

MANTECH INTERNATIONAL CORP
Form 10-Q
November 02, 2018

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2018

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission File No. 000-49604

ManTech International Corporation
(Exact name of registrant as specified in its charter)

Delaware 22-1852179
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

2251 Corporate Park Drive, Herndon, VA 20171
(Address of principal executive offices) (Zip Code)
(703) 218-6000
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 31, 2018 there were 26,544,339 shares outstanding of our Class A common stock and 13,188,045 shares outstanding of our Class B common stock.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2018

UNAUDITED

1. Description of the Business

ManTech International Corporation (depending on the circumstances, “ManTech” “Company” “we” “our” “ours” or “us”) provides mission-focused technology solutions and services for U.S. defense, intelligence community and federal civilian agencies. Now in our 50th year, we excel in full-spectrum cyber, data collection & analytics, enterprise information technology (IT), systems engineering and software application development solutions that support national and homeland security.

2. Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and note disclosures normally included in the annual financial statements, prepared in accordance with accounting principles generally accepted in the U.S., have been condensed or omitted pursuant to those rules and regulations. The preparation of these condensed consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses. We recommend that you read these condensed consolidated financial statements in conjunction with the audited consolidated financial statements and related notes included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, previously filed with the SEC. We believe that the condensed consolidated financial statements in this Form 10-Q reflect all adjustments that are necessary to fairly present the financial position, results of operations and cash flows for the interim periods presented. The results of operations for such interim periods are not necessarily indicative of the results that can be expected for the full year.

We classified prepaid expenses and other current assets into separate lines on our condensed consolidated balance sheet at September 30, 2018 and conformed our condensed consolidated balance sheet at December 31, 2017, accordingly. Furthermore, our condensed consolidated statements of cash flows for the nine months ended September 30, 2018 and 2017 were conformed based on the balance sheet presentation.

3. Revenue from Contracts with Customers

Significant Accounting Policies

Revenue Recognition - On January 1, 2018, we adopted Accounting Standards Codification (ASC) 606, Revenue from Contracts with Customers using the modified retrospective method applied to those contracts that were not substantially complete as of January 1, 2018. ASC 606 outlines a five-step model whereby revenue is recognized as performance obligations within the contract are satisfied. ASC 606 also requires new, expanded disclosures regarding revenue recognition. We recognized the cumulative effect of adopting ASC 606 as an increase to the 2018 opening balance of retained earnings in the amount of \$0.8 million, with the impact primarily related to fixed-price contracts. Results for reporting periods beginning after January 1, 2018 are presented under ASC 606, while prior period amounts were not adjusted and continue to be reported in accordance with ASC 605, Revenue Recognition. Revenue for the nine months ended September 30, 2018 increased \$3.3 million as a result of applying ASC 606.

We account for a contract when both we and the customer approve and commit; our rights and those of the customer are identified; payment terms are identified; the contract has commercial substance; and collectability of consideration is probable. At contract inception, we identify the distinct goods or services promised in the contract, referred to as performance obligations. Then we determine the transaction price for the contract; the consideration to which we can

expect in exchange for the promised goods or services in the contract. The transaction price can be a fixed or variable amount. It is common for our contracts to contain award fees, incentive fees or other provisions that can either increase or decrease the transaction price. These variable amounts generally are awarded upon achievement of certain performance metrics, program milestones or cost targets and can be based upon customer discretion. We estimate variable consideration at the most likely amount to which we expect to be entitled. We include estimated amounts in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. Our estimates of variable consideration and determination of whether to include estimated amounts in the transaction price are based largely on an assessment of our anticipated performance and historical, current and forecasted information that is reasonably available to us. The transaction price is allocated to each distinct performance obligation using our best estimate of the standalone selling price for each distinct good or service promised in the contract. The primary method used to estimate standalone selling price is the expected cost plus a margin approach, under which we forecast our expected costs of satisfying a performance obligation and then add an appropriate margin for that distinct good or service promised. Revenue is recognized when, or as, the performance obligation is satisfied.

We recognize revenue over time when there is a continuous transfer of control to our customer. For our U.S. government contracts, this continuous transfer of control to the customer is supported by clauses in the contract that allow the U.S. government to unilaterally terminate the contract for convenience, pay us for costs incurred plus a reasonable profit and take control of any work in process. When control is transferred over time, revenue is recognized based on the extent of progress towards completion of the performance obligation. Based on the nature of the products and services provided in the contract, we use our judgment to determine if an input measure or output measure best depicts the transfer of control over time. For services contracts, we typically satisfy our performance obligations as services are rendered. We typically use a cost-based input method to measure progress. Contract costs include labor, material and allocable indirect expenses. Revenue is recognized proportionally as contract costs are incurred plus estimated fees. For time-and-material contracts, we bill the customer per labor hour and per material, and revenue is recognized in the amount invoiced since the amount corresponds directly to the value of our performance to date. For stand-ready service contracts, a time-elapsed output method is used to measure progress, and revenue is recognized straight-line over the term of the contract. If a contract does not meet the criteria for recognizing revenue over time, we recognize revenue at a point in time. Revenue is recognized at the point in time when control of the good or service is transferred to our customer. We consider control to transfer when we have a present right to payment and our customer has legal title. Determining a measure of progress and when control transfers requires us to make judgments that affect the timing of when revenue is recognized. Essentially, all of our contracts satisfy their performance obligations over time.

Contracts are often modified to account for changes in contract specifications and requirements. Contract modifications impact performance obligations when the modification either creates new or changes the existing enforceable rights and obligations. The effect of a contract modification on the transaction price and our measure of progress for the performance obligation to which it relates is recognized as an adjustment to revenue and profit cumulatively. Furthermore, a significant change in one or more estimates could affect the profitability of our contracts. We recognize adjustments in estimated profit on contracts in the period identified. The impact of adjustments in contract estimates can be reflected in either revenue or operating expenses on the condensed consolidated statement of income.

We have an Estimate at Completion process in which management reviews the progress and execution of our performance obligations. As part of this process, management reviews information including, but not limited to, any outstanding key contract matters, progress towards completion and the related program schedule, identified risks and opportunities and the related changes in estimates of revenue and costs. The risks and opportunities include management's judgment about the ability and cost to achieve the contract milestones and other technical contract requirements. Management must make assumptions and estimates regarding labor productivity and availability, the complexity of the work to be performed, the availability of materials, the length of time to complete the performance obligation, execution by our subcontractors, the availability and timing of funding from our customer and overhead cost rates, among other variables. A significant change in one or more of these estimates could affect the profitability of our contracts. For the three months ended September 30, 2018, the aggregate impact of adjustments in contract estimates increased our revenue by \$4.5 million. For the nine months ended September 30, 2018, the aggregate impact of adjustments in contract estimates increased our revenue by \$8.8 million. No adjustment on any one contract was material to our condensed consolidated financial statements for the nine months ended September 30, 2018.

Results for prior periods were reported in accordance with ASC 605. Revenue for cost-reimbursable contracts were recorded as reimbursable costs were incurred, including an estimated share of the applicable contractual fees earned. For performance-based fees under cost-reimbursable contracts, we recognized the relevant portion of the expected fee to be awarded by the customer at the time such fee can be reasonably estimated, based on factors such as our prior award experience and communications with the customer regarding performance, or upon approval by the customer. For time-and-materials contracts, revenue was recognized to the extent of billable rates times hours delivered plus

materials and other reimbursable costs incurred. For long-term fixed-price contracts, revenue was recognized at a rate per unit as the units were delivered or by other methods to measure services provided. Revenue from other long-term fixed-price contracts were recognized ratably over the contract period or by other appropriate methods to measure services provided. Contract costs were expensed as incurred except for certain limited long-term contracts noted below. For long-term contracts, specifically described in the scope section of ASC 605-35, Revenue Recognition - Construction-Type and Production-Type Contracts, we applied the percentage of completion method. Under the percentage of completion method, income was recognized at a consistent profit margin over the period of performance based on estimated profit margins at completion of the contract. This method of accounting required estimating the total revenue and total contract cost at completion of the contract. These estimates were periodically reviewed and revisions were made as required using the cumulative catch-up method. The impact on revenue and contract profit as a result of these revisions were included in the periods in which the revisions were made. Estimated losses on contracts at completion were recognized when identified. In certain circumstances, revenue was recognized when contract amendments were not finalized.

Contract assets - Amounts are invoiced as work progresses in accordance with agreed-upon contractual terms, either at periodic intervals or upon achievement of contractual milestones. Generally, revenue recognition occurs before billing, resulting

in contract assets. These contract assets are referred to as unbilled receivables and are reported within receivables, net on our condensed consolidated balance sheet.

Billed receivables - Amounts billed and due from our customers are classified as billed receivables and are reported within receivables, net on the condensed consolidated balance sheet. The portion of the payments retained by the customer until final contract settlement is not considered a significant financing component because the intent is to protect the customer.

