Registration Statement Nos. 333-216372 and 333-216372-01

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust Due June 2, 2023

Overview

The securities offered by this pricing supplement are unsecured senior debt securities issued by Citigroup Global Markets Holdings Inc. and guaranteed by Citigroup Inc. Unlike conventional debt securities, the securities do not pay interest and do not repay a fixed amount of principal at maturity. Instead, the securities offer a payment at maturity with a value that may be greater than or less than the stated principal amount, depending on the performance of shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust (the “underlying shares”) from the initial share price to the final share price.

The securities offer modified exposure to the performance of the underlying shares, with (i) a minimum positive return at maturity so long as the final share price is greater than or equal to 80.00% of the initial share price and (ii) 1-to-1 participation in a limited range of appreciation of the underlying shares in excess of the minimum positive return. In exchange for these features, investors in the securities must be willing to forgo any appreciation of the underlying shares in excess of the maximum return at maturity specified below and any dividends that may be paid on the underlying shares over the term of the securities. In addition, investors in the securities must be willing to accept full downside exposure to the underlying shares if the underlying shares depreciate by more than 20.00%. **If the underlying shares depreciate by more than 20.00% from the pricing date to the valuation date, you will not be repaid the stated principal amount of your securities at maturity and, instead, will receive underlying shares (or, in our sole discretion, cash based on the value of those shares) expected to be worth less than your initial investment and possibly worth nothing. You may lose up to your entire investment in the securities.**

In order to obtain the modified exposure to the underlying shares that the securities provide, investors must be willing to accept (i) an investment that may have limited or no liquidity and (ii) the risk of not receiving any cash payment or delivery of underlying shares due under the securities if we and Citigroup Inc. default on our obligations. **All payments and/or deliveries on the securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc.**

KEY TERMS

Issuer:	Citigroup Global Markets Holdings Inc., a wholly owned subsidiary of Citigroup Inc.
Guarantee:	All payments due on the securities are fully and unconditionally guaranteed by Citigroup Inc.
Underlying shares:	Shares of the SPDR [®] Dow Jones [®] Industrial Average SM ETF Trust (NYSE Arca symbol: “DIA”) (the “underlying share issuer” or “ETF”)
Aggregate stated principal amount:	\$1,365,000
Stated principal amount:	\$1,000 per security

Pricing date:	May 30, 2018
Issue date:	June 4, 2018. See “Supplemental Plan of Distribution” in this pricing supplement for additional information.
Valuation date:	May 30, 2023, subject to postponement if such date is not a scheduled trading day or if certain market disruption events occur
Maturity date:	June 2, 2023 For each \$1,000 stated principal amount security you hold at maturity:
	<p>If the final share price is greater than or equal to the barrier price: \$1,000 + the greater of (i) the fixed return amount and (ii) \$1,000 × the share percent increase, subject to the maximum return at maturity</p> <p>If the final share price is less than the barrier price: A number of underlying shares equal to the equity ratio (or, in our sole discretion, cash in an amount equal to the equity ratio <i>multiplied</i> by the final share price)</p> <p>If the final share price is less than the barrier price, you will receive underlying shares (or, in our sole discretion, cash) expected to be worth less than 80.00% of the stated principal amount of your securities, and possibly nothing, at maturity. You should not invest in the securities unless you are willing and able to bear the risk of losing a significant portion of your investment.</p>
Payment at maturity:	
Initial share price:	\$246.70, the closing price of the underlying shares on the pricing date
Final share price:	The closing price of the underlying shares on the valuation date
Fixed return amount:	\$200.00 per security (20.00% of the stated principal amount). You will receive the fixed return amount only if the final share price is greater than or equal to the barrier price.
Equity ratio:	4.05351, the stated principal amount <i>divided by</i> the initial share price, subject to adjustment as described in this pricing supplement
Share percent increase:	The final share price <i>minus</i> the initial share price, <i>divided by</i> the initial share price
Maximum return at maturity:	\$700.00 (70.00% of the stated principal amount) per security. Because of the maximum return at maturity, the payment at maturity will not exceed \$1,700.00 per security.
Barrier price:	\$197.36, 80.00% of the initial share price
Listing:	The securities will not be listed on any securities exchange
CUSIP / ISIN:	17324XHZ6 / US17324XHZ69
Underwriter:	

Citigroup Global Markets Inc. (“CGMI”), an affiliate of the issuer, acting as principal

Underwriting fee and issue price:	Issue price⁽¹⁾⁽²⁾	Underwriting fee⁽³⁾	Proceeds to issuer
Per security:	\$1,000.00	\$30.00	\$970.00
Total:	\$1,365,000.00	\$40,950.00	\$1,324,050.00

(1) On the date of this pricing supplement, the estimated value of the securities is \$919.70 per security, which is less than the issue price. The estimated value of the securities is based on CGMI’s proprietary pricing models and our internal funding rate. It is not an indication of actual profit to CGMI or other of our affiliates, nor is it an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you at any time after issuance. See “Valuation of the Securities” in this pricing supplement.

(2) The issue price for investors purchasing the securities in fee-based advisory accounts will be \$970.00 per security, assuming no custodial fee is charged by a selected dealer, and up to \$975.00 per security, assuming the maximum custodial fee is charged by a selected dealer. See “Supplemental Plan of Distribution” in this pricing supplement.

(3) For more information on the distribution of the securities, see “Supplemental Plan of Distribution” in this pricing supplement. In addition to the underwriting fee, CGMI and its affiliates may profit from hedging activity related to this offering, even if the value of the securities declines. See “Use of Proceeds and Hedging” in the accompanying prospectus.

Investing in the securities involves risks not associated with an investment in conventional debt securities. See “Summary Risk Factors” beginning on page PS-6.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the securities or determined that this pricing supplement and the accompanying product supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

You should read this pricing supplement together with the accompanying product supplement, prospectus supplement and prospectus, each of which can be accessed via the hyperlinks below:

[Product Supplement No. EA-02-06 dated April 7, 2017](#) **[Prospectus Supplement and Prospectus, each dated April 7, 2017](#)**

The securities are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

Citigroup Global Markets Holdings Inc.

Due June 2, 2023

Additional Information

General. The terms of the securities are set forth in the accompanying product supplement, prospectus supplement and prospectus, as supplemented by this pricing supplement. The accompanying product supplement, prospectus supplement and prospectus contain important disclosures that are not repeated in this pricing supplement. For example, certain events may occur that could affect what you receive at maturity, such as market disruption events and other events affecting the underlying shares. These events and their consequences are described in the accompanying product supplement in the section “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Consequences of a Market Disruption Event; Postponement of a Valuation Date” and not in this pricing supplement. It is important that you read the accompanying product supplement, prospectus supplement and prospectus together with this pricing supplement in connection with your investment in the securities. Certain terms used but not defined in this pricing supplement are defined in the accompanying product supplement.

Dilution and Reorganization Adjustments. The initial share price, the barrier price and the equity ratio are each subject to adjustment upon the occurrence of any of the events described in the section “Additional Terms of the Securities—Dilution and Reorganization Adjustments” in this pricing supplement. That section supersedes the section “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments” in the accompanying product supplement.

Prospectus for ETF. In addition to this pricing supplement and the accompanying product supplement, prospectus supplement and prospectus, you should read the prospectus for the underlying share issuer on file at the SEC website, which can be accessed via the hyperlink below. The contents of that prospectus and any documents incorporated by reference therein are not incorporated by reference herein or in any way made a part hereof.

Prospectus dated February 13, 2018:

<https://www.sec.gov/Archives/edgar/data/1041130/000119312518045025/d472619d497.htm>

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

Hypothetical Examples

The diagram below illustrates the value of what you will receive at maturity for a range of hypothetical percentage changes from the initial share price to the final share price. On the maturity date, the value of any underlying shares you receive may differ from their value on the valuation date.

Investors in the securities will not receive any dividends that may be paid on the underlying shares or the securities included in or held by the underlying share issuer. The diagram and examples below do not show any effect of lost dividend yield over the term of the securities. See “Summary Risk Factors—You will not have voting rights, rights to receive any dividends or other distributions or any other rights with respect to the underlying shares unless and until you receive underlying shares at maturity” below.

Enhanced Barrier Digital Plus Securities Payment at Maturity Diagram

May 2018 PS-3

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

The table below indicates what your payment at maturity and total return on the securities would be for various hypothetical returns of the underlying shares, assuming the fixed return at maturity indicated above. Your actual payment at maturity and total return on the securities will depend on the actual final share price.

