Annual Report

October 31, 2002

Letter to Shareholders

December 13, 2002

Dear Shareholder,

We present this Annual Report which covers the activities of Aberdeen Australia Equity Fund, Inc. (the "Fund") for the year ended October 31, 2002. Included in this report is a review of the Australian economy and investment markets, together with an overview of the Fund's investments prepared by Aberdeen Asset Managers (C.I.) Limited (the "Investment Manager").

Quarterly Distribution Rate

A cash distribution for the current quarter of 2.5 cents per share was paid on October 11, 2002.

On March 14, 2002 the Board of Directors determined to discontinue the Fund's managed distribution policy, in order to better enable the Investment Manager to achieve the Fund's principal investment objective of long-term capital appreciation. It is the Board's intention that the quarterly distribution of 2.5 cents per share be maintained for 12 months beginning with the April 12, 2002 distribution payment. This policy is subject to regular review at the Board's quarterly meetings. The next review is scheduled to take place in March 2003.

On an annual basis, the Fund intends to distribute its net realized capital gains, if any, by way of a final distribution to be declared during the calendar quarter ending December 31, 2002.

Net Asset Value Performance

For the twelve months ended October 31, 2002, the Fund's total return based on NAV was 19.0% after expenses (assuming reinvestment of distributions) compared with 6.9%, in U.S. dollar terms, for the S&P/ASX 200 Accumulation Index.

Share Price Performance

The Fund's share price rose 8.3% over the year, from \$5.29 on October 31, 2001 to \$5.73 on October 31, 2002. The Fund's share price on October 31, 2002 represented a discount of 16.2% to the NAV per share of \$6.84 on that date. On October 31, 2001, the discount to NAV was 11.4%. At the date of this report the share price was \$5.99, representing a discount of 11.3% to the NAV of \$6.75.

Buy-Back Program

On March 19, 2001 the Fund announced the approval of a share buy-back program. Purchases of shares under this program commenced on June 6, 2001 and as of the date of this report 370,700 shares have been repurchased and cancelled.

Chairman and President

All amounts are U.S. dollars unless otherwise stated.

3

Your Board's policy is to provide investors with a stable quarterly distribution out of current income, supplemented by realized capital gains and, to the extent necessary, paid-in capital.

The Fund is subject to U.S. corporate, tax and securities laws. Under U.S. tax accounting rules, the amount of distributable income for each fiscal period depends on the actual exchange rates during the entire year between the U.S. dollar and the currencies in which Fund assets are denominated and on the aggregate gains and losses realized by the Fund during the entire year.

Therefore, the exact amount of distributable income for each fiscal year can only be determined as of the end of the Fund's fiscal year, October 31. However, under the U.S. Investment Company Act of 1940, the Fund is required to indicate the source of each distribution to shareholders.

This estimated distribution composition may vary from quarter to quarter because it may be materially impacted by future realized gains and losses on securities and fluctuations in the value of the currencies in which Fund assets are denominated.

The distributions for the fiscal year ended October 31, 2002 were comprised of \$0.15 per share of net investment income and \$0.07 per

share of realized long-term capital gains.

In January 2003, a Form 1099 DIV will be sent to shareholders, which will state the amount and composition of distributions and provide information with respect to their appropriate tax treatment.

4

Dividend Reinvestment and Cash Purchase Plan

We invite you to participate in the Fund's Dividend Reinvestment and Cash Purchase Plan ("the Plan"), which allows you to automatically reinvest your distributions in shares of the Fund's common stock at favorable commission rates. Distributions made under the Plan are taxable to the same extent as are cash distributions. The Plan also enables you to make additional cash investments in shares of at least \$100 per month. Under this arrangement EquiServe Trust Company, N.A. (the "Plan Agent") will purchase shares for you on the stock exchange or otherwise on the open market on or about the 15th of each month, unless shares of the Fund are trading at a premium, in which case the Fund will issue additional shares.

As a Participant in the Plan, you will have the convenience of:

Automatic reinvestment - the Plan Agent will automatically reinvest your distributions, allowing you to gradually grow your holdings in the Fund;

Lower costs - shares are purchased on your behalf under the Plan at low brokerage rates. Brokerage on share purchases is currently 2 cents per share;

Convenience - the Plan Agent will hold your shares in non-certificated form and will provide a detailed record of your holdings at the end of each distribution period.

