PMC CAPITAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Interim Financial Statements:

The accompanying consolidated balance sheet of PMC Capital, Inc. (PMC Capital) and its wholly-owned regulated investment company subsidiaries (collectively, we , us or our) as of March 31, 2001 and the consolidated statements of income and cash flows for the three months ended March 31, 2001 and 2000 have not been audited by independent accountants. In the opinion of our management, the financial statements reflect all adjustments necessary to present fairly the financial position at March 31, 2001 and the results of operations for the three months ended March 31, 2001 and 2000. These adjustments are of a normal recurring nature.

Certain notes and other information have been omitted from the interim financial statements presented in this Quarterly Report on Form 10-Q. Therefore, these financial statements should be read in conjunction with our 2000 Annual Report on Form 10-K.

The preparation of financial statements in conformity with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The results for the three months ended March 31, 2001 are not necessarily indicative of future financial results.

Note 2. Reclassifications:

Certain prior period amounts have been reclassified to conform to the current year presentation.

Note 3. Business and Consolidation:

Business

PMC Capital is a diversified closed-end management investment company that operates as a business development company (BDC) under the Investment Company Act of 1940, as amended (the 1940 Act). Our common stock (the Common Stock) is traded on the American Stock Exchange under the symbol PMC.

We are engaged in the business of originating loans to small businesses either directly or through our three principal subsidiaries: First Western SBLC, Inc. (First Western), PMC Investment Corporation (PMCIC) and Western Financial Capital Corporation (Western Financial).

First Western, PMCIC and Western Financial are registered under the 1940 Act as diversified closed-end management investment companies. In addition, PMC Capital is either directly or indirectly the sole shareholder or partner of several non-investment company act subsidiaries.

Table of Contents

**PMC CAPITAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

These are: PMC Advisers, Ltd. and its subsidiary (PMC Advisers); PMC Funding Corp. and its subsidiary (PMC Funding); PMC Capital Limited Partnership (the 1996 Partnership); PMC Capital, L.P. 1998-1 (the 1998 Partnership) and PMC Capital, L.P. 1999-1 (the 1999 Partnership).

Additionally, PMC Capital owns approximately 33% of PMC Joint Venture, L.P. 2000 (the 2000 Joint Venture), and together with the 1996 Partnership, the 1998 Partnership and the 1999 Partnership, the Limited Partnerships).

Principles of Consolidation

The consolidated financial statements include the accounts of PMC Capital and its wholly-owned regulated investment company subsidiaries, First Western, PMCIC and Western Financial. Intercompany transactions have been eliminated in consolidation.

The accounts of our wholly-owned non-investment company act subsidiaries (other than the Limited Partnerships), PMC Advisers and PMC Funding are accounted for by the equity method of accounting in conformity with Federal securities laws. Our interests in the Limited Partnerships are accounted for as retained interests in transferred assets.

Note 4. Retained Interests in Transferred Assets:

Upon securitization and sale of our loan pools, we value the Retained Interest in accordance with SFAS No. 125 since our securitizations meet the definition of a transfer under SFAS No. 125. Our retained interests in transferred assets (the Retained Interests) are comprised of three separate assets: (1) the Reserve Fund, and the interest earned thereon, which consists of the cash required to be kept in a liquid cash account pursuant to the securitization documents, (2) the subordinated portion of the sold loans (commonly referred to as the B piece or the over-collateralized or OC portions of the loans), and (3) the excess cash flow that is to be received by us in the future after (a) payment of all interest and principal amount due to the purchaser of the loans or the Noteholders, (b) payment of all principal and interest on the B piece, (c) the repayment of the corpus of the Reserve Fund and (d) ongoing costs of the transaction. This excess cash flow is the interest-only strip receivable or the IO Receivable.

Table of Contents

**PMC CAPITAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

Our Retained Interests are comprised of the following as of March 31, 2001 and December 31, 2000, respectively:

March 31, 2001			
Total	OC Piece	Reserve Fund	IO Receivable

PMC Capital L.P. 1999-1. On June 3, 1999, the 1999 Partnership (a special purpose affiliate of PMC Capital) completed a private placement of approximately \$55.6 million of its Loan-Backed Fixed Rate Notes, Series 1999-1.