Hypothetical Return of the Underlying Shares ⁽¹⁾	Hypothetical Payment at Maturity per Security	Hypothetical Total Return on Securities at Maturity ⁽²⁾
100.00%	\$1,700.00	70.00%
75.00%	\$1,700.00	70.00%
70.00%	\$1,700.00	70.00%
50.00%	\$1,500.00	50.00%
20.00%	\$1,200.00	20.00%
10.00%	\$1,200.00	20.00%
5.00%	\$1,200.00	20.00%
0.00%	\$1,200.00	20.00%
-5.00%	\$1,200.00	20.00%
-10.00%	\$1,200.00	20.00%
-20.00%	\$1,200.00	20.00%
-20.01%	\$799.99	-20.01%
-30.00%	\$700.00	-30.00%
-40.00%	\$600.00	-40.00%
-50.00%	\$500.00	-50.00%
-100.00%	\$0.00	-100.00%

⁽¹⁾ Hypothetical return of the underlying shares = hypothetical percentage change from the initial share price to the final share price. Based on the closing price of the underlying shares on the valuation date. If we elect to deliver any underlying shares as payment at maturity, you will receive such underlying shares on the maturity date.

⁽²⁾ Hypothetical total return on securities at maturity = (a) (i) the value of the underlying shares or cash amount received at maturity *minus* (ii) the \$1,000 stated principal amount per security, *divided by* (b) \$1,000 stated principal amount per security.

The examples below are intended to illustrate how what you receive at maturity will depend on whether the final share price is greater than or less than the initial share price and by how much.

Example 1—Upside Scenario A. The hypothetical final share price is \$259.04 (an approximately 5.00% increase from the initial share price), which is **greater than** the initial share price by **less than** the fixed return of 20.00%.

Payment at maturity per security = \$1,000 + the greater of (i) the fixed return amount and (ii) \$1,000 × the share percent increase, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + the greater of (i) \$200.00 and (ii) \$1,000 × 5.00%, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + \$200.00, subject to the maximum return at maturity of \$700.00 per security

= \$1,200.00

Because the underlying shares appreciated from the initial share price to the hypothetical final share price and the fixed return amount is greater than the 5.00% return you would have received based on the performance of the underlying shares but less than the maximum return at maturity of 70.00%, your total return on the securities at maturity in this scenario would equal the fixed return of 20.00%.

Example 2—Upside Scenario B. The hypothetical final share price is \$370.05 (an approximately 50.00% increase from the initial share price), which is **greater than** the initial share price by **more than** the fixed return of 20.00% but **less than** the maximum return at maturity of 70.00%.

Payment at maturity per security = \$1,000 + the greater of (i) the fixed return amount and (ii) \$1,000 × the share percent increase, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + the greater of (i) \$200.00 and (ii) \$1,000 × 50.00%, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + \$500.00, subject to the maximum return at maturity of \$700.00 per security

= \$1,500.00

Because the underlying shares appreciated from the initial share price to the hypothetical final share price and the 50.00% return based on the performance of the underlying shares is greater than the fixed return amount but less than the maximum return at maturity, your total return on the securities at maturity in this scenario would reflect 1-to-1 exposure to the positive performance of the underlying shares.

May 2018 PS-4

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

Example 3—Upside Scenario C. The hypothetical final share price is \$493.40 (an approximately 100.00% increase from the initial share price), which is **greater than** the initial share price by **more than** both the fixed return of 20.00% and the maximum return at maturity of 70.00%.

Payment at maturity per security = \$1,000 + the greater of (i) the fixed return amount and (ii) \$1,000 × the share percent increase, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + the greater of (i) \$200.00 and (ii) \$1,000 × 100.00%, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + \$1,000.00, subject to the maximum return at maturity of \$700.00 per security

= \$1,700.00

Because the underlying shares appreciated from the initial share price to the hypothetical final share price and the 100.00% return based on the performance of the underlying shares is greater than the maximum return at maturity, your payment at maturity in this scenario would be equal to the maximum payment at maturity of \$1,700.00 per security. In this scenario, an investment in the securities would underperform a hypothetical alternative investment providing 1-to-1 exposure to the appreciation of the underlying shares without a maximum return.

Example 4—Upside Scenario D. The hypothetical final share price is \$234.37 (an approximately 5.00% decrease from the initial share price), which is **less than** the initial share price but **greater than** the barrier price.

Payment at maturity per security = \$1,000 + the greater of (i) the fixed return amount and (ii) \$1,000 × the share percent increase, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + the greater of (i) \$200.00 and (ii) \$1,000 × -5.00%, subject to the maximum return at maturity of \$700.00 per security

= \$1,000 + \$200.00, subject to the maximum return at maturity of \$700.00 per security

= \$1,200.00

Because the underlying shares did not depreciate from the initial share price to the hypothetical final share price by more than 20.00%, your payment at maturity in this scenario would be equal to the fixed return of 20.00%, even though the hypothetical final share price is less than the initial share price.

Example 5—Downside Scenario. The hypothetical final share price is \$74.01 (an approximately 70.00% decrease from the initial share price), which is **less than** the barrier price.

What you would receive at maturity per security = A number of underlying shares equal to the equity ratio (or, in our sole discretion, cash in an amount equal to the equity ratio × the final share price)

= 4.05351 underlying shares, with an aggregate cash value (based on the final share price) of \$300.00

Because the underlying shares depreciated from the initial share price to the hypothetical final share price by more than 20.00%, you would not be repaid the stated principal amount of your securities at maturity and instead would receive a number of underlying shares (or, in our sole discretion, cash based on the value thereof) expected to be worth less than the stated principal amount. In this example, the underlying shares have depreciated by 70.00% from their initial share price to their final share price, and the value of what you receive at maturity (based on the final share price) is worth 70.00% less than your initial investment.

Due June 2, 2023

Summary Risk Factors

An investment in the securities is significantly riskier than an investment in conventional debt securities. The securities are subject to all of the risks associated with an investment in our conventional debt securities (guaranteed by Citigroup Inc.), including the risk that we and Citigroup Inc. may default on our obligations under the securities, and are also subject to risks associated with the underlying shares. Accordingly, the securities are suitable only for investors who are capable of understanding the complexities and risks of the securities. You should consult your own financial, tax and legal advisors as to the risks of an investment in the securities and the suitability of the securities in light of your particular circumstances.

The following is a summary of certain key risk factors for investors in the securities. You should read this summary together with the more detailed description of risks relating to an investment in the securities contained in the section “Risk Factors Relating to the Securities” beginning on page EA-6 in the accompanying product supplement. You should also carefully read the risk factors included in the accompanying prospectus supplement and in the documents incorporated by reference in the accompanying prospectus, including Citigroup Inc.’s most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q, which describe risks relating to the business of Citigroup Inc. more generally.

You may lose some or all of your investment. Unlike conventional debt securities, the securities do not repay a fixed amount of principal at maturity. Instead, the value of what you receive at maturity will depend on the performance of the underlying shares. If the final share price is less than the barrier price, you will not receive the stated principal amount of your securities at maturity and, instead, will receive underlying shares (or, in our sole discretion, cash based on the value thereof) expected to be worth less than your initial investment in the securities and may be worth nothing. There is no minimum payment at maturity on the securities, and you may lose up to all of your investment.

We may elect, in our sole discretion, to pay you cash at maturity in lieu of delivering any underlying shares. If we elect to pay you cash at maturity in lieu of delivering any underlying shares, the amount of that cash may be less than the market value of the underlying shares on the maturity date because the market value will likely fluctuate between the valuation date and the maturity date. Conversely, if we do not exercise our cash election right and instead deliver underlying shares to you on the maturity date, the market value of such underlying shares may be less than the cash amount you would have received if we had exercised our cash election right. We will have no obligation to take your interests into account when deciding whether to exercise our cash election right.

The barrier feature of the securities exposes you to particular risks. While you will receive a minimum positive return if the underlying shares do not depreciate from the initial share price to the final share price by more than 20.00%, if the underlying shares do depreciate by more than 20.00% and as a result the final share price is less than the barrier price, you will receive underlying shares (or, in our sole discretion, cash based on the value thereof) expected to be worth less than \$800.00 per security and may be worth nothing. Therefore, the securities offer no protection at all if the underlying shares depreciate by more than 20.00% from the initial share price to the final share price. As a result, you may lose your entire investment in the securities.

Your potential return on the securities is limited. Your potential total return on the securities at maturity is limited to the maximum return at maturity of 70.00%, which is equivalent to a maximum return at maturity of \$700.00 per security. Any increase in the final share price over the initial share price by more than 70.00% will not increase your return on the securities.