To request a brochure containing information on the Plan, together with an authorization form, please contact the Plan Agent, EquiServe Trust Company, N.A., P.O. Box 43011, Providence, RI 02940-3011 or toll free on 1-800-451-6788.

Report of the Investment Manager

Investment Strategy

The Investment Manager remains stock selective and value focused in investments, preferring companies with good quality management, solid cash flows and strong balance sheets. The bottom-up stock selection process has led to a portfolio with underweight positions in media, transport, health and biotech, while defensive sectors such as gaming, utilities and alcohol are well represented. The Fund's current stock holdings provide a defensive and domestic nature to the portfolio, which the Investment Manager believes to be appropriate in the current environment. Financial stocks within the portfolio contributed positively to performance and benefited from a strong weighting in QBE Insurance Group which was the best contributing stock over the quarter. Utilities significantly out-performed the overall index over the quarter and the Fund gained from its

Edgar Filing: ABERDEEN AUSTRALIA EQUITY FUND INC - Form N-30D

overweight position in this sector. The overweight position in Consumer Staples and the zero holding in Health Care also had a positive asset allocation effect. Materials and Telecommunications also produced gains. Of particular note were the contributions made by Telecom Corporation of New Zealand and Iluka Resources. The Fund's holding in Woodside Petroleum had a negative impact on performance.

Portfolio Composition

The following chart summarizes the composition of the Fund's portfolio, expressed as a percentage of net assets. On October 31, 2002 the Fund held 95.2% of its assets in equities and 4.8% in short-term investments (including other assets in excess of liabilities).

The joint venture arrangements will create a new branded wine from Stellenbosch Vineyards, which will be marketed in Europe through BRL's sales and marketing network. The Group announced results for the six months ended June 30, 2002 with a 29% increase in net profit before tax from \$24 million to \$31 million. Cost controls have come through outsourcing non-core operations and investment in e-commerce in order to improve efficiencies.

The Fund may invest between 25% and 35% of its total assets in the securities of any one industry group if, at the time of the investment, that industry group represents 20% or more of the S&P/ASX 200 Accumulation Index.

As of October 31, 2002, the Fund did not have more than 25% of its assets invested in any industry group.

9

Market Review and Outlook

Economy

The Australian economy is currently in its eleventh year of expansion. Recent economic data indicated that the economy's annual growth rate was 3.8% in the second quarter of 2002. This result was underpinned by strong consumer demand, with retail sales 8% higher than the second quarter of 2001, and a strong housing sector, with building approvals recently pulling back from 8 year highs. In the labor market, employment growth is currently running at an annual rate of 2% and the unemployment level has dropped to a 12-month low of 6.2%. Business conditions improved throughout 2002 to reach their highest levels since late 1999, reflecting better profitability and employment and trading conditions at 2-year highs. Business confidence has also strengthened in the face of weaker equity markets

Edgar Filing: ABERDEEN AUSTRALIA EQUITY FUND INC - Form N-30D

and threats of war. Following two 0.25% tightenings earlier in 2002, the Reserve Bank of Australia (RBA) has opted to leave interest rates unchanged since June 2002, with its decisions likely to have been influenced by uncertainty about the strength of the global recovery, the threat of military action in Iraq and volatility in global equity markets. This has maintained Australian interest rates at historically low levels and an accommodative stance of monetary policy, although the RBA still retains a bias to raise interest rates further.

Stock Market

Following a strong first quarter of 2002 for equity markets, the second quarter saw a rise in investor uncertainty over the prospects for an economic recovery and the third quarter has seen the Australian share market record its second largest quarterly fall in ten years. This was principally driven by offshore factors, not least the crisis of confidence suffered in the U.S. following a series of bankruptcies and accounting scandals. Increasing concern over the possibility of a war with Iraq towards the end of the quarter also clouded global investor sentiment, economic forecasts and earnings outlooks.

