The RBS Gold Trendpilot[TM] Exchange Traded Notes ("RBS ETNs") are unsecured and senior obligations of The Royal Bank of Scotland plc ("RBS plc"), and are fully and unconditionally guaranteed by The Royal Bank of Scotland Group plc ("RBS Group"). Any payments on the RBS ETNs when they become due at maturity or upon early repurchase or redemption are dependent on the ability of RBS plc and RBS Group to pay, and are also subject to market risk.

RBS Gold Trendpilot[TM] ETNs track the RBS Gold Trendpilot[TM] Index (USD) which provides:

Trend-following exposure using an objective and transparent methodology to either the Price of Gold Bullion or the Cash Rate; Gold Exposure in positive trending markets by tracking the Price of Gold Bullion; and Cash Rate Exposure in negative trending markets by tracking a hypothetical investment in 3-month U.S. Treasury bills as of the most recent weekly auction.

The above graph illustrates the operation of the Trendpilot[TM] Index Methodology. It does not reflect any actual performance of the Price of Gold Bullion or the Index, and is not an indication of how the Price of Gold Bullion or the Index may perform in the future. The hypothetical illustration above also does not include any fees, transaction costs or expenses.

If neither of the above conditions is satisfied, the trend of the Price of Gold Bullion will be the same as the trend of the Price of Gold Bullion on the immediately preceding Index business day. The Index will implement any trend reversal at the open of trading on the second Index business day immediately following the Index business day on which the Price of Gold Bullion trend switches from positive to negative or from negative to positive, as the case may be.