Contract liabilities - We receive advances and milestone payments from our customers on selected contracts that exceed revenue earned to date, resulting in contract liabilities. Contract liabilities typically are not considered a significant financing component because it is used to meet working capital demands that can be higher in the early stages of a contract and to protect us from the customer failing to adequately complete some or all of its obligations under the contract. Contract liabilities are reported on our condensed consolidated balance sheet on a net contract basis at the end of each reporting period.

Contract costs - Contract costs include direct labor, direct materials, overhead and, when applicable, general and administrative expenses. Incremental costs of obtaining a contract that we expect to recover are recognized as deferred contract costs and are amortized on a systematic basis that is consistent with the transfer to the customer of the goods or services. Other incremental costs are expensed when incurred. Costs of fulfilling a contract that relate directly to a contract or to an anticipated contract that can be specifically identified, generate or enhance resources that will be used in satisfying future performance obligations and are expected to be recovered are recognized as deferred contract costs and amortized on a systematic basis that is consistent with the transfer of the goods or services to the customer. Other costs of fulfilling a contract (costs of wasted materials, labor or other resources to fulfill the contracts that were not reflected in the price of the contract and costs that relate to satisfied performance obligations in the contract) are expensed when incurred.

Deferred contract costs - Costs of obtaining or fulfilling a contract that meet the criteria in ASC 340, Other Assets and Deferred Costs, are capitalized and amortized on a systematic basis that is consistent with the transfer of goods or services to the customer. Deferred contracts costs are reported on our condensed consolidated balance sheet within current or non-current other assets based on the expected life of the related contract. At September 30, 2018, we had \$6.2 million of deferred contract costs. For the three months ended September 30, 2018 we recorded amortization expense of \$8 thousand. For the nine months ended September 30, 2018, we recorded amortization expense of \$0.2 million.

Revenue from Contracts with Customers

We derive revenue from contracts with customers primarily from contracts with the U.S. government in the areas of defense, intelligence, homeland security and other federal civilian agencies. Substantially all of our revenue is derived from services and solutions provided to the U.S. government or to prime contractors supporting the U.S. government, including services by our employees and our subcontractors, and solutions that include third-party hardware and software that we purchase and integrate as a part of our overall solutions. Customer requirements may vary from period-to-period depending on specific contract and customer requirements. We provide our services and solutions under three types of contracts: cost-reimbursable, fixed-price and time-and-materials. Under cost-reimbursable contracts, we are reimbursed for costs that are determined to be reasonable, allowable and allocable to the contract and paid a fee representing the profit margin negotiated between us and the contracting agency, which may be fixed or performance based. Under fixed-price contracts, we perform specific tasks for a fixed price. Fixed-price contracts may include either a product delivery or specific service performance over a defined period. Under time-and-materials contracts, we are reimbursed for labor at fixed hourly rates and generally reimbursed separately for allowable materials, costs and expenses at cost.

We have one reportable segment. Our U.S. government customers typically exercise independent decision-making and contracting authority. Offices or divisions within an agency or department of the U.S. government may directly, or through a prime contractor, use our services as a separate customer as long as the customer has independent decision-making and contracting authority within its organization. We treat sales to U.S. government customers as sales within the U.S. regardless of where the services are performed.

The following tables disclose revenue (in thousands) by contract type, customer, prime or subcontractor and geography for the periods presented. Prior period amounts have not been adjusted under the modified retrospective method.

	Three months ended		Nine months ended

The following table discloses contract receivables (in thousands):

	September 30,		January 1, December 31,	
	2018	2017	2018	2017
Billed receivables	\$ 281,682	\$236,113	\$ 236,113	
Unbilled receivables	92,582	88,767	81,454	
Allowance for doubtful accounts	(6,695)	(6,157)	(6,157)	
Receivables—net	\$ 367,569	\$318,723	\$ 311,410	

Receivables at September 30, 2018 are expected to be substantially collected within one year except for approximately \$0.6 million, of which 92% is related to receivables from sales to the U.S. government or from contracts in which we acted as a subcontractor to other contractors selling to the U.S. government. We do not believe that we have significant exposure to credit risk as billed receivable and unbilled receivables are primarily due from the U.S. government. The allowance for doubtful accounts represents our estimate for exposure to compliance, contractual issues and bad debts related to prime contractors.

The following table discloses contract liabilities (in thousands):

Edgar Filing: MANTECH INTERNATIONAL CORP - Form 10-Q

	September 30, 2018	January 1, 2018	December 31, 2017
Contract liabilities \$	32,355	\$ 22,156	\$ 18,816

11

Changes in the balances of contract assets and contract liabilities are primarily due to the timing difference between our performance and our customers' payments. For the three months ended September 30, 2018, the amount of revenue that was included in the opening contract liabilities balance was \$4.2 million. For the nine months ended September 30, 2018, the amount of revenue that was included in the opening contract liabilities balance was \$10.0 million.

The remaining performance obligation as of September 30, 2018 is \$2.8 billion. The following table discloses when we expect to recognize the remaining performance obligation as revenue (in billions):

For the year the ending remaining three month	December ending 31, December 2019	December 31, 2020	Thereafter
	\$0.5	\$1.3	\$ 0.6
			\$ 0.4

4. Acquisitions

InfoZen LLC (InfoZen)—On October 2, 2017, we completed the acquisition of InfoZen. The results of InfoZen's operations have been included in our consolidated financial statements since that date. The acquisition was completed through an equity purchase agreement dated September 15, 2017, by and among InfoZen LLC, IZ Holdings, LLC and other beneficiaries and ManTech Advanced Systems International, Inc. We funded the acquisition with cash on hand and borrowings on our revolving credit facility. InfoZen is a leading IT solution provider, with domain expertise in modernization, agile/DevOps software development, cloud migration and threat monitoring and assessment capabilities in support of critical national and homeland security missions. The purchase agreement did not contain provisions for contingent consideration.

The purchase price of \$184.0 million was allocated to the underlying assets and liabilities based on their estimated fair value at the date of acquisition. The goodwill recorded related to this transaction will be deductible for tax purposes over 15 years. Recognition of goodwill is largely attributed to the value paid for InfoZen's capabilities to support customers in modernization, agile software development, cloud migration and threat monitoring and assessment capabilities.

In allocating the purchase price, we considered, among other factors, analysis of historical financial performance and estimates of future performance of InfoZen's contracts. The components of other intangible assets associated with the acquisition were customer relationships and backlog valued at \$49.2 million and \$5.7 million, respectively. Customer contracts and related relationships represent the underlying relationships and agreements with InfoZen's existing customers. Customer relationships are amortized using the pattern of benefits method over their estimated useful lives of approximately 20 years. Backlog is amortized straight-line over its estimated useful life of 1 year. The weighted-average amortization period for the intangible assets is 18 years.

The following table represents the purchase price allocation for InfoZen (in thousands):

Cash and cash equivalents	\$ 1,406
Receivables	8,991

Prepaid expenses	4,046
Other current assets	7
Goodwill	129,932
Other intangible assets	54,850
Property and equipment	485
Other assets	111
Accounts payable and accrued expenses	(7,488)
Accrued salaries and related expenses	(3,092)
Contract liabilities	(5,258)
Net assets acquired and liabilities assumed	\$ 183,990

5. Earnings Per Share

Under ASC 260, Earnings per Share, the two-class method is an earnings allocation formula that determines earnings per share for each class of common stock according to dividends declared (or accumulated) and participation rights in undistributed earnings. Under that method, basic and diluted earnings per share data are presented for each class of common stock.

In applying the two-class method, we determined that undistributed earnings should be allocated equally on a per share basis between Class A and Class B common stock. Under our Certificate of Incorporation, the holders of the common stock are entitled to participate ratably, on a share-for-share basis as if all shares of common stock were of a single class, in such dividends as may be declared by the Board of Directors. During the nine months ended September 30, 2018 and 2017, we declared and paid quarterly dividends in the amount of \$0.25 per share and \$0.21 per share, respectively, on both classes of common stock.

Basic earnings per share has been computed by dividing net income available to common stockholders by the weighted average number of shares of common stock outstanding during each period. Shares issued during the period and shares reacquired during the period are weighted for the portion of the period in which the shares were outstanding. Diluted earnings per share have been computed in a manner consistent with that of basic earnings per share while giving effect to all potentially dilutive common shares that were outstanding during each period.

