RADA ELECTRONIC INDUSTRIES LTD. AND ITS SUBSIDIARY
NOTES TO CONSOLIDATED STATEMENTS

U.S. dollars in thousands

NOTE 1:- GENERAL

- a. RADA Electronic Industries Ltd., an Israeli corporation (the "Company") is engaged in the development, manufacturing and sale of Automated Test Equipment ("ATE") products, avionics equipment and aviation data acquisition and debriefing systems.
- b. The Company operates a test and repair shop using its ATE products in Beijing, China through its 80% owned Chinese subsidiary, Beijing Huari Aircraft Components Maintenance and Services Co. Ltd. ("CACS" or "subsidiary"). CACS was established with a third party, which owns the remaining 20% equity interest.
- c. On February 13, 2005, the Company purchased certain assets and assumed certain liabilities related to the operations of Vectop Limited ("Vectop") in order to increase its customer base. Vectop is an Israeli company specializing in the design, development, marketing and sale of electro-optic equipment and debriefing systems. Vectop's assets also include know-how, patents and intellectual property to produce off-the-shelf products such as cameras and video recorders, which are currently operational onboard aircraft and tanks in Israel and other countries. The Company purchased Vectop's net assets for \$ 381 in cash and additional future royalties based on revenues derived from Vectop projects five years from the date of the agreement up to \$ 500.

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES

The Company's unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States.. The significant policies followed in the preparation of the condensed consolidated financial statements,

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

applied on a consistent basis are as follows:

a. Use of estimates:

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from those estimates.

b. Unaudited information:

The consolidated financial statements include the unaudited consolidated balance sheet as of June 30, 2006, the related unaudited consolidated statements of operations for the three and six months ended June 30, 2006 and 2005, unaudited statement of changes in shareholders' equity for the six month ended June 30, 2006 and cash flows for the six-month periods ended June 30, 2006 and 2005 presented in accordance with accounting principles generally accepted for interim financial reporting. This unaudited information has been prepared by the Company on the same basis as the audited annual consolidated financial statements and, in management's opinion, reflects all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation of the financial information, for the periods presented. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for audited financial statements. Results for interim periods are not necessarily indicative of the results expected for the entire year.

6

RADA ELECTRONIC INDUSTRIES LTD. AND ITS SUBSIDIARY
NOTES TO CONSOLIDATED STATEMENTS

U.S. dollars in thousands

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES (Cont.)

c. Share based compensation:

Effective January 1, 2006, the Company adopted FASB Statement No. 123 (revised 2004), "Share-Based Payment" ("SFAS 123(R)"), and related Securities and Exchange Commission rules included in Staff Accounting Bulletin No. 107, on a modified prospective basis. Under this method, compensation cost recognized beginning January 1, 2006 will include costs related to 1) all share-based payments (stock options and restricted stock awards) granted prior to but not yet vested as of January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of FAS 123, "Accounting for Stock-Based Compensation" ("SFAS 123"), and 2) all share-based payments granted subsequent to December 31, 2005 based on the grant-date fair value estimated in accordance with the provisions of SFAS 123(R). Compensation cost for stock options is generally recognized ratably over the vesting period.

The Company had unvested options granted to employees upon its

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

adoption of SFAS 123(R) on January 1, 2006 and did not grant any options during the six months ended June 30, 2006. The impact of the adoption of SFAS 123(R) on January 1, 2006 was an increase of approximately \$ 37 thousands on the Company's net loss for the six months ended June 30, 2006 as compared to if the Company had continued to account for share-based compensation under APB 25.

Prior to the adoption of SFAS 123(R), the Company applied SFAS 123, amended by SFAS 148, "Accounting for Stock-Based Compensation -- Transition and Disclosure," which allowed companies to apply the existing accounting rules under APB 25, "Accounting for Stock Issued to Employees," and related Interpretations. In general, as the exercise price of options granted under these plans was equal to the market price of the underlying common stock on the grant date, no stock-based employee compensation cost was recognized in the net loss attributed to common stockholders for periods prior to the adoption of SFAS 123(R).