PMC Joint Venture, LP 2000. On December 18, 2000, the 2000 Joint Venture (a special purpose affiliate of PMC Capital and our affiliate, PMC Commercial Trust) completed a private placement of

Table of Contents

**PMC CAPITAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

approximately \$74.5 million of its Loan-Backed Fixed Rate Notes, Series 2000 (the 2000 Notes). PMC Capital owns approximately 33% of the 2000 Joint Venture as of March 31, 2001 and December 31, 2000. Accordingly, at inception PMC Capital's share of the 2000 Notes amounted to approximately \$24.9 million (the 2000 PMC Notes). At March 31, 2001, the aggregate remaining principal balance of PMC Capital's loans sold to the 2000 Joint Venture was \$27.9 million and the outstanding balance on the 2000 PMC Notes was \$24.9 million. During the three months ended March 31, 2001, our limited partnership share of the net income of the 2000 Joint Venture was approximately \$203,000.

Valuation of Retained Interests. As there is no quoted market value of Retained Interests, the fair value is based on management's estimate of the fair market value. This value may or may not vary significantly from what a willing buyer would pay for these assets. In determining the fair value of the Retained Interests related to our securitization and sale transactions, we utilize certain assumptions which include:

	SBA 7(a) Transactions	Non-SBA 7(a) Transactions
Prepayment rate (a)	Minimum 17% CPR	Minimum 7% CPR
Loss rate (b) Range from 0.4% to 0.7% per annum	Range from 0.3% to 0.6% per annum	
Discount rate (c) Range from 10.5% to 13.5%	Range from 8.0% to 13.5%	

- (a) The prepayment rate is based on current performance of the respective loan pools, adjusted for anticipated principal payments considering the current loan pools and similar loans. The minimum rates are for the twelve month period ending March 31, 2002.
- (b) Credit exposure exists to the extent of possible default on the underlying collateral requiring payment from anticipated future residual interests. We believe that a range of 0.3% to 0.7% loss rate covers this inherent risk. For SBA 7(a) guaranteed loan sales, there are no assumed losses since all principal losses are the responsibility of the SBA.
- (c) The discount rates are as of March 31, 2001 and are based upon our estimate of comparable rates which would be used by potential purchasers of similar assets. The discount rates (1) range from 8.0% to 8.8% for our B Pieces, (2) are 10.5% for our Reserve Fund and (3) are 13.5% for our IO Receivables.

Table of Contents

**PMC CAPITAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

In accordance with FASB No. 140, management has performed a sensitivity analysis of our Retained Interests to highlight the volatility that results when prepayments, losses and discount rates are different than management s original assumptions.

The following summarizes the results of the sensitivity analysis as of March 31, 2001:

<u>Changed Assumption</u>	<u>Pro-Forma Value</u>	<u>Asset Reduction</u>
Losses increase by 50 basis points per annum	\$ 29,441,000	\$ 2,728,000
Losses increase by 100 basis points per annum	\$ 26,844,000	\$ 5,325,000
Prepayments increase by 5% per annum	\$ 31,011,000	\$ 1,158,000
Prepayments increase by 10% per annum	\$ 30,138,000	\$ 2,031,000
Discount rates increase by 1%	\$ 30,884,000	\$ 1,285,000
Discount rates increase by 2%	\$ 29,718,000	\$ 2,451,000

Note 5. Dividends Paid and Declared:

In January 2001, we paid a quarterly dividend of \$0.25 per share of common stock to shareholders of record on December 31, 2000. On March 14, 2001, the Board declared a dividend of \$0.25 per share to shareholders of record on March 31, 2001, which was paid in April 2001. In the absence of unforeseen events, the Board has determined that the present level of quarterly dividends will be adjusted commencing with the dividend payable in July 2001. We anticipate that the quarterly dividend at that time will be reduced to a range between \$0.18 per share and \$0.22 per share.

Note 6. Net Unrealized Appreciation on Investments and Realized and Unrealized Gain (Loss) on Investments:

Net unrealized appreciation on investments is comprised of the following at March 31, 2001 and December 31, 2000:

March 31, 2001	December 31, 2000
■	■

(In thousands)

Edgar Filing: PMC CAPITAL INC - Form 10-Q

Loans receivable			
Retained interests in transferred assets	1,556,379	Other investments	8082
			\$1,219,802

Table of Contents

**PMC CAPITAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

Activity in our investments written-off and change in unrealized appreciation (depreciation) on investments is as follows:

	<u>Three Months Ended March 31, 2001</u>		
	<u>Retained Interests in Transferred Assets</u>	<u>Loans Receivable</u>	<u>Total</u>
Investments written-off	\$	\$ (290,000)	\$ (290,000)
Change in unrealized appreciation (depreciation) on investments	175,000	242,000	417,000
Total realized and unrealized gain (loss) on investments	\$175,000	\$(48,000)	\$127,000

	<u>Three Months Ended March 31, 2000</u>		
	<u>Retained Interests in Transferred Assets</u>	<u>Loans Receivable</u>	<u>Total</u>
Investments written-off	\$	\$ (5,000)	\$ (5,000)

