Forward-looking statements

Certain sections in this document contain 'forward-looking statements' as that term is defined in the United States Private Securities Litigation Reform Act of 1995, such as statements that include the words 'expect', 'estimate', 'project', 'anticipate', 'believes', 'should', 'intend', 'plan', 'could', 'probability', 'risk', 'Value-at-Risk (VaR)', 'target', 'goal', 'objective', 'endeavour', 'outlook', 'optimistic', 'prospects' and similar expressions or variations on such expressions.

In particular, this document includes forward-looking statements relating, but not limited to: the Group's restructuring plans, divestments, capitalisation, portfolios, net interest margin, capital ratios, liquidity, risk weighted assets (RWAs), return on equity (ROE), profitability, cost:income ratios, leverage and loan:deposit ratios, funding and risk profile; discretionary coupon and dividend payments; certain ring-fencing proposals; sustainability targets; the Group's future financial performance; the level and extent of future impairments and write-downs, including sovereign debt impairments; the protection provided by the Asset Protection Scheme (APS); and the Group's potential exposures to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity and equity price risk. These statements are based on current plans, estimates and projections, and are subject to inherent risks, uncertainties and other factors which could cause actual results to differ materially from the future results expressed or implied by such forward-looking statements. For example, certain market risk disclosures are dependent on choices about key model characteristics and assumptions and are subject to various limitations. By their nature, certain of the market risk disclosures are only estimates and, as a result, actual future gains and losses could differ materially from those that have been estimated.

Other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this document include, but are not limited to: global economic and financial market conditions and other geopolitical risks, and their impact on the financial industry in general and on the Group in particular; the ability to implement strategic plans on a timely basis, or at all, including the disposal of certain Non-Core assets and of certain assets and businesses required as part of the State Aid restructuring plan; organisational restructuring, including any adverse consequences of a failure to transfer, or delay in transferring, certain business assets and liabilities from RBS N.V. to RBS; the ability to access sufficient sources of liquidity and funding; deteriorations in borrower and counterparty credit quality; litigation, government and regulatory investigations including investigations relating to the setting of LIBOR and other interest rates; costs or exposures borne by the Group arising out of the origination or sale of mortgages or mortgage-backed securities in the United States; the extent of future write-downs and impairment charges caused by depressed asset valuations; the value and effectiveness of any credit protection purchased by the Group; unanticipated turbulence in interest rates, yield curves, foreign currency exchange rates, credit spreads, bond prices, commodity prices, equity prices and basis, volatility and correlation risks; changes in the credit ratings of the Group; ineffective management of capital or changes to capital adequacy or liquidity requirements; changes to the valuation of financial instruments recorded at fair value; competition and consolidation in the banking sector; the ability of the Group to attract or retain senior management or other key employees; regulatory or legal changes (including those requiring any restructuring of the Group's operations) in the United Kingdom, the United States and other countries in which the Group operates or a change in United Kingdom Government policy; changes to regulatory requirements relating to capital and liquidity; changes to the monetary and interest rate policies of central banks and other governmental and regulatory bodies; changes in UK and foreign laws, regulations, accounting standards and taxes, including changes in regulatory capital regulations and liquidity requirements; the implementation of recommendations made by the Independent Commission on Banking (ICB) and their potential implications; impairments of goodwill; pension fund shortfalls; general operational risks; HM Treasury exercising influence over the operations of the Group; insurance claims; reputational risk; the ability to access the contingent capital arrangements with HM Treasury; the participation of the Group in the APS and the effect of the APS on the Group's financial and capital position; the conversion of the B Shares in accordance with their terms;

limitations on, or additional requirements imposed on, the Group's activities as a result of HM Treasury's investment in the Group; and the success of the Group in managing the risks involved in the foregoing.

The forward-looking statements contained in this document speak only as of the date of this announcement, and the Group does not undertake to update any forward-looking statement to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

The information, statements and opinions contained in this document do not constitute a public offer under any applicable legislation or an offer to sell or solicitation of any offer to buy any securities or financial instruments or any advice or recommendation with respect to such securities or other financial instruments.

Presentation of information

RBS Holdings N.V. (formerly ABN AMRO Holding N.V.)

In 2007, RFS Holdings B.V., which was jointly owned by the Group, the Dutch State (successor to Fortis) and Santander (together, the “Consortium Members”) completed the acquisition of ABN AMRO Holding N.V.

On 6 February 2010, the businesses of ABN AMRO Holding N.V. acquired by the Dutch State were legally demerged to a newly established company, ABN AMRO Bank N.V., which on 1 April 2010 was transferred to ABN AMRO Group N.V., itself owned by the Dutch State. Following legal separation, RBS Holdings N.V. (formerly ABN AMRO Holding N.V.) has one operating subsidiary, The Royal Bank of Scotland N.V. (“RBS N.V.”), a fully operational bank within the Group. RBS N.V. is independently rated and regulated by the Dutch Central Bank. Certain assets within RBS N.V. continue to be shared by the Consortium Members.

On 19 April 2011, the Group announced the proposed transfers of a substantial part of the business activities of RBS N.V. to the Royal Bank. Subject to, among other matters, regulatory and other approvals and procedures, it is expected that the transfers will be implemented on a phased basis over a period ending 31 December 2013. A large part of the transfers is expected to have taken place by the end of 2012.

On 17 October 2011, the Group completed the transfer of a substantial part of the UK activities of RBS N.V. to the Royal Bank pursuant to Part VII of the UK Financial Services and Markets Act 2000.

Approximately 98% of the issued share capital of RFS Holdings B.V. is held by the Group.

Non-GAAP financial information

The directors manage the Group’s performance by class of business, before certain reconciling items, as is presented in the segmental analysis on pages 83 to 85 (the “managed basis”). Discussion of the Group’s performance focuses on the managed basis as the Group believes that such measures allow a more meaningful analysis of the Group’s financial condition and the results of its operations. These measures are non-GAAP financial measures. A body of generally accepted accounting principles such as IFRS is commonly referred to as ‘GAAP’. A non-GAAP financial measure is defined as one that measures historical or future financial performance, financial position or cash flows but which excludes or includes amounts that would not be so adjusted in the most comparable GAAP measure. Reconciliations of these non-GAAP measures are presented throughout this document or in the segmental analysis on pages 83 to 85. These non-GAAP financial measures are not a substitute for GAAP measures. Furthermore, RBS has divided its operations into “Core” and “Non- Core”. Certain measures disclosed in this document for Core operations and used by RBS management are non- GAAP financial measures as they represent a combination of all reportable segments with the exception of Non-Core. In addition, RBS has further divided parts of the Core business into “Retail & Commercial” consisting of the UK Retail, UK Corporate, Wealth, International Banking, Ulster Bank and US Retail & Commercial divisions. This is a non GAAP financial measure. Lastly, the Basel III net stable funding ratio (see page 103) represents a non-GAAP financial measure given it is a metric that is not yet required to be disclosed by a government, governmental authority or self-regulatory organisation.

Presentation of information (continued)

Disposal groups

In accordance with IFRS 5 'Non-current Assets Held for Sale and Discontinued Operations', in Q4 2011 the Group transferred the assets and liabilities relating to the planned disposal of its RBS England and Wales, and NatWest Scotland branch-based businesses, along with certain SME and corporate activities across the UK ('UK branch-based businesses'), to assets and liabilities of disposal groups.

Restatements

Organisational change

In January 2012, the Group announced changes to its wholesale banking operations in light of a changed market and regulatory environment. The changes have seen the reorganisation of the Group's wholesale businesses into 'Markets' and 'International Banking' and the proposed exit and/or downsizing of selected activities. The changes will ensure the wholesale businesses continue to deliver against the Group's strategy.

The changes will include an exit from cash equities, corporate broking, equity capital markets and mergers and acquisitions advisory businesses. Significant reductions in balance sheet, funding requirements and cost base in the remaining wholesale businesses will be implemented

Revised allocation of Group Treasury costs

In the first quarter of 2012, the Group revised its allocation of funding and liquidity costs and capital for the new divisional structure as well as for a new methodology. The new methodology is designed to ensure that the allocated funding and liquidity costs more fully reflect each division's funding requirement.

Revised divisional return on equity ratios

For the purposes of divisional return on equity ratios, notional equity has been calculated as a percentage of the monthly average of divisional risk-weighted assets (RWAs), adjusted for capital deductions. Historically, notional equity was allocated at 9% of RWAs for the Retail & Commercial divisions and 10% of RWAs for Global Banking & Markets. This has been revised and 10% of RWAs is now applied to both the Retail & Commercial and Markets divisions.

Fair Value of own Debt and Derivative Liabilities

The Group had previously excluded changes in the fair value of own debt (FVOD) in presenting the underlying performance of the Group on a managed basis given it is a volatile non-cash item. To better align our managed view of performance, movements in the fair value of own derivative liabilities (FVDL), previously incorporated within Markets operating performance, are now combined with the movement in FVOD in a single measure, 'Own Credit Adjustments' (OCA). Group and Markets operating results have been adjusted to reflect this change which does not affect profit/(loss) before and after tax.

Comparatives have been restated accordingly.

Condensed consolidated income statement
for the quarter ended 31 March 2012

	Quarter ended

Comment

Stephen Hester, Group Chief Executive, commented:

The start of 2012 has shown pleasing progress at RBS within the context of a flat economic environment.

RBS has two jobs. Excellent progress continues in removing “mistakes” of the past. Non-Core assets have fallen, again. Liquidity is stronger, again. This week the bank will repay the last of the UK Government-backed funding support we received during the crisis. We will also recommence paying dividends/coupons on hybrid capital. These are important recovery milestones.

Our second job is running the new RBS well and better. Here the bank also shows continued progress, though held back by economic conditions. In January we announced a restructuring in our wholesale banking activities and this is proceeding well. The Markets business rebounded to a 21% ROE in the seasonally strong Q1 whilst allocated resources were reduced. Retail and Commercial businesses remain solid - still impacted by subdued income trends and Irish losses, but cash-generative and competitively robust.

Extensive restructuring activity continues apace across the Group to achieve future improvement. Customer service and support remain at the forefront of our priorities for the tens of millions who rely on us.

Highlights

First quarter 2012 results summary

RBS made further progress towards its strategic goals during Q1 2012. The Group has continued to deleverage and de-risk its balance sheet, with Non-Core funded assets falling by £11 billion to £83 billion and Markets funded assets falling by £13 billion.

With growth prospects muted in the major economies in which the Group operates, and with fragilities persisting in European financial markets, the focus has remained on improving balance sheet strength and a strong liquidity position. RBS has prioritised stable sources of deposit funding, with the Group loan:deposit ratio improving 200 basis points to 106% at the end of Q1 2012. Utilisation of short-term wholesale funding was cut by £23 billion during the quarter to £80 billion, which represents c.8% of funded assets and more than meets the Group's medium-term target. The Group will this week repay the final tranche of notes issued under the Government's CGS; over the last three years RBS will have repaid £75 billion of funding under the CGS and the Special Liquidity Scheme. The capital position remains robust, with a Core Tier 1 ratio of 10.8% and a Tier 1 leverage ratio of 16.3x.

Operating profit

Group operating loss was £1,404 million, compared with a loss of £1,976 million in Q4 2011. On a managed basis, Group operating profit in Q1 2012 totalled £1,184 million, compared with a loss of £144 million in the previous quarter and a profit of £1,133 million in Q1 2011. Income was up 3% to £5,176 million, expenses rose 1% to £4,617 million and impairments fell by 31% to £1,314 million. On a managed basis income was up 25% to £7,131 million, while expenses rose 9% to £3,984 million, and impairments fell by 22% to £1,314 million. Core operating profits were £1,667 million, up 46% from Q4 2011, while Non-Core operating losses fell to £483 million (Q4 2011 - £1,282 million).

The improvement in Core results was driven by Markets, where operating profits rose to £824 million from a loss of £109 million in Q4 2011. Retail & Commercial operating performance remained resilient in challenging economic conditions, with overall operating profit of £903 million (Q4 2011 - £1,033 million) which includes a £77 million sequential quarter decline in Ulster Bank due to higher impairments.

- UK Retail operating profit was up 4% at £477 million. While the low interest rate environment creates some income challenges, this has been more than offset by favourable impairment trends.
- UK Corporate delivered stable pre-impairment profits and a strong improvement in operating profit to £492 million, in the absence of any large impairments as were incurred in Q4 2011.
- Wealth operating profit totalled £45 million. Adjusting for the release of deposit insurance levies in Q4 2011 and for a regulatory fine in Q1 2012, profits were broadly stable.
- Ulster Bank still faces exceedingly difficult market conditions, with operating losses of £310 million driven by the continuing deterioration in retail mortgage credit metrics.
- US Retail & Commercial operating profits rose again on an underlying basis. However they fell 42% to £102 million (\$160 million), due to the impact of a litigation settlement of £88 million (\$138 million).

Highlights (continued)

First quarter 2012 results summary (continued)

- International Banking delivered good income from its cash management and trade finance businesses, offset by reduced revenue from outstanding loans, reflecting the Group's focused reduction of capital-intensive activities.
- The restructured Markets division benefited from improved market conditions in the first quarter, with a strong performance in rates and a recovery in credit markets and asset backed products. Operating profit totalled £824 million, compared with a loss of £109 million in Q4 2011.
- Direct Line Group's operating profit of £84 million was down 33% from Q4 2011, largely reflecting seasonal weather claims, but up 25% relative to Q1 2011.

Non-Core achieved a significant reduction in operating losses, largely reflecting lower trading losses than those incurred in the restructure and divestment of a number of capital-intensive exposures during Q4 2011. Impairment losses were 35% lower, primarily reflecting lower commercial real estate provisioning.

Non-operating items

Restructuring costs were £460 million during the quarter, slightly lower than in Q4. This includes c.£271 million relating to the Markets and International Banking restructuring. This cost was offset by a gain of £577 million from a liability management exercise whereby the Group exchanged £2.8 billion of new Lower Tier 2 (LT2) instruments for £3.4 billion of existing LT2 instruments during March. A charge of £43 million was booked in respect of the APS, which is accounted for as a credit derivative. A total of £2.5 billion has now been expensed for the APS, which equals the minimum fee payable. The Group took an additional reserve of £125 million for PPI claims during Q1 and has now accrued £1.2 billion for PPI claims, through new and pre-existing reserves, of which £501 million has been paid out as of 31 March 2012.

As RBS's credit spreads tightened during the quarter, a charge of £2,456 million was booked for own credit adjustments, compared with a charge of £472 million in Q4 2011.

After these non-operating items the Group's operating loss before tax totalled £1,404 million and loss attributable to shareholders was £1,524 million. Excluding own credit adjustments, operating profit before tax was £1,052 million.

Efficiency

Group expenses were up 1% from Q4 2011 driven by the variability of staff expense accruals tied to increased revenues in Markets and PPI costs of £125 million, and up 7% compared with Q1 2011 primarily due to bank levy charges of £300 million in Q4 2011. On a managed basis, Core expenses were up 12% from Q4 2011, but down 2% compared with Q1 2011. This largely reflects the variability of staff expense accruals, as accruals of deferred compensation are more heavily weighted to the first quarter. Markets' compensation to revenue ratio was 29%, compared with 33% in Q1 2011. Non-Core expenses, meanwhile, were down 16%, leaving Group expenses on a managed basis in Q1 2012 at £3,984 million, up 9% from Q4 2011 but down 3% from Q1 2011.

Highlights (continued)

First quarter 2012 results summary (continued)

The Core Group's cost:income ratio in Q1 2012 was 60%, compared with 62% in Q4 2011 and 55% in Q1 2011. The improvement compared to Q4 2011 was driven by the improved income performance in Markets, while Retail & Commercial's cost:income ratio weakened to 60%, compared with 56% in Q4 2011.

Risk

Impairment losses totalled £1,314 million, down 22% from Q4 2011 and 33% from Q1 2011, with improvements across all divisions except Ulster Bank. UK Retail and US R&C showed continuing favourable credit quality trends. UK Corporate impairments were lower than in Q4 2011, with fewer individual impairment charges. Credit conditions in Ireland, however, remain challenging, and this was reflected both in Core Ulster Bank impairments and in Non-Core, which combined totalled £654 million in Q1 2012 compared with £570 million in Q4 2011 and £1,294 million in Q1 2011.

Overall, Core Q1 2012 annualised impairments represented 0.8% of loans and advances, compared with 0.9% in Q4 2011. For the Group as a whole, annualised impairments represented 1.1% of loans and advances, down from 1.3% in Q4 2011 and 1.5% in Q1 2011.

Balance sheet

The Group's funded balance sheet decreased by a further £27 billion in Q1 to £950 billion at 31 March 2012. Non-Core continued to exceed its run-off targets, as funded assets decreased £11 billion to £83 billion and a further £5 billion of signed transactions are pending, principally the sale of the Group's aviation finance business which is expected to complete by the end of Q3 2012. Markets reduced funded assets by £13 billion, reflecting the Group's decision to exit certain businesses and reduce balance sheet consumption in a number of other capital-intensive areas.

