**Kona Grill, Inc.**

*(Exact Name of Registrant as Specified in Its Charter)*

**Delaware**

*(State or other jurisdiction of incorporation or  
organization)*

**20-0216690**

*(I.R.S. Employer Identification No.)*

**7150 East Camelback Road, Suite 220  
Scottsdale, Arizona 85251  
(480) 922-8100**

*(Address, including zip code, and telephone number, including area code, of principal executive offices)*

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No   
Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer   
(Do not check if a smaller  
reporting company)

Smaller reporting  
company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

As of April 30, 2010 there were 9,165,174 shares of the registrant's common stock outstanding.

**Table of Contents****KONA GRILL, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****1. Basis of Presentation**

Kona Grill, Inc. (referred to herein as the Company or we, us, and our ) owns and operates upscale casual dining restaurants under the name Kona Grill. Our restaurants feature a diverse selection of mainstream American dishes and award-winning sushi that are prepared fresh daily. We currently own and operate 24 restaurants in 15 states throughout the United States.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the rules and regulations of the U.S. Securities and Exchange Commission ( SEC ). Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

The consolidated balance sheet at December 31, 2009 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. Accordingly, these financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2009.

***Recent Accounting Pronouncements***

In January 2010, the FASB issued Accounting Standards Update ( ASU ) 2010-06, *Fair Value Measurements and Disclosures*, which adds new disclosure requirements for transfers into and out of Levels 1 and 2 in the fair value hierarchy and additional disclosures about purchases, sales, issuances, and settlements relating to Level 3 fair value measurements. This ASU also clarifies existing fair value disclosures about the level of disaggregation about inputs and valuation techniques used to measure fair value. The ASU is effective for the first reporting period beginning after December 15, 2009, except for the requirement to provide the Level 3 activity on a gross basis, which is effective for fiscal year ends beginning after December 15, 2010 and interim periods within those years. The adoption did not have a material effect on our financial condition or results of operations.

**2. Discontinued Operations**

Discontinued operations include exit costs associated with our Naples, Florida restaurant that was closed during the third quarter of 2008. During the second quarter of 2009, we entered into a settlement agreement for the termination of the lease for \$700,000. The lease settlement requires an initial payment of \$350,000 that was paid during July 2009 and the remaining amount, including interest at a 6% annual rate, is payable in 12 equal monthly installments beginning in August 2009. Settlement fees of \$91,000 are included in accrued expenses on the accompanying consolidated balance sheet as of March 31, 2010.

Activity associated with the lease termination accrual is summarized below (in thousands):

Balance at December 31, 2009	\$	181
Cash payments		(90)
Non-cash activity		
Balance at March 31, 2010	\$	91

**Table of Contents****3. Investments**

The following is a summary of our investments (in thousands):

	<b>Adjusted Cost</b>	<b>Gross Unrealized Losses</b>	<b>Estimated Fair Value</b>
<b>March 31, 2010</b>			
Short-term investments:			
Certificates of deposit	\$ 173	\$	\$ 173
Money market securities	314		314
Auction rate securities	5,468		5,468
Put option on auction rate securities	330		330
Total investments	\$ 6,285	\$	\$ 6,285
<b>December 31, 2009</b>			
Short-term investments:			
Certificates of deposit	\$ 172	\$	\$ 172
Money market securities	314		314
Auction rate securities	5,433		5,433
Put option on auction rate securities	363		363
Total investments	\$ 6,282	\$	\$ 6,282

As of March 31, 2010, our investment portfolio included six auction rate securities with a par value of \$5,800,000. These securities are AAA rated long term debt obligations secured by student loans, substantially all of which are guaranteed by the federal government under the Federal Family Education Loan Program. While the maturity dates of our auction rate securities range from 2029 to 2046, liquidity for these securities has historically been provided by an auction process that resets the applicable interest rate at pre-determined calendar intervals, generally every 28 days. Since February 2008, events in the credit markets have adversely affected the auction market for these types of securities and auctions for our securities have failed to settle on their respective settlement dates.

Our auction rate securities are classified as trading securities as they are subject to an agreement we entered into with UBS during October 2008 pursuant to which UBS issued to us Series C-2 Auction Rate Securities Rights. The agreement allows us the right to sell our auction rate securities to UBS at full par value between June 30, 2010 and July 2, 2012. In conjunction with this agreement, we elected to apply the provisions of fair value accounting to this put option because the put option does not provide for net settlement, and the auction rate securities themselves are not readily convertible to cash. The put option does not meet the definition of a derivative, and thus, would not be marked to fair value. We therefore elected to apply fair value accounting to our put option as the put option acts as an economic hedge against any further price movement in the auction rate securities and enables us to recognize future changes in the fair value of the put option as those changes occur to offset fair value movements in the auction rate securities. Also as part of this agreement, UBS agreed to provide a line of credit through June 30, 2010 that is secured by the auction rate securities held with UBS. Both the put option and the auction rate securities are marked to market value through the consolidated statements of operations each period (see Note 4 for discussion of how fair value measurements are determined). At March 31, 2010, the fair value of the put option was \$330,000 and the fair value of the auction rate securities was \$5,468,000. We recorded a net gain of \$2,000 for the three months ended March 31, 2010, for the fair value measurement of both the auction rate securities and the put option that is included in interest income and other, net. We continue to earn interest on our auction rate securities at the maximum contractual rate.

Interest earned on the auction rate securities is used to reduce the outstanding balance under the line of credit.

**Table of Contents****4. Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. As a basis for considering such assumptions, a three-tier value hierarchy has been established, which prioritizes the inputs used in the valuation methodologies in measuring fair value.

Level 1: Fair values determined by quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access.