Change in unrealized appreciation (depreciation)
on investments 110,000 33,000 143,000

Total realized and unrealized gain (loss) on
investments \$110,000 \$28,000 \$138,000

Note 7. Earnings Per Common Share Computations:

The computations of basic earnings per common share are based on the weighted average number of our shares outstanding. The weighted average number of shares used in the computations of basic earnings per common share was 11,853,000 and 11,829,000 for the three months ended March 31, 2001 and 2000, respectively. The fully diluted weighted average shares outstanding were 11,857,000 during the three months ended March 31, 2001. There was no change in the weighted average shares outstanding for the effect of stock options during the three months ended March 31, 2000 since the stock options were anti-dilutive. Earnings are defined as the net operating income and realized and unrealized gain (loss) on investments reduced by the preferred stock dividend requirements of PMCIC.

Note 8. Commitments and Contingencies:

Loan commitments outstanding at March 31, 2001 to various small business companies, including the unfunded portion of projects in the construction phase, amounted to approximately \$54.0 million. Of these commitments, \$16.9 million are for loans to be originated by First Western, a portion of which will be sold into the secondary market. These commitments are made in the ordinary course of our business and, in our opinion, are

Table of Contents

**PMC CAPITAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)**

generally on the same terms as those to existing borrowers. Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and require payment of a fee. Since some commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Note 9. Recent Accounting Pronouncements:

In September 2000, the Financial Accounting Standards Board (FASB) issued SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. SFAS No. 140 replaces SFAS No. 125. SFAS No. 140 revises the standards for accounting for securitizations and other transfers of financial assets and collateral and requires certain disclosures, but carries over most of SFAS No. 125 s provisions without reconsideration. The accounting provisions of SFAS No. 140 should be applied prospectively to transfers of financial assets occurring after March 31, 2001. We do not anticipate that the impact of SFAS No. 140 will have a material effect on our consolidated financial statements.

Table of Contents**PART I
Financial Information****ITEM 2.
Management's Discussion and Analysis of Financial Condition
and Results of Operations****Results of Operations*****General***

Our operations include originating, servicing and selling commercial loans. We sell the government guaranteed portion of our loans originated under the SBA 7(a) program and sell commercial mortgage loans through securitizations and structured financings. Historically, we have retained servicing rights and residual interests in all loans sold. Servicing rights include the right to collect payments on behalf of the loan purchaser, monitor the loan for any defaults and address any problems in collecting the required principal and interest payments. We retain a residual interest in sold loans by owning a percentage of the related loan and by establishing cash reserves to cover future losses relating to the sold loans through our ownership in our Special Purpose Entities (the "SPEs"). In addition, we operate as an investment manager to evaluate properties and loans and to service loans and lease contracts pursuant to fee arrangements with PMC Commercial. Our revenue sources include the following:

Interest earned on commercial loans originated and retained including the effect of commitment fees collected at the inception of the loan.

Earnings on the retained interests in transferred assets.

Fee income from the management of PMC Commercial's property and loan portfolios.

Equity interests in the income of our non-investment company unconsolidated subsidiaries.

Premiums recognized from the sale of the government guaranteed portion of SBA 7(a) program loans into the secondary market.

Interest earned on temporary (short-term) investments.

Gains relating to securitizations.

Other fees, including: late fees, prepayment fees, construction monitoring and site visit fees.

Interest income includes the stated interest rate earned on a loan and the collection of loan origination fees. Our ability to generate interest income is dependent on economic, regulatory and competitive factors that influence interest rates and loan originations, and our ability to secure financing for our investment activities. For a more detailed description of the risk factors affecting our financial condition and results of operations, see Risk Factors in Item 1 of our Annual Report on Form 10-K.

Table of Contents

The value of our retained loan portfolio increased by \$12.4 million (12%) to \$112.8 million at March 31, 2001 from \$100.4 million at December 31, 2000. During the three months ended March 31, 2001 and 2000, we originated investments in loans totaling \$15.6 million and \$13.2 million and received repayments and sold loans totaling, in the aggregate, \$3.6 million and \$3.8 million, respectively. Our serviced loan portfolio increased by \$6.6 million (2%) to \$314.3 million at March 31, 2001 from \$307.7 million at December 31, 2000.