Since the end of 2008 the Group has reduced its funded balance sheet by £276 billion.

Liquidity and funding

Since embarking on its Strategic Plan in 2009 RBS has targeted a more stable deposit-led funding position with reduced dependence on wholesale funding sources. During Q1 2012, the Group has achieved significant progress towards this objective.

One key measure, the Group loan:deposit ratio, improved 200 basis points to 106% at the end of Q1 2012. This was driven by the continuing run-off of Non-Core and accelerated deleveraging in International Banking. The Core loan:deposit ratio improved further, by 1%, to 93%. UK Retail customer deposits grew strongly, up £2.3 billion in Q1 2012 and up 8% from Q1 2011, while Corporate deposits were stable year-on-year.

Another key focus has been to lower the amount of short-term wholesale funding while increasing the amount of liquidity coverage. During Q1 2012, short-term wholesale funding decreased by £23 billion to £80 billion. This represents c.8% of funded assets, and is already within the Group's medium-term target for short-term wholesale funding of less than 10%. Liquidity reserves were £153 billion, or 1.9 times the short-term wholesale funding, also above the Group's medium-term target of 150% coverage.

Highlights (continued)

First quarter 2012 results summary (continued)

Funding sources have been diversified, with usage of Moody's rated US money market funds reduced from 15% of unsecured short-term funding to less than 3%. The liquidity portfolio was maintained above target levels at £153 billion, which covers outstanding commercial paper and certificates of deposit five times over.

Net term issuance during the quarter totalled £2.3 billion. In addition, the Group issued £2.8 billion of lower tier 2 securities as part of a liability management exercise. The Group plans no further unsecured term issuance over the balance of the year.

The final tranche of notes issued under the Government's Credit Guarantee Scheme will be repaid next week; as a result the Group will have repaid a total of £75 billion of funding under the CGS and the Special Liquidity Scheme.

Capital

The Group's capital position remains robust, with a Core Tier 1 ratio of 10.8% at 31 March 2012, compared with 10.6% at 31 December 2011. The increase reflects retained profits, net of changes in fair value of debt, as well as a reduction in RWAs of £12 billion in the quarter to £496 billion, excluding the effect of the APS. The Core Tier 1 benefit arising from the APS was 85bp. RBS's Tier 1 leverage ratio was 16.3x at 31 March 2012.

Highlights (continued)

First quarter 2012 results summary (continued)

Preference dividends

On 26 November 2009, RBS entered into a State Aid Commitment Deed with HM Treasury containing commitments and undertakings that were designed to ensure that HM Treasury was able to comply with the commitments to be given by it to the European Commission for the purposes of obtaining approval for the State aid provided to RBS. As part of these commitments and undertakings, RBS agreed not to pay discretionary coupons and dividends on its existing hybrid capital instruments for a period of two years. This period commenced on 30 April 2010 for RBS Group instruments (the two year deferral period for RBS Holdings N.V. instruments commenced on 1 April 2011). On 30 April 2012 this period ended for RBS Group instruments. RBS has determined that it is now in a position to recommence payments on the RBS Group instruments.

The Core Tier 1 capital impact of discretionary amounts that will be payable over the remainder of 2012 on the RBS Group instruments on which payments have previously been stopped is c.£350 million. In the context of recent macro-prudential policy discussions, the Board of RBS has decided to neutralise any impact on Core Tier 1 capital through equity issuance. Approximately £250 million of this is ascribed to equity funding of employee incentive awards through the sale of surplus shares held by the Group's Employee Benefit Trust, which is now substantially complete. An additional c.£100 million will be raised through the issue of new ordinary shares, which is expected to take place over time during the second half of 2012.

The Directors have declared the discretionary dividends on Series M, N, P, Q, R, S, and T non-cumulative dollar preference shares of US\$0.01 each for the three months to 30 June 2012, and the discretionary dividend on the Series 2 non-cumulative Euro preference shares of €0.01 for the 12 months to 30 June 2012. These discretionary dividends as well as the discretionary distributions on the RBSG/RBS innovative securities RBS Capital Trust A, RBS Capital Trust B, RBS Capital Trust D, RBS Capital Trust I, RBS Capital Trust II and RBS Capital Trust IV will be paid on their scheduled payment dates in June 2012. Future coupons and dividends on RBS Group hybrid capital instruments will only be paid subject to, and in accordance with, the terms of the relevant instruments.

Share consolidation

The Group's Annual General Meeting on 30 May 2012 will consider resolutions which, if approved, will sub-divide and consolidate the Group's ordinary shares. As the Group currently has a very large number of ordinary shares in issue, a small movement in the share price can result in large percentage movements and considerable volatility in the Group's shares. The Board believes that the sub-division and consolidation will result in a share price and nominal value more appropriate for a company of the Group's size in the UK market and may assist in reducing volatility, thereby enabling a more consistent valuation.

Highlights (continued)

First quarter 2012 results summary (continued)

Disposals

The Group continues to target the second half of 2012 for the sale of the first tranche in Direct Line Group through a public flotation, subject to market conditions. Preparations for Direct Line Group's separation have continued, with good progress on the business's new name and identity and the appointment of Mike Biggs as chairman.

Planning and integration work for the carve out and sale to Santander of the RBS England and Wales and NatWest Scotland branch-based businesses, along with certain SME and corporate activities across the UK, continues to progress as expected.

These two disposals will substantially complete the series of divestments the Group agreed to make to comply with EC state aid requirements.

Customer franchises

RBS's first priority is to serve its customers well. Full year 2011 results of both UK Retail and Ulster Bank's customer charters were published in Q1 2012, with UK Retail achieving 23 of the 25 goals and Ulster Bank achieving 28 of their 29 objectives. Further improvements are still needed in service and in resolving complaints fairly, consistently and promptly.

US Retail & Commercial completed the rollout of its core customer commitments during the quarter.

Following the success of mobile applications launched in a number of the Group's retail businesses during 2011, UK Corporate launched a new iPhone application for business banking customers during Q1 2012. The application allows customers to manage multiple accounts without the need to log in and out, view an extended transaction list and make intra-account transfers.

UK lending

RBS continues to support economic recovery in the UK and remains committed to providing the credit UK businesses need in order to achieve this.

In Q1 2012, RBS provided £14.3 billion of gross new loans and facilities to UK businesses, of which £7.9 billion was to SME customers, and £6.4 billion of overdraft renewals, including £1.5 billion to SME customers. Gross new loans and facilities to SMEs were up 18% from Q1 2011 and broadly flat to Q4 2011.

SME customers remained cautious in their economic outlook at the start of 2012 but Q1 2012 did indicate a small improvement in sentiment with Core drawn balances, excluding real estate and construction, falling only 1% from Q4 2011. This compares with a 5% quarterly fall into Q4 2011. Overdraft utilisation also increased marginally in the quarter, although largely reflecting seasonal fluctuations. Overall, utilisation remained below 50% as it has for over two years. The Group has seen a steady increase in the demand for invoice and asset financing by SME customers, with Core net advances from these sources a significant component of gross lending and up 6% year-on-year.

Highlights (continued)

First quarter 2012 results summary (continued)

Gross new loans and facilities provided to mid and large corporates fell quarter on quarter, and compared with Q1 2011, reflecting many businesses' decision to bring re-financing forward into 2011 and also the continuing low level of merger & acquisition activity in the market.

The UK Government's National Loan Guarantee Scheme (NLGS) was launched in March, with support from a number of the UK's leading banks, including RBS. RBS is the only bank to offer the 1% pricing discount to customers for loans from £1,000 in value, thus ensuring that we use NLGS to support as wide a range of customers as possible. Six weeks after launch, the Group has provided 1,600 loans and asset finance facilities under the scheme, with two thirds of these being for amounts under £25,000.

The Group also participates in the Regional Growth Fund, Business Growth Fund and the Enterprise Finance Guarantee for UK businesses. It also offers mortgages under the NewBuy scheme announced at the start of March 2012 which provide first time buyers, and other movers unable to raise a large deposit, with a more affordable way to move onto, or up, the property ladder.

Gross new mortgage lending in Q1 2012 was £4.0 billion, with the proportion of mortgages provided to first time buyers increasing to almost a quarter during March 2012, largely reflecting higher demand prior to the end of the stamp duty holiday.

Outlook

Economic and regulatory challenges should continue throughout 2012.

Against this backdrop, we nonetheless expect Retail and Commercial performance to remain resilient.

Markets, while off to a good start, will remain market-dependent.

Group net interest margin outlook is stable with the first quarter of 2012.

We expect to achieve further progress in our balance sheet 'safety and soundness' agenda. Non-Core is on track to hit asset targets within our loss tolerance, and funding and liquidity momentum should continue.

Analysis of results

	Quarter ended	
	31 March 2012	31 December 2011
	£m	£m
Net interest income		
Net interest income	2,999	3,074
Average interest-earning assets	640,658	663,519
Net interest margin		
- Group	1.88%	1.84%
- Retail & Commercial (1)	2.91%	2.90%
- Non-Core	0.31%	0.42%

Notes:

(1) Retail & Commercial (R&C) comprises the UK Retail, UK Corporate, Wealth, International Banking, Ulster Bank and US Retail & Commercial divisions.

Key points

Q1 2012 compared with Q4 2011

- Group net interest income decreased by £75 million, primarily reflecting the deleveraging of the Group's balance sheet. Core was down £38 million, Non-Core £35 million.
- Retail & Commercial net interest margin (NIM) was 1 basis point higher, driven by modest widening of asset margins, partially mitigated by continuing pressure on deposit margins in the Core UK franchises.
- Group NIM increased 4 basis points benefiting from lower funding and liquidity costs, as the expensive Credit Guarantee Scheme funding was repaid, and the run-off of the lower spread Non-Core book continued.

- Goodwill relating to UK branch-based businesses	-	(80)	-
- Other	(8)	(2)	(70)
	(8)	(82)	(23)

Key points

Q1 2012 compared with Q4 2011

- Non-interest income increased by £213 million, 11%, primarily reflecting a strong seasonal bounce in trading income in Markets, a gain on redemption of own debt of £577 million, offset by own credit adjustments of £2,456 million.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form 6-K

- A charge of £43 million was taken in relation to the APS. The cumulative charge on APS now totals £2.5 billion, equal to the minimum fee payable. The Group plans to exit the APS, subject to the approval of the FSA, in the fourth quarter of 2012.
- Significant tightening of the Group's credit spreads resulted in a charge of £2,456 million in relation to own credit adjustments, compared with a charge of £472 million in Q4 2011.
- The Group recorded a gain of £577 million on the redemption of its own debt, following a liability management exercise as the Group exchanged £2.8 billion of new lower tier 2 (LT2) instruments for £3.4 billion of existing LT2 instruments.

Analysis of results (continued)

Key points (continued)

Q1 2012 compared with Q4 2011 (continued)

- Non-Core non-interest income increased, with gains on disposals of £182 million compared with prior period losses of £36 million, along with lower fair-value write-downs.

Q1 2012 compared with Q1 2011

- Non-interest income was 42% lower, largely as a result of decreased trading income in Markets, reflecting a less pronounced seasonal recovery in activity and lower investor confidence compared with the same period last year and own credit adjustments of £2,456 million.
- UK Retail fees and commissions fell as subdued consumer spending activity led to reduced transaction volumes. In addition, various Helpful Banking initiatives resulted in lower current account fees.
- Insurance net premium income decreased by 18% driven by lower volumes written by Direct Line Group during 2011, reflecting the de-risking of the Motor book and the exit of certain business lines.

Analysis of results (continued)

	Quarter ended		
	31 March 2012	31 December 2011	31 March 2011

Operating expenses	4,617	4,567	4,315
Insurance net claims	649	529	912
Staff costs as a % of total income	50%	40%	34%

Key points

Q1 2012 compared with Q4 2011

- Group operating expenses increased 1%, driven by the variability of staff expense accruals tied to increased revenues in Markets and PPI costs of £125 million, and the non-repeat of a bank levy charge of £300 million in Q4 2011.
- R&C expenses increased by 5% largely reflecting the phasing of staff expense accruals and a litigation settlement of £88 million (\$138 million) in US Retail & Commercial.
- Integration and restructuring costs totalled £460 million, driven by costs relating to business exits in Markets and International Banking, Group property exits, transfer of RBS NV activities to RBS plc, and further expenditure incurred in preparation for the divestment of Direct Line Group and the branch sale to Santander.
- Insurance net claims were 23% higher primarily due to adverse weather experienced in the early part of Q1 2012.

Q1 2012 compared with Q1 2011

- Group operating expenses increased 7% primarily driven by PPI costs of £125 million and an increase in staff costs of 7% to £2,570 million. On a managed basis Group expenses declined 3% primarily driven by benefits from the Group cost reduction programme. Headcount declined by 1%, principally as a result of the restructuring of the Markets and International Banking businesses, and branch closures in the US.

Non-Core expenses fell by 19% reflecting the on-going run down of the division, including further business disposals and country exits.

- Insurance net claims decreased by £263 million, driven by a combination of reduced exposure on Motor and the exit of certain business lines.

Non-Core	499	730	1,046
Group	1,295	1,654	1,898
Customer loan impairment charge as a % of gross loans and advances (2)			
Group	1.1%	1.3%	1.5%
Core	0.8%	0.9%	0.8%
Non-Core	2.7%	3.7%	4.0%

Notes:

- (1) In the second quarter of 2011, the Group recorded an impairment loss of £733 million in respect of its AFS portfolio of Greek government debt as a result of Greece's continuing fiscal difficulties. In the third and fourth quarters of 2011, additional impairment losses of £142 million and £224 million respectively were recorded. In Q1 2012, as part of private sector involvement in the Greek government bail-out, the vast majority of this portfolio was exchanged for Greek sovereign debt and European Financial Stability Facility notes; the Greek sovereign debt received in the exchange was sold.
- (2) Customer loan impairment charge as a percentage of gross customer loans and advances excluding reverse repurchase agreements and including disposal groups.

Key points

Q1 2012 compared with Q4 2011

- Group impairment losses fell by £604 million or 31%, primarily due to a decrease in loan impairment losses and an additional impairment of £224 million taken in Q4 2011 as a result of the decline in the value of Greek sovereign bonds.

- Group loan impairment losses fell by £359 million or 22% driven by lower individual charges in Non-Core and improvement across Retail & Commercial businesses, with the exception of Ulster Bank. Ulster Bank continued to face challenging credit conditions.
- UK Retail impairment losses fell by £36 million, largely driven by lower default levels and improved collections performance on the unsecured portfolio. UK Corporate impairments were lower than Q4 2011, which included a number of sizeable single-name provisions.
- Total Ulster Bank (Core and Non-Core) loan impairments were £654 million compared with £570 million in Q4 2011, an increase of 15%, primarily driven by further deterioration in asset quality in the Core residential mortgage portfolio. Non-Core Ulster Bank impairments increased by 7% to £260 million.

Analysis of results (continued)

Q1 2012 compared with Q1 2011

- Group loan impairment losses decreased by £603 million or 32%, driven by a significant decrease in Non-Core, principally due to lower losses on the Ulster Bank portfolio.
- R&C impairment losses, excluding Ulster Bank, were stable at £395 million, with improved credit conditions in UK Retail and US Retail & Commercial largely offset by lower provision releases in UK Corporate and International Banking.
- Core and Non-Core Ulster Bank loan impairment losses fell from £1,294 million in Q1 2011 to £654 million in Q1 2012, although credit conditions in Ireland remain challenging with credit quality continuing to weaken over the period largely due to asset value deflation.

Analysis of results (continued)

	31 March 2012	31 December 2011
Capital resources and ratios		
Core Tier 1 capital	£47bn	£46bn
Tier 1 capital	£57bn	£57bn
Total capital	£61bn	£61bn
Risk-weighted assets		
- gross	£496bn	£508bn
- benefit of Asset Protection Scheme	(£62bn)	(£69bn)
Risk-weighted assets	£434bn	£439bn
Core Tier 1 ratio (1)	10.8%	10.6%
Tier 1 ratio	13.2%	13.0%
Total capital ratio	14.0%	13.8%

Note:

(1) The benefit of APS in the Core Tier 1 ratio is 85bp at 31 March 2012 and 90bp at 31 December 2011.

Key points

Q1 2012 compared with Q4 2011

- The Group's capital ratios strengthened further, with the Core Tier 1 ratio increasing to 10.8%, driven by retained profits and a reduction of 2% in gross risk-weighted assets.
- RWAs fell by £12 billion during the quarter to £496 billion, excluding the effect of the APS. Post-APS, RWAs were £5 billion lower.

Analysis of results (continued)

	31 March 2012	31 December 2011
Balance sheet		
Funded balance sheet (1)	£950bn	£977bn
Total assets	£1,403bn	£1,507bn
Loans and advances to customers (2)	£460bn	£474bn
Customer deposits (3)	£432bn	£437bn
Loan:deposit ratio - Core (4)	93%	94%
Loan:deposit ratio - Group (4)	106%	108%
Short-term wholesale funding	£80bn	£102bn
Wholesale funding	£234bn	£258bn
Liquidity portfolio	£153bn	£155bn

Notes:

- (1) Funded balance sheet represents total assets less derivatives.
- (2) Excluding reverse repurchase agreements and stock borrowing, and including disposal groups.
- (3) Excluding repurchase agreements and stock lending, and including disposal groups.
- (4) Net of provisions, including disposal groups and excluding repurchase agreements. Excluding disposal groups, the loan:deposit ratios of Core and Group at 31 March 2012 were 93% and 107% respectively (31 December 2011 - 94% and 110% respectively).

