Dr. Reddy s launches Omez Insta Immediate Release Omeprazole in sachets

May 22, 2008, Hyderabad : Dr. Reddy s Laboratories Ltd. (NYSE: RDY) has launched Omez Insta (Omeprazole 20mg + Sodium bicarbonate 1680mg buffer), an innovative powder formulation that offers instant relief with a lasting effect in acute gastritis and is also ideal for critically ill patients on Ryle s tube feeding.

It is an advanced formulation of Omeprazole, internationally referred to as IR Ome (Immediate Release Omeprazole). IR-Ome is the first and only immediate release oral Proton Pump Inhibitor (PPI) available as powder for oral suspension with significantly improved pharmacokinetic profile. The formulation is approved by the USFDA and is available in the US market since October 2004. It reduces the intragastric acidity (acid concentration in stomach) by 78% within first 30 mins of ingestion.

Omez Insta fills the gap which was present in the PPI market by offering a PPI formulation available in drinkable form. It is available in sachets in a pleasant mint flavor.

Notes to the Editor:

The PPI market is about Rs 540 crore growing at the rate of 14%.(Source: ORG IMS)

Brief mode of action of Omez Insta:

Omez Insta raises intragastric pH and thereby protects Omeprazole from acid degradation.

This leads to fast and effective absorption of Omeprazole resulting in rapid inhibition of acid secretion.

Buffer present in Omez Insta stimulates gastrin release which in turn stimulates parietal cells and switch on the proton pumps which enable Omeprazole to shut these pumps more effectively.

It provides instant relief with a lasting effect by bringing up the pH level to > 6 within a minute.

Omez is the leading brand of Dr. Reddy s in the Gastrointestinal segment and is the number one brand in 14 countries.

Other brands of Dr.Reddy s in the Gastrointestinal segment are Omez-Dsr, Omez FF, Razo and Razo-D.
