Medium-Term Senior Notes, Series N

Citigroup Global Markets Holdings Inc. **Pricing Supplement No. 2018-USNCH1083**

Filed Pursuant to Rule 424(b)(2)

Registration Statement Nos. 333-216372 and 333-216372-01

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

Overview

The securities offered by this pricing supplement are unsecured senior debt securities issued by Citigroup Global Markets Holdings Inc. and guaranteed by Citigroup Inc. Unlike conventional debt securities, the securities do not pay interest and do not repay a fixed amount of principal at maturity. Instead, the securities offer a payment at maturity that may be greater than, equal to or less than the stated principal amount, depending on the performance of a basket (the “basket”) consisting of the following three basket components (with the weightings indicated parenthetically): the S&P 500® Index (60%), shares of the iShares® MSCI EAFE ETF (30%), and shares of the iShares® MSCI Emerging Markets ETF (10%).

The securities offer participation in any appreciation of the basket at the upside participation rate specified below and a limited buffer against the potential depreciation of the basket as described below. In exchange for those features, investors in the securities must be willing to forgo any dividends that may be paid on the basket components or the stocks included in or held by the basket components over the term of the securities. In addition, investors in the securities must be willing to accept downside exposure to any depreciation of the basket in excess of the 15.00% buffer amount. **If the basket depreciates by more than the buffer amount from the pricing date to the valuation date, you will lose 1% of the stated principal amount of your securities for every 1% by which that depreciation exceeds the buffer amount.**

In order to obtain the modified exposure to the basket that the securities provide, investors must be willing to accept (i) an investment that may have limited or no liquidity and (ii) the risk of not receiving any amount due under the securities if we and Citigroup Inc. default on our obligations. **All payments on the securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc.**

KEY TERMS

| | | | |
|-------------------|---|------------------|---------------------------------|
| Issuer: | Citigroup Global Markets Holdings Inc., a wholly owned subsidiary of Citigroup Inc. | | |
| Guarantee: | All payments due on the securities are fully and unconditionally guaranteed by Citigroup Inc. | | |
| Basket: | Basket Component | Weighting | Initial Component Value* |
| | S&P 500® Index (ticker symbol: “SPX”) | 60.00% | 2,588.26 |
| | iShares® MSCI EAFE ETF (ticker symbol: “EFA”) | 30.00% | \$67.94 |
| | iShares® MSCI Emerging Markets ETF (ticker symbol: | 10.00% | \$46.89 |

“EEM”)

* For each basket component, its closing level or closing price, as applicable, on the pricing date

Aggregate stated principal amount: \$925,000
Stated principal amount: \$1,000 per security
Pricing date: March 23, 2018
Issue date: March 28, 2018
Valuation date: March 24, 2021, subject to postponement if such date is not a scheduled trading day or if certain market disruption events occur with respect to a basket component
Maturity date: March 31, 2021
 For each \$1,000 stated principal amount security you hold at maturity, you will receive an amount in cash determined as follows:

If the final basket level is **greater than or equal to** the initial basket level:

\$1,000 + the upside return amount

If the final basket level is **less than** the initial basket level by an amount **less than or equal to** the buffer amount:
 \$1,000

Payment at maturity:

If the final basket level is **less than** the initial basket level by an amount **greater than** the buffer amount:
 $(\$1,000 \times \text{the basket performance factor}) + \150.00

If the basket depreciates from the initial basket level to the final basket level by more than the buffer amount, your payment at maturity will be less, and possibly significantly less, than the \$1,000 stated principal amount per security. You should not invest in the securities unless you are willing and able to bear the risk of losing a significant portion of your investment.

Initial basket level: 100
 $100 \times [1 + (\text{component return of SPX} \times 60.00\%) + (\text{component return of EFA} \times 30.00\%) + (\text{component return of EEM} \times 10.00\%)]$
Final basket level:
Component return: For each basket component: $(\text{final component value} - \text{initial component value}) / \text{initial component value}$
Final component value: For each basket component, the closing level or closing price, as applicable, of that basket component on the valuation date
Basket performance factor: The final basket level *divided by* the initial basket level
Basket percent increase: The final basket level *minus* the initial basket level, *divided by* the initial basket level
Upside return amount: $\$1,000 \times \text{the basket percent increase} \times \text{the upside participation rate}$
Upside participation rate: 103.05%
Buffer amount: 15.00%

| | | | |
|--|---|---------------------------------------|---------------------------|
| Listing: | The securities will not be listed on any securities exchange | | |
| CUSIP / ISIN: | 17324CTG1 / US17324CTG14 | | |
| Underwriter: | Citigroup Global Markets Inc. (“CGMI”), an affiliate of the issuer, acting as principal | | |
| Underwriting fee and issue price: | Issue price⁽¹⁾ | Underwriting fee⁽²⁾ | Proceeds to issuer |
| Per security: | \$1,000.00 | \$2.50 | \$997.50 |
| Total: | \$925,000.00 | \$2,312.50 | \$922,687.50 |