Level 2: Fair values utilize inputs other than quoted prices that are observable for the asset or liability, and may include quoted prices for similar assets and liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability.

Level 3: Fair values determined by unobservable inputs that are not corroborated by market data and may reflect the reporting entity's own assumptions market participants would use in pricing the asset or liability.

Our short-term investments in fixed income and money market securities represent available-for-sale securities that are valued primarily using quoted market prices or alternative pricing sources and models utilizing market observable inputs. Money market securities represent collateral for a letter of credit required under certain lease obligations. Our investment in auction rate securities are classified within Level 3 because they are valued using a discounted cash flow model. We estimate the fair value of auction rate securities using valuation models provided by third parties and internal analyses. The valuation models require numerous assumptions and assessments, including the following: (i) collateralization underlying each security; (ii) present value of future principal and interest payments discounted at rates considered to reflect current market conditions; (iii) creditworthiness of the counterparty; and (iv) current illiquidity of the investments.

The fair value of the put option is determined through comparison of the fair value of each auction rate security to its par value and then discounted by a rate reflective of the risk of default by UBS between the valuation date and the expected exercise date of the put option. A discounted cash flow approach is used to value the difference between the par value and fair value of each security using a discount rate that considers the credit risk associated with UBS and the expected timing of when the put option will be exercised. The put option is adjusted on each balance sheet date based on its then fair value. The fair value of the put option is based on unobservable inputs and is therefore classified within Level 3 in the hierarchy. The following table presents information about our assets measured at fair value on a recurring basis at March 31, 2010, and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value (in thousands):

Description	Fair Value Measurements at Reporting Date Using			March 31, 2010
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant		
		Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Certificates of deposit	\$ 173	\$	\$	\$ 173
Money market securities	314			314
Auction rate securities			5,468	5,468
Put option on auction rate securities			330	330

\$ 487 \$ \$ 5,798 \$ 6,285

**Table of Contents**

The following table summarizes the changes in fair value of our Level 3 assets (in thousands):

	Auction rate Securities	Put option on auction rate securities
Balance at December 31, 2009	\$ 5,433	\$ 363
Transfer to Level 3		
Total gains or losses (realized and unrealized)		
Included in earnings	35	(33)
Included in other comprehensive loss		
Net settlements		
Balance at March 31, 2010	\$ 5,468	\$ 330

**5. Net Loss Per Share**

Basic net loss is computed by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted net loss per share excludes the dilutive effect of potential stock option and warrant exercises, which are calculated using the treasury stock method, as these shares are anti-dilutive.

The following table sets forth the computation of basic and diluted net loss per share:

	<b>Three Months Ended March 31,</b>	
	<b>2010</b>	<b>2009</b>
	(In thousands, except per share data)	
Numerator:		
Loss from continuing operations	\$ (907)	\$ (1,083)
Loss from discontinued operations		(13)
Net loss	\$ (907)	\$ (1,096)
Denominator:		
Weighted average shares Basic	9,155	8,016
Effect of dilutive stock options and warrants		
Weighted average shares Diluted	9,155	8,016
Basic and diluted net loss per share:		
Loss from continuing operations	\$ (0.10)	\$ (0.14)
Loss from discontinued operations		
Net loss	\$ (0.10)	\$ (0.14)

On June 9, 2009, we completed our rights offering for which each holder of common stock as of the April 17, 2009 record date received one non-transferrable subscription right for every 2.5 shares of common stock. Each subscription right entitled our stockholders to purchase one share of common stock at a purchase price of \$1.35 per share. The market price of our common stock was \$3.93 per share on June 5, 2009, which was the expiration date of the rights offering. Since the \$1.35 per share subscription price of common stock issued under the rights offering was lower than the \$3.93 per share market price on June 5, 2009, the rights offering contained a bonus element. As a result, we retroactively increased the weighted average common shares outstanding used to compute basic and diluted earnings

(loss) per share by an adjustment factor of 1.2309 for all periods presented prior to the completion of the rights offering.

For the three months ended March 31, 2010 and 2009, there were 1,031,000 and 1,176,000 stock options and warrants outstanding, respectively, that were not included in the dilutive earnings per share calculation because the effect would have been anti-dilutive.

**Table of Contents****6. Accrued Expenses**

Accrued expenses consisted of the following (in thousands):

	<b>March 31, 2010</b>	<b>December 31, 2009</b>
Accrued payroll	\$ 2,279	\$ 1,875
Sales taxes	738	686
Business and income taxes	700	739
Gift cards	685	859
Accrued occupancy	205	192
Lease termination accrual	91	181
Other	1,417	1,221
	<b>\$ 6,115</b>	<b>\$ 5,753</b>

**7. Debt and Credit Agreements*****Credit Facility***

During October 2008, as part of the settlement agreement with UBS, our broker from which we purchased auction rate security instruments, we entered into a line of credit that is secured by the auction rate security instruments held with UBS. Available borrowings under the line of credit are based upon terms specified in the agreement and subject to adjustment by UBS after consideration of various factors. At March 31, 2010, \$5,798,000 was outstanding under the line of credit. Borrowings under the line of credit are callable by UBS at any time. The line of credit expires on June 30, 2010 at which time we expect to exercise the put option on our auction rate securities and use the proceeds from the sale of the auction rate securities to repay amounts due under the line of credit. The cost of the line of credit effectively offsets the interest earned on the auction rate securities. See Note 3 to the consolidated financial statements for further information on the auction rate securities and the settlement agreement.