The following table illustrates the effect on net loss and net loss per share, assuming that the Company had applied the fair value recognition provisions of SFAS No. 123 on its stock-based employee compensation:

	Six months ended June 30, 2006	Year ended December 31, 2005
	(Unaudited)	(Audited)
Net loss as reported	\$ (586)	\$ (2,329)
Deduct: Total stock-based employee compensation expense under fair value based methods	(36)	(136)
Pro forma net loss	\$ (622)	\$ (2,465)
Basic and diluted net loss per share:		
Basic and diluted net loss per share as reported	\$ (0.03)	\$ (0.10)
Pro forma Basic and diluted net loss per share	\$ (0.03)	\$ (0.11)

	=====	=====

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

NOTE 5:- GEOGRAPHIC INFORMATION

a. In accordance with Statement of Financial Accounting Standards No. 131 "Disclosures About Segments of an Enterprise and Related Information", the Company is organized and operates as one business segment, which develops, manufactures and sells ATE products, avionics equipment and aviation data acquisition and debriefing systems.

b. Revenues by geographic areas:

Revenues are attributed to geographic area based on the location of the end customers as follows:

9

Management's Discussion and Analysis of Financial Condition ----- and Results of Operations -----

This information should be read in conjunction with the condensed consolidated financial statements and notes included in Item 1 of Part I of this Quarterly Report and the audited financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2005 contained in our 2005 Annual Report on Form 20-F. The discussion and analysis which follows may contain trend analysis and other forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 which reflect our current views with respect to future events and financial results. These include statements regarding our earnings, projected growth and forecasts, and similar matters that are not historical facts.

We remind shareholders that forward-looking statements are merely

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

predictions and therefore are inherently subject to uncertainties and other factors that could cause the future results to differ materially from those described in the forward-looking statements.

Overview

We develop, manufacture and sell automated test equipment, avionics products and ground debriefing systems and provide manufacturing services for military and commercial use, mainly in Israel, the U.S. and Europe. We also provide test and repair services using our CATS(TM) testers and test program sets through our Chinese subsidiary.

Discussion of Critical Accounting Policies and Estimations

Our critical accounting policies, including the assumptions and judgments underlying them, are disclosed in the notes to our consolidated financial statements. These policies have been consistently applied in all material respects. While the estimates and judgments associated with the application of these policies may be affected by different assumptions or conditions, we believe the estimates and judgments associated with the reported amounts are appropriate in the circumstances.

The significant accounting policies listed in Note 2 of our consolidated financial statements that we believe are the most critical to aid in fully understanding and evaluating our financial condition and results of our operations under generally accepted accounting principles are discussed below.

Intangible Assets. Costs of producing our TPS software library, which can be integrated with our CATS test station, incurred subsequent to achieving technological feasibility, were capitalized, and are amortized by the greater of the amount computed using the: (i) ratio that current gross revenues from sales of the software to the total of current and anticipated future gross revenues from sales of that software, or (ii) the straight-line method over the estimated useful life of the software. We assess the recoverability of these intangible assets at each balance sheet date by determining whether the amortization of the asset over its remaining life can be recovered through undiscounted future operating cash flows from the specific software products sold. The use of different assumptions with respect to the expected cash flows from our assets and other economic variables may lead to different conclusions regarding the recoverability of

10

our assets' carrying values and to the potential need to record an impairment loss for our intangible assets. An intangible asset related to customer relationships has been recorded as a result of our acquisition of certain assets and liabilities of Vectop in February 2005 and is being amortized using a straight line basis over the expected useful life of five years. For the six months period ended June 30, 2006, no impairment was required.

Impairment of Long-Lived Assets. We are required to assess the impairment of long-lived assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable. We assess the impairment of our assets based on a number of factors, including any significant changes in the manner of our use of the respective assets or the strategy of our overall business and significant negative industry or economic trends. Upon determination that the carrying value of a long-lived asset may not be recoverable, based upon a comparison of expected undiscounted future cash flows

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

to the carrying amount of the asset, an impairment charge is recorded in the amount the carrying value of the asset exceeds its fair value. Using different assumptions with respect to the recoverability of our long-lived assets, our determination may be different, which may negatively affect our financial position and results of operations. For the six months period ended June 30, 2006, no impairment was required.

Share-Based Compensation. We account for employee share based compensation using fair value-based method. Under this method, compensation cost recognized beginning January 1, 2006 will include costs related to (i) all share-based payments granted prior to but not yet vested as of January 1, 2006, and (ii) all share-based payments granted subsequent to December 31, 2005 based on the grant-date fair value estimated. Compensation cost for stock options is generally recognized ratably over the vesting period.

Revenue Recognition. Our revenues are mainly derived from sales of ATE and avionics products and from long-term fixed price contracts for ATE, avionics and ground debriefing systems. In addition, we lease ATE and provide manufacturing, development and product support services. Product revenue is recognized when there is persuasive evidence of an arrangement, the fee is fixed or determinable, delivery of the product to the customer has occurred and the collection of the fee is probable. If the product requires specific customer acceptance, revenue is deferred until customer acceptance occurs or the acceptance provisions lapse.

