NOTES TO QUARTERLY PORTFOLIO OF INVESTMENTS

FIRST TRUST/ABERDEEN GLOBAL OPPORTUNITY INCOME FUND
SEPTEMBER 30, 2008 (UNAUDITED)

1. VALUATION AND INVESTMENT PRACTICES

A. PORTFOLIO VALUATION:

The net asset value ("NAV") of the Common Shares of First Trust/Aberdeen Global Opportunity Income Fund (the "Fund") is determined daily as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, on each day the NYSE is open for trading. Domestic debt securities and foreign securities are priced using data reflecting the earlier closing of the principal markets for those securities. The NAV per Common Share is

calculated by dividing the value of all assets of the Fund (including accrued interest and dividends), less all liabilities (including accrued expenses, dividends declared but unpaid and any borrowings of the Fund), by the total number of Common Shares outstanding.

The Fund's investments are valued daily at market value or, in the absence of market value with respect to any portfolio securities, at fair value according to procedures adopted by the Fund's Board of Trustees. A majority of the Fund's assets are valued using market information supplied by third parties. In addition, structured products, including currency linked notes and credit linked notes, as well as interest rate swaps and credit default swaps, are valued using a pricing service or quotes provided by the selling dealer or financial institution. In the event that market quotations are not readily available, the pricing service does not provide a valuation for a particular asset, or the valuations are deemed unreliable, First Trust Advisors L.P. ("First Trust") may use a fair value method to value the Fund's securities and other investments. Additionally, if events occur after the close of the principal market for particular securities (e.g., domestic debt and foreign securities), but before the Fund values its assets, that could materially affect NAV, First Trust may use a fair value method to value the Fund's securities and other investments. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Fund's Board of Trustees and in accordance with the provisions of the Investment Company Act of 1940, as amended. Fixed income securities with a remaining maturity of 60 days or more will be valued by the Fund using a pricing service. Short-term investments that mature in less than 60 days when purchased are valued on an amortized cost basis.

In September 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements ("FAS 157"), effective for fiscal years beginning after November 15, 2007. This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of fair value measurements. FAS 157 became effective for the Fund as of January 1, 2008, the beginning of its current fiscal year. The three levels of the fair value hierarchy under FAS 157 are described below:

- Level 1 - quoted prices in active markets for identical securities
- Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. A summary of the inputs used to value the Fund's net assets as of September 30, 2008 is included with the Fund's Portfolio of Investments.

B. SECURITIES TRANSACTIONS:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on the identified cost basis.

Securities purchased or sold on a when-issued or delayed-delivery basis may be settled a month or more after the trade date; interest income on such securities is not accrued until settlement date. The Fund maintains liquid assets with a current value at least equal to the amount of its when-issued or delayed-delivery purchase commitments. At September 30, 2008, the Fund had no when-issued or delayed-delivery purchase commitments.

C. CREDIT LINKED NOTES:

The Fund invests in credit linked notes. Credit linked notes are securities that are collateralized by one or more designated securities that are referred to as "reference securities". Through the purchase of a credit linked note, the buyer assumes the risk of the default or, in some cases, other declines in credit quality of the reference securities. The buyer also takes on exposure to the issuer of the credit linked note in the full amount of the purchase price of the note. The issuer of a credit linked note normally will have hedged its risk on the reference securities without acquiring any additional credit exposure. The Fund has the right to receive periodic interest payments from the issuer of the credit linked note at an agreed-upon interest rate and, if there has been no default or, if applicable, other declines in credit quality, a return of principal at the maturity date.

NOTES TO QUARTERLY PORTFOLIO OF INVESTMENTS - (CONTINUED)

FIRST TRUST/ABERDEEN GLOBAL OPPORTUNITY INCOME FUND
SEPTEMBER 30, 2008 (UNAUDITED)

Credit linked notes are subject to credit risk of the reference securities underlying the credit linked notes. If one of the underlying reference securities defaults, or suffers certain other declines in credit quality, the Fund may, instead of receiving repayment of principal in whole or in part, receive the security that has defaulted.

Credit linked notes typically are privately negotiated transactions between two or more parties. The Fund bears the risk that the issuer of the credit linked note will default or become bankrupt. The Fund bears the risk of loss of the principal amount it invested, and the periodic interest payments expected to be received for the duration of its investment in the credit linked note.

The market for credit linked notes may suddenly become illiquid. The other parties to the transaction may be the only investors with sufficient understanding of the derivative to be interested in bidding for it. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for credit linked notes. In certain cases, a market price for a credit linked note may not be available.

D. FORWARD FOREIGN CURRENCY CONTRACTS:

Forward foreign currency contracts are agreements to exchange one currency for another at a future date and at a specified price. The Fund may use forward foreign currency contracts to facilitate transactions in foreign securities and to manage the Fund's foreign currency exposure. These contracts are valued daily, and the Fund's net equity therein, representing unrealized gain or loss on the contracts as measured by the difference between the forward foreign exchange rates at the dates of entry into the contracts and the forward rates at the reporting date, is included in Net Other Assets and Liabilities on the Portfolio of Investments. Risks arise from the possible inability of counterparties to meet the terms of their contracts and from movement in currency and securities values and interest rates. Due to the risks, the Fund could incur losses up to the entire contract amount, which may exceed the net unrealized value shown in the Schedule of Forward Foreign Currency Contracts.

E. FOREIGN CURRENCY:

The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities are translated into U.S. dollars at the exchange rates prevailing at the end of the period. Purchases and sales of investment securities are translated on the respective dates of such transactions. Net realized foreign currency gains and losses include the effect of changes in exchange rates between trade date and settlement date on investment security and foreign currency transactions.