Key points

- Group funded assets fell by £27 billion, driven by declines of £11 billion in Non-Core and £13 billion in Markets, as the Group continued to deleverage and to reduce capital-intensive assets.
- Loans and advances to customers were £14 billion lower, principally reflecting accelerated customer repayments in International Banking and weak customer credit demand.
- Customer deposits were £5 billion lower, principally reflecting seasonal movements in corporate balances. The Group loan:deposit ratio improved 200 basis points to 106% and the Core loan:deposit ratio also improved, by 100 basis points, to 93%.
- The Group has maintained a robust liquidity position, with a liquidity portfolio of £153 billion (16% of funded assets) substantially exceeding outstanding short-term wholesale funding, which was reduced during the quarter by £23 billion to £80 billion.

Further analysis of the Group's liquidity and funding position is included on pages 98 to 102.

For the purposes of the divisional return on equity ratios, notional equity has been calculated as a percentage of the monthly average of divisional risk-weighted assets, adjusted for capital deductions. Historically, notional equity was allocated at 9% for the Retail & Commercial divisions and 10% for Global Banking & Markets. A consistent 10% is now applied to the Retail & Commercial and Markets divisions.

Notes:

- (1) Divisional return on equity is based on divisional operating profit after tax divided by average notional equity (based on 10% of the monthly average of divisional RWAs, adjusted for capital deductions).
- (2) Includes disposal groups: loans and advances to customers £7.3 billion; risk elements in lending £0.5 billion; customer deposits £8.7 billion (31 December 2011 - loans and advances to customers £7.3 billion; risk elements in lending £0.5 billion; customer deposits £8.8 billion).

Key points

In Q1 2012 UK Retail continued to focus on our commitment to customers to be the UK's most Helpful Bank.

On 28 March 2012, the Customer Charter 2011 results were published and showed encouraging improvements. The results were independently assessed, and, of the twenty-five goals set out in the Charter, we achieved twenty-three. This result demonstrates the progress that has been made, and has been recognised by customers, but there is still work to be done to deliver improvements in service and resolve complaints fairly, consistently and promptly.

In 2012, the Charter has evolved so it is even more relevant to customers, with simplified commitments categorised under the following four key themes: knowledgeable staff will put customer needs first, we will do more to help customers when they need it most, we will provide convenient and quick service to our customers and we will

continue to help strengthen the communities in which we live and work.

UK Retail (continued)

Key points (continued)

Q1 2012 compared with Q4 2011

- UK Retail continued to deliver strong returns in Q1 2012. The division continued to achieve strong franchise growth, gaining market share on both sides of the balance sheet and increasing return on equity in the face of challenging economic conditions.
- The division further reduced the loan to deposit ratio in the quarter to 105%.
 - Customer deposits grew 2%, driven by increases in both savings balances, 1%, and current account balances, 5%.
 - Gross mortgage lending market share of 11% continues above our stock position of 8%.
 - Unsecured lending contracted by 5% as the Group actively sought to improve its risk profile and customer deleveraging continued.
- Income growth is proving challenging in the current economic environment.
 - Net interest margin declined 13 basis points as lower long term swap rates combined with competitive savings rates put pressure on liability margins.
 - Consumer spending has remained subdued over the quarter resulting in lower transactional fees on cards.
 - Customer behaviour continues to evolve supported by Helpful Banking initiatives, including the “Act Now” text alerts. This is reducing the level of late and overdraft fees.
- The division continued to focus on strong cost discipline with good results.
 - Headcount was further reduced, although staff costs were slightly higher as Q4 2011 included a reduction in full year incentive compensation accruals.
 - Other costs were lower as strict cost control and efficiency measures delivered further benefits.
- Impairment losses decreased 19% reflecting the impact of risk appetite tightening. Impairments are expected to remain stable subject to normal seasonal fluctuations and the economic environment.
 - Mortgage impairment losses were broadly in line with the previous quarter with arrears rates and provision coverage levels remaining stable.
 - The unsecured portfolio charge fell 24% with slightly lower default volumes and improved collections performance. The recoveries performance also gave rise to a small provision release from the defaulted book. Industry benchmarks for cards arrears remain stable, with RBS continuing to perform better than the market.
- Risk-weighted assets were broadly stable, with volume growth in lower risk secured mortgages more than offset by a decrease in the unsecured portfolio. Asset quality remains stable.

Q1 2012 compared with Q1 2011

.

Net interest income fell driven by lower liability margins, due to a continued decline in long-term swap rates and competitive pricing on savings.

- Non-interest income declined as Helpful Banking initiatives and subdued consumer spending continued to depress card transaction volumes.
- Overall expenses decreased with direct staff costs down largely due to headcount reductions. Other direct expenses decreased reflecting a number of cost saving initiatives.
- Risk appetite tightening, combined with Helpful Banking initiatives are helping to reduce default levels, contributing to impairment losses decreasing by 20%.

UK Corporate (continued)

Key points

In Q1 2012 UK Corporate continued to demonstrate its commitment to customers and to supporting recovery in the UK economy.

As part of the 'Ahead for Business' promise, fast, reliable service and customer proximity remain at the forefront of UK Corporate's proposition. In February 2012 the division launched a new iPhone app enabling business banking customers to keep track of their finances and effectively manage opportunities and risks within their business. The division also enhanced its telephony proposition with an extended and faster service, providing expert advice to smaller businesses.

By the end of Q1 2012, RBS staff had undertaken 4,883 'Working with You' visits, spending two days at a time working in their customers' businesses, demonstrating how serious UK Corporate is about understanding and sharing its customers' ambitions.

Q1 2012 saw the launch of the National Loan Guarantee Scheme (NLGS). As part of the scheme UK Corporate offers a 1% pricing discount on loans, including asset finance facilities provided through the Lombard brand, to a large number of clients. RBS Group is the only bank to extend the discount for the complete range of loans, from £1,000 up to £25 million. Furthermore, UK Corporate demonstrated its continued support of the manufacturing sector by launching the 8th tranche of a £1 billion Manufacturing Fund in the quarter. The division also participated in a number of other UK Government supported schemes:

- the Regional Growth Fund, allowing businesses to safeguard and create new jobs across the country;
- the Business Growth Fund, an equity investment fund established to help Britain's fast-growing small and medium sized businesses; and
- the Enterprise Finance Guarantee, for small firms with viable business proposals that are unable to obtain a conventional loan due to lack of security.

Q1 2012 compared with Q4 2011

- UK Corporate delivered a strong performance, with return on equity of 16.2% and operating profit increasing 21% to £492 million, driven by non-interest income growth and lower impairments.
- Net interest income was broadly flat while net interest margin increased 7 basis points, benefiting from a revision to deferred income recognition assumptions and increased customer margins, partially offset by higher funding costs.
- Non-interest income increased 6% largely reflecting valuation movements and lower derivative close out costs associated with impaired assets.
- Total costs were slightly lower, reflecting lower revenue related costs and cost efficiencies achieved in non-staff discretionary spend, largely offset by the phasing of staff incentive costs.
- Impairments at £176 million were down 25%, primarily as a result of lower individual and collectively assessed provisions.

- Risk-weighted assets decreased £2.4 billion reflecting improved risk parameters and marginally lower net lending, primarily property which more than offset growth in other sectors.

UK Corporate (continued)

Key points (continued)

Q1 2012 compared with Q1 2011

- Operating profit decreased by £125 million, or 20%, with lower net interest income combined with an increase in impairments, partially offset by lower costs.
- Net interest income decreased by 7% largely reflecting the higher impact from revisions made to deferred income recognition assumptions in Q1 2011 (£50 million) compared with Q1 2012 (£28 million). Excluding these revisions, net interest income fell 4% whilst net interest margin decreased 2 basis points reflecting higher net funding costs and lower lending. Lending decreased £5 billion, including targeted reductions in the property sector.
- Non-interest income decreased 1%, largely reflecting strong refinancing activity in Q1 2011, not repeated in Q1 2012, partially offset by increased operating lease activity and Markets revenue share income.
- Total costs declined £5 million, 1%, with reductions in non-staff discretionary spending, largely offset by increased staff costs relating to strategic investment and control initiatives.
- Impairments were 64% higher primarily driven by the significant release of latent provisions in Q1 2011.
- Risk-weighted assets decreased £5.4 billion as the result of improved risk parameters and lower lending balances.

Wealth (continued)

Key points

Q1 2012 saw further progress in the implementation of the refreshed Coutts divisional strategy across all jurisdictions.

- Reshaping of the UK business progressed to the next phase with the restructure of key professionals in client servicing. The restructure will enable the division to provide class leading banking and wealth management propositions and assists in the preparations for the implementation of Retail Distribution Review (RDR) regulations. Revised Private Banker and Wealth Manager roles will ensure clients receive the best service and advice based on their specific needs.
- On the international front, Coutts announced the sale of the Latin American, Caribbean and African business to RBC Wealth Management. The business has client assets in the region of £1.5 billion, representing approximately 2% of Coutts' total client assets. This decision followed from the 2011 divisional strategy to focus the Coutts growth strategy on key geographies. These include the UK, Switzerland, Middle East, Russia/Commonwealth of Independent States and selected countries in Asia.
- Coutts continued to prepare the deployment of a single global technology platform with the UK rollout completed in Q1 2012. The bank's strategic investment will enable the business to operate as a global organisation on a single IT platform, transforming the way clients are served.

Q1 2012 compared with Q4 2011

- Operating profit decreased 38% to £45 million, with a 4% increase in income more than offset by increased expenses.
- Income growth of £10 million largely reflects improved deposit margins and strong treasury income.
- Expenses increased 21% largely driven by phasing in Financial Services Compensation Scheme levies and the timing of incentive accruals. The division also incurred an £8.75 million fine from the Financial Services Authority (FSA) relating to Anti Money Laundering control processes during the period from December 2007 to November 2010.
- Client assets and liabilities managed by the division increased by 1%. Assets under management increased by 2%, benefiting from a recovery in the markets in Q1 2012, and positive net new business, particularly in Asia where an improved sales management framework has been introduced.

Wealth (continued)

Key points (continued)

Q1 2012 compared with Q1 2011

- Operating profit decreased by 36% with a 7% growth in income more than offset by higher expenses and impairments.
- Net interest income increased 14% with growth in lending volumes and margins, particularly within the UK, as well as sustained improvement in divisional treasury income. The decline in non-interest income reflected lower assets under management and a reduction in brokerage income.
- Expenses increased 20% largely reflecting continued investment in International front office recruitment, strategic technology initiatives, including the new Avaloq based wealth management platform in the UK, regulatory projects and changes in bonus accounting methodology. Q1 2012 also included the FSA fine.
- Client assets and liabilities managed by the division decreased by 2%. Customer deposits grew 2% and lending volumes increased by 2% in response to continued customer demand, particularly for UK mortgages, reflecting high interest in London property. Assets under management declined 9%, as a result of negative market movements and fund outflows occurring in the second half of 2011.

Key points

The formation of International Banking in January 2012 created a significant and integrated client focused business, well placed to serve clients' financing, working capital and risk management needs internationally. Cash management and trade finance, both in the UK and internationally, remain key offerings for the Group's customers and, overall, International Banking continues to invest in improving existing products and in developing new ones.

Since the restructure, substantial progress has been made on the integration. The senior management team is in place. Early engagement with clients on the integrated proposition has been positive and management are reviewing a number of revenue enhancing opportunities arising from leveraging the Group's network coverage and product capabilities.

Q1 2012 compared with Q4 2011

- Operating profit was down £55 million, reflecting lower income and increased expenses, partially offset by lower impairments.
- Excluding run-off businesses, income was £28 million lower reflecting the uncertain and volatile macroeconomic backdrop and the continued low interest rate environment. Net interest margin decreased by 4 basis points mainly due to a reduction in higher priced Portfolio assets.

Portfolio income fell by £60 million reflecting the managed reduction in average assets in order to improve capital efficiency and liquidity levels.

Trade finance income was 7% higher due to increased guarantee fee income, mainly in Asia.

Cash management income was 11% higher than Q4 2011, despite weak European activity and lower global payments, and due to a higher funding surplus arising from lower liquidity buffer requirements.

International Banking (continued)

Key points (continued)

Q1 2012 compared with Q4 2011 (continued)

- Expenses increased by £25 million, largely reflecting the timing of incentive accruals and reduced pension accruals in Q4 2011 following actuarial valuations.
- Impairments of £35 million related to a small number of specific provisions.
- Third party assets decreased by 9% due to managed reductions in the Portfolio loan book of £5 billion, reflecting capital management discipline, (which also resulted in a decrease in undrawn commitments) and reduced collateral required for Japanese business activities.
- Customer deposits remained flat despite an increasingly competitive environment and the adverse impact of Sterling:Euro exchange rate.
- The loan to deposit ratio improved from 126% to 116% mainly driven by reductions in the loan book.

Q1 2012 compared with Q1 2011

- Operating profit was down £129 million reflecting lower Portfolio income and higher impairments, partially offset by lower discretionary expenses.
- Income decreased by £105 million due to a managed reduction in average assets and lower business volumes. Net interest margin decreased by 23 basis points primarily reflecting a reduction in higher yielding Portfolio assets.
 - Portfolio income was 44% lower largely reflecting an active reduction in third party assets, down 17%, and higher funding costs. Corporate product volumes fell as activity in the debt market remained subdued, and a low inflation environment also reduced hedging activity.
 - Trade finance income grew 16% as a result of strong growth in trade funded assets and trade guarantees, mainly in Asia.
 - Cash management was 24% higher, as customer deposits grew by £1 billion following the success of deposit gathering initiatives, partially offset by adverse exchange rate movements and lower interest rates.
- Expenses decreased by 4% driven by lower headcount, continued cost saving initiatives including tight management control over discretionary non-staff related costs.
- Impairments in Q1 2011 included a significant write back of latent provisions within Portfolio.
- The Portfolio loan book fell by £10 billion due to repayments and active capital management. This drove a 17% reduction in third party assets and a 9% reduction in risk-weighted assets.

Key points

Economic conditions in Ireland remain challenging. Despite growth in the export sector, the domestic economy continues to be weak, unemployment remains elevated and residential property values continue to decline. These conditions adversely affected financial performance in Q1 2012, particularly the level of impairments on the residential mortgage portfolio.

Ulster Bank remains focused on the recovery of the business and on the rebuilding of a sustainable franchise into the future. Ulster Bank also continues to support the changing needs of customers, in difficult economic conditions, through the provision of a range of restructuring solutions.

Deposit gathering remains a priority and the implementation of a number of cost management initiatives across the business is progressing.

Ulster Bank (continued)

Key points (continued)

Q1 2012 compared with Q4 2011

- Operating loss increased by £77 million in the quarter reflecting the impact of higher funding costs on income. Impairment losses increased by 20%, primarily due to deteriorating credit metrics of the retail mortgage portfolio, in line with market trends.
- Income decreased by £12 million due to the impact of intense deposit competition. Net interest margin remained stable at 1.87% with the benefit of loan pricing initiatives, coupled with a reduced stock of liquid assets offsetting the impact of higher funding costs.
- Expenses decreased by £2 million with further progress made on cost initiatives across the business, with particular focus on reducing staff costs and marketing expenditure.
- Impairment losses increased by £67 million in the quarter, largely due to rising arrears rates on the residential mortgage portfolio and the continued deterioration in asset quality as property prices declined further.
- Retail and SME deposit balances remained stable in the quarter despite the competitive market. However, there were further outflows of wholesale balances. Loans and advances to customers fell marginally.
- Risk-weighted assets increased by £2.1 billion, mainly as a result of deterioration in mortgage credit metrics.

Q1 2012 compared with Q1 2011

- Operating loss decreased by £55 million to £310 million, with lower impairment losses partly offset by lower income.
- Income fell by 8% reflecting the impact of a reducing loan book coupled with higher funding costs. Net interest margin increased by 3 basis points primarily driven by the benefit of initiatives to improve asset margins implemented during 2011 coupled with a reduction in the stock of liquid assets.
- Expenses decreased by 4%, with a 14% fall in direct expenses, primarily driven by tight management of discretionary spend. Management continued to focus on implementing cost saving initiatives.
- Impairment losses fell by 15% but credit conditions in Ireland remain challenging and overall, credit quality has deteriorated over the period driven by asset price deflation and affordability issues.
- Loans and advances to customers declined by 9% reflecting further amortisation and ongoing weak demand for credit.
- Customer deposit balances declined by 12% with growth in retail and SME balances more than offset by lower wholesale balances.

Key points

In Q1 2012 US R&C continued to focus on its back-to-basics strategy, with the goal of increasing profitability through developing the customer franchise, managing expenses, and enhancing credit quality.

