Part I

Item 1. Business

Badger Meter, Inc. (the "company") is a leading marketer and manufacturer of products, and a provider of services, using flow measurement and control technologies serving markets worldwide. The company was incorporated in 1905.

Markets and Products

The company's products are sold to water utilities, original equipment manufacturers and various industrial customers primarily operating in the following markets: water, wastewater and process waters; energy and petroleum; food and beverage; pharmaceutical; chemical; and concrete.

The company has five major product lines: residential and commercial/industrial water meters (with related technologies), automotive fluid meters, small precision valves and industrial process meters. Water meters and related systems produce the majority of the company's sales. A "water meter system" generally consists of a water meter, a register (some with an interface technology for communicating the reading), packaging and the monitoring or computerized management system used to collect and relay the reading.

The company's products are primarily manufactured and assembled in the company's Milwaukee, Wisconsin, Tulsa, Oklahoma, Rio Rico, Arizona and Brno, Czech Republic facilities. Assembly is also done in the company's Nogales, Mexico and Stuttgart, Germany facilities.

Badger Meter's products are sold throughout the world through various distribution channels including direct sales representatives, distributors and independent sales representatives. There is only a moderate seasonal impact on sales, primarily relating to slightly higher sales of certain utility products during the spring and summer months. No single customer accounts for more than 10% of the company's sales.

Competition

There are several competitors in each of the markets in which the company sells its products, and the competition varies from moderate to intense. Major competitors include Invensys, Inc., Neptune Technology Group, Inc. (formerly Schlumberger Industries, Inc.) and ABB-Kent Meters, Inc. A number of the company's competitors in certain markets have greater financial resources. The company believes it currently provides the leading technology in certain types of automated and automatic water meter systems and small, high-precision valves. As a result of significant research and development activities, the company enjoys favorable patent positions for several of its products.

Backlog

The dollar amount of the company's total backlog of unshipped orders at December 31, 2001 and 2000 was \$18,100,000 and \$20,400,000, respectively. The company expects to ship nearly all of the December 31, 2001 backlog in 2002.

Edgar Filing: BADGER METER INC - Form 10-K405

Raw Materials

Raw materials used in the manufacture of the company's products include metal or alloys (such as bronze, aluminum, stainless steel, cast iron, brass and stellite), plastic resins, glass, microprocessors and other electronic subassemblies and components. There are multiple sources for these raw materials, but the company purchases some bronze castings and certain electronic subassemblies from single suppliers. The company believes these items would be available from other sources, but that the loss of its current suppliers would result in higher cost of materials, delivery delays, short-term increases in inventory and higher quality control costs. The company carries business interruption insurance on key suppliers. Prices may also be affected by world commodity markets.

2

Research and Development

Expenditures for research and development activities relating to the development of new products, the improvement of existing products and manufacturing process improvements were \$5,422,000 during 2001, as compared to \$6,562,000 during 2000 and \$6,012,000 during 1999. Research and development activities are primarily sponsored by the company. The company also engages in some joint research and development with other companies.

Intangible Assets

The company owns or controls many patents, trademarks, trade names and license agreements in the United States and other countries that relate to its products and technologies. No single patent, trademark, trade name or license is material to the company's business as a whole.

Environmental Protection

The company is subject to contingencies relative to compliance with Federal, State and local provisions and regulations relating to the protection of the environment. Currently the company is in the process of resolving an issue relative to a landfill site. The company does not believe the ultimate resolution of this issue will have a material adverse effect on the company's financial position or results of operations. Expenditures during 2001 and 2000 for compliance with environmental control provisions and regulations were not material and the company does not anticipate any material future expenditures.

To insure compliance with environmental regulations at company sites, the Board of Directors has established a Compliance Committee that monitors the company's compliance with various regulatory authorities in regard to environmental matters, among other things.

Employees

The company and its subsidiaries employed 936 persons at December 31, 2001, of which 230 employees are covered by a collective bargaining agreement with District 10 of the International Association of Machinists. The company is currently operating under a four-year contract with the union, which expires on October 31, 2004. The company has good relations with the union and all of its employees.

Foreign Operations and Export Sales

Edgar Filing: BADGER METER INC - Form 10-K405

The company has distributors and sales representatives throughout the world. Additionally, the company has a sales, assembly and distribution facility in Stuttgart, Germany, sales and customer service offices in Mexico City and Singapore, an assembly facility in Nogales, Mexico, and a manufacturing facility in Brno, Czech Republic. The company exports products from the United States that are manufactured in Milwaukee, Wisconsin, Tulsa, Oklahoma, and Rio Rico, Arizona.

Information about the company's foreign operations and export sales is included in Note 10 in the Notes to Consolidated Financial Statements of the company's 2001 Annual Report to Shareholders and such information is incorporated herein by reference.

Financial Information about Industry Segments

The company operates in one industry segment as a marketer and manufacturer of various flow measurement and control products as described in Note 10 in the Notes to Consolidated Financial Statements of the company's 2001 Annual Report to Shareholders and such information is incorporated herein by reference.

3

Item 2. Properties

The principal facilities utilized by the company at December 31, 2001, are listed below. Except as indicated, the company owns all of such facilities in fee simple. The company believes that its facilities are generally well maintained and have sufficient capacity for its current needs.

Location	Principal Use	Approximate (Square Feet)
Milwaukee, Wisconsin	Manufacturing and offices	323,000
Tulsa, Oklahoma	Manufacturing and offices	59,500
Rio Rico, Arizona	Manufacturing and offices	36,000
Nogales, Mexico	Assembly and offices	41,700
Stuttgart, Germany	Assembly and offices	23,000
Brno, Czech Republic	Manufacturing and offices	12,900

- (1) Leased facility. Lease term expires January 31, 2004.
- (2) Leased facility. Lease term expires December 31, 2005.

Item 3. Legal Proceedings

There are currently no material legal proceedings pending with relation to the company.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of the company's shareholders during the quarter ended December 31, 2001.

Executive Officers of the Company

The following table sets forth certain information regarding the executive officers of the company.

Name -----	Position -----	Age at 2/28/2002 -----
James L. Forbes	Chairman and Chief Executive Officer	69
Richard A. Meeusen	President	47
Robert D. Belan	Executive Vice President	61
Robert M. Bullis	Vice President - Manufacturing	52