Revenues from long-term fixed price contracts are recognized by the percentage-of-completion method in accordance with the "Input Method." We apply this method when the total of the costs and revenues of the contract can reasonably be estimated. The percentage of completion is determined based on the ratio of actual costs incurred to total costs estimated to be incurred over the duration of the contract. With regard to contracts for which a loss is anticipated, a provision is made for the entire amount of the estimated loss at the time such loss becomes evident. Estimated gross profit or loss from long-term contracts may change due to changes in estimates resulting from differences between actual performance and original forecasts. Such changes in estimated gross profit or loss are recorded in results of operations when they are reasonably determined by management on a cumulative catch-up basis.

Revenues from services are recognized when the service is performed.

11

Revenue under operating leases of equipment are recognized ratably over the lease period.

Revenues from certain arrangements may include multiple elements within a single contract. Generally our arrangements are accounted for as one unit of accounting since there is no objective and reliable evidence of fair value of the undelivered elements in the contract. When the undelivered elements are not essential to the functionality of the delivered elements, revenues are recognized for the delivered elements when the respective fee is payable and non-contingent, and all other revenue recognition criteria are met.

Revenues from software arrangements are recognized when persuasive evidence of an arrangement exists, delivery of the product has occurred, the fee is fixed or determinable, and collectability is probable. Arrangements with payment terms extending beyond customary payment terms are considered not to be fixed or determinable. If the fee is considered not to be fixed or determinable,

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

revenue is deferred and recognized when payments become due from the customer or are actually collected when collectability is not probable, providing that all other revenue recognition criteria have been met.

Provision for Litigation. We have an outstanding balance of loans due to us from our former chief executive officer and a former officer. Both officers claim that they are not obliged to repay the loans. We are engaged in legal actions with our former officers concerning, among other things, the repayment of the loans. According to our legal consultants, we have a strong case with regard to our claims for repayment of the outstanding loans. We recorded a provision for the loans receivable in the amount that we believe is sufficient to reflect the recoverability of the asset, based on management's estimation. In addition, we have several additional legal proceedings outstanding. We have recorded provisions for litigation for claims that were estimable and for which there is a high probability that we will be held responsible based on our legal consultants' opinions and management's estimations. If our estimations are wrong, we may incur additional litigation expenses.

Fair Value of Warrants. In July 2004, we consummated a private placement, whereby we issued 1,800,000 shares, an aggregate of \$3 million principal amount of convertible notes and warrants (including additional investment rights) to purchase an aggregate of 2,037,500 ordinary shares to investors for a total consideration of \$5.7 million, net of issuance expenses. The consideration was allocated based on the respective fair values of the ordinary shares, notes, warrants and additional investment rights. The fair value of the warrants and the additional investment rights was based on a valuation prepared by an independent, valuation expert using the Black-Scholes pricing model. The valuation result was judged to be reasonable by our management based on comparisons to benchmarks in similar circumstances.

Significant Expenses

Cost of Revenues. Cost of revenues consist primarily of manufacturing costs, depreciation of fixed assets, project development costs, impairment losses on long-lived assets and amortization of capitalized software and customer relationship assets and inventory write-downs.

12

Marketing, Selling, General and Administrative Expenses. Marketing and selling expenses consist primarily of expenses for sales and marketing personnel, sales commissions, marketing activities, public relations, promotional materials, travel expenses and trade show exhibit expenses. General and administrative expenses consist primarily of salaries and related expenses for executive, accounting, administrative personnel, professional fees, provisions for doubtful accounts, and other general corporate expenses.

Financial Income (Expenses), Net. Financial expenses consist of interest and bank expenses, interest on convertible note, amortization of discount on convertible note and currency re-measurement losses. Financial income consists of interest on cash and cash equivalent balances, currency re-measurement gains and gain on restructuring of debt.

Six Months Ended June 30, 2006 Compared with Six Months Ended June 30, 2005

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

Revenues. Revenues decreased by 30% to \$4.6 million, in the six month ended June 30, 2006 from \$6.6 million in the six months ended June 30, 2005. Programs that were expected to commence in the first half of the year were delayed and are expected to take place in the second half of 2006. Accordingly, we expect an increase in revenues in the second half of 2006.

Cost of Revenues. Cost of revenues increased by 2% to \$5.5 million in the six months ended June 30, 2006 from \$5.4 million in the six months ended June 30, 2005. We expect that our cost of revenues as a percentage of revenues will decrease in the second half of the year. as a result of a higher proportion of our revenues being attributable to off-the-shelf products and a more efficient utilization of our workforce.