Consumer Banking accelerated the roll-out of its four core customer commitments to the entire branch footprint, finishing ahead of schedule. The aim of the commitments is to enhance the customer experience and further strengthen the Citizens brand, and is built around feedback received from customers.

Q1 2012 also saw Treasury Solutions (Domestic Global Transaction Services) reintegrated into the Commercial Banking Division. This reintegration will strengthen the cross-sell of Treasury Solutions products to the Commercial client base and follows the formation of a consolidated Consumer Banking division in H2 2011, aimed at strengthening the retail alignment and improving efficiencies.

A continued focus on strengthening and growing valued customer and client relationships has delivered results. For example, in Consumer Banking, the penetration of on-line banking customers, a key indicator of customer retention, continued to improve in Q1 2012 and the penetration of loan products to deposit households has shown a steady increase over the past eleven consecutive quarters.

US Retail & Commercial (US Dollar) (continued)

Key points (continued)

In Commercial Banking, a recent Greenwich Associates survey indicated strong year-on-year improvements. Clients placed Citizens number one or number two versus peers in several key categories, including ‘values long-term relationships’, ‘understanding of your industry’, ‘likelihood to recommend bank’ and ‘likelihood to continue using for future banking needs’.

Q1 2012 compared with Q4 2011

- Operating profit of £102 million (\$160 million) compares with £177 million (\$279 million) in the prior quarter, a decrease of £75 million (\$119 million), or 42%, reflecting the settlement of an outstanding litigation matter. Excluding the litigation settlement, operating profit increased by £13 million (\$19 million) or 7%, to £190 million (\$298 million) reflecting lower impairment losses partially offset by lower gains on the sale of securities.
- The macroeconomic operating environment remained challenging, with low rates, high unemployment, a soft housing market, sluggish consumer activity and the continuing impact of legislative changes.
- Net interest income was stable. In US dollar terms net interest income was down \$2 million reflecting reducing asset yields offset by lower funding costs. Net interest margin was up 2 basis points from the prior quarter.
- Loans and advances were down £0.7 billion, or 1%. In US dollar terms loans and advances were up \$1.7 billion, or 2%, due to strong growth in commercial loan volumes and the purchase of a \$1 billion auto loan portfolio, partly offset by the planned run-off of long term fixed rate consumer products.
- Non-interest income was down £34 million (\$53 million), or 12%, largely reflecting lower securities gains.
- Total expenses were up £87 million (\$135 million), or 16%, reflecting a litigation settlement of £88 million (\$138 million) in Q1 2012. A settlement has been reached in a class action lawsuit relating to how overdraft fees were assessed on customer accounts prior to 2010. Citizens was one of more than 30 banks included in these class action lawsuits.
- Excluding the litigation settlement, total expenses were down £1 million (\$3 million) reflecting a mortgage servicing rights recapture, lower costs related to regulatory projects and the elimination of the Everyday Points rewards programme for consumer debit card customers, partially offset by the phasing of the annual incentive plan accruals, and a seasonal increase in payroll taxes.
- Impairment losses were down £46 million (\$71 million), or 71%, reflecting an improved credit environment and lower impairments related to securities. REIL decreased from £1.0 million (\$1.6 billion) to £0.9 billion (\$1.5 billion).

Q1 2012 compared with Q1 2011

- Operating profit increased to £102 million (\$160 million) from £94 million (\$150 million), an increase of £8 million (\$10 million), or 9%, substantially driven by significantly lower impairments and increased income, largely offset by the settlement of an outstanding litigation. Excluding the litigation settlement operating profit increased by £96 million (\$148 million), or 102%, to £190 million (\$298 million).

Net interest income was up £44 million (\$55 million), or 10%, driven by commercial loan growth, deposit pricing discipline and lower funding costs, partially offset by consumer loan run off.

US Retail & Commercial (US Dollar) (continued)

Key points (continued)

Q1 2012 compared with Q1 2011 (continued)

- Customer deposits were up 3% with strong growth achieved in checking balances. Consumer checking balances grew by 3% while small business checking balances grew by 9% over the year.
- Non-interest income was down £15 million (\$31 million), or 5%, reflecting lower debit card fees, as a result of the Durbin Amendment legislation, and lower gains on the sale of securities, partially offset by strong mortgage banking fees.
- The Durbin Amendment became effective on 1 October 2011 and lowers the allowable interchange on debit transactions by approximately 50% to \$0.23 - \$0.24 per transaction.
- Total expenses excluding the litigation settlement were up £25 million (\$22 million), or 5% reflecting a change in accrual methodology related to the annual incentive plan during Q1 2011, partially offset by a mortgage servicing rights recapture and the elimination of the Everyday Points rewards programme for consumer debit card customers in Q1 2012.
- Impairment losses declined by £92 million (\$146 million), or 83%, reflecting an improved credit environment as well as lower impairments related to securities.

Markets (continued)

Key points

Good progress has been made on the restructure announced in January 2012. The sale of Hoare Govett has been completed and sales of other businesses designated for exit are well advanced. The Markets management team and governance structure is in place and implementation of the new structure through the lower levels of the organisation is underway.

Markets benefited from a traditionally strong first quarter of the year as investors returned boosted by the ECB's Long Term Refinancing Operation (LTRO) programme and a re-emergence of confidence. However, overall activity and risk appetite remained tempered by continued concerns over the economic outlook, especially in Europe.

Q1 2012 compared with Q4 2011

- Markets returned to profit during Q1 2012, reflecting seasonally improved trading conditions and greater investor confidence.
- Rates benefited from the increased liquidity and normalisation in the markets following the success of the ECB's LTRO.
- Currencies fell back as client activity declined. In response, client interaction has been increased through a more extensive programme of trading and research contact.
- Asset backed products recovered strongly from a poor performance in Q4 2011. Trading volumes for non-agency products doubled, driven by strong investor demand, partly reflecting an improving macroeconomic environment in the United States.
- Capital Markets benefited from the improved credit environment following the ECB's LTRO and a seasonal recovery in origination activity. The EMEA origination business completed two large transactions during the quarter, generating significant fees. Flow credit trading benefited from a rally in corporate credit and inflows from US and European investors contrasting sharply with Q4 2011, when client activity and investor confidence were both weak.
- Total expenses increased by 22%, with staff costs up 54%, reflecting a higher incentive compensation accrual related to increased revenue compared with Q4 2011, partially offset by reduced headcount. Other costs declined as cost saving programmes continued to take effect. Improvement in the cost:income ratio, and a reduction in the compensation ratio largely reflected improved revenue performance.
- Impairments in both Q1 2012 and Q4 2011 reflected a small number of individual provisions.
- Markets continued to carefully manage the balance sheet, with third party assets falling by 4% compared with the end of 2011, well on track to meet previously disclosed funded balance sheet targets.
- Return on equity for the ongoing businesses was 21%, a significant improvement on the prior quarter due to the recovery in revenue.

Markets (continued)

Key points (continued)

Q1 2012 compared with Q1 2011

- Both Q1 2012 and Q1 2011 benefited from seasonally high levels of investor activity, with Q1 2012 reflecting a significant recovery from prior quarter activity levels.
- Operating profit of the ongoing businesses fell 17%, driven by lower revenue, partly offset by lower costs.
 - The largest absolute fall in revenue was in Asset Backed Products where the recovery in client demand in Q1 2012, though significant, was not as strong as Q1 2011. Balance sheet usage was materially reduced, despite an increase in 'pass-through' trading volumes following the reorganisation of the agency desk.
 - Similarly, Credit Markets also recovered in the quarter, although the increase in confidence and activity was less pronounced than Q1 2011.
 - Investor Products and Equity Derivatives weakened significantly compared with a particularly strong Q1 2011, falling by 43%, as client volumes were significantly below the levels of a year ago.
- Costs also declined, reflecting a lower level of incentive rewards and the implementation of cost saving measures, driving reduced headcount.
- Active balance sheet management has lowered third party assets by 18% with an emphasis on reducing levels of short-term unsecured wholesale funding, improving the stability of the funding base.
- Risk-weighted assets increased by 1% driven by the implementation of CRD III at the end of 2011, partially offset by lower levels of market risk across the period.
- Return on equity for the ongoing businesses fell from 26% to 21% reflecting lower revenue, combined with higher risk-weighted assets.

Combined operating ratio (7)	106%	100%	107%
Balance sheet			
Total insurance reserves - (£m) (8)	8,132	7,284	7,617

Notes:

- (1) 'Other' predominantly consists of the personal lines broker business and from Q1 2012 business previously reported in Non-Core.
- (2) Total in-force policies include travel and creditor policies sold through RBS Group. These comprise travel policies included in bank accounts e.g. Royalties Gold Account, and creditor policies sold with bank products including mortgage, loan and card payment protection.
- (3) Return on tangible equity is based on annualised operating profit after tax divided by average tangible equity. Q1 2012 tangible equity has been adjusted for a £300 million dividend paid to RBS Group on 27 March 2012.
- (4) Loss ratio is based on net claims divided by net premium income.
- (5) Commission ratio is based on fees and commissions divided by net premium income.
- (6) Expense ratio is based on expenses divided by net premium income.
- (7) Combined operating ratio is the sum of the loss, commission and expense ratios.
- (8) Consists of general and life insurance liabilities, unearned premium reserve and liability adequacy reserve. Q1 2012 includes business previously reported in Non-Core.

Key points

Direct Line Group continues to make good progress ahead of its divestment from the RBS Group. Q1 2012 operating profit of £84 million was negatively affected by adverse weather, but benefited from reserve releases from prior years.

The second phase of Direct Line Group's transformation plan - to rebuild competitive advantage - is continuing and tangible benefits are beginning to be delivered. During Q1 2012, Direct Line Group began renewing own brand Home policies on its new rating engine as part of the ongoing roll out of increased functionality. Additionally, since July last year, over 200,000 claims have been registered on the new claims management system and over 1,500 new claims are now processed every day. The rationalisation of sites continues as planned with one further location exited during Q1 2012.

In the period from 2009 to 2011 Motor in-force policies decreased by 27%, in line with the de-risking and exit of certain business lines during the first phase of Direct Line Group's transformation plan. During Q1 2012 Motor in-force policies grew by 1% marking a stabilisation of the portfolio. This was achieved whilst maintaining underwriting discipline.

Direct Line Group (continued)

Key points (continued)

During Q1 2012 Direct Line Group made progress with a number of partnership arrangements, which represent a significant portion of the Home segment. Expanding on the established relationship with Nationwide Building Society, a contract was signed to extend the provision of home insurance until the end of 2015. Direct Line Group is also concluding terms with UK Retail division for an arm's length, five year distribution agreement for the continued provision of general insurance products to its customers after the divestment of Direct Line Group. Additionally, following the launch of the Sainsbury's Bank car insurance partnership, during Q1 2012 the contract was extended to provide home insurance for Sainsbury's customers.

Following a period of strong growth, the International division consolidated its position in the quarter. Growth in Italy arose primarily from price increases, while in Germany a contract was signed with Check24 to expand Direct Line Group's market reach.

Commercial maintained underwriting discipline in a difficult market and work continued to improve the product offering and service to brokers.

Investment markets remained challenging with continued low yields. Direct Line Group's investment portfolio is composed primarily of cash, investment grade corporate bonds and gilts with minimal exposure to periphery Eurozone nations. At 31 March 2012, there was no exposure to debt issued in Portugal or Greece and a total exposure of £57 million, less than 1% of the portfolio, to debt issued in Ireland, Italy and Spain.

Separation update

Ahead of the planned divestment from RBS Group, which is targeted to commence in the second half of 2012 by way of a public flotation, subject to market conditions, Direct Line Group has continued with activities in readiness for standalone status. The first stage of the separation programme is progressing as Direct Line Group begins the novation or transfer of contracts with RBS Group suppliers, and where necessary, commencement of the tendering process for new contracts. Standalone head office and other control functions are being established and key senior management have been appointed. On 23 March 2012 the appointment of Mike Biggs as Chairman of Direct Line Group was announced. He brings with him extensive industry experience and a successful track record.

A significant milestone was reached for Direct Line Group's principal underwriting entity, U K Insurance Limited, being assigned an inaugural credit rating of A, with a stable outlook, from Standard and Poor's and an A2 rating, with a stable outlook, from Moody's Investors Service. Following publication of these ratings, Direct Line Group issued £500 million of Tier 2 subordinated debt on 27 April 2012.

Overall, Direct Line Group has powerful brands and is focused on delivering a disciplined, profitable business while maintaining a robust balance sheet. It has continued to make progress in executing the second phase of its business transformation plan, rebuilding competitive advantage.

Direct Line Group (continued)

Key points (continued)

Q1 2012 compared with Q4 2011

- Operating profit of £84 million was £41 million, 33%, lower compared with Q4 2011, due to higher weather related claims experienced during Q1 2012 and increased expenses resulting from the timing of marketing expenditure, partially offset by higher investment income. Q1 2012 includes the results of insurance business previously reported in Non-Core, which overall had a negligible impact on operating result.
- Gross written premium of £1,046 million rose by £96 million, or 10%, primarily as a result of the Motor sales campaign with enhanced Direct Line and Churchill marketing activity and an increase in International gross written premium, where a significant proportion of policies on the German book start on 1 January each year.
- Total income of £966 million rose £43 million, or 5%, primarily due to the non-repeat of £57 million profit share paid to UK Retail during Q4 2011, which was partially offset by commissions payable relating to business previously reported in Non-Core and lower net premium income.
- Net claims of £649 million were £60 million, or 10%, higher partly due to the adverse weather experienced early in Q1 2012 and the non-repeat of a release from creditor insurance reserves in Q4 2011, which was matched by a similar payment to UK Retail within fees and commissions.
- Direct expenses of £170 million were £16 million, or 10%, higher mainly due to the timing of marketing expenditure associated with the new Churchill advertising campaign.
- Investment income of £90 million was £30 million, or 50%, higher than Q4 2011 largely as a result of the inclusion of business previously reported in Non-Core and investment gains arising from portfolio management initiatives.
- Total in-force policies grew by 1% due to Rescue and other personal lines, Motor and International. Rescue and other personal lines business grew as a result of a one-off migration of UK Retail customers to packaged current accounts, increasing the uptake of bundled travel insurance. Additionally 43,000 in-force policies relate to business moved across from Non-Core during Q1 2012 in preparation for separation.

Direct Line Group (continued)

Key points (continued)

Q1 2012 compared with Q1 2011

- Operating profit rose by £17 million, or 25%, compared with Q1 2011 due to an improvement in loss ratio and higher investment income, which was partially offset by higher commissions payable and increased direct expenses relating to the timing of marketing and to the preparation for separation.
- Gross written premiums rose by £9 million, or 1%, driven by Motor as a result of sale and marketing campaigns and due to price increases in International.
- Total income fell by £104 million, or 10%, reflecting lower volumes written during the previous year following planned de-risking and higher commissions payable, partly due to the inclusion of business previously reported within Non-Core.
- Net claims decreased by £135 million, or 17%, through a combination of reduced exposure on Motor and the exit of certain business lines. Additionally Q1 2012 includes reserve releases from prior years.
- Direct expenses increased by £7 million or 4%, due to the marketing expenditure associated with the new Churchill advertising campaign, and activity to support separation.
- Investment income rose by £26 million, or 41%, compared with Q1 2011 due to the inclusion of business previously reported within Non-Core and investment gains arising from portfolio management initiatives.
- Combined operating ratio improved by 1 percent compared with Q1 2011 due to lower claims offset by higher expenses and commissions payable. For continuing business only (excluding personal lines broker and business previously reported in Non-Core) the combined operating ratio was 104% in Q1 2012 compared to 106% in Q1 2011.

Central items

	Quarter ended		
	31 March 2012	31 December 2011	31 March 2011
	£m	£m	£m
Central items not allocated	(144)	89	(32)

Note:

(1) Costs/charges are denoted by brackets.

Funding and operating costs have been allocated to operating divisions based on direct service usage, the requirement for market funding and other appropriate drivers where services span more than one division.

Residual unallocated items relate to volatile corporate items that do not naturally reside within a division.

Key points

Q1 2012 compared with Q4 2011

- Central items not allocated represented a debit of £144 million, a decrease of £233 million compared with Q4 2011. The debit primarily results from unallocated volatility costs in Group Treasury.
- Q4 2011 benefited from higher securities gains and a VAT recovery.

Q1 2012 compared with Q1 2011

- Central items not allocated represented a debit of £144 million, a decrease of £112 million compared with Q1 2011.
- The decrease was largely as a result of lower securities gains in Q1 2012, £90 million compared with £158 million.

Non-Core (continued)

Key points

Non-Core has maintained momentum from 2011 and delivered further reductions in third party assets, impairments and costs during Q1 2012.

Third party assets fell to £83 billion in the first quarter, a reduction of £11 billion driven principally by disposals of £5 billion and run-off of £4 billion. The division has also signed, but not yet completed, a further £5 billion of disposals, including the sale of RBS Aviation Capital.