(1) On the date of this pricing supplement, the estimated value of the securities is \$981.30 per security, which is less than the issue price. The estimated value of the securities is based on CGMI’s proprietary pricing models and our internal funding rate. It is not an indication of actual profit to CGMI or other of our affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you at any time after issuance. See “Valuation of the Securities” in this pricing supplement.

(2) For more information on the distribution of the securities, see “Supplemental Plan of Distribution” in this pricing supplement. In addition to the underwriting fee, CGMI and its affiliates may profit from hedging activity related to this offering, even if the value of the securities declines. See “Use of Proceeds and Hedging” in the accompanying prospectus.

Investing in the securities involves risks not associated with an investment in conventional debt securities. See “Summary Risk Factors” beginning on page PS-4.

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of the securities or determined that this pricing supplement and the accompanying product supplement, underlying supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this pricing supplement together with the accompanying product supplement, underlying supplement, prospectus supplement and prospectus, each of which can be accessed via the following hyperlinks:

[Product Supplement No. EA-02-06 dated April 7, 2017](#) [Underlying Supplement No. 6 dated April 7, 2017](#)

[Prospectus Supplement and Prospectus each dated April 7, 2017](#)

The securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

Additional Information

General. The terms of the securities are set forth in the accompanying product supplement, prospectus supplement and prospectus, as supplemented by this pricing supplement. The accompanying product supplement, prospectus supplement and prospectus contain important disclosures that are not repeated in this pricing supplement. For example, certain events may occur that could affect your payment at maturity, such as market disruption events and other events affecting the basket components. These events and their consequences are described in the accompanying product supplement in the sections “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date,” “—Dilution and Reorganization Adjustments” and “—Delisting, Liquidation or Termination of an Underlying ETF” with respect to the basket components that are ETFs and in the sections “Description of the Securities—Certain Additional Terms for Securities Linked to an Underlying Index—Consequences of a Market Disruption Event; Postponement of a Valuation Date” and “—Discontinuance or Material Modification of an Underlying Index” with respect to the basket component that is an index. The accompanying underlying supplement contains important disclosures regarding the basket components that are not repeated in this pricing supplement. It is important that you read the accompanying product supplement, underlying supplement, prospectus supplement and prospectus together with this pricing supplement in connection with your investment in the securities. Certain terms used but not defined in this pricing supplement are defined in the accompanying product supplement.

Postponement of the valuation date. If the valuation date is postponed for a reason that affects less than all of the basket components, the final basket level will be calculated based on (i) for each unaffected basket component, its closing level or closing price, as applicable, on the originally scheduled valuation date and (ii) for each affected basket component, its closing level or closing price, as applicable, on the valuation date as postponed (or, if earlier, the first scheduled trading day for that basket component following the originally scheduled valuation date on which a market disruption event did not occur with respect to that basket component). See “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date” and “Description of the Securities—Certain Additional Terms for Securities Linked to an Underlying Index—Consequences of a Market Disruption Event; Postponement of a Valuation Date” in the accompanying product supplement.

Dilution and reorganization adjustments. The initial component value with respect to each basket component that is an ETF is a “Relevant Price” for purposes of the section “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments” in the accompanying product supplement. Accordingly, the initial component value for each of those basket components is subject to adjustment upon the occurrence of any of the events described in that section.

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

Hypothetical Examples

The diagram below illustrates your payment at maturity for a range of hypothetical percentage changes from the initial basket level to the final basket level.

Investors in the securities will not receive any dividends that may be paid on the basket components or the securities included in or held by the basket components. The diagram and examples below do not show any effect of lost dividend yield over the term of the securities. See “Summary Risk Factors—Investing in the securities is not equivalent to investing in the basket components” below.