***Equipment Loans***

As of March 31, 2010, we had five equipment term loans with a lender, each collateralized by restaurant equipment. The outstanding principal balance under these loans aggregated \$1.1 million. The loans bear interest at rates ranging from 7.0% to 8.5% and require monthly principal and interest payments aggregating approximately \$71,000. The loans mature between June 2010 and June 2012. The loans also require us to maintain certain financial covenants, including a Fixed Charge Coverage Ratio of 1.25:1.00 calculated at the end of each calendar year, and we were in compliance with all such financial covenants as of December 31, 2009.

**8. Stock-Based Compensation**

We have two stock option plans under which we may issue incentive stock options, non-qualified stock options, restricted stock, and other types of awards to employees, directors, and consultants. Upon effectiveness of the 2005 Stock Award Plan, the 2002 Stock Award Plan was closed for purposes of new grants. During the last three years, we have only granted non-qualified stock options. Stock options issued under these plans are granted with an exercise price at or above the fair market value of the underlying common stock on the date of grant and generally expire five years from the date of grant. Employee stock options generally vest 25% each year over a four-year period, while annual recurring awards for non-employee director options vest 25% each quarter over a one-year period.

**Table of Contents**

The fair value of stock options granted during the three months ended March 31, 2010 and 2009 was estimated at the date of grant using the Black-Scholes option pricing model with the following weighted average assumptions:

	<b>Three Months Ended March 31,</b>	
	<b>2010</b>	<b>2009</b>
Expected volatility	64.3%	50.2%
Risk-free interest rate	1.7%	1.7%
Expected option life (in years)	3.7	4.0
Dividend yield	0.0%	0.0%
Weighted average fair value per option granted	\$ 1.64	\$ 0.78

The following table summarizes activity under our stock award plans for the three months ended March 31, 2010:

	<b>Shares Under Option</b>	<b>Weighted Average Exercise Price</b>	<b>Weighted Average Remaining Contractual Term</b>	<b>Aggregate Intrinsic Value</b>
Outstanding options at December 31, 2009	854,856	\$ 7.67		
Granted	223,750	3.41		
Forfeited	(143,550)	9.97		
Exercised	(13,750)	2.10		
Outstanding options at March 31, 2010	921,306	\$ 6.36	3.8 years	\$ 467,000
Exercisable at March 31, 2010	389,235	\$ 9.25	3.0 years	\$ 109,000

We recognized stock-based compensation expense of \$101,000 and \$127,000 during the three months ended March 31, 2010 and 2009, respectively. As of March 31, 2010, there was \$793,000 of unrecognized stock-based compensation expense related to unvested stock-based compensation arrangements, which is expected to be recognized over a weighted average period of 2.4 years.

**9. Commitments and Contingencies**

We are engaged in various legal actions, which arise in the ordinary course of our business. Although there can be no assurance as to the ultimate disposition of these matters, it is the opinion of our management, based upon the information available at this time, that the expected outcome of these matters, individually or in the aggregate, will not have a material adverse effect on the results of operations or financial condition of our company. See discussion of Legal Proceedings in Item 1 of Part II of this Quarterly Report.

**Table of Contents**

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The following discussion and analysis should be read in conjunction with the unaudited consolidated financial statements and notes thereto included in Item 1 of Part I of this Quarterly Report and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2009 contained in our 2009 Annual Report on Form 10-K. This discussion contains certain forward-looking statements that involve known and unknown risks and uncertainties, such as statements relating to our future economic performance, plans and objectives for future operations, and projections of restaurant sales and other financial items that are based on our beliefs as well as assumptions made by and information currently available to us. Factors that might cause actual events or results to differ materially from those indicated by these forward-looking statements may include the matters under Item 1A, Risk Factors in this report, our Annual Report on Form 10-K for the year ended December 31, 2009 and other reports filed from time to time with the SEC.

**Overview**

We currently own and operate 24 restaurants located in 15 states. We offer freshly prepared food, personalized service, and a contemporary ambiance that create a satisfying yet affordable dining experience that we believe exceeds many traditional casual dining restaurants with whom we compete. Our high-volume upscale casual restaurants feature a diverse selection of mainstream American favorites as well as a variety of appetizers and entrees with an international influence, including an extensive selection of sushi items. Our menu items are freshly prepared and incorporate over 40 signature sauces and dressings that we make from scratch, creating broad-based appeal for the lifestyle and taste trends of a diverse group of guests. Our menu is mostly standardized for all of our restaurants, allowing us to deliver consistent quality meals. We believe that our vast menu and generous portions, combined with an average check of approximately \$23.90, offers our guests an attractive price-value proposition.

Over the last four years, we have funded development of new restaurants primarily from the proceeds of our initial public offering, a private offering of common stock completed during November 2007, the rights offering completed during June 2009, and cash flows from operations. We opened four restaurants during 2009 in Richmond, Virginia; Woodbridge, New Jersey; Eden Prairie, Minnesota; and Tampa, Florida. We plan to open one restaurant in Baltimore, Maryland during 2010. We will pursue additional leases based on significant economic opportunity and subject to the availability of capital on terms acceptable to us.

As a result of the relatively weak condition of the national economy, our comparable restaurant sales decreased 2.5% during the first quarter of 2010. We believe improvement in the job market, coupled with a recovery in consumer confidence and spending in general, will be important and necessary catalysts to drive guest traffic and higher guest check averages in casual dining restaurants in general and our restaurants in particular. Recent economic data indicates the beginning of a recovery in consumer spending as evidenced by an increase in our comparable restaurant sales for March 2010 of 3.6%. This represents the first month of positive comparable restaurant sales since February 2008.

