Deutsche Bank AG Airbag Phoenix Autocallable Optimization Securities

\$3,407,000 Deutsche Bank AG Securities Linked to the Common Stock of Delta Air Lines, Inc. due May 31, 2016

\$4,154,000 Deutsche Bank AG Securities Linked to the Common Stock of The Dow Chemical Company due May 31, 2016

Investment Description

Airbag Phoenix Autocallable Optimization Securities (the “Securities”) are unsubordinated and unsecured obligations of Deutsche Bank AG, London Branch (the “Issuer”) with returns linked to the performance of the common stock of a specific company described herein (each, an “Underlying”). Each Security will have a face amount (the “Face Amount”) equal to \$1,000. If the Closing Price of the relevant Underlying on the applicable monthly Coupon Observation Date (including the Final Valuation Date) is greater than or equal to the Coupon Barrier, Deutsche Bank AG will pay you a monthly contingent coupon (a “Contingent Coupon”). Otherwise, no coupon will be accrued or payable with respect to that Coupon Observation Date. If the Closing Price of the relevant Underlying on any quarterly Autocall Observation Date (including the Final Valuation Date) is greater than or equal to the Initial Price, Deutsche Bank AG will automatically call the Securities and, for each \$1,000 Face Amount of Securities, pay you the Face Amount plus the applicable Contingent Coupon for that date and no further amounts will be owed to you. If the Securities are not automatically called and the Final Price is greater than or equal to the Conversion Price, Deutsche Bank AG will pay you at maturity a cash payment per \$1,000 Face Amount of Securities equal to the Face Amount. However, if the Securities are not automatically called and the Final Price is less than the Conversion Price, Deutsche Bank AG will deliver to you at maturity a number of shares of the applicable Underlying per \$1,000 Face Amount of Securities equal to the Face Amount divided by the Conversion Price (the “Share Delivery Amount”), which is expected to have a value of less than the Face Amount and may have no value at all. In addition, the applicable Contingent Coupon for the final month will be payable at maturity if the Final Price is greater than or equal to the applicable Coupon Barrier regardless of whether Deutsche Bank AG pays you the Face Amount or delivers the Share Delivery Amount at maturity. Investing in the Securities involves significant risks. You may lose some or all of your initial investment. In exchange for potentially receiving the Contingent Coupons, you are accepting the risk of receiving shares of the applicable Underlying at maturity that are worth less than your initial investment and the credit risk of the Issuer for all payments under the Securities. Generally, the higher the Contingent Coupon Rate on the Securities, the greater the risk of loss on such Securities. The contingent repayment of your initial investment applies only if you hold the Securities to maturity. Any payment on the Securities, including any payment of a Contingent Coupon, any payment upon an automatic call and any payment of your initial investment at maturity, is subject to the creditworthiness of the Issuer. If the Issuer were to default on its payment obligations, you might not receive any amounts owed to you under the terms of the Securities and you could lose your entire investment.

Features

q Contingent Coupon — If the Closing Price of the relevant Underlying on the applicable monthly Coupon Observation Date (including the Final Valuation Date) is greater than or equal to the Coupon Barrier, Deutsche Bank AG will pay you the relevant Contingent Coupon applicable to such Coupon Observation Date. q Automatically Callable — If the Closing Price of the relevant Underlying on any quarterly Autocall Observation Date (including the Final Valuation Date) is greater than or equal to the Initial Price, Deutsche Bank AG will automatically call the Securities and, for each \$1,000 Face Amount of Securities, pay you the Face Amount plus the applicable Contingent Coupon for that date and no further amounts will be owed to you. If the Securities are not automatically called, investors may have downside market exposure to the relevant Underlying at maturity.

q Downside Exposure with Contingent Repayment of Your Initial Investment at Maturity — If the Securities are not automatically called and the Final Price is greater than or equal to the Conversion Price, Deutsche Bank AG will pay you a cash payment per \$1,000 Face Amount of Securities equal to the Face Amount at maturity. However, if the Securities are not automatically called and the Final Price is less than the Conversion Price, Deutsche Bank AG will deliver to you at maturity a number of shares of the applicable Underlying equal to the Share Delivery Amount per \$1,000 Face Amount of Securities, which is expected to have a value of less than the Face Amount and may have no value at all. The contingent repayment of your initial investment only applies if you hold the Securities to maturity. Any payment on the Securities, including any payment of a Contingent Coupon, any payment upon an automatic call and any payment of your initial investment at maturity, is subject to the creditworthiness of the Issuer. If the Issuer were to default on its payment obligations, you might not receive any amounts owed to you under the terms of the Securities and you could lose your entire investment.