Gross Profit (Loss). We incurred a loss of approximately \$0.9 million in the six months ended June 30, 2005 as compared to a profit of \$1.2 million in the six months ended June 30, 2005. The decrease in gross profit is due to reduction in sales as well as the mix between the traditional products that the company sells and the newer lower margin products which we are developing with our customers.

Marketing, Selling, General and Administrative Expenses. Marketing, selling, general and administrative expenses decreased by 20% to \$1.2 million in the six months ended June 30, 2006 from \$1.5 million in the six months ended June 30, 2005. The decrease in marketing and selling expenses is mainly attributable to changes in the timing of avionic exhibitions. The decrease in general and administrative expenses is mainly attributable to our continued costs savings measures.

Financial Expenses, Net. Our financial expenses, net were \$347,000 in the six months ended June 30, 2006 compared to \$297,000 in the six months ended June 30, 2005. The increase in our financial expenses was mainly due to higher interest payable on the \$3 million of convertible notes issued in 2004.

13

Liquidity and Capital Resources

At June 30, 2006, we had working capital of \$1.8 million and cash and cash equivalents of \$1.3 million. As of June 30, 2006, we had short term debt owed to our banks of \$943,000.

We had capital expenditures of \$63,000 in the six months ended June 30, 2006, but we currently do not have any significant capital spending or purchase commitments.

Net cash provided by operating activities was \$0.9 million in the six months ended June 30, 2006. This was attributable primarily to our loss of \$2.5 million, a net increase in inventories of \$266,000, and a \$165,000 increase in other receivables; offset by a decrease in trade receivables of \$2.9 million, a \$196,000 decrease in trade payables, and depreciation and amortization of \$685,000. Net cash used in operating activities was \$4.1 million in the six months ended June 30, 2005. This was attributable primarily to our loss of \$586,000, a net increase in trade receivables of \$1.5 million, a \$638,000 increase in inventories, a \$600,000 decrease in trade payables, an increase in costs and estimated earnings in excess of billings of \$296,000, and a \$404,000 decrease in deferred revenues, offset by depreciation and amortization of

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

\$654,000.

Net cash used in investing activities was approximately \$100,000 in the six months ended June 30, 2006, and approximately \$600,000 in the six months ended June 30, 2005. In 2006, we invested \$63,000 in equipment. In 2005, we purchased net assets of \$129,000, invested \$282,000 in plant and equipment and invested \$210,000 in long-term restricted cash.

Net cash provided by financing activities was \$0.1 million in the six months ended June 30, 2006. This amount was principally in respect of short-term bank credits. Net cash provided by financing activities was \$3.7 million in the six months ended June 30, 2005. This amount was principally in respect of proceeds of \$2.8 million from issuance of shares and warrants and from the exercise of warrants and a \$ 700,000 long-term loan received from the bank.

As of June 30, 2006, there were 16,670,779 warrants outstanding to purchase ordinary shares. Of such warrants, 13,667,345 warrants have an exercise price of \$2.00 per share, 2,065,934 warrants have an exercise price of \$2.10 per share and 937,500 warrants have an exercise price of \$2.50 per share. To the extent any warrants are exercised, the proceeds will be added to our working capital.

Off-Balance Sheet Arrangements

We are not a party to any material off-balance sheet arrangements. In addition, we have no unconsolidated special purpose financing or partnership entities that are likely to create material contingent obligations.

14

Tabular Disclosure of Contractual Obligations

The following table summarizes our minimum contractual obligations and commercial commitments, as of June 30, 2006 and the effect we expect them to have on our liquidity and cash flow in future periods.

Contractual Obligations	Payments due by Period			
	Total	Less than 1 year	1-3 Years	3-5 Y
Long-term debt obligations	\$3,109,000	\$437,000	\$2,672,000	-
Operating lease obligations.....	\$1,026,000	\$576,000	\$653,000	-
Total.....	\$4,148,000	\$1,519,000	\$3,325,000	-

In addition, we have long-term liabilities for severance pay that is calculated pursuant to Israeli severance pay law generally based on the most recent salary of the employees multiplied by the number of years of employment, as of the balance sheet date. Employees are entitled to one month's salary for each year of employment or a portion thereof. As of June 30, 2006 our severance

Edgar Filing: RADA ELECTRONIC INDUSTRIES LTD - Form 6-K

pay liability was \$2.1 million.