We target our restaurants to achieve an average annual unit volume of \$4.5 million following 24 months of operations. Recent openings are trending lower than our targeted volume during the current economic environment. We continue to believe that in a stable economic environment our typical new restaurants experience gradually increasing unit volumes as guests begin to discover our concept and we begin to generate market awareness. Our restaurants are also subject to seasonal fluctuations. Sales in most of our restaurants typically are higher during the spring and summer months and winter holiday season.

During the fourth quarter of 2009, we recorded non-cash asset impairment charges for six underperforming restaurants. The asset impairment charges resulted from an evaluation of the long-term prospects of each of these restaurants that have not been meeting sales, profitability, and cash flow targets. We have no plans to close any of these restaurants; however, we will continue to evaluate each of these restaurants to determine whether operating performance can be improved.

**Table of Contents**

We experience various trends in our operating cost structure. Cost of sales, labor, occupancy, and other operating expenses for our restaurants open at least 12 months generally trend consistent with restaurant sales, and we analyze those costs as a percentage of restaurant sales. We anticipate that our new restaurants will take approximately six months to achieve operating efficiencies as a result of challenges typically associated with opening new restaurants, including lack of market recognition and the need to hire and sufficiently train employees, as well as other factors. We expect cost of sales and labor expenses as a percentage of restaurant sales to be higher when we open a new restaurant, but decrease as a percentage of restaurant sales as the restaurant matures and as the restaurant management and employees become more efficient operating that unit. As a result, the volume and timing of newly opened restaurants has had, and is expected to continue to have, an impact on costs of sales, labor, occupancy, restaurant operating expenses, and preopening expenses. The majority of our general and administrative costs are fixed costs. We expect our general and administrative spending to decrease as a percentage of restaurant sales as we leverage these investments and realize the benefits of higher sales volumes.

**Key Measures We Use to Evaluate Our Company**

Key measures we use to evaluate and assess our business include the following:

*Number of Restaurant Openings.* Number of restaurant openings reflects the number of restaurants opened during a particular reporting period.

*Same-Store Sales Percentage Change.* Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base. In calculating the percentage change in same-store sales, we include a restaurant in the comparable restaurant base after it has been in operation for more than 18 months. Same-store sales growth can be generated by an increase in guest traffic counts or by increases in the per person average check amount. Menu price changes and the mix of menu items sold can affect the per person average check amount.

*Average Weekly Sales.* Average weekly sales represents the average of restaurant sales measured over consecutive Monday through Sunday time periods.

*Average Unit Volume.* Average unit volume represents the average restaurant sales for the comparable restaurant base.

*Sales Per Square Foot.* Sales per square foot represents the restaurant sales for our comparable restaurant base, divided by the total leasable square feet for such restaurants.

*Restaurant Operating Profit.* Restaurant operating profit is defined as restaurant sales minus cost of sales, labor, occupancy, and restaurant operating expenses. Restaurant operating profit does not include general and administrative expenses, depreciation and amortization, or preopening expenses. We believe restaurant operating profit is an important component of financial results because it is a widely used metric within the restaurant industry to evaluate restaurant-level productivity, efficiency, and performance prior to application of corporate overhead. We use restaurant operating profit as a percentage of restaurant sales as a key metric to evaluate our restaurants' financial performance compared with our competitors. This measure provides useful information regarding our financial condition and results of operations and allows investors to more easily determine future financial results driven by growth and allows investors to more easily compare restaurant level profitability.

**Key Financial Definitions**

*Restaurant Sales.* Restaurant sales include gross food and beverage sales, net of promotions and discounts.

*Cost of Sales.* Cost of sales consists of food and beverage costs.

*Labor.* Labor includes all direct and indirect labor costs incurred in operations.

**Table of Contents**

*Occupancy.* Occupancy includes all rent payments associated with the leasing of real estate, including base, percentage and straight-line rent, property taxes, and common area maintenance expense. We record tenant improvement allowances as a reduction of occupancy expense over the initial term of the lease.

*Restaurant Operating Expenses.* Restaurant operating expenses consist of all other restaurant-level operating costs, the major components of which are utilities, credit card fees, advertising, supplies, marketing, repair and maintenance, and other expenses. Other operating expenses contain both variable and fixed components.

*General and Administrative.* General and administrative includes all corporate and administrative functions that support operations and provide infrastructure to facilitate our future growth. Components of this category include management and staff salaries, bonuses, stock-based compensation and related employee benefits, travel, information systems, human resources, training, corporate rent, professional and consulting fees, and corporate insurance costs.

*Preopening Expense.* Preopening expense consists of costs incurred prior to opening a new restaurant and is comprised principally of manager salaries and relocation, payroll and related training costs for new employees, including food and beverage costs associated with practice and rehearsal of service activities, and rent expense incurred from the date we obtain possession of the property until opening. We expense restaurant preopening expenses as incurred, and we expect preopening expenses to be similar for each new restaurant opening, which typically commence six to eight months prior to a restaurant opening. Our preopening costs will fluctuate from period to period depending upon the number of restaurants opened, the timing of new restaurant openings, the location of the restaurants, and the complexity of the staff hiring and training process.

*Depreciation and Amortization.* Depreciation and amortization expense consists of the depreciation of property and equipment and gains and losses on disposal of assets.

*Interest Income and Other, Net.* Interest income and other, net consists of interest earned on our cash and investments and any gains or losses on our investments.

*Interest Expense.* Interest expense includes the cost of servicing our debt obligations, net of capitalized interest.

**Financial Performance Overview**

The following table sets forth certain information regarding our financial performance for the three months ended March 31, 2010 and 2009.