The securities do not pay interest. Unlike conventional debt securities, the securities do not pay interest or any other amounts prior to maturity. You should not invest in the securities if you seek current income during the term of the securities.

You will not have voting rights, rights to receive any dividends or other distributions or any other rights with respect to the underlying shares unless and until you receive underlying shares at maturity. As of May 30, 2018, the trailing 12-month dividend yield of the underlying shares was approximately 2.02%. While it is impossible to know the future dividend yield of the underlying shares, if this trailing 12-month dividend yield were to remain constant for the term of the securities, you would be forgoing an aggregate yield of approximately 10.10% (assuming no reinvestment of dividends) by investing in the securities instead of investing directly in the underlying shares or in another investment linked to the underlying shares that provides for a pass-through of dividends. The payment scenarios described in this pricing supplement do not show any effect of lost dividend yield over the term of the securities. Furthermore, if any change to the underlying shares is proposed, such as an amendment to the underlying share issuer's organizational documents, you will not have the right to vote on such change, but you will be subject to such change in the event you receive underlying shares at maturity. Any such change may adversely affect the market price of the underlying shares.

What you receive at maturity depends on the closing price of the underlying shares on a single day. Because what you receive at maturity depends on the closing price of the underlying shares solely on the valuation date, you are subject to the risk that the closing price of the underlying shares on that day may be lower, and possibly significantly lower, than on one or more other dates during the term of the securities. If you had invested directly in the underlying shares or in another instrument linked to the

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

underlying shares that you could sell for full value at a time selected by you, or if the payment at maturity were based on an average of closing prices of the underlying shares, you might have achieved better returns.

The securities are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If we default on our obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the securities.

The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity. The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. CGMI currently intends to make a secondary market in relation to the securities and to provide an indicative bid price for the securities on a daily basis. Any indicative bid price for the securities provided by CGMI will be determined in CGMI's sole discretion, taking into account prevailing market conditions and other relevant factors, and will not be a representation by CGMI that the securities can be sold at that price, or at all. CGMI may suspend or terminate making a market and providing indicative bid prices without notice, at any time and for any reason. If CGMI suspends or terminates making a market, there may be no secondary market at all for the securities because it is likely that CGMI will be the only broker-dealer that is willing to buy your securities prior to maturity. Accordingly, an investor must be prepared to hold the securities until maturity.

The estimated value of the securities on the pricing date, based on CGMI's proprietary pricing models and our internal funding rate, is less than the issue price. The difference is attributable to certain costs associated with selling, structuring and hedging the securities that are included in the issue price. These costs include (i) the selling concessions paid in connection with the offering of the securities, (ii) hedging and other costs incurred by us and our affiliates in connection with the offering of the securities and (iii) the expected profit (which may be more or less than actual profit) to CGMI or other of our affiliates in connection with hedging our obligations under the securities. These costs adversely affect the economic terms of the securities because, if they were lower, the economic terms of the securities would be more favorable to you. The economic terms of the securities are also likely to be adversely affected by the use of our internal funding rate, rather than our secondary market rate, to price the securities. See "The estimated value of the securities would be lower if it were calculated based on our secondary market rate" below.

The estimated value of the securities was determined for us by our affiliate using proprietary pricing models. CGMI derived the estimated value disclosed on the cover page of this pricing supplement from its proprietary pricing models. In doing so, it may have made discretionary judgments about the inputs to its models, such as the volatility of the underlying shares, dividend yields on the underlying shares and the securities held by the underlying share issuer and interest rates. CGMI's views on these inputs may differ from your or others' views, and as an underwriter in this offering, CGMI's interests may conflict with yours. Both the models and the inputs to the models may prove to be wrong and therefore not an accurate reflection of the value of the securities. Moreover, the estimated value of the securities set forth on the cover page of this pricing supplement may differ from the value that we or our affiliates may determine for the securities for other purposes, including for accounting purposes. You should not invest in the securities because of the estimated value of the securities. Instead, you should be willing to hold the securities to

maturity irrespective of the initial estimated value.

The estimated value of the securities would be lower if it were calculated based on our secondary market rate.

The estimated value of the securities included in this pricing supplement is calculated based on our internal funding rate, which is the rate at which we are willing to borrow funds through the issuance of the securities. Our internal funding rate is generally lower than our secondary market rate, which is the rate that CGMI will use in determining the value of the securities for purposes of any purchases of the securities from you in the secondary market. If the estimated value included in this pricing supplement were based on our secondary market rate, rather than our internal funding rate, it would likely be lower. We determine our internal funding rate based on factors such as the costs associated with the securities, which are generally higher than the costs associated with conventional debt securities, and our liquidity needs and preferences. Our internal funding rate is not an interest rate that we will pay to investors in the securities, which do not bear interest.

Because there is not an active market for traded instruments referencing our outstanding debt obligations, CGMI determines our secondary market rate based on the market price of traded instruments referencing the debt obligations of Citigroup Inc., our parent company and the guarantor of all payments due on the securities, but subject to adjustments that CGMI makes in its sole discretion. As a result, our secondary market rate is not a market-determined measure of our creditworthiness, but rather reflects the market's perception of our parent company's creditworthiness as adjusted for discretionary factors such as CGMI's preferences with respect to purchasing the securities prior to maturity.

The estimated value of the securities is not an indication of the price, if any, at which CGMI or any other person may be willing to buy the securities from you in the secondary market. Any such secondary market price will fluctuate over the term of the securities based on the market and other factors described in the next risk factor. Moreover, unlike the estimated value included in this pricing supplement, any value of the securities determined for purposes of a secondary market transaction will be based on our secondary market rate, which will likely result in a lower value for the securities than if our internal funding rate were used. In addition, any secondary market price for the securities will be reduced by a bid-ask spread, which may vary depending on

May 2018 PS-7

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

the aggregate stated principal amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding related hedging transactions. As a result, it is likely that any secondary market price for the securities will be less than the issue price.

The value of the securities prior to maturity will fluctuate based on many unpredictable factors. The value of your securities prior to maturity will fluctuate based on the price and volatility of the underlying shares and a number of other factors, including the price and volatility of the securities held by the underlying share issuer, the dividend yields on the underlying shares and the securities held by the underlying share issuer, interest rates generally, the time remaining to maturity and our and Citigroup Inc.'s creditworthiness, as reflected in our secondary market rate. Changes in the price of the underlying shares may not result in a comparable change in the value of your securities. You should understand that the value of your securities at any time prior to maturity may be significantly less than the issue price.

Immediately following issuance, any secondary market bid price provided by CGMI, and the value that will be indicated on any brokerage account statements prepared by CGMI or its affiliates, will reflect a temporary upward adjustment. The amount of this temporary upward adjustment will steadily decline to zero over the temporary adjustment period. See "Valuation of the Securities" in this pricing supplement.

Our offering of the securities does not constitute a recommendation of the underlying shares. The fact that we are offering the securities does not mean that we believe that investing in an instrument linked to the underlying shares is likely to achieve favorable returns. In fact, as we are part of a global financial institution, our affiliates may have positions (including short positions) in the underlying shares or the securities held by the underlying share issuer over the term of the securities or in instruments related to the underlying shares or such securities over the term of the securities and may publish research or express opinions, that in each case are inconsistent with an investment linked to the underlying shares. These and other activities of our affiliates may affect the price of the underlying shares in a way that has a negative impact on your interests as a holder of the securities.

The price of the underlying shares may be adversely affected by our or our affiliates' hedging and other trading activities. We have hedged our obligations under the securities through CGMI or other of our affiliates, who have taken positions directly in the underlying shares or the securities held by the underlying share issuer and other financial instruments related to the underlying shares or such securities and may adjust such positions during the term of the securities. Our affiliates also trade the underlying shares or the securities held by the underlying share issuer and other financial instruments related to the underlying shares or such securities on a regular basis (taking long or short positions or both), for their accounts, for other accounts under their management or to facilitate transactions on behalf of customers. These activities could affect the price of the underlying shares in a way that negatively affects the value of the securities. They could also result in substantial returns for us or our affiliates while the value of the securities declines.

We and our affiliates may have economic interests that are adverse to yours as a result of our affiliates' business activities. Our affiliates may currently or from time to time engage in business with the underlying share issuer or the issuers of the securities held by the underlying share issuer, including extending loans to, making equity investments in or providing advisory services to such issuers. In the course of this business, we or our affiliates may acquire non-public information about such issuers, which we will not disclose to you. Moreover, if any of our affiliates is or becomes a creditor of any such issuer, they may exercise any remedies against such issuer that are available to them without regard to your interests.