NOTICE TO INVESTORS: THE SECURITIES ARE SIGNIFICANTLY RISKIER THAN CONVENTIONAL DEBT INSTRUMENTS. THE ISSUER IS NOT NECESSARILY OBLIGATED TO REPAY THE FULL FACE AMOUNT OF SECURITIES AT MATURITY, AND THE SECURITIES CAN HAVE THE FULL DOWNSIDE MARKET RISK OF THE RELEVANT UNDERLYING. THIS MARKET RISK IS IN ADDITION TO THE CREDIT RISK INHERENT IN PURCHASING AN OBLIGATION OF DEUTSCHE BANK AG. YOU SHOULD NOT PURCHASE THE SECURITIES IF YOU DO NOT UNDERSTAND OR ARE NOT COMFORTABLE WITH THE SIGNIFICANT RISKS INVOLVED IN INVESTING IN THE SECURITIES. THE SECURITIES WILL NOT BE LISTED ON ANY SECURITIES EXCHANGE. YOU SHOULD CAREFULLY CONSIDER THE RISKS DESCRIBED UNDER “KEY RISKS” BEGINNING ON PAGE 6 OF THIS PRICING SUPPLEMENT AND UNDER “RISK FACTORS” BEGINNING ON PAGE 9 OF THE ACCOMPANYING PRODUCT SUPPLEMENT BEFORE PURCHASING ANY SECURITIES. EVENTS RELATING TO ANY OF THOSE RISKS, OR OTHER RISKS AND UNCERTAINTIES, COULD ADVERSELY

AFFECT THE MARKET VALUE OF, AND THE RETURN ON, YOUR SECURITIES. YOU MAY LOSE SOME OR ALL OF YOUR INITIAL INVESTMENT IN THE SECURITIES.

Issuer's Estimated Value of the Securities

The Issuer's estimated value of the Securities is equal to the sum of our valuations of the following two components of the Securities: (i) a bond and (ii) an embedded derivative(s). The value of the bond component of the Securities is calculated based on the present value of the stream of cash payments associated with a conventional bond with a principal amount equal to the Face Amount of Securities, discounted at an internal funding rate, which is determined primarily based on our market-based yield curve, adjusted to account for our funding needs and objectives for the period matching the term of the Securities. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt securities on equivalent terms. This difference in funding rate, as well as the agent's commissions, if any, and the estimated cost of hedging our obligations under the Securities, reduces the economic terms of the Securities to you and is expected to adversely affect the price at which you may be able to sell the Securities in any secondary market. The value of the embedded derivative(s) is calculated based on our internal pricing models using relevant parameter inputs such as expected interest and dividend rates and mid-market levels of price and volatility of the assets underlying the Securities or any futures, options or swaps related to such underlying assets. Our internal pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect.

The Issuer's estimated value of the Securities on the Trade Date (as disclosed on the cover of this pricing supplement) is less than the Issue Price of the Securities. The difference between the Issue Price and the Issuer's estimated value of the Securities on the Trade Date is due to the inclusion in the Issue Price of the agent's commissions, if any, and the cost of hedging our obligations under the Securities through one or more of our affiliates. Such hedging cost includes our or our affiliates' expected cost of providing such hedge, as well as the profit we or our affiliates expect to realize in consideration for assuming the risks inherent in providing such hedge.

The Issuer's estimated value of the Securities on the Trade Date does not represent the price at which we or any of our affiliates would be willing to purchase your Securities in the secondary market at any time. Assuming no changes in market conditions or our creditworthiness and other relevant factors, the price, if any, at which we or our affiliates would be willing to purchase the Securities from you in secondary market transactions, if at all, would generally be lower than both the Issue Price and the Issuer's estimated value of the Securities on the Trade Date. Our purchase price, if any, in secondary market transactions will be based on the estimated value of the Securities determined by reference to (i) the then-prevailing internal funding rate (adjusted by a spread) or another appropriate measure of our cost of funds and (ii) our pricing models at that time, less a bid spread determined after taking into account the size of the repurchase, the nature of the assets underlying the Securities and then-prevailing market conditions. The price we report to financial reporting services and to distributors of our Securities for use on customer account statements would generally be determined on the same basis. However, during the period of approximately five months beginning from the Trade Date, we or our affiliates may, in our sole discretion, increase the purchase price determined as described above by an amount equal to the declining differential between the Issue Price and the Issuer's estimated value of the Securities on the Trade Date, prorated over such period on a straight-line basis, for transactions that are individually and in the aggregate of the expected size for ordinary secondary market repurchases.
