SOUTHERN MISSOURI BANCORP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1: [Basis of Presentation](#)

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-QSB and Rule 10-01 of Securities and Exchange Commission ("SEC") Regulation S-X. However, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all material adjustments (consisting only of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended March 31, 2004 are not necessarily indicative of the results that may be expected for the entire fiscal year. For additional information, refer to the Company's June 30, 2003 Form 10-KSB, which was filed with the SEC and the Company's annual report, which contains the audited consolidated financial statements for the fiscal years ended June 30, 2003 and 2002.

Stock Split

On September 26, 2003, the Company effected a two-for-one split of the Company's common stock in the form of a stock dividend of one additional share of Southern Missouri Bancorp, Inc. common stock for each share held. Share and per share data for all periods presented have been adjusted to give effect to the stock split.

Note 2: [Principles of Consolidation](#)

The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, SMBT. All significant intercompany accounts and transactions have been eliminated in consolidation.

Note 3: [Earnings Per Share](#)

Basic and diluted earnings per share are based upon the weighted-average shares outstanding for the three and nine month periods ended March 31, 2004 and 2003. ESOP shares that have been committed to be released are considered outstanding. The following table summarizes basic and diluted earnings per common share:

Three Months Ended		Nine Months Ended	
March 31,		March 31,	
2004	2003	2004	2003

Diluted earnings per common share	\$ 0.30	\$ 0.29	\$ 0.91	\$ 0.84

Note 4: Subordinated Debt

On March 4, 2004, the Corporation formed the Southern Missouri Statutory Trust I, a statutory trust formed under Connecticut (state) law ("SM Trust I"). On March 17, 2004, the SM Trust I issued 7,000 Fixed/Floating Rate capital Securities with a liquidation amount of \$1,000 per Capital Security in a private placement to an offshore entity for an aggregate offering price of \$7,000,000 and 217 Common Securities with a liquidation amount of \$1,000 per Common Security to the Corporation for \$217,000. The aggregate proceeds of \$7,217,000 were used by SM Trust I to purchase \$7,217,000 in Fixed/Floating Rate Junior Subordinated Deferrable Interest Debentures from the Corporation. The Debentures and the Common and Capital Securities have a term of 30 years, bear interest at the annual rate of the 3-Month Libor plus 2.75%, and reprice quarterly. The Corporation has guaranteed payment of amounts owed by the SM Trust I to holders of the Capital Securities. The proceeds of the offering will be used for general corporate purposes of the Corporation, including the purchase of the Corporation's shares from time to time.

PART I Item 2 Southern Missouri Bancorp, Inc. Management's Discussion and Analysis or Plan of Operation

General

The Company's performance is reliant on the operations of the Bank, since the Company has no significant assets other than the common stock of the Bank and \$7.5 million in investments and cash. The Bank's results of operations are primarily dependent on the difference (or "interest rate spread") between the average yield earned on its interest-earning assets and the average rate paid on interest-bearing liabilities. Interest-earning assets consist primarily of loans receivable, investment securities, mortgage-backed and related securities ("MBS") and other investments while interest bearing liabilities consist primarily of retail deposits, Federal Home Loan Bank ("FHLB") advances and securities sold under agreements to repurchase. The interest rate spread is affected by economic, regulatory, and competitive factors, which influence interest rates, loan demand, prepayment rates and deposit flows. The Company remains subject to interest-rate risk to the degree that its interest-earning assets mature or reprice at different times, or on a varying basis, from its interest-bearing liabilities.

The Company's results of operations are also affected by provisions for loan losses, non-interest income and non-interest expenses, such as employee salary and benefits, occupancy expenses and other operational expenditures. The following discussion reviews the Company's consolidated financial condition at March 31, 2004 and the results of operations for the three and nine month periods ended March 31, 2004 and 2003, respectively.