Even if the underlying share issuer pays a dividend that it identifies as special or extraordinary, no adjustment will be required under the securities for that dividend unless it meets the criteria specified in the accompanying product supplement. In general, an adjustment will not be made under the terms of the securities for any cash dividend paid on the underlying shares unless the amount of the dividend per underlying share, together with any other dividends paid in the same fiscal quarter, exceeds the dividend paid per underlying share in the most recent fiscal quarter by an amount equal to at least 10% of the closing price of the underlying shares on the date of declaration of the dividend. Any dividend will reduce the closing price of the underlying shares by the amount of the dividend per underlying share. If the underlying share issuer pays any dividend for which an adjustment is not made under the terms of the securities, holders of the securities will be adversely affected. See "Additional Terms of the Securities—Dilution and Reorganization Adjustments—Certain Extraordinary Cash Dividends" in this pricing supplement.

The securities will not be adjusted for all events that could affect the price of the underlying shares. For example, we will not make any adjustment for ordinary dividends or extraordinary dividends that do not meet the criteria described above. Moreover, the adjustments we do make may not fully offset the dilutive or adverse effect of the particular event. Investors in the securities may be adversely affected by such an event in a circumstance in which a direct holder of the underlying shares would not.

The securities may become linked to shares of an issuer other than the original underlying share issuer upon the occurrence of a reorganization event or upon the delisting of the underlying shares. For example, if the underlying share issuer enters into a merger agreement that provides for holders of the underlying shares to receive shares of another entity, the

May 2018 PS-8

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR® Dow Jones® Industrial AverageSM ETF Trust

Due June 2, 2023

shares of such other entity will become the underlying shares for all purposes of the securities upon consummation of the merger. Additionally, if the underlying shares are delisted or the underlying share issuer is otherwise terminated, the calculation agent may, in its sole discretion, select shares of another underlying share issuer to be the underlying shares. See “Additional Terms of the Securities” in this pricing supplement.

The calculation agent, which is an affiliate of ours, will make important determinations with respect to the securities. If certain events occur, such as market disruption events, events with respect to the underlying share issuer that may require a dilution adjustment or the delisting of the underlying shares, CGMI, as calculation agent, will be required to make discretionary judgments that could significantly affect your payment at maturity. In making these judgments, the calculation agent’s interests as an affiliate of ours could be adverse to your interests as a holder of the securities.

The price and performance of the underlying shares may not completely track the performance of the ETF underlying index or the net asset value per share of the underlying share issuer. The underlying share issuer does not fully replicate the underlying index that it seeks to track (the “ETF underlying index”) and may hold securities different from those included in the ETF underlying index. In addition, the performance of the underlying shares will reflect additional transaction costs and fees of the underlying share issuer that are not included in the calculation of the ETF underlying index. In addition, the underlying share issuer may not hold all of the shares included in, and may hold securities and derivative instruments that are not included in, the ETF underlying index. All of these factors may lead to a lack of correlation between the performance of the underlying shares and the ETF underlying index. In addition, corporate actions with respect to the equity securities constituting the ETF underlying index or held by the underlying share issuer (such as mergers and spin-offs) may impact the variance between the performances of the underlying shares and the ETF underlying index. Finally, because the underlying shares are traded on NYSE Arca, Inc. and are subject to market supply and investor demand, the market value of the underlying shares may differ from the net asset value per share of the underlying share issuer.

During periods of market volatility, securities underlying the underlying share issuer may be unavailable in the secondary market, market participants may be unable to calculate accurately the net asset value per share of the underlying share issuer and the liquidity of the underlying shares may be adversely affected. This kind of market volatility may also disrupt the ability of market participants to create and redeem shares of the underlying share issuer. Further, market volatility may adversely affect, sometimes materially, the prices at which market participants are willing to buy and sell the underlying shares. As a result, under these circumstances, the market value of the underlying shares may vary substantially from the net asset value per share of the underlying share issuer. For all of the foregoing reasons, the performance of the underlying shares may not correlate with the performance of the ETF underlying index and/or the net asset value per share of the underlying share issuer, which could materially and adversely affect the value of the securities in the secondary market and/or reduce your payment at maturity.

Changes made by the investment adviser to the underlying share issuer or by the sponsor of the ETF underlying index may adversely affect the underlying shares. We are not affiliated with the investment adviser to the underlying share issuer or with the sponsor of the ETF underlying index. Accordingly, we have no control over

any changes such investment adviser or sponsor may make to the underlying share issuer or the ETF underlying index. Such changes could be made at any time and could adversely affect the performance of the underlying shares.

The U.S. federal tax consequences of an investment in the securities are unclear. There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the Internal Revenue Service (the “IRS”). Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid forward contracts. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected. Even if the treatment of the securities as prepaid forward contracts is respected, a security may be treated as a “constructive ownership transaction,” with potentially adverse consequences described below under “United States Federal Tax Considerations.” In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

Section 871(m) of the Internal Revenue Code of 1986, as amended (the “Code”), imposes a withholding tax of up to 30% on “dividend equivalents” paid or deemed paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. In light of Treasury regulations, as modified by an IRS notice, that provide a general exemption for financial instruments issued in 2018 that do not have a “delta” of one, the securities should not be subject to withholding under Section 871(m). However, the IRS could challenge this conclusion. If withholding applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “United States Federal Tax Considerations” in this pricing supplement.

The closing price of the shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust on May 30, 2018 was \$246.70.

On May 17, 2018, the SPDR[®] Dow Jones[®] Industrial Average ETF Trust declared a cash dividend of \$0.69726 per share payable on June 11, 2018. We make no representation as to the amount of dividends, if any, that may be paid on the shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust in the future. In any event, as an investor in the securities, you will not be entitled to receive dividends, if any, that may be payable on the shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust.

Additional Terms of the Securities

Fractional Shares

In lieu of any fractional share that you would otherwise receive in respect of the securities, at maturity you will receive an amount in cash equal to the value of such fractional share (based on the final share price). If you receive underlying shares at maturity, the number of full underlying shares and any cash in lieu of a fractional share that you receive will be calculated based on the aggregate principal amount of securities you hold.

Dilution and Reorganization Adjustments

The following provisions supersede the section “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Dilution and Reorganization Adjustments” in the accompanying product supplement.

The initial share price, the barrier price, the equity ratio and the property we may deliver to you at maturity of the securities will be subject to adjustment from time to time if certain events occur that affect the underlying shares. Any of these adjustments could have an impact on the value of what you receive at maturity. CGMI, as calculation agent, will be responsible for the calculation of any adjustment described herein and will furnish the trustee with notice of any adjustment. An adjustment will be made for events with an adjustment date (as defined below) from but excluding the pricing date to and including the valuation date, except that, if we deliver underlying shares at maturity, the equity

ratio will be subject to adjustment for events with an adjustment date up to and including the maturity date.

No adjustments will be required other than those specified below. The required adjustments specified in this section do not cover all events that could have a dilutive or adverse effect on the underlying shares during the term of the securities. See “Summary Risk Factors—The securities will not be adjusted for all events that could affect the price of the underlying shares.”

The calculation agent may elect not to make any of the adjustments described below or may modify any of the adjustments described below if it determines, in its sole discretion, that such adjustment would not be made in any relevant market for options or futures contracts relating to the underlying shares or that any adjustment made in such market would materially differ from the relevant adjustment described below.

Stock Dividends, Stock Splits and Reverse Stock Splits

If the underlying share issuer:

declares a record date in respect of, or pays or makes, a dividend or distribution, in each case of underlying shares (1) with respect to the underlying shares (excluding any share dividend or distribution for which the number of shares paid or distributed is based on a fixed cash equivalent value (“excluded share dividends”)),

(2) subdivides or splits the outstanding underlying shares into a greater number of shares, or

(3) combines the outstanding underlying shares into a smaller number of shares,

then, in each of these cases, the equity ratio will be multiplied by a dilution adjustment equal to a fraction, (i) the numerator of which will be the number of underlying shares outstanding immediately after giving effect to such event and (ii) the denominator of which will be the number of underlying shares outstanding immediately prior to the open of business on the applicable adjustment date. An adjustment will also be made to the initial share price and the barrier price by dividing each of the initial share price and the barrier price by that dilution adjustment.