Buffer Securities Payment at Maturity Diagram

n The Securities n The Basket

Your actual payment at maturity per security will depend on the actual final basket level, which will depend on the actual closing level or closing price, as applicable, of each basket component on the valuation date. The examples below are intended to illustrate how your payment at maturity will depend on whether the final basket level is greater than or less than the initial basket level and by how much. Hypothetical values in the examples have been rounded for ease of analysis.

Example 1—Upside Scenario. The hypothetical final basket level is 105.00 (an approximately 5.00% increase from the initial basket level), which is **greater than** the initial basket level.

| Basket Component | Initial Component Value | Hypothetical Final Component Value | Hypothetical Component Return |
|--|-------------------------|------------------------------------|-------------------------------|
| S&P 500 [®] Index | 2,588.26 | 2,847.09 | 10.00% |
| iShares [®] MSCI EAFE ETF | \$67.94 | \$71.34 | 5.00% |
| iShares [®] MSCI Emerging Markets ETF | \$46.89 | \$35.17 | -25.00% |

Hypothetical Final Basket Level: $100.00 \times [1 + (10.00\% \times 60.00\%) + (5.00\% \times 30.00\%) + (-25.00\% \times 10.00\%)]$
 $= 105.00$

Payment at maturity per security = \$1,000 + the upside return amount

$$= \$1,000 + (\$1,000 \times \text{the basket percent increase} \times \text{the upside participation rate})$$

$$= \$1,000 + (\$1,000 \times 5.00\% \times 103.05\%)$$

$$= \$1,000 + \$51.525$$

$$= \$1,051.525$$

March 2018 PS-3

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

Because the basket appreciated from the initial basket level to the hypothetical final basket level, your payment at maturity in this scenario would be equal to the \$1,000 stated principal amount per security *plus* the upside return amount, or \$1,051.525 per security.

Example 2—Par Scenario. The hypothetical final basket level is 95.00 (an approximately 5.00% decrease from the initial basket level), which is **less than** the initial basket level by amount that is **less than** the buffer amount of 15.00%.

| Basket Component | Initial Component Value | Hypothetical Final Component Value | Hypothetical Component Return |
|--|--|---|--------------------------------------|
| S&P 500 [®] Index | 2,588.26 | 1,682.37 | -35.00% |
| iShares [®] MSCI EAFE ETF | \$67.94 | \$98.51 | 45.00% |
| iShares [®] MSCI Emerging Markets ETF | \$46.89 | \$58.61 | 25.00% |
| Hypothetical Final Basket Level: | $100.00 \times [1 + (-35.00\% \times 60.00\%) + (45.00\% \times 30.00\%) + (25.00\% \times 10.00\%)]$ = 95.00 | | |

Payment at maturity per security = \$1,000

Because the basket did not depreciate from the initial basket level to the hypothetical final basket level by more than the 15.00% buffer amount, your payment at maturity in this scenario would be equal to the \$1,000 stated principal amount per security. In this example, the hypothetical final basket level is less than the initial basket level, and you would not receive a positive return on your investment in the securities, even though two of the three basket components have appreciated significantly from their initial component values. In this scenario, even though the iShares[®] MSCI EAFE ETF and the iShares[®] MSCI Emerging Markets ETF appreciated, that appreciation is more than offset by the depreciation of the S&P 500[®] Index.

Example 3—Downside Scenario. The hypothetical final basket level is 30.00 (an approximately 70.00% decrease from the initial basket level), which is **less than** the initial level by an amount that is **more than** the buffer amount of 15.00%.

| Basket Component | Initial Component Value | Hypothetical Final Component Value | Hypothetical Component Return |
|--|---|---|--------------------------------------|
| S&P 500 [®] Index | 2,588.26 | 724.71 | -72.00% |
| iShares [®] MSCI EAFE ETF | \$67.94 | \$27.18 | -60.00% |
| iShares [®] MSCI Emerging Markets ETF | \$46.89 | \$5.63 | -88.00% |
| Hypothetical Final Basket Level: | $100.00 \times [1 + (-72.00\% \times 60.00\%) + (-60.00\% \times 30.00\%) + (-88.00\% \times 10.00\%)] = 30.00$ | | |

Payment at maturity per security = (\$1,000 × the basket performance factor) + \$100.00

$$= (\$1,000 \times 30.00\%) + \$150.00$$

$$= \$450.00$$

Because the basket depreciated from the initial basket level to the hypothetical final basket level by more than the 15.00% buffer amount, your payment at maturity would reflect 1-to-1 exposure to the negative performance of the basket beyond the 15.00% buffer amount.