As a result of several factors, the number and dollar volume of loans originated under the SBA 7(a) program have decreased. The primary factors that contributed to this decrease were an increase in competition from alternative loan products and an increase in competition to originate SBA 7(a) program loans from other SBA 7(a) program lenders. These other products often provide prospective borrowers with fixed interest rates at less than the floating interest rates available through the SBA 7(a) program. In addition, due to the high rate of prepayments experienced by lenders in the limited service hospitality industry, purchasers of the guaranteed portion of our SBA 7(a) loans have significantly decreased the premium paid for these assets. Accordingly, SBA 7(a) program funding and the premiums earned on the sales of the government guaranteed portions of these loans remained at significantly lower levels than prior to 1998. During the three months ended March 31, 2001 funding of SBA 7(a) program loans was \$1.0 million, a decrease of 70% from the \$3.3 million funded during the three months ended March 31, 2000.

During the three months ended March 31, 2001 and 2000 and the years ended December 31, 2000, 1999 and 1998, we received \$1.3 million, \$2.6 million, \$11.2 million, \$15.4 million and \$24.7 million, respectively, in collections of principal on retained loans including prepayments. As a percentage of our total retained loan portfolio, these collections were 5% and 10% during the three months ended March 31, 2001 and 2000, respectively, on an annualized basis and were 11%, 15% and 19% during the years ended December 31, 2000, 1999 and 1998, respectively. Prepayments generally increase during times of declining interest rates. When fixed interest rate loans are paid-off prior to their maturity, we receive the immediate benefit of prepayment charges. Prepayment charges result in one-time increases in our other investment income. The proceeds from the prepayments we have received were invested initially in temporary investments and have generally been re-loaned or committed to be re-loaned at lower interest rates than the prepaid loans. The lower interest rates we receive on these new loans have had an adverse effect on our results of operations and depending upon the rate of future prepayments may further impact our results of operations.

We believe that as a result of the current interest rate environment (the prime rate was decreased by 1.5% during the first quarter of 2001), we may see prepayment activity at levels greater than the levels of prepayment activity experienced during 2000 and the first quarter of 2001. However, since we do not expect the competition to be as strong during this period of reduced interest rates, we do not expect that the prepayment activity will be as high as it was during 1998.

Substantially all of the First Western loans are variable-rate which reset quarterly based on a spread above the prime rate of interest as stated in *The Wall Street Journal* on the

Table of Contents

first day of the applicable period (the Prime Rate). The spread over the Prime Rate charged by First Western ranges from 0.5% to 2.75%.

The Prime Rates for variable-rate loans are as follows:

	<u>2001</u>	<u>2000</u>	<u>1999</u>
First Quarter	9.50%	8.50%	7.75%
Second Quarter	8.00%	9.00%	7.75%
Third Quarter	9.50%	8.00%	Fourth
Fourth Quarter	9.50%	8.25%	

The Prime Rate used for the first quarter of 2001 was 9.5%. The Prime Rate was decreased during the first quarter of 2001 from 9.5% to 8.0%. This reduction to the Prime Rate reduced the rate we charge on variable rate loans by 1.5% effective April 1, 2001. At March 31, 2001, approximately \$29.7 million of our retained loan portfolio had a variable interest rate. In addition, the Prime Rate was reduced by an additional 0.5% during April, 2001. Assuming there are no other changes to the Prime Rate and our variable rate portfolio pays in accordance with the contractual terms, this 2.0% drop in interest rates will reduce our interest income by approximately \$600,000 on an annual basis.

The reduction in interest rates will also reduce our LIBOR based interest expense on \$15 million of variable interest rate debt by approximately \$300,000 on an annual basis assuming the same 2% reduction in the LIBOR.

We receive other investment income from various sources including prepayment fees, late fees, construction monitoring fees and site visit fees. The amount of other investment income earned will vary based on volume of loans funded, the timing and amount of financings, volume of loans which prepay, the mix of loans (construction versus non-construction), the rate and type of loans originated (whether fixed or variable) as well as the general level of interest rates.

Expenses primarily consist of interest expense, salaries and related benefits and overhead. General and administrative expenditures consist primarily of insurance, advertising and promotional expense, telephone services, corporate printing costs, and general office expenses. In addition, we have other administrative costs which consist of profit sharing plan, rent, legal and accounting, SBA fees and directors and shareholders expense. Our operations are centralized in Dallas, Texas where our headquarters are located. We presently have additional business development offices located in Kansas City, Missouri, Atlanta, Georgia and Phoenix, Arizona.

Table of Contents

Economy and Competition:

Our primary competition has come from banks, financial institutions and other lending companies. Some of these competitors have greater financial and larger managerial resources than us and are able to provide services we are not able to provide (i.e. depository services). We believe we compete effectively with such entities on the basis of the variety of our lending programs offered, the interest rates, our long-term maturities and payment schedules, the quality of our service, our reputation as a lender, the timely credit analysis and decision-making processes, and the renewal options available to borrowers.