The net income available to common stockholders and weighted average number of common shares outstanding used to compute basic and diluted earnings per share for each class of common stock are as follows (in thousands, except per share amounts):

	Three months ended September 30,		Nine months ended September 30,	
	2018	2017	2018	2017
Distributed earnings	\$9,928	\$8,174	\$29,687	\$24,474
Undistributed earnings	11,995	7,008	32,218	21,297
Net income	\$21,923	\$15,182	\$61,905	\$45,771

Class A common stock:

Basic net income available to common stockholders	\$14,623	\$10,030	\$41,226	\$30,213
Basic weighted average common shares outstanding	26,421	25,684	26,293	25,617
Basic earnings per share	\$0.55	\$0.39	\$1.57	\$1.18

Diluted net income available to common stockholders	\$14,682	\$10,062	\$41,402	\$30,304
Effect of potential exercise of stock options	322	245	340	228
Diluted weighted average common shares outstanding	26,743	25,929	26,633	25,845
Diluted earnings per share	\$0.55	\$0.39	\$1.55	\$1.17

Class B common stock:

Basic net income available to common stockholders	\$7,300	\$5,152	\$20,679	\$15,558
Basic weighted average common shares outstanding	13,189	13,191	13,189	13,191
Basic earnings per share	\$0.55	\$0.39	\$1.57	\$1.18

Diluted net income available to common stockholders	\$7,241	\$5,120	\$20,503	\$15,467
Effect of potential exercise of stock options	—	—	—	—
Diluted weighted average common shares outstanding	13,189	13,191	13,189	13,191

Diluted earnings per share	\$0.55	\$0.39	\$1.55	\$1.17
----------------------------	--------	--------	--------	--------

For the three months ended September 30, 2018 and 2017, options to purchase 242,789 shares and 363,635 shares, respectively, were outstanding but not included in the computation of diluted earnings per share because the options' effect would have been anti-dilutive. For the nine months ended September 30, 2018 and 2017, options to purchase 268,013 shares and 301,985 shares, respectively, were outstanding but not included in the computation of diluted earnings per share because the options' effect would

have been anti-dilutive. For the nine months ended September 30, 2018 and 2017, there were 387,926 shares and 202,459 shares, respectively, issued from the exercise of stock options.

6. Property and Equipment

Major classes of property and equipment are summarized as follows (in thousands):

	September 30, December 31,	
	2018	2017
Furniture and equipment	\$ 98,396	\$ 79,218
Leasehold improvements	42,835	39,022
Property and equipment—gross	141,231	118,240
Accumulated depreciation and amortization	(88,053)	(72,158)
Property and equipment—net	\$ 53,178	\$ 46,082

Depreciation and amortization expense related to property and equipment for the three months ended September 30, 2018 and 2017 was \$6.4 million and \$2.0 million, respectively. Depreciation and amortization expense related to property and equipment for the nine months ended September 30, 2018 and 2017 was \$19.1 million and \$6.1 million, respectively.

7. Goodwill and Other Intangible Assets

The change in the carrying amount of goodwill during the year ended December 31, 2017 and the nine months ended September 30, 2018 is as follows (in thousands):

	Goodwill
	Balance
Goodwill at December 31, 2016	\$955,874
Acquisitions	128,686
Goodwill at December 31, 2017	1,084,560
Acquisition fair value adjustment	1,246
Goodwill at September 30, 2018	\$ 1,085,806

Other intangible assets consisted of the following (in thousands):

	September 30, 2018			December 31, 2017		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Other intangible assets:						
Contract and program intangible assets	\$ 355,932	\$ 196,449	\$ 159,483	\$ 355,932	\$ 179,049	\$ 176,883
Capitalized software cost for internal use	50,040	32,410	17,630	46,995	29,530	17,465
Total other intangible assets—net	\$ 405,972	\$ 228,859	\$ 177,113	\$ 402,927	\$ 208,579	\$ 194,348

Amortization expense relating to intangible assets for the three months ended September 30, 2018 and 2017 was \$6.8 million and \$5.5 million. Amortization expense relating to intangible assets for the nine months ended September 30, 2018 and 2017 was \$20.3 million and \$16.6 million, respectively. We estimate that we will have the following amortization expense for the future periods indicated below (in thousands):

For the remaining three months ending December 31, 2018	\$6,023
For the year ending:	
December 31, 2019	\$22,570
December 31, 2020	\$21,732
December 31, 2021	\$19,002
December 31, 2022	\$16,563
December 31, 2023	\$13,251

8. Debt

Revolving Credit Facility—We maintain a credit facility with a syndicate of lenders led by Bank of America, N.A, as sole administrative agent. The credit agreement provides for a \$500 million revolving credit facility, with a \$75 million letter of credit sublimit and a \$30 million swing line loan sublimit. The credit agreement also includes an accordion feature that permits us to arrange with the lenders for the provision of additional commitments. The maturity date is August 17, 2022.

Borrowings under our credit agreement are collateralized by substantially all of our assets and those of our Material Subsidiaries (as defined in the credit agreement) and bear interest at one of the following variable rates as selected by us at the time of borrowing: a London Interbank Offer Rate based rate plus market-rate spreads (1.25% to 2.25% based on our consolidated total leverage ratio) or Bank of America's base rate plus market spreads (0.25% to 1.25% based on our consolidated total leverage ratio).

The terms of the credit agreement permit prepayment and termination of the loan commitments at any time, subject to certain conditions. The credit agreement requires us to comply with specified financial covenants, including the maintenance of certain leverage ratios and a certain consolidated coverage ratio. The credit agreement also contains various covenants, including affirmative covenants with respect to certain reporting requirements and maintaining certain business activities, and negative covenants that, among other things, may limit or impose restrictions on our ability to incur liens, incur additional indebtedness, make investments, make acquisitions and undertake certain other actions. As of and during the nine months ended September 30, 2018 and 2017, we were in compliance with the financial covenants under the credit agreement.

There was \$0 and \$31.0 million outstanding on our revolving credit facility at September 30, 2018 and December 31, 2017, respectively. The maximum available borrowing under the revolving credit facility at September 30, 2018 was \$484.7 million. As of September 30, 2018, we were contingently liable under letters of credit totaling \$15.3 million, which reduces our availability to borrow under our revolving credit facility.

9. Commitments and Contingencies

Contracts with the U.S. government, including subcontracts, are subject to extensive legal and regulatory requirements and, from time-to-time, agencies of the U.S. government, in the ordinary course of business, investigate whether our operations are conducted in accordance with these requirements and the terms of the relevant contracts. U.S. government investigations of us, whether related to our U.S. government contracts or conducted for other reasons, could result in administrative, civil, or criminal liabilities, including repayments, fines or penalties being imposed upon us, or could lead to suspension or debarment from future U.S. government contracting activities. Management believes it has adequately reserved for any losses that may be experienced from any investigation of which it is aware.

The Defense Contract Audit Agency has substantially completed our incurred cost audits through 2012 with no material adjustments. The remaining audits for 2013 through 2017 are not expected to have a material effect on our financial position, results of operations or cash flow and management believes it has adequately reserved for any losses.

In the normal course of business, we are involved in certain governmental and legal proceedings, claims and disputes and have litigation pending under several suits. We believe that the ultimate resolution of these matters will not have a material effect on our financial position, results of operations or cash flows, except for the matter noted below.

An officer of our Company is a party to a pending arbitration proceeding with a former employer that relates to certain breach of contract claims. Pursuant to indemnification arrangements we have with this officer, we may be exposed to a potential loss

related to this claim. Pursuant to applicable accounting standards, we have determined that it is reasonably possible that an unfavorable outcome could cause us to incur a liability/loss under these indemnification arrangements. However, given the nature of the claim, the early stage of the process, the limitations on information and other factual details relating to the claims that are available to us at this time, and management's intent to contest the matter vigorously, we are unable to make a reasonable estimate of loss at this time. As such, we have not disclosed an amount of potential loss as of September 30, 2018.

We were a defendant in a lawsuit filed by two former employees with allegations of retaliation under both the False Claims Act and the Defense Contractor Whistleblower Protection Act. A jury found ManTech liable for discharging the two former employees. Both parties filed appeals to the Fourth Circuit Court of Appeals. In August 2018, the Fourth Circuit Court of Appeals reversed the finding of liability as to one of the former employees and affirmed the finding of liability as to the other former employee in the amount of \$1.4 million. Our insurance policy covers the amount of the liability, therefore, no loss was recognized as of the nine months ended September 30, 2018. The impact of future events in connection with this matter will not have a material effect on our financial position, results of operations or cash flow.

We have \$15.3 million outstanding on our letter of credit, of which \$15.2 million is related to an outstanding performance bond in connection with a contract between ManTech MENA, LLC and Jadwalean International Operations and Management Company to fulfill technical support requirements for the Royal Saudi Air Force.

10. Stock-Based Compensation

Our 2016 Management Incentive Plan (the Plan) was designed to attract, retain and motivate key employees. The types of awards available under the Plan include, among others, stock options, restricted stock and restricted stock units (RSUs). Equity awards granted under the Plan are settled in shares of Class A common stock. At the beginning of each year, the Plan provides that the number of shares available for issuance automatically increases by an amount equal to 1.5% of the total number of shares of Class A and Class B common stock outstanding on December 31st of the previous year. On January 2, 2018, there were 588,464 additional shares made available for issuance under the Plan. Through September 30, 2018, the Board of Directors has authorized the issuance of up to 14,551,899 shares under this Plan. Through September 30, 2018, the remaining aggregate number of shares of our common stock available for future grants under the Plan was 6,317,478. The Plan expires in March 2026.