Issuance of Certain Rights or Warrants

If the underlying share issuer issues, or declares a record date in respect of an issuance of, rights or warrants, in each case to all holders of the underlying shares entitling them to subscribe for or purchase the underlying shares at a price

Edgar Filing: CITIGROUP INC - Form 424B2

per share less than the then-current market price of the underlying shares, other than excluded rights (as defined below), then, in each case, the equity ratio will be multiplied by a dilution adjustment equal to a fraction, (i) the numerator of which will be the number of underlying shares outstanding immediately prior to the open of business on the applicable adjustment date, *plus* the number of additional underlying shares offered for subscription or purchase pursuant to the rights or warrants, and (ii) the denominator of which will be the number of

May 2018 PS-12

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

underlying shares outstanding immediately prior to the open of business on the applicable adjustment date, *plus* the number of additional underlying shares which the aggregate offering price of the total number of underlying shares offered for subscription or purchase pursuant to the rights or warrants would purchase at the then-current market price of the underlying shares, which will be determined by multiplying the total number of underlying shares so offered for subscription or purchase by the exercise price of the rights or warrants and dividing the product obtained by the then-current market price. An adjustment will also be made to the initial share price and the barrier price by dividing each of the initial share price and the barrier price by that dilution adjustment. To the extent that, prior to the maturity date, after the expiration of the rights or warrants, the underlying share issuer publicly announces the number of underlying shares with respect to which such rights or warrants have been exercised and such number is less than the aggregate number offered, the equity ratio will be further adjusted to equal the equity ratio which would have been in effect had the adjustment for the issuance of the rights or warrants been made upon the basis of delivery of only the number of underlying shares for which such rights or warrants were actually exercised, and a corresponding adjustment will be made to the initial share price and the barrier price.

“Excluded rights” means (i) rights to purchase underlying shares pursuant to a plan for the reinvestment of dividends or interest and (ii) rights that are not immediately exercisable, trade as a unit or automatically with the underlying shares and may be redeemed by the underlying share issuer.

The “then-current market price” of the underlying shares, for the purpose of applying any dilution adjustment, means the average closing price of the underlying shares for the ten scheduled trading days ending on the scheduled trading day immediately preceding the related adjustment date. For purposes of determining the then-current market price, if a market disruption event occurs with respect to the underlying shares on any such scheduled trading day, the calculation agent may disregard the closing price on such scheduled trading day for purposes of calculating such average; *provided* that the calculation agent may not disregard more than five scheduled trading days in such ten-scheduled trading day period.

Spin-offs and Certain Other Non-Cash Distributions

If the underlying share issuer (a) declares a record date in respect of, or pays or makes, a dividend or distribution, in each case to all holders of underlying shares, of any class of its capital stock, the capital stock of one or more of its subsidiaries (excluding any capital stock of a subsidiary in the form of marketable securities (as defined below)), evidences of its indebtedness or other non-cash assets or (b) issues to all holders of underlying shares, or declares a record date in respect of an issuance to all holders of underlying shares of, rights or warrants to subscribe for or purchase any of its or one or more of its subsidiaries’ securities, in each case excluding any share dividends or distributions referred to above, excluded share dividends, any rights or warrants referred to above, excluded rights and any reclassification referred to below, then, in each of these cases, the equity ratio will be multiplied by a dilution

adjustment equal to a fraction, (i) the numerator of which will be the then-current market price of one underlying share and (ii) the denominator of which will be the then-current market price of one underlying share less the fair market value as of open of business on the adjustment date of the portion of the capital shares, assets, evidences of indebtedness, rights or warrants so distributed or issued applicable to one underlying share. An adjustment will also be made to the initial share price and the barrier price by dividing each of the initial share price and the barrier price by that dilution adjustment. If any capital stock declared or paid as a dividend or otherwise distributed or issued to all holders of underlying shares consists, in whole or in part, of marketable securities (other than marketable securities of a subsidiary of the underlying share issuer), then the fair market value of such marketable securities will be determined by the calculation agent by reference to the closing price of such capital stock. The fair market value of any other distribution or issuance referred to in this paragraph will be determined by a nationally recognized independent investment banking firm retained for this purpose by Citigroup Global Markets Holdings Inc., whose determination will be final.

Notwithstanding the foregoing, in the event that, with respect to any dividend, distribution or issuance to which the immediately preceding paragraph would otherwise apply, the denominator in the fraction referred to in such paragraph is less than \$1.00 or is a negative number, then Citigroup Global Markets Holdings Inc. may, at its option, elect to have the adjustment to the equity ratio provided by such paragraph not be made and, in lieu of this adjustment, the closing price of the underlying shares on any date of determination thereafter will be deemed to be equal to the sum of (i) the closing price of the underlying shares on such date and (ii) the fair market value of the capital stock, evidences of indebtedness, assets, rights or warrants (determined, as of open of business on the adjustment date, by a nationally recognized independent investment banking firm retained for this purpose by Citigroup Global Markets Holdings Inc., whose determination will be final) so distributed or issued applicable to one underlying share. If the closing price of the underlying shares as so determined on the valuation date is less than the barrier price, each holder of the securities will receive per security at maturity (x) a number of underlying shares equal to the equity ratio (with cash in lieu of any fractional share based on the closing price of such shares on the valuation date) (or, in our sole discretion, cash based on the value thereof) and (y) cash in an amount per security equal to the equity ratio as of the adjustment date for such dividend, distribution or issuance *multiplied by* the fair market value determined pursuant to clause (ii) of the immediately preceding sentence.

If the underlying share issuer declares a record date in respect of, or pays or makes, a dividend or distribution, in each case to all holders of underlying shares of the capital stock of one or more of its subsidiaries in the form of marketable securities, the closing price of the underlying shares on any date of determination from and after open of business on the adjustment date will in each case equal the closing price of the underlying shares *plus* the product of (i) the closing price of such shares of subsidiary capital stock on such date and (ii) the number of shares of such subsidiary capital stock distributed per underlying share. If the closing price of the underlying

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

shares as so determined on the valuation date is less than the barrier price, then in each of these cases, each holder of the securities will receive at maturity per security a combination of (x) a number of underlying shares equal to the equity ratio and (y) a number of shares of such subsidiary capital stock equal to the equity ratio *multiplied by* the number of shares of such subsidiary capital stock distributed per underlying share (in each case with cash in lieu of any fractional share based on the closing price of such shares on the valuation date) (or, in our sole discretion, cash based on the value thereof). In the event an adjustment pursuant to this paragraph occurs, following such adjustment, the adjustments described in this section “—Dilution and Reorganization Adjustments” will also apply to such subsidiary capital stock if any of the events described in this section “—Dilution and Reorganization Adjustments” occurs with respect to such capital stock.

Certain Extraordinary Cash Dividends

If the underlying share issuer declares a record date in respect of a distribution of cash, by dividend or otherwise, to all holders of underlying shares, other than (a) any permitted dividends described below, (b) any cash distributed in consideration of fractional underlying shares and (c) any cash distributed in a reorganization event referred to below, then in each case the equity ratio will be multiplied by a dilution adjustment equal to a fraction, (i) the numerator of which will be the then-current market price of the underlying shares, and (ii) the denominator of which will be the then-current market price of the underlying shares less the amount of the distribution applicable to one underlying share which would not be a permitted dividend (such amount, the “Extraordinary Portion”). An adjustment will also be made to the initial share price and the barrier price by dividing each of the initial share price and the barrier price by that dilution adjustment. In the case of an issuer that is organized outside the United States, in order to determine the Extraordinary Portion, the amount of the distribution will be reduced by any applicable foreign withholding taxes that would apply to dividends or other distributions paid to a U.S. person that claims any reduction in such taxes to which a U.S. person would generally be entitled under an applicable U.S. income tax treaty, if available.

A “permitted dividend” is (1) any distribution of cash, by dividend or otherwise, to all holders of underlying shares other than to the extent that such distribution, together with all other such distributions in the same quarterly fiscal period of the underlying share issuer with respect to which an adjustment to the equity ratio under this “—Certain Extraordinary Cash Dividends” section has not previously been made, per underlying share exceeds the sum of (a) the immediately preceding cash dividend(s) or other cash distribution(s) paid in the immediately preceding quarterly fiscal period, if any, per underlying share and (b) 10% of the closing price of the underlying shares on the date of declaration of such distribution, and (2) any cash dividend or distribution made in the form of a fixed cash equivalent value for which the holders of underlying shares have the option to receive either a number of underlying shares or a fixed amount of cash. If the underlying share issuer pays a dividend on an annual basis rather than a quarterly basis, the calculation agent will make such adjustments to this provision as it deems appropriate.