Forward Looking Statements

This document, including information incorporated by reference, contains forward-looking statements about the Company and its subsidiaries which we believe are within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, without limitation, statements with respect to anticipated future operating and financial performance, growth opportunities, interest rates, cost savings and funding advantages expected or anticipated to be realized by management. Words such as "may," "could," "should," "would,"

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10QSB

"believe," "anticipate," "estimate," "expect," "intend," "plan" and similar expressions are intended to identify these forward-looking statements. Forward-looking statements by the Company and its management are based on beliefs, plans, objectives, goals, expectations, anticipations, estimates and the intentions of management and are not guarantees of future performance. The Company disclaims any obligation to update or revise any forward-looking statements based on the occurrence of future events, the receipt of new information, or otherwise. The important factors we discuss below, as well as other factors discussed under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" and identified in our filings with the SEC and those presented elsewhere by our management from time to time, could cause actual results to differ materially from those indicated by the forward-looking statements made in this document:

- the strength of the United States economy in general and the strength of the local economies in which we conduct operations;
- the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Federal Reserve Board;
- inflation, interest rate, market and monetary fluctuations;
- the timely development of and acceptance of our new products and services and the perceived overall value of these products and services by users, including the features, pricing and quality compared to competitors' products and services;
- the willingness of users to substitute our products and services for products and services of our competitors;
- the impact of changes in financial services' laws and regulations (including laws concerning taxes, banking, securities and insurance);
- the impact of technological changes;
- acquisitions;
- changes in consumer spending and saving habits; and
- our success at managing the risks involved in the foregoing.

The Company disclaims any obligation to update or revise any forward-looking statements based on the occurrence of future events, the receipt of new information, or otherwise.

[Next Page](#)

Critical Accounting Policies

The Company has established various accounting policies, which govern the application of accounting principles generally accepted in the United States of America in the preparation of our financial statements. Our significant accounting policies are described in the footnotes to the Consolidated Financial Statements. Certain accounting policies involve significant judgments and assumptions by management that have a material impact on the carrying value of certain assets and liabilities; management considers such accounting policies to be critical accounting policies. The judgments and assumptions used by management are based on historical experience and other factors, which are believed to be reasonable under the circumstances. Because of the nature of the judgments and assumptions made by management, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of assets and liabilities and the results of operations of the Company.

The allowance for losses on loans represents management's best estimate of probable losses in the existing loan portfolio. The allowance for losses on loans is increased by the provision for losses on loans charged to expense and reduced by loans charged off, net of recoveries. The provision for losses on loans is determined based on management's assessment of several factors: reviews and evaluations of specific loans, changes in the nature and volume of the loan portfolio, current economic conditions and the related impact on specific borrowers and industry groups, historical loan loss experience, the level of classified and nonperforming loans and the results of regulatory examinations.

Integral to the methodology for determining the adequacy of the allowance for loan losses is portfolio segmentation and impairment measurement. Under the Company's methodology, loans are first segmented into 1) those comprising large groups of smaller-balance homogeneous loans, including single-family mortgages and installment loans, that are collectively evaluated for impairment and 2) all other loans that are individually evaluated. Those loans in the second category are further segmented utilizing a defined grading system which involves categorizing loans by severity of risk based on conditions that may affect the ability of the borrowers to repay their debt, such as current financial information, collateral valuations, historical payment experience, credit documentation, public information, and current trends. The loans subject to credit classification represent the portion of the portfolio subject to the greatest credit risk and where adjustments to the allowance for losses on loans as a result of provisions and charge-offs are most likely to have a significant impact on operations.

A periodic review of selected credits (based on loan size and type) is conducted to identify loans with heightened risk or probable losses and to assign risk grades. The primary responsibility for this review rests with the loan administration personnel. This review is supplemented with periodic examination of both selected credits and the credit review process by the applicable regulatory agencies and external auditors. The information from these reviews assists management in the timely identification of problems and potential problems and provides a basis for deciding whether the credit represents a probable loss or risk that should be recognized.