Since the beginning of 2001, we have seen an increase in loan origination opportunities due to the reductions in prime rate during the first quarter of 2001 and competition lessening from banks. Based on this increased activity, we expect the volume of new loans funded in 2001 to exceed our 2000 level of \$44.1 million but be less than our 1999 level of \$86.4 million.

Recently Issued Accounting Pronouncements

In September 2000, the Financial Accounting Standards Board (FASB) issued SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. SFAS No. 140 replaces SFAS No. 125. SFAS No. 140 revises the standards for accounting for securitizations and other transfers of financial assets and collateral and requires certain disclosures, but carries over most of SFAS No. 125's provisions without reconsideration. The accounting provisions of SFAS No. 140 should be applied prospectively to transfers of financial assets occurring after March 31, 2001. We do not anticipate that the impact of SFAS No. 140 will have a material effect on our consolidated financial statements.

In September 1998, the FASB issued SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities. SFAS No. 133 establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, (collectively referred to as derivatives) and for hedging activities. It requires that an entity recognize all derivatives as either assets or liabilities in the statement of financial position and measure those instruments at fair value. In September 1999, the FASB issued SFAS No. 137, Accounting for Derivative Instruments and Hedging Activities - Deferral of the Effective Date of FASB Statement No. 133. SFAS No. 133 was originally effective for all fiscal quarters of fiscal years beginning after September 15, 1999. SFAS No. 137 deferred the effective date of SFAS No. 133 to all fiscal quarters of all fiscal years beginning after June 15, 2000. SFAS No. 133 has no impact upon us as we had no derivative financial instruments.

Three Months Ended March 31, 2001 Compared to the Three Months Ended March 31, 2000

Net income decreased by \$156,000 (6%), to \$2,460,000 during the three months ended March 31, 2001 from \$2,616,000 during the three months ended March 31, 2000. The most significant reason for the decrease in net income was the reduced interest income combined with increased interest expense. The reduction in interest income was primarily a result of the securitization and sale of 22% of our loan portfolio during December 2000. Until the proceeds received from this transaction are fully reinvested in loans to small businesses, future earnings

Table of Contents

will not be comparable with earnings of prior quarters. The proceeds should be substantially reinvested by June 30, 2001. Our interest expense increased primarily due to an increase in interest rates on our SBA debentures.

Interest income: Interest income decreased by \$78,000 (2%), to \$3,154,000 for the three months ended March 31, 2001 from \$3,232,000 for the three months ended March 31, 2000. Interest income includes the interest earned on loans, the interest earned on short-term (temporary) investments and up-front fees collected. This overall decrease was primarily attributable to the securitization and sale of over \$28 million in loans during December 2000.

Interest income and commitment fees received on loans decreased by \$86,000 (3%), to \$2,977,000 during the three months ended March 31, 2001 from \$3,063,000 during the three months ended March 31, 2000. Interest income on loans decreased by \$94,000 (3%), to \$2,822,000 during the three months ended March 31, 2001 from \$2,916,000 during the three months ended March 31, 2000 as a result of a decrease in the weighted average retained loan portfolio outstanding of \$4.0 million (4%) to \$106.6 million during the three months ended March 31, 2001 from \$110.6 million during the three months ended March 31, 2000. Partially offsetting the effects of the decreased portfolio and interest rates was an increase in the recognition of commitment fee income. During the three months ended March 31, 2001, we recognized approximately \$155,000 of up-front fees compared to \$147,000 in up-front fees during the three months ended March 31, 2000. The increase of \$8,000 in commitment fees is attributable to increased loan originations.

Interest on other investments (which consists of interest on temporary investments) for the three months ended March 31, 2001 was \$177,000 which was \$8,000 (5%) greater than the \$169,000 in interest income on other investments earned during the three months ended March 31, 2000. The increase relates to an increase in interest rates on our temporary investments outstanding during 2001 compared to 2000. The weighted average interest rate increased by 0.6% (15%), to 4.7% during the three months ended March 31, 2001 from 4.1% during the three months ended March 31, 2000. The increase was offset by a decrease in weighted average temporary investments by \$1.5 million (9%), to \$15.2 million during the three months ended March 31, 2001 from \$16.7 million during the three months ended March 31, 2000.

Income from retained interests in transferred assets: Income from retained interests in transferred assets increased by \$211,000 (20%), to \$1,265,000 for the three months ended March 31, 2001 from \$1,054,000 for the three months ended March 31, 2000. The income from retained interests in transferred assets is comprised of the yield received from our investment in our Retained Interests. This increase was primarily a result of the income from the Retained Interests from our securitization completed in December 2000 and an increase in income recognized on our securitization completed in 1999 resulting from lower than anticipated losses and lower than anticipated prepayment speeds.

