Important notice

IMPORTANT INFORMATION: The Royal Bank of Scotland plc ("RBS plc") and The Royal Bank of Scotland Group plc ("RBS Group") (collectively, the RBS Entities) have filed a registration statement (including a prospectus) with the Securities and Exchange Commission (SEC) for the offering of RBS ETNs to which this communication may relate. Before you invest in any RBS ETNs, you should read the relevant prospectus in such registration statement and other documents that have been filed with the SEC for more complete information about the relevant RBS Entities and offerings. You may get these documents for free by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, RBS plc, RBS Group plc, or any dealer

participating in the relevant offering will arrange to send you the relevant prospectus and pricing supplements if you request by calling 1-855-RBS-ETPS (toll-free).

We have derived all information contained herein regarding indices, including, without limitation, their make-up, from publicly available information. Such information reflects the policies of, and is subject to change by, the relevant index developer. We have not participated in the preparation of, or independently verified, such publicly available information.

The RBS ETNs are not suitable for all investors. You should carefully read the relevant pricing supplement and prospectus, including the more detailed explanation of the risks involved in any investment in the RBS ETNs as described in the 'Risk Factors' section of the pricing supplement, before investing.

[rbs logo]

Risk considerations

An investment in the RBS ETNs involves significant risks. The applicable pricing supplement and prospectus for the RBS ETNs will describe material risks related to an investment in RBS ETNs. The risks include the following:

Credit risk of the relevant issuer and guarantor

- o RBS ETNs are unsecured and unsubordinated obligations of RBS plc and are fully and unconditionally guaranteed by RBS Group(1). If the issuer fails to make any required payment on the RBS ETNs, your receipt of such payment will depend on the ability of the guarantor to pay its obligations as they become due.
- o In addition, unlike ordinary debt securities, the RBS ETNs are not principal protected and do not pay interest. The RBS ETNs are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation, the Deposit Insurance Fund or any other government agency.

Market risk

- o The return on an RBS ETN will depend on the performance of the underlying market measure(s) which the RBS ETNs is linked. You may lose all or a significant amount of your investment in the RBS ETNs if the level(s) of the underlying market measure(s) were to decrease substantially.

Investor fees

- o The daily redemption value is the amount payable at maturity or upon early repurchase or redemption of your RBS ETNs and is reduced by the aggregate investor fee applicable to your ETNs.
- o As a result, the level of the underlying market measure(s) to which your RBS ETNs are linked must increase by an amount sufficient to offset the aggregate investor fee in order for you to receive at least the face amount of your investment at maturity or upon early repurchase or redemption.
- o If the level(s) of the underlying market measure(s) were to decrease or not increase sufficiently, you would receive less, and possibly significantly less, than your initial investment at maturity or upon early repurchase or redemption.

Liquidity risk

- o Even though RBS ETNs are expected to be listed on a US securities exchange, there is no guarantee that the listing will be maintained or that a secondary market will develop. The liquidity of the RBS ETNs may therefore be limited and/or vary over time. The issuer is not required to maintain any listing of RBS ETNs on any securities exchange.

Restrictions on your ability to offer RBS ETNs for repurchase by the issuer

- o Through your broker, you may offer RBS ETNs for repurchase by the issuer, subject to certain restrictions and procedures described in the applicable pricing supplement.

Call risk

- o The issuer also has the right to redeem your RBS ETNs, in its sole discretion. If the issuer elects to redeem your RBS ETNs, you may not be able to reinvest your proceeds in a comparable investment.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

(1) Certain RBS ETNs were originally issued by The Royal Bank of Scotland N.V. ("RBS N.V."), however, as of December 10, 2012, RBS plc assumed the obligations of RBS N.V. under those RBS ETNs and became the issuer of them.

The Trendpilot(TM) Methodology

The Trendpilot(TM) Methodology uses a benchmark index simple moving average to determine when to get in and out of the market

[graphic omitted]

Notes: (1) Some Trendpilot(TM) Indices may use a 100-Index business day simple moving average.

(2) Some Trendpilot(TM) Indices may use a three-day confirmation trigger.

This slide illustrates the Trendpilot(TM) methodology based on hypothetical movements in a hypothetical Benchmark Index and its 100 or 200-Index business day simple moving average. It does not reflect any actual performance of any Benchmark Index or any Trendpilot(TM) Index. This slide does not demonstrate historical data, and is not an indication of how any index will perform in the future. The hypothetical illustration above also does not include any fees, transaction costs or expenses. If neither of the above conditions is satisfied, the trend of the Benchmark Index will be the same as the trend of the Benchmark Index on the immediately preceding Index business day. The Index will implement any trend reversal at the open of trading on the second Index business day immediately following the Index business day on which the Benchmark Index trend switches from positive to negative or from negative to positive, as the case may be.
