Table of Contents**Management Performance and Financial Conditions****(1) Outline of Operations and Business Results**

Komatsu Ltd. and its consolidated subsidiaries (hereinafter "Komatsu") embarked on the new three-year management plan, "Global Teamwork for Tomorrow" in April this year. Under this new mid-range management plan, Komatsu began concerting efforts on activities of importance, including 1) promotion of ICT applications to products and parts, 2) development of products for improved environmental friendliness and safety, 3) expansion of sales and service operations in Strategic Markets which include China, Asia, Oceania, Latin America and Africa, and 4) promotion of continuous Kaizen (improvement) by strengthening workplace capability.

During the first quarter period (three months from April 1 to June 30, 2010) of the fiscal year ending March 31, 2011, the first year of the ongoing mid-range management plan, demand for construction and mining equipment increased in all regions of the world from the corresponding period a year ago. Demand for industrial machinery also began to show signs of recovery. Against this backdrop, consolidated net sales totaled JPY447.1 billion (USD5,081 million, at USD1=JPY88), up 39.5% from the previous first quarter. While the Japanese currency appreciated sharply against the U.S. dollar and euro from the previous first quarter, Komatsu made sizable gains in first-quarter profits by enhancing productivity in addition to expanding sales. Specifically, operating income reached JPY54.0 billion (USD614 million), up 553.6%, and operating income ratio advanced to 12.1%, an improvement of 9.5 percentage points. Income before income taxes and equity in earnings of affiliated companies increased by 474.1% to JPY50.1 billion (USD569 million). Net income attributable to Komatsu Ltd. totaled JPY30.6 billion (USD349 million), up 544.5%.

Net income attributable to Komatsu Ltd.	30,697	4,763	544.5%

Business results by operation are described below.

Construction, Mining and Utility Equipment

While Komatsu continued to work to expand production capacity and product support capability in Strategic Markets by anticipating their market growth, demand expanded especially in China, Asia and Latin America in the first quarter under review. In the Traditional Markets of Japan, North America and Europe, demand bottomed out, and thus showed improvement from the corresponding period a year ago. Against the backdrop of demand recovery worldwide, consolidated net sales of construction, mining and utility equipment advanced by 42.3% from the previous first quarter, to JPY405.2 billion (USD4,605 million).

Table of Contents

[Sales of Construction, Mining and Utility Equipment by Region]

Total	405,206	284,695	120,511	42.3%

* Excluding Japan
and China

Japan

Demand for construction equipment bottomed out in Japan, and was supported by the recovery of private-sector capital investment in addition to the public-sector works remaining from the previous fiscal supplementary budget. Komatsu especially strengthened sales efforts in the quarry industry. First-quarter sales increased from the corresponding period a year ago.

In May this year, Komatsu Castex Ltd., a wholly owned subsidiary headquartered in Himi City, Toyama Prefecture in Japan, completed the construction of a new plant and expanded its production capacity for iron castings, a material for engine and other parts. This move is part of Komatsu's efforts to expand its production capacity by anticipating growth in global demand for construction and mining equipment.

Americas

In North America, while the economies fell short of recovery, particularly as the U.S. housing starts remained sluggish, the operating rate of construction equipment began to increase gradually. Demand stopped falling after three and half years, and upturned for growth from the corresponding period a year ago. In Latin America, demand continued to expand in mining, civil engineering, agriculture and other sectors in Brazil, the largest market of this region. In Chile, demand for mining equipment remained strong. While demand recovered, Komatsu worked to increase selling prices in the Americas and strengthened sales and product support operations, particularly for mines in Latin America. As a result, first-quarter sales in the Americas improved from the corresponding period a year ago.

Europe & CIS

In Europe where the drastic decline in demand had continued, demand stopped falling, mainly in Germany, England and France, in the first quarter under review. Against this backdrop, Komatsu worked to strengthen its product support capability and expand sales of parts by teaming up with its distributors. As a result, first-quarter sales increased from the corresponding period a year ago. In CIS, demand for mining equipment began to recover, and first-quarter sales improved from the previous first quarter.

In Russia, Komatsu completed the construction of a plant of Komatsu Manufacturing Rus, LLC in June this year to produce hydraulic excavators and other equipment. Komatsu is anticipating mid to long-range growth in demand for construction and mining equipment in Russia, as the developments of natural resources and infrastructure will advance into the future. By promoting local production, Komatsu is better positioned to not only capture this growth of demand, but also cut down logistical costs and inventories and further strengthen product support operations.

