(6.1)
State	9.9	2.8	—
Foreign	217.7	177.0	158.3
	236.8	174.3	152.2
Deferred:			
United States:			
Federal	30.2	(27.0)	(148.9)
State	—	—	—
Foreign	(8.5)	(9.4)	21.3
	21.7	(36.4)	(127.6)
	\$258.5	\$137.9	\$24.6

At December 31, 2013, the Company's foreign subsidiaries had approximately \$3.1 billion of undistributed earnings. These earnings are considered to be indefinitely invested, and, accordingly, no income taxes have been provided on these earnings. Determination of the amount of unrecognized deferred taxes on these earnings is not practicable;

however, unrecognized foreign tax credits would be available to reduce a portion of the tax liability.

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

A reconciliation of income taxes computed at the United States federal statutory income tax rate (35%) to the provision for income taxes reflected in the Company's Consolidated Statements of Operations for the years ended December 31, 2013, 2012 and 2011 is as follows (in millions):

	2013	2012	2011
Provision for income taxes at United States federal statutory rate of 35%	\$280.9	\$210.3	\$196.3
State and local income taxes, net of federal income tax benefit	5.6	3.9	1.4
Taxes on foreign income which differ from the United States statutory rate	(34.7)	(19.8)	(31.8)
Tax effect of permanent differences	(7.6)	11.5	(5.8)
Change in valuation allowance	9.3	(64.3)	(150.7)
Change in tax contingency reserves	25.7	20.8	23.1
Research and development tax credits	(19.9)	(26.3)	(7.7)
Other	(0.8)	1.8	(0.2)
	\$258.5	\$137.9	\$24.6

The "change in valuation allowance" for the year ended December 31, 2012 primarily relates to the usage of approximately \$54.7 million of valuation allowance due to income generated in the United States during 2012. The 2012 income tax provision also includes a reversal of approximately \$13.8 million of remaining valuation allowance previously established against the Company's U.S. deferred tax assets (as reflected above in the "change in valuation allowance") as well as the recognition of certain U.S. research and development tax credits of approximately \$13.1 million. The "change in valuation allowance" for the year ended December 31, 2011 includes a reversal of approximately \$149.3 million of valuation allowance previously established against the Company's deferred tax assets in the United States. The reversal was required to offset deferred tax liabilities established as part of the acquisition accounting for GSI.

Table of Contents

AGCO CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

The significant components of the deferred tax assets and liabilities at December 31, 2013 and 2012 were as follows (in millions):

	2013	2012
Deferred Tax Assets:		
Net operating loss carryforwards	\$69.7	\$94.9
Sales incentive discounts	68.7	55.8
Inventory valuation reserves	29.4	27.0
Pensions and postretirement health care benefits	69.7	102.4
Warranty and other reserves	108.5	138.1
Research and development tax credits	13.2	21.0
Other	64.0	38.8
Total gross deferred tax assets	423.2	478.0
Valuation allowance	(77.2) (74.5
Total net deferred tax assets	346.0	403.5
Deferred Tax Liabilities:		
Tax over book depreciation and amortization	314.7	341.0
Other	21.6	21.3
Total deferred tax liabilities	336.3	362.3
Net deferred tax assets	\$9.7	\$41.2
Amounts recognized in Consolidated Balance Sheets:		
Deferred tax assets - current	\$241.2	\$243.5
Deferred tax assets - noncurrent	24.4	40.0
Other current (liabilities) assets	(4.7) 0.4
Deferred tax liabilities - noncurrent	(251.2) (242.7
	\$9.7	\$41.2

The Company recorded a net deferred tax asset of \$9.7 million and \$41.2 million as of December 31, 2013 and 2012, respectively. As reflected in the preceding table, the Company had a valuation allowance of \$77.2 million and \$74.5 million as of December 31, 2013 and 2012, respectively.

A valuation allowance is established when it is more likely than not that some portion or all of the deferred tax assets will not be realized. The Company assessed the likelihood that its deferred tax assets would be recovered from estimated future taxable income and available tax planning strategies and determined that the valuation allowance at December 31, 2013 and 2012 was appropriate. In making this assessment, all available evidence was considered, including the current economic climate, as well as reasonable tax planning strategies. The Company believes it is more likely than not that the Company will realize the remaining deferred tax assets, net of the valuation allowance, in future years.