The Plan is administered by the compensation committee of our Board of Directors, along with its delegates. Subject to the express provisions of the Plan, the committee has the Board of Directors' authority to administer and interpret the Plan, including the discretion to determine the exercise price, vesting schedule, contractual life and the number of shares to be issued.

Stock Compensation Expense—For both the three months ended September 30, 2018 and 2017, we recorded \$1.3 million of stock-based compensation expense. For both the nine months ended September 30, 2018 and 2017, we recorded \$3.6 million of stock-based compensation expense. No compensation expense of employees with stock awards, including stock-based compensation expense, was capitalized during the periods. For the three months ended September 30, 2018 and 2017, we recorded \$(1.2) million and \$(0.3) million, respectively, to income tax expense (benefit) related to the exercise of stock options, vested cancellations and the vesting of restricted stock. For the nine months ended September 30, 2018 and 2017, we recorded \$(2.5) million and \$(0.4) million, respectively, to income tax expense (benefit) related to the exercise of stock options, vested cancellations and the vesting of restricted stock.

Stock Options—Under the Plan, we have issued stock options. A stock option gives the holder the right, but not the obligation to purchase a certain number of shares at a predetermined price for a specific period of time. We typically issue options that vest over three years in equal installments beginning on the first anniversary of the date of grant.

Under the terms of the Plan, the contractual life of the option grants may not exceed eight years. During the nine months ended September 30, 2018 and 2017, we issued options that expire five years from the date of grant.

Fair Value Determination—We have used the Black-Scholes-Merton option pricing model to determine the fair value of our awards on the date of grant. We will reconsider the use of the Black-Scholes-Merton model if additional information becomes available in the future that indicates another model would be more appropriate or if grants issued in future periods have characteristics that cannot be reasonably estimated under this model.

The following weighted-average assumptions were used for option grants during the nine months ended September 30, 2018 and 2017:

Volatility—The expected volatility of the options granted was estimated based upon historical volatility of our share price through weekly observations of our trading history.

Expected life of options—The expected life of options granted to employees was determined from historical exercises of the grantee population. The options had graded vesting over three years in equal installments beginning on the first anniversary of the date of grant and a contractual term of five years.

Risk-free interest rate—The yield on zero-coupon U.S. Treasury strips was used to extrapolate a forward-yield curve. This “term structure” of future interest rates was then input into a numeric model to provide the equivalent risk-free rate to be used in the Black-Scholes-Merton model based on the expected term of the underlying grants.

Dividend Yield—The Black-Scholes-Merton valuation model requires an expected dividend yield as an input. We have calculated our expected dividend yield based on an expected annual cash dividend of \$1.00 per share.

The following table summarizes weighted-average assumptions used in our calculations of fair value for the nine months ended September 30, 2018 and 2017:

	Nine months ended			
	September 30,			
	2018		2017	
Volatility	26.34	%	25.13	%
Expected life of options	3 years		3 years	
Risk-free interest rate	2.46	%	1.67	%
Dividend yield	2.00	%	2.75	%

Stock Option Activity—The weighted-average fair value of options granted during the nine months ended September 30, 2018 and 2017, as determined under the Black-Scholes-Merton valuation model, was \$9.98 and \$5.65, respectively. Option grants that vested during the nine months ended September 30, 2018 and 2017 had a combined fair value of \$0.7 million and \$0.9 million, respectively.

The following table summarizes stock option activity for the year ended December 31, 2017 and the nine months ended September 30, 2018:

	Number of Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (in thousands)	Weighted Average Remaining Contractual Life
Stock options outstanding at December 31, 2016	1,160,419	\$ 29.93	\$ 14,299	
Granted	534,030	\$ 42.90		
Exercised	(463,800)	\$ 29.34	\$ 7,203	
Cancelled and expired	(61,241)	\$ 33.80		
Stock options outstanding at December 31, 2017	1,169,408	\$ 35.88	\$ 16,731	
Granted	243,810	\$ 53.98		
Exercised	(387,926)	\$ 29.63	\$ 11,692	
Cancelled and expired	(103,563)	\$ 43.59		

Edgar Filing: MANTECH INTERNATIONAL CORP - Form 10-Q

Stock options outstanding at September 30, 2018	921,729	\$ 42.43	\$ 19,234	3 years
Stock options exercisable at September 30, 2018	233,403	\$ 31.80	\$ 7,353	2 years

17

The following table summarizes non-vested stock options for the nine months ended September 30, 2018:

	Number of Shares	Weighted Average Fair Value
Non-vested stock options at December 31, 2017	684,979	\$ 6.23
Granted	243,810	\$ 9.98
Vested	(138,000)	\$ 5.21
Cancelled	(102,463)	\$ 6.93
Non-vested stock options at September 30, 2018	688,326	\$ 7.66

Unrecognized compensation expense related to non-vested awards was \$3.9 million as of September 30, 2018, which is expected to be recognized over a weighted-average period of 2 years.

Restricted Stock—Under the Plan, we have issued restricted stock. A restricted stock award is an issuance of shares that cannot be sold or transferred by the recipient until the vesting period lapses. Restricted stock issued to members of our Board of Directors vest on the one year anniversary of the grant date. The related compensation expense is recognized over the service period and is based on the grant date fair value of the stock. The grant date fair value of the restricted stock is equal to the closing market price of our common stock on the date of grant.

Restricted Stock Activity— The following table summarizes the restricted stock activity during the year ended December 31, 2017 and the nine months ended September 30, 2018.

	Number of Shares	Weighted Average Fair Value
Non-vested restricted stock at December 31, 2016	18,000	\$ 33.84
Granted	24,000	\$ 37.90
Vested	(18,000)	\$ 33.84
Non-vested restricted stock at December 31, 2017	24,000	\$ 37.90
Granted	24,000	\$ 52.83
Vested	(24,000)	\$ 37.90
Non-vested restricted stock at September 30, 2018	24,000	\$ 52.83

RSUs—Under the Plan, we have issued RSUs. RSUs are not actual shares, but rather a right to receive shares in the future. The shares are not issued and the employee cannot sell or transfer shares prior to vesting and have no voting rights until the RSUs vest. Employees who are granted RSUs do not receive dividend payments during the vesting period. Our employees have been granted performance-based RSUs and time-based RSUs. Performance-based RSUs result in the delivery of shares only if (a) performance criteria is met and (b) the employee remains employed, in good standing, through the date of the performance period of two years. In 2018, our employees were granted time-based RSUs, instead of performance-based RSUs. These time-based RSUs vest in one-third increments on the first, second and third anniversaries of the date of grant. The grant date fair value of the RSUs is equal to the closing market price of our common stock on the grant date less the present value of dividends expected to be awarded during the service period. We recognize the grant date fair value of RSUs of shares we expect to issue as compensation expense ratably over the requisite service period.

RSU Activity—For performance-based RSUs that vested in 2018, each RSU awarded resulted in the issuance of 1.5 shares, which were issued net of applicable payroll tax withholdings. The following table summarizes the non-vested RSU activity during the year ended December 31, 2017 and the nine months ended September 30, 2018:

	Number of Units	Weighted Average Fair Value
Non-vested RSUs at December 31, 2016	206,338	\$ 30.10
Granted	55,830	\$ 35.34
Vested	(3,300)	\$ 30.60
Forfeited	(97,525)	\$ 31.00
Non-vested RSUs at December 31, 2017	161,343	\$ 31.36
Granted	72,963	\$ 53.96
Vested	(87,200)	\$ 28.40
Forfeited	(10,850)	\$ 38.07
Non-vested RSUs at September 30, 2018	136,256	\$ 44.82

11. Income Taxes

The Tax Cuts and Jobs Act of 2017 (TCJA) was enacted on December 22, 2017. TCJA reduces the U.S. federal corporate tax rate from 35% to 21%, effective January 1, 2018. At December 31, 2017, we made a reasonable estimate of the effects on our existing deferred tax balances and effective tax rate for the deductibility of officers' compensation, the acquisition of InfoZen, and assets that qualify for an immediate deduction. Our accounting for those items, as impacted by the TCJA, is now complete and no material adjustments were required.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Note Regarding Forward-Looking Statements

All statements and assumptions contained in this Quarterly Report on Form 10-Q that do not relate to historical facts constitute "forward-looking statements." These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often include the use of words such as "may," "will," "expect," "intend," "anticipate," "believe," "estimate," "plan" and words and terms of similar substance in connection with discussions of future events, situations or financial performance. While these statements represent our current expectations, no assurance can be given that the results or events described in such statements will be achieved.

Forward-looking statements may include, among other things, statements with respect to our financial condition, results of operations, prospects, business strategies, competitive position, growth opportunities, and plans and objectives of management. Such statements are subject to numerous assumptions, risks, uncertainties and other factors, many of which are outside of our control, and include, without limitations, the risks and uncertainties discussed in the section titled "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017.