Table of Contents

China

Demand expanded sharply, as urbanization advanced and large-scale infrastructure development projects, such as railways and highways, continued under the leadership of the Chinese government. First-quarter sales increased from the corresponding period a year ago.

By anticipating further market expansion, Komatsu worked to reinforce production, sales and service operations. Specific measures included the plant transfer of Komatsu (Changzhou) Construction Machinery Corp., start-up preparations for Komatsu (Shandong) Cast Steel Co., Ltd, a manufacturing subsidiary for steel castings, and the KC Techno Center, and training of distributors' service engineers in the special program, which Komatsu has sponsored since 2004, at the Shandong Jiaotong University.

Asia & Oceania

In Indonesia, the largest market of Southeast Asia, demand expanded substantially in civil engineering, agriculture and forestry sectors, in addition to mining. Demand also advanced in India, Thailand and Malaysia. In Australia, demand was strong in the mining sector. Against this backdrop, first-quarter sales in Asia & Oceania increased from the corresponding period a year ago, driven by doubled sales in Asia. In the first quarter under review, Komatsu also worked to reinforce operations, including the reorganization of distributors in Thailand and Australia. Furthermore, Komatsu continued to emphasize training of service engineers, who are capable of working around the world, at the Komatsu H.R.D. Center (Philippines) which was opened in 2008.

Middle East & Africa

The number of inquiries began to increase centering on mining equipment, as the trend of economic deterioration was reversed and commodities prices stabilized. Against this backdrop, while sales in Africa declined slightly from the corresponding period a year ago, sales expanded in the Middle East where sales had previously plummeted. As a result, first-quarter sales in the Middle East & Africa increased from the previous first quarter. Komatsu is expecting market expansion into the future to be accompanied by the development of new mines and the recovery of infrastructure development. Komatsu continued to strengthen its product support capability by establishing a training center jointly with a distributor in Kenya, following the training center opened in Senegal in the previous fiscal year.

Industrial Machinery and Others

Capital investment by the automobile manufacturing industry began to recover, centering on our Strategic Markets, such as China, India and Brazil. The number of orders received for large presses, small and medium-sized sheet metal and forging machines as well as machine tools upturned for growth. In addition, as the solar cell market continued to burgeon, sales of wire saws for use in slicing silicon ingots expanded, especially in China. As a result, first-quarter sales increased by 17.4% from the corresponding period a year ago, to JPY41.9 billion (USD477 million).

Table of Contents**(2) Financial Conditions**

As of June 30, 2010, total assets had decreased by JPY55.8 billion from the previous fiscal year-end, to JPY1,903.1 billion (USD21,627 million), largely due to the Japanese yen's appreciation against other major currencies. Interest-bearing debt decreased by JPY30.8 billion from the previous fiscal year-end, to JPY555.5 billion (USD6,313 million). Komatsu Ltd. shareholders' equity decreased by JPY15.4 billion from the previous fiscal year-end, to JPY818.5 billion (USD9,301 million). As a result, Komatsu Ltd. shareholders' equity ratio increased by 0.4 percentage points from the previous fiscal year-end, to 43.0%. Net debt-to-equity ratio* was 0.57 compared to 0.60 as of the previous fiscal year-end.

* *Net
debt-to-equity
ratio =
(Interest-bearing

Komatsu Ltd.
shareholders
equity*

For the first quarter period under review, net cash provided by operating activities increased by JPY54.3 billion from the corresponding period a year ago, to JPY55.2 billion (USD628 million), mainly due to an increase in net income. Net cash used in investing activities declined by JPY3 billion from the corresponding period a year ago, to JPY17.2 billion (USD196 million). Net cash used in financing activities totaled JPY30.8 billion (USD350 million), an increase of JPY45.4 billion, mainly due to repayments on short-term debt. As a result, cash and cash equivalents, as of June 30, 2010, totaled JPY84.3 billion (USD958 million), an increase of JPY1.9 billion from the previous fiscal year-end.

(3) Projections for the Fiscal Year Ending March 31, 2011

(From April 1, 2010 to March 31, 2011)

On July 13, the Company revised its projections of business results for the fiscal year ending March 31, 2011, which are shown on page 2 of this release.

Cautionary Statement

The announcement set forth herein contains forward-looking statements which reflect management's current views with respect to certain future events, including expected financial position, operating results, and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects and similar terms or expressions that identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured. Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated cost or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; and, the impact of regulatory changes and accounting principles and practices.