Summary Risk Factors

An investment in the securities is significantly riskier than an investment in conventional debt securities. The securities are subject to all of the risks associated with an investment in our conventional debt securities (guaranteed by Citigroup Inc.), including the risk that we and Citigroup Inc. may default on our obligations under the securities, and are also subject to risks associated with the basket components. Accordingly, the securities are suitable only for investors who are capable of understanding the complexities and risks of the securities. You should consult your own financial, tax and legal advisors as to the risks of an investment in the securities and the suitability of the securities in light of your particular circumstances.

The following is a summary of certain key risk factors for investors in the securities. You should read this summary together with the more detailed description of risks relating to an investment in the securities contained in the section “Risk Factors Relating to the Securities” beginning on page EA-6 in the accompanying product supplement. You should also carefully read the risk factors included in the accompanying prospectus supplement and in the documents

incorporated by reference in the accompanying prospectus, including Citigroup Inc.'s most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q, which describe risks relating to the business of Citigroup Inc. more generally.

You may lose up to 85.00% of your investment. Unlike conventional debt securities, the securities do not repay a fixed amount of principal at maturity. Instead, your payment at maturity will depend on the performance of the basket. If the basket depreciates by more than the buffer amount, you will lose 1% of the stated principal amount of the securities for every 1% by which that depreciation exceeds the buffer amount.

The securities do not pay interest. Unlike conventional debt securities, the securities do not pay interest or any other amounts prior to maturity. You should not invest in the securities if you seek current income during the term of the securities.

Investing in the securities is not equivalent to investing in the basket components. You will not have voting rights, rights to receive any dividends or distributions or any other rights with respect to the basket components or the securities included in or held

March 2018 PS-4

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

by the basket components. The payment scenarios described in this pricing supplement do not show any effect of lost dividend yield over the term of the securities.

Your payment at maturity depends on the closing levels or closing prices, as applicable, of the basket components on a single day. Because your payment at maturity depends solely on the closing levels or closing prices, as applicable, of the basket components on the valuation date, you are subject to the risk that the closing levels or closing prices on that day may be lower, and possibly significantly lower, than on one or more other dates during the term of the securities. If you had invested directly in the basket components, or if the payment at maturity were based on an average of the closing levels or closing prices, as applicable, of the basket components throughout the term of the securities, you might have achieved better returns.

The securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If we default on our obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the securities.

The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity. The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. CGMI currently intends to make a secondary market in relation to the securities and to provide an indicative bid price for the securities on a daily basis. Any indicative bid price for the securities provided by CGMI will be determined in CGMI's sole discretion, taking into account prevailing market conditions and other relevant factors, and will not be a representation by CGMI that the securities can be sold at that price, or at all. CGMI may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. If CGMI suspends or terminates making a market, there may be no secondary market at all for the securities because it is likely that CGMI will be the only broker-dealer that is willing to buy your securities prior to maturity. Accordingly, an investor must be prepared to hold the securities until maturity.

The estimated value of the securities on the pricing date, based on CGMI's proprietary pricing models and our internal funding rate, is less than the issue price. The difference is attributable to certain costs associated with selling, structuring and hedging the securities that are included in the issue price. These costs include (i) the selling concessions paid in connection with the offering of the securities, (ii) hedging and other costs incurred by us and our affiliates in connection with the offering of the securities and (iii) the expected profit (which may be more or less than actual profit) to CGMI or other of our affiliates in connection with hedging our obligations under the securities. These costs adversely affect the economic terms of the securities because, if they were lower, the economic terms of the securities would be more favorable to you. The economic terms of the securities are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the securities. See "The estimated value of the securities would be lower if it were calculated based on our secondary market rate" below.

The estimated value of the securities was determined for us by our affiliate using proprietary pricing models. CGMI derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary pricing models. In doing so, it may have made discretionary judgments about the inputs to its models, such as the volatility of the basket components, the correlation among the basket components, dividend yields on the basket components or

the securities included in or held by the basket components and interest rates. CGMI's views on these inputs may differ from your or others' views, and as an underwriter in this offering, CGMI's interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the securities. Moreover, the estimated value of the securities set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the securities for other purposes, including for accounting purposes. You should not invest in the securities because of the estimated value of the securities. Instead, you should be willing to hold the securities to maturity irrespective of the initial estimated value.

The estimated value of the securities would be lower if it were calculated based on our secondary market rate.

