PROSPECTUS SUMMARY

The following summary contains basic information about this offering. It may not contain all the information that is important to an investor. For a more complete understanding of this offering, we encourage you to read this entire document and the documents to which we have referred.

In this prospectus or any accompanying prospectus supplement, unless otherwise indicated, the Company, ACC, we, us or our refer to Allied Capital Corporation and its subsidiaries.

THE COMPANY (Page 14)

We are a business development company and provide private investment capital to private and undervalued public companies in a variety of different industries throughout the United States. We have been investing in growing businesses for over 40 years and have financed thousands of companies nationwide. Our investment activity is focused in two areas:

private finance, and

commercial real estate finance, primarily the purchase of commercial mortgage-backed securities (CMBS). Our investment portfolio includes:

long-term unsecured loans with equity features,

equity investments in middle-market companies, which may or may not constitute a controlling equity interest,

commercial mortgage-backed securities, and

commercial mortgage loans.

We identify loans and investments through our numerous relationships with:

mezzanine and private equity investors,

investment banks, and

other intermediaries, including professional services firms.

In order to increase our sourcing and origination activities, we have two regional offices in New York and Chicago. We centralize our credit approval function and service our loans through an experienced staff of professionals at our headquarters in Washington, DC.

We have an advantageous tax structure, as compared to operating companies, that allows for the pass-through of income to our shareholders through dividends without the imposition of a corporate level of taxation. See Tax Status.

We are an internally managed diversified closed-end management investment company that has elected to be regulated as a business development company (BDC) under the Investment Company Act of 1940, as amended (1940 Act). Our investment objective is to achieve current income and capital gains. We seek to achieve our investment objective by investing in growing businesses in a variety of industries throughout the United States. As a BDC, we are required to meet regulatory tests, the most significant relating to its investments and borrowings. A BDC is required to invest at least 70% of its assets in private or thinly traded public, U.S.-based companies. A BDC must maintain a coverage ratio of assets to senior securities of at least 200%. See Business Certain Government Regulations.

We are quoted on the New York Stock Exchange and trade under the symbol ALD.

THE OFFERING (Page 80)

We may offer, from time to time, up to \$300,000,000 of our Securities, on terms to be determined at the time of offering.

Securities may be offered at prices and on terms described in one or more supplements to this prospectus. In the case of the offering of our common stock, the offering price per share less any underwriting commission or discount will not be less than the net asset value per share of our common stock at the time we make the offering.

Our Securities may be offered directly to one or more purchasers, through agents designated from time to time by us, or to or through underwriters or dealers. The supplement to this prospectus relating to the offering will identify any agents or underwriters involved in the sale of our Securities, and will set forth any applicable purchase price, fee and commission or discount arrangement between our agents and us or among our underwriters or the basis upon which such amount may be calculated.

We may not sell Securities without delivering a prospectus supplement describing the method and terms of the offering of our Securities.

USE OF PROCEEDS (Page 14)

Unless otherwise specified in the prospectus supplement accompanying this prospectus, we intend to use the net proceeds from selling Securities for general corporate purposes, which may include investments in private and undervalued public companies, purchase of CMBS, repayment of indebtedness, acquisitions and other general corporate purposes.

DISTRIBUTIONS (Page 15)

We pay quarterly dividends to holders of our common stock. The amount of our quarterly dividends is determined by the board of directors. Other types of Securities will likely pay distributions in accordance with their terms.

DIVIDEND REINVESTMENT PLAN (Page 74)

We have adopted an opt out dividend reinvestment plan (DRIP plan) for our common stockholders. Under the DRIP plan, if your shares of common stock are registered in your name, your dividends will be *automatically* reinvested in additional shares of our common stock unless you opt out of the DRIP plan.

PRINCIPAL RISK FACTORS (Page 8)

Investment in Securities involves certain risks relating to our structure and our investment objective that you should consider before purchasing Securities.

As a BDC, our consolidated portfolio includes securities primarily issued by privately held companies. These investments may involve a high degree of business and financial risk, and they are generally illiquid. A large number of entities and individuals compete for the same kind of investment opportunities as we do.

We borrow funds to make investments in private businesses. As a result, we are exposed to the risks of leverage, which may be considered a speculative investment technique. Borrowings, also known as leverage, magnify the potential for gain and loss on amounts invested and, therefore increase the risks associated with investing in our securities.