The division continues to focus upon reducing exposures to current and future capital intensive positions. Risk-weighted assets decreased by £3 billion resulting from foreign exchange and mark-to-market movements of £4 billion, sales and run-off of £2 billion and market risk movements of £2 billion, largely offset by higher operational risk RWAs, up £4 billion. Restructuring and disposal activity also reduced Non-Core deductions to the capital base by £0.8 billion in Q1 2012.

An operating loss of £483 million in Q1 2012 was £799 million lower than Q4 2011. Income increased as the losses associated with restructuring monoline exposures and valuation movements on equity positions in Q4 2011 were not repeated. In addition, trading income increased as a result of tightening spreads and favourable market conditions. Impairments declined by £262 million which reflected improvements across the portfolio in general, although Ulster Bank charges remain elevated.

Q1 2012 compared with Q4 2011

- The lower operating loss of £483 million reflected improvements in income, costs and impairments.
- Trading losses decreased by £137 million, principally reflecting lower losses resulting from restructuring activity focussed on reducing capital intensive positions. Trading revenues also improved, as prices rallied and spreads tightened. Other income of £225 million was £376 million favourable to Q4 2011 due to positive equity valuation movements as well as gains on disposal of £182 million compared with losses of £36 million in Q4 2011.
- Third party assets fell by £11 billion to £83 billion in Q1 2012 principally reflecting disposals of £5 billion and run-off of £4 billion.

Q1 2012 compared with Q1 2011

- Third party assets of £83 billion were £42 billion lower than Q1 2011 principally reflecting disposals of £22 billion and run-off of £19 billion.
- Risk-weighted assets decreased by £39 billion between Q1 2011 and Q1 2012. The decrease principally reflects the restructuring of monoline exposures in 2011 which totalled £15 billion, and sales and run-off of £14 billion. A further £9 billion reduction was due to market risk reductions as a result of de-risking activities. These were partially offset by an increase in operational risk RWAs.
- The Q1 2012 operating loss of £483 million was £608 million favourable to Q1 2011 principally due to lower impairments incurred in relation to the Ulster Bank portfolio and reduced costs due to the ongoing run-down of the division, partially offset by lower revenues relate to the reduction of the balance sheet.
-

Since Q1 2011 headcount has reduced by approximately 2,400, 36%, reflecting business and country exits and run-down, specifically in India, China, RBS Sempra Commodities and Non-Core Insurance.

Other comprehensive income/(loss) before tax	4	(681)	(624)
Tax (charge)/credit	(19)	(500)	32
Other comprehensive loss after tax	(15)	(1,181)	(592)
Total comprehensive loss for the period	(1,553)	(2,961)	(1,121)
Total comprehensive loss is attributable to:			
Non-controlling interests	(3)	(12)	(9)
Ordinary and B shareholders	(1,550)	(2,949)	(1,112)
	(1,553)	(2,961)	(1,121)

Key points

- The movement in available-for-sale financial assets reflects net unrealised gains on sovereign bonds.
- Currency translation losses largely result from the 3.4% weakening of the US dollar against sterling during the quarter.
- The tax charge for Q4 2011 included a £664 million write-off of deferred tax assets in The Netherlands associated with available-for-sale assets in the liquidity portfolio.

Commentary on condensed consolidated balance sheet

Total assets of £1,403.0 billion at 31 March 2012 were down £103.8 billion, 7%, compared with 31 December 2011. This was principally driven by a decrease in the mark-to-market value of derivatives and a reduction in loans and advances to banks and customers.

Cash and balances at central banks increased £3.1 billion, 4%, to £82.4 billion principally due to the placing of short term surpluses.

Loans and advances to banks decreased £12.6 billion, 15%, to £70.7 billion. Within this, reverse repurchase agreements and stock borrowing ('reverse repos') were down £4.8 billion, 12%, to £34.6 billion and bank placings declined £7.8 billion, 18%, to £36.1 billion.

Loans and advances to customers declined £18.7 billion, 4%, to £496.9 billion. Within this, reverse repurchase agreements were down £5.0 billion, 8%, to £56.5 billion. Customer lending decreased by £13.7 billion, 3%, to £440.4 billion, or £13.4 billion, 3%, to £460.5 billion before impairments. This reflected planned reductions in Non-Core of £6.1 billion, along with declines in International Banking, £4.0 billion, Markets, £2.3 billion, UK Corporate, £0.9 billion, and Ulster Bank, £0.1 billion, together with the effect of exchange rate and other movements, £2.9 billion. These were partially offset by growth in UK Retail, £1.8 billion, US Retail & Commercial, £1.0 billion and Wealth, £0.1 billion.

Debt securities were down £13.1 billion, 6%, to £195.9 billion, driven mainly by reductions in holdings of Government securities within Markets and Group Treasury.

Equity shares increased £2.4 billion, 16%, to £17.6 billion reflecting seasonal increases in holdings.

Settlement balances increased £13.2 billion to £21.0 billion as a result of increased customer activity from seasonal year-end lows.

Movements in the value of derivative assets, down £76.3 billion, 14%, to £453.4 billion, and liabilities, down £77.4 billion, 15% to £446.5 billion, primarily reflect the mark-to-market movements on interest rate contracts and the effect of currency movements, with Sterling strengthening against both the US dollar and the Euro.

Deposits by banks decreased £1.7 billion, 2%, to £107.1 billion, with a decrease in inter-bank deposits, down £3.4 billion, 5%, to £65.7 billion partly offset by higher repurchase agreements and stock lending ('repos'), up £1.7 billion, 4%, to £41.4 billion.

Customer accounts were down £5.4 billion, 1%, to £497.5 billion. Within this, repos decreased £1.5 billion, 2%, to £87.3 billion. Excluding repos, customer deposits were down £3.9 billion, 1%, at £410.2 billion, reflecting decreases in Markets, £1.7 billion, UK Corporate, £1.8 billion, Ulster Bank, £0.7 billion, Non-Core, £0.6 billion and exchange and other movements, £2.5 billion. This was partly offset by increases in UK Retail, £2.4 billion, US Retail & Commercial, £0.6 billion, and International Banking, £0.4 billion.

Commentary on condensed consolidated balance sheet (continued)

Debt securities in issue declined £19.7 billion, 12%, to £142.9 billion largely due to the maturity of government guaranteed medium term notes within Markets and Group Treasury.

Settlement balances increased £10.1 billion to £17.6 billion as a result of increased customer activity from seasonal year-end lows.

Short positions were down £3.7 billion, 9%, to £37.3 billion, mirroring decreases in debt securities.

Subordinated liabilities were down £0.8 billion, 3%, to £25.5 billion, primarily reflecting the £0.6 billion net decrease in dated loan capital as a result of the liability management exercise completed in March 2012, with redemptions of £3.4 billion offset by the issuance of £2.8 billion new capital, together with exchange rate movements and other adjustments of £0.2 billion.

Owners' equity decreased by £1.4 billion, 2%, to £73.4 billion, due to the attributable loss for the period of £1.5 billion and exchange and other movements of £0.5 billion, partially offset by positive movements in available-for-sale reserves of £0.5 billion and the issue of £0.1 billion new ordinary shares in settlement of deferred variable compensation awards.

Notes

1. Basis of preparation

Having reviewed the Group's forecasts, projections and other relevant evidence, the directors have a reasonable expectation that the Group will continue in operational existence for the foreseeable future. Accordingly, the Form 6-K for the quarter ended 31 March 2012 has been prepared on a going concern basis.

2. Accounting policies

The annual accounts are prepared in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) and interpretations issued by the IFRS Interpretations Committee of the IASB as adopted by the European Union (EU) (together IFRS). There have been no significant changes to the Group's principal accounting policies as set out on pages 273 to 282 of the 2011 Form 20-F.

Payment Protection Insurance (PPI)

To reflect current experience of PPI complaints received, the Group has strengthened its provision for PPI by £125 million in Q1 2012, bringing the cumulative charge taken to £1.2 billion, of which £501 million in redress had been paid by 31 March 2012. The eventual cost is dependent upon complaint volumes, uphold rates and average redress costs. Assumptions relating to these are inherently uncertain and the ultimate financial impact may be different than the amount provided. The Group will continue to monitor the position closely and refresh its assumptions as more information becomes available.

UK tax rate change - deferred tax impact	(30)	27	(87)
Unrecognised timing differences	-	-	5
Non-deductible goodwill impairment	-	(24)	-
Items not allowed for tax			
- losses on strategic disposals and write-downs	(4)	(58)	(3)
- UK bank levy	(18)	(80)	-
- employee share schemes	(15)	(101)	(4)
- other disallowable items	(51)	(123)	(36)
Non-taxable items			
- gain on sale of Global Merchant Services	-	-	12
- other non-taxable items	24	208	12
Taxable foreign exchange movements	1	2	2
Losses brought forward and utilised	15	(29)	16
Adjustments in respect of prior periods	31	137	(5)
Actual tax (charge)/credit	(139)	186	(423)

The tax charge in the quarter ended 31 March 2012 reflects profits in high tax regimes (principally US) and losses in low tax regimes (principally Ireland), losses in overseas subsidiaries for which a deferred tax asset has not been recognised (principally Ireland and the Netherlands) and the derecognition of deferred tax assets of £161 million in respect of losses in Australia, following the strategic changes to the Markets and International Banking businesses announced in January 2012.

The combined effect of the tax losses in Ireland and the Netherlands in the quarter ended 31 March 2012 for which no deferred tax asset has been recognised and the derecognition of the deferred tax asset in respect of losses in Australia account for £387 million (80%) of the difference between the actual tax charge and the tax credit derived from applying the standard UK Corporation Tax rate to the results for the period.

The Group has recognised a deferred tax asset at 31 March 2012 of £3,849 million (31 December 2011 - £3,878 million; 31 March 2011 - £6,299 million) of which £3,134 million (31 December 2011 - £2,933 million; 31 March 2011 - £3,770 million) relates to carried forward trading losses in the UK. Under UK tax legislation, these UK losses can be carried forward indefinitely to be utilised against profits arising in the future. The Group has considered the carrying value of this asset as at 31 March 2012 and concluded that it is recoverable based on future profit projections.

(Loss)/profit attributable to non-controlling interests	(14)	18	(1)

7. Dividends

On 26 November 2009, RBS entered into a State Aid Commitment Deed with HM Treasury containing commitments and undertakings that were designed to ensure that HM Treasury was able to comply with the commitments to be given by it to the European Commission for the purposes of obtaining approval for the State aid provided to RBS. As part of these commitments and undertakings, RBS agreed not to pay discretionary coupons and dividends on its existing hybrid capital instruments for a period of two years. This period commenced on 30 April 2010 for RBS Group instruments (the two year deferral period for RBS Holdings N.V. instruments commenced on 1 April 2011). On 30 April 2012 this period ended for RBS Group instruments. RBS has determined that it is now in a position to recommence payments on the RBS Group instruments.

The Core Tier 1 capital impact of discretionary amounts that will be payable over the remainder of 2012 on the RBS Group instruments on which payments have previously been stopped is c.£350 million. In the context of recent macro-prudential policy discussions, the Board of RBS has decided to neutralise any impact on Core Tier 1 capital through equity issuance. Approximately £250 million of this is ascribed to equity funding of employee incentive awards through the sale of surplus shares held by the Group's Employee Benefit Trust, which is now substantially complete. An additional c.£100 million will be raised through the issue of new ordinary shares, which is expected to take place over time during the second half of 2012.

The Directors have declared the discretionary dividends on Series M, N, P, Q, R, S, and T non-cumulative dollar preference shares of US\$0.01 each for the three months to 30 June 2012, and the discretionary dividend on the Series 2 non-cumulative Euro preference shares of €0.01 for the 12 months to 30 June 2012. These discretionary dividends as well as the discretionary distributions on the RBSG/RBS innovative securities RBS Capital Trust A, RBS Capital Trust B, RBS Capital Trust D, RBS Capital Trust I, RBS Capital Trust II and RBS Capital Trust IV will be paid on their scheduled payment dates in June 2012. Future coupons and dividends on RBS Group hybrid capital instruments will only be paid subject to, and in accordance with, the terms of the relevant instruments.

9. Segmental analysis

In January 2012, the Group announced the reorganisation of its wholesale businesses into 'Markets' and 'International Banking'. Divisional results have been presented based on the new organisational structure. In addition, the Group had previously included movements in the fair value of own derivative liabilities within the Markets operating segment. These movements have now been combined with movements in the fair value of own debt in a single measure, 'own credit adjustments' and presented as a reconciling item. Refer to 'presentation of information' on page 5 for further details. Comparatives have been restated accordingly.

Analysis of divisional operating profit/(loss)

The following tables provide an analysis of divisional operating profit/(loss) for the quarters ended 31 March 2012, 31 December 2011 and 31 March 2011 by main income statement captions.

Quarter ended 31 March 2012	Net interest income £m	Non-interest income £m	Total income £m	Operating expenses £m	Insurance net claims £m	Impairment losses £m	Operating profit/(loss) £m

Other	2,995	51	32
Latent	-	-	79
Total	19,315	1,510	780

87

Notes (continued)

11. Valuation reserves

When valuing financial instruments in the trading book, adjustments are made to mid-market valuations to cover bid-offer spread, liquidity and credit risk.

Credit valuation adjustments and other adjustments

Credit valuation adjustments (CVA) represent an estimate of the adjustment to fair value that a market participant would make to incorporate the credit risk inherent in counterparty derivative exposures. The following table shows credit valuation adjustments and other reserves.

	31 March 2012 £m	31 December 2011 £m
CVA		
Monoline insurers	991	1,198
Credit derivative product companies (CDPCs)	624	1,034
Other counterparties	2,014	2,254
	3,629	4,486
Bid-offer, liquidity and other reserves	2,228	2,704
	5,857	7,190

Key points

- The gross exposure to monolines reduced in the quarter from £1.9 billion to £1.6 billion primarily due to an increase in underlying asset prices. The CVA decreased on a total basis reflecting the lower exposure, and also on a relative basis (from 63% to 60%) primarily due to tighter credit spreads.
- The exposure to CDPCs has decreased in Q1 2012 from £1.9 billion to £1.1 billion. This was primarily driven by tighter credit spreads of the underlying reference instruments, together with a decrease in the relative value of senior tranches compared with the underlying reference portfolios. Whilst the CVA decreased in line with the exposure, it increased marginally (from 55% to 56%) on a relative basis.
- The CVA held against exposures to other counterparties decreased in the quarter, principally reflecting credit spreads tightening.
- Bid-offer reserves decreased due to risk reduction and the impact of Greek government debt restructuring. Other reserves were also lower across a range of businesses and products.

Notes (continued)

11. Valuation reserves (continued)

Own credit

The following table shows the cumulative own credit adjustment recorded on securities classified as fair value through profit or loss and derivative liabilities.

Cumulative own credit adjustment (1)	Debt securities in issue (2)		Subordinated		Total Derivatives £m	Total (3) £m
	HFT £m	DFV £m	Total liabilities £m	DFV £m		
31 March 2012	91	1,207	1,298	520	1,818	2,284
31 December 2011	882	2,647	3,529	679	4,208	4,810
Carrying values of underlying liabilities	£bn	£bn	£bn	£bn	£bn	
31 March 2012	10.7	33.3	44.0	1.0	45.0	
31 December 2011	11.5	35.7	47.2	0.9	48.1	

Notes:

- (1) The own credit adjustment for fair value does not alter cash flows and is not used for performance management. It is disregarded for regulatory capital reporting processes and will reverse over time as the liabilities mature.
- (2) Consists of wholesale and retail note issuances.
- (3) The reserve movement between periods will not equate to the reported profit or loss for own credit. The balance sheet reserves are stated by conversion of underlying currency balances at spot rates for each period whereas the income statement includes intra-period foreign exchange sell-offs.

Key points

- Own credit adjustment decreased significantly during the quarter reflecting tightening of credit spreads across all tenors.
- Senior issued debt valuation adjustments are determined with reference to secondary debt issuance spreads. At 31 March 2012, the five year level tightened to 265 basis points from 451 basis points at the year end.
- Derivative liability own credit adjustment decreased as credit spreads tightened, for example the five year level was 299 basis points compared with 337 basis points at 31 December 2011.

Notes (continued)

12. Available-for-sale financial assets

The Q1 2012 movement in available-for-sale financial assets primarily reflects net unrealised gains on securities of £724 million, largely as yields tightened on sovereign bonds.

	Quarter ended		
	31 March	December	31 March
	2012	2011	2011
	£m	£m	£m
Available-for-sale reserve			
At beginning of period	(957)	(292)	(2,037)
Unrealised losses on Greek sovereign debt	-	(224)	-
Impairment of Greek sovereign debt	-	224	-
Other unrealised net gains	724	45	162
Realised net gains	(212)	(155)	(197)
Tax	6	(555)*	9
At end of period	(439)	(957)	(2,063)

* The Q4 2011 tax charge included a £664 million write-off of deferred tax assets in The Netherlands.

In Q2 2011, as a result of the deterioration in Greece's fiscal position and the announcement of proposals to restructure Greek government debt, the Group concluded that the Greek sovereign debt was impaired. Accordingly, £733 million of unrealised losses recognised in available-for-sale reserves together with £109 million related interest rate hedge adjustments were recycled to the income statement. Further losses of £224 million were recorded in Q4 2011.