	<b>Three Months Ended March 31,</b>	
	<b>2010</b>	<b>2009</b>
Restaurant sales growth	8.2%	7.5%
Same-store sales percentage change (1)	(2.5)%	(9.6)%
Average weekly sales comparable restaurant base (2)	\$ 70,182	\$ 71,997
Average weekly sales non-comparable restaurant base (3)	\$ 60,650	\$ 66,331
Average unit volume (in thousands) (2)	\$ 912	\$ 954
Sales per square foot (2)	\$ 129	\$ 136
Restaurant operating profit (in thousands) (4)	\$ 2,657	\$ 3,059
Restaurant operating profit as a percentage of sales (4)	12.6%	15.7%

(1) Same-store sales percentage change reflects the periodic change in restaurant sales for the comparable restaurant base. In calculating the percentage

change for same-store sales, we include a restaurant in the comparable restaurant base after it has been in operation for more than 18 months.

- (2) Includes only those restaurants in the comparable restaurant base.

**Table of Contents**

(3) Includes only those restaurants that are not in the comparable restaurant base that were open for the entire period.

(4) Restaurant operating profit is not a financial measurement determined in accordance with U.S. generally accepted accounting principles and should not be considered in isolation or as an alternative to income (loss) from operations. Restaurant operating profit may not be comparable to the same or similarly titled measures computed by other companies.

The following tables set forth our calculation of restaurant operating profit and reconciliation to loss from operations, the most comparable GAAP measure.

	<b>Three Months Ended March 31,</b>	
	<b>2010</b>	<b>2009</b>
	(In thousands)	
Restaurant sales	\$ 21,052	\$ 19,455
Costs and expenses:		
Cost of sales	5,575	5,097
Labor	7,583	6,749
Occupancy	1,781	1,520
Restaurant operating expenses	3,456	3,030

Restaurant operating profit	2,657	3,059
Deduct other costs and expenses		
General and administrative	2,137	1,887
Preopening expense	8	500
Depreciation and amortization	1,399	1,741
Loss from operations	\$ (887)	\$ (1,069)

**Percentage of Restaurant Sales  
Three Months Ended March 31,  
2010                      2009**

Restaurant sales	100.0%	100.0%
Costs and expenses:		
Cost of sales	26.5	26.2
Labor	36.0	34.7
Occupancy	8.5	7.8
Restaurant operating expenses	16.4	15.6
Restaurant operating profit	12.6	15.7
Deduct other costs and expenses		
General and administrative	10.2	9.7
Preopening expense	0.0	2.6
Depreciation and amortization	6.6	8.9
Loss from operations	(4.2)%	(5.5)%

The following table sets forth changes in the number of restaurants opened for the periods indicated:

	<b>Three Months Ended March 31, 2010</b>	<b>Year Ended December 31, 2009</b>
Beginning of period	24	20
Openings		4
Closings		
End of period	24	24

**Table of Contents****Results of Operations**

The following table sets forth, for the periods indicated, the percentage of restaurant sales of certain items in our financial statements.

	<b>Three Months Ended March 31,</b>	
	<b>2010</b>	<b>2009</b>
Restaurant sales	100.0%	100.0%
Costs and expenses:		
Cost of sales	26.5	26.2
Labor	36.0	34.7
Occupancy	8.5	7.8
Restaurant operating expenses	16.4	15.6
General and administrative	10.2	9.7
Preopening expense	0.0	2.6
Depreciation and amortization	6.6	8.9

Provision for income taxes		0.1
Loss from continuing operations	(4.3)	(5.6)
Loss from discontinued operations, net of tax		
Net loss	(4.3)%	(5.6)%

**Three Months Ended March 31, 2010 Compared with Three Months Ended March 31, 2009**

**Restaurant Sales.** Restaurant sales increased \$1.6 million, or 8.2% to \$21.1 million during the first quarter of 2010 from \$19.5 million during the prior year period. The sales increase was primarily the result of restaurant sales associated with the opening of three new restaurants since April 2009, partially offset by a 2.5% decrease in comparable restaurant sales resulting from continued weakness in the U.S. economy, high unemployment rates, and reduced consumer spending.

**Cost of Sales.** Cost of sales increased \$0.5 million, or 9.4% to \$5.6 million during the first quarter of 2010 from \$5.1 million during the first quarter of 2009. Cost of sales as a percentage of restaurant sales increased 0.3% to 26.5% during the first quarter of 2010 from 26.2% during the prior year period. Cost of sales during the first quarter of 2010 reflects unfavorable year-over-year pricing for certain seafood and produce items.

**Labor.** Labor costs for our restaurants increased \$0.8 million, or 12.4% to \$7.6 million during the first quarter of 2010 from \$6.8 million during the prior year period. This increase was primarily due to the opening of three new restaurants since April 2009. Labor expenses as a percentage of restaurant sales increased 1.3% to 36.0% during the first quarter of 2010 from 34.7% during the first quarter of 2009. The increase in labor costs as a percentage of restaurant sales was

primarily due to reduced leverage of fixed labor costs and hourly labor expense resulting from lower average weekly sales. In addition, high labor costs from restaurants opened within the past 12 months also contributed to the increase in labor expense as labor expenses are typically higher than normal during the first several months of operations as restaurant management teams become more accustomed to optimally predicting, managing, and servicing the sales volumes expected at our new restaurants.

**Table of Contents**

*Occupancy.* Occupancy expense increased \$0.3 million, or 17.2% to \$1.8 million during the first quarter of 2010 from \$1.5 million during the prior year period. Occupancy expenses as a percentage of restaurant sales increased 0.7% to 8.5% during the first quarter of 2010 from 7.8% during the first quarter of 2009. The increase as a percentage of sales reflects decreased leverage of the fixed portion of these costs from lower average weekly sales and increased common area maintenance allocations at many locations.