The estimated value of the securities included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the securities. Our internal funding rate is generally lower than our secondary market rate, which is the rate that CGMI will use in determining the value of the securities for purposes of any purchases of the securities from you in the secondary market. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the securities, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not an interest rate that we will pay to investors in the securities, which do not bear interest.

Because there is not an active market for traded instruments referencing our outstanding debt obligations, CGMI determines our secondary market rate based on the market price of traded instruments referencing the debt obligations of Citigroup Inc., our parent company and the guarantor of all payments due on the securities, but subject to adjustments that CGMI makes in its sole discretion. As a result, our secondary market rate is not a market-determined measure of our creditworthiness, but rather reflects the market's perception of our parent company's creditworthiness as adjusted for discretionary factors such as CGMI's preferences with respect to purchasing the securities prior to maturity.

March 2018 PS-5

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

The estimated value of the securities is not an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you in the secondary market. Any such secondary market price will fluctuate over the term of the securities based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the securities determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the securities than if our internal funding rate were used. In addition, any secondary market price for the securities will be reduced by a bid-ask spread, which may vary depending on the aggregate stated principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the securities will be less than the issue price.

The value of the securities prior to maturity will fluctuate based on many unpredictable factors. The value of your securities prior to maturity will fluctuate based on the levels or prices, as applicable, of the basket components and a number of other factors, including the volatility of the basket components, the correlation among the basket components, the dividend yields on the basket components or the securities included in or held by the basket components, changes in the exchange rate between the U.S. dollar and each of the currencies in which the stocks held by the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF trade, interest rates generally, the time remaining to maturity and our and Citigroup Inc.'s creditworthiness, as reflected in our secondary market rate. Changes in the levels or prices, as applicable, of the basket components may not result in a comparable change in the value of your securities. You should understand that the value of your securities at any time prior to maturity may be significantly less than the issue price.

Immediately following issuance, any secondary market bid price provided by CGMI, and the value that will be indicated on any brokerage account statements prepared by CGMI or its affiliates, will reflect a temporary upward adjustment. The amount of this temporary upward adjustment will steadily decline to zero over the temporary adjustment period. See "Valuation of the Securities" in this pricing supplement.

The basket components may offset each other. The performance of the basket components may not correlate with each other. If some of the basket components appreciate, the other basket components may not appreciate as much or may even depreciate. In such event, the appreciation of some of the basket components may be moderated, wholly offset or more than offset by lesser appreciation or by depreciation in the level or price, as applicable, of the other basket components.

The iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF are subject to risks associated with non-U.S. markets. Investments in securities linked to the value of non-U.S. stocks involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross shareholdings in companies in certain countries. Also, there is generally less publicly available information about companies in some of these jurisdictions than about U.S. companies that are subject to the reporting requirements of the SEC. Further, non-U.S. companies are generally subject to accounting, auditing and financial reporting standards and requirements and securities trading rules that are different from those applicable to U.S. reporting companies. The prices of securities issued in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws. Moreover, the economies in such countries may differ favorably or

unfavorably from the economy of the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resources and self-sufficiency.

Fluctuations in exchange rates will affect the prices of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF. Because the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF invest in stocks that are traded in non-U.S. currencies, while their net asset values are based on the U.S. dollar value of those stocks, holders of the securities will be exposed to currency exchange rate risk with respect to each of the currencies in which those stocks trade. If the U.S. dollar generally strengthens against the currencies in which those stocks trade, the prices of the shares of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF will be adversely affected for that reason alone and the payment at maturity on the securities may be reduced.

Exchange rate movements for a particular currency are volatile and are the result of numerous factors specific to the relevant country, including the supply of, and the demand for, those currencies, as well as government policy, intervention or actions, but are also influenced significantly from time to time by political or economic developments, and by macroeconomic factors and speculative actions related to each applicable region. An investor's net exposure will depend on the extent to which the currencies of the applicable countries strengthen or weaken against the U.S. dollar and the relative weight of each currency. Of particular importance to potential currency exchange risk are: existing and expected rates of inflation; existing and expected interest rate levels; the balance of payments; and the extent of governmental surpluses or deficits in the applicable countries and the United States. All of these factors are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of the applicable countries and the United States and other countries important to international trade and finance.