Loans are considered impaired if, based on current information and events, it is probable that Southern Missouri will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The measurement of impaired loans is generally based on the fair value of the collateral for collateral-dependent loans. If the loan is not collateral-dependent, the measurement of impairment is based on the present value of expected future cash flows discounted at the historical effective interest rate or the observable market price of the loan. In measuring the fair value of the collateral, management uses the assumptions (e.g., discount rates) and methodologies (e.g., comparison to the recent selling price of similar assets) consistent with those that would be utilized by unrelated third parties. Impairment identified through this evaluation process is a component of the allowance for loan losses. If a loan that is individually evaluated for impairment is found to have none, it is grouped together with loans having similar characteristics (e.g., the same risk grade), and an allowance for loan losses is based upon historical average charge-offs for similar loans over the past five years, the historical average charge-off rate for developing trends in the economy, in industries and other factors. For portfolio loans that are evaluated for impairment as part of homogenous pools, an allowance is maintained based upon the average charge-offs for the past five years. Management also applies judgement to alter slightly the historical average charge-off rate for developing trends in the economy and other factors.

Changes in the financial condition of individual borrowers, in economic conditions, in historical loss experience and in the conditions of the various markets in which collateral may be sold may all affect the required level of the allowance for losses on loans and the associated provision for losses on loans.

Financial Condition

The Company's total assets increased by \$21.8 million, or 7.8%, to \$301.2 million at March 31, 2004, as compared to \$279.5 million at June 30, 2003. Loans increased by \$18.0 million, or 8.1% to \$241.0 million due primarily to growth in commercial and residential loans of \$12.8 million and \$4.7 million, respectively. Asset growth has been funded primarily with increased deposits, the issuance of junior subordinated debt and securities sold under agreements to repurchase, which have increased \$12.1 million, \$7.2 million and \$2.2 million, respectively. In March 2004,

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10QSB

the Company issued \$7.0 million of Floating Rate Capital Securities of Southern Missouri Statutory Trust I with a liquidation value of \$1,000 per share. The securities are due in 30 years, redeemable after five years and bear interest at a floating rate based on three month LIBOR. The increase in deposits was primarily due to increased checking accounts and money market demand accounts of \$10.4 million and \$4.8 million, respectively, partially offset by a decrease in certificates of deposit of \$1.0 million.

9

Next Page

The Company's stockholders' equity increased \$1.4 million, or 5.7% to \$26.5 million from \$25.1 million at June 30, 2003. The increase was primarily due to net income for the nine month period, partially offset by cash dividends and stock repurchases. During the third quarter of fiscal 2004, the Company announced the completion of its latest stock repurchase plan. The Company repurchased the remaining 35,220 shares at an average price of \$15.30 per share. On April 22, 2004, the Company announced its intention to repurchase an additional 115,000 shares of its own common stock, or approximately 5% of its 2.3 million outstanding common shares.

Results of Operations - Comparison of the three and nine-month periods ended March 31, 2004 and 2003.

On September 26, 2003, the Company announced a two-for-one stock split of the Company's common stock. The stock split was in the form of a stock dividend of one additional share of the Company's common stock for each share held. Share and per share data for all periods presented have been adjusted to give effect to the stock split.

Net Income. The Company's net income for the three-month period ended March 31, 2004 was \$703,000 as compared to \$689,000 earned during the same period of the prior year. The increase recorded during the three-month period was primarily due to the increase in net interest income and non-interest income, partially offset by the increase in non-interest expense.

The Company's net income for the nine-month period ended March 31, 2004 was \$2.1 million as compared to \$2.0 million earned during the same period of the prior year. The increase recorded during the nine-month period was primarily due to increased non-interest income, partially offset by the decrease in net interest income and the increase in non-interest expense.

Net Interest Income. Net interest income increased \$49,000, or 2.1%, to \$2.3 million for the three-month period ended March 31, 2004 as compared to the same period of the prior year. The increase was primarily due to the spread earned on the incremental difference between the \$19.0 million increase in average interest-earning assets over the \$17.5 million increase in average interest-bearing liabilities, partially offset by the 12 basis point decrease in the average interest rate spread from 3.19% to 3.07% over the same period of the prior year.

Net interest income decreased \$189,000, or 2.7%, to \$6.9 million for the nine-month period ended March 31, 2004 as compared to the same period of the prior year. The decline was primarily due to the 23 basis point decrease in average interest rate spread, to 3.10% from 3.33% over the same period of the prior year, partially offset by incremental difference between the \$15.4 million increase in interest-earning assets and the \$15.6 million increase in interest-bearing liabilities. Average interest-earning assets excluded bank owned life insurance for the three and nine month periods ended March 31, 2004 and 2003.