Factors or risks that could cause our actual results to differ materially from the results we anticipate include, but are not limited to, the following:

- Failure to maintain our relationship with the U.S. government, or the failure to compete effectively for new contract awards or to retain existing U.S. government contracts;

- Inability to recruit and retain a sufficient number of employees with specialized skill sets or necessary security clearances who are in great demand and limited supply;

- Issues relating to competing effectively for awards procured through the competitive bidding process, including the adverse impact of delays caused by competitors' protests of contract awards received by us;

- Adverse changes in U.S. government spending for programs we support, whether due to changing mission priorities, socio-economic policies that reduce contracts that we may bid on, cost reduction and efficiency initiatives by our customers, or federal budget constraints generally;

- Failure to obtain option awards, task orders or funding under contracts;

- Failure to realize the full amount of our backlog, or adverse changes in the timing of receipt of revenue under contracts included in backlog;

- Renegotiation, modification or termination of our contracts, or failure to perform in conformity with contract terms or our expectations;

- Disruption of our business or damage to our reputation resulting from security breaches in customer systems, internal systems or service failures (including as a result of cyber or other security threats), or employee or subcontractor misconduct;

- Failure to successfully integrate acquired companies or businesses into our operations or to realize any accretive or synergistic effects from such acquisitions;

Increased exposure to risks associated with conducting business internationally;

Non-compliance with, or adverse changes in, complex U.S. government laws, procurement regulations or processes; and

Adverse results of U.S. government audits or other investigations of our government contracts.

We urge you not to place undue reliance on these forward-looking statements, which speak only as of the date of this Quarterly Report. We undertake no obligation to update any forward-looking statement made herein following the date of this Quarterly Report, whether as a result of new information, subsequent events or circumstances, changes in expectations or otherwise.

Overview

We provide mission-focused technology solutions and services for U.S. defense, intelligence community and federal civilian agencies. Now in our 50th year, we excel in full-spectrum cyber, data collection & analytics, enterprise IT, systems engineering and software application development solutions that support national and homeland security.

On September 28, 2018, the President signed into law appropriations funding approximately 75% of the U.S. government, including the Department of Defense, through U.S. Government fiscal year (GFY) 2019. However, a number of federal civilian agencies, including the Departments of Homeland Security and State, have been funded under a Continuing Resolution (CR) at 2018 funding levels through early December 2018. Appropriations for the Department of Defense include near term expansions that aligned with the Administration's stated priorities in dealing with significant global threats, readiness and force structure needs within the military, diplomatic, and cyber aggressions by both state and non-state actors. For agencies operating under the CR, funding appropriations are expected to be debated by Congress after the midterm elections. We expect future appropriations to be debated with the consideration of policy priorities, national budget deficits, debt ceilings and the Budget Control Act.

We recommend that you read this discussion and analysis in conjunction with our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, previously filed with the Securities and Exchange Commission.

Three Months Ended September 30, 2018 Compared to the Three Months Ended September 30, 2017

The following table sets forth certain items from our condensed consolidated statements of income and the relative percentage that certain items of expenses and earnings bear to revenue, as well as the period-to-period change from September 30, 2017 to September 30, 2018.

	Three months ended September 30,		2018		2017		Period-to-Period Change 2017 to 2018	
	2018	2017	2018	2017	2017	2018	Dollars	Percentage
	Dollars		Percentage				Dollars	Percentage
	(dollars in thousands)							
REVENUE	\$497,205	\$422,665	100.0%	100.0%	%	\$74,540	17.6	%
Cost of services	425,560	361,286	85.6%	85.5%	%	64,274	17.8	%
General and administrative expenses	42,246	38,239	8.5%	9.0%	%	4,007	10.5	%
OPERATING INCOME	29,399	23,140	5.9%	5.5%	%	6,259	27.0	%
Interest expense	(616)	(254)	0.1%	—	%	362	142.5	%
Interest income	43	37	—	—	%	6	16.2	%
Other income, net	1	191	—	—	%	(190)	(99.5)	%
INCOME FROM OPERATIONS BEFORE INCOME TAXES AND EQUITY METHOD INVESTMENTS	28,827	23,114	5.8%	5.5%	%	5,713	24.7	%
Provision for income taxes	(6,912)	(8,004)	1.4%	1.9%	%	(1,092)	(13.6)	%
Equity in gains of unconsolidated subsidiaries	8	72	—	—	%	(64)	(88.9)	%
NET INCOME	\$21,923	\$15,182	4.4%	3.6%	%	\$6,741	44.4	%

Revenue

The primary driver of our increase in revenues relates to revenues from new contract awards and growth on certain existing contracts and acquisitions. These increases were offset by contracts and tasks that ended and reduced scope of work on some contracts.

Cost of services

The increase in cost of services was primarily due to increases in revenue. As a percentage of revenue, direct labor costs were 46% for the three months ended September 30, 2018, compared to 48% for the same period in 2017. As a percentage of revenues, other direct costs, which include subcontractors and third party equipment and materials used in the performance of our contracts, was 39% for the three months ended September 30, 2018, compared to 38% for the same period in 2017.

General and administrative expenses

The increase in general and administrative expenses was due to an increase in expenditures to support new contract awards and amortization expense from acquired intangibles.

Interest expense

The increase in interest expense was due to increased borrowings under our credit facility to fund the acquisition of InfoZen in the fourth quarter of 2017 and the purchase of equipment to support a managed IT services contract. For additional information on the acquisition of InfoZen, see Note 4. Acquisitions to our condensed consolidated financial statements in Item I.

Provision for income taxes

Our effective tax rate is affected by recurring items, such as the relative amount of income we earn in various taxing jurisdictions and their tax rates. It is also affected by discrete items that may occur in any given year, but are not consistent from year-to-year. Our effective income tax rates were 24% and 35% for the three months ended September 30, 2018 and 2017, respectively. The significant reduction in our effective tax rate for 2018 is due to the Tax Cuts and Jobs Act of 2017, enacted on December 22, 2017, which reduced the U.S. corporate tax rate from 35% to 21%.

Nine Months Ended September 30, 2018 Compared to the Nine Months Ended September 30, 2017

The following table sets forth certain items from our condensed consolidated statements of income and the relative percentage that certain items of expenses and earnings bear to revenue, as well as the period-to-period change from September 30, 2017 to September 30, 2018.

	Nine months ended September 30,		2018		2017		Period-to-Period Change 2017 to 2018	
	2018	2017	2018	2017	2017 to 2018	2017 to 2018	2017 to 2018	
	Dollars		Percentage		Dollars	Percentage	Dollars	Percentage
	(dollars in thousands)							
REVENUE	\$1,461,485	\$1,254,733	100.0%	100.0%	\$206,752	16.5	%	
Cost of services	1,250,505	1,069,007	85.6	% 85.2	% 181,498	17.0	%	
General and administrative expenses	126,831	113,261	8.7	% 9.0	% 13,570	12.0	%	
OPERATING INCOME	84,149	72,465	5.7	% 5.8	% 11,684	16.1	%	
Interest expense	(2,007) (865) 0.1	% 0.1	% 1,142	132.0	%	
Interest income	85	89	—	% —	% (4) (4.5)%	
Other income, net	63	235	—	% —	% (172) (73.2)%	
INCOME FROM OPERATIONS BEFORE INCOME TAXES AND EQUITY METHOD	82,290	71,924	5.6	% 5.7	% 10,366	14.4	%	

INVESTMENTS

Provision for income taxes	(20,412)	(26,230)	1.4	%	2.1	%	(5,818)	(22.2)%
Equity in gains of unconsolidated subsidiaries	27		77		—	%	—	%	(50)	(64.9)%
NET INCOME	\$61,905		\$45,771		4.2	%	3.6	%	\$16,134		35.2	%

Revenue

The primary driver of our increase in revenue relates to revenues from new contract awards and growth on existing contracts, including higher levels of material procurements, and acquisitions. These increases were offset by contracts and tasks that ended and reduced scope of work on some contracts.

Cost of services

The increase in cost of services was primarily due to increases in revenue. As a percentage of revenue, direct labor costs were 48% for the nine months ended September 30, 2018, compared to 49% for the same period in 2017. As a percentage of revenue, other direct costs, which include subcontractors as well as equipment and materials used in the performance of our contracts, was 38% for the nine months ended September 30, 2018, compared to 37% for the same period in 2017. We expect cost of services as a percentage of revenues to remain steady or slightly increase for the remainder of 2018 due to the potential for higher levels of materials in the last quarter of the year.

General and administrative expenses

The increase in general and administrative expenses was primarily due to an increase in bid and proposal spending, amortization of acquired intangibles and expenditures to support infrastructure.

Interest expense

The increase in interest expense was due to increased borrowings under our credit facility to fund the acquisition of InfoZen in the fourth quarter of 2017 and the purchase of equipment to support a managed IT services contract. For additional information on the acquisition of InfoZen, see Note 4 to our condensed consolidated financial statements in Item I.

Provision for income taxes

Our effective tax rate is affected by recurring items, such as the relative amount of income we earn in various taxing jurisdictions and their tax rates. It is also affected by discrete items that may occur in any given year, but are not consistent from year-to-year. Our effective income tax rates were 25% and 36% for the nine months ended September 30, 2018 and 2017, respectively. The significant reduction in our effective tax rate for 2018 is due to the Tax Cuts and Jobs Act of 2017, enacted on December 22, 2017, which reduced the U.S. corporate tax rate from 35% to 21%. We expect our effective income tax rate to be between 25% and 27% for the balance of the year.