March 2018 PS-6

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

Investing in the securities exposes investors to risks associated with emerging markets equity securities. The stocks composing the iShares® MSCI Emerging Markets ETF and that are generally tracked by the iShares® MSCI Emerging Markets ETF have been issued by companies in various emerging markets. Countries with emerging markets may have relatively unstable governments, present the risks of nationalization of businesses, have restrictions on foreign ownership and prohibitions on the repatriation of assets and have less protection of property rights than more developed countries. The economies of countries with emerging markets may be based on only a few industries, be highly vulnerable to changes in local or global trade conditions and suffer from extreme and volatile debt burdens or inflation rates. Local securities markets may trade a small number of securities and be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times.

Even if the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF pays a dividend that it identifies as special or extraordinary, no adjustment will be required under the securities for that dividend unless it meets the criteria specified in the accompanying product supplement. In general, an adjustment will not be made under the terms of the securities for any cash dividend paid on shares of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF unless the amount of the dividend per share, together with any other dividends paid in the same quarter, exceeds the dividend paid per share in the most recent quarter by an amount equal to at least 10% of the closing price of the shares of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF on the date of declaration of the dividend. Any dividend will reduce the closing price of the shares of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF by the amount of the dividend per share. If the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF pays any dividend for which an adjustment is not made under the terms of the securities, holders of the securities will be adversely affected. See “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments—Certain Extraordinary Cash Dividends” in the accompanying product supplement.

An adjustment will not be made for all events that may have a dilutive effect on or otherwise adversely affect the market price of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF. For example, we will not make any adjustment for ordinary dividends or extraordinary dividends that do not meet the criteria described above. Moreover, the adjustments we do make may not fully offset the dilutive or adverse effect of the particular event. Investors in the securities may be adversely affected by such an event in a circumstance in which a direct holder of shares of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF would not.

The securities may become linked to shares of an issuer other than the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF upon the occurrence of a reorganization event or upon the delisting of the shares of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF. For example, if the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF enters into a merger agreement that provides for holders of its shares to receive shares of another entity, the shares of such other entity will become the applicable basket component for all purposes of the securities upon consummation of the merger. Additionally, if shares of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF are delisted, or the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF is otherwise terminated, the calculation agent may, in its sole discretion, select shares of another ETF to be the applicable basket component. See “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments” and “—Delisting, Liquidation or Termination of an Underlying ETF” in the accompanying product supplement.

The price and performance of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF may not completely track the performance of the indices they seek to track or the net asset values per share of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF. The iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF do not fully replicate the indices that they seek to track (each, an “ETF underlying index”) and may hold securities different from those included in their respective ETF underlying indices. In addition, the performance of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF reflect additional transaction costs and fees that are not included in the calculation of their respective ETF underlying indices. All of these factors may lead to a lack of correlation between the performance of shares of the iShares® MSCI EAFE ETF and shares of the iShares® MSCI Emerging Markets ETF and their respective ETF underlying indices. In addition, corporate actions with respect to the equity securities constituting the iShares® MSCI EAFE ETF’s or the iShares® MSCI Emerging Markets ETF’s respective ETF underlying indices or held by the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF (such as mergers and spin-offs) may impact the variance between the performance of shares of the iShares® MSCI EAFE ETF and shares of the iShares® MSCI Emerging Markets ETF and their respective ETF underlying indices. Finally, because shares of the iShares® MSCI EAFE ETF and shares of the iShares® MSCI Emerging Markets ETF are traded on NYSE Arca, Inc. and are subject to market supply and investor demand, the market value of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF may differ from their net asset values per share.

During periods of market volatility, securities underlying the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF may be unavailable in the secondary market, market participants may be unable to calculate accurately the net asset value per share of the iShares® MSCI EAFE ETF or the iShares® MSCI Emerging Markets ETF and the liquidity of shares of the iShares® MSCI EAFE ETF or shares of the iShares® MSCI Emerging Markets ETF may be adversely affected. This kind of market volatility may also disrupt the ability of market participants to create and redeem shares of the iShares® MSCI EAFE ETF or shares of the iShares® MSCI Emerging Markets ETF. Further, market volatility may adversely affect, sometimes materially, the price at which

March 2018 PS-7

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

market participants are willing to buy and sell shares of the iShares® MSCI EAFE ETF or shares of the iShares® MSCI Emerging Markets ETF. As a result, under these circumstances, the market value of shares of the iShares® MSCI EAFE ETF or shares of the iShares® MSCI Emerging Markets ETF may vary substantially from their net asset values per share. For all of the foregoing reasons, the performance of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF might not correlate with the performance of their respective ETF underlying indices and/or their net asset values per share, which could materially and adversely affect the value of the securities in the secondary market and/or reduce your payment at maturity.