The decrease in spread for the three and nine month periods was a result of interest-earning assets repricing downward at a faster pace than interest-bearing liabilities. In an interest rate comparison for the three and nine month periods, the Wall Street prime rate was lowered in November 2002 from 4.75% to 4.25% and again in June 2003 from 4.25% to 4.00%. Also, information from the Federal Reserve indicates the average six month CD rate in the secondary market for the three and nine month periods ended March 31, 2004 was 1.11% and 1.12%, respectively, as compared to 1.26% and 1.50% respectively, for the same periods of the prior year.

Interest Income. Interest income decreased \$70,000, or 1.7% to \$4.0 million for the three-month period ended March 31, 2004 as compared to the same period of the prior year. The decrease was primarily due to the 51 basis point decrease in the average yield earned on interest-earning assets, from 6.10% to 5.59%, partially offset by the \$19.0 million, or 7.2% increase in average interest-earning assets. Interest income decreased \$796,000, or 6.4% to \$11.7 million for the nine-month period ended March 31, 2004 as compared to the same period of the prior year. The decrease was primarily due to the 75 basis point decrease in the average yield earned on interest-earning assets, partially offset by the \$15.4 million, or 5.9% increase in average interest-earning assets.

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10QSB

The reduction in average yields during the three and nine month periods ended March 31, 2004 was primarily due to the general decline in market rates of interest. In addition, for the nine month period, the Company's mortgage-backed securities experienced accelerated prepayment rates due to the decline in market rate of interest requiring increased premium amortization during the first part of the nine month period. The increase in premium amortization contributed to the investment portfolio's yield declining from 3.96% to 2.91% for the nine month period.

Interest Expense. Interest expense decreased \$119,000, or 6.8% to \$1.6 million for the three-month period ended March 31, 2004, as compared to the same period of the prior year. The decrease was primarily due to the 38 basis point decrease in the average cost of interest-bearing liabilities, from 2.91% to 2.53%, partially offset by the \$17.5 million increase in average interest-bearing liabilities. Interest expense decreased \$607,000, or 11.2% to \$6.9 million for the nine-month period ended March 31, 2004, as compared to the same period of the prior year. The decrease was primarily due to the 52 basis point decrease in the average cost of interest-bearing liabilities, from 3.10% to 2.58%, partially offset by the \$15.6 million increase in average interest-bearing liabilities. The reduction in average costs was primarily due to the aforementioned general decline in market rates of interest.

10

[Next Page](#)

Provision for Loan Losses. The provision for loan losses for the three and nine month periods ended March 31, 2004 was \$60,000 and \$175,000, respectively, as compared to \$60,000 and \$270,000 for the same periods of the prior year. The decrease in the provision during the nine month period ended March 31, 2004 was primarily due to reduced delinquencies and a decline in adversely classified assets. (see "Allowances for Loan Loss Activity" and "Nonperforming Assets").

Non-interest Income. Non-interest income increased \$91,000 and \$475,000 to \$480,000 and \$1.4 million, respectively, for the three and nine month periods ended March 31, 2004, as compared to the same periods of the prior year. The 23.4% and 50.3% increases for the three and nine month periods were primarily due to the implementation of the overdraft privilege program in February 2003 which resulted in increased banking service charges, realized gain on the sale of an investment, structural changes in the assessment of fees charged to customers, increased cash surrender value on bank owned life insurance purchased in February 2003 and an expanded customer base.

Non-interest Expense. Non-interest expense increased \$142,000 and \$276,000, or 9.3% and 6.1%, to \$1.7 million and \$4.8 million, respectively, for the three and nine month period ended March 31, 2004, as compared to the same periods of the prior year. The 9.3% increase for the three month period was primarily due to a loss on the sale of real estate owned, increased compensation, legal and other expenses. The 6.1% increase for the nine month period was primarily due to a loss on the sale of real estate owned, and an increase in compensation and other expenses. Other expenses increased as a result of the increased customer base.