*Restaurant Operating Expenses.* Restaurant operating expenses increased \$0.4 million, or 14.1% to \$3.4 million during the first quarter of 2010 from \$3.0 million during the first quarter of 2009. Restaurant operating expenses as a percentage of restaurant sales increased 0.8% to 16.4% during the first quarter of 2010 from 15.6% during the prior year period. During the first quarter of 2010, higher repair and maintenance, advertising, and property taxes combined with reduced leverage of fixed operating costs resulting from lower average sales volume contributed to the increase in restaurant operating expenses as a percentage of sales.

*General and Administrative.* General and administrative expenses increased \$0.2 million, or 13.3% to \$2.1 million during the first quarter of 2010 compared to \$1.9 million during the first quarter of 2009. The first quarter of 2010 includes \$0.3 million in special charges for legal and professional fees associated with the contested proxy solicitation and the ongoing derivative suit. General and administrative expenses as a percentage of restaurant sales increased 0.5% to 10.2% of restaurant sales during the first quarter of 2010 compared to 9.7% of restaurant sales during the prior year period.

*Preopening Expense.* Preopening expense decreased \$0.5 million to essentially zero during the first quarter of 2010 due to no restaurant openings scheduled for the first half of 2010. Preopening expense varies each quarter based upon the timing of new restaurant openings as the majority of preopening expense is incurred during the two months preceding an opening. During the first quarter of 2009, we opened our Richmond, Virginia restaurant and incurred preopening expenses for our Woodbridge, New Jersey restaurant that opened during April 2009.

*Depreciation and Amortization.* Depreciation and amortization expense decreased \$0.3 million, or 19.7% to \$1.4 million during the first quarter of 2010 from \$1.7 million during the prior year period. The decrease is due to a \$0.6 million reduction in depreciation expense associated with the fourth quarter of 2009 impairment of long-lived assets at six of our underperforming restaurants, partially offset by depreciation expense for three restaurants that opened since April 2009. Depreciation and amortization expense as a percentage of restaurant sales decreased 2.3% to 6.6% during the first quarter of 2010 from 8.9% during the prior year period.

*Interest Income and Other, Net.* Interest income and other, net decreased during the first quarter of 2010 due to lower interest earned on our investments as compared to the prior year period. Please refer to Note 3 to the unaudited consolidated financial statements for discussion of our investment in auction rate securities.

*Interest Expense.* Interest expense increased to \$42,000 during the first quarter of 2010 from \$32,000 during the first quarter of 2010 due to the capitalization of a portion of interest expense during the prior year period.

*Provision for Income Taxes.* During the first quarter of 2010, we did not record any provision for income taxes compared to \$30,000 during the first quarter of 2009. The zero provision for the first quarter of 2010 reflects the benefit recorded by us for the anticipated refund of prior year taxes due to a change in tax legislation regarding net operating loss carrybacks, offset by taxes for certain states in which we operate that do not calculate tax based upon net income.

**Table of Contents**

Our quarterly operating results may fluctuate significantly as a result of a variety of factors, including the following:  
timing of new restaurant openings and related expenses;

restaurant operating costs and preopening costs for our newly-opened restaurants, which are often materially greater during the first several months of operation than thereafter;

labor availability and costs for hourly and management personnel;

profitability of our restaurants, especially in new markets;

increases and decreases in comparable restaurant sales;

impairment of long-lived assets and any loss on restaurant closures;

changes in borrowings and interest rates;

general economic conditions;

weather conditions or natural disasters;

timing of certain holidays;

changes in government regulations;

outside shareholder activities;

settlements, damages and legal costs associated with litigation;

new or revised regulatory requirements and accounting pronouncements;

changes in consumer preferences and competitive conditions; and

fluctuations in commodity prices.

Our business is also subject to seasonal fluctuations. Historically, sales in most of our restaurants have been higher during the spring and summer months and winter holiday season. Consequently, our quarterly and annual operating results and comparable restaurant sales may fluctuate significantly as a result of seasonality and the factors discussed above. Accordingly, results for any one quarter are not necessarily indicative of results to be expected for any other quarter or for any year and comparable restaurant sales for any particular future period may decrease. In the future, operating results may fall below the expectations of our investors. In that event, the price of our common stock would likely decrease.

**Liquidity and Capital Resources**

Our primary capital requirements are for new restaurant development. Subject to availability of capital on terms acceptable to us, we will pursue additional leases based on significant economic opportunity. Similar to many restaurant chains, we utilize operating lease arrangements for all of our restaurant locations. We believe that our operating lease arrangements provide appropriate leverage for our capital structure in a financially efficient manner. We are typically required to expend cash to perform site-related work and to construct and equip each restaurant. The average investment cost for our restaurants depends upon the type of lease entered into, the amount of tenant improvement allowance we receive from landlords, and whether we assume responsibility for the construction of the building. We expect the cash investment cost of our typical restaurant to be approximately \$2.5 million, net of

landlord tenant improvement allowances between \$0.7 million and \$1.2 million, and excluding cash preopening expenses of approximately \$0.4 million. We expect these costs will vary from one market to another based on real estate values, zoning regulations, permitting requirements, labor markets and other variables. Restaurants that are subject to ground leases and do not receive landlord tenant improvement allowances typically require a significantly higher cash investment. We also require capital resources to maintain our existing base of restaurants and to further expand and strengthen the capabilities of our corporate and information technology infrastructures.