Ireland, Italy, Portugal and Spain are facing less acute fiscal difficulties and the Group's sovereign exposures to these countries were not considered impaired at 31 March 2012.

13. Contingent liabilities and commitments

	31 March 2012			31 December 2011		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m
Contingent liabilities						
Guarantees and assets pledged as collateral security	22,660	921	23,581	23,702	1,330	25,032
Other contingent liabilities	11,582	223	11,805	10,667	245	10,912
	34,242	1,144	35,386	34,369	1,575	35,944
Commitments						
Undrawn formal standby facilities, credit lines and other commitments to lend	225,237	11,575	236,812	227,419	12,544	239,963
Other commitments	666	1,919	2,585	301	2,611	2,912

	225,903	13,494	239,397	227,720	15,155	242,875
Total contingent liabilities and commitments	260,145	14,638	274,783	262,089	16,730	278,819

Additional contingent liabilities arise in the normal course of the Group's business. It is not anticipated that any material loss will arise from these transactions.

Notes (continued)

14. Litigation, investigations, reviews and proceedings

Except for the developments noted below, there have been no material changes to the litigation and investigations, reviews and proceedings as disclosed in the Form 20-F for the year ended 31 December 2011.

Litigation

RBS Citizens N.A. and its affiliates were among more than thirty banks named as defendants in US class action lawsuits alleging that the way in which banks posted transactions to consumer accounts caused customers to incur excessive overdraft fees. The complaints against Citizens, which concerned the period between 2002 and 2010, alleged that this conduct violated its duty of good faith and fair dealing, and was unconscionable, an unfair trade practice and a conversion of customers' funds. Citizens has agreed to settle this case for \$137.5 million. A notice of settlement has been filed with the court, which requests that all proceedings in the case be stayed. If the settlement is given final approval by the court, consumers who do not opt out of the settlement will be deemed to have released any claims related to the allegations in the lawsuits.

Investigations, reviews and proceedings

On 26 March 2012, the FSA published a Final Notice, having reached a settlement with Coutts & Co under which Coutts agreed to pay a fine of £8.75 million. This follows an investigation by the FSA into Coutts & Co's anti-money laundering (AML) systems and controls in relation to high risk clients. The fine relates to activity undertaken between December 2007 and November 2010.

Coutts has cooperated fully and openly with the FSA throughout the investigation. Coutts accepts the findings contained in the FSA's Final Notice regarding certain failures to meet the relevant regulatory standards between December 2007 and November 2010. Coutts has found no evidence that money laundering took place during that time.

Since concerns were first identified by the FSA, Coutts & Co has enhanced its client relationship management process which included a review of its AML procedures, and is confident in its current processes and procedures.

During March 2008, the Group was advised by the SEC that it had commenced a non-public, formal investigation relating to the Group's United States sub-prime securities exposures and United States residential mortgage exposures. In December 2010, the SEC contacted the Group and indicated that it would also examine valuations of various RBS N.V. structured products, including CDOs. With respect to the latter inquiry, in March 2012, the SEC communicated to the Group that it had completed its investigation and that it did not, as of the date of that communication and based upon the information then in its possession, intend to recommend any enforcement action against RBS.

The Group continues to respond to investigations by various authorities into its submissions, communications and procedures relating to the setting of LIBOR and other interest rates, including the US Commodity Futures Trading Commission, the US Department of Justice, the European Commission, the FSA and the Japanese Financial Services Agency. In addition to co-operating with the investigations as described above, the Group is also keeping relevant regulators informed. It is not possible to estimate with any certainty what effect these investigations and any related developments may have on the Group, including the timing and effect of any resolution of these investigations.

Notes (continued)

15. Other developments

Proposed transfers of a substantial part of the business activities of RBS N.V. to The Royal Bank of Scotland plc (RBS plc)

On 19 April 2011, the Group announced its intention to transfer a substantial part of the business activities of The Royal Bank of Scotland N.V. (RBS N.V.) to RBS plc (the "Proposed Transfers"), subject, amongst other matters, to regulatory and other approvals, further tax and other analysis in respect of the assets and liabilities to be transferred and employee consultation procedures.

It is expected that the Proposed Transfers will be implemented on a phased basis over a period ending 31 December 2013. The transfer of substantially all of the UK business was completed during Q4 2011. A large part of the remainder of Proposed Transfers is expected to have taken place by the end of 2012.

On 26 March 2012, the Boards of The Royal Bank of Scotland Group plc, RBS plc, RBS Holdings N.V., RBS N.V. and RBS II B.V. announced that (1) RBS N.V. (as the demerging company) and RBS II B.V. (as the acquiring company) filed a proposal with the Dutch Trade Register for a legal demerger and (2) following a preliminary hearing at the Court of Session in Scotland, RBS plc and RBS II B.V. made filings with Companies House in the UK and the Dutch Trade Register respectively for a proposed cross-border merger of RBS II B.V. into RBS plc ("the Dutch Scheme").

Upon implementation of these proposals, a substantial part of the business conducted by RBS N.V. in the Netherlands as well as in certain EMEA branches of RBS N.V. will be transferred to RBS plc. Implementation will be by the demerger of the transferring businesses into RBS II B.V. by way of a Dutch statutory demerger followed by the merger of RBS II B.V. into RBS plc through a cross-border merger. RBS plc and RBS N.V. have discussed the transfer in detail with De Nederlandsche Bank and the Financial Services Authority.

Implementation is subject, amongst other matters, to regulatory and court approvals. Subject to these matters, it is expected that the Dutch Scheme will take effect on 9 July 2012.

Rating agencies

On 15 February 2012, Moody's placed the ratings of 114 European banks and 17 firms with global capital markets activities on review for possible downgrade. Included in the rating reviews were the ratings of RBS and certain subsidiaries. Moody's' long term ratings of RBS Group plc (A3), RBS plc (A2), NatWest (A2), RBS N.V. (A2), Ulster Bank Ltd (Baa1) and Ulster Bank Ireland Ltd (Baa1) are on review for possible downgrade; along with the short-term P-1 ratings of RBS plc, NatWest and RBS N.V. The short-term ratings of RBS Group plc, Ulster Bank Ireland Ltd and Ulster Bank Ltd were affirmed at P-2. Moody's cite three reasons for their reviews across all of the affected firms; (i) the adverse and prolonged impact of the euro area crisis; (ii) the deteriorating creditworthiness of euro, area sovereigns; and (iii) the substantial challenges faced by banks and securities firms with significant capital market activities.

Notes (continued)

15. Other developments (continued)

Following their ratings announcement on 15 February 2012, on 22 February 2012 Moody's also placed on review for possible downgrade selected ratings of North American bank subsidiaries of European banks. Included in these rating actions were the long-term (A2) and short-term (P-1) ratings of RBS Citizens, NA and Citizens Bank of Pennsylvania.

During the quarter, no material rating actions have been undertaken on the Group and RBS plc by the rating agencies, Standard & Poor's and Fitch Ratings.

16. Post balance sheet events

There have been no significant events between 31 March 2012 and the date of approval of this announcement which would require a change to or additional disclosure in the announcement.

Risk and balance sheet management

Balance sheet management

Capital

The Group aims to maintain an appropriate level of capital to meet its business needs and regulatory requirements. Capital adequacy and risk management are closely aligned. The Group's risk-weighted assets and risk asset ratios, calculated in accordance with Financial Services Authority (FSA) definitions, are set out below.

	31 March 2012	31 December 2011
	£bn	£bn
Risk-weighted assets (RWAs) by risk		
Credit risk	332.9	344.3
Counterparty risk	56.8	61.9
Market risk	61.0	64.0
Operational risk	45.8	37.9
	496.5	508.1
Asset Protection Scheme (APS) relief	(62.2)	(69.1)
	434.3	439.0
Risk asset ratios	%	%
Core Tier 1	10.8	10.6
Tier 1	13.2	13.0
Total	14.0	13.8

Key points

- RWAs excluding the effect of APS relief fell by £11.6 billion, largely reflecting the impact of large corporate portfolio deleveraging on credit risk RWAs in UK Corporate and International Banking and continued risk reduction in Non-Core.
- The decreases in counterparty risk (£5.1 billion) and market risk (£3.0 billion) RWAs were primarily in the Markets portfolios in Core and Non-Core.
- Operational risk RWAs, which are based on Group income for the three prior years, increased by £7.9 billion as 2008, when the Group recorded a substantial reduction in income, dropped out of the calculation.
- APS RWA relief declined by £6.9 billion, principally reflecting the £11.0 billion decrease in covered assets to £120.8 billion at 31 March 2012, mainly due to maturities, repayments and run-off.
- The Core Tier 1 APS benefit declined marginally from 90bp to 85bp at 31 March 2012.

Risk and balance sheet management (continued)

Risk and balance sheet management (continued)

Balance sheet management: Liquidity and funding risk

Summary

The Group continued to strengthen and de-risk its balance sheet, the benefits of which are reflected in improvements in its strong liquidity and funding metrics.

- Short-term wholesale funding excluding derivative collateral declined by £22.7 billion to £79.7 billion, 8% of the funded balance sheet, meeting the Group's medium-term target of less than 10%.
- In light of continued economic uncertainty, the Group has taken a prudent view and maintained a liquidity portfolio of £152.7 billion which is nearly twice short-term wholesale funding. This includes £69.5 billion of central bank cash balances, more than 2.5 times the Group's outstanding commercial paper and certificates of deposit.
- UK Retail deposits, both current and savings accounts, grew strongly, up 2% in Q1 2012. This growth was offset by a seasonal drop-off in deposits across other divisions. As a result, Group customer deposits decreased by 1%.
- The Group loan:deposit ratio improved due to deleveraging and stood at 106% at 31 March 2012 compared with 108% at 31 December 2011 and 116% at 31 March 2011.

Funding sources

The table below shows the Group's primary funding sources including deposits in disposal groups and excluding repurchase agreements.

	31 March 2012		31 December 2011	
	£m	%	£m	%
Deposits by banks				
- derivative cash collateral	29,390	4.4	31,807	4.6
- other deposits	36,428	5.5	37,307	5.3

Risk and balance sheet management (continued)

Balance sheet management: Liquidity and funding risk: Funding sources (continued)

	31 March 2012 £bn	31 December 2011 £bn
Short-term wholesale funding (STWF) (1)		
Bank deposits	32.7	32.9
Notes issued (2)	47.0	69.5
STWF excluding derivative collateral	79.7	102.4
Derivative collateral	29.4	31.8
STWF including derivative collateral	109.1	134.2
Interbank funding excluding derivative collateral (3)		
- bank deposits	36.4	37.3
- bank loans	(19.7)	(24.3)
Net interbank funding	16.7	13.0

Notes:

- (1) Short-term balances denote those with a residual maturity of less than one year and includes longer-term instruments that mature within twelve months of the reporting date.
- (2) See page 100 for details.
- (3) Deposits and loans include all maturities.

Key points

- Short-term wholesale funding excluding derivative collateral declined by £22.7 billion from £102.4 billion to £79.7 billion, primarily due to the maturity of £15.6 billion of notes issued under the UK Government Credit Guarantee Scheme (CGS). The remaining CGS notes of £5.7 billion will be repaid by May 2012.
- Commercial paper and certificates of deposit declined by £5.7 billion in the quarter and this trend is expected to continue in light of the Group's funding strategy.
- The Group continues to actively diversify its wholesale funding sources through access to both the secured and unsecured wholesale debt markets. During the quarter, the Group raised £2.3 billion of net term wholesale funding. It is not anticipated that there will be any further need to access the public debt markets for term wholesale funding during the remainder of 2012 due to the continuing deleveraging of the Group's balance sheet, growth in deposit balances and robust liquidity and funding position. The Group will continue to monitor market conditions and may selectively take advantage of opportunities in order to bring forward any future term wholesale funding refinancing needs where such issuance would improve the Group's overall wholesale funding costs.
- To further diversify its funding sources, the Group issued its first sterling denominated covered bond of £1 billion with a 12 year maturity and a US\$1.2 billion credit card securitisation.

- The Group accessed €10 billion from the European Central Bank's long-term refinancing operation facility to extend the term of the facilities funding euro denominated assets.

Risk and balance sheet management (continued)

Balance sheet management: Liquidity and funding risk: Funding sources (continued)

The table below shows the Group's debt securities in issue and subordinated liabilities by remaining maturity.

Debt securities in issue

	Conduit ABCP £m	Other CP and CDs £m	MTNs £m	Covered bonds £m	Securitisations £m	Total £m	Subordinated liabilities £m	Total notes issued £m	Total notes issued %

Term debt issuances

The table below shows debt securities with an original maturity of one year or more issued by the Group during the last two quarters.

	Quarter ended	
	31 March 2012 £m	31 December 2011 £m
Public		
- secured	1,784	3,223
Private		
- unsecured	1,676	911
- secured	-	500
Gross issuance	3,460	4,634
Buybacks	(1,129)	(1,270)
Net issuance	2,331	3,364

In addition, the Group issued £2.8 billion of new ten year lower tier 2 securities as part of a liability management exercise.

100

Risk and balance sheet management (continued)

Balance sheet management: Liquidity and funding risk (continued)

Liquidity portfolio

The table below shows the composition of the Group's liquidity portfolio (at estimated liquidity value). All assets within the liquidity portfolio are unencumbered.

	31 March 2012		31 December 2011	
	Quarterly average £m	Period end £m	Quarterly average £m	Period end £m
Cash and balances at central banks	91,287	69,489	89,377	69,932
Treasury bills	-	-	444	-
Central and local government bonds (1)				
- AAA rated governments and US agencies	19,085	29,639	30,421	29,632
- AA- to AA+ rated governments (2)	8,924	14,903	5,056	14,102
- governments rated below AA	797	544	1,011	955
- local government	3,980	2,933	4,517	4,302
	32,786	48,019	41,005	48,991
Other assets (3)				
- AAA rated	26,435	24,243	25,083	25,202
- below AAA rated and other high quality assets	9,194	10,972	11,400	11,205
	35,629	35,215	36,483	36,407
Total liquidity portfolio	159,702	152,723	167,309	155,330

Notes:

(1) Includes FSA eligible government bonds of £30.5 billion at 31 March 2012 (31 December 2011 - £36.7 billion).

(2) Includes AAA rated US government guaranteed and US government sponsored agencies.

(3) Includes assets eligible for discounting at central banks.

Key points

- The liquidity portfolio has consistently covered STWF by a wide margin. The £152.7 billion liquidity portfolio equates to 16% of the funded balance sheet and covers STWF by 1.9 times.
- The cash and balances at central banks of £69.5 billion are more than 2.5 times the amount of commercial paper and certificates of deposit outstanding at 31 March 2012.

Risk and balance sheet management (continued)

Balance sheet management: Liquidity and funding risk (continued)

Loan:deposit ratio and customer funding gap

The table below shows the quarterly trends in the Group's loan:deposit ratio and customer funding gap, including disposal groups.

	Loan:deposit ratio		Customer funding gap
	Group %	Core %	Group £bn
31 March 2012	106	93	27
31 December 2011	108	94	37
30 September 2011	112	95	52
30 June 2011	114	96	60
31 March 2011	116	96	67

Note:

(1) Loans are net of provisions and exclude repurchase agreements.

Key points

- The Group's loan:deposit ratio improved by 2% to 106% in the first quarter, driven by the continuing run-off of Non-Core and accelerated deleveraging in International Banking. It improved 10 percentage points from 116% in Q1 2011.
- The Core loan:deposit ratio improved 100 basis points to 93%.

Risk and balance sheet management (continued)

Balance sheet management: Liquidity and funding risk (continued)

Net stable funding ratio

The table below shows the Group's net stable funding ratio (NSFR), which represents a non-GAAP measure as described on page 4, estimated by applying the Basel III guidance issued in December 2010.

	31 March 2012		31 December 2011		Weighting %
	£bn	ASF (1) £bn	£bn	ASF (1) £bn	
Equity	75	75	76	76	100

- other	129	65	137	69	50
Other (3)	85	85	70	70	100
Total assets	1,403	463	1,507	455	
Undrawn commitments	237	12	240	12	5
Total assets and undrawn commitments	1,640	475	1,747	467	
Net stable funding ratio		109%		111%	

Notes:

- (1) Available stable funding.
- (2) Deferred tax, insurance liabilities and other liabilities.
- (3) Prepayments, accrued income, deferred tax, settlement balances and other assets.

Key points

- The NSFR remained broadly stable at 109% despite an £8 billion increase in term assets.
- Equity and long-term wholesale funding remained unchanged in the quarter resulting in available stable funding being maintained at £518 billion.
- Term assets increased by £8 billion in the quarter reflecting an increase in the seasonal settlement balances (£16 billion) and higher ineligible debt securities (£6 billion) due to some eurozone country downgrades. This was partially offset by reductions in both customer loans and advances (£10 billion) and eligible debt securities (£3 billion).