Provision for Income Taxes. The provision for income taxes for the three and nine month periods ended March 31, 2004 was \$377,000 and \$1.2 million as compared to \$393,000 and \$1.2 million for the same periods of the prior year. The effective tax rate decreased from 36.4% to 32.1% for the three-month period ended and decreased from 36.7% to 35.7% for the nine-month period ended March 31, 2004. The change in the effective tax rate was primarily due to the increased earnings on bank owned life insurance which is nontaxable.

Allowance for Loan Loss Activity

The Company regularly reviews its allowance for loan losses and makes adjustments to its balance based on management's analysis of the loan portfolio, the amount of non-performing and classified assets, as well as general economic conditions. Although the Company maintains its allowance for loan losses at a level that it considers sufficient to provide for losses, there can be no assurance that future losses will not exceed internal estimates. In addition, the amount of the allowance for loan losses is subject to review by regulatory agencies, which can order the establishment of additional loss provisions. The following table summarizes changes in the allowance for loan losses for the nine month periods ended March 31, 2004 and 2003:

	2004	2003
Balance, beginning of period	\$1,835,705	\$1,569,266

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10QSB

Loans charged off:		
Residential real estate	(22,922)	(17,935)
Commercial real estate	(9,304)	(155)
Commercial business	(224)	(19,862)
Consumer	(77,131)	(73,176)
	<hr/>	<hr/>
Gross loans charged off	(109,581)	(111,128)
	<hr/>	<hr/>
Recoveries of loans previously charged off:

	<hr/>	<hr/>
Balance, end of period	\$1,918,889	\$1,780,038
	<hr/>	<hr/>
Ratio of net charge offs during the period		
to average loans outstanding during the period	.04%	.03%

11

[Next Page](#)

The allowance for loan losses has been calculated based upon an evaluation of pertinent factors underlying the various types and quality of the Company's loans. Management considers such factors as the repayment status of a loan, the estimated net fair value of the underlying collateral, the borrower's intent and ability to repay the loan, local economic conditions, and the Company's historical loss ratios. The allowance for loan losses increased \$92,000 to \$1.9 million at March 31, 2004 from \$1.8 million at June 30, 2003. At March 31, 2004, the Company had \$3.0 million, or 1.01% of total assets adversely classified (substandard, doubtful, or loss) as compared to adversely classified assets of \$4.1 million, or 1.46% of assets at March 31, 2003. At March 31, 2004, the Company had classified \$3.0 million of its assets as substandard and \$27,000 as doubtful.

Nonperforming Assets

The ratio of nonperforming assets to total assets and net loans receivable is another measure of asset quality. Nonperforming assets of the Company include nonaccruing loans, accruing loans delinquent/past maturity 90 days or more and assets, which have been acquired as a result of foreclosure or deed-in-lieu of foreclosure. The following table summarizes changes in the Company's level of nonperforming assets as of the dates indicated:

Loans past maturity/delinquent 90 days or more	03/31/04	6/30/03	03/31/03
	<hr/>	<hr/>	<hr/>
Residential real estate	\$ 61,000	\$ 74,000	\$ 47,000
Commercial real estate	16,000	-	-
Commercial	-	8,000	-

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10QSB

Consumer	16,000	7,000	-
Total loans past maturity/delinquent 90 days or more	93,000	89,000	47,000
Foreclosed real estate or other real estate owned	167,000	217,000	346,000
Other repossessed assets	25,000	41,000	21,000
Total nonperforming assets	\$ 285,000	\$ 347,000	\$ 414,000
Percentage nonperforming assets to total assets	0.09%	0.12%	0.14%
Percentage nonperforming loans to net loans	0.04%	0.04%	0.02%

Asset and Liability Management and Market Risk

The goal of the Company's asset/liability management strategy is to manage the interest rate sensitivity of both interest-earning assets and interest-bearing liabilities in order to maximize net interest income without exposing the Company to an excessive level of interest-rate risk. The Company employs various strategies intended to manage the potential effect that changing interest rates may have on future operating results. The primary asset/liability management strategy has been to focus on matching the anticipated repricing intervals of interest-earning assets and interest-bearing liabilities. At times, however, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, the Company may determine to increase its interest rate risk position somewhat in order to maintain its net interest margin.