10

Currency

The Australian dollar surged through the first half of 2002 before losing ground in July, with investors heading for the relative safety of the Euro and the U.S. dollar as the equity market fallout prompted renewed fears of a global recession. The Investment Manager's long-held view that the Australian dollar would appreciate towards 56 cents was achieved, and exceeded, in recent months as an ebbing of support for the U.S. dollar benefited peripheral currencies. The widening of the differential between Australian and U.S. interest rates continued throughout 2002, reaching levels not seen since the mid 1990s. This should remain a key source of support to the currency in the near term--particularly given the likelihood that an easing in U.S. interest rates will see the differential widen further - as will the relative strength of domestic fundamentals. The Investment Manager retains the view that a target of 60 cents is achievable over the next 12 months.

The Australian dollar rose during the year, closing at \$0.55 on October 31, 2002.

Notes to Financial Statements

Aberdeen Australia Equity Fund, Inc. (the 'Fund') is a closed-end, non-diversified management investment company incorporated in Maryland on September 30, 1985. The Fund's principal investment objective is long-term capital appreciation through investment primarily in equity securities of Australian companies listed on The Australian Stock Exchange. The Fund's secondary investment objective is current income. In order to comply with a rule adopted by the Securities and Exchange Commission under the Investment Company Act of 1940 regarding fund names, the Board of Directors has adopted an investment policy that, for as long as the name of the Fund remains Aberdeen Australia Equity Fund, Inc., it shall be the policy of the Fund normally to invest at least 80% of its net assets plus the amount of any borrowings for investment purposes, in equity securities, consisting of common stock, preferred stock and convertible stock, listed on The Australian Stock Exchange. This 80% investment policy is a non-fundamental policy of the Fund and may be changed by the Board of Directors upon 60 days prior written notice to shareholders. The ability of issuers of debt securities held by the Fund to meet their

Edgar Filing: ABERDEEN AUSTRALIA EQUITY FUND INC - Form N-30D

obligations may be affected by economic or political developments in a specific industry or region.

Note 1. Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements.

Basis of Presentation:

The financial statements of the Fund are prepared in accordance with accounting principles generally accepted in the United States of America using the United States dollar as both the functional and reporting currency.

Securities Valuation:

The Fund's Board of Directors has adopted Pricing and Valuation Procedures (the 'Procedures') to be used in determining the value of the assets held by the Fund. In accordance with the Procedures, investments are stated at value. Investments for which market quotations are readily available are valued at the last trade price on the date of determination as obtained from a pricing source. If no such trade price is available, such investments are valued at the quoted bid price or the mean between the quoted bid and asked price on the date of determination as obtained from a pricing source. Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities which mature in 60 days or less are valued at amortized cost. Securities for which

16 Aberdeen Australia Equity Fund, Inc.

Notes to Financial Statements (continued)

market quotations are not readily available are valued at fair value in good faith using methods set forth in the Procedures.

Repurchase Agreements:

In connection with transactions in repurchase agreements with United States financial institutions, it is the Fund's policy that its custodian or designated subcustodians under triparty repurchase agreements, as the case may be, take possession of the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to ensure the adequacy of the collateral. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

Foreign Currency Translation:

Australian dollar ('A\$') amounts are translated into United States dollars ('US\$') on the following basis:

(i) market value of investment securities, other assets and liabilities--at the exchange rates at the end of the reporting period; and

(ii) purchases and sales of investment securities, income and expenses--at the rate of exchange prevailing on the respective dates of such transactions. The Fund isolates that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of securities held at October 31, 2002. Similarly, the Fund isolates the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the reporting period.

Edgar Filing: ABERDEEN AUSTRALIA EQUITY FUND INC - Form N-30D

Net realized and unrealized foreign exchange gains (losses) include realized foreign exchange gains (losses) from sales and maturities of portfolio securities, sales of foreign currencies, currency gains (losses) realized between the trade and settlement dates on securities transactions, the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the United States dollar equivalent amounts actually received or paid and changes in unrealized foreign exchange gains (losses) in the value of portfolio securities and other assets and liabilities arising as a result of changes in the exchange rate. Accumulated net realized and unrealized foreign exchange gains (losses)

Aberdeen Australia Equity Fund, Inc. 17

Notes to Financial Statements (continued)

shown in the composition of net assets at October 31, 2002 represent foreign exchange gains (losses) for book purposes that have not yet been recognized for tax purposes.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin, including unanticipated movements in the value of the foreign currency relative to the United States dollar.