Risk and balance sheet management (continued)

Risk management: Credit risk

Credit risk is the risk of financial loss due to the failure of a customer to meet its obligation to settle outstanding amounts. The quantum and nature of credit risk assumed across the Group's different businesses vary considerably, while the overall credit risk outcome usually exhibits a high degree of correlation with the macroeconomic environment.

Loans and advances to customers by sector

In the table below loans and advances exclude disposal groups and repurchase agreements. Totals including disposal groups are also presented. Non-Core includes amounts relating to RFS MI of £0.5 billion at 31 March 2012 (31 December 2011 - £0.4 billion).

	31 March 2012			31 December 2011		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m

Loan impairment provisions including disposal groups	(9,443)	(11,429)	(20,872)	(9,065)	(11,486)	(20,551)
Net loans including disposal groups	397,735	61,935	459,670	404,998	68,519	473,517

Key points

.

Gross loans and advances excluding disposal groups decreased by £13.4 billion primarily driven by the managed run-off of Non-Core, which contracted by 8%. Other than UK Retail, lending declined in all Core businesses, most notably International Banking and Markets, reflecting both management action and weak customer demand.

- Despite a challenging environment, UK Retail lending to customers was up £1.8 billion as the business continues to focus on building its franchise.
- In International Banking, the portfolio loan book decreased by £4.7 billion across various sectors, reflecting capital management discipline and accelerated repayments.
- Markets' lending decreased by £2.6 billion, mainly to non-bank financial institutions reflecting lower collateral requirements.
- Property and construction lending decreased by £3.0 billion, principally due to Non-Core run-off and disposals.

Risk and balance sheet management (continued)

Risk management: Credit risk: Risk elements in lending

The table below analyses the Group's risk elements in lending (REIL). REIL are stated without giving effect to any security held which could reduce the eventual loss should it occur, nor any provision marked.

	31 March 2012			31 December 2011		
	Core £m	Non- Core £m	Total £m	Core £m	Non- Core £m	Total £m
Impaired loans (1)	15,007	23,023	38,030	15,306	23,441	38,747
Accruing loans past due 90 days or more (2)	1,323	447	1,770	1,556	542	2,098
Total REIL	16,330	23,470	39,800	16,862	23,983	40,845
REIL including disposal groups			41,330			42,394
REIL as a % of gross loans and advances (3)	4.3%	32.2%	8.6%	4.4%	30.1%	8.6%
Provisions as a % of REIL	54%	49%	51%	50%	48%	49%

Notes:

(1) All loans against which an impairment provision is held.

(2) Loans where an impairment event has taken place but no impairment provision recognised. This category is used for fully collateralised non-revolving credit facilities.

(3) Includes disposal groups and excludes reverse repos.

Key points

- Whilst overall Group REIL remained relatively stable at 8.6% of gross loans, provision coverage increased to 51% from 49%.
- Core REIL declined marginally and provision coverage increased to 54% from 50% which included increased coverage in Ulster Bank to 53% from 50%.
- The increase in Non-Core's REIL to gross loans ratio to 32.2% from 30.1% reflects a contraction in gross loans (8%), due to the continuing progress in managing down the Non-Core portfolio.

Risk and balance sheet management (continued)

Risk management: Credit risk: Risk elements in lending (continued)

The table below details the movements in REIL for the quarter ended 31 March 2012.

	Impaired loans			Other loans (1)			REIL

At 31 March 2012	15,007	23,023	38,030	1,323	447	1,770	16,330	23,470	39,800

Note:

(1) Accruing loans past due 90 days or more.

Key points

- REIL decreased by £1 billion, or 3% in the quarter, split equally between Core and Non-Core. Transfers to the performing book and disposals (£0.8 billion), debt repayments (£2.4 billion) and write-offs (£0.8 billion) were partially offset by additions (£3.3 billion).
- Ulster Bank (Core and Non-Core) REIL increased by £0.4 billion largely reflecting the challenging market conditions.

Risk and balance sheet management (continued)

Risk management: Credit risk: Loans, REIL and impairments by division

The table below analyses loans and advances to banks and customers (excluding reverse repos) and related REIL, provisions, impairments, write-offs and coverage ratios by division.

Risk and balance sheet management (continued)

Risk management: Credit risk: Loan impairment provisions

The table below analyses impairment provisions in respect of loans and advances to banks and customers.

	31 March 2012			31 December 2011		
	Core £m	Non-Core £m	Total £m	Core £m	Non-Core £m	Total £m
Individually assessed	2,829	9,998	12,827	2,674	9,960	12,634
Collectively assessed	4,543	792	5,335	4,279	861	5,140
Latent loss	1,291	623	1,914	1,339	647	1,986
Loans to customers	8,663	11,413	20,076	8,292	11,468	19,760
Loans to banks	134	1	135	122	1	123
Total provisions	8,797	11,414	20,211	8,414	11,469	19,883
Provisions as a % of REIL	54%	49%	51%	50%	48%	49%
Customer provisions as a % of customer loans (1)	2.3%	15.7%	4.4%	2.2%	14.4%	4.2%

Note:

(1) Includes disposal groups and excludes reverse repos.

Key points

- Group customer provisions remained relatively stable, although coverage of loans increased from 4.2% to 4.4%.
- Impairment provisions increased by £0.3 billion in the quarter predominately in Ulster Bank Core where continued elevated impairment charges on mortgages more than offset write-offs.
- Non-Core provisions remained at 2011 year end levels, with Ulster Bank contributing approximately 60% of the total, provision coverage increased to 15.7% from 14.4%.

Risk and balance sheet management (continued)

Risk management: Credit risk: Impairment charge

The table below analyses the impairment charge for loans and securities.

	31 March 2012			Quarter ended 31 December 2011				31 March 2011		
	Core £m	Non- Core £m	Total £m	Core £m	Non- Core £m	RFS MI £m	Total £m	Core £m	Non- Core £m	Total £m
Individually assessed	294	451	745	533	720	-	1,253	384	901	1,285
Collectively assessed	530	65	595	478	113	-	591	584	136	720
Latent loss	(40)	(17)	(57)	(87)	(103)	-	(190)	(116)	9	(107)
Loans to customers	784	499	1,283	924	730	-	1,654	852	1,046	1,898
Loans to banks	12	-	12	-	-	-	-	-	-	-
Securities - sovereign debt (1)	-	-	-	224	-	-	224	-	-	-
- other	29	(10)	19	17	21	2	40	20	29	49
Charge to income statement	825	489	1,314	1,165	751	2	1,918	872	1,075	1,947
Charge as a % of gross loans (2)	0.8%	2.7%	1.1%	0.9%	3.7%	-	1.3%	0.8%	4.0%	1.5%

Notes:

(1) Sovereign debt impairment and related interest rate hedge adjustments.

(2) Customer loan impairment charge as a percentage of gross customer loans including disposal groups and excluding reverse repurchase agreements.

Key points

- Group loan impairment losses of £1.3 billion fell by £0.4 billion or 22%, driven by lower individual charges in Non-Core and improvement across Retail & Commercial businesses, with the exception of Ulster Bank. Ulster Bank continues to face challenging credit conditions.
- Total Ulster Bank Group impairments were £0.7 billion compared with £0.6 billion in Q4 2011, primarily due to further deterioration in asset quality in the Core residential mortgage portfolio.
- The Group's customer loan impairment charge as a percentage of customer loans and advances was 1.1% compared with 1.3% in Q4 2011 and 1.5% in Q1 2011.
- In Q1 2012, as part of private sector involvement in the Greek government bail-out, the vast majority of the Group's available-for-sale portfolio of Greek government debt was exchanged for Greek government debt and European Financial Stability Facility notes. The Greek government debt received in the exchange was sold. During April 2012, the remaining Greek government debt that had not been exchanged in Q1 2012 was exchanged and the bonds received were also sold.

For more details on Ulster Bank (Core and Non-Core) loans, REIL, provisions and related coverage ratios, refer to pages 113 and 114.

Gross unrealised losses	-	-	(171)	(838)	(2,386)	(13)	(3,408)	(3,158)

Key points

.

Debt securities decreased by £13.1 billion or 6% in the first quarter, of which £9.9 billion were available-for-sale securities across the Group and £2.8 billion related to held-for-trading positions in Markets.

- Held-for-trading: decreased by £2.8 billion primarily in government bonds. The decrease in UK and US central and local government long positions was due to disposals, along with an increase in netting opportunities. Other government bonds included £21.2 billion long and £13.4 billion short positions relating to eurozone countries, of which £5.0 billion and £5.3 billion respectively related to eurozone periphery countries. The increase in financial institutions mainly relates to US agency residential mortgage-backed securities, as markets picked up.
- Available-for-sale: decreased by £9.9 billion, comprising £7.4 billion central and local government and £2.2 billion financial institutions. UK government bonds fell by £1.6 billion due to additional netting benefits (£1.1 billion) and a change in Direct Line Group investment strategy. Disposals from the RBS N.V. liquidity portfolio resulted in lower government bonds (£3.3 billion), primarily German and French. Non-Core disposals led to a £1.0 billion net reduction in ABS issued by non-bank financial institutions.

Risk and balance sheet management (continued)

Risk management: Credit risk: Debt securities (continued)

The table below analyses debt securities by issuer and external ratings. Ratings are based on the lowest of S&P, Moody's and Fitch.

	22,451	40,484	62,608	16,940	60,628	5,969	209,080	100	67,309

Key points

- The decrease in AAA rated debt securities related to the downgrading of France and Austria to AA+ and a decrease in UK government debt securities. Additionally, certain Spanish covered bonds and the Dutch bond portfolio were downgraded during the quarter.
- The decrease in A to AA- debt securities related to the further downgrade of Italy to BBB+ and a decrease in Japanese debt securities.
- Non-investment grade and unrated debt securities now account for 4% of the debt securities portfolio, down from 5% at the start of the year.

The table below analyses available-for-sale debt securities and related reserves, gross of tax.

Risk management: Credit risk: Ulster Bank Group (Core and Non-Core)

Overview

At 31 March 2012, Ulster Bank Group accounted for 10% of the Group's total gross customer loans and 9% of the Group's Core gross customer loans. The impairment charge of £654 million for Q1 2012 was £84 million higher than the charge for Q4 2011. The Q1 2012 charge was mainly driven by the residential mortgage and commercial real estate portfolios as high unemployment, austerity measures and economic uncertainty have reduced incomes and, together with limited liquidity, have depressed the property market.

Core

The impairment charge for Q1 2012 of £394 million was £67 million higher than the Q4 2011 charge. The mortgage sector accounted for £215 million (55%) of the Q1 2012 impairment charge (Q4 2011 - 41%). High unemployment, lower incomes and falling house prices have driven increases in mortgage impairments. An increase in the mortgage default portfolio in the quarter accounted for 75% of the rise in Q1 2012 REIL.

REIL increased by £351 million in the quarter, largely due to the continuing difficult conditions in residential mortgages.

Non-Core

The impairment charge for Q1 2012 was £260 million (Q4 2011 - £243 million), with the commercial real estate sector accounting for £226 million (87%) of the Q1 2012 charge. At 31 March 2012, 67% of REIL was in Non-Core (Q4 2011 - 68%). The majority of the Non-Core commercial real estate development portfolio (94%) is REIL, with 58% provision coverage.

Residential mortgages

The table below shows how the continued decrease in property values has affected the distribution of residential mortgages by indexed loan-to-value (LTV). LTV is based upon gross loan amounts and, whilst including defaulted loans, does not take account of provisions made.

	31 March 2012	31 December 2011
	£m	£m

> 110% and <= 130%	2,850	3,072
> 130%	7,486	6,517
Total portfolio average LTV at quarter end	112.5%	106.1%
Average LTV on new originations during the year	69.8%	73.9%

Key points

- The residential mortgage portfolio across Ulster Bank Group totalled £19.8 billion at 31 March 2012, with 89% in the Republic of Ireland and 11% in Northern Ireland.
- The mortgage REIL continued to increase as a result of the continued challenging economic environment. At 31 March 2012, REIL as a percentage of gross mortgages was 12.4% (by value) compared with 8.3% at 31 March 2011. The impairment charge for Q1 2012 was £215 million compared with £233 million for Q1 2011. Repossession levels were higher than in Q1 2011, with a total of 46 properties repossessed during Q1 2012 (compared with 37 during Q1 2011). 50% of repossessions during Q1 2012 were through voluntary surrender or abandonment of the property.
- Ulster Bank Group is assisting customers in this difficult environment. Mortgage forbearance policies, which are deployed through the 'Flex' initiative, are aimed at assisting customers in financial difficulty. At 31 March 2012, 9.4% (by value) of the mortgage book (£1.9 billion) was on a forbearance arrangement compared with 9.1% (£1.8 billion) at 31 December 2011. The majority of these forbearance arrangements are in the performing book (75%) and not 90 days past due.

Risk management: Credit risk: Ulster Bank Group (Core and Non-Core) (continued)

Commercial real estate

The commercial real estate lending portfolio for Ulster Bank Group totalled £16.3 billion at 31 March 2012, of which £11.7 billion or 71% is Non-Core. The geographic split of the total Ulster Bank Group commercial real estate portfolio remained similar to 2011, with 26% in Northern Ireland, 63% in the Republic of Ireland and 11% in the UK excluding Northern Ireland.

RoW	-	32	27	4	63
	2,686	6,685	6,495	1,247	17,113

Key points

- The outlook for commercial real estate remains challenging, with limited liquidity in the marketplace to support sales or refinancing. The decline in asset valuations continues to place pressure on the portfolio.
- Ulster Bank Group remains focused on proactive management, debt reduction and de-risking of its commercial real estate portfolio while maintaining and responsibly servicing the Core client base through the cycle.

Risk and balance sheet management (continued)

Risk management: Country risk

Country risk is the risk of material losses arising from significant country-specific events such as sovereign events (default or restructuring); economic events (contagion of sovereign default to other parts of the economy, cyclical economic shock); political events (transfer or convertibility restrictions and expropriation or nationalisation); and natural disaster or conflict. Such events have the potential to affect elements of the Group's credit portfolio that are directly or indirectly linked to the country in question and can also give rise to market, liquidity, operational and franchise risk related losses.

For further details of the Group's approach to country risk management, refer to pages 166 to 168 of the Group's 2011 Form 20-F.

The following tables show the Group's exposures by country of incorporation of the counterparty at 31 March 2012. Countries shown are those where the Group's balance sheet exposure to counterparties incorporated in the country exceeded £1 billion and the country had an external rating of A+ or below from S&P, Moody's or Fitch at 31 March 2012, as well as selected eurozone countries. The numbers are stated before taking into account the impact of mitigants, such as collateral (with the exception of repos), insurance or guarantees, which may have been taken to reduce or eliminate exposure to country risk events. Exposures relating to ocean-going vessels are not included due to their multinational nature.

Definitions of headings in the following tables:

Lending comprises gross loans and advances to: central and local government; central banks, including cash balances; other banks and financial institutions, incorporating overdraft and other short-term facilities; corporates, in large part loans and leases; and individuals, comprising mortgages, personal loans and credit card balances. Lending includes impaired loans and loans where an impairment event has taken place but no impairment provision is recognised.

Debt securities comprise securities classified as available-for-sale (AFS), loans and receivables (LAR), held-for-trading (HFT) and designated as at fair value through profit or loss (DFV). All debt securities other than LAR securities are carried at fair value. LAR debt securities are carried at amortised cost less impairment. HFT debt securities are presented as gross long positions (including DFV securities) and short positions per country. Impairment losses and exchange differences relating to AFS debt securities, together with interest are recognised in the income statement; other changes in the fair value of AFS securities are reported within AFS reserves, which are presented gross of tax.

Derivatives comprise the mark-to-market (mtm) value of such contracts after the effect of legally enforceable netting agreements, but gross of collateral. Reverse repurchase agreements (repos) comprise the mtm value of counterparty exposure arising from repo transactions net of collateral.

Balance sheet exposures comprise lending exposures, debt securities and derivatives and repo exposures.

Risk and balance sheet management (continued)

Risk management: Country risk (continued)

Contingent liabilities and commitments comprise contingent liabilities, including guarantees, and committed undrawn facilities.

Asset quality (AQ) - for the probability of default range relating to each internal asset quality band, refer to page 172 of the Group's 2011 Annual Report and Accounts.

Credit default swaps (CDSs) - under a CDS contract, the credit risk on the reference entity is transferred from the buyer to the seller. The fair value, or mtm, represents the balance sheet carrying value. The mtm value of CDSs is included within derivatives against the counterparty of the trade, as opposed to the reference entity. The notional is the par amount of the credit protection bought or sold and is included against the reference entity of the CDS contract.

The column CDS notional less fair value represents the notional less fair value amounts arising from sold positions netted against those arising from bought positions, and represents the net change in exposure for a given reference entity should the CDS contract be triggered by a credit event, assuming there is zero recovery rate. However, in most cases, the Group expects the recovery rate to be greater than zero and the change in exposure to be less than this amount.

Other eurozone - comprises Austria, Cyprus, Estonia, Finland, Malta, Slovakia and Slovenia.