An investment in the securities is not a diversified investment. The fact that the securities are linked to a basket does not mean that the securities represent a diversified investment. First, although the basket components differ in important respects, they each track the performance of equity markets, and each may perform poorly if there is a global downturn in equity markets. Second, the securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. No amount of diversification that may be represented by the basket components will offset the risk that we and Citigroup Inc. may default on our obligations.

Our offering of the securities is not a recommendation of the basket or the basket components. The fact that we are offering the securities does not mean that we believe that investing in an instrument linked to the basket or any of the basket components is likely to achieve favorable returns. In fact, as we are part of a global financial institution, our affiliates may have positions (including short positions) in the basket components or the securities included in or held by the basket components or in instruments related to the basket components or such securities over the term of the securities, and may publish research or express opinions, that in each case are inconsistent with an investment linked to the basket components. These and other activities of our affiliates may affect the values of the basket components in a way that has a negative impact on your interests as a holder of the securities.

The value of a basket component may be adversely affected by our or our affiliates' hedging and other trading activities. We have hedged our obligations under the securities through CGMI or other of our affiliates, who have taken positions directly in the applicable basket components or in the securities included in or held by the basket components and other financial instruments related to the basket components or such securities and may adjust such positions during the term of the securities. Our affiliates also trade the applicable basket components or the securities included in or held by the basket components and other financial instruments related to the basket components or such securities on a regular basis (taking long or short positions or both), for their accounts, for other accounts under their management or to facilitate transactions on behalf of customers. These activities could affect the values of the basket components in a way that negatively affects the value of the securities. They could also result in substantial returns for us or our affiliates while the value of the securities declines.

We and our affiliates may have economic interests that are adverse to yours as a result of our affiliates' business activities. Our affiliates may currently or from time to time engage in business with the issuers of the iShares® MSCI EAFE ETF and the iShares® MSCI Emerging Markets ETF and the issuers of the securities included in or held by the basket components, including extending loans to, making equity investments in or providing advisory services to such issuers. In the course of this business, we or our affiliates may acquire non-public information about such issuers, which we will not disclose to you. Moreover, if any of our affiliates is or becomes a creditor of any such issuer, they may exercise any remedies against such issuer that are available to them without regard to your interests.

The calculation agent, which is an affiliate of ours, will make important determinations with respect to the securities. If certain events occur, such as market disruption events, the discontinuance of the S&P 500[®] Index, or events with respect to the iShares[®] MSCI EAFE ETF or the iShares[®] MSCI Emerging Markets ETF that may require a dilution adjustment or the delisting of the iShares[®] MSCI EAFE ETF or the iShares[®] MSCI Emerging Markets ETF, CGMI, as calculation agent, will be required to make discretionary judgments that could significantly affect your payment at maturity. In making these judgments, the calculation agent's interests as an affiliate of ours could be adverse to your interests as a holder of the securities.

Changes that affect the basket components may affect the value of your securities. We are not affiliated with the investment adviser to the iShares[®] MSCI EAFE ETF or the iShares[®] MSCI Emerging Markets ETF or with the sponsors of the S&P 500[®] Index, the MSCI EAFE Index or the MSCI Emerging Markets Index. Changes that affect the basket components may affect the value of your securities. The sponsor of an index may add, delete or substitute the securities that constitute the index or make other methodological changes that could affect the level of the index. In addition, the investment advisors to an exchange-traded fund may change the manner in which the fund operates or its investment objectives at any time. We are not affiliated with any such index sponsor or investment advisor and, accordingly, we have no control over any changes any such index sponsor or investment adviser may make. Such changes could be made at any time and could adversely affect the performance of the basket components and the value of and your payment at maturity on the securities.

The U.S. federal tax consequences of an investment in the securities are unclear. There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service (the "IRS"). Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid forward contracts. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. Even if the treatment of the securities as prepaid forward contracts is respected, a security may be treated as a

Citigroup Global Markets Holdings Inc.