Premium income: Premium income decreased by \$9,000 (8%), to \$110,000 for the three months ended March 31, 2001 from \$119,000 for the three months ended March 31, 2000. Proceeds from the sale of the government guaranteed portion of loans (under the SBA

Table of Contents

7(a) program) were \$2,264,000 during the three months ended March 31, 2001 compared to \$1,211,000 during the three months ended March 31, 2000.

Other investment income, net: Other investment income, net, increased by \$36,000 (28%), to \$163,000 for the three months ended March 31, 2001 from \$127,000 for the three months ended March 31, 2000. This increase was primarily attributable to an increase in servicing fees received during the three months ended March 31, 2001 relating to the 2000 Joint Venture completed in December 2000.

Other income, net: Other income, net, decreased by \$28,000 (6%), to \$471,000 during the three months ended March 31, 2001 from \$499,000 during the three months ended March 31, 2000. Other income was reduced during the three months ended March 31, 2001 primarily as a result of the reduction in fees charged PMC Commercial pursuant to the modification in the investment management agreement effective July 2000.

Equity in income (loss) of unconsolidated subsidiaries: As a BDC, we do not consolidate the operations of our non-investment company subsidiaries. Instead we are required to recognize the income of our non-investment company subsidiaries under the equity method of accounting. Earnings of our unconsolidated subsidiaries, not including the SPEs established by us in connection with the structured sales of our loans, are reflected as a single line item (Equity in income (loss) of unconsolidated subsidiaries) on our consolidated statements of income.

Equity in income (loss) of unconsolidated subsidiaries decreased by \$40,000 (31%), to \$90,000 during the three months ended March 31, 2001 from \$130,000 during the three months ended March 31, 2000.

The decrease was a result of the following:

The net income of PMC Advisers was \$120,000 during the three months ended March 31, 2001 compared to \$128,000 during the three months ended March 31, 2000. The decrease was primarily a result of the sale by PMC Commercial of two properties during the three months ended March 31, 2001.

PMC Funding had a net loss of \$30,000 during the three months ended March 31, 2001 as compared to a \$2,000 gain during the three months ended March 31, 2000.

Operating expenses, not including interest expense: Operating expenses, not including interest, increased by \$121,000 (9%), to \$1,540,000 during the three months ended March 31, 2001 from \$1,419,000 during the three months ended March 31, 2000. Operating expenses are comprised of salaries and related benefits, general and administrative, profit sharing plan, rent, legal and accounting, SBA fees and directors and shareholders expense. The largest operating expense is salaries and related benefits which consist of salaries for our officers and employees who provide all of our management, advisory and portfolio functions, including marketing, servicing, accounting and portfolio analysis. We had an increase in salaries and related benefits of \$81,000 (8%), to \$1,068,000 during the three months ended March 31, 2001 from \$987,000 during the three months ended March 31, 2000. The increase

Table of Contents

in salaries and related benefits was primarily attributable to general cost of living increases in salaries and benefits and an increase in our marketing staff.

Interest expense: Interest expense increased by \$116,000 (9%), to \$1,380,000 during the three months ended March 31, 2001 from \$1,264,000 during the three months ended March 31, 2000. Interest expense results primarily from interest on (i) our unsecured notes (as of March 31, 2001 and 2000 the outstanding balances were \$41.7 million and \$38.3 million, respectively) with a weighted average interest rate of 7.5% and weighted average remaining maturity of 2.7 years as of March 31, 2001, and (ii) debentures due to the SBA (as of March 31, 2001 and 2000 the outstanding balances were \$31.3 million and \$31.6 million respectively), with a weighted average interest rate of approximately 7.6% and weighted average remaining maturity of 5.4 years as of March 31, 2001. The increase in interest expense primarily resulted from an additional \$3.3 million in unsecured notes issued during July 2000 and an increase of 3% in the interest rate on \$12 million of SBA debentures as a result of the SBA subsidy period expiring with respect to those debentures.

Realized and unrealized gain (loss) on investments: The net realized and unrealized gain on investments was \$127,000 and \$138,000 during the three months ended March 31, 2001 and 2000, respectively.

During the three months ended March 31, 2001, we recognized net unrealized gains on our Retained Interests of \$175,000 compared to net unrealized gains of \$110,000 during the three months ended March 31, 2000. The primary reason for the net gains in the first quarter of 2001 was lower losses than anticipated and reduced discount rates resulting from the lower interest rate environment. The primary reason for the net gains in the first quarter of 2000 was the low rate of prepayment and loss activity related to the structured loan sale completed in June 1999.