The exchange rate at October 31, 2002 was US\$0.55 to A\$1.00 for the Australian dollar.

Securities Transactions and Net Investment Income:

Securities transactions are recorded on the trade date. Realized and unrealized gains (losses) from security and currency transactions are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date and interest income is recorded on an accrual basis. Expenses are recorded on the accrual basis. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

Dividends and Distributions:

It is the Fund's current policy to pay quarterly distributions from net investment income, which may be supplemented by net realized capital gains and, to the extent necessary, return of paid-in capital, on a quarterly basis. On an annual basis, the Fund intends to distribute its net realized capital gains, if any, by way of a final distribution to be declared during the calendar quarter ending December 31. Dividends and distributions to shareholders are recorded on the ex-dividend date.

Income distributions and capital and currency gains distributions are determined in accordance with income tax regulations which may differ from accounting principles generally accepted in the United States of America. These differences are primarily due to differing treatments for foreign currencies.

Taxes:

For federal income and excise tax purposes, substantially all of the Fund's transactions are accounted for using the Australian dollar as the functional currency. Accordingly, only realized currency gains (losses) resulting from the repatriation of Australian dollars into United States dollars are recognized for tax purposes.

It is the Fund's policy to continue to meet the requirements of the United States Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable net income and capital gains, if any, to shareholders. Therefore, no provision for

United States income taxes is required. Australia imposes a withholding tax of 15% on certain dividends and 10% on certain interest.

Securities Lending:

The Fund may lend its portfolio securities to qualified institutions. The loans are secured by collateral in the form of other securities at least equal, at all times, to the market value of the securities loaned. The Fund may bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The Fund receives compensation for lending its securities in the form of fees or it retains a portion of interest on the investment of any cash received as collateral. The Fund also continues to receive dividends on the securities loaned and any gain (loss) in the market price of the securities loaned that may occur during the term of the loan will be for the account of the Fund.

Note 2. Agreements

Aberdeen Asset Managers (C.I.) Limited (the 'Investment Manager') serves as investment manager to the Fund and Aberdeen Asset Management Limited (the 'Investment Adviser') serves as investment adviser to the Fund pursuant to a management agreement and an advisory agreement, respectively. The Investment Manager and the Investment Adviser are wholly-owned subsidiaries of Aberdeen Asset Management PLC.

The Investment Manager makes investment decisions on behalf of the Fund on the basis of recommendations and information furnished to it by the Investment Adviser, including the selection of and the placement of orders with brokers and dealers to execute portfolio transactions on behalf of the Fund.

The management agreement provides the Investment Manager with a fee, computed weekly and payable monthly, at the following annual rates: 1.10% of the Fund's average weekly net assets up to \$50 million, 0.90% of such assets between \$50 million and \$100 million and 0.70% of such assets in excess of \$100 million. The Investment Manager pays fees to the Investment Adviser for its services rendered. The Investment Manager informed the Fund that it paid \$296,320 to the Investment Adviser during the year ended October 31, 2002.

Prudential Investments LLC (the 'Administrator') serves as administrator to the Fund pursuant to an agreement which provides the Administrator with a fee at the annual rate of the greater of \$25,000, or 0.05%, of the Fund's average weekly net assets.

Note 4. Distributions and Tax Information

Distributions to shareholders, which are determined in accordance with federal income tax regulations and which may differ from generally accepted accounting principles, are recorded on the ex-dividend date. In order to present undistributed net investment income (loss) and accumulated net realized gains (losses) on the Statement of Assets and Liabilities in a way that more closely represents their tax character, certain adjustments have been made to paid-in capital in excess of par, undistributed net investment income (loss) and accumulated net realized gains (losses) on investments.

For the year ended October 31, 2002, the Fund decreased undistributed net investment income by \$99,098, decreased accumulated net realized gain on investments by \$93,018, decreased accumulated realized and unrealized foreign exchange losses by \$157,374 and increased paid-in capital in excess of par by \$34,742. Net investment income, net realized gains and net assets were not affected by this change.

For the year ended October 31, 2002, the tax character of total dividends paid was \$2,602,055 of ordinary income and \$1,207,190 of long-term capital gains. The Fund utilized a capital loss carryforward of \$2,467,381.