**Table of Contents**

The following tables set forth, for the periods indicated, a summary of our key liquidity measurements (amounts in thousands):

	<b>March 31, 2010</b>	<b>December 31, 2009</b>
Cash and short-term investments(1)	\$ 2,909	\$ 2,890
Net working capital (deficit)(2)	(4,895)	(5,054)

(1) At March 31, 2010 and December 31, 2009, cash and short-term investments exclude \$5.8 million in auction rate securities that are used as collateral for the line of credit. Proceeds from the sale of auction rate securities are used to reduce the outstanding balance on the line of credit.

(2) The working capital deficit at March 31, 2010 and December 31, 2009, is primarily attributable to accruals for payroll, legal, and professional fees.

	<b>Three Months Ended March 31,</b>	
	<b>2010</b>	<b>2009</b>
Cash provided by operating activities	\$ 793	\$ 1,506
Capital expenditures	628	4,283
<b><i>Future Capital Requirements</i></b>		

Our capital requirements, including development costs related to the opening of new restaurants, have historically been significant. Over the last several years, we funded development of new restaurants primarily from the proceeds of equity financing, debt financing, and cash flows from operations. Our future cash requirements and the adequacy of available funds will depend on many factors, including the operating performance of our restaurants, the pace of expansion, real estate markets, site locations, the nature of the arrangements negotiated with landlords and the credit market environment.

Our current operations generate sufficient cash flow to fund operations and general and administrative costs. We believe existing cash and short-term investments of \$2.9 million in addition to cash flow from operations is sufficient to fund development costs required for our Baltimore restaurant. Any reduction of our cash flow from operations may cause a delay or cancellation of planned restaurant development or renovation of existing restaurants. As of March 31, 2010, we had a working capital deficit of \$4.9 million. We plan to reduce this deficit through cost containment efforts and cash flow from operations. Financing to construct new restaurants may not be available on acceptable terms, or at all, and our failure to raise capital when needed could impact our growth plans, financial condition, and results of operations. Additional equity financing may result in dilution to current shareholders and debt financing, if available, may involve significant cash payment obligations or financial covenants and ratios that may restrict our ability to operate our business.

#### ***Equipment Loans***

As of March 31, 2010, we had five equipment term loans with a lender, each collateralized by restaurant equipment. The outstanding principal balance under these loans aggregated \$1.1 million. The loans bear interest at rates ranging from 7.0% to 8.5% and require monthly principal and interest payments aggregating approximately \$71,000. The loans mature between June 2010 and June 2012. The loans also require us to maintain certain financial covenants, including a Fixed Charge Coverage Ratio of 1.25:1.00 calculated at the end of each calendar year, and we were in compliance with all such financial covenants as of December 31, 2009.

#### ***Credit Facility***

During October 2008, as part of the settlement agreement with UBS, our broker from which we purchased auction rate security instruments, we entered into a line of credit that is secured by the auction rate security instruments held with UBS. Available borrowings under the line of credit are based upon terms specified in the agreement and subject to adjustment by UBS after consideration of various factors. At March 31, 2010, \$5,798,000 was outstanding under the line of credit. Borrowings under the line of credit are callable by UBS at any time. The line of credit expires on June 30, 2010 at which time we expect to exercise the put option on our auction rate securities and use the proceeds from the sale of the auction rate securities to repay amounts due under the line of credit. The cost of the line of credit effectively offsets the interest earned on the auction rate securities. See Note 3 to the consolidated financial statements for further information on the auction rate securities and the settlement agreement.

**Table of Contents****Cash Flows**

The following table summarizes our primary sources and uses of cash during the periods presented (in thousands).

	<b>Three Months Ended March 31,</b>	
	<b>2010</b>	<b>2009</b>
Net cash provided by (used in):		
Operating activities	\$ 793	\$ 1,506
Investing activities	(621)	(4,615)
Financing activities	(154)	3,125
Net increase in cash and cash equivalents	\$ 18	\$ 16

*Operating Activities.* Our cash flows from operating activities, as detailed in the Unaudited Consolidated Statements of Cash Flows, provided \$0.8 million of net cash during the first three months of 2010. The net decrease in cash from operating activities for the first quarter of 2010 in comparison to the first quarter of 2009, is primarily attributable to decreases in tenant allowance receivables due to timing.

*Investing Activities.* We fund the development and construction of our new restaurants primarily with cash flows from operations and proceeds from equity transactions. Our capital expenditures for the first quarter of 2010 represent contractor payments for our Eden Prairie, Minnesota and Tampa, Florida restaurants that were opened during the second half of 2009 and architecture fees for our Baltimore, Maryland restaurant scheduled to open during the fourth quarter of 2010. Net cash used in investing activities was \$4.6 million during the first quarter of 2009 reflecting \$4.3 million primarily to fund construction at our Richmond, Virginia and Woodbridge, New Jersey restaurants.

*Financing Activities.* Net cash used in financing activities was \$0.2 million during the first three months of 2010 reflecting principal payments on equipment loans. Net cash provided by financing activities was \$3.1 million during the first quarter of 2009 reflecting \$2.1 million in net borrowings under our line of credit and \$1.2 million in proceeds from a bridge loan financing transaction completed during March 2009, partially offset by \$0.2 million in principal payments on equipment loans.

**Critical Accounting Policies**

Critical accounting policies are those that we believe are most important to the portrayal of our financial condition and results of operations and also require our most difficult, subjective, or complex judgments. Judgments or uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. There have been no material changes to the critical accounting policies previously reported in our Annual Report on Form 10-K for the year ended December 31, 2009.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

The following discussion of market risks contains forward-looking statements. Actual results may differ materially from the following discussion based on general conditions in the financial and commodity markets.

**Table of Contents*****Primary Market Risk Exposures***

Our primary market risk exposure is commodity costs. Many of the food products purchased by us can be subject to volatility due to changes in weather, production, availability, seasonality, and other factors outside our control. Substantially all of our food and supplies are available from several sources, which helps to diversify our overall commodity cost risk. We also believe that we have the ability to increase certain menu prices in response to food commodity price increases.