Notwithstanding the foregoing, in the event that, with respect to any dividend or distribution to which the first paragraph under “—Dilution and Reorganization Adjustments—Certain Extraordinary Cash Dividends” would otherwise apply, the denominator in the fraction referred to in the formula in that paragraph is less than \$1.00 or is a negative number, then Citigroup Global Markets Holdings Inc. may, at its option, elect to have the adjustment provided by such paragraph not be made and, in lieu of this adjustment, the closing price of the underlying shares on any date of determination from and after open of business on the adjustment date will be deemed to be equal to the sum of (i) the closing price of the underlying shares on such date and (ii) the amount of cash so distributed applicable to one underlying share. If the closing price of the underlying shares as so determined on the valuation date is less than the barrier price, each holder of the securities will receive per security at maturity (x) a number of underlying shares equal to the equity ratio (with cash in lieu of any fractional share based on the closing price of such shares on the valuation date) (or, in our sole discretion, cash based on the value thereof) and (y) cash in an amount per security equal to the equity ratio as of the adjustment date for such distribution *multiplied* by the amount of cash determined pursuant to clause (ii) of the immediately preceding sentence.

Reorganization Events

In the event of any of the following “reorganization events” with respect to the underlying share issuer:

• the underlying share issuer reclassifies the underlying shares, including, without limitation, in connection with the issuance of tracking stock,

• any consolidation or merger of the underlying share issuer, or any surviving entity or subsequent surviving entity of the underlying share issuer, with or into another entity, other than a merger or consolidation in which the underlying share issuer is the continuing company and in which the underlying shares outstanding immediately before the merger or consolidation are not exchanged for cash, securities or other property of the underlying share issuer or another issuer,

• any sale, transfer, lease or conveyance to another company of the property of the underlying share issuer or any successor as an entirety or substantially as an entirety,

• any statutory exchange of the underlying shares with securities of another issuer, other than in connection with a merger or acquisition,

- another entity completes a tender or exchange offer for all the outstanding underlying shares or

any liquidation, dissolution or winding up of the underlying share issuer or any successor of the underlying share issuer,

the closing price of the underlying shares on any date of determination from and after the open of business on the adjustment date will, in each case, be deemed to be equal to the transaction value on such date of determination. The calculation agent will determine in its sole discretion whether a transaction constitutes a reorganization event as defined above, including whether a transaction constitutes a sale, transfer, lease or conveyance to another company of the property of the underlying share issuer or any successor “as an entirety or substantially as an entirety.” The calculation agent will have significant discretion in determining what “substantially as an entirety” means and may exercise that discretion in a manner that may be adverse to the interests of holders of the securities.

The “transaction value” will equal the sum of (1), (2) and (3) below:

- (1) for any cash received in a reorganization event, the amount of cash received per underlying share,

for any property other than cash or marketable securities received in a reorganization event, an amount equal to the fair market value on the effective date of the reorganization event of that property received per underlying share, (2) determined by a nationally recognized independent investment banking firm retained for this purpose by Citigroup Global Markets Holdings Inc., whose determination will be final, and

for any marketable securities received in a reorganization event, an amount equal to the closing price per unit of (3) these marketable securities on the applicable date of determination *multiplied by* the number of these marketable securities received per underlying share,

plus, in each case, if underlying shares continue to be outstanding following the reorganization event, the closing price of the underlying shares.

“Marketable securities” are any perpetual equity securities or debt securities with a stated maturity after the maturity date, in each case that are listed on a U.S. national securities exchange. The number of shares of any equity securities constituting marketable securities included in the calculation of transaction value pursuant to clause (3) above will be adjusted if any event occurs with respect to the marketable securities or the issuer of the marketable securities between

the time of the reorganization event and maturity of the securities that would have required an adjustment as described above, had it occurred with respect to the underlying shares or the underlying share issuer. Adjustment for these subsequent events will be as nearly equivalent as practicable to the adjustments described above, as determined by the calculation agent.

If the closing price of the underlying shares as determined based on the transaction value on the valuation date is less than the barrier price, each holder of the securities will receive per security at maturity (i) cash in an amount equal to the equity ratio immediately preceding the reorganization event *multiplied by* the sum of clauses (1) and (2) in the definition of “Transaction Value” above, (ii) if the underlying shares continue to be outstanding following the effective date of the reorganization event, a number of such underlying shares equal to the equity ratio (or, in our sole discretion, the cash value thereof based on the closing price of the underlying shares on the valuation date) and (iii) the number of marketable securities received per underlying share in the reorganization event *multiplied by* the equity ratio immediately prior to the adjustment date for the reorganization event (or, in our sole discretion, the cash value thereof based on the closing price of the marketable securities on the valuation date).

Certain General Provisions

The adjustments described in this section will be effected at the open of business on the applicable date specified below (such date, the “adjustment date”):

• in the case of any dividend, distribution or issuance, on the applicable ex-date (as defined below),

• in the case of any subdivision, split, combination or reclassification, on the effective date thereof, and

• in the case of any reorganization event, on the effective date of the reorganization event.

All adjustments will be rounded upward or downward to the nearest 1/10,000th or, if there is not a nearest 1/10,000th, to the next lower 1/10,000th. No adjustment in the equity ratio will be required unless the adjustment would require an increase or decrease of at least one percent therein, *provided, however*, that any adjustments which by reason of this sentence are not required to be made will be carried forward (on a percentage basis) and taken into account in any subsequent adjustment. If any announcement or declaration of a record date in respect of a dividend, distribution or issuance requiring an adjustment as described herein is subsequently canceled by the underlying share issuer, or this dividend, distribution or issuance fails to receive requisite approvals or fails to occur for any other reason, in each case prior to the maturity date, then, upon the cancellation, failure of approval or failure to occur, the equity ratio, the initial share price and the barrier price will be further adjusted to the equity ratio, the initial share price and the barrier price,

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

respectively, which would then have been in effect had adjustment for the event not been made. All adjustments to the equity ratio shall be cumulative, such that if more than one adjustment is required to the equity ratio, each subsequent adjustment will be made to the equity ratio as previously adjusted.

The “ex-date” relating to any dividend, distribution or issuance is the first date on which the underlying shares trade in the regular way on their principal market without the right to receive such dividend, distribution or issuance from the underlying share issuer or, if applicable, from the seller on such market (in the form of due bills or otherwise).

For the purpose of adjustments described herein, each non-U.S. dollar value (whether a value of cash, property, securities or otherwise) shall be expressed in U.S. dollars as converted from the relevant currency using the 12:00 noon buying rate in New York certified by the New York Federal Reserve Bank for customs purposes on the date of valuation, or if this rate is unavailable, such rate as the calculation agent may determine.

Delisting, Liquidation or Termination of the Underlying Share Issuer

If a termination event occurs with respect to the underlying shares as described in the section “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Delisting, Liquidation or Termination of an Underlying ETF” in the accompanying product supplement and the calculation agent selects successor ETF shares, the calculation agent will make such adjustments to the initial share price, the barrier price and the equity ratio as are appropriate in the circumstances. If a termination event occurs and the calculation agent has not selected successor ETF shares that are available as of the valuation date, the calculation agent will calculate the closing price of the underlying shares on such date in the manner described in the section “Description of the Securities—Certain Additional Terms for Securities Linked to ETF Shares or Company Shares—Delisting, Liquidation or Termination of an Underlying ETF” in the accompanying product supplement and, if the final share price as so determined is less than the barrier price, we will not deliver underlying shares at maturity but instead will pay you cash in an amount per security equal to the final share price as so determined multiplied by the equity ratio.

United States Federal Tax Considerations

You should read carefully the discussion under “United States Federal Tax Considerations” and “Risk Factors Relating to the Securities” in the accompanying product supplement and “Summary Risk Factors” in this pricing supplement. This discussion does not address the U.S. federal tax consequences of the ownership or disposition of the underlying shares

that you may receive at maturity. You should consult your tax adviser regarding the U.S. federal tax consequences of the ownership and disposition of the underlying shares.

In the opinion of our counsel, Davis Polk & Wardwell LLP, which is based on current market conditions, a security should be treated as a prepaid forward contract for U.S. federal income tax purposes. By purchasing a security, you agree (in the absence of an administrative determination or judicial ruling to the contrary) to this treatment. There is uncertainty regarding this treatment, and the IRS or a court might not agree with it.

Assuming this treatment of the securities is respected and subject to the discussion in “United States Federal Tax Considerations” in the accompanying product supplement, the following U.S. federal income tax consequences should result under current law:

You should not recognize taxable income over the term of the securities prior to maturity, other than pursuant to a sale or exchange.

Upon a sale or exchange of a security (including retirement at maturity), you should recognize gain or loss equal to the difference between the amount realized and your tax basis in the security. Subject to the discussion below concerning the potential application of the “constructive ownership” rules under Section 1260 of the Code, any gain or loss recognized upon a sale, exchange or retirement of a security should be long-term capital gain or loss if you held the security for more than one year.