We also recognized \$48,000 of net loan losses during the three months ended March 31, 2001 compared to \$28,000 in net loan valuation gains during the three months ended March 31, 2000. These gains and losses were minimal. Loan losses (including the change in unrealized appreciation (depreciation) on loans) were 0.48% and 0.10% of our weighted average outstanding portfolio during the twelve month periods ended March 31, 2001 and 2000, respectively.

Table of Contents

Cash Flow Analysis

Cash Flow From Operating Activities: We generated cash flow from operating activities of \$3,388,000 during the three months ended March 31, 2001 and had a net use of funds of \$760,000 during the three months ended March 31, 2000. This increase in source of funds of \$4,148,000 primarily relates to our government guaranteed lending activity. During the three months ended March 31, 2001, we generated net proceeds of \$1,537,000 from our government guaranteed lending activity compared to a net use of \$1,087,000 during the three months ended March 31, 2000.

Cash Flow From Investing Activities: We used cash of \$13,247,000 and \$4,512,000 from investing activities during the three months ended March 31, 2001 and 2000, respectively. This \$8,735,000 increase in cash flows used in investing activities relates primarily to a net increase in loans funded less principal collected of \$5,311,000 and a reduction in advances from unconsolidated affiliates of \$2,059,000.

Cash Flow From Financing Activities: We used cash of \$3,026,000 and \$7,197,000 from financing activities during the three months ended March 31, 2001 and 2000, respectively. This \$4,171,000 decrease in cash flows used in financing activities relates primarily to the repayment at maturity of \$4,000,000 in SBA debentures during the three months ended March 31, 2000.

Liquidity and Capital Resources

Sources and uses of funds:

As a regulated investment company, pursuant to the Internal Revenue Code, we are required to pay out substantially all of our net investment company taxable income to our common shareholders (see Dividends below). Consequently, we must procure funds from sources other than earnings in order to meet our capital requirements. In addition, as a BDC, we are generally required to maintain a ratio of at least 200% of total assets to total borrowings, which may restrict our ability to borrow in certain circumstances.

Our primary use of funds is to originate loans. We also expend funds primarily for payment of:

dividends to shareholders,

principal payments on borrowings,

interest and related financing costs, and

salaries and other general and administrative expenses.

Historically, our sources of capital and liquidity have been:

the structured sale or securitization of a portion of our loan portfolio,

debentures and preferred stock issued through programs of the SBA,

private and public issuances of common stock,

the issuance of senior unsecured medium-term notes, and

the utilization of our short-term, unsecured revolving credit facility.

Table of Contents

Our primary source of capital has most recently been through the structured sale of loans. In order to generate growth in the size of our investment portfolio and meet our outstanding loan commitments, we will need to obtain additional funds from:

securitization and sale of a portion of the loan portfolio,

borrowings under our credit facility,

medium-term debt offerings, and/or

the issuance of equity .

At March 31, 2001, we had approximately \$9 million of cash and cash equivalents, availability of \$15 million under our revolving credit facility and approximately \$54 million of total loan commitments and approvals outstanding (see Commitments below). In order to meet these commitments and fund our anticipated volume of loan originations during 2001, we anticipate the full utilization of our cash and cash equivalents on hand and our \$15 million revolving credit facility by the end of the third quarter of 2001. As a result, we anticipate the need to complete a securitization transaction during the second or third quarter of 2001. At present, we have commenced the securitization process and have an available loan pool of greater than \$50 million that could be used in a securitization transaction. As we have received the required exemptive relief from the Securities and Exchange Commission to permit us to co-securitize our loan portfolio with PMC Commercial, we expect to complete a co-securitization with PMC Commercial. Co-securitizing allows us to achieve a more cost-efficient cost of funds, a lower retained interest in loans securitized and more timely access to the securitization market.

Additional sources of capital include principal collections on our existing loan portfolio and proceeds from the sale of SBA 7(a) program loans in the secondary market. To the extent commitments pertain to PMCIC or Western Financial, we should be able to issue SBA debentures to fund those commitments. Management believes that these financing sources will enable us to generate funds sufficient to meet both our short-term and long-term capital needs.

There can be no assurances that we will be able to complete the above transactions at acceptable advance rates and/or interest rates. If not, we may have to refer commitments to PMC Commercial, issue debt at decreased loan-to-value ratios or increased interests rates and/or sell assets to meet our committed obligations when and if they come due.

Commitments:

Loan commitments outstanding at March 31, 2001 to various prospective small business companies, including the unfunded portion of projects in the construction phase, amounted to approximately \$54.0 million. Of these commitments, \$16.9 million were for loans partially guaranteed by the SBA, \$12.0 million is expected to be sold (when fully funded) into the secondary market. Such commitments are made in the ordinary course of our business. Commitments to extend credit are agreements to lend to a customer provided that the terms established in the contract are met. Commitments generally have fixed expiration dates and require payment of a fee. Since some commitments expire without the proposed loan closing, the total commitment amounts do not necessarily represent future cash requirements.

