Exhibit	Description
99.1	Technical Review Of The Hope Bay Gold Project, West Kitikmeot Nunavut Territory, Canada dated June 20, 2006

**CAUTIONARY NOTE TO UNITED STATES INVESTORS**

National Instrument 43-101 Standards of Disclosure for Mineral Projects ( NI 43-101 ) is a rule developed by the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all mineral reserve and mineral resource estimates in the technical review attached as an exhibit hereto (the Technical Review ) have been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum Classification System. These standards differ significantly from the requirements of the United States Securities and Exchange Commissions (the SEC ).

Without limiting the foregoing, the Technical Review uses the terms indicated and inferred resources. United States investors are advised that, while such terms are recognized and required by Canadian securities laws, the SEC does not recognize them. Under United States standards, mineralization may not be classified as a reserve unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. **United States investors are cautioned not to assume that all or any part of measured or indicated resources will ever be converted into reserves.** Further, inferred resources have a great amount of uncertainty as to their existence and as to whether they can be mined legally or economically. It cannot be assumed that all or any part of the inferred resources will ever be upgraded to a higher category. **Therefore, United States investors are also cautioned not to assume that all or any part of the inferred resources exist, or that they can be mined legally or economically.** Under Canadian rules, estimates of inferred resources may not form the basis of feasibility or pre-feasibility studies except in limited cases. Disclosure of contained ounces is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute reserves as in place tonnage and grade without reference to unit measures. Accordingly, information concerning descriptions of mineralization, mineral resources and mineral reserves contained in the Technical Review may not be comparable to information made public by United States companies subject to the reporting and disclosure requirements of the SEC.

**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

Certain statements included herein, including those that express management s expectations or estimates of our future performance, constitute forward-looking statements within the meaning of the United States *Private Securities Litigation Reform Act of 1995*. Statements about mineral reserves and resources may also be deemed to constitute forward-looking statements to the extent they involve estimates, based on certain assumptions, of mineralization that may be encountered if a deposit were to be developed and mined. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as expects , anticipates , plans , projects , estimates , assumes , intends , strategy , goals , objectives , potential , target or variations thereof or stating that certain events or results may , could , would , might or will be taken, occur or be achieved, or the negative of any of these and similar expressions) are not statements of historical fact and may be forward-looking statements.

Forward-looking statements are subject to a variety of known and unknown risks, uncertainties and other factors that could cause the actual events or results to differ from those expressed or implied by the forward-looking statements, including, without limitation, those risk set forth in the Company s annual report on Form 40-F for the year ended

December 31, 2005, under the heading Risk Factors. The Company's forward-looking statements are based on the beliefs, expectations and opinions of management on the date the statements are made, and the Company does not assume any obligation to update forward-looking statements if circumstances or management's beliefs, expectations or opinions should change. For the reasons set forth above, investors should not place undue reliance on forward-looking statements.

---

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