The Company had net operating loss carryforwards of \$334.9 million as of December 31, 2013, with expiration dates as follows: 2014 - \$0.0 million; 2015 - \$8.7 million; 2016 - \$95.2 million; and thereafter or unlimited - \$231.0 million. These net operating loss carryforwards of \$334.9 million were entirely net operating loss carryforwards outside of the United States.

The Company paid income taxes of \$174.5 million, \$147.7 million and \$116.4 million for the years ended December 31, 2013, 2012 and 2011, respectively.

At December 31, 2013 and 2012, the Company had \$122.2 million and \$94.5 million, respectively, of unrecognized income tax benefits, all of which would affect the Company's effective tax rate if recognized. At December 31, 2013 and 2012, the Company had approximately \$61.9 million and \$23.5 million, respectively, of accrued or deferred taxes related to uncertain income tax positions connected with ongoing income tax audits in various jurisdictions that it expects to settle or pay in the next 12 months. The Company accrued approximately \$2.3 million and \$3.8 million of interest and penalties related to unrecognized tax benefits in its provision for income taxes during 2013 and 2012, respectively. At December 31, 2013 and 2012, the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

Company had accrued interest and penalties related to unrecognized tax benefits of \$14.4 million and \$11.9 million, respectively.

A reconciliation of the beginning and ending balances of the total amounts of gross unrecognized tax benefits as of and during the years ended December 31, 2013 and 2012 is as follows (in millions):

	2013	2012
Gross unrecognized income tax benefits	\$94.5	\$71.1
Additions for tax positions of the current year	34.7	18.5
Additions for tax positions of prior years	3.6	7.3
Additions for tax positions related to acquisitions	—	1.1
Reductions for tax positions of prior years for:		
Changes in judgments	(9.0) 0.2
Settlements during the period	—	—
Lapses of applicable statute of limitations	(3.6) (5.2
Foreign currency translation	2.0	1.5
Gross unrecognized income tax benefits	\$122.2	\$94.5

The Company and its subsidiaries file income tax returns in the United States and in various state, local and foreign jurisdictions. The Company and its subsidiaries are routinely examined by tax authorities in these jurisdictions. As of December 31, 2013, a number of income tax examinations in foreign jurisdictions were ongoing. It is possible that certain of these ongoing examinations may be resolved within 12 months. Due to the potential for resolution of federal, state and foreign examinations, and the expiration of various statutes of limitation, it is reasonably possible that the Company's gross unrecognized income tax benefits balance may materially change within the next 12 months. Due to the number of jurisdictions and issues involved and the uncertainty regarding the timing of any settlements, the Company is unable at this time to provide a reasonable estimate of such change that may occur within the next 12 months. Although there are ongoing examinations in various jurisdictions, the 2010 through 2013 tax years generally remain subject to examination in the United States by federal and state authorities. In the Company's significant foreign jurisdictions, primarily the United Kingdom, France, Germany, Switzerland, Finland and Brazil, the 2008 through 2013 tax years generally remain subject to examination by their respective tax authorities. In Brazil, the Company is contesting disallowed deductions related to the amortization of certain goodwill amounts (Note 11).

6. Indebtedness

Indebtedness consisted of the following at December 31, 2013 and 2012 (in millions):

	December 31, 2013	December 31, 2012
1 ¹ / ₄ % Convertible senior subordinated notes due 2036	\$201.2	\$192.1
4 ¹ / ₂ % Senior term loan due 2016	275.0	264.2
5 ⁷ / ₈ % Senior notes due 2021	300.0	300.0
Credit facility, expires 2016	360.0	465.0
Other long-term debt	114.0	65.5
	1,250.2	1,286.8
Less: Current portion of long-term debt	(110.5) (59.1
1 ¹ / ₄ % Convertible senior subordinated notes due 2036	(201.2) (192.1
Total indebtedness, less current portion	\$938.5	\$1,035.6