Table of Contents

Debt:

At March 31, 2001, we did not have any borrowings outstanding under our revolving credit facility, and had availability of \$15.0 million. Advances under to the credit facility bear interest at our option of either the lender's prime rate less 50 basis points or LIBOR plus 175 basis points. The credit facility requires we meet certain covenants, the most restrictive of which provides that the ratio of net charge-offs to net loans receivable may not exceed 2%, and liquidity covenants which require that the ratio of assets to senior debt (as defined in the credit facility) may not fall below 125%, as amended, with respect to PMC Capital and 150% including our consolidated subsidiaries. At March 31, 2001 we were in compliance with all of the covenants of this facility.

We have \$6.7 million in senior notes that mature in July 2001. We currently are working with the lender and anticipate that these senior notes will be rolled over into new senior notes.

Investment Company Act Requirements:

PMC Capital is in compliance with the requirement to maintain a minimum of 200% asset coverage of debt as defined in sections 18 and 61 of the 1940 Act as modified by exemptive orders obtained by us from the Securities and Exchange Commission.

Dividends:

PMC Capital has historically paid at least 100% of its investment company taxable income. There are certain timing differences between book and tax income, most notably the recognition of income relating to our securitizations. As a result of these timing differences and the anticipation of cash flows from our unconsolidated subsidiaries, the payment and amount of dividends does not necessarily coincide with our earnings and we may have a distribution of dividends in excess of our net operating income. In addition, our dividends paid since we became an investment company exceeded our earnings and profits for tax purposes. During 2000, we recognized a 22.5% return of capital for dividend reporting purposes. The computation of return of capital provides for several timing differences, most notably relating to the recognition of gain treatment on securitization transactions.

In March 2001, the Board declared a dividend of \$0.25 per share to shareholders of record on March 31, 2001, which was paid in April 2001. In the absence of unforeseen events, the Board has determined that the present level of quarterly dividends will be adjusted commencing with the dividend payment in July 2001. At that time, we anticipate that the quarterly dividend will be reduced to a range between \$0.18 per share and \$0.22 per share. Our Board of Directors may amend our dividend policy as warranted by actual and/or anticipated earnings.

Table of Contents

**Item 3.
Quantitative and qualitative disclosures about market risk**

We are subject to market risk associated with changes in interest rates since our balance sheet consists of items subject to interest rate risk.

A majority of our investment portfolio (approximately 70%) consists of fixed interest rate loans and, as a result, changes in interest rates should not have a direct impact on interest income. Changes in market interest rates are considered by our Board of Directors in its determination of fair value of our loans. To date, changes in market interest rates have not had a significant effect on the Board of Directors' determination. However, future interest rate changes could have an impact. Significant reductions in interest rates, however, can prompt increased prepayments of our loans, resulting in possible decreases in long-term revenues due to the re-lending of the prepayment proceeds at lower interest rates.

The sensitivity of our variable-rate portfolio and debt to changes in interest rates is regularly monitored and analyzed by measuring the characteristics of our assets and liabilities. We assess interest rate risk in terms of the potential effect on interest income net of interest expense, the value of net assets and the value at risk in an effort to ensure that we are insulated from any significant adverse effects from changes in interest rates. Based on our analysis of the sensitivity of interest income net of interest expense, if the balance sheet were to remain constant and no actions were taken to alter the existing interest rate sensitivity, a hypothetical immediate 100 basis point change in interest rates would have affected net income by approximately 1.5% over a one year period.

We have an investment in Retained Interests which is valued by our Board of Directors based on various factors including estimates of appropriate market discount rates. Significant reductions (or increases) in the discount rates used by the Board of Directors in determining the valuation of the Retained Interests will have an impact on the value. If market rates, and consequently the discount rates used by the Board, were to increase by 1% or 2% from current rates, the value of our Retained Interests would diminish by \$1.3 million and \$2.6 million, respectively.

In addition, our liabilities include debt payable to the SBA and our senior unsecured debt. The SBA debentures and the senior unsecured debt are primarily payable at fixed rates of interest, so changes in interest rates do not affect our interest expense.

Although management believes that the above described measures are indicative of our sensitivity to interest rate changes, it does not adjust for potential changes in credit quality, size and composition of our balance sheet and other business developments that could affect our net income. Accordingly, no assurances can be given that actual results would not differ materially from the potential outcome simulated by these estimates.