Buffer Securities Based on a Basket of Three Underliers Due March 31, 2021

“constructive ownership transaction,” with potentially adverse consequences described below under “United States Federal Tax Considerations.” In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

Section 871(m) of the Internal Revenue Code of 1986, as amended (the “Code”), imposes a withholding tax of up to 30% on “dividend equivalents” paid or deemed paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. In light of Treasury regulations, as modified by an IRS notice, that provide a general exemption for financial instruments issued in 2018 that do not have a “delta” of one, the securities should not be subject to withholding under Section 871(m). However, the IRS could challenge this conclusion. If withholding applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “United States Federal Tax Considerations” in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Hypothetical Historical Information About the Basket

Because the basket exists solely for purposes of these securities, historical information on the performance of the basket does not exist for dates prior to the pricing date for these securities. The graph below sets forth the hypothetical historical daily level of the basket for the period from January 2, 2008 to March 23, 2018, assuming that the basket was created on January 2, 2008 with the same basket components and corresponding weights in the basket and with a level of 100 on that date. The hypothetical performance of the basket is based on the actual closing levels and closing prices, as applicable, of the basket components on the applicable dates. We obtained these closing levels and closing prices from Bloomberg L.P., without independent verification. Any historical trend in the level of the basket during the period shown below is not an indication of the performance of the basket during the term of the securities.

Information About the Basket Components

S&P 500[®] Index

The S&P 500[®] Index consists of common stocks of 500 issuers selected to provide a performance benchmark for the large capitalization segment of the U.S. equity markets. It is calculated and maintained by S&P Dow Jones Indices LLC. The S&P 500[®] Index is reported by Bloomberg L.P. under the ticker symbol “SPX.”

“Standard & Poor’s,” “S&P” and “S&P 500” trademarks of Standard & Poor’s Financial Services LLC and have been licensed for use by Citigroup Inc. and its affiliates. As of July 31, 2017, the securities of companies with multiple share class structures are no longer eligible to be added to the S&P 500[®] Index, but securities already included in the S&P 500[®] Index have been grandfathered and are not affected by this change. For more information, see “Equity Index Descriptions—The S&P U.S. Indices—License Agreement” in the accompanying underlying supplement.

Please refer to the section “Equity Index Descriptions—The S&P U.S. Indices—The S&P 500[®] Index” in the accompanying underlying supplement for important disclosures regarding the S&P 500[®] Index.

Historical Information

The closing level of the S&P 500[®] Index on March 23, 2018 was 2,588.26.

The graph below shows the closing level of the S&P 500[®] Index for each day such level was available from January 2, 2008 to March 23, 2018. We obtained the closing levels from Bloomberg L.P., without independent verification. You should not take the historical levels of the S&P 500[®] Index as an indication of future performance.

iShares® MSCI EAFE ETF

The iShares® MSCI EAFE ETF is an exchange-traded fund that seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of publicly traded securities in certain developed markets, excluding the United States and Canada, as measured by the MSCI EAFE® Index. However, for purposes of the securities, the performance of the iShares® MSCI EAFE ETF will reflect only its price performance, as any dividends paid on the shares of the iShares® MSCI EAFE ETF will not be factored into a determination of the closing price of the iShares® MSCI EAFE ETF. The MSCI EAFE® Index was developed by MSCI Inc. as an equity benchmark for international stock performance, and is designed to measure equity market performance in certain developed markets, excluding the United States and Canada.

The iShares® MSCI EAFE ETF is an investment portfolio managed by iShares® Inc. BlackRock Fund Advisors is the investment adviser to the iShares® MSCI EAFE ETF. iShares®, Inc. is a registered investment company that consists of numerous separate investment portfolios, including the iShares® MSCI EAFE ETF. Information provided to or filed with the SEC by iShares®, Inc. pursuant to the Securities Act of 1933, as amended, and the Investment Company Act of 1940, as amended, can be located by reference to SEC file numbers 333-92935 and 811-09729, respectively, through the SEC's website at <http://www.sec.gov>. In addition, information may be obtained from other sources including, but not limited to, press releases, newspaper articles and other publicly disseminated documents. The iShares® MSCI EAFE ETF trades on the NYSE Arca under the ticker symbol "EFA."

Please refer to the section "Fund Descriptions—iShares® MSCI EAFE ETF" in the accompanying underlying supplement for important disclosures regarding the iShares® MSCI EAFE ETF.

Historical Information

The graph below shows the closing price of the shares of the iShares® MSCI EAFE ETF for each day such price was available from January 2, 2008 to March 23, 2018. The table that follows shows the high and low closing prices of, and dividends paid on, the shares of the iShares® MSCI EAFE ETF for each quarter in that same period. We obtained the closing prices and other information below from Bloomberg L.P., without independent verification. **You should not take the historical prices of the shares of the iShares® MSCI EAFE ETF as an indication of future performance.**