**Item 4. Controls and Procedures*****Evaluation of Disclosure Controls and Procedures***

We have evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have each concluded that our disclosure controls and procedures are effective to ensure that we record, process, summarize, and report information required to be disclosed by us in our quarterly reports filed under the Exchange Act within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

***Changes in Internal Control over Financial Reporting***

During the quarterly period covered by this report, there have not been any changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

On February 6, 2009, Samuel Beren (Beren or plaintiff), as trustee for the Samuel Beren Trust, served a demand on us pursuant to Section 220 of Delaware's General Corporation Law (the DGCL), which requested that we make available for inspection certain books and records. On April 1, 2009, Beren, as trustee for the Samuel Beren Trust, commenced a purported stockholder derivative action in the Court of Chancery of the State of Delaware. The complaint filed in the derivative action subsequently was amended by plaintiff. The derivative action purportedly was brought on behalf of us against our directors and the purchasers of our promissory notes issued on March 5, 2009, for alleged breaches of fiduciary duties by our directors, and for aiding and abetting such breaches by the purchasers of our promissory notes. We also were named as a nominal defendant in the derivative action. The derivative action seeks unspecified damages, interest, reasonable attorneys' fees, expert witness fees, and other costs, and any further relief the Court deems just and proper.

On June 16, 2009, the director defendants filed a motion to dismiss the derivative action. On August 28, 2009, the director defendants filed an opening brief in support of the motion to dismiss. Separately, on October 26, 2009, plaintiff served a demand on us pursuant to Section 220 of the DGCL, which requested that we make available for inspection certain books and records. On November 11, 2009, plaintiff moved to suspend the briefing schedule in connection with the motion to dismiss the derivative action until the parties resolved the October 26, 2009 books and records demand. The director defendants opposed the motion to modify the briefing schedule. On January 19, 2010, the Court ordered that plaintiff must either amend his complaint, or file an answering brief in response to the motion to dismiss by January 26, 2010.

## **Table of Contents**

On January 20, 2010, we produced books and records in response to the October 26, 2009 demand. Two days later, on January 22, 2010, plaintiff commenced a separate action against us, which sought the production of the books and records requested in plaintiff's February 6, 2009 and October 26, 2009 demand letters. The complaint filed in the books and records action was served on our registered agent in Delaware on February 16, 2010.

On January 25, 2010, plaintiff filed a letter with the Court informing the Court of the newly-filed books and records action, and requested a stay of the derivative action until the newly-filed books and records action was resolved. After receiving the director defendants' opposition to the request for a stay, the Court instructed plaintiff to file a formal motion to stay, as opposed to a letter request, if plaintiff is seeking a stay of the derivative action. The Court also directed plaintiff to advise the Court as to why no action has been taken in conformity with [the] Court's January 19, 2010 letter decision. Plaintiff filed a formal motion to stay, which the Court granted on March 11, 2010. The Court stayed the derivative action until further order of the Court, and ordered that plaintiff complete all books and records inspection efforts in connection with [the derivative] litigation by June 11, 2010. The Court further ordered that at the conclusion of such inspection efforts, plaintiff must notify the parties and the Court whether plaintiff intends to file an answering brief in opposition to the motion to dismiss the derivative action, or whether plaintiff intends to seek leave to file an amended or supplemental complaint. We continue to believe that the purported derivative action is without merit, and we intend to defend ourselves vigorously if the Court-ordered stay entered in the derivative action is lifted.

On March 8, 2010, we filed a motion to dismiss the books and records action. On March 22, 2010, we filed an opening brief in support of the motion to dismiss the books and records action. On March 26, 2010, during a teleconference requested by the Court, the Court denied our motion to dismiss and scheduled a one-day trial to be held on May 26, 2010. The Court explained that it disfavors motions to dismiss in books and records actions, and found it to be more efficient to forego briefing in connection with our motion to dismiss in favor of a trial, at which the Court will dispose of all of the issues in the books and records action. Subsequent to the March 26, 2010 teleconference, we agreed to produce books and records in response to the February 6, 2009 demand, and reminded plaintiff that we previously produced books and records in response to the October 26, 2009 demand. Beren has executed a confidentiality agreement in connection with the anticipated production by us.

On April 30, 2010, the parties named in the books and records action submitted a stipulation and proposed order to the Court agreeing (a) that the May 26, 2010 trial in the books and records action should be continued until further order by the Court, and (b) that the books and records action should be stayed until further order of the Court. The parties named in the derivative action also submitted a stipulation and proposed order agreeing that following inspection by plaintiff of the documents contemplated by the books and records action, plaintiff will file a second amended complaint in the derivative action within sixty (60) days of the earlier of (a) the entry of judgment in the books and records action by the Court, or (b) the dismissal of the books and records action by the Court. Although we agreed to the filing of a second amended complaint in the derivative action, plaintiff recognized and acknowledged that such agreement by us and the director defendants did not waive any right of ours or the director defendants to respond to the second amended complaint as appropriate, which includes the filing of a motion to dismiss the second amended complaint based upon any appropriate legal ground. The parties also requested that the Court vacate the June 11, 2010 deadline for plaintiff to complete its books and records inspection. We believe that, after books and records are produced in response to the February 6, 2009 demand, the books and records action will be moot.

### **Item 1A. Risk Factors**

A description of the risk factors associated with our business is contained in Part I, Item 1A, Risk Factors, of our Annual Report on Form 10-K for the year ended December 31, 2009. These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks, and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the SEC.