Also, we are subject to certain risks associated with investing in non-investment grade CMBS, valuing our portfolio, changing interest rates, accessing addi-

tional capital, fluctuating quarterly results, and operating in a regulated environment. In addition, the loss of pass-through tax treatment could have a material adverse effect on our total return, if any.

CERTAIN ANTI-TAKEOVER

PROVISIONS *(Page 77)*

Our charter and bylaws, as well as certain statutory and regulatory requirements, contain certain provisions that may have the effect of discouraging a third party from making an acquisition proposal for the Company. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price for our common stock.

FEES AND EXPENSES

This table describes the various costs and expenses that an investor in our Securities will bear directly or indirectly.

**Shareholder
Transaction Expenses**

Sales load (as a percentage of offering price)(1)
%

Dividend reinvestment plan fees(2)
None

Annual Expenses (as a percentage of consolidated net assets attributable to common stock)(3)

Operating expenses(4)
3.4%

Interest payments on borrowed funds(5)
5.1%

Total annual expenses(6)
8.5%

(1) In the event that the Securities to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will disclose the applicable sales load.

(2) The expenses of the Company's DRIP plan are included in Operating expenses. The Company has no cash purchase plan. The participants in the DRIP plan will bear a pro rata share of brokerage commissions incurred with respect to open market purchases, if any. See Dividend Reinvestment Plan.

(3) Consolidated net assets attributable to common stock equals net assets (*i.e.*, total assets less total liabilities and preferred stock) at September 30, 2001.

(4) Operating expenses represent the estimated operating expenses of the Company for the year ending December 31, 2001 excluding interest on indebtedness. This percentage for the year ended December 31, 2000 was 3.4%.

(5) The Interest payments on borrowed funds represents the estimated interest payments of the Company for the year ending December 31, 2001. The Company had outstanding borrowings of \$924.5 million at September 30, 2001. This percentage for the year ended December 31, 2000 was 5.6%. See Risk Factors.

(6) Total annual expenses as a percentage of consolidated net assets attributable to common stock are higher than the total annual expenses percentage would be for a company that is not leveraged. The Company borrows money to leverage its net assets and increase its total assets. The Securities and Exchange Commission requires that Total annual expenses percentage be calculated as a percentage of *net* assets, rather than the total assets, including assets that have been funded with borrowed monies. If the Total annual expenses percentage were calculated instead as a percentage of consolidated total assets, Total annual expenses for the Company would be 4.9% of consolidated total assets.

Example

The following example, required by the Commission, demonstrates the projected dollar amount of total cumulative expenses that would be incurred over various periods with respect to a hypothetical investment in the Company. In calculating the following expense amounts, we assumed we would have no additional leverage and that our operating expenses would remain at the levels set forth in the table above. In the event that shares to which this prospectus relates are sold to or through underwriters, a corresponding prospectus supplement will restate this example to reflect the applicable sales load.

	<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
You would pay the following expenses on a \$1,000 investment, assuming a 5.0% annual return	\$85	\$254	\$425	\$852

Although the example assumes (as required by the Commission) a 5.0% annual return, our performance will vary and may result in a return of greater or less than 5.0%. In addition, while the example assumes reinvestment of all dividends and distributions at net asset value, participants in the DRIP plan may receive shares of common stock that we issue at or above net asset value or are purchased by the administrator of the DRIP plan, at the market price in effect at the time, which may be higher than, at, or below net asset value. See Dividend Reinvestment Plan.

The example should not be considered a representation of future expenses, and the actual expenses may be greater or less than those shown.

SELECTED CONSOLIDATED FINANCIAL DATA

You should read the consolidated financial information below with the Consolidated Financial Statements and Notes thereto included in this prospectus. Financial information for the years ended December 31, 2000, 1999, 1998, 1997 and 1996 has been derived from audited financial statements. On December 31, 1997, the Company consummated a merger of five predecessor companies. The selected financial data and all other information in this prospectus, unless otherwise indicated, reflects the operations of the Company with all periods restated as if the predecessor companies had merged as of the beginning of the earliest period presented. Quarterly financial information is derived from unaudited financial data, but in the opinion of management, reflects all adjustments (consisting only of normal recurring adjustments) which are necessary to present fairly the results for such interim periods. Interim results at and for the nine months ended September 30, 2001 are not necessarily indicative of the results that may be expected for the year ending December 31, 2001. See **Management's Discussion and Analysis of Financial Condition and Results of Operations** on page 16 for more information.