As of October 31, 2002, the accumulated undistributed long-term gains on a tax basis were \$1,145,495.

Notes to Financial Statements (continued)

The United States federal income tax basis of the Fund's investments and the net unrealized appreciation as of October 31, 2002 were as follows:

Tax Basis	Appreciation	Depreciation	Net Unrealized Appreciation
\$108,306,499	\$12,706,151	\$(5,919,387)	\$6,786,764

The difference between book and tax basis is primarily attributable to deferred losses on wash sales.

 Dividends and Distributions (Unaudited)

We are required by the Internal Revenue Code to advise you within 60 days of the Fund's fiscal year end (October 31, 2002) as to the federal income tax status of dividends paid by the Fund during such fiscal year.

The Fund has elected to give the benefit of foreign tax credits to its shareholders. Accordingly, shareholders who must report their gross income dividends and distributions in a federal income tax return will be entitled to a foreign tax credit or an itemized deduction in computing their United States income tax liability. It is generally more advantageous to claim a credit rather than take a deduction. For the fiscal year ended October 31, 2002 the Fund intends on passing through approximately \$89,000 of ordinary income distributions as a foreign tax credit.

Dividend Reinvestment and Cash Purchase Plan. Shareholders may elect to have all distributions of dividends and capital gains automatically reinvested in Fund shares pursuant to the Fund's Dividend Reinvestment and Cash Purchase Plan (the 'Plan'). Generally, shareholders who do not participate in the Plan will receive distributions in cash paid by check in United States dollars mailed directly to the shareholders of record (or if the shares are held in street or other nominee name, then to the nominee) by the custodian, as dividend disbursing agent. Shareholders who wish to participate in the Plan should contact the Fund at (800) 451-6788.

EquiServe Trust Company, N.A. (the 'Plan Agent') serves as agent for the shareholders in administering the Plan. Dividends and capital gains distributions payable to Plan participants will be promptly invested. If the Plan declares an income dividend or capital gains distribution payable in stock to shareholders who are not Plan participants, then Plan participants will receive that dividend or distribution in newly issued shares on identical terms and conditions.

In every other case Plan participants will receive shares on the following basis: If the market price of the Fund's common stock plus any brokerage commission is equal to or exceeds net asset value, Plan participants will receive newly issued shares valued at the greater of net asset value or 95% of current market price. If, on the other hand, the net asset value plus any brokerage commission exceeds the market price, the Plan Agent will buy shares in the open market. If the market price plus any applicable brokerage commission exceeds net asset value before the Plan Agent has completed its purchases, the Fund will issue new shares to complete the program. All reinvestments are in full and fractional shares carried to three decimal places.

There is no charge to participants for reinvesting dividends or capital gain distributions, except for certain brokerage commissions, as described below. The Plan Agent's fees for the handling of the reinvestment of dividends and distributions will be paid by the Fund. There will be no brokerage commissions charged with respect to shares issued directly by the Fund. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of dividends and distributions. The automatic reinvestment of dividends and distributions will not relieve participants of any federal income tax that may be payable on such dividends and distributions.

Aberdeen Australia Equity Fund, Inc. 27

Other Information (Unaudited) (continued)

The Plan also allows participants to make optional cash investments of at least \$100 in Fund shares as frequently as monthly through the Plan Agent on the open market. Participants must pay a service fee of \$0.75 for each investment and a pro rata share of the brokerage commissions.

Edgar Filing: ABERDEEN AUSTRALIA EQUITY FUND INC - Form N-30D

The Fund reserves the right to amend or terminate the Plan either in full or partially upon 90 days' written or telephone notice to shareholders of the Fund. Participants in the Plan may withdraw some or all of their shares from the Plan upon written notice to the Plan Agent and will receive certificates for whole shares and cash for fractional shares. In the alternative, by giving proper notice to the Plan Agent, participants may receive cash in lieu of shares in an amount which is reduced by brokerage commissions in connection with the sale of shares and a \$2.50 service fee.

All correspondence concerning the Plan should be directed to the Plan Agent, EquiServe Trust Company, N.A., P.O. Box 43011, Providence, RI 02940-3011. 28 Aberdeen Australia Equity Fund, Inc.