If you receive the underlying shares (and cash in lieu of any fractional shares) at maturity, you should not recognize gain or loss with respect to the underlying shares received. Instead, you should have an aggregate tax basis in the underlying shares received (including any fractional shares deemed received) equal to your basis in the securities. Your holding period for any underlying shares received should start on the day after receipt. With respect to any cash received in lieu of a fractional share, you should recognize capital loss in an amount equal to the difference between the amount of cash received in lieu of the fractional share and the portion of your tax basis in the securities that is allocable to the fractional share.

Even if the treatment of the securities as prepaid forward contracts is respected, your purchase of a security may be treated as entry into a “constructive ownership transaction,” within the meaning of Section 1260 of the Code, with respect to the underlying. In that case, all or a portion of any long-term capital gain you would otherwise recognize in respect of your securities would be recharacterized as ordinary income to the extent such gain exceeded the “net underlying long-term capital gain.” Any long-term capital gain recharacterized as ordinary income under Section 1260 would be treated as accruing at a constant rate over the period you held your securities, and you would be subject to an interest charge in respect of the deemed tax liability on the income treated as accruing in

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR® Dow Jones® Industrial AverageSM ETF Trust

Due June 2, 2023

prior tax years. Due to the lack of governing authority under Section 1260, our counsel is not able to opine as to whether or how Section 1260 applies to the securities. You should read the section entitled “United States Federal Tax Considerations—Tax Consequences to U.S. Holders—Potential Application of Section 1260 of the Code” in the accompanying product supplement for additional information and consult your tax adviser regarding the potential application of the “constructive ownership” rule.

Subject to the discussions below under “Possible Withholding Under Section 871(m) of the Code” and in “United States Federal Tax Considerations” in the accompanying product supplement, if you are a Non-U.S. Holder (as defined in the accompanying product supplement) of the securities, you generally should not be subject to U.S. federal withholding or income tax in respect of any amount paid to you with respect to the securities, provided that (i) income in respect of the securities is not effectively connected with your conduct of a trade or business in the United States, and (ii) you comply with the applicable certification requirements.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime described above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect.

Possible Withholding Under Section 871(m) of the Code. As discussed under “United States Federal Tax Considerations—Tax Consequences to Non-U.S. Holders” in the accompanying product supplement, Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities (“U.S. Underlying Equities”) or indices that include U.S. Underlying Equities. Section 871(m) generally applies to instruments that substantially replicate the economic performance of one or more U.S. Underlying Equities, as determined based on tests set forth in the applicable Treasury regulations (a “Specified Security”). However, the regulations, as modified by an IRS notice, exempt financial instruments issued in 2018 that do not have a “delta” of one. Based on the terms of the securities and representations provided by us, our counsel is of the opinion that the securities should not be treated as transactions that have a “delta” of one within the meaning of the regulations with respect to any U.S. Underlying Equity and, therefore, should not be Specified Securities subject to withholding tax

under Section 871(m).

A determination that the securities are not subject to Section 871(m) is not binding on the IRS, and the IRS may disagree with this treatment. Moreover, Section 871(m) is complex and its application may depend on your particular circumstances. For example, if you enter into other transactions relating to a U.S. Underlying Equity, you could be subject to withholding tax or income tax liability under Section 871(m) even if the securities are not Specified Securities subject to Section 871(m) as a general matter. You should consult your tax adviser regarding the potential application of Section 871(m) to the securities.

If withholding tax applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

You should read the section entitled “United States Federal Tax Considerations” in the accompanying product supplement. The preceding discussion, when read in combination with that section, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of owning and disposing of the securities.

You should also consult your tax adviser regarding all aspects of the U.S. federal income and estate tax consequences of an investment in the securities and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

Supplemental Plan of Distribution

CGMI, an affiliate of Citigroup Global Markets Holdings Inc. and the underwriter of the sale of the securities, is acting as principal and will receive an underwriting fee of \$30.00 for each \$1,000 security sold in this offering (or up to \$5.00 per security in the case of sales to fee-based advisory accounts). The actual underwriting fee will be equal to \$30.00 for each \$1,000 security sold by CGMI directly to the public and will otherwise be equal to the selling concession provided to selected dealers, as described in this paragraph. CGMI will pay selected dealers not affiliated with CGMI a fixed selling concession of \$30.00 for each \$1,000 security they sell to accounts other than fee-based advisory accounts. CGMI will pay selected dealers not affiliated with CGMI, which may include dealers acting as custodians, a variable selling concession of up to \$5.00 for each \$1,000 security they sell to fee-based advisory accounts. Broker-dealers affiliated with CGMI, including Citi International Financial Services, Citigroup Global Markets Singapore Pte. Ltd. and Citigroup Global Markets Asia Limited, will receive a fixed selling concession, and financial advisors employed by such affiliated broker-dealers will receive a fixed selling concession, of \$30.00 for each \$1,000 security they sell. CGMI will pay the registered representatives of CGMI a fixed selling concession of \$30.00 for each \$1,000 security they sell directly to the public.

May 2018 PS-17

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR[®] Dow Jones[®] Industrial AverageSM ETF Trust

Due June 2, 2023

CGMI is an affiliate of ours. Accordingly, this offering will conform with the requirements addressing conflicts of interest when distributing the securities of an affiliate set forth in Rule 5121 of the Financial Industry Regulatory Authority. Client accounts over which Citigroup Inc. or its subsidiaries have investment discretion will not be permitted to purchase the securities, either directly or indirectly, without the prior written consent of the client.

Secondary market sales of securities typically settle two business days after the date on which the parties agree to the sale. Because the issue date for the securities is more than two business days after the pricing date, investors who wish to sell the securities at any time prior to the second business day preceding the issue date will be required to specify an alternative settlement date for the secondary market sale to prevent a failed settlement. Investors should consult their own investment advisors in this regard.

See “Plan of Distribution; Conflicts of Interest” in the accompanying product supplement and “Plan of Distribution” in each of the accompanying prospectus supplement and prospectus for additional information.

A portion of the net proceeds from the sale of the securities will be used to hedge our obligations under the securities. We have hedged our obligations under the securities through CGMI or other of our affiliates. CGMI or such other of our affiliates may profit from this hedging activity even if the value of the securities declines. This hedging activity could affect the closing price of the underlying shares and, therefore, the value of and your return on the securities. For additional information on the ways in which our counterparties may hedge our obligations under the securities, see “Use of Proceeds and Hedging” in the accompanying prospectus.

Valuation of the Securities

CGMI calculated the estimated value of the securities set forth on the cover page of this pricing supplement based on proprietary pricing models. CGMI’s proprietary pricing models generated an estimated value for the securities by estimating the value of a hypothetical package of financial instruments that would replicate the payout on the securities, which consists of a fixed-income bond (the “bond component”) and one or more derivative instruments underlying the economic terms of the securities (the “derivative component”). CGMI calculated the estimated value of the bond component using a discount rate based on our internal funding rate. CGMI calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the instruments that constitute the derivative component based on various inputs, including the factors described under “Summary Risk Factors—The value of the securities prior to maturity will fluctuate based on many unpredictable factors” in this pricing supplement, but not including our or Citigroup Inc.’s creditworthiness. These inputs may be market-observable or may be based on assumptions made by CGMI in its discretionary judgment.

For a period of approximately four months following issuance of the securities, the price, if any, at which CGMI would be willing to buy the securities from investors, and the value that will be indicated for the securities on any brokerage account statements prepared by CGMI or its affiliates (which value CGMI may also publish through one or more financial information vendors), will reflect a temporary upward adjustment from the price or value that would otherwise be determined. This temporary upward adjustment represents a portion of the hedging profit expected to be realized by CGMI or its affiliates over the term of the securities. The amount of this temporary upward adjustment will decline to zero on a straight-line basis over the four-month temporary adjustment period. However, CGMI is not obligated to buy the securities from investors at any time. See “Summary Risk Factors—The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity.”

Certain Selling Restrictions

Hong Kong Special Administrative Region

The contents of this pricing supplement and the accompanying product supplement, prospectus supplement and prospectus have not been reviewed by any regulatory authority in the Hong Kong Special Administrative Region of the People’s Republic of China (“Hong Kong”). Investors are advised to exercise caution in relation to the offer. If investors are in any doubt about any of the contents of this pricing supplement and the accompanying product supplement, prospectus supplement and prospectus, they should obtain independent professional advice.