In an effort to manage the increased interest rate risk resulting from this fixed rate lending, the Bank has utilized long-term (up to 10 year maturities) FHLB advances, subject to early redemption, and has promoted long-term CDs to fund a portion of the fixed-rate residential loans originations and to extend the average maturity of the CD portfolio. Other elements of the Bank's current asset/liability strategy include: (i) increasing loans receivable through the origination of adjustable-rate residential loans, when available; (ii) increasing originations of commercial real estate and commercial business loans, which typically provide higher yields and shorter repricing periods, but inherently increased credit risk, (iii) expanding the consumer loan portfolio, (iv) limiting the price volatility of the investment portfolio by maintaining a weighted average maturity of less than five years, (v) actively soliciting less rate-sensitive deposits, and (vi) offering competitively priced money market accounts and CD's with maturities of up to five years. The degree to which each segment of the strategy is achieved will affect profitability and exposure to interest-rate risk.

The Bank continues to generate long term, fixed-rate residential loans. During the nine month period ended March 31, 2004, fixed rate residential loan originations totaled \$24.5 million as compared to \$18.5 million during the same period of the prior year. At March 31, 2004, the fixed-rate residential loan portfolio totaled \$80.8 million with a weighted average maturity of 191 months as compared to \$73.7 million at March 31, 2003 with a weighted average maturity of 201 months. At March 31, 2004, fixed rate loans with remaining maturities in excess of 10 years totaled \$71.5 million, or 29.4% of loans receivable as compared to \$64.2 million, or 28.4% of loans receivable at June 30, 2003. The Company originated \$20.2 million in fixed rate commercial loans during the nine month period ended March 31, 2004 as compared to \$11.9 million during the same period of the prior year. The Company also originated \$58.8 million in adjustable rate commercial loans during the nine month period ended March 31, 2004 as compared to \$40.0 million during the same period of the prior year. At March 31, 2004, CDs with original terms of two years or more totaled \$41.2 million as compared to \$29.9 million at June 30, 2003. At March 31, 2004, the Bank increased demand deposit accounts by 31.2% to \$47.2 million as compared to \$36.0 million at June 30, 2003.

Liquidity and Capital Resources

The Company's primary sources of funds include deposit growth, securities sold under agreements to repurchase, FHLB advances, amortization and prepayment of loan principal and interest, investment maturities and sales, and ongoing operating results. While the scheduled repayments on loans and securities as well as the maturity of short-term investments are somewhat predictable sources of funding, deposit flows, FHLB advance redemptions and loan and security prepayment rates are significantly influenced by factors outside the Bank's control, including general

Edgar Filing: SOUTHERN MISSOURI BANCORP INC - Form 10QSB

economic conditions and market competition. The Bank has primarily relied on FHLB advances as a source for funding cash or liquidity needs.

The Company uses its liquidity resources principally to satisfy its ongoing cash requirements, which include funding loan commitments, funding maturing certificates of deposit as well as deposit withdrawals, maintaining liquidity, funding maturing or called FHLB advances, purchasing investments and meeting operating expenses. At March 31, 2004, the Company had outstanding commitments to fund approximately \$28.8 million in mortgage and non-mortgage loans. These commitments are expected to be funded through existing cash balances, cash flow from normal operations and, if needed, FHLB advances. At March 31, 2004, available credit at the FHLB was approximately \$92.5 million, of which \$52.4 million had been advanced. In addition, the Bank has the ability to pledge several of its other loan portfolios including commercial real estate, home equity and commercial business, which could provide additional borrowing capacity of approximately \$53.2 million at March 31, 2004. Management believes that these and other liquidity resources will be sufficient to meet the Company's liquidity needs.

Regulatory Capital

The Bank is subject to minimum regulatory capital requirements equal to a leverage ratio (or core capital) of 4.0% of average total assets, a tier I capital to risk-weighted assets of 4.0% and a risk-based capital ratio of 8.0% of risk-weighted assets. At March 31, 2004, the Bank exceeded all regulatory capital requirements with leverage capital of \$22.9 million (7.74% of average assets), tier I risk-based capital of \$22.9 million (11.07% of risk-weighted assets) and risk-based capital of \$24.8 million (12.00% of risk-weighted assets). Under current regulatory guidelines, the Bank is considered to be "well-capitalized".