Backlog

Backlog represents estimates that we calculate on a consistent basis. We define backlog as our estimates of the remaining revenue from existing signed contracts, assuming the exercise of all options relating to such contracts and including executed task orders issued under Indefinite Delivery/Indefinite Quantity contracts.

We define funded backlog to be the portion of backlog for which funding currently is appropriated and allocated to the contract by the purchasing agency or otherwise authorized for payment by the customer upon completion of a specific portion of work. Our funded backlog does not include the full value of our contracts because Congress often appropriates funds for a particular program or contract on a yearly or quarterly basis, even though the contract may call for performance over a much longer period of time.

A variety of circumstances or events may cause changes in the amount of our backlog and funded backlog, including the execution of new contracts, the extension of existing contracts, the non-renewal or completion of current contracts, the early termination of contracts, and adjustment to estimates for previously included contracts. Changes in the amount of our funded backlog also are affected by the funding cycles of the U.S. government.

At September 30, 2018 and December 31, 2017, our backlog was \$8.3 billion and \$7.1 billion, respectively. Our funded backlog was \$1.3 billion and \$1.4 billion as of September 30, 2018 and December 31, 2017.

The following table reconciles our backlog to our remaining performance obligations as disclosed in Note 3 to our condensed consolidated financial statements in Item 1 (in billions):

	September 30, 2018
Backlog	\$ 8.3
Unexercised contract options	5.5
Remaining performance obligation	\$ 2.8

Liquidity and Capital Resources

Our primary liquidity needs relate to managing working capital, financing acquisitions, making cash dividend payments, purchasing property and equipment and investing in capital software. Our primary sources of liquidity are cash from operating activities and borrowings under our revolving credit facility. On September 30, 2018, our cash and cash equivalents balance was \$15.0 million. There were no outstanding borrowings under our revolving credit facility at September 30, 2018. The maximum available borrowings under our revolving credit facility at September 30, 2018 were \$484.7 million. As of September 30, 2018, we were contingently liable under letters of credit totaling \$15.3 million, which reduces our availability to borrow under our revolving credit facility.

Cash Flows From (Used In) Operating Activities

Our operating cash flow is primarily affected by our ability to invoice and collect from our customers in a timely manner, our management of vendor payments and the overall profitability of our contracts. We bill most of our customers monthly after services are rendered. Our accounts receivable days sales outstanding were 67 and 68 for the three months ended September 30, 2018 and 2017, respectively. For the nine months ended September 30, 2018 and 2017, our net cash from operating activities was \$94.2 million and \$115.2 million, respectively. The decrease in net cash flows from operating activities during the nine months ended September 30, 2018 when compared to the same period in 2017 was primarily due to the timing of receivables collection.

Cash Flows From (Used In) Investing Activities

For the nine months ended September 30, 2018 our net cash used in investing activities was \$36.8 million, which was primarily used for the purchase of equipment to support a managed IT service contract, infrastructure investments, closing working capital payment related to the purchase of InfoZen and capitalized software for internal use. For the nine months ended September 30, 2017 our net cash used in investing activities was \$11.6 million, which was used for capital expenditures. For the remainder of the year, we expect similar levels of capital expenditures, as compared to the first nine months of the year, for the purchase of equipment to support our infrastructure and managed IT service contracts, with the potential for additional increases in future years.

Cash Flows From (Used in) Financing Activities

For the nine months ended September 30, 2018, our net cash used in financing activities was \$51.9 million, which was primarily due to repayment of borrowings under revolving credit facility dividend payments. For the nine months ended September 30, 2017, our net cash used in financing activities were \$19.9 million, which were primarily due to dividends paid partially offset by the proceeds from the exercise of stock options.

Revolving Credit Facility

We maintain a credit agreement with a syndicate of lenders led by Bank of America, N.A., as sole administrative agent. The credit agreement provides for a \$500 million revolving credit facility, with a \$75 million letter of credit

sublimit and a \$30 million swing line loan sublimit. The credit agreement also includes an accordion feature that permits us to arrange with the lenders for the provision of additional commitments. The maturity date is August 17, 2022. Borrowings under our credit agreement are collateralized by substantially all the assets of us and our Material Subsidiaries (as defined in the credit agreement) and bear interest at one of the following variable rates as selected by us at the time of borrowing: a London Interbank Offer Rate based rate plus market spreads (1.25% to 2.25% based on our consolidated total leverage ratio) or Bank of America's base rate plus market spreads (0.25% to 1.25% based on our consolidated total leverage ratio). There were no outstanding borrowings on our revolving credit facility at September 30, 2018. As of and during the nine months ended September 30, 2018, we were in compliance with the financial covenants under the credit agreement.

Capital Resources

We believe the capital resources available to us from cash on hand, our remaining capacity under our revolving credit facility, and cash from our operations are adequate to fund our anticipated cash requirements for at least the next year. We anticipate financing our internal and external growth through cash from operating activities, borrowings under our revolving credit facility or other debt and issuance of equity.

Cash Management

To the extent possible, we invest our available cash in short-term, investment grade securities in accordance with our investment policy. Under our investment policy, we manage our investments in accordance with the priorities of maintaining the safety of our principal, maintaining the liquidity of our investments, maximizing the yield on our investments and investing our cash to the fullest extent possible. Our investment policy provides that no investment security can have a final maturity that exceeds six months and that the weighted average maturity of the portfolio cannot exceed 60 days. Cash and cash equivalents include cash on hand, amounts due from banks and short-term investments with maturity dates of three months or less at the date of purchase.

Dividend

During the nine months ended September 30, 2018 and 2017, we declared and paid quarterly dividends in the amount of \$0.25 per share and \$0.21 per share, respectively, on both classes of our common stock. While we expect to continue the cash dividend program, any future dividends declared will be at the discretion of our Board of Directors and will depend, among other factors, upon our results of operations, financial condition and cash requirements, as well as such other factors that our Board of Directors deems relevant.

Off-Balance Sheet Arrangements

In the ordinary course of business, we use letters of credit issued to satisfy certain contractual terms with our customers. As of September 30, 2018, \$15.3 million in letters of credit were issued but undrawn. We have an outstanding performance bond in connection with a contract between ManTech MENA, LLC and Jadwalean International Operations and Management Company to fulfill technical support requirements for the Royal Saudi Air Force. This performance bond is guaranteed by a letter of credit in the amount of \$15.2 million. We have off-balance sheet arrangements related to operating leases. For a description of our operating leases, see our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, previously filed with the SEC.

Critical Accounting Estimates and Policies

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and potentially result in materially different results under different assumptions and conditions. Application of these policies is particularly important to the portrayal of our financial condition and results of operations. The discussion and analysis of our financial condition and results of operations are based on our condensed consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles (GAAP). The preparation of these condensed consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses. Actual results may differ from these estimates under different assumptions or conditions. Our significant accounting policies for 2017 are described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017, previously filed with the SEC. There have been no material changes to our critical accounting estimates and policies from those discussed in our 2017 Annual Report on Form 10-K, other than revenue recognition and cost estimation as part of our implementation

of ASC 606, which is described below.

Revenue Recognition and Cost Estimation

We account for a contract when both we and the customer approve and commit; our rights and those of the customer are identified, payment terms are identified; the contract has commercial substance; and collectability of consideration is probable. At contract inception, we identify the distinct goods or services promised in the contract, referred to as performance obligations. Then we determine the transaction price for the contract; the consideration to which we can expect in exchange for the promised goods or services in the contract. The transaction price can be a fixed or variable amount. It is common for our contracts to contain award fees, incentive fees or other provisions that can either increase or decrease the transaction price. These variable amounts generally are awarded upon achievement of certain performance metrics, program milestones or cost targets and can be based upon customer discretion. We estimate variable consideration at the most likely amount to which we expect to be entitled. We

25

include estimated amounts in the transaction price to the extent it is probable that a significant reversal of cumulative revenue recognized will not occur when the uncertainty associated with the variable consideration is resolved. Our estimates of variable consideration and determination of whether to include estimated amounts in the transaction price are based largely on an assessment of our anticipated performance and historical, current and forecasted information that is reasonably available to us. The transaction price is allocated to each distinct performance obligation using our best estimate of the standalone selling price for each distinct good or service promised in the contract. The primary method used to estimate standalone selling price is the expected cost plus a margin approach, under which we forecast our expected costs of satisfying a performance obligation and then add an appropriate margin for that distinct good or service promised. Revenue is recognized when, or as, the performance obligation is satisfied.