The securities have not been offered or sold and will not be offered or sold in Hong Kong by means of any document, other than

- (i) to persons whose ordinary business is to buy or sell shares or debentures (whether as principal or agent); or
- (ii) to “professional investors” as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong (the “Securities and Futures Ordinance”) and any rules made under that Ordinance; or
- (iii) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies Ordinance (Cap. 32) of Hong Kong or which do not constitute an offer to the public within the meaning of that Ordinance; and

There is no advertisement, invitation or document relating to the securities which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to securities which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” as defined in the Securities and Futures Ordinance and any rules

made under that Ordinance.

Non-insured Product: These securities are not insured by any governmental agency. These securities are not bank deposits and are not covered by the Hong Kong Deposit Protection Scheme.

Singapore

This pricing supplement and the accompanying product supplement, prospectus supplement and prospectus have not been registered as a prospectus with the Monetary Authority of Singapore, and the securities will be offered pursuant to exemptions under the Securities and Futures Act, Chapter 289 of Singapore (the “Securities and Futures Act”). Accordingly, the securities may not be offered or sold or made the subject of an invitation for subscription or purchase nor may this pricing supplement or any other document or material in connection with the offer or sale or invitation for subscription or purchase of any securities be circulated or distributed, whether directly or indirectly, to any person in Singapore other than (a) to an institutional investor pursuant to Section 274 of the Securities and Futures Act, (b) to a relevant person under Section 275(1) of the Securities and Futures Act or to any person pursuant to Section 275(1A) of the Securities and Futures Act and in accordance with the conditions specified in Section 275 of the Securities and Futures Act, or (c) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the Securities and Futures Act. Where the securities are subscribed or purchased under Section 275 of the Securities and Futures Act by a relevant person which is:

a corporation (which is not an accredited investor (as defined in Section 4A of the Securities and Futures Act)) the (a) sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an individual who is an accredited investor, securities (as defined in Section 239(1) of the Securities and Futures Act) of that corporation or the beneficiaries’ rights and interests (howsoever described) in that trust shall not be transferable for 6 months after that corporation or that trust has acquired the relevant securities pursuant to an offer under Section 275 of the Securities and Futures Act except:

to an institutional investor or to a relevant person defined in Section 275(2) of the Securities and Futures Act or to (i) any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the Securities and Futures Act; or

(ii) where no consideration is or will be given for the transfer; or

(iii) where the transfer is by operation of law; or

(iv) pursuant to Section 276(7) of the Securities and Futures Act; or

(v) as specified in Regulation 32 of the Securities and Futures (Offers of Investments) (Shares and Debentures) Regulations 2005 of Singapore.

Any securities referred to herein may not be registered with any regulator, regulatory body or similar organization or institution in any jurisdiction.

The securities are Specified Investment Products (as defined in the Notice on Recommendations on Investment Products and Notice on the Sale of Investment Product issued by the Monetary Authority of Singapore on 28 July 2011) that is neither listed nor quoted on a securities market or a futures market.

Non-insured Product: These securities are not insured by any governmental agency. These securities are not bank deposits. These securities are not insured products subject to the provisions of the Deposit Insurance and Policy Owners' Protection Schemes Act 2011 of Singapore and are not eligible for deposit insurance coverage under the Deposit Insurance Scheme.

Prohibition of Sales to EEA Retail Investors

The securities may not be offered, sold or otherwise made available to any retail investor in the European Economic Area. For the purposes of this provision:

(a) the expression "retail investor" means a person who is one (or more) of the following:

(i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or

(ii) a customer within the meaning of Directive 2002/92/EC, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or

(iii) not a qualified investor as defined in Directive 2003/71/EC; and

(b)

the expression “offer” includes the communication in any form and by any means of sufficient information on the terms of the offer and the securities offered so as to enable an investor to decide to purchase or subscribe the securities.

May 2018 PS-19

Citigroup Global Markets Holdings Inc.

Enhanced Barrier Digital Plus Securities Based on the Shares of the SPDR® Dow Jones® Industrial AverageSM ETF Trust

Due June 2, 2023

Validity of the Securities

In the opinion of Davis Polk & Wardwell LLP, as special products counsel to Citigroup Global Markets Holdings Inc., when the securities offered by this pricing supplement have been executed and issued by Citigroup Global Markets Holdings Inc. and authenticated by the trustee pursuant to the indenture, and delivered against payment therefor, such securities and the related guarantee of Citigroup Inc. will be valid and binding obligations of Citigroup Global Markets Holdings Inc. and Citigroup Inc., respectively, enforceable in accordance with their respective terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), provided that such counsel expresses no opinion as to the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above. This opinion is given as of the date of this pricing supplement and is limited to the laws of the State of New York, except that such counsel expresses no opinion as to the application of state securities or Blue Sky laws to the securities.

In giving this opinion, Davis Polk & Wardwell LLP has assumed the legal conclusions expressed in the opinions set forth below of Scott L. Flood, General Counsel and Secretary of Citigroup Global Markets Holdings Inc., and Barbara Politi, Assistant General Counsel—Capital Markets of Citigroup Inc. In addition, this opinion is subject to the assumptions set forth in the letter of Davis Polk & Wardwell LLP dated April 7, 2017, which has been filed as an exhibit to a Current Report on Form 8-K filed by Citigroup Inc. on April 7, 2017, that the indenture has been duly authorized, executed and delivered by, and is a valid, binding and enforceable agreement of, the trustee and that none of the terms of the securities nor the issuance and delivery of the securities and the related guarantee, nor the compliance by Citigroup Global Markets Holdings Inc. and Citigroup Inc. with the terms of the securities and the related guarantee respectively, will result in a violation of any provision of any instrument or agreement then binding upon Citigroup Global Markets Holdings Inc. or Citigroup Inc., as applicable, or any restriction imposed by any court or governmental body having jurisdiction over Citigroup Global Markets Holdings Inc. or Citigroup Inc., as applicable.

In the opinion of Scott L. Flood, Secretary and General Counsel of Citigroup Global Markets Holdings Inc., (i) the terms of the securities offered by this pricing supplement have been duly established under the indenture and the Board of Directors (or a duly authorized committee thereof) of Citigroup Global Markets Holdings Inc. has duly authorized the issuance and sale of such securities and such authorization has not been modified or rescinded; (ii) Citigroup Global Markets Holdings Inc. is validly existing and in good standing under the laws of the State of New York; (iii) the indenture has been duly authorized, executed and delivered by Citigroup Global Markets Holdings Inc.; and (iv) the execution and delivery of such indenture and of the securities offered by this pricing supplement by Citigroup Global Markets Holdings Inc., and the performance by Citigroup Global Markets Holdings Inc. of its obligations thereunder, are within its corporate powers and do not contravene its certificate of incorporation or bylaws or other constitutive documents. This opinion is given as of the date of this pricing supplement and is limited to the laws of the State of New York.

Scott L. Flood, or other internal attorneys with whom he has consulted, has examined and is familiar with originals, or copies certified or otherwise identified to his satisfaction, of such corporate records of Citigroup Global Markets Holdings Inc., certificates or documents as he has deemed appropriate as a basis for the opinions expressed above. In such examination, he or such persons has assumed the legal capacity of all natural persons, the genuineness of all signatures (other than those of officers of Citigroup Global Markets Holdings Inc.), the authenticity of all documents submitted to him or such persons as originals, the conformity to original documents of all documents submitted to him or such persons as certified or photostatic copies and the authenticity of the originals of such copies.

In the opinion of Barbara Politi, Assistant General Counsel—Capital Markets of Citigroup Inc., (i) the Board of Directors (or a duly authorized committee thereof) of Citigroup Inc. has duly authorized the guarantee of such securities by Citigroup Inc. and such authorization has not been modified or rescinded; (ii) Citigroup Inc. is validly existing and in good standing under the laws of the State of Delaware; (iii) the indenture has been duly authorized, executed and delivered by Citigroup Inc.; and (iv) the execution and delivery of such indenture, and the performance by Citigroup Inc. of its obligations thereunder, are within its corporate powers and do not contravene its certificate of incorporation or bylaws or other constitutive documents. This opinion is given as of the date of this pricing supplement and is limited to the General Corporation Law of the State of Delaware.

Barbara Politi, or other internal attorneys with whom she has consulted, has examined and is familiar with originals, or copies certified or otherwise identified to her satisfaction, of such corporate records of Citigroup Inc., certificates or documents as she has deemed appropriate as a basis for the opinions expressed above. In such examination, she or such persons has assumed the legal capacity of all natural persons, the genuineness of all signatures (other than those of officers of Citigroup Inc.), the authenticity of all documents submitted to her or such persons as originals, the conformity to original documents of all documents submitted to her or such persons as certified or photostatic copies and the authenticity of the originals of such copies.
