RBS Exchange Traded Notes

RBS Global Big Pharma ETNs (DRGS)

RBS Global Big Pharma Exchange Traded Notes ("RBS ETNs") are unsecured and senior obligations of The Royal Bank of Scotland plc ("RBS plc"), and are fully and unconditionally guaranteed by The Royal Bank of Scotland Group plc ("RBS Group"). Any payments on the RBS ETNs when they become due at maturity or upon early repurchase or redemption are dependent on the ability of RBS plc and RBS Group to pay, and are also subject to market risk.

The return on this RBS ETN is based on the performance of the NYSE Arca Equal Weighted Pharmaceutical Total Return Index(SM) (Bloomberg symbol: "DGETR INDEX") (the "Index").

The Index

Index Components: The Index comprises stocks and depository receipts of some of the largest companies involved in various phases of development, production and marketing of pharmaceuticals.

Equally Weighted: The Index is calculated using an equal-dollar weighting methodology so that each of the component securities in the Index is represented in approximately equal-dollar amounts. The Index component weights are set to equal dollar amounts at each rebalancing. During the quarter, each component's weight changes independently based on the price movements of each respective component stock. In addition, the Index is a total return index, which means that the level of the Index takes into account the cash dividends, if any, paid on the Index components.

Quarterly Rebalancing: The Index portfolio is rebalanced every quarter after the close of trading on the third Friday of March, June, September and December.

Source: Bloomberg. The table above presents the actual historical Dividend Yield calculated based on the cash dividends paid on the component securities of the NYSE Arca Equal Weighted Pharmaceutical Index(SM) (Price Return) and the S and P 500([R]) Index (Price Return) over the prior 12 months ending on the last trading day of March. Unlike total return indices, the levels of price return indices do not incorporate any cash dividends paid on their index components. See "Certain Key Terms" below for the calculation of the Dividend Yield.

CERTAIN RISK CONSIDERATIONS: The RBS ETNs involve risks not associated with an investment in conventional debt securities, including a possible loss of some or all of your investment. The level of the Index must increase by an amount sufficient to offset the aggregate investor fee applicable to the RBS ETNs in order for you to receive at least the principal amount of your investment back at maturity or upon early repurchase or redemption. The Index comprises securities of a limited number of companies concentrated in the pharmaceuticals industry, and may not be representative of an investment that provides exposure to the pharmaceutical industry as a whole. Even though the RBS ETNs are listed on the NYSE Arca, a trading market may not develop and the liquidity of the RBS ETNs may be limited and/or vary over time, as RBS plc is not required to maintain any listing of the RBS ETNs. The RBS ETNs are not principal protected and do not pay interest. Any payment on the RBS ETNs is subject to the ability of RBS plc, as the issuer, and RBS Group, as the guarantor, to pay their respective obligations when they become due. You should carefully consider whether the RBS ETNs are suited to your particular circumstances before you decide to purchase them. We urge you to consult with your investment, legal, accounting, tax and other advisors with respect to any investment in the RBS ETNs.

The RBS ETNs are not suitable for all investors. You should carefully read the relevant pricing supplement and prospectus, including the more detailed explanation of the risks involved in any investment in the RBS ETNs as described in the "Risk Factors" section of the pricing supplement, before investing.

CERTAIN KEY TERMS: The P/E Ratio, P/B Ratio and Dividend Yield information are sourced from Bloomberg. P/E Ratio is derived by dividing the closing level of the Price Return Index as of the specified date by the sum of the trailing 12-month earnings per share of the securities comprising the Price Return Index. P/B Ratio is derived by dividing the closing level of the Price Return Index as of the specified date by the sum of the book value per share of the securities comprising the Price Return Index as of that date. Dividend Yield means the sum of the gross dividends paid on the securities comprising the Price Return Index over the prior 12 months divided by the closing level of the Price Return Index as of the specified date; however, unlike the Index (which is a total return index), the level of the Price Return Index does not incorporate cash dividends paid on its components.

IMPORTANT INFORMATION: RBS plc and RBS Group have filed a registration statement (including a prospectus) with the U.S. Securities and Exchange Commission (SEC) for the offering of RBS ETNs to which this communication relates. Before you invest in any RBS ETNs, you should read the prospectus in that registration statement and other documents that have been filed by RBS plc and RBS Group with the SEC for more complete information about RBS plc and RBS Group, and the offering. You may get these documents for free by visiting EDGAR on the SEC's web site at www.sec.gov. Alternatively, RBS plc, RBS Securities Inc. (RBSSI) or any dealer participating in the offering will arrange to send you the prospectus and the pricing supplement at no charge if you request it by calling 1-855-RBS-ETPS (toll-free).