We recognize revenue over time when there is a continuous transfer of control to our customer. For our U.S. government contracts, this continuous transfer of control to the customer is supported by clauses in the contract that allow the U.S. government to unilaterally terminate the contract for convenience, pay us for costs incurred plus a reasonable profit and take control of any work in process. When control is transferred over time, revenue is recognized based on the extent of progress towards completion of the performance obligation. Based on the nature of the products and services provided in the contract, we use our judgment to determine if an input measure or output measure best depicts the transfer of control over time. For services contracts, we typically satisfy our performance obligations as services are rendered and use a contract cost-based input method to measure progress. Contract costs include labor, material and allocable indirect expenses. Revenue is recognized proportionally as contract costs are incurred plus estimated fees. For time-and-material contracts, we bill the customer per labor hour and per material, and revenue is recognized in the amount invoiced since the amount corresponds directly to the value of our performance to date. For stand-ready service contracts, a time-elapsed output method is used to measure progress, and revenue is recognized straight-line over the term of the contract. If a contract does not meet the criteria for recognizing revenue over time, we recognize revenue at a point in time. Revenue is recognized at the point in time when control of the good or service is transferred to our customer. We consider control to transfer when we have a present right to payment and our customer has legal title. Determining a measure of progress and when control transfers requires us to make judgments that affect the timing of when revenue is recognized. Essentially all of our contracts satisfy their performance obligations over time.

Contracts are often modified to account for changes in contract specifications and requirements. Contract modifications impact performance obligation when the modification either creates new or changes the existing enforceable rights and obligations. The effect of a contract modification on the transaction price and our measure of progress for the performance obligation to which it relates is recognized as an adjustment to revenue under the cumulative catch-up method. Furthermore, a significant change in one or more estimates could affect the profitability of our contracts. We recognize adjustments in estimated profit on contracts in the period identified. If at any time the estimate of contract profitability indicates an anticipated loss on the contract, we recognize the loss in the quarter it is identified. The impact of adjustments in contract estimates can be reflected in either revenue or operating expenses on the condensed consolidated statement of income.

Recently Adopted Accounting Standards Updates

On January 1, 2018, we adopted the following Accounting Standards Updates (ASU):

ASU 2014-09, Revenue from Contracts with Customers (ASC 606) supersedes existing revenue recognition guidance, including ASC 605-35, Revenue Recognition - Construction-Type and Production-Type Contracts. ASU 2014-09 outlines a single set of comprehensive principles for recognizing revenue under GAAP. Among other things, it requires companies to identify contractual performance obligations and determine whether revenue should be recognized at a point in time or over time. It also requires new, expanded disclosures regarding revenue recognition. We elected to adopt using the modified retrospective method that applied to those contracts that were not substantially

completed as of January 1, 2018. We recognized the cumulative effect of adopting ASC 606 as an adjustment to the opening balance of retained earnings in the amount of \$0.8 million, with the impact primarily related to fixed-price contracts. Results for reporting periods beginning after January 1, 2018 are presented under ASC 606, while prior period amounts were not adjusted and reported in accordance with ASC 605, Revenue Recognition. Revenue for the nine months ended September 30, 2018 increased \$3.3 million as a result of applying ASC 606.

ASU 2017-09, Compensation—Stock Compensation (ASC 718): Scope of Modification Accounting, provides guidance concerning which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in ASC 718. Specifically, an entity is to account for the effects of a modification, unless all of the following are satisfied: (1) the fair value (or calculated value or intrinsic value, if such an alternative measurement method is used) of the modified award is the same as the fair value (or calculated value or intrinsic value, if such an alternative measurement method is used) of the original award immediately before the original award is modified; (2) the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the original award is modified; and (3) the classification of the modified award as an equity instrument or as a liability instrument is the same as the classification of the original award immediately before the original award is modified. The current disclosure requirements in ASC 718 apply regardless of whether

an entity is required to apply modification accounting under the amendments in ASU 2017-09. The adoption of this ASU did not have an effect on our condensed consolidated financial statements.

ASU 2017-01, Business Combinations (ASC 805)—Clarifying the Definition of a Business, clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. Under the guidance in Topic 805, there are three elements of a business: inputs, processes and outputs. While an integrated set of assets and activities (collectively, a “set”) that is a business usually has outputs, outputs are not required to be present. Additionally, all of the inputs and processes that a seller uses in operating a set are not required if market participants can acquire the set and continue to produce outputs. The amendments in ASU 2017-01 provide a screen to determine when a set is not a business. The screen requires that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set is not a business. This screen reduces the number of transactions that need to be further evaluated. If, however, the screen is not met, then the amendments in this ASU (1) require that to be considered a business, a set must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs and (2) remove the evaluation of whether a market participant could replace missing elements. Finally, the amendments in this ASU narrow the definition of the term “output” so that the term is consistent with the manner in which outputs are described in ASC 606. The adoption of this ASU did not have an effect on our condensed consolidated financial statements.

ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This ASU addresses the following eight specific cash flow issues: Debt prepayment or debt extinguishment costs; settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (including bank-owned life insurance policies); distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. We applied the equity method of accounting for applicable investments. We made an accounting policy election to classify distributions received from equity method investees using the cumulative earnings approach. Distributions received are considered returns on investment and classified as cash inflows from operating activities, unless the investor’s cumulative distributions received less distributions received in prior periods that were determined to be returns of investment exceed cumulative equity in earnings recognized by the investor (as adjusted for amortization of basis differences). When such an excess occurs, the current-period distribution up to this excess is considered a return of investment and should be classified as cash inflows from investing. Due to the adoption of ASU 2016-15, we classified proceeds from corporate life insurance for the nine months ended September 30, 2018 as investing activities on our condensed consolidated statement of cash flows.

Recently Issued But Not Yet Adopted ASUs

The Financial Accounting Standards Board (FASB) issued ASU 2016-02, Leases (Topic 842). ASU 2016-02 supersedes existing lease guidance, including ASC 840 - Leases. Among other things, ASU 2016-02 requires recognition of a right-of-use asset and liability for future lease payments for contracts that meet the definition of a lease and requires disclosure of certain information about leasing arrangements. ASU 2016-02 will be effective January 1, 2019, although early adoption is permitted, and may be adopted using a modified retrospective transition method that applies the new lease requirements at the beginning of the earliest period presented in the financial statements. The FASB has proposed a change that would allow a company to elect an optional transition method that applies the new lease requirements through a cumulative-effect adjustment in the period of adoption. We expect to adopt the standard on January 1, 2019. We are currently evaluating methods of adoption as well as the effect on our condensed consolidated financial statements. However, it is expected to increase total assets and total liabilities for operating leases that are not currently recorded on our condensed consolidated balance sheet.

The FASB has issued ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework—Changes to the Disclosure Requirements for Fair Value Measurement, finalizing Proposed ASU 2015-350 of the same name as part of its disclosure framework project, which focuses on improving the effectiveness of disclosures in the notes to financial statements by facilitating clear communication of the information required by GAAP that is most important to users of each entity’s financial statements. The amendments in ASU 2018-13 modify the disclosure requirements on fair value measurements in Topic 820, Fair Value Measurement. Specifically, the amendments in this ASU remove disclosure requirements in Topic 820 related to (1) the amount of, and reasons for, transfers between Level 1 and Level 2 of the fair value hierarchy; (2) the policy for timing of transfers between levels; (3) the valuation processes for Level 3 fair value measurements; and (4) for non-public entities, the changes in unrealized gains and losses for the period included in earnings for recurring Level 3 fair value measurements held at the end of the reporting period. The ASU also modifies disclosure requirements such that (1) in place of a rollforward for Level 3 fair value measurements, a non-public entity is required to disclose transfers into and out of Level 3 of the fair value hierarchy and purchases and issues of Level 3 assets and liabilities; (2) for investments in certain entities that calculate net asset value, an entity is required to disclose

the timing of liquidation of an investee's assets and the date that restrictions from redemption might lapse, only if the investee has communicated the timing to the entity or announced the timing publicly; and (3) it is clear that the measurement uncertainty disclosure is to communicate information about the uncertainty in measurement as of the reporting date. Additionally, the ASU adds disclosure requirements for public entities about (1) the changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 fair value measurements held at the end of the reporting period, and (2) the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements. The amendments are effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2019. The amendments regarding changes in unrealized gains and losses, the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements, and the narrative description of measurement uncertainty should be applied prospectively for only the most recent interim or annual period presented in the initial fiscal year of adoption. All other amendments should be applied retrospectively to all periods presented upon their effective date. Note that early application is permitted for all entities; moreover, an entity is allowed to early adopt any removed or modified disclosures upon issuance of this ASU and delay adoption of the additional disclosures until their effective date. We are currently evaluating when we will adopt this standard as well as its effect on our condensed consolidated financial statements.