Risk and balance sheet management (continued)

Risk management: Country risk (continued)

Key points

Exposures are affected by currency movements. Over the first quarter of 2012, sterling appreciated 3.4% against the US dollar and 0.4% against the euro.

- Balance sheet and off-balance sheet exposures to most countries declined in the first quarter of 2012 as the Group maintained a cautious stance and many clients reduced debt levels. The reductions were seen in all broad product categories and in all client groups, with a few exceptions as noted below. Non-Core exposure declined in most countries, particularly Germany and Spain, as a result of sales and repayments.
- Eurozone periphery (Ireland, Spain, Italy, Portugal and Greece) - Exposure decreased in all five countries, in part caused by significant reductions in available-for-sale debt securities. Most of the Group's exposure arises from the activities of Markets, International Banking, Ulster Bank (with respect to Ireland), and Group Treasury. The Group has large holdings of Spanish bank and financial institution mortgage-backed securities bonds and smaller quantities of Italian bonds. International Banking provides trade finance facilities to clients across Europe including the eurozone periphery.
- Ireland - The Group's exposure to Ireland is driven by Ulster Bank Group (88% of the Group's Irish exposure at 31 March 2012). The largest components of the Group's exposure are corporate lending of £18.7 billion (more than half of these loans being to the property sector - mainly commercial real estate, plus construction and building materials) and personal lending of £18.6 billion (mainly mortgages). In addition, the Group has cash and derivatives exposure to the Central Bank of Ireland (CBI), financial institutions and large international clients with funding subsidiaries based in Ireland.

Exposure to the central bank declined by £0.3 billion; this reduction was driven by a change in CBI regulatory requirements. Commercial real estate lending amounted to £10.8 billion at 31 March 2012, only slightly down from the 31 December 2011 level as adverse market conditions hampered asset disposals and refinancing. The commercial real estate lending exposure is largely in Ulster Bank Non-Core and includes REIL of £7.9 billion and loan provisions of £4.2 billion. In personal lending, residential mortgage loans amounted to £17.6 billion, including REIL of £2.4 billion and loan provisions of £1.1 billion. The residential housing market continues to suffer from weak domestic demand, with house prices now approximately 50% below their 2007 peak.

- Spain - The Group maintains strong relationships with selected banks, other financial institutions and large corporate clients. The exposure to Spain is driven by corporate lending and a sizeable ABS portfolio of £6.5 billion, including £6.1 billion of residential mortgage-backed securities covered bonds. The latter portfolio, which is the Group's largest exposure to the financial sector, continues to perform satisfactorily. The Group continues to monitor the situation closely, including undertaking stress analyses of this AFS portfolio.

Corporate lending decreased by £0.4 billion, due to reductions mostly in the natural resources and property sectors. Commercial real estate lending amounted to £2.3 billion at 31 March 2012, nearly all in Non-Core, and includes REIL of £1.0 billion and loan provisions of £0.3 billion.

Risk and balance sheet management (continued)

Risk management: Country risk (continued)

Key points (continued)

- Italy - The Group maintains strong relationships with Italian government entities, banks, other financial institutions and large corporate clients. In addition, the Group is an active market-maker in Italian government bonds, resulting in large gross long and short positions in held-for-trading securities.

Corporate lending declined by £0.7 billion largely to manufacturing companies. AFS government and private sector bond exposure was significantly reduced through sales.

- Portugal - Exposure was stable during the first quarter of 2012, as reductions in lending and a sale of some Group Treasury available-for-sale bonds were offset by a significant recovery in market prices.
- Greece - The Group recognised an impairment charge in respect of AFS Greek government bonds in 2011. It participated in the restructuring of the Greek government debt in March 2012, which resulted in new bonds, most of which were sold in March (the remainder were sold in April), and in £0.2 billion of AFS bonds issued by the European Financial Stability Facility incorporated in Luxembourg. The Group now has no exposure to AFS bonds issued by the Greek government.

Remaining exposure to Greece at the end of the first quarter was £0.8 billion. This largely comprised corporate lending (part of this being exposure to local subsidiaries of international companies) and also included some partly collateralised derivative and repo exposure to banks.

- Germany and the Netherlands - The Group holds significant short-term surplus liquidity with central banks given credit risk and capital considerations and limited alternative investment opportunities; this exposure also fluctuates as part of the Group's asset and liability management. In addition, net long held-for-trading positions in German and Dutch bonds in Markets increased driven by market opportunities; concurrently, German AFS bond positions in Group Treasury were reduced in line with internal liquidity management strategies.
- France - During the first quarter of 2012, in anticipation of widening credit spreads and as part of general risk management, the Group reduced its holdings in French bonds, both available-for-sale in Group Treasury and held-for-trading in Markets.

Risk and balance sheet management (continued)

Risk management: Country risk (continued)

Key points (continued)

- CDS protection bought and sold - The Group uses CDS contracts to manage both country and counterparty exposures.

During the first quarter of 2012, gross notional CDS contracts, bought and sold, decreased significantly. This was caused by maturing of contracts and by efforts to reduce counterparty credit exposures and risk-weighted assets through derivative compression trades and other means. In addition, the decrease in gross notional CDS positions contributed to a decrease in the fair value of bought and sold CDS contracts, which also declined due to a general narrowing of eurozone CDS spreads. However, spreads generally widened in April, reflecting renewed eurozone concerns.

Greek sovereign CDS positions were minimal at 31 March 2012 and were fully closed out in April, as the use of the collective action clause in the Greek debt swap resulted in a credit event occurring, which triggered Greek sovereign CDS contracts.

The Group primarily transacts these CDS contracts with investment-grade global financial institutions that are active participants in the CDS market. These transactions are subject to regular margining. For European peripheral sovereigns, credit protection has been purchased from a number of major European banks, predominantly outside the country of the reference entity. In a few cases where protection was bought from banks in the country of the reference entity, giving rise to wrong-way risk, the risk is mitigated through specific collateralisation.

Due to their bespoke nature, exposures relating to CDPCs and associated hedges have not been included as they cannot be meaningfully attributed to a particular country or reference entity. Nth-to-default basket swaps have also been excluded as they cannot be meaningfully attributed to a particular reference entity.

Risk and balance sheet management (continued)

Market risk

Market risk arises from changes in interest rates, foreign currency, credit spreads, equity prices and risk related factors such as market volatilities. The Group manages market risk centrally within its trading and non-trading portfolios through a comprehensive market risk management framework. This control framework includes qualitative guidance in the form of comprehensive policy statements, dealing authorities, limits based on, but not limited to, value-at-risk (VaR), stress testing, positions and sensitivity analyses.

For a description of the Group's basis of measurement and methodologies, refer to pages 229 to 231 of the Group's 2011 Annual Report and Accounts.

Following the implementation of CRD III at 31 December 2011, the Group is required to calculate: (i) an additional capital charge based on a stressed calibration of the VaR model - Stressed VaR; (ii) an Incremental Risk Charge to capture the default and migration risk for credit risk positions in the trading book; and (iii) an All Price Risk measure for correlation trading positions, subject to a capital floor that is based on standardised securitisation charges. The CRD III capital charges at 31 March 2012 are shown in the table below:

	31 March 2012 £m	31 December 2011 £m
Stressed VaR	1,793	1,682
Incremental Risk Charge	659	469
All Price Risk	262	297

The Group's US trading subsidiary was included in the internal models in March 2012 resulting in an increase in Incremental Risk Charge and Stressed VaR.

Daily distribution of Markets trading revenues

Note:

(1) The effect of any month end adjustments, not attributable to a specific daily market move, is spread evenly over the days in the month in question.

Risk and balance sheet management (continued)

Market risk (continued)

Key points

- Markets delivered higher trading revenues in Q1 2012 than in Q4 2011. This reflected the temporary improvement in global markets sentiment following the approval of Greece's bailout and debt restructuring and increased liquidity in Europe as a result of the European Central Bank's Long-Term Refinancing Operation programme.
- A higher volume of client activity and normalised bid-offer spreads contributed to more stable and consistent revenues compared with Q4 2011, as seen by trends in average daily revenue and standard deviation. The average daily revenue in Q1 2012 was £27 million compared with £9 million in Q4 2011. The standard deviation of the daily revenues in Q1 2012 was £15 million, down from £18 million in Q4 2011.
- The number of days with negative revenue decreased from 18 in Q4 2011 to two in Q1 2012, primarily reflecting the factors discussed above.
- The two most frequent results were daily revenue of: (i) between £15 million and £20 million, and (ii) between £25 million and £30 million, each of which occurred 13 times in Q1 2012. In Q4 2011, the most frequent result was daily revenue of between zero and £5 million, which occurred 12 times.

VaR disclosures

Counterparty Exposure Management (CEM) manages the OTC derivative counterparty credit and funding risk on behalf of Markets, by actively controlling risk concentrations and reducing unwanted risk exposures. The hedging transactions CEM enters into are booked in the trading book, and therefore contribute to the market risk VaR exposure of the Group. The counterparty exposures themselves are not captured in VaR for regulatory capital. In the interest of transparency and to more properly represent the exposure, CEM exposure and total VaR excluding CEM are disclosed separately.

The table below details VaR for the Group's trading portfolios, analysed by type of market risk exposure, and between Core, Non-Core, CEM and the Group's total trading VaR excluding CEM.

Risk and balance sheet management (continued)

Market risk (continued)

Trading VaR	31 March 2012				Quarter ended 31 December 2011				31 March 2011			
	Average	end	Maximum	Minimum	Average	end	Maximum	Minimum	Average	end	Maximum	Minimum

CEM (2)	79.1	78.5	84.2	73.3		75.8				43.9		
Total (excluding CEM) (2)	53.5	56.6	76.4	41.0		49.7				110.8		

Notes:

- (1) The Group benefits from diversification, which reflects the risk reduction achieved by allocating investments across various financial instrument types, industry counterparties, currencies and regions. The extent of diversification benefit depends on the correlation between the assets and risk factors in the portfolio at a particular time. Diversification has an inverse relationship with correlation. The diversification factor is the sum of the VaR on individual risk types less the total portfolio VaR.
- (2) CEM and total trading VaR excluding CEM for Q1 2012 have been presented on a minimum, maximum, average and period end basis. For comparative purposes, the period end VaR figures have been shown for Q4 2011 and Q1 2011.

Key points

- The Group's average and maximum total trading VaR and interest rate trading VaR were slightly higher during Q1 2012 than Q4 2011. This was largely driven by pre-hedging activity ahead of UK Gilt and Japanese Government bond auctions in which RBS participated.
- The eurozone sovereign crisis caused unrest in the credit markets over the quarter as France was downgraded and Greece's debt refinancing raised concerns over Italy and Spain's ability to refinance their debt. This caused credit spreads to widen over the majority of the quarter and impacted the Group's credit spread exposure, resulting in a higher average and maximum credit spread VaR in Q1 2012 than in Q4 2011.

Non-Core trading VaR showed a slight increase over Q1 2012 due to increased hedging activities in CEM as counterparty credit risks deteriorated.

Risk and balance sheet management (continued)

Market risk (continued)

The table below details VaR for the Group's non-trading portfolio, excluding the structured credit portfolio (SCP) and loans and receivables (LAR), analysed by type of market risk exposure and between Core, Non-Core CEM, and the Group's total non-trading VaR excluding CEM.

	31 March 2012				Quarter ended 31 December 2011				31 March 2011

	520	1,149	928	1,265	3,862	266	989	684	1,036	2,975

Note:

(1) MBS include sub-prime RMBS with a notional amount of £396 million (31 December 2011 - £401 million; 31 March 2011 - £455 million) and a fair value of £258 million (31 December 2011 - £252 million; 31 March 2011 - £330 million), all with residual maturities of greater than ten years.

The Structured Credit Portfolio is within Non-Core. The risk in this portfolio is not measured or disclosed using VaR, as the Group believes this is not an appropriate tool for the banking book portfolio, which comprises illiquid debt securities. These assets are reported on a drawn notional and fair value basis, and managed on a third party asset and RWA basis.

Key point

The CDO drawn notional was lower at 31 March 2012 than at 31 December 2011 due to the liquidation of legacy commercial real estate CDOs. Following the liquidation, the majority of the underlying assets were sold and the

retained MBS assets were added to the MBS portfolio, increasing the drawn notional at 31 March 2012.

Additional information

	31 March 2012	31 December 2011
Ordinary share price	£0.276	£0.202
Number of ordinary shares in issue	59,546m	59,228m

Capitalisation of the Group

The following table shows the Group's issued and fully paid share capital, owners' equity and indebtedness on an unaudited consolidated basis in accordance with IFRS as at 31 March 2012

	As at 31 March 2012 £m
Share capital - allotted, called up and fully paid	
Ordinary shares of 25p	14,886
B shares of £0.01	510
Dividend access share of £0.01	-
Non-cumulative preference shares of US\$0.01	1
Non-cumulative preference shares of €0.01	-
Non-cumulative preference shares of £1.00	-
	15,397
Retained income and other reserves	58,019
Owners' equity	73,416
Group indebtedness	
Subordinated liabilities	25,513
Debt securities in issue	142,943
Total indebtedness	168,456
Total capitalisation and indebtedness	241,872

Under IFRS, certain preference shares are classified as debt and are included in subordinated liabilities in the table above.

Since 31 March 2012 issuances of debt securities net of buybacks totalled £433 million.

Other than as disclosed above, the information contained in the tables above has not changed materially since 31 March 2012.

Additional information (continued)

Ratio of earnings to fixed charges	Quarter ended	Year ended 31 December				
	31 March 2012(3)	2011	2010	2009(3)	2008(3)	2007
Ratio of earnings to combined fixed charges and preference share dividends (1,2)						
- including interest on deposits	0.33	0.91	0.94	0.75	-0.05	1.45
- excluding interest on deposits		0.25	0.38	-	-	5.73
Ratio of earnings to fixed charges only (1,2)						
- including interest on deposits	0.33	0.91	0.95	0.80	-0.05	1.47
- excluding interest on deposits		0.25	0.44	-	-	6.53

Notes:

- (1) For this purpose, earnings consist of income before tax and non-controlling interests, plus fixed charges less the unremitted income of associated undertakings (share of profits less dividends received). Fixed charges consist of total interest expense, including or excluding interest on deposits and debt securities in issue, as appropriate, and the proportion of rental expense deemed representative of the interest factor (one third of total rental expenses).
- (2) The earnings for the quarter ended 31 March 2012 and for years ended 31 December 2011, 2010, 2009 and 2008, were inadequate to cover total fixed charges and preference share dividends. The coverage deficiency for total fixed charges and preference share dividends for the quarter ended 31 March 2012 was £1,404 million and for the years ended 31 December 2011, 2010, 2009 and 2008 were £766 million, £523 million, £3,582 million and £26,287 million, respectively. The coverage deficiency for fixed charges only for quarter ended 31 March 2012 was £1,404 million and for the years ended 31 December 2011, 2010, 2009 and 2008 were £766 million, £399 million, £2,647 million and £25,691 million, respectively.
- (3) Negative ratios have been excluded.

Appendix 1

Businesses outlined for
disposal

Appendix 1 Businesses outlined for disposal

To comply with EC State Aid requirements the Group agreed to make a series of divestments by the end of 2013: the disposal of Direct Line Group, Global Merchant Services and its interest in RBS Sempra Commodities JV. The Group also agreed to dispose of its RBS England and Wales and NatWest Scotland branch-based businesses, along with certain SME and corporate activities across the UK ('UK branch-based businesses'). The disposals of Global Merchant Services and RBS Sempra Commodities JV businesses have now effectively been completed.

The sale of the Group's UK branch-based businesses to Santander UK plc continues to make good progress.

The disposal of Direct Line Group, the base case plan for which is by way of a public flotation, is targeted to commence in the second half of 2012, subject to market conditions. External advisors have been appointed to assist the Group with the disposal and the process of separation is proceeding to plan. In the meantime, the business continues to be managed and reported as a separate core division.

The table below shows total income and operating profit of Direct Line Group and the UK branch-based businesses.

	Total income		Operating profit	
	Q1 2012 £m	FY 2011 £m	Q1 2012 £m	FY 2011 £m
Direct Line Group (1)	966	4,286	84	407
UK branch-based businesses (2)	226	959	79	319
Total	1,192	5,245	163	726

The table below shows the estimated risk-weighted assets, total assets and capital of the businesses identified for disposal.

	RWAs		Total assets		Capital	
	31 March 2012 £bn	31 December 2011 £bn	31 March 2012 £bn	31 December 2011 £bn	31 March 2012 £bn	31 December 2011 £bn
Direct Line Group (1)	n/m	n/m	13.3	13.9	4.1	4.4
UK branch-based businesses (2)	10.5	11.1	19.1	19.3	1.0	1.0
Total	10.5	11.1	32.4	33.2	5.1	5.4

Notes:

- (1) Total income includes investment income of £90 million (FY 2011 - £302 million). Total assets and estimated capital include approximately £0.9 billion of goodwill, of which £0.7 billion is attributed to Direct Line Group by RBS Group.
- (2) Estimated notional equity based on 10% (2011 - 9%) of RWAs.