As part of its disclosure framework project, the FASB has issued ASU 2018-14, Compensation—Retirement Benefits—Defined Benefit Plans—General (Subtopic 715-20): Disclosure Framework—Changes to the Disclosure Requirements for Defined Benefit Plans, which finalizes Proposed ASU 2016-210 of the same name. The amendments in this ASU modify the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. Specifically, certain disclosure requirements are removed from Subtopic 715-20, Compensation—Retirement Benefits—Defined Benefit Plans—General, including, among others, (1) the amounts in accumulated other comprehensive income expected to be recognized as components of net periodic benefit cost over the next fiscal year; (2) the disclosures related to the June 2001 amendments to the Japanese Welfare Pension Insurance Law; and (3) related party disclosures concerning the amount of future annual benefits covered by insurance and annuity contracts and significant transactions between the employer or related parties and the plan. Certain other disclosure requirements are added to Subtopic 715-20, including (1) the weighted-average interest crediting rates for cash balance plans and other plans with promised interest crediting rates; and (2) an explanation of the reasons for significant gains and losses related to changes in the benefit obligation for the period. Finally, the amendments in this ASU clarify disclosure requirements in Paragraph 715-20-50-3. The amendments are effective for fiscal years ending after December 15, 2020. We are currently evaluating the effect on our condensed consolidated financial statements.

The FASB has issued ASU 2018-15, Intangibles—Goodwill and Other—Internal-Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract (a consensus of the FASB Emerging Issues Task Force), which finalizes Proposed ASU No. 2018-230, and aims to reduce complexity in the accounting for costs of implementing a cloud computing service arrangement. In fact, ASU 2018-15 aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). Accordingly, the amendments in this ASU require an entity (customer) in a hosting arrangement that is a service contract to follow the guidance in Subtopic 350-40, Intangibles—Goodwill and Other—Internal-Use Software, in order to determine which implementation costs to capitalize as an asset related to the service contract and which costs to expense. Costs to develop or obtain internal-use software that cannot be capitalized under Subtopic 350-40 (e.g., training costs and certain data conversion costs) also cannot be capitalized for a hosting arrangement that is a service contract. Additionally, the amendments in this ASU require the entity (customer) to expense the capitalized implementation costs of a hosting arrangement that is a service contract over the term of the hosting arrangement (i.e., the noncancellable period of the arrangement plus periods covered by (1) an option to extend the arrangement if the customer is reasonably certain to exercise that option, (2) an option to terminate the arrangement if the customer is

reasonably certain not to exercise the termination option, and (3) an option to extend (or not to terminate) the arrangement in which exercise of the option is in the control of the vendor. The amendments in this ASU also require the entity to present the expense related to the capitalized implementation costs in the same line item in the statement of income as the fees associated with the hosting element (service) of the arrangement, and to classify payments for capitalized implementation costs in the statement of cash flows in the same manner as payments made for fees associated with the hosting element. Note that the accounting for the service element of a hosting arrangement that is a service contract is not affected by the amendments in this ASU. The amendments are effective for fiscal years beginning after December 15, 2019, and for interim periods within those fiscal years. We are currently evaluating methods of adoption as well as the effect on our condensed consolidated financial statements.

The FASB has issued ASU 2018-02, Income Statement—Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income, which finalizes Proposed ASU No. 2018-210 of the same name, and help organizations reclassify certain stranded income tax effects in accumulated other comprehensive income resulting from the Tax Cuts and Jobs Act of 2017 (TCJA), enacted on December 22, 2017. Specifically, this ASU allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from the TCJA, eliminating

the stranded tax effects resulting from the TCJA, and improving the usefulness of information reported to financial statement users. Because the amendments only relate to the reclassification of the income tax effects of the TCJA, the underlying guidance that requires that the effect of a change in tax laws or rates be included in income from continuing operations is not affected. Additionally it requires financial statement preparers to disclose (1) a description of their accounting policy for releasing income tax effects from accumulated other comprehensive income, (2) whether they elect to reclassify the stranded income tax effects from the TCJA, and (3) information about other income tax effects related to the application of the TCJA that are reclassified from accumulated other comprehensive income to retained earnings, if any. The amendments are effective for annual periods, and for interim periods within those annual periods, beginning after December 15, 2018. Early adoption is permitted, including adoption in any interim period, for reporting periods for which financial statements have not yet been issued. We do not expect the adoption of this ASU to have a material effect on our condensed consolidated financial statements.

The FASB has issued ASU 2017-04, Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment, which simplifies the manner in which an entity determines the amount of a goodwill impairment by eliminating Step 2 from the goodwill impairment test. Step 2 measures a goodwill impairment loss by comparing the implied fair value of a reporting unit's goodwill with the carrying amount of that goodwill. In computing the implied fair value of goodwill under Step 2, an entity, prior to the amendments in ASU 2017-04, had to perform procedures to determine the fair value at the impairment testing date of its assets and liabilities, including unrecognized assets and liabilities, in accordance with the procedure that would be required in determining the fair value of assets acquired and liabilities assumed in a business combination. Under the amendments in this ASU, an entity should (1) perform its annual or interim goodwill impairment test by comparing the fair value of a reporting unit with its carrying amount and (2) recognize an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, with the understanding that the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. Public entities should adopt the amendments in this ASU prospectively for their annual, or any interim periods, in fiscal years beginning after December 15, 2019. Early adoption is permitted for all entities for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. We will evaluate adopting when we perform our goodwill impairment test in 2018. We do not expect the adoption of this ASU to have a material effect on our condensed consolidated financial statements.

Other ASUs effective after September 30, 2018 are not expected to have a material effect on our condensed consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our exposure to market risk relates to changes in interest rates for borrowing under our revolving credit facility. At September 30, 2018, we had no outstanding balance on our revolving credit facility. Borrowings under our revolving credit facility bear interest at variable rates. A hypothetical 10% increase in interest rates would have a \$0.2 million effect on our interest expense for the nine months ended September 30, 2018.

We do not use derivative financial instruments for speculative or trading purposes. When we have excess cash, we invest in short-term, investment grade, interest-bearing securities. Our investments are made in accordance with an investment policy. Under this policy, no investment securities can have maturities exceeding six months and the weighted average maturity of the portfolio cannot exceed 60 days.

Item 4. Controls and Procedures

Management is responsible for establishing and maintaining adequate disclosure controls and procedures and internal control over financial reporting. Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in our reports filed or submitted under the Exchange Act, such as this Quarterly

Report on Form 10-Q, is accurately recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures are also designed to provide reasonable assurance that such information is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

It should be noted that a control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. As a result, our disclosure controls and procedures are designed to provide reasonable assurance that such disclosure controls and procedures will meet their objectives.

As of September 30, 2018, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer (our principal executive officer and principal financial officer, respectively), management evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 of the Exchange Act. Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective at the reasonable assurance level described above.

There were no changes in our internal control over financial reporting during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

We are subject to certain legal proceedings, government audits, investigations, claims and disputes that arise in the ordinary course of our business. Like most large government defense contractors, our contract costs are audited and reviewed on a continual basis by an in-house staff of auditors from the Defense Contract Audit Agency. In addition to these routine audits, we are subject from time-to-time to audits and investigations by other agencies of the U.S. government. These audits and investigations are conducted to determine if our performance and administration of our government contracts are compliant with contractual requirements and applicable federal statutes and regulations. An audit or investigation may result in a finding that our performance, systems and administration are compliant or, alternatively, may result in the government initiating proceedings against us or our employees, including administrative proceedings seeking repayment of monies, suspension and/or debarment from doing business with the U.S. government or a particular agency or civil or criminal proceedings seeking penalties and/or fines. Audits and investigations conducted by the U.S. government frequently span several years.

Although we cannot predict the outcome of these and other legal proceedings, investigations, claims and disputes, based on the information now available to us, we do not believe the ultimate resolution of these matters, either individually or in the aggregate, will have a material adverse effect on our business, prospects, financial condition or operating results.

Item 1A. Risk Factors

There have been no material changes from the risk factors described in the “Risk Factors” section of our Annual Report on the Form 10-K for the year ended December 31, 2017.

Item 6. Exhibits

Exhibits required by Item 601 of Regulation S-K:

Exhibit Description of Exhibit

31.1‡ Certification of Chief Executive Officer pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended.

31.2‡ Certification of Chief Financial Officer pursuant to Rule 13a-14(a) of the Securities Exchange Act of 1934, as amended.

32‡ Certification of Chief Executive Officer and Chief Financial Officer pursuant to Rule 13a-14(b) of the Securities Exchange Act of 1934, as amended.

The following materials from the ManTech International Corporation Quarterly Report on Form 10-Q for the quarter ended September 30, 2018, formatted in XBRL (eXtensible Business Reporting Language): (i) Condensed Consolidated Balance Sheets at September 30, 2018 and December 31, 2017; (ii) Condensed Consolidated Statements of Income for the Three and Nine Months Ended September 30, 2018 and 2017; (iii) 101 Condensed Consolidated Statements of Comprehensive Income for the Three and Nine Months Ended September 30, 2018 and 2017; (iv) Condensed Consolidated Statements of Changes in Stockholders' Equity for the Three and Nine Months Ended September 30, 2018 and 2017 (v) Condensed Consolidated Statements of Cash Flows for the Nine Months Ended September 30, 2018 and 2017; and (vi) Notes to Condensed Consolidated Financial Statements.

‡ Filed herewith.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
